I must salute the appearance of a new Albanian journal at Tirana, the *Dit' e Re* ("The New Day"), the first number of which was published on March 29. Heretofore Tirana has had no political journal: the Albanian newspapers were published at: Kortcha (which has four political journals, one published thrice weekly, the others weekly), Valona (two), Scutari (one), Elbasan (one), Argyrokastro (two) and Fieri (two). Most of those organs were on the side of the Opposition, and stern critics of the Government. It is worthy of remark, however, that in spite of this spirit in the Press, the population of the provinces—especially of Kortcha and of Argyrokastro, where the Press has been most frankly hostile to the Government—was prompt in sending volunteers to Tirana when the troubles broke out.

The Agrarian Movement.

The journal at Fieri (Muzekie), of which mention is made above, is an organ of the Agrarian party, and its title is *Duërsa e Bujkut* ("The Sweat of the Cultivator"). Its object is to safeguard the interests of the cultivators who till the soil of the large landowners and are not themselves owners of land. Thus, it advocates in principle the division and distribution of the land, subject be it noted, to compensation of the present holders. The Agrarian party has its champions in parliament. The movement is but feeble as yet and has not given rise to any militant policy, but it seems to be worth mentioning as we may hear more of it in the future.

BULGARIA.

Sofia, April 11.

Genoa.

MM. Stambolisky and Turlakoff, accompanied by half a dozen experts, left Sofia last week for Genoa. The Prime Minister expects to be back in Sofia by the end of the month, as many matters require his attention. M. Kosta Theodoroff, Bulgarian Minister at Belgrade, and M. Stancioff, Minister at London, will join the Bulgarian delegation at Genoa. Speaking to a Press representative on the morning of his departure, the Prime Minister said that the Opposition parties had been given the chance of sending representatives to Genoa but they had refused. He added that he did not in the

least regret their refusal. Referring to the statement that most of the nations attending the Conference were divided up into Big, Little, or Neutral ententes, M. Stambolisky said that Bulgaria was going to Genoa without any ties and practically without any friends.

Government and the Inter-Allied Commission.

The financial aspect of the Note sent by the Inter-Allied Commission to the Government is dealt with more fully on another page, but the political aspect of the situation is also worthy of regard.

From every point of view Bulgaria is in a most unfortunate position. She cannot resist the putting into force of the Treaty of Neuilly, because she has no "big brother" to stand beside her and comfort her; and she is surrounded by countries that are determined to see the Treaty executed to the last letter. It is understood that the representative of Yugoslavia, Roumania, and Greece on the Reparations Commission at Paris objected very strongly to any concessions being made to Bulgaria regarding the financial clauses of the Treaty. It is in fact supposed that the intervention of the Balkan Powers' representative was the signal for the terms being made more severe than they would otherwise have been.

Bulgaria had looked to France to support her in her effort to obtain easier terms, but she has been sadly disillusioned. She is now in a somewhat bitter mood, and it is safe to say that the Allies have never been more unpopular than they are to-day. The entire Press has been unanimous in attacking the Commission of Reparations, and although no untoward incidents have marked the week, there is no doubt that there is a very strong current of public opinion which feels that the rights and independence of Bulgaria are seriously impugned by the Commission's Note.

The "Organ" of Liquidation again.

One of the duties entrusted to the "Organ" of Liquidation was that of disarming the civil population. It now transpires that the "Organ" have requested the Bulgarian Government to take steps whereby all the swords in the possession of ex-officers and others may be immediately handed over. Unless this tale is untrue—and the authority is an excellent one—it is hard to believe that the "Organ" is composed of Allied officers. From time immemorial, officers, even although belonging to a vanquished foe, have been allowed to keep their swords, and now three and a-half years after the conclusion of the Armistice, we are treated to the spectacle of demobilised officers in Bulgaria being made to deliver up their swords!

New Archbishop for Sofia.

On Saturday, the 8th, Mgr. Stefan, the new Archbishop of Sofia, entered on his appointment. He travelled by special train from the Monastery of Tcheripich to Sofia, being met on the outskirts of the city by M. Tzvetinoff, of the Bulgarian Foreign Office who welcomed him in the name of the Government. Afterwards, accompanied by numerous Clergy, the Archbishop attended a service at the Cathedral. The King, the acting Prime Minister, M. Daskaloff, and others were amongst those present.

CYPRUS.

Nicosia, March 28.

The Legislative Council.

On opening the session, the High Commissioner in a short speech referred to several important laws which would come up for consideration. He also alluded to the work of Colonel W. M. Ellis, C.I.E., R.E., who has been engaged in studying the problem of a development of irrigation work in the island. It is hoped that he will be able to submit his report very shortly. Col. Ellis was formerly Chief Engineer in the Madras Presidency. Whatever may be the views expressed, one thing is certain; that it is essential, as Sir Wyndham Dunstan has said, that no schemes for water storage should be decided upon, except on the fullest expert advice.

In an extraordinary *Gazette* of 50 pages the drafts of two laws are published, one to provide for the regulation

of Companies with limited liability, the other for the publication of a collected and revised edition of the laws of Cyprus.

The "National Council."

This body, which the Greek speaking promoters of "union with Greece" have brought into being, began its work on March 16, which is they say to be considered as a "historic day," from which the movement is to enter upon a new phase. The "so-called Legislative Council" is entirely ignored, and the people are told that, the voice of the majority being smothered, the new body is to sever itself from all connection with it! On the opening day Nicosia was beflagged, the Greek schools had a holiday, and church bells were rung. There was a gathering in the Cathedral Church, and in the courtyard of the Archbishop's residence. Banners and the Hellenic flag were carried, and the Archbishop was joined by the Bishops and the Abbot of Kykkou, the principal monastery. An address was delivered by the Bishop of Kition, on behalf of the Holy Synod. At 2 p.m. an opening speech was made by the Archbishop in which the aims of the National Council were set forth. All that was needed, he said, was systematic and increasing work for the cause, in the spirit that inspired their ancestors.

The Holy Synod.

A letter has been received from the Patriarch of Alexandria, in reply to the proposal of the Synod that the Churches of Alexandria and Cyprus should jointly offer mediation with a view to a peaceful solution of the differences which now divide the Churches of Athens and Constantinople, in respect of the election of the Œcumenical Patriarch Meletios IV. While commending the action of the Archbishop and Synod in the cause of peace, the Patriarch considers that in view of the divergent views which prevail in several divisions of the Orthodox Greek Church it would not be expedient to give a definite reply until further information shall have been received from Cyprus, as to the precise steps which it is proposed should be taken. The Cyprus Synod will consider the matter further.

The Population of Cyprus.

The total population on December 31 last was returned as 313,515. That of the four chief towns was as follows:—Nicosia 18,779; Limassol 13,558; Larnaca 9,797; and Famagusta 7,124.

MESSAGES FROM SYRIA.

We have received from Cairo two telegrams, both dated April 14, upon the situation in Syria. The first, which is signed on behalf of the Executive Committee by Rashid Rida, runs thus:—

The situation in Syria is rendered intolerable by oppressive taxes and waste of public funds. The population of Damascus profited by the occasion of the farewell of Dr. Crane, the former President of the American Mandate Commission to manifest their discontent, to set out their grievances against the occupying Government, and to claim their independence. The French authorities arrested the Nationalist leaders, and deported them to places unknown, so provoking great popular demonstrations for independence against the Mandate. French troops attacked the demonstrators with tanks and mitrailleuses; and there were many killed and wounded. All traffic and commerce are suspended, and for eight days the agitation has continued. Martial law has been proclaimed. The Executive Committee of the Syrio-Palestinian Congress, representing all parties for Syrian independence protests energetically against these attempts upon the rights of peoples by the French authorities. It calls the civilised world to witness the sufferings endured by Syria, reiterates its denunciation of the Mandate contrary to the unanimous wishes of the people, and appeals to your conscience to uphold a just cause and to avoid bloodshed.

The second telegram, signed by Michel Lotfallah, Moktar Solh, Jamil Rafy, Nejib Chocair, Assad Daghir, Tewfik Yaza, and Dr. Mohaka, says:—

On the occasion of the visit to Damascus of Dr. Crane, President of the American Commission delegated in 1919 by the Peace Conference to inquire into Syrian aspirations, the populace organised a reception to show their discontent with the political and economic situation, to claim independence and unity, and to reject the Mandate. The French authorities arrested the Nationalist leaders, and Damascus proclaimed its solidarity with them. An armed force dispersed the demonstrators. Syrians gathered together at a meeting to-day to protest against the attempt on individual liberty and the suppression of public opinion, and demand the publication of the report of the American Commission, the despatch of a Commission of Inquiry and a plebiscite under international control.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE CALIPHATE QUESTION.

To the Editor of "The Near East."

Sir,—The admirable letter of Lt.-Colonel Hawkes in your issue of April 13 may fitly be illustrated by a quotation from that great authority on Islam, the late Sir William Muir, who wrote:—

"In virtue of Mutawakkil's cession of his title the Osmanly Sultans make pretension not only to the sovereignty of the Moslem world, but to the Caliphate itself—that is, to the spiritual as well as political power held by the Successors of the Prophet. Were there no other bar, the Tartar blood which flows in their veins would make the claim untenable. Even if their pedigree, by some flattering fiction, could be traced up to Coreishite stock, the claim would be but a fond anachronism. The Caliphate ended with the fall of Bagdad. The illusory resuscitation by the Mamelukes was a lifeless show; the Osmanly Caliphate a dream."—"The Caliphate, its Rise, Decline, and Fall," ed. 1892, p. 594.)

I am not aware that it is anywhere authoritatively laid down that none but a member of the Quraish may hold the office of Caliph, but the evidence of history conclusively proves that none but a member of the tribe was ever, until Abdul Hamid attempted to assert the Ottoman claim, accepted by the Moslem world as such.

The carelessness or ignorance of the British and Indian Governments, which permitted, if it did not encourage, certain sections of the Indian Moslems to acknowledge the Ottoman Sultan as their Caliph, and to pray for him as such, produced a situation pregnant with mischief. They have sown the wind and are reaping the whirlwind.

The proclamation of *jihad*, or sacred war, is an undoubted prerogative of the Caliph, and the permission accorded to Indian Moslems to elevate the Turk to this great office was a surrender of the Sovereign's right to say when and in what cause his subjects should fight.

Fortunately all loyal and reasonable Moslems must now perceive the absurdity of their position. Of the rest it may be said "*Noscuntur a sociis*." The disaffected Sunni who uses his spiritual allegiance to a mock Caliph as a pretext for conspiracy against the Government which secures his person and property from the aggression of those whom he formerly persecuted, and whose numbers, unrestrained by authority, would overwhelm him, finds himself leagued not only with the heterodox, but with those whom his faith brands as idolaters. When will he learn that these have nothing in common with the *Mlechchitia*, the devourer of the flesh of the sacred cow, and that when his fancied wrongs have served their turn he will be cast off like an old shoe?

And have the Hindus any reason to congratulate themselves on their alliance with religious fanaticism? Let the "New Moslems" of Malabar answer—and bless Mahatma Gandhi if they can.

I am, etc.,

WOLSELEY HAIG.

April 14.

THE FRENCH IN SYRIA.

To the Editor of "The Near East."

Sir,—Syria and Cilicia came under the French direction and administration after the world war. Many people thought that, as soon as the country came under an European Government, in a sense, and in a measure, the millenium would arrive. It has not come yet, and therefore there is disappointment in their minds. If more consideration had been given to the economic conditions in Europe, as well as in the whole of the Near East, including Syria, expectations would have been much more moderate and reasonable. Syria was

emerging not only out of the war but out of years of famine and pestilence, in which she lost tens of thousands of her best and bravest sons. Recovery could not possibly be rapid in all these circumstances.

The situation is one to be looked straight in the face. We must try to understand the problems the French have to tackle in the government of Syria, to see how they are attempting to solve these problems, and what success attends their efforts.

The conditions in Syria when the French took over the government of the country were far from easy. The finances were in ruins, and the Exchequer was empty. Everything was more or less in a state of chaos. There was trouble in Cilicia. There was trouble with the Arabs, and there were disturbances in the Shoof district in the Lebanon and elsewhere. The problem of governing Syria never has been easy, and it cannot be easy now. The differences of race and religion are exceedingly difficult for the people to forget or lay aside. In the past it was the Ottoman Government's policy to intensify these differences in order to prevent any unity of action or understanding among the different sects, which might be inconvenient to the Ottoman views. "Divide and rule" was the motto, and alas! it was only too successful, as the year 1860 painfully records. Even in the Courts the religious element had to enter. There had to be a Representative of each sect in the district on the Bench, and the sect in the majority had its member appointed President of the Court, e.g., in the Metn Court there were three Members on the Bench, a Maronite, a Greek-Orthodox and a Druse, and as the Maronites were in a large majority the President of the Court had always to be Maronite. Any one bringing a case before the court would be asked to which religion he belonged, and of course he looked to the member in the court who belonged to the same sect as himself to champion his cause. Even the Administrative posts were all allocated according to a fixed understanding, to the different religions, including the clerkships. In recent years the taxes which were fixed in the sixties were not nearly enough to meet the expenses of the Administration, construction of roads and upkeep of the same, etc., with the result that Government officials, and employees, were paid ridiculously low salaries, which did not attract the best educated and ablest young men to the service of their country. These found far better openings in mercantile pursuits, or in emigration to other countries, where many have risen to eminence and wealth by the sheer force of character and ability.

It must be frankly admitted that the French did not send their best men to Syria in the beginning; and in consequence many took a gloomy view of the future, and among that number I include myself.

That state of things has changed, and the whole outlook has also changed in consequence.

The present Governor-General of the Greater Lebanon, Commandant Albert Trabaud, is a distinguished looking man with a genial, warm, cordial manner which immediately puts people at their ease in his presence, and wins their confidence. He is a man of character and ability, and he loves Syria and is earnestly working for its improvement and progress. He made a tour of inspection recently through the Metn. Thousands of men gathered to meet him at different places, to hear what he had to say, and to see their Governor-General and give him the warm welcome that Syrians know, so well, how to give. There was no unsteady note in the strong voice that addressed the crowds, nor was there any uncertainty in the message delivered. "Unity, and co-operation between the various sections of the population" was urged with great force and clearness. A new and most welcome doctrine. France is here to help Syria to get on her feet, and to aid her to reach the goal of self-government. When the speech ended there was a moment's pause and then the crowds burst into cheering and "Vive la France." There was no doubt of the popularity of the Speaker or of the reception given to his declaration of policy.

What has been done so far? *Much*, as a beginning. First, there is peace and security throughout the country at the present time. There are isolated instances of crime and robberies, but the country as a whole is tranquil and quiet. The evil-doer, the brigand, and the disturber of the peace, knows that he is up against a power that he cannot contend with, and he has either forsaken his old trade, or has moved to distant regions. Even in the Hauran (that land so celebrated for its wonderful hospitality, and kindness to strangers, but utterly independent of law and order in the ordinary sense of these terms) the power of strong, settled government has been felt and appreciated. The constant feuds between Bedouin Arabs and Druses made the roads often unsafe, and it was very dangerous for solitary individuals to sojourn alone. A venerable Druse Sheikh from the Hauran was telling me the other day, "God bless the French Government. There is nothing like good government. We are now really punished when we fight and quarrel, and we cannot do it any more. Now a woman can carry gold on her head from the Hauran to Damascus and no one will dare to speak to her." The latter part of the Sheikh's statement may be too optimistic, but it shows that very great changes have taken place for the better. There is an Arabic proverb which says: "Your Governor is your Lord," and when the Governor is strong, and determined to carry out the law, the people obey and keep the law. Commandant Trabaud has made a determined beginning to appoint the best men to administrative posts irrespective of their religion. Rashid Bey Hamadi, an able educated young Druse, has been appointed President of the court in the Kesrawan district, where only a Maronite would have been appointed in the past. A Metawali Member has been appointed in the Metn, formerly held by a Druse. The Governor-General is trying to get the best men into the service of the country, and to weed out the corrupt and inefficient. He has able assistants in M. A. Privat Aubouard, Counsellor to the Administration, and in Sheikh El-Khasin the Mutesarrif. The work of administration is not easy. Every disappointed hunter after office, every inefficient official dismissed from office, or not prompted, is apt to try to form a "cave of Adullam" and criticise and complain. France has been successful at last in getting the right men to govern this country, and it is to be sincerely hoped that she will not remove them before their work is done, and give the impression of change and vacillation, but that she will back her representatives with all her moral force, and so reap the best results in good and stable government in Syria.

Having lived in Syria for 31 years and having been a close observer of political conditions, I feel very strongly that what the country needs most of all, is firm, steady government, a wide extension of primary education, improvements in the methods of agriculture, and the teaching of industries. Syria must be made a country where there will be no need for her ablest young men to emigrate. It can be done. France is only at the beginning of her constructive work in Syria, and we all wish her, with all our hearts, success in this great mission.

I am, etc.,

DANIEL OLIVER.

Ras-el-Metn, Syria.

March 30.

A "SEMITIC NATIONAL HOME."

To the Editor of "The Near East."

Sir,—Political differences especially in the East, where racial and religious questions are involved, are apt to gain in bitterness the more protracted they become.

This seems obvious in the dispute between the Zionists and Arabs in Palestine, who, whilst giving so much importance to the points upon which they are in disagreement, appear to lose sight of their fundamental racial affinity, which should by the laws of Nature constitute a bond between them.

It would be an injustice to lay the blame for this state of affairs more upon one side than upon the other. There are extremists in both parties; there are Jews who claim that all Arabs, even those descended from ancestors honoured for centuries past in Palestine, are but immigrants, whose true home should be Arabia, and there are Arabs, who hold that when Jerusalem was captured by Titus the Jews ceased to be in any way connected with the future of Palestine. Both parties entirely overlook the incontestable fact that Jew and Arab are but different branches of the one great Semitic race.

The domination of the Arab inhabitants by the Zionists, or the modification or even the withdrawal of the Balfour Declaration demanded by the Arabs, could not possibly bring about a peaceful settlement. The only hope of such a settlement seems to be in a coalition between the moderate leaders and parties on both sides, thus giving the Balfour Declaration the meaning not merely of a Jewish National Home but the broader one of "Semitic National Home."

The future Constitution of Palestine must necessarily be a complicated task in view of the many interests involved, but it might possibly be built up somewhat on Indian lines. This would mean that, though certain vital questions would have to be allocated for decision to the High Commissioner, as representative of the Mandatory Power, all others would be dealt with by four Palestinian Ministers, two of them Jews and the other two, one a Christian Arab and one a Moslem Arab, to be appointed by the High Commissioner from among the elected members of the Palestine Legislative Council.

I am, etc.,

ADOLF WALEY.

GREAT BRITAIN AND EGYPT.

Egyptian Views.

While all "Moderates" in Egypt, including many men of wealth and position in the provinces who do not desire to come prominently forward, hope that Sarwat Pasha's Government will bring about an early and lasting settlement, the latest Arabic papers show how widespread is still the anti-Government and anti-British attitude of the less educated masses. The feeling, based on an agitation fomented by Zaghloulists and—it must be added—some Europeans, is that the so-called independence is a sham. The tone of the Press has not altered.

That Adly Pasha has not joined the Commission is not surprising. The Pasha (who is held in the highest esteem on account of his firmness when leading the Delegation in London) though fully in agreement with Sarwat Pasha, is inclined to wait and watch events. Several other persons who were invited to join have declined. Among the opponents of Government policy are a large body of lawyers, none of whom have accepted seats on the Commission. Their influence among the people is very considerable. Thus, at Siout, the capital of Upper Egypt, a protest has been signed by 32 resident lawyers, who deny the right of a minority to impose its will upon the people. At Tanta, that centre of unruly nationalism and focus of extremist views in Lower Egypt, there is a similar, or even stronger, opposition from its numerous lawyers, who refuse to support the Government. There is a "Society of Lawyers," and at a recent meeting of that body it was unanimously held that the right of framing the Constitution belongs solely to the people, and cannot be entrusted to any authority appointed to act in their name. There is still much ignorance and misunderstanding. Many think that the Government programme is bound to end in a fiasco, and that the Zaghloulists will then come into their own.

In the *Mokattam* Mohammed Shakir states that the choice now lies between two days—the day of the Crown

and the day of the People. The one is March 15, 1922, when a royal proclamation of independence by King Fuad was published in a special gazette. The other is March 9, 1920, when 51 members of the then National Assembly met at Zaghloul Pasha's house, and passed resolutions to which the people of Egypt do, and will, adhere. This should be observed as the true anniversary.

In the *Akhbar* the editor writes that the Government should have no hand whatever in working out the Constitution. There must be no drawing back from the position taken by Adly Pasha. Sarwat Pasha's statement of his government's policy is given. He thanks King Fuad for the part he has taken. In a *résumé* of recent Egyptian history he shows that England has never claimed a protectorate over Egypt for her own benefit, but merely as a trustee. Before the War Egypt was virtually independent; England, therefore, took over no rights from Turkey. A genuine Constitution is about to be introduced for the first time in Egyptian history; and the present Government will take full responsibility for all that is done pending its establishment. To the question, "Why is martial law not abolished now?" the reply is that an obstacle still exists in connection with the status and rights of foreigners. It is essential that good order should be maintained at all costs in this transitional and difficult period. In criticizing his opponents Sarwat Pasha says that much more harm is done by the course that many of them pursue than they themselves realize. The real need now is national unity.

In the *Lewa Masri* ("Egyptian Banner"), which has reappeared after suspension, Sarwat's policy is adversely criticised. The British Labour Party is denounced. It has misled small nations, including Egypt. Whatever differences there may be among political parties in England, they are all united with regard to imperial and colonial matters. Labour has given no support to Egypt during her efforts, and has been similarly silent over the Indian movement for freedom. In Ireland, where the question is not yet solved, the British Government supports a small minority under Collins against the people under de Valera, just as Sarwat is supported against the people's leader, Zaghloul. In a long sketch of the relations of Europe with Turkey, it is asserted that for five centuries the former has aimed at the destruction of the Moslem Ottoman Empire. Since the Great War some European Powers, notably France, have recognized that a friendly policy is wiser. England alone has remained hostile; but there is now an indication that some liberal-minded members of the Cabinet see the danger of a hostile policy.

The comic papers show much appreciation of the humorous side of the present situation. The *Keshkul*, with its four large coloured cartoons, has a large weekly circulation. In one of its cartoons Sheikh M. Shakir appears on the balcony of a minaret calling to the Faithful as does the *muezzin*: but the *adan* (call to prayer) is parodied with an irreverence that would surely provoke the rebuke of the *ulema*:—"Allah is most great! Allah is most great! I bear writings that there is no independence save through Mustafa Kemal. Come to Angora! Come to Angora! It is the first and the last. Salvation and peace be on you, O pupil of my eye. I wish to go to my country. I wish to see my son." The last words are quotations from popular songs of the day.

The Smyrna correspondent of *The Times* states that there has been a great response to the appeal of the "League for National Defence" calling upon local Greeks to resist the restoration of Turkish rule.

SCHOOL OF ORIENTAL STUDIES.

London Institution Finsbury Circus, E.C. 2

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

MUSICAL NOTES.

IRISH HISTORICAL SONGS:

The passion for folk-song *qua* folk-song has perhaps of recent years died down a little, for most musicians now are sensible and cynical enough to believe that the "folk" can of itself produce no song, and that all tunes attributed to it are actually the work of some unknown genius. But the time is not far past when it was thought that any folk-song was a good song, merely because it had the label. This dreary nonsense is now done with among the discriminating, and you can in many places hear Russian and German folk-songs, for example, discussed at their true value.

There is, however, one country at the songs of which no one, so far as I know, has yet jibed, and that is Ireland. For Ireland indeed are claimed the finest national songs in the world, and I for myself know none better. But it is not only in her folk-songs that her wealth reposes: she has in addition a mass of national, popular, and art songs. These in their different categories have often been collected and arranged, but no one has attempted so comprehensive a scheme as Mr. Herbert Hughes, who has recently published, through Messrs. Metzler, the first few songs of a series called "Historical Songs and Ballads of Ireland." Each song, which is published at 2s. net., contains the Introduction which Mr. Ernest Newman has written to the series, and therein is written such delightful sense in explanation and praise of Mr. Hughes' arrangements that there is nothing to add to it. To expatiate on the beauty, the life, and the wit of Irish melodies would be superfluous, but it is unusual to find in accompaniments such combination of cunning reverence and clever pointing as is to be found in Mr. Hughes' work. Whether it is in the slow, spaciouly-moving "Silent, O Moyle," in the changes in form of the throbbingly beautiful "She is far from the Land," in the light frolic of "The Low-Backed Car," or in preserving the rhythmical inexorability of "General Munroe," his work is everywhere first-class. The remaining songs will be eagerly welcomed.

ENGLISH AND FRENCH LOVE-SONGS

It was with regret that we recently heard what was the last of Mr. John Coates' recitals at Chelsea—the last, that is, of his season's series. This recital, at which I thought Mr. Coates' voice tired, as from overwork, was devoted to English and French love-songs. One had heard the singer in most of them before, and, though this fact generally brings to one's ears an added freshness, it seemed to me that this time he too much imitated himself. Mr. Coates has little mannerisms which either

adorn a great interpretation or are a temporary substitute for it, and I thought—perhaps it was I who was all wrong—that we had a little too much of the latter. In all executive art there is a great deal of bluff, and it depends on the individual condition of the artist how much he shall put forth himself and how much the conventional image of himself. But enough of this commonplace, and to the songs themselves. There were first those songs in which Mr. Coates, bluffing or sincere, ill or well, is supreme: I mean such light fancies as Weckerlin's "Pétronille," Jacques-Dalcroze's "Le Coeur de ma Mie," and the old French "Le beau séjour"—in these things his actor's command always brings him through triumphantly. Next was the one song—there is one of its kind in nearly all his programmes—which we regretted his singing, Elgar's "In the Dawn," that is the worst kind of flapdoodle, tiresome to a degree. And finally were the songs which were songs indeed—Duparc's "Le Manoir de Rosemonde," declaimed magnificently, Bruneau's "L'heureux Vagabond," sung with imaginative intensity, Peter Warlock's "Whenas the rye reach to the chin," and Chabrier's "L'île heureuse," both of which were almost perfectly done. We look forward to Mr. Coates' next season greedily.

THE BACH CHOIR.

The concert which the Bach Choir gave recently at the Queen's Hall was a mixed success, not indeed because of any shortcomings either of choir or of its conductor, Mr. Vaughan Williams, but because of the four things it did two were so inferior to the others. There was first a very lovely six part motet of Byrd—"Christ is Risen Again." It was performed with exquisite musicianship; one could not too much admire the fashion in which Byrd wove his voice and string parts nor the way in which the conductor preserved the beautiful texture of the piece. But it is not only in this old polyphonal stuff that the Bach Choir excels: they were just as much at home in three difficult choral hymns from Holst's "Rig Veda." These hymns are glorious stuff, and were worthily done. It has sometimes been possible to suspect Vaughan-Williams of possessing too placid a scholarship, but such suspicions were for ever banished when we heard the terrific cry that he brought from his choir, "Indra and Maruts, fight for us!" Again, in the second—"To the Unknown God"—he brought out notably the reality of Holst's mysticism. It was this hymn particularly that impressed upon one the fact that the beauty residing in Holst's high and exalted work is beauty of design, and not the incidental beauty of deep thought. Between Byrd and Holst came a Fantasia on two Irish Hymn Melodies "St. Patrick's Prayer," by Charles Burke. Burke, who is now dead, is an unknown musician, and, though this Fantasia contains sound work and very honest, I do not think it will give him a reputation. He probably had more to say than is contained in this Fantasia, for his technique is, for the purpose of his work, poor. And last there was an unsatisfactory performance of Dvorak's "Stabat Mater." It was not merely that of the quartet, known as "The Northern Singers," only one, Mr. George Parker, sang consistently well; it was not the disagreement evinced upon the pronunciation of Latin; it was that besides Byrd and Holst Dvorak seemed but a mediocre musician. "Stabat Mater" is an inferior work, of transient vitality and of fading colours.

ANDANTE.

Hazrat Mohani, the Moslem leader who headed the movement for the separation of India from the Empire at the last Moslem Congress, was arrested at Cawnpore on April 15, and removed to Ahmedabad to stand his trial on a charge of sedition.

It is reported from Cairo that during the recent disturbances at Damascus in favour of independence French troops were compelled to fire on the demonstrators. There was, however, no serious fighting, and in three days the casualties were but two killed and seven wounded.

THE ANGLO-PERSIAN MUDDLE.

"RECENT HAPPENINGS IN PERSIA." By the Hon. J. M. Balfour, late Chief Assistant to the Financial Adviser of the Persian Government. (London: William Blackwood & Sons. 1922. 21s. net)

Persia is mainly an arid plateau, 630,000 square miles in area, traversed by mountain ranges which run from north-west to south-east. There are vast saline deserts in the interior, and the south-western provinces form part of the Mesopotamian delta. Persia has no railways, her roads have not improved since the days of Cyrus, and the Karun is her only navigable river. Lack of water restricts the cultivable area, which might be increased many fold if the countless mountain torrents were husbanded by engineering science. The inhabitants, numbering perhaps 10,000,000, have many admirable qualities. Their nimble intellect, wit and courtesy render them charming companions. But fatalism, cowardice and conceit are blots on the national character which explain all the sorrow which Persia has endured in her long and chequered existence.

The aristocracy consists of a clique of Teheran families, and divers tribal chieftains who wield feudal authority over their clansmen. There is no middle class to serve as a buffer between overlords and serfs virtually attached to the soil. The Government was an absolutism tempered by custom, intrigue and fear of assassination until 1906, when the British mania for sowing constitutions broadcast led our representative at Teheran to favour a bloodless revolution. It limited the Shah's authority on paper, and provided for a "Majlis," or elected national assembly on the Westminster model. It is needless to add that this constitution is a complete fiasco. Such central authority as survives is scrambled for by three or four hundred politicians at Teheran. The present Shah, Sultan Ahmed by name, is a *nullité*; but the prestige which his office has inherited from three millennia of dynastic rule makes him an indispensable figurehead in the eyes of his nominal subjects. Administration is rotten to the core in every branch, taxation is most oppressive and based on archaic statistics: provincial governorships are sold to the highest bidder, and serve to line the pockets of the politicians or tribal chiefs who secure them. Finances are in utter confusion, the monthly deficits incurred amounting to £300,000: and the only organized unit in the army is a Cossack Division, 10,000 strong, which menaces the existence of civil government.

Fear of Russia has been the keynote of Persia's policy for two hundred years. Under the Tsarist régime it was amply justified, and her internal weakness alone forbids Bolshevik Russia to continue the aggressions which robbed poor distracted Iran of her fairest provinces. In August, 1907, Great Britain concluded an agreement with Russia which defined the five northern Provinces as the latter's sphere of action. It aroused a storm of protest in the Majlis, and inflicted deep injury on British prestige. So the outbreak of the Great War found Persia disposed to favour the Turkish side. German spies overran the country, the Cossack Division and a Gendarmerie officered by Swedes declared for our enemies, and British officials were imprisoned or forced to flee. Our influence was restored by costly expeditions from India; and the South Persia Rifles organized by Sir Percy Sykes, restored order in the British sphere. When peace returned in November, 1918, the Shah's empire was under our protection. A force at Meshed guarded its north-eastern frontier: Bolshevik attack on the opposite side was countered by another force based on Kasvin; while a third, with its headquarters at Baku, made the southern Caspian sea secure. We had paid Persia £100,000 a month, enabling her to maintain the hostile Cossack Division and Gendarmerie, and by a stroke of Gilbertian humour this subsidy was continued for two years after the Armistice.

In August, 1919, our Foreign Office thought that the time was ripe for a long step in advance. It concluded a treaty with Persia which bound Great Britain to supply her with expert advisers, to grant her a loan of £2,000,000 for carrying out necessary reforms, to co-operate in constructing railways, and in reviving her customs tariff. A trio of politicians who were responsible for this Treaty on the Persian side demanded and received a sum of £131,000! It was universally regarded as a corrupt bargain and a means of securing British suzerainty. In the following year Mr. Armitage-Smith, a Treasury official of great experience—was despatched to Teheran as Financial Adviser, and in May, 1920, the Hon. A. J. Balfour arrived there as his Chief Assistant. They soon found the office a mere sinecure; the Persians being quite willing to pay their salaries, but equally loth to accept advice. Meantime the military situation throughout Persia altered for the worse. Our expeditionary forces were withdrawn or forced to retreat before the Bolshevik armies; and in November, 1920, the Foreign Office cut off supplies and left Persia without money or protection. The Majlis, therefore, rejected Earl Curzon's demands for a ratification of the Treaty which, indeed, had been a dead letter from the outset.

In February, 1920, things came to a climax. A politician named Zia-ed-Din seized the reins of power, denounced the Anglo-Persian Treaty and concluded one of alliance with the Bolshevik Republic. Despite these untoward events, Zia-ed-Din is no Anglophobe, and his brief dictatorship was an honest attempt to reform the administration; but lack of experience and of political wisdom foredoomed him to a speedy fall from power. His successors are frankly hostile to Great Britain. They rejected our proposal that they should take over the South Persia Rifles, which guarded the British sphere of influence and the enormous interests of the Anglo-Persian Oil Company. The little force was, therefore, disbanded, and with it vanished the last semblance of British prestige.

Mr. Balfour resided at Teheran until September, 1921, and acted as Chief Adviser during Mr. Armitage-Smith's absence in Europe. He has devoted much time and study to the Persian puzzle, and has produced a work on recent events in the Middle East which every Briton should take to heart. It is a scathing indictment of our Foreign Office's policy—if the word applies to dealings characterised by ineptitude, bluster and vacillation. "What is the Outlook for Persia's Future?" he asks (p. 283). There are three possibilities—(1) Revolution; (2) a general Break-up; and (3) the continued functioning of the worn-out mechanism of government. In the absence of a Russian—Mr. Balfour might have added an Afghan—invasion, the first two contingencies are highly improbable, and things will follow their normal course, culminating in the disappearance of all central authority. His peroration merits quotation *in extenso* :—

Our future policy in Persia would seem to be that called for throughout the Near and Middle East—namely, firmness where our interests call for it, as in India and Egypt, and the dropping of the wild-cat schemes in which the Cabinet delights. In Persia British interests, whether political or commercial, are confined to the south, while in the north they are non-existent. . . . A clear indication that we meant to maintain our interests in Southern Persia by force if necessary, in the event of the country lapsing into anarchy; but that there our interest ceased; coupled with a refusal to be drawn in future into intrigue and a policy of bribes, would in time cause the Persians to realise that Great Britain had no designs upon their cherished independence and would lead to the condition before the war, when it was said that Englishmen alone could go anywhere in Persia with absolute impunity.

PERSONAL AND GENERAL.**To-day.**

April 27 (New Style).

April 14 (Old Style).

Shaban 29, 1340 A.H. of the Moslem Calendar.

Nisan 29, 5682 of the Jewish Calendar.

Field-Marshal Sir William Robertson has arrived from India.

The Viceroy and Lady Reading arrived at Simla on April 17.

The Georgian Chargé d'Affaires, Prince Soumbatoff, has left London for the Continent.

The Afghan Minister, Abdul Hadi Khan, is recovering from his illness, and is now able to go out.

Lord Lytton, the new Governor of Bengal, arrived in Simla last week on a visit to the Viceroy.

Senor Romero, Spanish Minister to Bulgaria, has arrived in London, on a short visit, from Sofia.

Viscount and Viscountess Milner are expected to return to London during this week from Palestine.

M. Take Jonescu, who has been in a nursing home at Rome with typhoid, is reported to have greatly recovered.

Sir Hugh Bell has left London to join Miss Gertrude Bell in Palestine. He will probably be absent until the end of May.

M. Nano, formerly Secretary to the Roumanian Legation in London, has been transferred to the Legation at Washington.

Prince Ismail, cousin of the Shah of Persia, who arrived in London last week from Paris, has now returned there.

M. Alexander Broz, Press Attaché to the Czecho Slovak Legation, has been transferred to the Legation at Washington.

King Constantine has now recovered from his indisposition, but the doctors recommend that he should take a short rest.

M. Ghika, formerly Secretary to the Roumanian Legation, left London last week, with Madame Ghika, for the Foreign Office at Bucharest.

The Belgian Ambassador and Baroness Moncheur, on April 19 entertained the Roumanian Minister and Madame Titulesco at luncheon at 23, Belgrave Square.

The marriage arranged between Mr. C. Lambrinudi, F.R.C.S., and Miss Lily van Maasdyk will take place on April 29, at the Greek Church, Moscow Place, Bayswater.

The Roumanian Minister and Mme. Titulesco have returned to London from Stratford-on-Avon, where they represented their country at the Shakespeare festivities.

Mr. R. V. Bardsley, the old Oxford cricketer, has just arrived in England from the Sudan, where he has been on the staff of the Governor-General. He is home for the summer, and hopes to assist Lancashire.

A Simla message states that Mr. Edward Cook, Secretary to the Government of India, Finance Department, will act as Finance Minister, vice Sir Malcolm Harley, who is proceeding on leave for four months.

The marriage arranged between William T. Fellows Andrews, son of Sidney Andrews, R.N.R., of Malta, and Beryl, elder daughter of Dr. and Mrs. T. Arnold Durrant of 5, Stanhope Terrace, W., will take place in June.

Major-General the Hon. Sir Cecil Bingham has returned to London from Cannes, where he and the Hon. Lady Bingham have been staying with Prince and Princess Christopher of Greece at the Villa Kazbeck.

Captain Matila Costiesco Ghyka, who has been Secretary at the Roumanian Legation at Madrid (now discontinued), and was previously attached here, has arrived in London to join Madame Costiesco Ghyka.

Sir Herbert Samuel, who is returning from Jerusalem on six weeks' leave of absence to this country, is due here on May 1. Sir Herbert has been suffering from a complication of illnesses, culminating in rheumatic fever.

The engagement is announced between Alexander Addis Leslie, younger son of Mr. and Mrs. F. M. Leslie, of Ballygunge, Calcutta, and Phyllis Winifred, eldest daughter of Mr. and Mrs. Horace Walker, of Cook's Folly, Bristol.

The engagement is announced between Captain Hubert Arthur Hamilton, Royal Garrison Artillery, only son of Mr. and Mrs. A. J. Hamilton, and Geraldine, only daughter of Cecil Granger Stock and the late Mrs. Stock, recently of Calcutta.

An engagement is announced between Captain W. D. G. Batten, 2/3rd Gurkha Regiment, son of J. K. Batten, I.C.S., and Mrs. Batten, of Nagpur, India, and Eileen Mary, younger daughter of Albert Willson, of Waldegrave Park, Twickenham.

In St. Albans Cathedral, on April 19, Mr. Joseph Seeböhm Rowntree, of The Homestead, York, was married to Marianne Caroline (Carol), daughter of Sir James Thomson, K.C.S.I., and Lady Thomson, of Torrington House, St. Albans.

A Simla message announces that the Committee on the Frontier Province will be composed of Mr. Bray, Foreign Secretary (chairman), Mr. Samarth, and Mr. Abdurrahim, nominated members, Mr. Bolton, Judicial Commissioner of the Province, and a judicial officer from the Punjab.

The Minister of the Kingdom of the Serbs, Croats, and Slovenes, who has also been accredited to the Netherlands, left London on Monday for The Hague to present his Letter of Credence to Queen Wilhelmina. His Excellency was accompanied by Mme. Gavrilovitch and M. Fotitch.

The engagement is announced between Lieutenant Patrick W. R. Weir, Royal Navy, second son of Colonel P. A. Weir, I.M.S., of Langtons, Farnham Common, Bucks, and Minna R. F. Fortune, eldest daughter of the late James Brown Fortune and Mrs. Fortune, of Larchmoor, Stoke Poges.

The Simla correspondent of *The Times* states that Lord Lytton, the new Governor of Bengal, who is spending a few days in Simla, paid a visit last week to Peterhoff Hill, where he was shown the room in the old Government House in which he was born in 1876, when his father was viceroy.

The marriage took place on April 20 at the village church of Frankby, Cheshire, of Sir Thomas Royden, M.P. for Bootle, and chairman of the Cunard Steamship Company, to Mrs. Guenalda Mary Williamson, widow of the late Mr. Charles James Williamson, of Rake Hall, Little Stanney, Chester.

Unofficial information has reached Mr. T. P. O'Connor, M.P., that the Municipality of Athens has granted him the Freedom of that city in acknowledgment of his Parliamentary efforts for the protection of the lives of Christians and of Greeks' rights in Anatolia. He learns that the official intimation has been postponed until the return of M. Rizo-Rangabe, the Greek Chargé d'Affaires, from Genoa.

The marriage took place on April 20, at St. Paul's, Knightsbridge, of Captain Donald S. Frazer, 18th Lancers, lately A.D.C. to H.E. the Viceroy of India, son of Lieutenant-Colonel Peter Frazer, of Bedford, and Miss Marjorie Moorsom, daughter of Mr. and Mrs. Edgar Moorsom, of Norton, Manor, Radnorshire. The Bishop of Chester, the Rev. J. Frazer, and the Rev. A. E. Green-Price, officiated.

The King has been pleased to approve that the Earl of Ronaldshay, G.C.I.E., be sworn of his Majesty's Most Honourable Privy Council, on the occasion of his retirement from the office of Governor-General of Bengal. It is also announced in the Court Circular that Lord Ronaldshay was received in audience by the King at Windsor Castle on April 20 and invested with the insignia of a Knight Grand Commander of the Star of India.

The marriage arranged between Cyril George Simpson, of Colombo, Ceylon, youngest son of the late Charles Henry Simpson, of Moor Top House, Ackworth, and The Hemploe, Rugby, and of Mrs. Simpson, 6, West Cliffe Grove, Harrogate, and Mary Alice Margaret Bond, only daughter of the late Charles John Bond, late of Trichinopoly, S. India, and the late Alice M. E. Bond, of St. Erith, Dyke Road, Brighton will take place at Colombo, on June 22, 1922.

At the Greek Church, Moscow Road, on April 22, the marriage was solemnized between Miss Nitza Stavridi, eldest daughter of Sir John and Lady Stavridi, of 33, Lennox Gardens, and Mr. Constantine P. Zochonis, only son of Mr. P. B. Zochonis, of Bowdon, Cheshire. The Great Archimandrite Dr. Pagonis, officiated, assisted by the Archimandrites Agathangelos Moscovakis and Callinikos. The bridegroom was attended by Mr. B. G. Zochonis, his uncle. A reception was held at 33, Lennox-Gardens.

The marriage of King Alexander of Serbia and Princess Marie of Roumania will take place in the Cathedral at Belgrade on June 4. Princess Marie, with the other members of the Roumanian Royal Family, will make the journey from Bucharest by water up the Danube. Three ships will go out to meet the Royal party and escort them to Belgrade. The first will be occupied by Serbian girls, dressed in white and carrying flowers, the second by members of Parliament, and the third by citizens of Belgrade. The numerous festivities which are being arranged include military reviews and a State Ball. The news that the Duke of York will attend the wedding has been received with great pleasure in Belgrade, and many preparations are being made to give a fitting reception to the representative of King George.

APPOINTMENTS AND PROMOTIONS.

Mr. A. R. Knapp, Chief Secretary to the Government of Madras, has been appointed a member of the Executive Council in succession to Sir Lionel Davidson, who has resigned.

The King has been pleased to approve the appointment of Lieutenant-General Sir Joseph John Asser to be Governor and Commander-in-Chief of the colony of Bermuda, in succession to General Sir James Willcocks, who will shortly complete his tenure of office. General Asser, who is fifty-four years of age, has had a distinguished military career. He served in the Nile Expeditions of 1897-98-99, and he was Adjutant-General, Egyptian Army, from 1907 to 1914. In 1910 he commanded the expedition to Southern Kordofan.

OBITUARY.

The death has occurred, at the age of 64, of Pandita Ramabai, a distinguished daughter of India. She was awarded the Kaisar-i-Hind medal in 1919.

The death has occurred at Cadbury, Yatton, Somerset, in his sixty-second year, of Major-General George Douglas Hunter. He was the son of a brigade-surgeon in the Indian Army, and he himself joined the Army Medical Department in 1884, reaching the rank of Colonel in 1913 and Major-General in 1917, in which year he retired. He had served as Commandant of the Royal Army Medical Corps School of Instruction, and was attached to the Egyptian Army in 1905-8. General Hunter saw service with the Sudan Expedition in 1884-5, was with the Sudan Frontier Field Force in the following year, and also took part in the Dongola Expedition in 1896 (when he won his D.S.O.), and the Nile Expedition of two years later.

GREAT BRITAIN'S EASTERN PROBLEM.

The position held by Great Britain in the Near and Middle East to-day is certainly less commanding than it was in the first half of 1914. In spite of the great efforts made and the great things accomplished in the War by the land and sea forces of the British Empire, we are confronted by the remarkable, and unpleasant, fact that British prestige is actually lower now in most parts of the area referred to than it was in pre-War days. British soil was nowhere successfully invaded by the enemy, the British Navy swept the seas and held them open for the Allies, and British finance helped the Allies liberally in the early years of the War at least. But, probably because these things were so little advertised, after the British fashion, they seem to have been never understood, or if understood, to have been already forgotten, by many of the Eastern peoples. And it is to be feared that the fall of events since the end of the War has done nothing to increase our prestige or to make our part in the East—Near, Middle or Far—any easier to play. For what do we see, in whichever direction we look? India is in a condition that admittedly causes grave anxiety to the Governments both at home and on the spot. In Persia there has long been a marked Anglophobia, which has lately shown itself openly. 'Iraq appears to be comparatively quiet for a while, but over Arabia there are storm-clouds; while the majority of the population in Palestine is showing quite plainly that it would not regret our departure; and it would not be surprising if the excitement in Syria reacted unpleasantly in the South. In Egypt, the "Moderates" are making a praiseworthy attempt to show that their country is as fit for self-government as it is anxious to secure complete independence, but even some of their leaders appear to consider that Great Britain's views and opinions can be safely ignored, while the attitude of the extremist needs no comment. The harm done to our interests in Turkey—and throughout the Moslem world—by the Franklin-Bouillon-Mustapha Kemal bargain is now too generally recognized to need more than mention. Cyprus, like Malta, has provided little "problems" of its own for our consideration. Roumania, fortunately, shows a friendly spirit, but Yugoslavia displays an inclination to be critical. The Bulgarians think we have changed for the worse since Gladstone's day; and even the Greeks, for the moment at any rate, are inclined to share their opinion.

The state of affairs thus roughly sketched is by no means a pleasant one to contemplate. It will pass—and speedily, we hope—but it is just as well to recognize its existence, in order that we may endeavour to avoid its repetition. It is due, no doubt, largely to the general restlessness caused by the War, and even more largely by the unwise utterances about "the rights of minorities," "self-determination," and so forth and so on which were indulged in all too freely by politicians and, less freely, by statesmen in the days of stress. Some of these utterances undoubtedly served a useful purpose, but others gave rise to hopes and ambitions which cannot be fulfilled or gratified yet, and are unlikely to be so before the Millennium. A good deal of the unrest in the East is directly traceable to such causes. Much of it, again, is due to propaganda, often clever, generally

quite unscrupulous, by our enemies and rivals, past and present, and to the intrigues of our "friends," or their agents. For some of it, in the countries that most closely concern us, we ourselves are undoubtedly to blame. The East is not so unchanging as picturesque writers used to tell us it was, no doubt; but on the other hand it is, we think, not moving quite so fast as some sanguine persons believe; and some modern methods and policies are, perhaps, not suited to its requirements. Then, too, it has to be acknowledged that a good deal of harm has been done by war conditions having made it necessary in some cases to put in authority men of a different type from that which had made the name of "Englishman" respected throughout the East; and in the same connexion, while the conduct of our troops upon the whole was truly admirable, we have to recognise that the somewhat numerous "exceptions" taught the Oriental that not every Firenghi was a sahib. Finally, it is no secret that British interests certainly have suffered greatly by reason of their protection being taken from the trained hands of those accustomed to looking after them, and their manipulation by others, who, wherever they turned for such advice as they deigned to seek, did not turn for it to the right quarter. But for this we might not now have Arab and Jew ready to fly at one another's throats in Palestine, and certainly should not have Greek and Turk as they are and where they are.

We do not for one minute suggest that Great Britain is alone among the Allies in suffering from the causes mentioned. It has become the fashion in some quarters lately to compare French colonial methods with our own, to the advantage of the former, of course; we were invited to contrast the condition of Morocco with that of Egypt; and we were assured that Syria would provide us with another object lesson. We greatly admire what France has accomplished in Morocco, and for our part we are not disposed to quarrel with the methods by which she has done what she has done, but—we have yet to hear that she ever gave any pledge to evacuate the country, and to learn what conditions would be created if she made any such announcement. As to Syria, France has her troubles there, it seems; and if they are the effects of causes very similar to some of those mentioned above as contributing to our own embarrassments, that serves well to illustrate our point. But our Allies' troubles in such cases are their concern alone; and far be it from us to interfere in them. We have perplexities and vexations enough of our own to keep us busy. If we are to cope with them successfully, it seems to us that the first thing to do is to recognize their existence frankly, instead of insisting that they are not there—the Coué method is inapplicable in the case of political ills—and the next step should be to tackle them boldly. But they should be handled by the right Department. In all probability such problems will be dealt with both more expeditiously and more satisfactorily by the trained specialist than by the most brilliant Jack-of-all-trades in the world. Where mistakes have been made, let them be acknowledged, and rectified as soon as possible. Where there is any reasonable doubt that the policy we have been following is at fault, let the case be reconsidered at once, and the policy abandoned or varied if that be found necessary. As to our representatives abroad, with things as they are to-day, we cannot afford to have the wrong man in the wrong place, be he big or little; and all "misfits" should be removed as soon as detected. Above all things, while Great Britain must, naturally, take into consideration the views of her Allies in regard to any questions that closely affect their interest, let us hope that her policy in the Near and Middle East will be henceforth based on the needs of the British Empire rather than on any theory of international brotherhood; that it will be conducted by practical men rather than by idealists; and that when advice is sought it will be asked from our own representatives in the country, or region, concerned, rather than from anyone whose interests are not certainly British.

THE SAMARITANS.

By Estelle Blyth.

(Concluded).

Samaria, the city of Omri's pride, has been identified as Sebaste. "It is situate upon a long mount of an oval figure, having first a fruitful valley, and then a ring of hills running round it." (Henry Maundrell, 1697). The ancient city lies buried some forty feet beneath the accumulated debris of centuries. A church of Crusading days remains in good condition, though numerous fragments of its beautiful carvings have been built into the rough houses of the villagers—not with any idea of adornment, but as being nice large handy stones, already cut and prepared for use. This happened all over Palestine under Turkish rule, and one stone in its time played many parts. Almost the entire outline of the walls can be traced, and in the valley below are the remains of a hippodrome. On the south-west of the mound are the fragments of the Gate of Caesarea of Herod's city, and to the east of this, at some little distance, is the once-magnificent Street of Columns. In the day of its splendour there were two thousand of these grand columns in two parallel rows; now, perhaps a hundred and fifty remain, shorn of their beautiful capitals, whilst others, badly mutilated, lie unheeded in the dust. Even in its ruin, the Street of Columns is a beautiful and imposing spectacle. Samaria was a position of great strategic power, standing as it did in the very centre of Palestine, and commanding the great north and south roads through the land. Harvard University did some excavating here some years back, also at another time, an Austrian archaeological society; but under the Turkish Government research and excavation were beset with many irritating restrictions, and it was not always possible to get a Firman (Imperial permit) renewed when its time-limit expired. Possibly now, under British rule, the secrets of Samaria may be laid bare, and our eyes may rest upon the city of Herod's licentious revels, and the ivory palace that Ahab built.

Of all these once-great cities, Nablus, or Shechem, the most ancient alone retains any importance. Before the War it was a Turkish garrison town of about 27,000 inhabitants, chiefly Moslems, with a reputation for being exceedingly hotheaded and turbulent. At least three of the eight mosques were originally Christian churches, the most important of them, the Jami-el-Kebir, or the Great Mosque, having been built by Justinian and rebuilt by the Canons of the Holy Sepulchre. The Jami-el-Nasir (Mosque of Victory) is a purely Crusading church. The majority of the Christian inhabitants belong to the Orthodox Church, which is the Church of Palestine, under their own resident Bishop. Nablus had an important trade even before the War, in wool, soap and cotton, its principal market being the country east of Jordan, now officially called Trans-Jordania. The country all around is rich and fertile, and is well watered by some two-and-twenty springs, most of which have their source in the Mount of Blessing. It is said that water can be heard running under many of the streets in the little town.

In Palestine the members of the different creeds seem always to band themselves together, and so we find that every city has its Christian, Moslem and Jewish Quarters. The Samaritan Quarter of Nablus is on the south-east round about a little whitewashed synagogue. In 1914 it was reckoned that there were about one hundred and fifty Samaritans left, for nowhere else in the world are

there now Samaritan settlements. Their language is a dialect of Hebrew-Aramaic, and the written alphabet is of very ancient Semitic characters; the people all speak Arabic, but their services are held in their own speech. The office of the High Priest is hereditary in the House of Levi, and the High Priest is also president of the little community. The Samaritans are very poor, and their chief is supported by the tithes of the flock. They hold entirely to their version of the Pentateuch, which they declare must be the only accurate one, since it was the actual work of Abishua the High Priest, the grandson of Aaron. This passionate and unshakable belief forms the basis of their religious and communal life; it sets them above and beyond all authority, save that of God only, Who gave the Law to Moses; it has separated them throughout their long and stormy history from all other peoples, even from those who are their brethren by descent. There are few things more melancholy than the thought of this people, so narrow and yet so devoted, slowly dwindling and dying out of the earth. A little while, and these jealous guardians of the Law will be nothing but a name, an interesting memory; who then will keep the Law and observe the solemn rites enjoined by Moses? This thought is constantly in their minds, clouding their lives, and marking their features with a deeper melancholy than is usual even in a Semitic race.

The Samaritan Codex is, of course, their greatest treasure. They will offer to show it to visitors on payment of a fee, but as a matter of fact strangers generally see another, quite interesting, but considerably less ancient. The real manuscript written on skins of lambs offered in sacrifice, and very old and yellow, and patched in places, reposes in a solid silver case about eighteen inches high, now very dim and worn; it is jealously guarded in an inner room. I think a very substantial charge would be made for seeing this, and one cannot blame them if it were so, for they depend so much on the generosity of travellers. They have the character of being clever, but somewhat importunate, beggars.

The Samaritans accept only the five Books of the Law; the Prophets and the historical books have no place in their Canon, and they have a chronicle of their own. The value of the ancient manuscript is very great, and it is possible that if it should pass into the hands of scholars in time to come, Biblical criticism may be the wider for its use. St. Jérôme in one place at least, considered the Samaritan text as more accurate than the generally accepted Hebrew; Origen and Eusebius also regarded it with reverence. Early in the seventeenth century, Joseph Scaliger (son of Julius Caesar Scaliger, to whom belongs the credit of suggesting the importance of a Samaritan Bible, if any such there were), was in communication with the Samaritans, but died (1609) before the manuscript arrived. The channel was kept open, however, by other Biblical scholars; and Pietro della Valle, a Roman nobleman, purchased two copies from the Samaritan colony at Damascus, which were used in the editions known as the Paris Polyglot and the London Polyglot. Archbishop Ussher took up the matter with zest, but one whole set of manuscripts was lost, the vessel on which they were being captured by pirates, who, one may suppose, had little use for such things. In 1671, the Reverend Robert Huntington, being then Chaplain to the Turkey Merchants Company at Aleppy (he afterwards became Bishop of Raphoe), acquired various interesting manuscripts from the Samaritans at Nablus, which are now, I believe, in the Bodleian. The Samaritans of Shechem wrote at that time to their brethren in

ASK FOR

WHITE HORSE WHISKY

BY APPOINTMENT.

England, the letter being still preserved in the British Museum. This is the first time we hear of such a settlement in England, however, and I have found no other traces of their presence.* Some sixty years later, Benjamin Kennicott published a pamphlet contesting the authority of the generally accepted text; and in 1759 or 1760 he issued a second pamphlet upholding the genuineness of the Samaritan text. As a result of his efforts a considerable fund was raised by subscriptions, and in a *magnum opus* of some thirty volumes the Hebrew and Samaritan texts were printed side by side, for purposes of comparison and criticism. The controversy hereafter seems to have degenerated into something of a party question, many Roman Catholic scholars favouring the Samaritan text in opposition to the Anglicans, who upheld the Hebrew as being the direct inspiration of God. When it was dragged out of the wide fields of scholarly enquiry into the narrow ways of party controversy the subject lost its original meaning and importance, and soon fell into the background; it is now a matter of speculative interest rather than of serious comparative criticism.

To anyone not a scholar, and therefore unable to appreciate those subtle differences of a word, sometimes even of a letter, which involve so much, the dissimilarities between the Samaritan and Hebrew texts seem often trivial; but is not that a characteristic of the nominally "religious" controversies by which our beautiful world is disfigured? The rivers are too deep to be forded, perhaps, yet so narrow that a very small bridge of human courtesy and charity would span them triumphantly. An interesting illustration of such a difference is found in Genesis xxii, 2, which in the Bible (following the Hebrew text) reads, "Get thee into the land of Moriah, and offer Isaac there for a burnt offering." The Samaritan text gives this as "the land of Moreh," which is the region round Shechem. Each side accuses the other of altering the original to fit its own case. Dean Stanley, in a Note to chapter vi. of "Sinai and Palestine," takes the Samaritan view as being accurate, the height of Mount Gerizim being easily visible at such distance, whereas Mount Moriah would be hidden from the traveller's eye by the hills that stand about Jerusalem until he had actually arrived at the spot. Moriah is always referred to, moreover, as a *hill* and not as a *land*. Dean Stanley writes: "In Gen. xxii, the Samaritans actually read Moreh for Moriah, and the LXX, Aquila, Symmachus, and Jerome, all translate the word by 'lofty' or 'conspicuous,' which would be a just translation of 'Moreh,' not of 'Moriah.'" And, "Abraham was 'in the land of the Philistines.' From the south of the plains he would advance, till on the morning of 'the third day,' in the plain of Sharon, the massive height of Gerizim is visible 'afar off,' and from thence half a day would bring him to its summit. Exactly such a view is to be had in that plain; on the other hand, no such view or impression can fairly be said to exist on the road from the south to Jerusalem, even if what is at most a journey of two days could be extended to three. . . . There is no elevation, nothing corresponding to the 'place afar off' to which Abraham lifted up his eyes." "The vagueness of the phrase *the land of Moriah* and *one of the mountains* (ver. 2) prevents us from fixing on any definite hill, while there is every

* "Copy of a Hebrew Letter addressed by the Samaritans of Shechem to their supposed brethren in England. Written (in the Hebrew character) A.D. 1671." ("Descriptive List of the Hebrew and Samaritan Texts in the British Museum," ed. G. Margolionth, B.A., p. 90. (1893.) This interesting "List" is well worth perusal.

reason to believe that *Moriah* is not the original reading, but is a gloss of late origin, and inserted in order to give the Temple at Jerusalem the credit of the patriarchal narrative." (George Adam Smith, "Historical Geography of the Holy Land," ch. xvi.).

Another fierce battle raged around the passage in Deuteronomy xxvii, "Therefore it shall be that when ye be gone over Jordan, ye shall set up these stones which I command you this day, in Mount Ebal, . . . and there shalt thou build an altar unto the Lord thy God." The Samaritans assert with absolute finality that for "Ebal" should be read "Gerizim." Kennicott follows them in thinking that Moses would hardly command the altar and the stones of the Law to be erected on the mount which he also appointed as the Mount of Cursing; other critics contradict this, and it remains a point fruitful of dispute. Possibly it may be settled when, with the passing into history of the last of its guardians, the Samaritan manuscript is opened to the world of scholars.

In addition to the Pentateuch, and their ancient chronicle (this I believe is not older than the twelfth century) the Samaritans have a scanty literature, chiefly religious. They believe that Messias will come in six thousand years from the Creation, but He will not be "a greater than Moses," for Moses expressly limited his status as "a prophet like unto" himself; but he will have kingly powers, and He will, of course, rule from Mount Gerizim. They believe in good and evil spirits, in the resurrection, and in the judgment after death. Three times every year—for the Feast of Weeks, the Feast of Tabernacles, and the Passover—this small and faithful community repair on pilgrimage to Mount Gerizim. A climb of about three-quarters of an hour brings them to the plateau where the tents are spread for the seven days of the Passover observance; another fifteen minutes, perhaps, and the summit is reached. This is a large plateau, still having on the north the ruins of a castle built by Justinian, and of a church said to be even older. In the centre the Samaritans point out a projecting rock, once the site of their temple, and a little distance below the castle they shew the twelve stones of Joshua's altar. The number of paved terraces, broken cisterns, and other ruins, is proof that the plateau once supported a considerable population. The place of Abraham's sacrifice is to the south-east. Mount Ebal is curiously barren by contrast with the richness of the Mount of Blessing, but the view from it is far wider, for it is 3076 ft. in height, whereas Gerizim is only 2848. The Samaritans, however, believe that Gerizim is the highest as well as the oldest mountain in the world. Words uttered loudly on either mount are easily audible in the valley, or on the opposite height.

Upon Mount Gerizim, year by year, is celebrated the Passover according to the ancient ritual. Nowhere else in the world is this to be seen. The tents are pitched on the plateau, and the Samaritans assemble there, the men in robes of spotless white linen and the High Priest in yellow silk; all wear the red turbans which are a distinguishing mark of this people. At noon the service opens with a hymn, followed by prayers and the reading of the four Passover chapters from Exodus (xii—xv). The seven lambs for the sacrifice are tethered near at hand, and browse in blissful ignorance of their approaching doom. They are all males of the first year, without blemish, and they are carefully examined both before and after the act of sacrifice. At a given signal their throats are cut with one sweeping movement of the hand; the knife must not be used twice on a lamb,

nor must the victim utter a sound; in either event it would be disqualified for sacrificial purposes. As the blood flows from each, it is deftly caught in a bowl, and a bunch of hyssop dipped in it, wherewith every tent is smeared on the entrance-posts and lintel. Fires have already been kindled in pits under great cauldrons the boiling water from which is poured over the lambs, so as to loosen the wool from the skin; the entrails are also examined and removed. Though all is done so quickly, great care is taken that the skin is not injured, nor a bone broken. The carcasses are salted, the right foreleg of each being cut off and set aside for the priests; after which they are slung on poles and lowered into the red-hot pits to be roasted whole. These ovens which are roughly lined with stones, are closed with a kind of lattice-work of boughs and twigs. Towards sunset the men remove their shoes and get to prayer, kneeling on mats and using very much the same gestures as the Moslems do;* and just before the sun dips, the shout goes up, "God has passed over the Children of Israel, and has smitten the Egyptians!" Rising to his feet, each man girds a towel about him and grips his staff in one hand; and then they all gather round the seven baskets in which the roasted lambs have been placed. The flesh is eaten with unleavened bread and bitter herbs, and each bone, when stripped of its covering is thrown whole into the fire. After a few minutes the baskets are carried into the tents, so that every family may eat the passover together; the women bear no part in the religious ceremony. Anything left over is most carefully burnt. Meeting outside once more in the brilliant light of the Passover moon, the Samaritans bid one another good-night and God-speed; after which each man seeks the quiet of his own tent.

Here, after the service which is the fulfilment of their whole life, religious and national, we, too, may bid these strange people farewell; not refusing them the tribute of our sympathy and respect for the faithfulness with which, through centuries of suffering persecution, and exile, they have kept the Law and followed the truth as they know it.

* It is interesting that the Moslem motions in prayer follow those of Psalm xcvi, 6: "Let us worship (standing), and fall down (prostration), and kneel before the Lord our Maker."

ARMENIAN ARCHITECTURE.

On April 19, at the Royal Institute of British Architects, Professor W. R. Lethaby opened an exhibition of Armenian Architecture. Mr. H. A. Searlas-Wood, Vice-President of the Institute, introduced to the audience Mr. A. Fetvadjan, whose drawings formed the exhibition. Professor Lethaby said Mr. Fetvadjan had systematically studied the architecture of his country, which consisted chiefly of ruined churches, over a period of twenty years, and he had prepared a great number of drawings, in the hope of publishing an historical account of Armenian architecture. Great interest had been evinced in France in the projected work, and he had been interested to find in some of the artist's notes views and opinions held by thinking men all over the world.

Two privates belonging to the Royal Air Force were shot at on April 16 in Cairo. One was seriously wounded. They had been unloading a military truck at a siding and were returning to camp.

PRESS ON THE NEAR EAST.

In consequence of queries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Egypt.

In the *Nation and Athenaeum* of April 15, Captain Wedgwood Benn writes on "Lost Chances in Egypt." After considering the "three separate occasions" on which "the golden moment was lost," he concludes by sketching the actual situation:—

Now, what is the present position? Nationalism, as the Milner Report tells us, has established complete dominance. Government "in the teeth of a hostile people" is not practical politics. The reserved points must be discussed with an Assembly in which, as Lord Milner tells us, the Zaghoulouist Party will have a substantial, if not overwhelming, majority. In these circumstances, what good purpose can be served by advertising the supposed crimes of Zaghoul and his party? Even the lengthy indictment made by Mr. Chamberlain in the House of Commons, and by the correspondent of the *Times*, amounts to no more than this, that from his youth, in the affair of Arabi, in his dealings with Abbas, and throughout, Zaghoul has been sympathetic with the desires of his fellow-countrymen. The worst that can be said is that the organization of which he is the head has attracted criminal elements, but this is really a criticism of the way the situation has been handled by the Government, unless indeed we are now to apply to the Egyptians the argument which was the stock-in-trade for years against the Irish, that they are an incurably disorderly and insurrectionary race. Such a charge must appear ridiculous to anyone who has seen the bent peasants patiently and ceaselessly toiling in their fields.

If the Nationalist Party demands the return of Zaghoul, do the Government intend to oppose it? It is a matter for the Egyptians themselves, and we are pledged to allow them the free exercise of their political rights. Present, Zaghoul is no doubt an embarrassment. Absent, he is a danger. I believe that Egyptian Nationalism is essentially Anglophile. Alienated and sullen, it may become the breeding-ground of anti-British intrigue. Conciliated and dealt with in good faith, it would be a faithful if humble ally of the Empire. All this talk about the first consideration being given to British interests and Imperial communications is as dangerous as it is hateful, for the moral power of Britain has been founded upon its championship of the rights of the weak.

Let us return to the older conception, contemptuously referred to amidst applause in the House of Commons as "the Gladstone tradition." British policy places before all else the rights and welfare of native populations.

It is too early yet to say what the effect of the new offer will be in Egypt. We do not know that the Press is free to voice public opinion. We do know that the Native Bar Council refuses to authorize its members to draw up the Egyptian Constitution. We do know that the celebrations of Egyptian Independence were marred by public disorder. And we do know that troops were sent to El-Azhar. In fact, the future depends on the spirit in which the proposals are carried out by the British Government.

The Little Entente.

In the second of the articles upon "The Rise of the Little Entente," contained in the *Nation and Athenaeum*

of April 8, Miss Dorothy Thompson thus outlines the important position of Hungary:—

Hungary is the one country blocking the forward movement of the policies of Messrs. Benes and Pasitch. She is economically indispensable to a strong Central South-East European alliance; next to Jugo-Slavia she is the strongest military Power in this part of the world, and she lies in the high-road of communication between the capitals of the allied nations. And Hungary has disputes with the whole Little Entente, individually and collectively. She has quarrelled with Czecho-Slovakia over Slovakia and Ruthenia; with Jugo-Slavia over Pecs; with Roumania over Transylvania and the oppression of Magyar minorities; with Austria over the Burgenland.

The case of Hungary in all these quarrels has been greatly prejudiced by her own Government. The Horthy Government's terrorizing of Jews and of the whole liberal opposition has driven Magyars to Vienna to work with Jugo-Slavs and Czechs for the overthrow of the present régime. The Horthy Government's policy of safeguarding freebooters and murderers, if they but freebooted and murdered in the interests of a "Christian and United" Hungary—its complete inability to realize that the world tendency is away from feudalism and autocracy—has exasperated everyone, and completely estranged democratic and liberal sympathies in all countries. Unfortunately, to believe that Hungary has a reactionary Government appears to connote, in the popular mind outside Hungary, that Hungary has no case; that she is a black spot in the midst of liberal and fine-spirited neighbors, and that the sooner she is brought to terms the better.

She proceeds to state that contrary to the usual assumption, Hungary is not a reactionary country, that she is a nation under a cloud, and particularly that she is a "nation which has been grievously wronged by the Peace Treaty."

This is an inescapable fact, and the reactionism of the Horthy régime does not change it. A great, rich country, full of pride, and with a virile national consciousness, has been robbed of an outlet to the sea. Magyar populations have been handed over to the abuse of other Powers. Particularly in Roumania has the treatment of Magyar minorities been shameful. In certain ways the last year has seen an improvement of conditions in Transylvania, but even now Roumanian elections are being held, and obviously the plan is to quell all minority opposition, for all Magyars are disfranchised by a nation-wide disqualification plot, and even the members of the Roumanian Nationalist Party have been deprived of votes. There is not an element in Hungary, be it reactionary, democratic, or radical, which is willing to accept as permanent the present territorial provisions of the Treaty of Trianon.

Now, the Little Entente is determined that she shall accept the provisions of the Treaty. The Little Entente is determined that Hungary shall not sabotage the effectiveness of the whole Central South-East Europe Alliance. The Little Entente, it is increasingly evident, is willing to employ force if need be to bring Hungary into the circle of its influence. And tragically enough, the Horthy Government is constantly furnishing the Little Entente with an excuse for armed intervention. The offences of the Horthy Government smell to heaven; if the Little Entente intervene it will be quite easy for them to pose as liberators and democratizers. But the fact remains that they will intervene not to liberalize Hungary but to enforce the Treaty of Trianon, and the Treaty of Trianon cannot be enforced as it now stands without the subjection, not alone of the Horthy Government, but of the Hungarian people themselves.

The situation is just about as bad as it can be. The Horthy Government, perturbed by the rising

Liberal opposition inside Hungary, is making desperate efforts to maintain itself in power, and by these very efforts is inciting Hungary's neighbors to attack her. The people of Hungary are kept under the heel of the Horthy Government, as far as they are voluntarily kept, by fear of the Little Entente. It is a somewhat similar situation, in externals, to that which prevailed in Russia until recently. The Soviet Government's policy led outside nations to attack Russia, and the attacks reinforced Russian support of the policy.

The writer concludes with the statement of an apparent belief that in Mr. Benesh alone reside hopes of a settled future for Hungary, in which she may be friendly with the Little Entente.

ARTICLES TO NOTE.

"The Life of Lord Salisbury"; "James Bryce," by the Right Hon. Sir Frederick Pollock, Bart.; "The Egyptian Problem," by J. A. Spender; and "Byron's Letters," by Lord Ernle, M.V.O., in the *Quarterly Review*. (April).

The Teheran Correspondent of the *Pioneer* states that the police force at Teheran have gone on strike on the ground that wages had been unpaid for several months. They are being replaced by soldiers, but they, too, are disaffected on account of pay arrears.

It is officially announced that owing to the changed régime in Egypt the anniversaries of King George's accession and his birthday will not be observed as Government holidays.

The *Pioneer* learns that an unsuccessful attempt was made to blow up the bridge on the Grand Chord, East India Railway, north of Asansol.

According to telegrams from Damascus, via Cairo, sentences have been passed in connexion with the recent disturbances there. Dr. Chabandar was condemned to 20 years' detention in a fortress, Hassan Bey Hakim, ex-Director of Posts and Telegraphs, to 10 years' imprisonment, and five others to terms ranging from five to 20 years.

NOTES AND NEWS.

Devonshire Square,
E.C. 2.

Bulgaria's Finances.

In M. Tourlakoff's budget speech, nothing is said about the extraordinary budget. In the year just closing this was concerned mainly with the State Railways and doubtless the same will be the case in the current year. Much money has to be spent, not on increasing the country's railway facilities, but in making up for war wear and tear. It is presumed that the expenditure involved by this budget will be met from the proceeds of an internal loan.

Trade and the Constitution.

In the same speech an interesting admission is made unconsciously. In comparing the balance of trade in a series of years, it is remarked that, for the first six months of 1921-1922 the balance was more against Bulgaria than ever, but that it had largely righted itself in the last half year. This is clearly due to the wise decision of the Government to abandon the Consortium monopoly. Conceived no doubt in the best spirit, the Consortium was never more than a purely idealistic scheme without practical backing. It worked unsatisfactorily, and was becoming a curse to the country. Not the least of the debts which Bulgaria owes to the much abused Inter-Allied Commission is its present freedom from this burden. It is only fair to say that the Commission would probably not have succeeded so easily in getting this monopoly abolished if the best members of the Government had not agreed with it.

Progress at Genoa.

The alarms and excursions at Genoa have no doubt given many good people the idea that if the efforts of all the cooks who have gathered there resulted in the production of a cake at all it would be a very attenuated product. As a matter of fact it was inevitable that there should be surprises and disagreements. Can anyone cite an entirely peaceful conference? And it is through the difficulties at Genoa that success is likely to come. I was sceptical from the first as to the prospects of the Conference, but I am now of the opinion that in consequence of recent developments there is a very real possibility that Genoa may prove a vital landmark in the process of Europe's economic recovery. And for that we have to thank Germany for making a colossal blunder. Up to that time the Conference was being carried on in an air of unreality. The Teuton bluff, another Agadir effort, had the effect of clearing the atmosphere, of bringing men's minds down to realities. It was recognised then that the choice was between a united effort to re-establish trade by promoting the reconstruction of the countries affected by the war or the re-grouping of the Powers with the inevitable resort in the end to the *ultima ratio regum*.

The Prospects.

I should be the last to encourage any undue optimism as to the work the Conference is likely to accomplish. A round table discussion cannot of itself force the exchanges in the direction of parity, and by the development of trade solve the unemployment problem with which Europe is confronted. But it can do much to

ensure the adoption of the only means by which reconstruction can rapidly be pursued. If the financial policy of European states since the Armistice had been on sound lines there would have been no need for a conference except with Russia. The Brussels Conference laid down the essentials for economic salvation, but with one or two significant exceptions the countries concerned have not followed them. Far too much use has been made of the Printing Press, while the drastic measures necessary to make budgets balance have been shirked with the result that many exchanges are now about the same or higher than they were a year ago. If the conference results in an agreement in economic policy, as I think it will, then it must be adjudged a success.

Taxation and Business Enterprise.

Lord Inchcape put the case for a reduction of taxation in the coming Budget forcibly but not one whit too strongly in his speech at the meeting of the Income Taxpayers' Society at the Mansion House on April 24. The crushing effect of the present taxation on business enterprise is unquestioned, but if it were found that there is no alternative the commercial community would no doubt accept the burden uncomplainingly. But we have the report of the Geddes Committee showing the way to ample economies, a report which, drastic though it was might have gone very much further with advantage in some directions, and of which so far apparently little use has been made. In the circumstances it is only natural that commerce should expect at least 1s. off the income tax on this occasion as the first step in the direction of the normal. The effect on trade, now beginning to show the first signs of revival, would be most marked.

The Coming Liubliana Fair.

Particulars have just reached me of the programme for the second Liubliana fair which will be held from September 2 to 11. It is not merely an exhibition of local products, but is open also to all foreign industrial and commercial establishments, and I am given to understand that the participation of British houses is particularly desired. I hope our traders will take adequate advantage of this excellent opportunity (for such it undoubtedly is) for entering the Yugoslav market, and if any who are interested will apply to me I shall be glad to give them further information.

GREECE.

Athens, April 7.

The Forced Loan.

The event of the week has been the adoption of a Bill brought before Parliament by M. Protopapadakis, the Minister of Finance, for the raising of an internal loan of 1,500 million drachmae. After pointing out to the Assembly that the financial situation of the State was very serious and that there was no immediate prospect of an external loan, the Minister of Finance said that the only way by which the required amount could be raised was by a forced loan. The State, he continued, was in desperate need of money, and must absolutely have 1,500 million drachmae. The Bill brought before the Assembly was as follows:—

1. The Government is authorised to conclude a forced internal loan to the amount of 1,500,000,000 drachmae at six and a half per cent. interest.
2. Those in possession of banknotes issued by the National Bank of Greece, are compelled to contribute towards the raising of this loan a sum equal to half the value of the banknotes in their possession.
3. The banknotes issued by the National Bank of Greece will be annulled, and will therefore lose their value as from a date to be fixed by Royal Decree. The one half of these will be exchanged for banknotes of a new type equal to half the value of the old notes, and the other half for bonds.
4. Pending the issue of the new banknotes and bonds, the banknotes now in circulation will, with the exception of the notes of a lesser value (2 drs., 1 dr. and 50 lepta) which were put into circulation by the State, be cut in two, the one half, bearing the effigy of Georgio Stavrout*, being equal in value to the new type banknote which will be half that of the annulled banknote, and the other half, bearing the crown, constituting a provisional bond, its value being also half that of the original value of the cancelled banknotes.
5. The possessor of these bonds can mortgage them with the National Bank of Greece for half their value at 6 per cent. interest.
6. The circulation as a note of the half banknote bearing the crown is strictly prohibited.
7. Pending the application of the law, and for a period of three months from the date it comes into force, any debt or other liability, apart from wages and salaries, can be discharged by means of the bonds up to half the amount owing. This does not apply to debts to foreigners residing abroad, who will receive the full amount due to them in the Georgio Stavrout half of the banknote.
8. On the day the present law comes into force, the National Bank of Greece is obliged to bring to the credit of the State a sum equal to half the total value of banknotes in circulation.
9. The loan will be paid off within 20 years.

* The founder of the National Bank of Greece.

10. Gradual amortization will be guaranteed by an additional 10 per cent. on all existing taxes, also by the sale of all State landed property.

11. The State undertakes to pay off the loan, either partly or in its entirety, as soon as an external loan is concluded.

M. Stratos and many other deputies, including M. Eftaxias, formerly sub-governor of the National Bank of Greece, spoke in strong terms against the loan which they considered impracticable. Finally, however, after undergoing certain modifications, the Bill passed its first reading by a very small majority, 151 voting in favour and 148 against.

As was only to be expected, the announcement of the forced loan caused a general panic. Everybody commenced buying foreign currencies so as to make certain of his money. The Stock Exchange was promptly closed by the Government, but on the free market the English pound found hundreds of buyers at 140 drachmae, while the French franc reached three drachmae. The small notes (50 lepta, 1 dr. and 2 drs.), also the copper and nickel coins which, according to the new law retain their full value, disappeared completely. It was utterly impossible to buy anything under the value of five drachmae, as the shopkeepers could give no change. There was a tremendous rush on the shops. People were withdrawing their savings from the banks and buying large quantities of foodstuffs and other commodities in order to rid themselves of their paper money before it was "cut" in two. Most of the shopkeepers, of course—though this was realised too late—put their prices up by 30 to 40 per cent. It is estimated that during the two days preceding the adoption of the Bill by the Chamber, over 60 million drs. were withdrawn from the Banks by depositors. The Bill, having finally passed, comes into force this afternoon.

The Financial Statement.

The Budget for the financial year 1921-1922 was introduced by the Minister of Finance and is as follows:—The total expenditure amounts to 3,397,143,914 drachmae, and the revenue totals 1,718,854,903 drachmae, leaving a deficit of 1,678,289,011 drachmae. The revenues include both the ordinary (715,233,460 drs.) and extraordinary revenues (85,096,443 drs.) also the proceeds of new loans (917,925,000 drs.). The total expenditure comprises both the ordinary (1,399,866,980 drs.) and extraordinary expenditure (1,997,276,934 drs.). War expenses which are included in the extraordinary expenditure are represented by 1,611,371,250 drachmae.

Athens, April 16.

Reception of Loan.

The new law in connection with the forced loan came into force at noon last Saturday, and on Sunday morning the half notes made their appearance for the first time. Many shopkeepers announced that they were willing to receive in payment of their commodities both the "Bond" and the "Georgio Stavrout" half of the notes, while many "opportunists" offered to buy the 50 drachma "bond" half at prices varying between 40 and 45 drachmae. A good many people, especially peasants who greatly alarmed at the prospect of parting with a large portion of their savings had come to the capital from the various villages in Attica with their "tagaria" full of paper money, were thus able to rid themselves of their "crown" halves. The police, however, have now put a stop to these transactions and have only authorised the exchange of the "crown" halves at par value.

With regard to the "bond" halves in the possession of foreigners, it transpires that a special convention, concluded over twenty years ago, exists between Greece on the one hand and Great Britain, Spain, Japan, Switzerland, and Persia on the other hand, by which the subjects of these countries are exempted from all extraordinary taxation including forced loans. The Hellenic Government, however, not wishing to make any dis-

Applications for Terms invited.

tion, has given permission to all foreign subjects residing permanently or temporarily in the kingdom of Greece to exchange their "bond" halves for "cash" provided that they are *bona fide* their property. The exchange is effected by the various Legations and all claims are scrutinised and, if found in order, are paid on the spot. As regards Greek money deposited in the banks, foreign subjects should hand in to their Legation a written declaration giving the exact amount. These claims will be dealt with at a later date. It is estimated that the total amount of drachmae, including bank deposits, in the possession of foreigners residing in Greece is about 200,000,000.

By order of the Minister of National Economy the export of Greek banknotes is henceforth strictly prohibited.

ROUMANIA.

Bucharest, April 7.

The Budget.

On Wednesday, M. Vintila Bratianu, the Minister of Finance, introduced in the Chamber the budget for the fiscal year 1922-23. He began his statement by explaining that the present budget is only a provisional one and that a definite ordinary budget can be drafted only after the chief points of financial consolidation have been taken into account. *viz.*, the banknote issue, the reorganization of public services, the debts abroad, and, on the other hand, the war indemnities due to Roumania. He, nevertheless, pointed out that the present temporary budget marks real progress towards more normal conditions, by the fact that both the revenue and expenditure balance without it being necessary to resort to an extraordinary budget, which he intends abolishing entirely. The difference between the total amount of the present budget—estimated at 10,498,283,482 lei—and the figure of 7,708,477,296 lei, representing the total amount of the ordinary budget of last year, arises from the fact that it comprises the necessary sums for the payment of the interest on the internal and external debts, as well as the additional credits for the urgent needs of the Ministries of War and Communications, which were provided for last year by supplementary credits.

The Minister of Finance further laid stress on the encouraging character of the budget, seeing that the ordinary expenditure of the State can be covered by means of the revenues based on the present taxation, and without it being necessary either to forfeit or sell any portion of the country's national wealth by contracting a loan abroad. He concluded by stating that in the course of the present fiscal year the Government would have the time to study more closely the needs of the various Departments, so that for the autumn session he expects to be in a position to bring before Parliament a definite ordinary budget.

The Minister of Finance, in estimating the revenue side, has taken as a basis the collection of taxes in force on January 1, 1922; in other words, he practically based his calculations on the Fiscal Reform Law of M. Titulescu which however, might be modified according to exigencies in the course of the year. The outstanding features of the revenue column are: Direct Taxes 650,000,000 lei—a decrease of about 72 million lei as compared with last year; Indirect Taxes 3,310,000,000, representing an increase of more than one milliard lei; State Monopolies—1,626,500,000 (last year 1,350,000,000); Ministry of Communications—3,125,712,200 (2,340,239,394); Ministry of Industry and Ministry of Labour—309,022,000 (130,500,000); Ministry of Domains and Agriculture—11,175,000 (12,000,000). All the other Departments show a proportional increase as compared with last year.

On the expenditure side the budgets of the different Departments have been estimated, as follows (the figures for last year being shown in brackets):—Ministry of War 1,767,340,724 (925,019,042) lei; Ministry of Finance—2,084,243,847.17 (1,926,600,000); Ministry of Education—954,000,000 (781,000,000); Ministry

of Church and Arts—223,000,000 (215,000,000); Ministry of Interior—709,000,000 (685,000,000); Ministry of Public Works—197,464,736 (202,000,000); Ministry of Justice—219,000,000 (224,724,580); Ministry of Domains—132,668,542.70 (134,297,523.70); Ministry of Industry and Commerce—219,583,069 (93,784,715); Ministry of Foreign Affairs—26,225,396 (32,281,600); Ministry of Labour and Social Welfare—21,382,350 (22,500,000); Ministry of Agriculture—161,400,757.15 (164,263,073.15); Ministry of Communications—3,187,631,999 (2,260,155,457); Council of Ministers—1,231,720 (3,102,200); Fund for difference of rate of exchange and commissions, etc., 593,510,340.98 lei. This last figure and about 200 million lei from the sum allotted to the Ministry of Finance will be used to pay the interest on the debts at home and abroad.

The following amounts are due for the internal debts during the fiscal year 1922-23: 29,664,266 lei interest on Treasury Bonds to the total value of 593,285,339 lei. 32,000,000 lei interest on 12,400,000,000 lei floating debt due to the Banca Nationala. 245,070,652 lei interest on 4,877,006,262 lei representing the consolidated internal debts contracted during the period of neutrality and after the war. 11,250,000 lei on about 250,000,000 lei of the pre-war consolidated internal debt. Therefore, the total amount of interest on internal debts is 317,984,952 lei.

As regards external debts the interest to be paid on Treasury Bonds falling due up to March 31, 1923, totalling 632,053,782 francs, amounts to 53,724,571 francs. In addition there is the interest on consolidated stocks abroad totalling 500,000,000 francs which will amount to 25,000,000 francs. The total amount of interest due abroad is therefore 78,724,571 francs. The Roumanian State possesses, however, for the payment of the coupons abroad various sums in sterling, Swiss francs and French francs, totalling 20,850,000 French francs, which reduces the total to 57,874,571 francs.

Timber Trade.

The timber trade, which was stagnant during the winter months, has restarted with the re-opening of the river traffic, and promises to benefit greatly by the increased railway transport. There is further a good demand on the home market for building purposes and also a healthy demand for export, with enquiries especially from the Balkans and other Near Eastern countries. The price of timber to be obtained to-day for export at Roumanian ports varies from 1,100 to 1,300 lei per cubic metre *f.o.b.*, oriental sizes.

Export of Wines.

For the purpose of encouraging the export of wines the Ministry of Agriculture has now removed all restrictions, and in order further to facilitate trade the export of oak barrels is now also to be free without the necessary guarantees.

BULGARIA.

Sofia, April 11.

Bulgaria's Reparation Payments.

The following are the main points in the Note addressed by the Inter-Allied Commission to the Bulgarian Government at the end of March. (1) Bulgaria is to pay 10 million gold francs during 1922. (2) Bulgaria is to pay 30 million gold francs during 1923, but this figure is liable to reconsideration on January 1, 1923. (3) In return for these concessions, for, according to the terms of the Peace Treaty, Bulgaria should pay 45 million gold francs during 1922 and considerably more during 1923, the Government is asked to give certain guarantees. (4) These guarantees are numerous but the principal are partial supervision of Pernik coal mine and of the Customs. It is to be noted that 10 million gold francs are to-day equal to approximately 300 million paper levas or £400,000.

Although every newspaper, regardless of party, has been insistent on regarding the Note of the Commission as a blow at the independence of Bulgaria, the effect on the commercial and financial world has been negligible.

The leva has not fallen, and there has been no sign of panic. The view held by many bankers is that control of the customs and coal mines does not matter providing that the control does not go too far. If the control is to spread to everything and the governing of the country is left entirely in the hands of the Inter-Allied Commission then the result might well become disastrous. The differences that always exist in Inter-Allied Commissions would have a chance of showing themselves, and would not conduce to the good of Bulgaria. It is in any case good news that the personnel of the Commission will not be increased by the control that is demanded.

The Government's Intentions.

The general view is that the Government will agree to the guarantees. Owing to the fact that both M. Stambolisky, the Prime Minister, and M. Tourlakoff, the Minister of Finance, are absent at Genoa, no decision is likely to be taken till they return. The Commission requested the Government to reply by the end of April, but it is probable that a delay will be granted till the 10th or 15th of May.

By agreeing to the guarantees demanded by the Commission, it is incontestable that the Government will be signing away some of their authority, but the alternative, namely a refusal will probably mean total loss of authority. The Commission are said to anticipate acceptance by the Government, but in the event of the contrary occurring it is imagined that they will insist on Bulgaria conforming strictly to the terms of the Treaty. This, involving as it would, the payment of one milliard, three hundred and fifty thousand paper levas during 1922, could only result in total disaster and bankruptcy. Even as it is, the sum of 300 million paper levas will prove a considerable drain on the exchequer.

ASIA MINOR.

Smyrna, April 15.

The Greek Loan.

The Greek forced loan has caused considerable loss to Smyrna business men. At first it was believed that only Greek subjects would lose half their holdings of drachmae but the Greek Government have announced that they will not repay foreign subjects for their stocks of Greek money. The respective Consuls have protested against this decision and insist on their nationals receiving full value for their drachmae—as has been done in Greece—and it is hoped that the Consuls' protest will receive the support of their respective Governments.

It is reported from Prague that negotiations for the conclusion of commercial treaties will shortly be inaugurated with Holland, Belgium, Japan, Denmark and Australia.

COMMERCIAL CORRESPONDENCE.

The Colonization of Palestine.

To the Editor of "The Near East."

Sir,—In the issue of THE NEAR EAST dated March 23rd Mr. W. Rosen, after a number of criticisms on the immigrants now entering Palestine, concludes that these are unsuitable for colonization here. The opinions expressed by Mr. Rosen are in complete contradiction with views of British officials who have had direct experience of Jewish labour in Palestine.

At a Conference held at Government House, Jerusalem, last December, to consider the labour question in Palestine, in which the Director of Public Works, the Chief Engineer of the Palestine Railways, and the Chief Engineer of the Army of Occupation in Palestine participated, the question of Jewish labour of the new immigrant or "Haluzim" type, the object of your correspondent's denunciation, was especially considered.

The general opinions expressed were that Jewish labour is as good as, and more intelligent than, other classes of labour in Palestine; that it is likely to become even better as the workers become acclimatized and accustomed to local conditions; though it still remains an open question whether Jewish labour is the most suitable for heavy work, it was agreed that Jewish technical workers could not be surpassed in Palestine. The Director of one department said, "As far as Jewish labour is concerned he had nothing but praise for it," and another, "Jewish technical workers could not be surpassed in Palestine but Jews in his opinion were unfit for heavy unskilled work."

Yours very truly,

M. D. EDER.

Jerusalem, April 5.

British Traders and the Near East.

To the Editor of "The Near East."

Sir,—I should like heartily to endorse the views expressed on this subject in a letter in your issue of April 13. As soon as more settled conditions obtain—and this is likely to be the case much sooner than most people expect—there will be the fullest scope in the Near East for British trade endeavour. We cannot afford to neglect such a promising field, and those of our traders who have prejudices against it must be urged to abandon them. It is perfectly true that firms may sustain serious losses in the Near East, but with care and provided the market is entered on sound lines the risk is no greater than in any other market.

Yours etc.,

ANOTHER TRADER.

London, April 24.

STAMPING OF BONDS OF ROUMANIAN LOANS.

H.M. Representative at Bucharest has forwarded the following translation of a notice published in the *Official Gazette*, relative to the stamping of bonds of Roumanian loans:—

From 15th April to 15th June, 1922, all Bonds of Interior and Foreign Loans contracted between 1889 and 1913 inclusive must be presented for stamping (estampillage) as also those of the Loan of 250 million lei at 4½ per cent. belonging to Allied subjects since 14th August, 1916. As regards the latter, however, Bonds bought from 1914 to 1916 will be submitted to revision by the Central Commission which will pronounce finally on the question of stamping.

The press states, adds H.M. Representative, that the stamping will take place in Bucharest at the Caisse des Depots et Consignations, at the National Bank, and at the offices of the Financial Administration, by the agency of Commissions consisting of a judge and delegates of the National Bank, Financial Administration, and Ministry of Finance.

Similar Commissions will work in the provinces. The Central Commission referred to above will sit at the Ministry of Finance. Its President will be the Secretary-General of that Ministry, and the members will consist of a Director of the National Bank, the Director-General of the Caisse des Depots and Consignations, the Director-General of the State Accounts Office, and the Director of the Public Debt.

Engineering Topics.

By Our Engineering Representative.

SYNTHETIC IRON.

The production of synthetic cast iron, which a few months ago seemed likely to be of immediate commercial value now seems to have been relegated to the region of things of academic but no practical interest. There is no difficulty in producing the material in the electric furnace; the material is cheap and abundant, the process by no means complicated. But the production cost is higher than that of producing ordinary cast iron, and unless the price of the latter rises or suitable stock for synthetic iron becomes cheaper, there is little prospect of seeing the latter in common use. Quite sufficient data are at hand, however, to enable the foundryman to keep closely in touch with the situation in every country, and there is no doubt that synthetic cast grey-iron will be on the market the moment prices of ordinary pig shew any appreciable upward tendency. There are ample figures available to enable a prospective maker to work out the production cost per ton of electrically produced synthetic iron, and many firms are keeping a chart of raw material prices in order that they may switch their electric furnaces on to the production of the artificial cast iron as soon as prices render such a course advisable. The cost of operating an electric furnace is at present rather higher than that of cupola melting. At present the cheapest form of scrap suitable for the manufacture of synthetic cast iron is machine shop steel turnings and chips, and as a rule this is not obtainable so cheaply as cast iron borings and scrap; certainly when the cost of the necessary ferro-silicon, which has to be added to the steel to produce synthetic grey iron, is taken into account, the cost of the steel scrap is higher than that of cast metal borings. In connection with this, however, there is a point which has as yet not been taken into consideration at its true value, and that is the use of old tinned steel goods collected from refuse destructors and other sources. Very many thousands of tons of this material can be collected and, during the war, were collected for the purpose of de-tinning work. Before the war Germany used to purchase every possible scrap of this material and, however she treated it, and as to this accounts differ considerably, she was well satisfied with her bargain.

At the moment it is probable that de-tinning would not offer much prospect of financial success, but the baling of the scrap "tins" and other sheet steel waste is not expensive, and undoubtedly this is the ideal material for manufacturing into synthetic cast iron. Given reasonably cheap operating costs for the electric furnace and reasonably cheap rates of carriage for the steel scrap, there should be no difficulty in working up the whole of the present supplies of this material into a high grade cast iron suitable for making any kind of castings and producible at a price below that at present ruling for ordinary pig iron.

Foundry Research.

Comparatively few engineers appear to realise that unless a test reveals some condition which is capable of being modified for the better, it is actually useless as a routine control method in either mass production or the manufacture of parts in small quantities. It has also been pointed out that the ease with which a test can be carried out is also in itself a regulating factor. Considering this in relation to ordinary foundry work, for example, an analysis of pig iron in order to determine its content of those elements usually found in it in appreciable quantities enables the metallurgist to mix the iron in such proportions as to ensure that the metal from the cupola will have the required composition. Following on this, an analysis of the casting produced will show whether the iron has been charged in accordance with the specification. There are practical limits to this, how-

ever, and as the *Foundry* recently pointed out, a test for titanium and other elements, which are occasionally found in small quantities in cast iron, is far too complicated for routine work and would not give any indications which would permit the chemist to modify the mixture. On the other hand, such a test would be essential, or at any rate would be of great value, to any metallurgist who was engaged in actual research work.

Very little real reward is brought in this line of endeavour by superficial methods and it may be said further, without fear of contradiction, that superficial methods actually lead to false conclusions which discredit or tend to discredit research work with many practical foundrymen. This is equally true of many other lines of engineering; in connection with the internal combustion engine a number of tests may be made during the actual work of construction, and relative to the behaviour of the engine under certain imagined conditions which not only carry us very little further but which are of no practical value so far as the life and output of the engine are concerned.

Research in the composition of steel and of secondary and tertiary steel alloys, together with microscopic study of such steel and alloys has shewn us a number of points by which the metal can be controlled in regard to its temperature, the different methods of pouring and its treatment in the rolling mills. But in comparison with the progress made in steel research, little has been done in connection with cast iron and although it may be granted that the microscopic study of malleable iron has been developed by a few metallurgists until we have arrived at a far better understanding of the annealing process, even that has been of very little practical value to the foundry man working with grey cast iron. A glance through the contents of the leading technical journal and through the indices of the proceedings of metallurgical societies shows that quite a number of practical and technical articles have been published and papers read on the microstructure of cast iron, and these give us some idea of the results which might be obtained from a closer and more prolonged investigation of this product by means of high-powered microscopes. The *Foundry* pointed out recently, in connection with this, that while micrographs have been made shewing sulphur spots, no method has been found to enlighten the investigator in regard to the condition in which sulphur exists in the iron; that is, whether it is in more than one form or not; the claim being made that residual sulphur in the iron has a different effect upon it to that of sulphur picked up during the melting operation. Here, of course, is a big field for research and one in which investigation would have a considerable value as it would shew whether it is necessary to prevent any access of sulphur during melting or whether it is sufficient to eliminate it as far as possible from the pig-iron and scrap.

A somewhat similar field for research exists in connection with both carbon and phosphorus content and so far as carbon is concerned this has been gone into thoroughly in the case of steel. The state in which carbon exists in steel has a marked influence on the product, and lengthy and painstaking investigation has been made in that connection, but so far as ordinary grey cast iron is concerned microscopic investigation has been confined, to all intents and purposes, to an examination of the size and shape of the carbon particles. This has told us little or nothing beyond what was already known regarding the effects which produce those different sizes and shapes. The paper quoted, which has gone into the subject thoroughly, aided by exclusive accounts of work done, and voicing the opinions of those most expert in foundry work, considers that research must go deeper and study the graphite formation at higher magnifications.

Stock and Share Markets.

BUOYANCY CONTINUES.

Further Rise in Gilt-Edged.

(From Our Own Correspondent.)

London, Tuesday morning.

Business has been extremely brisk since the holidays. Special activity has ruled in the Gilt-edged market, but almost all sections have shared in the general revival. At one time a slight tendency to dullness was in evidence as a result of developments at Genoa, but it soon passed and the upward movement went on. There is no sign of the volume of business decreasing, and if the income tax should be reduced next week I shall look for increased buoyancy in the markets.

The Outlook.

It would be a mistake, however, for investors to count on the stability of present conditions. Stocks have risen partly because of the improvement in the situation, but also because of the trade stagnation which has closed the normal avenues for the employment of capital. Judged from that standard it is an unfavourable symptom that the markets should be buoyant. When trade really begins to revive in the course of this year investors of Gilt-edged will be among the first to realize it, for the inevitable tendency will be to withdraw money from securities for utilization in industry. These remarks need not be taken as having a much wider application than the Gilt-edged group. Other markets—most of them at any rate—are still far below the pre-war level, and I see small reason why Oils or Rubbers, for example, should be affected by trade development. Here other factors enter into consideration.

Coming Issues.

There is, as might be expected, a marked shortage of stock at the present time, hence to some extent the higher prices. This is likely to be remedied, of course, before long by a large number of new issues, which are promised for the near future. These new issues will include one for the City of Prague, to which I referred some weeks ago. It is understood that this issue will be made in a few weeks time. There is no news with regard to pending issues for the Near East, but I imagine that if things go smoothly at Genoa before very long several loans will be arranged. It is greatly to be hoped that this will be the case because of the important influence on British trade that would thus be exerted. It will have been noticed that some of our trade rivals are apparently proving themselves more ready to give accommodation than we are, and if Near Eastern countries come to look elsewhere than to this country for loans it is only to be expected that our interests will suffer.

Gilt-Edged Buoyant.

A very strong tone has prevailed in the Gilt-edged group, and prices are again higher all along the line. Consols have gained $\frac{1}{2}$ at 60, the Conversion Loan is $\frac{1}{2}$ up at 77 $\frac{1}{2}$, while War Loan Fives are 101 $\frac{1}{2}$, a rise of 1.3-8. Indian stocks have shown a hard tendency. The Seven per cent. Loan at 112 $\frac{1}{2}$ shows a gain of $\frac{1}{2}$, the 3 $\frac{1}{2}$ per cent. Loan is $\frac{1}{2}$ up at 65 $\frac{1}{2}$, while the 3 per cent. Loan has gained $\frac{1}{2}$ at 56 $\frac{1}{2}$.

Firmness has ruled in the foreign market, and in a number of cases advances are to be recorded. French War Loan Fives have gained $\frac{1}{2}$ at 47 $\frac{1}{2}$, while German three per cents. are 5-16 up at 2.7-8. Italian Rentes are unchanged at 24 $\frac{1}{2}$. Brazilians have been firm, notably the 5 per cent. 1914 Funding, which is 85 $\frac{1}{2}$, and the 5 per cent. 1913 Loan which stands at 64 $\frac{1}{2}$. Chinese bonds exceptionally showed a weak tendency as a result of the unsettled conditions ruling in the country.

Industrials Firm.

Again the tendency in the Industrial group has been towards higher prices, but business has been on a somewhat smaller scale this week. Tobaccos have been in fair request, but are closing slightly below the previous week's levels. Bats are 77s., while Imperial Tobaccos are 59s. 3d. Dunlops are 3d. up at 8s. 3d.

Textiles have been steady. Coats are 3.3-32, a rise of 3-32, while Courtaulds have gained 1s. 6d. at 44s. 6d. Iron and Steel securities have been somewhat affected by the labour situation, but in some cases prices are considerably higher. Vickers are 6d. down at 12s., but Guest Keens at 35s. 3d. are 2s. 9d. up, while Armstrongs are 9d. up at 18s.

Shipping securities have been a specially firm spot during the week on the signs of improvement in trade. The feature has been the rise in P. and O. Deferred which are 20 up at 340. Cunards have been in some request, and close at 23s. 3d., a gain of 1s. 3d., while Furness Withys are considerably higher at 32s. 3d.

Oils Hard.

Oils have been on the whole a very fair market during the week. Burmahs have been in some demand, and at 5.7-8 are about the same as the previous week. Anglo-Persian Oil close at 4 $\frac{1}{2}$ a decline of 3-16. Mexican Eagles are 3.9-16, a decline of 3-32. Trinidad issues have been dull, with Centrals 7-16 lower at 2 $\frac{1}{2}$, while Leaseholds are 1.3-16.

Among Egyptians, Anglo-Egyptian B are unchanged at 1 $\frac{1}{2}$, while Oilfields of Egypt are 4s. 6d. Roumanians have been firm with Phoenix 3d. up at 28s. 9d. Great though the rise in this share has been I shall be surprised if in the next few weeks there is not a further upward move. Steaua Romanas are unchanged at 11-16, while Roumanian Consolidated are 9d. up at 15s. 6d. I recommended a purchase of this last named share some weeks ago, and those who took my advice have made a highly satisfactory profit. I expect the share to go still higher.

Banks Hard.

Banking securities have been very firm with Chartered of Indias at 17 $\frac{1}{2}$ xd., and National of Indias at 40 $\frac{1}{2}$. P. and O. Banks are 13.

In Egyptian securities Aboukirs are 22s. 9d., Beheras are 8.3-8, Gharbich Lands are 14, New Egyptians are 25s.xd, Sidi Salems are 7-8, and Union Foncieries are 2.

An improving tendency has been in evidence in the Rubber market during the past few weeks, and small advances have taken place in a number of descriptions. The reason for this is that recent reports have shown that results during the past year have not been nearly so unfavourable as was expected as a result of the economies that have been effected.

ANSWERS TO CORRESPONDENTS.

Inquiries on financial subjects are invited from our readers, and will be answered in this column.

H.L.T.—No, I do not think so.

K.—I cannot recommend a purchase.

York.—You will see above that I rather think they will go higher still.

The traffic receipts of the Egyptian Delta Light Railways for the week ended March 31 amounted to £E.9,110; total for year £E.385,945. For the corresponding period of last year, receipts amounted to £E.11,082, and £E.483,676 respectively.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

114. Importer in Karachi (India) travelling throughout India wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers and exporters. Specialities:—Exports: Medicinal herbs, dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods Own account and commission basis. Good references provided Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old Dundee, and Calcutta makes.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

Cotton @ Cotton Goods.

MANCHESTER REPORT.

(From Our Own Correspondent.)

Manchester, Saturday.

Although the holidays have somewhat interfered with business in the market during the past week the tone has continued firm, and during the past few days rather more activity has been displayed by buyers. Traders generally are disappointed at the failure to arrange a settlement of the cotton wages dispute, but as the point now to be bridged is only very small, it is confidently expected that no stoppage will occur on Saturday next. Now that business is gradually improving it will be a great mistake if all the mills were brought to a standstill. With regard to cloth not very much business has been done with the outlets of the Near East. Isolated transactions have been put through in a variety of fabrics for Egypt, the Levant and Constantinople. Quotations for Egyptian yarns have continued firm, but the off-take for home use has not been anything to boast about. With regard to the cloth inquiry for the other outlets India has again been the best, and some encouraging transactions have been put through in light cloths and shirtings. Speciality makes have been in request for China, but the political unrest out there is very disturbing. Buyers for the remaining minor outlets both East and West have not been altogether idle. American counts have been steady in price, but home buyers have only taken up small lots. Export numbers have again been sold in fairly encouraging quantities for India and the Continent.

EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report dated April 7 state :—

The market has been featureless with a very limited number of transactions passing; the indifferent attitude of speculators and the reluctance of the commercial houses to deal in "futures" has brought about the present dull situation. Orders from abroad for actual cotton have been perhaps larger than usual but this has not influenced the futures market as the export houses have preferred to cover their sales by purchases on the spot market. The continued extensive spot business on the Liverpool Egyptian market has been welcome but has not affected our market; the stocks are still very heavy and it appears that the bulk of this cotton is unhedged. It seems that the stock to a great extent belongs to native merchants or firms who bought the cotton on speculation early in the season.

This week has seen a marked improvement at Minet-el-Bassal and sales amount to about 9,200 bales of which we estimate 7,300 bales Sakellarides, 1,800 bales Uppers and 100 bales Brown, etc. Arrivals continue on a fair scale but exports are also good and the stock shows a slight decrease. Cotton generally is in strong hands and well held and there is no disposition to force sales. *Per contra* spinners are not ready buyers and prices offered are rather low, so that it is not easy to put business through.

Our agricultural expert has now concluded his first tour of the season in Upper Egypt and reports that the acreage of land planted in cotton appears to be, in general, slightly superior to that allowed under the Decree. Minieh districts show conditions more satisfactory than those of the other Provinces but everywhere there is a delay in the preparation of the land and sowing which averages from 5 to 15 days. The scarcity of water is much commented on by the growers and all feel very anxious about the summer supply. The quantity of cotton which will remain in [Upper Egypt] till next season is estimated at about 100,000 Crs.

In a further report dated April 13, the Commercial Co. of Egypt state :—

The market has been weakened by speculative sales and by the fact that arrivals have been heavier than generally expected. The demand from abroad has been moderately good but this has not influenced our futures market as the export houses have again covered their sales by purchases on the spot market. The satisfactory daily spot sales of Egyptian cotton in Liverpool have not affected the Liverpool Egyptian futures market; quotations there are still considerably below Alexandria prices. No support has been given to our market by America, where business appears to be very quiet and dull owing to the strike which shows no sign of settlement at present.

In spite of the fact that prospects for an early revival in business are not very bright and although the existing heavy stocks here, in Liverpool and in America will make their weight felt on the market for some time, yet we do not think there is much fear of a break as holders of cotton in general are in a fairly sound financial situation and the total prospective supplies for next year do not promise to be abundant whereas the consumption should increase.

A fair business has been done during the 4 business days at Minet-el-Bassal this week and sales amount to 5,100 bales of which we estimate 3,600 bales Sakel, 1,300 Bales Uppers, 100 bales brown and 100 bales white. Arrivals continue on a fair scale and the stock shows a small increase.

Sowing is practically completed in the Central and Southern districts of the Delta and in a few days time it will also be terminated in the Northern districts. As far as can be ascertained the acreage of land planted under cotton in the Delta appears to be about 10 per cent. more than last year. The germination, so far, has given about average results, resowings generally varying from 10 to 20 per cent.; in some cases, however, they have reached 50 per cent. The progress of the young plant is from 5 to 10 days late. Although there is a slight delay, no forecast can be made on its effect with regard to the pink boll worm attack; in previous years there was the practical certainty that the attack would overtake the plantations and destroy most of the bolls in November, but in consequence of the check in the development of the pink boll worm noticed last year owing to its being attacked by three parasites, this danger does not seem so great. So far nowhere in the Delta has the water deficiency been noticed to such a serious degree as in Upper Egypt.

LONDON PRODUCE REPORT.

Oilseeds Higher.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in fair request at current rates. Tate's cubes and mineral water sugar are inactive at 53s. 9d. and 49s. respectively, while London granulated has been a firm feature at 48s. 6d., and Lyle's granulated has been steady at 48s. 9d. Unsteadiness has prevailed in export descriptions. West Indian crystallized has shed 6d. at 42s. 6d., while white Mauritius has lost 9d. at 43s. 3d. Cane sugar quotations are:—April, 14s. 6d.; May, 14s. 6d.; August, 14s. 6d.; and September, 14s. 6d. White sugar quotations are:—April, 20s.; May, 19s. 9d.; August, 20s. 1½d.; September, 20s.; October-December, 19s.

Coffee.—Prices have risen in all cases. Costa Rica is 4s. up at 122s., and East Indian has gained 10s. at 130s. Nairobi has advanced 6d. at 110s. 6d. The futures market has been firm. Quotations are:—May, 60s.; July, 61s.; September, 60s. 6d.; and December, 60s.

Dessicated Coconut.—Spot stocks are low, while prices have shown a firmer tendency. Lower prices are anticipated for further shipments.

Rice.—Brisk business has been done during the week. American Java rice has been in good demand. A small shipment of Italian rice of good quality has just arrived.

Green Fruit.—The orange season has practically finished. Shipments are small, while supplies of fine fruit are low. Messina lemons are still in poor request while the price of the better conditioned fruit has advanced. Abundant quantities of apples have arrived and an excellent demand has been maintained. Further shipments of Egyptian onions are proving to be of better quality.

Oilseeds.—Prices are harder. Indian linseed has gained 1s. 9d. at 21s. 6d., while La Plata is 2s. up at 21s. Rapeseed is higher with Toria 1s. up at 18s. Cottonseed has advanced with Indian eighteenpence up at 20s.; Sakellarides 1s. up at 12s.; while Egyptian black has risen 4½d. to 11s. 10½d.

Oils.—The tone has been quiet. Linseed oil has increased 4s. 6d. at 42s. 6d. Rape oil is unchanged with the crude variety at 43s. and refined at 40s. Cotton oil has been a firm feature, with refined at 48s.; Egyptian crude at 40s., deodorized at 53s. and technical at 42s. 6d.

Oilcakes.—Linseed cake has declined a further 10s. at 300s. ton, and cotton-meal cake has shed a like amount at 280s. ton. Coconut cake and cottonseed cake have both shed 1s. at 160s. and 180s. ton respectively.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended April 8:—

Sultanas.—The total estimated arrivals to date amount to 169,935 bags, while the sales are 164,735 bags, the estimated stock unsold being 5,200 bags.

Markets.—There has been slightly more demand for sultanas. Sales this week total about 5,000 boxes of which about half the quantity is against U.K. orders and the balance for shipment to the Continent. Prices in local currency are unchanged, but the weakness of foreign exchanges on rumours of a probable political settlement in these parts, considerably increases sterling quotations. Market values of all commodities just now are in a very chaotic state as we have again entered a period of sensational exchange fluctuations.

PROMISING ROUMANIAN CROP OUTLOOK.

(From Our Own Correspondent.)

Bucharest, April 7.

The latest official news on the crop outlook is very encouraging, as a result principally of the copious rains which have recently fallen throughout the country. It is now taken for granted that, thanks to the present favourable conditions for tilling the soil, the spring sowings of wheat, oats, barley, maize and other cereals, will compensate to a large extent for the limited area sown in the autumn.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 122s. cwt.; (Canadian), 112s. 6d. cwt.; (American), 97s. 6d. cwt.; butter (Danish), 185s. cwt.; (Australian), 163s. cwt.; (New Zealand), 172s. cwt.; cheese (Canadian), 99s. cwt.; (New Zealand), 80s. 6d. cwt.; lard, 68s. cwt.; eggs (Danish), 15s. 6d. per 120; Styrian, 11s. 3d. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar), 1s. 2d. lb.; cocoa (Ceylon good to fine), 90s. cwt.; coffee (Costa Rica), 131s. 6d. cwt.; (East Indian), 132s. 6d. cwt.; (Central American), 104s. cwt.; (Jamaica), 68s. 9d. cwt.; (Mocha longberry), 105s. cwt.; (Santos, superior), 67s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore Black), 3½d. lb.; (Muntok white), 7½d. lb.; pimento, 2½d. lb.; raisins (Valencias), 60s. 6d. cwt.; sultanas (Smyrna), 121s. cwt.; currants (Vostizza), 70s. cwt.; (Amalias), 57s. cwt.; sugar (Tate's cubes), 53s. 3d. cwt.; (Lyle's granulated), 48s. 7½d. cwt.; (Mauritius crystals), 45s. 1½d. cwt.; (West Indian crystallised), 43s. 3d. cwt.; (centrifugal), 15s. cwt.; tapioca (fair Singapore), 1½d. lb.; rice (Rangoon No. 2), 13s. 7½d. cwt.; (bran Rangoon), £6 2s. 6d. ton; cinnamon (firsts), 11½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; (medium to good), 1s. 6½d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2½d. lb.; (medium to good), 1s. 6½d. lb.; (fine to finest), 2s. 7½d. lb.; Java (common to good common), 10½d. lb.; wheat (English white), 54s. qr.; wheat (Australian), 59s. 6d. qr.; barley (malting), 50s. qr.; barley (feeding), 35s. 6d. qr.; oats (English) 32s. qr.; oats (La Plata), ex-ship, 22s. 7½d. qr.; maize (La Plata), 30s. 9d. qr.; flour, 44s.

Metals.—Aluminium, £122 10s. ton; antimony (English Regulus), £30 15s. ton; bismuth, 9s. lb.; copper (standard), £59 6s. 3d. ton; copper (electro), £65 10s. ton; gold bars, 93s. 5d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 97s. 6d. ton; galvanised sheets (24 G), £16 5s. ton; lead (soft foreign), £22 10s. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 27s. 9d. unit; nickel, £175 ton; platinum, 300s. oz.; plumbago, £16 ton; quicksilver, £10 18s. 3d. bottle; spelter (G.O.B.), £22 12s. 6d.; tin (standard), £151 12s. 6d. ton; wolfram, 10s. unit; zinc sheets, £35 ton; tin plates (20 by 14), 19s. 4½d. box; silver bars, 33.3-8d. oz.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 1d. lb.; tartaric, 1s. 3½d. lb.; ammonia (sulphate), £16 11s. 6d. ton; arsenic (white powdered), £35 5s. ton; benzole (standard), 2s. 5d. gallon; bleaching powder (35 per cent.), £12 15s. ton; borax crystals, 20s. 6d. cwt.; cream of tartar, 110s. 6d. cwt.; Potassium Bichromate, 7d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £38 ton; permanganate, 9½d. lb.; prussiate yellow, 1s. 1½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 130s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 5½d.; alkali (58 per cent.), £8 13s. 9d. ton; chlorate 3½d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £15 10s. ton; prussiate, 9½d. lb.; nitrate, £15 1s. 3d. ton; glycerine (crude 80 per cent.), £75 ton; glycerine (industrial 1200 per cent.), £100 ton; lemon oil, 3s. 6½d. lb.; quinine, 2s. 10d. oz.; red lead, £34 ton; white lead, £37 15s. ton; white ground lead, £48 7s. 6d. ton; sulphate of copper, £27 5s. ton; sulphate of iron, 75s. ton.

Hides and Skins.—Ox and Heifer (first) 90 lbs. and up, 7½d. lb.; 80 to 89 lbs., 5-7-8d. lb.; 70 to 79 lbs., 7½d. lb.; 60 to 69 lbs., 6-7-8d. lb.; 59 lbs. and under, 6d. lb.; (second) 90 lbs. and up 6-5-8d. lb.; 80 to 89 lbs. 6½d. lb.; 70 to 79 lbs., 6½d. lb.; 60 to 69 lbs., 5-7-8d. lb.; 59 lbs. and under, 4½d. lb.; Cows (first), 60 lbs. and up, 6-1-8d. lb.; 59 lbs. and under, 6d. lb.; (second), 60 lbs. and up, 4½d. lb.; 59 lbs. and under, 4½d. lb.; Bulls (first), 4½d. lb.; Kips (first), 6½d. lb.; (second), 3-3-8d. lb.; (third) 3d. lb.; Calcutta Market. Prices in rupees per 20 lb. Arsenic hides (cows): Agras, 9 to 13; Durbhangas, 7 to 9.8; Patnas, 5.8 to 6.12. Salted Cows, 4 to 7.8. Arsenic hides (buffalo), 3 to 8. Skins: Calf, 8 to 10 per 80 lb.; goat, 225 to 250 per 100 pieces.

Miscellaneous.—Cotton: (American), 10,40d. lb.; (Egyptian Sakel), 16.20d. lb.; Oilseeds: Linseed (La Plata), £19 2s. 6d. ton; palm kernels, £18 9s. 3d. ton; castor seed (Bombay), £16 17s. 6d. ton; Sesame seed (China), £24 10s. ton; soya beans, £12 12s. 6d. ton. Oils: Linseed, £37 7s. 6d. ton; olive (Levant) £70 ton; rape (crude), £43 10s. ton; soya, £37 7s. 6d. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 70s. ton; coconut (Ceylon), £39 5s. ton; cotton (crude), £40 10s. ton; ground nut, £44 5s. ton; Rubber: Plantation (No. 1 crepe), 8d. lb.; smoked sheet, 8d. lb.; fine hard Para, 1rd. lb.

MOTOR TRACTORS IN EGYPT.

The tractor trials held some time ago in Egypt were a great success as regards the number of entries, and the tests that were held have enabled much valuable data to be obtained as to the type of tractor most suitable for the country. The conclusions arrived at are given in the "Report on the Motor Tractor Trials," recently issued by the Ministry of Agriculture, from which we give the following extracts:—

The land of Kafr Bata, on which the tractor trials were held, represents the type of free soil of the Delta, fairly light and easy to work. The land, however, was wetter than one would normally have it in the first ploughing for cotton, and this made the work harder than usual. We are of opinion that, for this country, it is in the cultivation of the land that tractors will find their first use. Secondary to this, they may be counted on for such work as pumping, threshing, milling, transport, etc. But considering the light nature of most farm produce, we think that the cost per ton per kilometre will work out higher for tractor than for animal transport. Not only so, but several of the tractors shown were not well adapted for haulage work. With the exception of five, all machines were provided with turn-over ploughs. But in Egypt the irregular and deep cracking of the soil that takes place under atmospheric influence removes the need for the vertical and horizontal cut necessary to the turning over of the furrow. There are other reasons why this turning over may not only be useless but often harmful. In many cases, even with fertile land, the subsoil is so impregnated with salt that it should be left quite untouched. But even where the subsoil contains no salt and might be stirred and brought to the surface with no fear of consequences from this cause, subsoiling remains an operation that ought to be performed gradually, if one wishes to avoid shortage of crop from land which is less fertile, because less aerated, less active, etc.

The soil at the time of working is generally quite moist; and in being turned over forms into large blocks which, when exposed to the sun's rays, run the risk of drying rapidly and becoming hard as stones, especially if the soil is of a clayey nature. Ordinary pulverisers, which serve to crumble blocks so raised, have scarcely given practical results, and not infrequently, instead of being disintegrated, the lump gets harder with the passage of implements of the type of the native "zahafa."

Lastly, the rapid succession of crops in an irrigated country and on lands for the most part strong, does not permit of deep tillage with upheaval of the subsoil, for the density of the lower layers makes their weathering difficult, and the ordinary finishing implements help little.

For all these reasons turning over of the soil is not practised in Egypt, except in some localities where the land is light or medium, and where the berseem "alb," or temporary berseem, is commonly ploughed in by mould board ploughs of "Brabant" or balance type, which leave a flat surface, splitting to right and to left, and so preserving the level of the land—a matter of the first consequence in an irrigated country like Egypt. Even with these ploughs one must be careful to keep the furrow narrow, precisely to avoid the larger lumps of which we have spoken.

Native ploughing, all said, is on the principle of the work of a grubber or cultivator. In one, two, or three turns it pulverises the land to a depth of 15 to 19 centimetres without overturning it. Makers should model their implements to produce work of this type, better and deeper if possible. There were, indeed, two outfits furnished with cultivators, or, more properly, scarifiers (*i.e.* fixed teeth), but the distance between the teeth was in both cases too great and the depth of the billage insufficient.

The report states that in no case was the work entirely satisfactory. The attachment of the plough to the tractor was in most cases satisfactory. But a few remarks on the special needs of this country may not be out of place. Attachment may be by bar or chain. If by the latter, without two crossed chains, there is a constant movement to right and left which makes for irregular work. Attachment by bar would seem to us preferable, provided that there is an easy means whereby the driver from the seat can alter in either direction the exact point of attachment. The use too of shock absorbers, with means for complete detachment in the case of violent shocks, seems to be recommended especially in the heavy lands of the north of the Delta and when attachment is by bar.

Projections attached to the driving wheels cause a varying pressure in the land according to their shapes, blades and T-bars, less than spuds and sprockets. In all the tractors classified the adhesion was good and effected in most cases by bars, placed square or more or less obliquely, and often projecting. We noticed with regret that with two exceptions, the tractors ran one of their wheels in the furrow with a resulting compression of the bottom layer, simply obscured by the covering earth. This is a serious drawback, for the earth lies so compressed for a long period and the effect is so much the more in Egypt, where the soil is mostly clayey and more or less moist. It is patent, too, that the mere passage of the tractor on the land girds and compresses the soil to a certain depth, and as this compression is a function of the pressure exerted, per square centimetre of the wheel or tract in contact with the land, the tractors where this ratio is high are not suitable for this country, and makers should seek to obtain maximum power and adhesion for minimum weight.

Among the tractors disqualified, there were some of the track-type called Caterpillars. This type, though attractive at first sight, seems to us not to be recommended for this country, on account of the rapid wear and tear and the consequent high upkeep of the numerous joints of the track.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated April 18:—

Condition of Crops.—Week ending April 15—Bengal: situation improved by further showers; Bihar and Orissa: useful showers have fallen in Purnea, where rain was badly required for jute sowing. In Assam, local rain has fallen and prospects of tea and spring rice are fair. In the tea districts of Mysore and Coorg there was no rain. April 17—Madras: local thunder showers in Malabar and Tenasserim.

Markets.—Cotton.—April 12—Bombay Cotton market steady. Fine M.G. Oomras Rs. 397. 8 May, Rs. 414. 8 July. Piece-goods.—Bombay Imported Piece-goods market steady. Wholesale enquiries weak, but good retail enquiries in most styles. Prints continue discouraging: local goods moving well. Jute.—April 12—Calcutta Jute market very strong with good demands from shippers and mills. Firsts Rs. 63, at which there are buyers; Hessians firmer, with a few orders from consuming markets; Heavies quiet but steady. Heavy C's Rs. 39. 12 ready, Rs. 40. April 12—June. Shellac.—April 11—Market quiet but steady. Later, owing to pressure by sellers to effect sale for forward deliveries, market declined for May business, for which deliveries prices were Rs. 198 to Rs. 199. For spot there was small demand. Closing prices T.N. Rs. 200 sellers. Rice.—April 13—Special Straits Quality Rice Rs. 485.

BARSI LIGHT RAILWAY.

The interim report of the Barsi Light Railway states approximate results for the year to March 31 are: Gross earnings, Rs. 14,35,800; working expenses, Rs. 7,25,200. It is estimated that the net revenue (after providing for probable taxation in India) will amount to some £43,600 from which has to be met the interest on debenture stock and interest and sinking fund instalment on "Latur Extension" debentures, totalling £11,249. Interim dividend of 3 per cent. and bonus of 2 per cent.

OIL NOTES AND NEWS.

THE "STEUAU ROMANA" COMPANY.

An article in the Roumanian financial journal *Bursa* of April 16 gives the following particulars of the Steaua Romana Company:—

The Steaua Romana pursue their vast drilling programme. They are provided with all the necessary material and have also constructed dwelling houses for their workmen. The construction of the Electrica power station at Floresti will permit them to carry on their work without interruption by supplying sufficient electrical current. Outside the drilling provided in their programme, the Steaua Romana are also extending their activity to the wells of the I.R.D.P. Company and to 10 wells of the Credit Minier Company.

The Steaua Romana have resumed all their old commercial relationships with the neighbouring countries and with the West, where they possess sales organisations. These organisations suffered through the war, but have been completely restored. Their sales offices at Smyrna, Constantinople, Salonika and Bulgaria are in full progress, as well as their organisation in Budapest. The results are satisfactory. Through their relations with the Steaua Francaise and the Steaua Romana (British) Limited they have obtained important openings in France and in Great Britain. It should be noted that the activity of their great refinery at Campana is once more in full operation. By obtaining material purchased before the war in Germany, which has hitherto been retained in that country, the installations will be still more increased as well as the factory, which has also been started again. The mechanical workshop of the Company will be completed by modern tools and machines, which will allow the manufacture of materials necessary to exploitation.

PROPOSED PIPE LINE FOR ROUMANIA.

H.M. Consul at Cluj (Transylvania, Roumania), reports that the Municipality of Cluj is endeavouring to arrange for the construction of a pipe line for the supply of natural gas from the Kissarmas district (60 k.m. distant) for domestic, commercial and industrial purposes in Cluj (previously known as Klausenburg or Kolozsvár), and it is probable that tenders will shortly be called for. It is possible that the extension of the electric power station and the introduction of an electric tramway system may be combined with this project.

PERSIAN MARKET FOR LACES AND EMBROIDERIES.

The Commercial Secretary to H.M. Legation at Teheran (Major B. Temple) has made the following report on the market for laces and embroideries in Persia:—

Many sorts of laces are in great demand in Persia at present. They are mostly imported from France, a preference, so it is stated, solely to do with price. The laces are packed in lengths of about 12 yards. Such packets are sold retail at 4 to 5 Krans each, according to quality (the present rate of exchange is 54 Krans to £1 sterling). Three samples of lace accompanied the Commercial Secretary's report. He states that these samples show the most popular kinds and patterns and although variety is esteemed, he is of opinion that United Kingdom manufacturers should be cautious at first of departing from established tastes unless by previous acceptance through pattern books.

There is a good demand for embroideries, preferably linen. This demand is so assured that dealers have a saying among themselves that linen embroideries are as good as solid cash. Patterns should vary generously, as novelty of pattern assists sale. Three patterns of embroideries accompanied the report; all three are popular and easily saleable in Persia. Embroideries up to one yard width also have a use for dressmaking.

WIRELESS SERVICE BETWEEN OXFORD AND CAIRO

The Anglo-Egyptian wireless service via the Imperial Wireless stations near Oxford and Cairo commenced on April 24. Telegrams will be accepted at any post office for Egypt, Palestine and Syria for transmission by wireless, and a corresponding service will be available in the opposite direction. The rates of charge will be 3d. a word less than the corresponding cable rates for full-rate traffic and 1½d. a word less than the corresponding cable rates for deferred traffic.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 8 amounted to £6,595.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Bulgaria.

Oil.—The Directorate of Railways and Ports, Sofia, invites tenders for the supply of 900 tons of machine oil; 150 tons of wagon oil; 400 tons ordinary cylinder oil; 60 tons special cylinder oil; 10,000 cases of petrol. The total estimated value of this contract is 17,630,000 levas. The material must be supplied in barrels, and not otherwise. Delivery time: three months for 300 tons machine oil, 50 tons wagon oil, 150 tons ordinary cylinder oil and 5,000 cases petrol; five months for 400 tons machine oil, 100 tons wagon oil, 150 tons ordinary cylinder oil, 60 tons special cylinder oil and 5,000 cases of petrol, and seven months for 200 tons machine oil and 100 tons ordinary cylinder oil. The contractor must pay a tax of 300 leva for every analysis on acceptance of the different kinds of oil and petrol. Tenderers must deposit a sum equal to one per cent. of their estimate, which must be increased to five per cent. when the contract is placed. Payment terms are not specifically mentioned, but they are probably the same as for previous adjudications. The methods of payment in the previous adjudications were half against documents, the suppliers putting up a bank guarantee against this sum, which will be freed against arrival and final acceptance, the balance also being paid on final acceptance. (D.O.T.) May 10.

The Sudan.

Cane or Beet Loaf Sugar.—The Director, Commercial Intelligence Branch, Central Economic Board, Khartoum, invites tenders for the supply of four thousand metric tons net of cane or beet loaf (Ras) sugar to the Sudan Government c.i.f. Port Sudan. Tenderers must be accompanied by samples and must conform to the specifications and conditions of tender set forth in the special form on which tenders must be submitted. Copies of this form may be obtained on application to the Sudan Agency, War Office, Cairo. The Sudan Government is not bound to accept the lowest or any tender. Tenderers should be in double sealed envelopes clearly marked "tender for sugar." May 10.

Egypt.

Drugs.—The Director of Stores, Department of Public Health, Cairo, invites tenders for the supply of drugs required for the period of six months from October 1, 1922. June 15.

General Stores, etc.—The Secretary-General, Ports and Lights Administration, Arsenal, Alexandria, invites tenders for the supply of the following articles required for the second half of the financial year 1922-1923: Category A.—general stores such as belting, files, electric gear, chemicals, etc. Category B.—bunting, ropes, canvas, hoses, etc. Category C.—oils and paints, tar, and soap. Tenderers should only apply for conditions of tender and lists of the category of stores for which they intend to quote, from Stores Department, Arsenal. Samples of oils and paints which require testing should be submitted to the Stores Department not later than May 15, 1922, otherwise the offer for same will not be considered. Offers will remain valid for a period of twenty-five days from June 1, and delivery effected within two and a half months from date of order.

Gymnastic Shoes.—The Egyptian Ministry of War invites tenders for the supply of white gymnastic shoes. Further particulars can be obtained from, and pattern seen, at the office of the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 2.

Cummerbands.—The Egyptian Ministry of War invites tenders for the supply of cummerbands. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 5.

Duck Linen.—The Egyptian Ministry of War invites tenders for the supply of white duck linen. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 2.

Web Braces.—The Egyptian Ministry of War invites tenders for the supply of web braces. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 1.

G.S. and Hospital Blankets.—The Egyptian Ministry of War invites tenders for the supply of G.S. and hospital blankets. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 4.

Cotton Khaki Handkerchiefs.—The Egyptian War Department invites tenders for the supply of khaki cotton handkerchiefs. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 3.

RECENT ADJUDICATIONS.

Messrs. W. and T. Avery, Ltd., Birmingham, were the successful tenderers to the Ministry of Public Works, Cairo, for the supply of cast-iron weights.

Messrs. Arthur Smart and Sons, Ltd., Manchester, were the successful tenderers to the Egyptian State Railways, Telegraphs and Telephones (Stores Department) for the supply of 100 metric tons of coloured cotton waste.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Constantinople, April 8.

The market position is showing a slight improvement as a result of the prospect of approaching peace in Anatolia and of some transactions with the ports of South Russia. All the same the financial crisis continues making payments difficult.

The resumption of relations with some Russian ports has enabled the dispatch of some consignments. Prices are weak here, being influenced by the fall in sterling which has dropped 25 piastres in the space of a week.

Sugar.—Firmness prevails in producing centres. There is an active demand for all European ports. Here there has been some falling off in prices following the large arrivals of the last few days. Quotations: American, 9.30—9.40 dollars per 100 kilos, Dutch, £23-24 per ton; American, £21 per ton, Dutch, £22 10s. per ton; in customs, American, £26 per 100 kilos, Dutch, £27 per 100 kilos.

Coffee.—A steady tendency rules in Brazil and Europe. Here, the demand being weak, the last arrivals have not been absorbed, and prices are quoted below those of Rio. Quotations:—In transit, Ps. 52-55 per oke, in customs, Ps. 72-75 per oke.

Rice.—As a result of the strength prevailing in all markets rice has somewhat increased in price.

Constantinople, April 10.

Butter and Oils.—The stagnation of the market has brought about a new fall in the prices of raw materials.

Rice.—The arrivals of the last two weeks have been 2,000 sacks from Alexandria, and 1,100 sacks from New York.

Flour.—Despite the large arrivals our market has continued firm in consequence of the continued demand for South Russia, which absorbs very large quantities. Consignments to Russia are made in small lots of 2,000 to 5,000 sacks, the collection of which is entrusted to the Trieste Lloyd Company which makes a special feature of this service. Prices per 63½ kilos:—Marti and Co., £T8.80, Durun £T7, Arazona £T7.70; Kirma, £T9 per 72 kilos. The stock amounts to about 200,000 sacks.

Among the shipping arrivals during the week ended April 10 have been the following:—From Antwerp and Copenhagen:—S.s. Loppertum and s.s. Helène with 500 tons of ironmongery, 110 tons of coffee, 100 tons of window glass, and 35 tons of empty sacks.

From America:—S.s. Latania and s.s. Sahale with 5,250 tons of *mazout*, 3,550 tons of flour, 550 tons of sugar, 140 tons of mineral oil, and 120 tons of cotton tissues.

From Great Britain:—S.s. Maid of Hydra, s.s. Maid of Chios, s.s. Hugues, and s.s. Gerona with 650 bales of cotton and 4,500 tons of iron material.

From Marseilles:—S.s. Souirah with 470 tons of flour, 140 tons of bricks and tiles, and various other commodities.

From Italy:—S.s. Bolsena, s.s. Monténégro, s.s. Bukovina, s.s. Canaro, s.s. Costantinopolis, s.s. Trento, and s.s. Dalmatia with 150 tons of cotton tissues, 110 tons of pasteboard and paper, 30 tons of potatoes, and 40 tons of haricots.

COMMERCE OF CONSTANTINOPLE.

The following statistics regarding the commerce of the port of Constantinople during 1921 have been received from the offices of the Federation of British Industries there:—

The total imports passing through the Constantinople Customs House during 1921 amounted to £T.121,329,543. as against £T.179,396,266 for 1920, and are thus 32 per cent. below those of the preceding year. The value of exports and re-exports amounted to £T.30,379,813 during 1921, as against £T.47,625,870 for 1920.

Taking the countries of origin of imports the United Kingdom heads the list with £T.27,431,417, being over 22 per cent. of the total imports; the U.S.A. is second with £T.19,182,763, or 15.8 per cent.; Italy was third with £T.13,407,380, or 11 per cent.; and France fourth with £T.11,787,400, or 9.7 per cent.

As regards exports, the largest share of Turkey's exports went to Roumania to the value of £T.5,236,294, or 17.2 per cent. of the total, and second comes Batoum with £T.4,442,303, or 14.6 per cent.; a large portion of the latter would probably consist of re-exports. The United Kingdom received commodities from Turkey valued at £T.2,140,613, or 7 per cent. of the total. Of the imports during 1921 fuel amounted to 95,787,252 kgs., cotton and cotton goods 12,987,525 kgs., paper and paper goods 10,334,500 kgs., wool and woollen goods 2,662,902 kgs., glass and chinaware 14,052,401 kgs., metals 20,378,898 kgs., oils, greases, candles and soaps 38,751,109 kgs.

SHIPPING AT THE PIRAEUS.

(From Our Own Correspondent.)

Athens, April 16.

There were 511 arrivals of various steamers in the port of Piraeus during March (O.S.) of the following nationalities:—

Greek 416, British 34, Italian 32, French 7, German 6, Dutch 5, Swedish 1, Belgian 1, Roumanian 1, Yugoslavian 1, Norwegian 1, Bulgarian 1. The number of sailing vessels which entered the port during the same month was 478, of which 476 were Greek, 1 Italian, and 1 Yugoslavian.

The receipts of the Piraeus Customs during March last (O.S.) amounted to 14,182,106.95 drachmae. Compared with the receipts during the corresponding period last year (6,830,024.05 drachmae) there is an increase this year of 7,352,082.90 drachmae.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Massilia for Bombay (Liverpool, May 5).

Anchor Brocklebank Line.—S.s. Macharda for Calcutta (Birkenhead, April 29); s.s. Mandasor for Port Said, Colombo, Madras and Calcutta (leaves London, May 4); s.s. Magdapur for Calcutta (Birkenhead, May 13); s.s. Holywell for Port Said, Colombo, Madras and Calcutta (leaves London, May 16); s.s.

Masirah for Port Said, Colombo, Madras and Calcutta (leaves London, May 27); s.s. Mangalori for Calcutta (Birkenhead, May 27).

Bibby Line.—S.s. Yorkshire for Rangoon (London, May 4); s.s. Lancashire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 10); s.s. City of Boston for Rangoon (Middlesbrough, May 10).

Clan Line.—S.s. Clan MacNaughton for Bombay and Persian Gulf (Birkenhead, April 27); s.s. Clan Morrison for Colombo, Madras and Calcutta (Birkenhead, May 4); s.s. Clan Ogilvy for Bombay and Persian Gulf, (Birkenhead, May 8).

Cunard Line.—S.s. Phrygia for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, etc. (Liverpool, April 27, and Swansea, May 2).

Ellerman Line.—S.s. Gerano for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 6); s.s. Flaminian for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Ancona, Venice and Trieste (Liverpool, May 18).

Ellerman's "City" Line.—S.s. City of Shanghai for Calcutta (Birkenhead, April 28); s.s. City of Agra for Calcutta (Birkenhead, May 9); s.s. City of Chester for Calcutta (Birkenhead, May 22).

Ellerman's "Hall" Line.—S.s. Merton Hall for Bombay, Karachi and the Punjab (Liverpool, May 1); s.s. Trafford Hall for Bombay, Karachi and the Punjab (Liverpool, May 12).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, May 4); s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, May 18); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, June 1).

Harrison Line.—S.s. Dictator for Calcutta (Liverpool, April 29); s.s. Defender for Calcutta (Liverpool, May 13).

Henderson Line.—S.s. Martaban for Port Said and Rangoon (Birkenhead, May 3); s.s. Henzada for Port Said and Rangoon (Birkenhead, May 17).

Holt Line.—S.s. Cyclops for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, April 27); s.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 4); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 4); s.s. Phemius for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 4); s.s. Eumacus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. Glaucus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18).

Johnston Line.—S.s. Aviemore for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, April 29); s.s. Wingate for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, May 13); s.s. Incemore for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 3).

Moss Line.—S.s. Hatasu for Gibraltar, Algiers, Malta and Alexandria (accepting cargo for Moroccan, Algerian, Cyprus and Syrian coast ports), (Liverpool, April 27).

Papayanni Line.—S.s. Bavarian for Malta and Alexandria (Liverpool, May 5); s.s. Gerano for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 20).

P. and O. Line.—S.s. China for Bombay (London, April 28); s.s. Nagoya for Colombo, Madras and Calcutta (London, May 5); s.s. Caledonia for Bombay (London, May 5); s.s. Soudan for Bombay (London, May 6); s.s. Noie for Colombo, Madras and Calcutta (London, May 19).

P. and O. British India Line.—S.s. Madura for Bombay and Karachi (London, April 28); s.s. Nuddea for Colombo, Madras and Calcutta (London, April 29); s.s. Chindwara for Bombay and Karachi (London, May 12); s.s. Nardana for Colombo, Madras and Calcutta (London, May 13); s.s. Matiana for Colombo, Madras and Calcutta (London, May 26); s.s. Mandala for Bombay and Karachi (London, June 2).

Prince Line.—S.s. Stuart Prince for Tunis, Malta and Alexandria (Manchester, May 5); s.s. Soldier Prince for Tunis, Malta, Alexandria and Syria (Manchester, May 15); s.s. Cyprian Prince for Malta, Alexandria and Syria (London, May 15).

COMPANY NOTES & REPORTS.

CUNARD STEAM SHIP.

The accounts of the Cunard Steam Ship Company, Limited, for the year ended December 31, show that after providing for depreciation of ships and other properties, income-tax, corporation profits tax, Debenture interest, and proportion of discount on Debenture stock, and including £169,075 brought forward, there remains at credit of profit and loss account £669,106. Dividends amounting to £135,000 have been paid on the Preference stocks and a dividend of 7½ per cent. on the Ordinary shares, including the Government share, from which tax will be deducted is recommended, leaving a balance of £199,890 to be carried forward. The £1,000,000 5½ per cent. Mortgage Debenture stock, which was due for repayment on December 31, 1921, has been extinguished. There has been paid during the year £130,000 to the sinking fund for the redemption of stock established under the Government agreement. The directors state that the services of the company, both for freight and passenger business, although considerably interfered with by labour disputes from time to time, have been maintained with a greater degree of regularity than was possible during the preceding year; while not yet normal, owing to the protracted delay in the delivery of new tonnage, they will be materially strengthened in the course of the next month or two.

SUGEI CHOH RUBBER

The report of the Sungei Choh Rubber Company, Limited, for the year ended December 31, states that the estate working account shows that the crop for 1921, which was on a heavily restricted basis, amounted to 576,119 lbs. of dry rubber, and that the gross profit therefrom was £4,974 5s. 7d. The profit and loss account, after providing for the usual charges, including income tax, etc., discloses a net profit for the year of £1,795 11s. 7d. The balance sheet shows that, with the amount of £13,328 17s. 9d. brought in from 1920 (after deduction of Corporation tax for that year), and the profit and loss balance of £1,795 11s. 7d., the credit balance is £14,483 12s. 4d., which amount the directors propose to carry forward to 1922 accounts. The directors have considered most carefully the question of making a small dividend distribution, but they have been forced to the conclusion that, having regard to the continued depression in the market for rubber, and the poor outlook in prospect for that article for possibly a considerable length of time to come, it would not be in the interests of the company to pay away money which may at any time be required for the maintenance of the capital value of the property. The cost of producing the crop was 5.84d. per lb., f.o.b. Port Swettenham, and the net price realized was 7.91d. The low cost of production was mainly due to cheaper rice and the most stringent economy in the working of the estate. This rigid economy has so far, the directors are glad to state, not been attended by any serious going back in the condition of the property, but it has only been possible owing to the excellent state of cultivation and upkeep of the estate in previous years. The visiting agent in his last report says:—"The general condition of the estate is very satisfactory. It has been well and economically worked. Thanks to the previous good state of sanitation it was found unnecessary to embark on a large scheme of pest work during 1921. The estate appears very free from either pests or diseases." The expenditure on capital account during the year amounted to £442 11s. 8d. in respect of non bearing areas. The estimated crop for 1922 is 700,000 lbs. of dry rubber, which is on the basis of restriction by rather more than 25 per cent. on a normal yield.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 15 amounted to £0,334.

COMMERCIAL BREVITIES.

An express direct train service has been arranged from Prague to Zagreb-Agram via Hungary.

It is announced that one of the largest Czecho-Slovak tanning concerns is about to lay down plant at Kishineff, Bessarabia.

Leather belting is in great demand in Bucharest at 200 lei per kg., even for the home produced article which is below English quality.

A fair quantity of German silk shirts is now sold at Colombo at prices very substantially below those of similar materials from other sources.

At the recent Ceylon Industries Exhibition the Ceylon Agricultural Society exhibited some fine Manila cigars made of Havana tobacco grown at Peradeniya.

Orders for electrical plant amounting in value to £500,000 are being placed with British engineers by the Calcutta Electricity Corporation, under a Trade Facilities Act guarantee.

The negotiations over the Anglo-Austrian Bank have resulted in the formation of the 26 branches in Czecho-Slovakia into an independent Anglo-Czech Bank, with a working capital of 150 million crowns.

The contract made by the former Roumanian Government with the "Syndex" concern, established last year for the purpose of the purchase and export of wheat and other cereals, has been cancelled by mutual agreement.

In addition to the ordinary import and excise duties, a permit fee of 3 annas per gallon has been imposed in the Bombay Presidency on beer, Indian made as well as imported or manufactured locally.

An announcement is made by the Ports and Lighthouses Administration, Cairo in the *Journal Officiel* notifying mariners to the effect that the Red Sea Sanganeb Lighthouse will operate in future, when necessary, a mechanical foghorn, giving a 10-second blast every five minutes.

NOTES OF THE WEEK.

Greece and Asia Minor.

Under the steady influence of King Constantine and his present Prime Minister, M. Gounaris, Greece shows signs of trying to reconcile herself to the inevitable in regard to the evacuation of Asia Minor. The King, it will be remembered, was opposed to the despatch of Greek troops to Smyrna at the time when M. Venizelos subordinated his undoubted statesmanship to the petty squabbles of the Allies, and deliberately involved his country in an impossible venture, because it was desired at the time in London and Paris to put a spoke in the Italian wheel. Naturally all sections of the Hellenic world are anxious to ensure that those of their fellow countrymen who are left behind in Asia Minor shall have real and adequate protection against Turkish reprisals and against oppression in the future; and it will surprise no one if the more hot-headed elements in the Ionian Army of Occupation have not discussed the establishment of a Greek Angora at Smyrna. They will have no support from any real patriot in Greece, and, as is now apparent, cannot count on the approval of General Papoulas, their local Commander-in-Chief. The Allies, however, must not ignore the intense feeling that exists among all Greeks on the subject of safeguards for minorities in Asia Minor.

Safeguards for Minorities.

Unfortunately this problem of providing adequate safeguards for minorities in Turkey does not, from its very nature, lend itself to a satisfactory solution. As far as we are aware, the only solution that commends itself to Greek public opinion is the retention of armed forces on Turkish soil, and that scheme is out of the question. Between it and the only suggestion that the Allies can make, which amounts to "Trust the Turk—under threats," there is no middle course. If that is so, it is not difficult to see who of the Greeks and the Allies must in the long run give way. No one can fail to sympathise with Greek qualms. It has not been the fashion in the past for subject races in South-Eastern Europe or Asia Minor to be handled leniently, and the Turks have had more opportunities than others to indulge their instincts in this respect. But as the Christian nations have acted to a minor extent in the same reprehensible way from the promptings of self-preservation, there is no reason why the Turks should not be credited with a similar motive. If the motive be removed, there is at least a chance that a different policy will be pursued.

"Trust Turkey."

For more than a generation now Turkey has been fighting with her back to the wall, and acting under a perverted view of things has imagined that she has assisted her cause by ridding herself of as many of her alien subjects as she conveniently could. During the late war Germany encouraged her to continue the same practice; but there is ground for supposing that the Angora authorities contemplate a Turkey that will conform more or less to Western standards in time of peace. So long as the Turks have the excuse of being at war massacres and oppression may be expected. The experience, therefore, of the last few years need be no criterion of what will happen, if the Greek troops are withdrawn everywhere from Turkish territory and the Turks are confirmed in the land which they can reasonably consider their own. This at least seems to be the best consolation that can be offered to the Greeks, although we should like to see the Allies agreed that, if, when entirely freed from any shadow of provocation, the Turks do not treat minorities properly, Europe or the League of Nations shall be called upon to deal finally with this particular menace to the world's peace. It must, however, be remembered that Turkey cannot be expected to adopt a higher standard than that which prevails in the neighbouring Balkans. If oppression or suppression is persisted in there, no European country can presume to lecture the Turks.

The Question of Frontiers.

In a recent speech that Mr. Lloyd George made to British and American correspondents at Genoa, there was much evidence of that lack of conviction that has for the past few years characterised the foreign policy of this country. The Premier seems to alternate extraordinarily between obstacle-jumping and obstacle-making. On his ability in jumping this is no place to expatiate, but in raising difficulties in the Near East at any rate he has been uncommonly constructive. At the moment he is enormously impressed by the force of Russia, and it was this impression, we presume, that prompted the foreseeing of war in the following words:—"Practically the whole of the frontiers of Eastern Europe are unsettled. There is hardly a line there which is accepted by Europe as a whole. From the Baltic to the Black Sea there is hardly a line which is not contested, and every one of those lines involves the possibility of a terrible conflict in Europe." These words, we imagine, might, *mutatis mutandis*, have been uttered at almost any period in Modern European History. (One has only to think, for example, of the

submergence of Poland, throughout the Nineteenth Century.) But it is scarcely pleasant for the Roumanians to have thus implied the impermanence of their Bessarabian frontier. Political justice is admittedly a rough and ready thing, but it is a poor statesmanship which one year constructs a peace and the next fearfully points out its imperfections. Vision is a grand and essential gift, but, unless it be based on knowledge, it is wasted.

The Future of Palestine.

In the remarks recently made by Lord Milner to the Paris correspondent of *The Times* on the subject of Palestine there was a welcome strain of sober level-headedness that has not always characterized public references to that country. Lord Milner has returned from his visit an optimist with regard to Palestine, and he rightly praises the policy of the Administration. Perhaps the weakness in the situation is the Government's own lack of confidence in its own policy. Instead of realising with Lord Milner that it is acting on sound lines and that in due course it can "win through," it is inclined as far as one can make out, to despair of seeing daylight, and to take refuge in such consolation as it can derive from living through any particular day without a riot or other form of trouble. In the event of Sir Herbert Samuel recovering from his recent illness sufficiently to resume his post in Jerusalem, we shall hope to find that the optimism of Lord Milner and other observers is reflected in the highest circles, and will enable Government House to wear less of the aspect of a military camp.

The Struggle of Georgia.

The fight for independence in what were once the outlying provinces of Russia still continues, and notably in Georgia. There is no doubt that in this country, which cherishes proud memories and fine traditions, the yoke of Bolshevism is extremely severe, intolerable, in fact, to the cultured and highly civilized members of this race. Yet, frankly, we see no hope for its freedom without the assistance of foreign troops, successful as this or that local rising may be; and any external steps to this end are most improbable. It was rather pathetic to read the letter addressed by Ambrose, the Georgian Patriarch, to the Genoa Conference; pathetic, because that Conference had already decided to deal only with European States. We fear, indeed, that the future of Georgia lies in partial or complete incorporation with Russia or Turkey. Russia, in particular, who is thoroughly aware of the wealth of the Caucasus, is keeping a very sharp eye on this region, and intends to preserve it to herself. Moreover, she classes the Menshevik government of M. Jordania with the "bourgeois," labels all its schemes as "capitalistic," fears that any diplomatic assistance given to it may be followed by military invasion, and is therefore, as M. Trotsky recently said, "redoubling her vigilance." We repeat, we see little hope of the re-establishment of the Social Democrats in Georgia.

Egypt and the Capitulations.

The Government of the United States has recognized the independence of Egypt, but only—if Cairo reports are correct—subject to the retention of the Capitulations. The condition thus attached to the recognition may seem to the more ardent Egyptians to rob the act of much of the importance that would otherwise attach to it, but to others it can hardly come as a surprise, and still less as a disappointment. The Egyptian view regarding the Capitulations has never since the Armistice

been any too clear. The extremists seemed at one time bent upon treating the point merely as one to be turned to use in embarrassing—or endeavouring to embarrass—the British Government. If the Egyptians are wise, they will now allow the question to rest for a while, and devote all their energies to proving that the country is so well able to look after both itself and the stranger within its gate that the Capitulations may safely be abolished. When that day comes there will surely be no doubt about the reply that will be given to Egypt's request for the change.

Persia in Difficulties.

Affairs in Persia are drifting if not certainly from bad to worse—which would, perhaps, be difficult—at least from bad to no better. The Shah's Government is still as hard pressed for funds as ever it was, and the only question is: How long can this state of things last? Many of the Departments are reported to have had no pay for six or seven months; and though their Heads succeed in persuading them to "carry on" from week to week, that process cannot, obviously, be continued indefinitely. The Teheran correspondent of the *Pioneer* reported last week that the whole police force of the capital had struck, and that the regular troops who had been called on to replace the police were also disaffected, the reason in both cases being that the men's pay was some months in arrears. Of course, these things are no more a new experience in Persia than they are in several other Oriental countries; but whereas it was usually possible in the old autocratic days to surmount the difficulties, by methods and devices well known, it is to-day, in democratic Persia a far more difficult feat.

Bolshevism in Teheran.

The Prime Minister, the Mushir ed-Dowleh, appears to have found the difficulties confronting him too great to be overcome without help; for he is reported to have appointed a commission, comprising representatives of all parties, to assist the Cabinet in hammering out a new policy for Persia. He is understood to be in favour of the development of the oilfields in the North, and of the engagement of foreign advisers, measures to which the Mejliss is, or was, opposed. Probably he hopes that recent experiences will have convinced the objectors that his views are sound, and it is even possible that the Commission may justify his hope; but the Persians, and especially their parliamentary representatives, have lately shown such a lack of ability to grasp political facts that for our part we cannot feel sanguine on this point. The only satisfactory news from Teheran is that the Persians are at last waking up to the true character of Bolshevism and to the dangers with which it threatens their country and their religion. For this belated enlightenment they have to thank the Bolshevik representative in Teheran, M. Rothstein, and a number of his agents who have been lately very actively working to bring about changes in the Cabinet, and especially to secure the removal of the Sardar Sipah—Colonel Riza Khan. These agents are reported to have been stirring up dissension between the various creeds in the country, and meddling quite openly in internal politics. Fortunately the crudeness of their methods has opened the eyes of the Persians to some extent, and Bolshevism is unpopular to-day in Teheran.

A French Yellow Book.

The French Government recently published an important diplomatic document containing the intimate history of France's efforts for peace in the Balkans

during the years 1912—1914. This Yellow Book shows conclusively that from 1912 down to the armistice of Chatalja the French Government preserved its aim then as it is pursuing it to-day of maintaining the *status quo*, that is, of keeping the Ottoman Empire intact, and at the same time of securing better conditions for minority races. That these conditions were not secured was due to circumstances outside France's control. This Yellow Book is instructive for us to-day, because it shows well the realist policy of the French Government, and its difference from our own; for whereas it might not be untrue to say of France that she puts the integrity of the Ottoman Empire above anything else in the Near East, it would appear that the British Government is less realist but more moral in putting above other things reforms and security for minorities. It is the nicest of questions, a workable balance between expediency and justice; we fear that in the Near East at any rate the former will for long just prevail. In other words, the French policy of seeing things nakedly and brutally as they are succeeds better than the British policy of seeing things adorned and clouded as they might be.

The Situation in India.

The news from India continues to bear out the view of the situation which we have put forward in these columns. The ordinary law of the land is being quietly but effectively enforced; most of the really dangerous revolutionaries are in prison; those of the extremist party who have not asked for "martyrdom" are casting about for a programme which shall be more serviceable than that which has collapsed; and the North is still interested chiefly in the harvest. On this last point the most recent official information is thoroughly satisfactory, and it appears to be certain that the country has now food enough and to spare, while the long-looked-for fall in the price of wheat has made definite progress during the last few weeks. Critics who occupy the urban standpoint naturally assume that a large fall in food-values will of itself go far to restore contentment among the people, but on the other hand it must be remembered that there are many more sellers than buyers, and we cannot suppose that the Sikhs, for instance, would be pacified by a depreciation of the wheat which is their most important source of income. On the whole, then, there is reason for satisfaction in the fact that the fall is likely to be less spectacular than India appears to expect.

The Future of Food Prices.

In this matter Indian expectations are based on experience gained before the war. In those days a good harvest following on a bad one meant glutted markets, because all food-growers were pressed for money at the same time. This pressure for money is now much less heavy than it used to be, because prices are much higher than they were, while rents have risen comparatively little; consequently immediate demands can be met by selling less produce, and though the markets will be adequately supplied, they will not be so completely glutted as of old. The peasants will take the surplus grain into store, and either eat it themselves or sell it off gradually as new needs arise; and the final result will be a somewhat higher level of prices than Indian cities like, a most desirable replenishment of depleted stocks in the villages, and in our opinion a healthier economic situation than has existed since the War. At present it seems doubtful whether much Indian

wheat will be seen in Europe this year, but the country has plenty of other produce for sale, and we fear that the restoration of the balance of trade is still a question of finding customers, rather than offering additional goods for sale.

An Indian Leader?

The full reports of Mr. Sastri's speech at Delhi show that the cabled extracts did something less than justice to a pronouncement of real interest, and they are certainly calculated to remove the mistaken impression that the speaker's balance had been more or less upset by his success in London and Washington. Taken as a whole, the speech is the clearest and strongest lead which an Indian has yet given to his fellow-countrymen to make good and justify their position in the British Empire, and its perusal inevitably suggests regret that the legislature in these early days has heard so little from a man who can place such gifts at its disposal. We wish Mr. Sastri all success in his tour of Canada and Australasia, as well as in his courageous undertaking to counter anti-Imperialist lies by lecturing in the United States; but when these labours have been accomplished, we hope that circumstances will allow of his settling down to political work in India itself. The leadership of the nation is still vacant: there is no one now before the public who could seriously dispute Mr. Sastri's claim if he decides to make it.

THE WEEK AT HOME.

London, Monday Evening.

The Genoese Imbroglia.

The proceedings at Genoa provide a curious commentary on the amount of Christian feeling in international politics. So far from loving one's neighbour as oneself, everybody appears to hate his neighbour like the devil. The results are unfortunate. Statesmen show frayed tempers, experts contradict each other, the press snarls, and politicians and leader-writers talk gloomily of another war, in which what remains of European civilisation will finally disappear. The correct note is one of inspissated gloom; we are all pessimists nowadays, and every self-respecting journalist, like the fat boy in *Pickwick*, does his best to make our flesh creep.

At the risk of striking a discordant note while the newspaper orchestra tunes up for the funeral march, I must point out that the public do not take this kind of thing quite so seriously as they should. Mr. Garvin cries death, Mr. Crawford Price forebodes disaster, and Mr. Wickham Steed foretells damnation; the man in the street says he has heard this kind of thing before, and turns to the Stock Exchange quotations or the first articles on the cricket season—which begins to-day. All this is very sad for the prophets, proverbially without honour in their own country. But it has a basis of stubborn fact which even prophets overlook. Europe may decide to cut its own throat, but we propose to be spectators and not participants in the drama. If people cannot or will not agree, then they must quarrel and, if necessary, kill each other, but we are emphatically not batting in that match. We have had enough of Continental adventures for the present.

There is a school which tells us that isolation is impossible; to which the correct answer is that nothing is impossible if you put your foot down and refuse to budge. If Europe will agree we are ready to help; if not, not. At the moment the chance of any real agreement seems far more remote than a month ago.

Retrogression in Ireland.

If Genoa is bad, Dublin is worse. The latest conference between the Provisional Government and the Republicans has broken down, and there seems no prospect of any agreement in that quarter. Murder and

outrage also continue; not a day passes but five or six deaths by violence are chronicled. Last week there was a one-day general strike by Irish Labour as a protest against the continuance of these factions; the strike itself was successful, but it has had no effect whatever as a warning. Freedom of speech, like security of life, seems to have vanished; the Republicans apparently have a particular objection to printed criticism, which gives some support to the contention of the other side that the Republican element is really a minority which endeavours to rule by terror. Every week sees Ireland a step nearer anarchy than before, and no assignable period can be put to the process.

The Reaction in England.

These disturbances on either side are having a definite reaction on England. Quarrels in Europe and anarchy in Ireland are influencing the elector here, not merely to keep indoors out of the storm, but to have a Government that stands definitely for order and authority. When people are in this mind, it is a good wind for the Conservatives, and I fancy the trend of events is not overlooked by the strategists at Westminster.

Labour Sheds its Skin.

A distinct change is to be noted in the Labour Party's attitude towards internal policy. Hitherto it has stood generally for nationalisation of industry, but most people saw the weakness of that method during the War, and the failure of the enforced experiment put Labour in a difficulty. It is all very well to talk about the promised land, but some of us had been there, and found that, so far from its flowing with milk and honey, its leading line was officials and red tape. The Easter Labour Conferences have discovered this for themselves, and there are signs that they are altering their ideas in consequence. The gospel according to Sidney Webb is to be superseded or supplemented, and a gospel according to Cole, the advocate of Guild Socialism, is coming into fashion.

It is impossible to say how far the rank and file will adopt the change of faith; those who know Labour politics from within assure us that there is a fairly strong anti-Cole element, but this may be because Guild Socialism is relatively novel and is not fully understood. At least it does away with the element of bureaucratic control, which is the weakness of nationalisation; Guild Socialism implies that those who are actually engaged in an industry run it for themselves.

It seems to have no inherent hostility to capital as such, although of course it contemplates a very different position for capital in industry; but it postulates an industrial parliament, to which members shall be elected by trade, not by geographical areas; as at present. (Something of the kind already exists in a manner; thus Mr. Thomas is not so much the member for Derby as for railwaymen, and it is a poor profession or trade that has not its representative, although he may sit nominally for Clackmannan or the outer Hebrides.)

The real difficulty with Guild Socialism and its altered doctrines is that it seems to contemplate that old heresy, a State within a State; an industrial State within a political State. This raises very awkward questions of sovereignty. There is a rather large literature of this problem being published in America; where the federal form of the Republic and the size of the country make

them less dogmatic as to the unitary State than we are. I doubt if the Labour intellectuals have really thought out this problem; although Lord Haldane, who is now a kind of Nestor to the Labour chiefs and who writes prefaces for obscure Labour authors in the intervals of contemplating Relativity, has drawn their attention to it.

County Cricket.

It was thoughtless of Sir Robert Horne to arrange to introduce his Budget to-day, when the cricket season officially begins. That is the worst of Scotchmen whose minds have been corrupted by golf; but at the moment the laugh seems to be on their side for the weather feels more like snow than cricket. It is to be a domestic season, without colonial visitors; but I hear rumours that the trouble between the County and the League clubs may come to a head. In the North of England at least the town league club is buying up the county professionals and keeping them strictly to their contracts; the question is not so acute in the South. If this led to a strengthening of the amateur element in the county teams, no harm would be done; but in these days the amateur of means who can give up the summer to county cricket is a rare bird, and the three-day match, although interesting, takes up a lot of time. The regular eleven cannot get along without its professionals.

Professionalism in Sport.

One does not want cricket to become as professional as football, where they buy and sell men openly like slaves; far less does one want to see it ruined like boxing, which is now simply a speculation in seats and cinema rights, and under grave suspicion that the results are arranged by the management. The amateur remains the backbone of cricket, but the amateur as a rule can only play one day a week, and so makes for the local club.

In the Courts.

Mr. Bottomley sprang a surprise on the public on Saturday by calling no witnesses for the defence in the charge of using money subscribed for Victory Bond Clubs for his own purposes; he was committed for trial after making a long and emotional speech about his services to the country during the war. The Armstrong murder appeal has been postponed for a few days, and the arguments in the case raise an important point of law, as to the right of the judge to admit evidence on another charge which was unproven and which is still hanging over the prisoner. The lawyers are awaiting the case with some interest.

The Wakeford Case.

I notice that the refusal of the Home Secretary to reopen the unsavoury Wakeford case has led to a perfect deluge of Correspondence in the *Guardian*, the leading Church newspaper. I generally look upon the *Guardian* as second only to the *Spectator* as the foundation for an after-lunch snooze, but the virulence of its clerical correspondents on this particular issue, and the vigour with which they are denouncing the Bishop of Lincoln, and his unhappy Dean and Chapter, have been a revelation to me; it is the nearest thing to hearing a parson swear that I have struck.

Apparently the diocese of Lincoln is a rather unhappy place just now, and the life of the Dean cannot be quite a bed of roses. I know nothing about the morals of his clergy—as I am only an innocent layman, it is perhaps just as well—but this mud-slinging is rather rough luck on him, as he has work enough on hand in raising a fund for the restoration of his cathedral. It is in a bad state of repair, and second only to Ely for beauty.

The Week's Books.

"Bantu Beliefs and Magic" (Wetherby) by C. W. Hobley is a real contribution to anthropology and the study of primitive religions. It deals with the very interesting native cults of East Africa, and covers some new ground in this particular science. The book has an introduction by Sir James Frazer.

Mention may be made of "Mr. Prohack" (Methuen). Mr. Arnold Bennett's new novel, which is being well reviewed. It deals with a Civil Servant who comes into money.

EGYPT.

Official Holidays.

Cairo, April 22.

The abolition of the Protectorate and the recognition of the independence of Egypt have resulted in an alteration in the list of official holidays. Henceforward March 15 will be celebrated as a holiday in honour of the declaration of independence, and in exchange the holidays fixed for May 6 and June 3 in celebration of the accession day and birthday of King George V have been suppressed.

The Order of Succession.

As a natural consequence of his having assumed the higher title, King Fuad this week issued a rescript fixing the order of succession. According to this document the Throne remains hereditary in the dynasty of Mohammed Aly. On the death of the King it passes to his direct and legitimate male descendant by order of primogeniture. If the King should leave no such direct descendants the succession will go to his brothers, according to priority of age and to their direct male legitimate descendants, and failing any brothers or their heirs the Throne will pass to the dead King's uncles and their direct heirs, and so on.

The rescript establishes that the present heir is King Fuad's only son Prince Faruk and that whosoever succeed to the Throne begins a new house and the succession follows in his direct line as laid down above. It excludes the ex-Khedive Abbas Hilmy, but without in any way prejudicing whatever rights his direct male and legitimate descendants may eventually acquire to the succession. All female members of the house as well as their descendants are also excluded from the succession, and no Prince may ascend the Throne unless he is mentally fit, a Moslem and the son of Moslems.

According to the rescript, the King with the assent of Parliament can deprive of his right to the Throne any Prince who marries without his consent, or who is declared to be unfit to belong to the Royal family, and by similar procedure this deprivation of rights can be annulled. The coming of age of the King is fixed at eighteen years, and if he should be a minor on ascending the Throne a Regency Council will be appointed. This Regency Council is to be composed of three persons nominated by the reigning sovereign in a document which is only to be opened and made public on his death in the presence of Parliament, which will be called upon to confirm the King's nominations. In the event of the King dying without having signed any such document Parliament will nominate the Regency Council, the members of which must in any case be selected from amongst Princes of the Royal Family, Prime Ministers, Ministers, and Presidents, present and past, of whatever representative chambers exist. In the event of the King becoming mentally unfit to reign the Council of Ministers will convoke Parliament and will recognise the claims of the next rightful heir.

It is to be noted that this act of succession replaces the Firman which Ismail Pasha obtained from the Sultan of Turkey, against substantial consideration, in 1873 and under which the Throne of Egypt was vested in his family by order of primogeniture. Also it is to be noted that this rescript contains the first surrender of Royal prerogatives to the Parliament of the people.

The Question of Mining Concessions.

The Minister of Finance, Ismail Sidky Pasha, has just paid a visit to the Red Sea, where accompanied by Mr. E. M. Dowson, the Financial Adviser, he has been making a thorough study of the conditions and prospects of the mining industry. It is understood that this visit has enabled him to come to certain definite conclusions with regard to the policy which the Government should follow in the matter of mining, including petroleum concessions, and that a statement on the subject will shortly be made public, very probably in the form of a paper which His Excellency intends to read before the Royal Geographical Society of Egypt.

A Revenue "Windfall."

During the war the British Military authorities made enormous use of the Egyptian State Railways, both as regards their workshops, which rendered invaluable services in the matter of repairs, etc., and as regards the carrying of troops. In the latter connection payments were made by the War Office for the transport provided, but they were effected at the rates current when the war broke out and the Military began to make use of the Egyptian Railways service. As, however, the Egyptian Government was compelled to raise all its rates to the public owing to increased cost of working it continued to accept payment at the old rate in order to facilitate matters, and opened a special suspense account for the difference. Recently it put in a claim for L.E.159,000, but the War Office declined to agree to this figure and the matter had to be referred to a special arbitration Board under the presidency of Judge A.C. MacBarnet, C.B.E., Counsellor to the Mixed Court of Appeal. The Board has awarded L.E.900,000 to the Egyptian Government; which has since been paid by the British Government, and it is understood that a substantial portion of this unexpected addition to the revenue will be devoted to capital and repair expenditure, which is so badly needed on the State Railways and had hitherto been postponed owing to insufficiency of funds.

Attacks on Englishmen resumed.

The series of murderous attacks on Englishmen has recommenced. On Easter Sunday evening two men of the Air Force, who had brought a waggon-load of material down from Palestine were escorting it to Abbassia when they were fired at near the Railway station and both were seriously wounded. The assassin as usual got away. It is significant that these attacks on Englishmen ceased during the period when the recent bombing case was being dealt with and that they have recommenced so soon after the sentences were promulgated. Bearing in mind what took place in the case of previous similar trials it certainly looks as if the passing of the recent extremely light sentences has encouraged the band to resume their murderous attacks, and the indignation which this surprising clemency aroused at the time has not been in any way abated by the latest cowardly outrage.

'IRAQ (MESOPOTAMIA).

Baghdad, April 13.

The Provisional Frontier.

This week has been much quieter than last, though the tone of extreme anxiety has been heard throughout. Ibn Saoud has accepted the provisional frontier laid down by the High Commissioner, and has withdrawn the raiders well away from 'Iraq. Indeed, it is said that none of them are now within 80 miles of the frontier. The Government of 'Iraq has presumably accepted this frontier too, though no official announcement of its doing so has yet been made. The immediate fear of external aggression has, therefore, been removed, but the internal situation continues to give cause for anxiety.

The Kerbella Conference.

The Conference at Kerbella, to which reference was made in last week's letter, was held this week, and though it was announced that the deliberations would be con-

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS Director.

fined to the Akhwan and what must be done to oppose them, they were very few in number who dared to hope that this would actually be the case. To-day's vernacular papers, however, publish telegrams from their correspondents at Kerbella which say that the conference has been held, and that the result was a unanimous vote that the Akhwan must be opposed, but that it is the duty of King Faisal and his Government to decide in what form the opposition is to be made. No further details have yet arrived, and as things stand, they may be considered satisfactory.

In the absence of any further details there is a tendency to give the credit for this good result to Taufiq Beg al Khalidi, the new Minister of Interior, who attended the conference in person; and if this is really so, he has scored a very great personal success, and bids fair to justify the hopes which have been placed on him. If the conference now breaks up without any secret sessions all should be well, but the anxiety will not be entirely dispelled until it is known that the members of the conference have all gone home and some information is obtained regarding their less public discussions.

Ministerial Vacancies.

It is reported that Ja'afar Abu Timmak has refused the portfolio of Commerce and no new appointment has yet been made. Similarly no new Minister of Justice has yet been appointed, and the British Adviser is acting as Minister.

An Arab Holiday.

Sha'ban 9 (June 2) was the anniversary of the declaration by King Hussein of his independence from the Turks, and orders were issued that the day should be a public holiday in 'Iraq and known as the "Yaum an-Nahdheh." The town was decorated, and there were some illuminations at night, but it cannot be said that the Baghdadi really showed any enthusiasm or any proper appreciation of the occasion. In the morning there was a reception on the parade ground of the 'Iraq Military College, at which the King, the High Commissioner, and all the leading members of the local and the British communities were present. Speeches were made and odes recited. This was followed by a march past of the Arab army stationed in Baghdad. Cavalry, infantry, artillery, medical units and transport were all on parade, and considerable surprise was evinced at the very creditable showing they made. Few people had any idea that the army had yet advanced beyond the crudest stage of recruit drills; but in point of fact the arm drill and movements were far above that level.

The University of 'Iraq.

After the reception and inspection of troops and scouts the King proceeded to Muadhdham, where, in the presence of a large and appreciative assembly, he laid the foundation stone of the future University of 'Iraq. The first building of which the actual foundation was laid is to be the School of Religious Law and Teaching, but it is to be followed by schools of Medicine, Engineering and Arts.

General News.

On Wednesday evening a concert was held in Maude Gardens in aid of the Salam Library. Sir Percy and Lady Cox were present, but the King was unavoidably absent. A noteworthy feature of the concert was a performance by four small girls, who played their parts with perfect composure, none of them showing the least sign of nerves. The band of the Norfolk Regiment was also present, and played several selections.

His Majesty paid a visit to Kut during the week and was well received.

The Maude Bridge has now been repaired and is in use again. The accident to the bridge has served to emphasize the urgent need of another sound bridge capable of taking all the traffic if the Maude Bridge is out of action. The Kotah Bridge is old and weak and cannot take heavy lorries at any time, and when reliance had to be placed on it alone cross river traffic was seriously dislocated.

PALESTINE.

Jerusalem, April 16.

Economies and Changes.

An odd end-of-the-age kind of atmosphere is brooding over the country; the curtain seems just due to drop on Act I, Scene 2, of the piece "British Palestine." . . . the play has not yet sufficiently developed to tell whether it is tragedy or comedy. There are several things which combine to give this end-of-the-chapter feeling: there is the heavy hand of economy obliterating posts and dismissing a considerable number of highly placed English officials; certain posts, created at the beginning of the Civil Administration as avowedly temporary expedients, cease automatically at the end of the coming June—e.g., the posts of Financial and Legal Secretary; the Prince of Wales' Volunteers, the regiment that has mounted guard over the peace of Jerusalem this past year, leaves us in a week or two, and no other English regiment is to replace it; the present week sees the departure of the High Commissioner and family, and also of Mr. Storrs—though only for a few months' leave; and in the last week we have been receiving cables repeating rumours from the English Press that General Tudor replaces Sir Herbert Samuel as High Commissioner of Palestine. That rumour has been promptly contradicted, and nobody here took it quite seriously, but it all helps to add to the prevailing "full-stop!—another-line" kind of impression. Then, too, the "Black and Tans" are due to arrive in force any day—we believe that our new Palestinian British Gendarmerie is not really and identically the original force, but the name has been applied to them already in advance and will doubtless stick as a convenient label to differentiate them from the half-dozen or so other bodies necessary to guard the peace of the Holy Land.

Whether the next chapter will continue the tale to the advantage of Jew or of Arab, or whether it will open up a story of peace or of trouble, nobody quite knows. Neither side is very hopeful. Lord Milner has been refreshingly irresponsible and "unofficial" in his outspoken replies to tearful and protesting Arab delegations, discouraging their slightest hope of a fundamental change in the application of the present British Palestinian policy. And the Jew is by no means happy: the Mandate would seem to be held up till the end of time; and though he is now allowed a limited use of his "National Home" no amount of insistence on his part can secure for him yet all the rights of a latch-key voter (whatever he may suppose these ought to be), let alone the use of a latch-key. His expectations of being able to pay the rent or even to buy up the entire premises have not been fulfilled: he can fill the country (if only he were allowed) with idealists with no money, but the root of the trouble is that the idealistic East-European majority-Jews cannot, to their sorrow, secure the confidence and control of the moneyed American-Jewish minority. There is a vicious circle: those who would invest their money in a some-day-to-be-somewhat-Jewish Palestine will not do so till they note symptoms of a slightly more flourishing present; and there will never be any such symptoms until the investor can be persuaded to show the initiative.

An Exhibition and Some Reflections.

In view of the need—from the Jewish point of view—of wooing foreign capital and introducing a measure of commercialism and modernised industry, to raise the country out of its two thousand years' stagnation, the following episode is not without interest. There is at present showing in the Citadel an "Exhibition of Palestine Crafts and Industries." Everybody interested in the industrial possibilities and the commercial future of the country will naturally seize the opportunity thus offered, and go prepared to make elaborate notes on recent developments and the possibilities of large scale production. But the visitor finds nothing but specimens of primitive handicraft, and when he would examine further to find what he wants, he is met by this note in the catalogue:—

"If in concluding this catalogue, which sums up the results of Palestinian endeavour in crafts and industries, the Commission are justified in drawing comparisons between the Traditional and the Modern, they would like to say this. The country is still young and the effort of modern workmanship slender. Next, the exhibition tends to show that the producers are more at home in the forms, designs and processes that have been carried on from time immemorial. Further, that success, in the opinion of the Commission lies rather in developing traditional processes and national and local forms, than in copying Western, and more particularly Western machine, methods. Palestine must remain an agricultural country, and its greatness will be in its three religious traditions. Both for agriculture and religion, the personal and the human methods will, with few exceptions, always mean more, and be of more real value in the national life than the methods of Western industrialism."

The effect of these remarks on the would-be investor in Palestine appears ultimately to have dawned on the Committee responsible for the Exhibition. They pasted an advertisement over the offending paragraph, thereby manifesting their uneasy conscience, attracting wholesale attention (of course everybody promptly unstuck the advertisement!) to their censured though doubtless sincere convictions, and demonstrating once more that persistent kink in some of our officials that Palestine is not to be considered anything more than a museum of antiques and curios.

YUGOSLAVIA.

Belgrade, April 20.

The Political Situation.

Parliament is now very quiet. The routine work is going on as usual, but the members do not display any political passion whatsoever. Their behaviour is now very different from what it was a fortnight ago, for the news from Genoa has acted magically on everybody. Once again the members are getting together to maintain a united front.

The news from Rome regarding the discussion between M. Ninchitch, the Yugoslav Foreign Minister, and Signor Schanzer, stating that the Yugoslavs are ready to alter the Treaty of Rapallo has caused great indignation in Belgrade. The tendency is very obvious, and the results are already seen in some separatist papers in Zagreb. In a wire from Genoa, M. Ninchitch explains that not only did he not consent to any alterations in the Adriatic Treaty, but that he had already protested to the Italian Minister against the suppression of his statement. The Treaty of Rapallo is regarded as a very hard one for the Yugoslavs as it is, and is looked on as a piece of political blackmail; any further concession would, therefore, be deemed a direct crime against the Nation. Yugoslavia has already sacrificed 200,000 people, who are none too happy in Italy, in order to preserve peace in Europe, but now it seems that the state of affairs in Yugoslavia would permit the country to ignore any "at-the-point-of-revolver" settlement of differences. The Italians are still holding the so-called "Third Zone," and are trying to make political capital of that fact, but they are playing a dangerous game. The latest news from the Government states that M. Pashitch is going to appeal to the League of Nations Tribunal to obtain possession of the Third Zone, since the Italians are obstinately refusing to fulfil their obligations under the Treaty of Rapallo.

General News.

King Alexander has been staying over Easter at Topola, the home of the Karageorgevitch Dynasty.

A collection was made on Good Friday for starving Russian children, and some 620,000 dinars have been handed over to the Relief Committee.

A truck load of explosives exploded at Monastir station, causing great damage and loss of 32 lives. The

number of injured is very small, for those caught within the air displacement radius were killed instantly. Buildings in the vicinity are still burning, and according to the latest reports there is a certain amount of danger of some ammunition dumps catching fire. Troops from Prilep have been ordered to Monastir.

Belgrade, April 27

The Split in the Cabinet.

A bitter dispute recently broke out between the Minister of War and the Yugoslav Moslem Organization, resulting in a vote being taken on whether the Mohammedan members should remain in the Government or not. The Minister for War was blamed for having supplied the Government with news of disloyal activity on the part of Yugoslavia's Moslem subjects, and of an alleged cooperation between Kemal Pasha and the Yugoslav Moslem Organisation. An explanation was called for in the Skupshtina, and General Vasitch, with the facts in his hands, proved that he had received the information from Asia Minor; but, beyond passing it on to the Council of Ministers, no further steps have been taken, since the Government has no real reason to doubt the good faith of its Moslem subjects. Moreover, General Vasitch placed himself at the disposal of the Moslem Ministers to explain more confidential matters, but the Ministers did not seem too ready to avail themselves of the opportunity of learning a few more probably very interesting truths.

However, after a strong campaign and some speechifying in Serayevo, where the extreme Moslems obtained a slight majority, it was decided that the Moslem Ministers should discontinue to work with the Government, and their resignations have been consequently delivered. These resignations have not been dealt with because the Skupshtina is not sitting, but it does not seem probable that the matter will be brought before Parliament, for, according to the latest information, the two Ministers have decided to withdraw their respective resignations until the Congress of the Moslem Party takes place. Once again M. Pashitch has succeeded in getting the Coalition safely between Scylla and Charybdis, and now since the Parliamentary Chart has not been altered, the Coalition is within the margin of safety until some fresh trouble develops.

One cannot help thinking what a narrow escape the Government had this time, because if the Croatian Bloc deputies came down to Belgrade and voted against the Government it would be compelled to resign.

The Monastir Disaster.

This unfortunate town, which has suffered so much during the war, is plunged once again into misery. After the first explosion, which occurred on the 19th instant, a series of fresh explosions followed, causing a very serious outbreak of fire. The panic-stricken people fled out to the country, but unfortunately many, more calm, remained under the ruins of the shattered town. Most of the higher buildings collapsed immediately, thus increasing the list of casualties, which up to the present is still uncertain, but the lowest estimates are allowing as many as 60 dead or seriously wounded.

The streets of Monastir look as though they had been swept by the war fury; glass is smashed to pieces and mixed with *débris* of all kinds, and shell fragments give the town the appearance of having undergone a strong bombardment. The streets are literally blocked to all traffic by destroyed houses, and one can hardly see a living creature walking through them. The fire assumed very serious dimensions, and the main dump containing about 250 waggon-loads of explosives was expected to blow up at any minute. Luckily an R.E. officer with a company of sappers succeeded, only just in time, in piercing the embankment of the Drago River, which immediately flooded the area of the fire, thus bringing the situation more or less under control. When the fire was localised the same officer attempted to remove some of the explosives, and while doing so two of his men

dropped a case containing ecrasite and the whole party was blown up. No trace could be found either of him or of his five men.

The Government has granted a credit of two million dinars to be distributed to the population, and a special committee of enquiry has gone to Monastir to ascertain the cause of this sad disaster. Competent authorities state that the cause of explosion is that the ammunition was made for use in the last war, and no safety provisions had been made for a long storage.

General News.

The Roumanian Queen on her return from Athens was met at Belgrade by King Alexander, who joined the Royal Party on their way to Bucharest, where he will spend a few days. Afterwards the King will proceed to Paris. No political reasons are attached to this visit to Paris, which is stated to be of a private nature.

Two days ago the motor-car in which M. Pashitch was travelling collided with a tramcar, and the Premier is now in bed with an injured rib and leg. This unhappy incident will definitely prevent him from attending the Genoa Conference.

ROUMANIA.

Bucharest, April 20.

Closing of Parliament.

During the last days of the recent short sitting of Parliament—which closed on April 12, to reassemble in November—besides the Provisionary Budget for 1922-23, referred to in my last letter, and the debating on the King's Opening Speech, which, owing to the non-participation of a large portion of the Opposition, was this time a very short affair, the Government was principally occupied with the passing of a series of secondary laws, of which the following are worth mentioning: the Amalgamation of the Ministries of Domains and Agriculture; the Abrogation of the most favoured nation clause granted to the United States in 1912; the recognition of the Roumanian Woman's League, whose aim it is to strive for political and civil rights; the Direct Taxes Law, which suppresses the tax on capital and reinstates a large portion of the old taxes, pending the voting of the New Fiscal Reform promised for the autumn session; the abrogation of certain articles of the New Dobruja Law of 1921, which are replaced by the original Law of 1914; and last, but not least, the House Rent Bill.

The last two laws caused the Government a certain amount of unpleasantness. The New Dobruja Bill was introduced into the Chamber by M. A. Constantinescu, the Minister of Domains and one of the mainstays of the Government, who asked urgency for it. This urgency however, was rejected by 100 votes to 82, and M. Constantinescu, considering a vote as directed against him personally, threatened to resign. To avoid a rupture within the Party, this incident was smoothed over at the following sitting, when the question of urgency was again put to the vote and admitted. Although the incident passed over without leaving any visible traces, it appears that even within the ranks of the well-disciplined Liberal Party there are counter-currents and rivalries, which only needed the temporary absence of its Leader abroad to manifest themselves. That the opposition towards the Minister of Domains came from the parliamentary majority is proved by the fact that the Opposition parties are practically non-existent in Parliament, there being about a dozen representatives in the Chamber and about half-a-dozen in the Senate.

The Government encountered a good deal of opposition also during the debating of the House Rent Bill, especially from the independent spirit of a certain section of the majority—generally called the "Young Liberals"—who expressed the wish that Bills before being brought into Parliament should be studied more thoroughly by the respective Departments.

Genoa and the Bessarabian Question.

The news from Genoa is being eagerly followed by the local press and public. The incident provoked by the Soviet Delegates' at the preliminary sittings accusing Roumania of having unjustly and forcibly appropriated Bessarabia has naturally given rise to comments in the local press, which took this opportunity of putting the Bessarabian question in its true and historical light. It is pointed out that up to the year 1812, when Russia, following her victorious war over Turkey, annexed Bessarabia, this province was part of the Principality of Moldavia, and as the Roumanian principalities were at that time under Turkish suzerainty, they were helpless to oppose this dismemberment. Despite the long period of separation under foreign yoke and the assiduous efforts at russification on the part of the Tsarist Government, the Bessarabian population, the bulk of which is essentially Roumanian or Moldavian—as it generally styles itself in this particular province—has steadfastly stuck to its traditions, customs and language; and at the first opportunity afforded it by the recent Russian revolution, it hastened to rejoin the mother-country of its own free will and on the principle of self-determination. The fact was also emphasized that this re-union has been sanctioned by the Allied Powers. The local press further expressed its satisfaction at the dignified and categorical manner in which M. Bratianu refuted the Soviet Delegates' allegations, when he also reminded them of the question of the Roumanian State Treasury at Moscow, which according to all appearances seems to have been misappropriated by the Soviet Government.

Russian Monarchist Plots.

The Roumanian Secret Police has recently discovered a vast organisation of spying supported by the Russian Monarchist party with Germany's help. A traveller of a German firm was found at one of the Roumanian-Hungarian frontier stations to be in possession of a trunk with a double bottom, containing cuttings from Roumanian papers referring to Army movements, political information, pamphlets of a military character, maps and a number of compromising letters. On further investigation it was established that the firm, "Bus," (these three letters probably representing the first initials of Bessarabia, Ukrainia and Siberia) was founded by a number of well-known Russians, among whom were General Brussiloff, Colonels Krasnoperoff, Seledevnichev, Olepnicov, Paultzer, etc., who under this camouflage of a commercial undertaking were carrying on a spying organization with very active representatives in the various countries but especially in those contiguous to Russia. So far the Police have been successful in arresting in Bucharest six representatives of this organization in Roumania; and on cross-examining them it was made clear that Germany's help is very considerable in the work of this organisation. It is further suspected that it is very closely connected with the attempted murder of Miliukoff.

Football Match between Belgrade and Bucharest.

On Sunday last an Association football match took place between the Belgrade team "Beogradsky" and a representative team of Bucharest in the presence of Prince Carol, Princess Marie, M. Antitch, the Yugoslav Minister at Bucharest, M. Corbescu, the Mayor of the Capital, and many others. Over 6,000 spectators were present, the record for a football match attendance in Bucharest. Princess Marie kicked off. The match was a very exciting one, for the two teams were very evenly matched, as was proved by the result: a draw, each side scoring two goals. After the match Prince Carol made a fitting speech, which was responded by M. Milosh Radoilavitch, President of the Beogradsky Club. Princess Marie, the future Queen of Yugoslavia, then gave every member of the visiting team a souvenir, and at the same time, offered a cup to be played for every year between Belgrade and Bucharest. The Mayor of Bucharest also presented the Belgrade team with a banner bearing the emblem of the town of Bucharest on one side and the monogram of the Roumanian

Federation of Sports Clubs on the other. The guests were then entertained by the Federation to a dinner presided over by Prince Carol, who is the Honorary Secretary of the Roumanian Federation of Sports Societies.

General News.

According to the latest news from Athens, Princess Elizabeth, the eldest daughter of the King of Roumania and wife of Prince George of Greece, who was seriously ill of typhoid fever, is now out of danger and on the way of recovery.

The Crown Prince of Roumania left Bucharest for Athens on Friday, April 14, to join his family.

Prince Nicolas arrived in Bucharest from London to spend the Easter holidays with his family.

A telegram from Rome announces that M. Také Jonescu is laid up with typhus. The first news of his condition were very disquieting, but according to the latest reports, the crisis is over, and no complications are feared.

Captain W. W. Jervis, the well-known Professor of Geography from Bristol University, is now in Roumania to study important economic and political problems of Greater Roumania. Captain Jervis is specially interested in the physical geography of the Dobruja and Bessarabia, and of the influence of the soil, vegetation and climate, on the population, etc.

ALBANIA.

Tirana, April 14.

The Genoa Conference.

Albania's first delegate to Genoa is Mehdi Frasheri. The Government thinks that for the economic relief of the Balkan countries a strict collaboration between all the States (Serbia, Bulgaria, Albania, and Greece) is urgent, especially for the construction of railway-lines and in port-facilities. It is to this end that the Albanian delegate has been instructed to work, and the Tirana Government has requested the League of Nations for its assistance in the work of economic relief and in the launching of a loan abroad.

The State of Siege.

The state of siege, which was proclaimed a month ago, is still in force, but it is not heavily felt, for no censorship has been set up over the Press or telegraphic correspondence.

The trial of the accused is actively proceeding. Up to the present there is no fact worth mentioning except that concerning Halid Lleshi, the notorious agitator, who has just been invited by the Serbs to Dibra.

Scutari and Kortcha.

The Conference of Ambassadors at Paris decided at its session on April 4 on the withdrawal of the Italian troops still at Scutari, and on the evacuation by the Greek troops of a small district to the south-east of Kortcha, which was still occupied by them. The Italian withdrawal is now completed, and no Italian soldiers remain on Albanian soil. As for the region south-east of Kortcha, the Greeks occupied it in May, 1920. While waiting for the fixing of the frontier the Conference has just demarcated a neutral zone which will soon be evacuated by the Greeks.

The Frontier Commission.

The International Commission continues its work at Scutari, and already it has marked out the frontier from the sea to a point east of the town. Numerous deputations from the mountain clans have been presented to the Commission, begging it not to sacrifice purely Albanian territory to Serbian greed.

GREECE.

Athens, April 22.

Germany's Duplicity.

In reviewing the international post-war political situation, the Venizelist organ, *Eleftheron Vema*, reminds its readers that Great Britain has tried very hard to create a powerful Greece in the Levant. Since the last elections, however, it continues, she has lost all

faith in Hellas and the vitality of the Greek people. Moreover, the policy adopted by the various Greek Governments has in no way contributed towards increasing the friendliness of Great Britain or towards dispelling the many misunderstandings which arose with France. The Greek journal goes on to say that the secret agreement between the Germans and the Bolsheviks affords Greece a good opportunity to escape the destruction with which she is threatened, and adds that a really capable Government inspiring confidence among the Powers and adopting a policy in conformity with Allied interests, could take advantage of the just indignation felt, as a result of the new German treachery, and thus not only regain England's lost confidence but also dispel France's hostility.

From a Greek point of view the announcement of the secret agreement between Germany and the Soviets is regarded as the best piece of news the country has had for a long time, and the Greek is wondering whether the Allies will now realise what a huge mistake they are making in giving Asia Minor back to the Turk. That Kemal was backed by the Bolsheviks and that the latter were on very intimate terms with the Germans was of course no secret, but with the exception of a few French diplomatists who openly condemned both the British and the French policy of conciliation and reasonableness adopted towards the conquered foe, no one suspected Germany of foul play. The Allied interests, it is argued here, would probably be served far better if the Greek Army were allowed to remain in possession of the territory it is now occupying in Asia Minor, until all danger of a new "made in Germany" bridge to India is, at least for the time being, averted.

Meanwhile reports are reaching us from Smyrna to the effect that the "Committee for the Defence of Asia Minor" which has been formed there is extremely active. Instructions have been issued to all the Christian communities of the territories occupied by the Hellenic forces to send representatives to the General Assembly

Piræus

of the "Micrasiates" which will be convoked shortly in Smyrna. The object of this Assembly is to enlighten the Christian population of Asia Minor on the real situation and to decide which would be the best way to safeguard their interests. It is reported that all male inhabitants of Ionia between the age of 18 and 36 will be called up before the evacuation of the regular Greek forces.

Greece's Reply.

The Prime Minister is leaving Genoa to-day and is expected in Athens next Tuesday, in which case the National Assembly will be convoked on Thursday. According to rumours originating from well-informed Government circles, it appears that the Government will endeavour to avoid a parliamentary debate on the question of the Greek reply to the Allied peace proposals. It is understood, however, that the various Opposition leaders, especially General Danglis and M. Stratos, are determined that the whole question shall be thrashed out in the National Assembly, which alone can decide whether the reply formulated by the Government is in conformity with the nation's wishes. Next Thursday's sitting, therefore, promises to be full of interest, and will very possibly result in a fresh ministerial crisis.

The Orthodox Easter.

The Easter holidays passed off quietly, and the capital has once again resumed its normal aspect. All official business has ceased for six days, and the theatres, picture houses and other places of entertainment remained closed by order of the police from Holy Thursday until midnight on Saturday. Despite their enormous number, every church in Athens was crowded throughout the week. The Orthodox Greek is very religious, and it would weigh heavily on his conscience if he did not attend the services on Holy Thursday and Good Friday, and fast during the whole week. On Good Friday it is practically impossible to buy meat, as all the butchers' shops remain closed. There is only a very small quantity available which is reserved for the better class hotels and for the foreign residents or visitors who are not fasting. Even dishes prepared with olive oil are prohibited by the Church during Holy Week, so the poorer classes have to content themselves with boiled vegetables, olives (strange to say though oil is banned the fruit which produces it is included among the permissible dishes), a peculiar kind of sweetmeat called *halva* which is made from the oil of sesame and sugar, and fruit. The wealthier classes consume large quantities of caviare (a very expensive delicacy in Greece nowadays) and tinned lobster or crab.

Owing to a slight indisposition, the King did not attend the midnight Resurrection Service at the Cathedral on Saturday, but the Queen and the Royal Princes and Princesses were there. His Majesty was also unable to pay his customary visit to the barracks and military hospitals on Sunday morning to wish the officers and men *Christos Anesti*.

The usual Easter Service was held in the English Church on Sunday morning. The Church, which was tastefully decorated, was crowded, and included among its congregation, Queen Marie of Roumania.

Miscellaneous News.

Prince Carol of Roumania arrived in Athens last Monday. Princess Elizabeth's condition is gradually improving.

The Chief of the British Naval Mission to Greece, Admiral Aubrey Smith, has returned from Constantinople.

A resolution was passed by the Municipal Council of Athens conferring the freedom of the city of Athens on the philhellene British Member of Parliament, Mr. T. P. O'Connor. Mr. O'Connor is expected shortly in Athens.

Fifteen of the National Defence officers who sought refuge in Constantinople after the last elections, have proceeded to the Asia Minor front and placed themselves under the orders of General Papoulas.

Two fatal cases of plague are reported from Patras.

M. Stergiadis has arrived from Smyrna and attended a Council of Ministers held on the following morning. The Greek High Commissioner was also received by the

King and subsequently called on the British and French Diplomatic Representatives.

The leader of the Reformist Party, M. Stratos, addressed a letter to M. Baltazzi, the Foreign Minister, pointing out that the Government had no right to discuss the peace proposals without previously consulting the National Assembly. M. Baltazzi replied that no decision would be taken until M. Gounaris' return.

An official telegram from Smyrna states that the Mussulman population of Kutahia held a meeting to protest against the decision of the Allies to restore that town to the Kemalists. A protest meeting was also held in Salonika.

BULGARIA.

Sofia, April 19.

The Military "Organ" of Liquidation.

A great deal has been written in the local Press regarding the attitude taken up by the Organ of Liquidation in the fulfilment of its duty. It is alleged that the Organ, instead of liquidating the work of the Control Commission, is commencing a thorough revival of the military clauses of the Peace Treaty. In view of these allegations it is interesting to reproduce certain passages of M. Poincaré's letter to the Bulgarian Government last February. The President of the Conference of Ambassadors wrote, under date of February 15, as follows: "The Military Commission, owing to circumstances over which it had no control, has not been able to finish off certain matters such as, demobilisation of certain Gendarmerie, disarmament of the civilian population, and the handing over of war material. In order to lighten the burden that military control places on Bulgaria, the Conference of Ambassadors has decided to replace the Commission by an Organ of Liquidation, which shall possess a very restricted personnel. The Bulgarian Government will be responsible for the entire cost of upkeep of the Organ of Liquidation." It is of course possible that further instructions have been sent from Paris to the Organ of Liquidation, but if so they have not reached the Bulgarian Government. The situation as it is to-day is highly anomalous. The Inter-allied Control Commission, after an eighteen months' sojourn in Bulgaria, departed declaring that the work was all but finished. The Organ has begun to work on lines which assume that the military clauses of the Peace Treaty are far from being completed. The personnel of the Organ, which according to M. Poincaré's letter was to be much restricted, consists of 6 officers, 7 N.C.O.'s performing the duties of officers, and 23 other persons. This is a grand total of 36, not falling very far short of the number of persons employed by the Interallied Commission, which is fulfilling a far more important role. The salaries paid to the members of the Military Organ are very considerable, the Chief receiving 35 times as much as the Chief of Staff of the Bulgarian Army, not to mention free quarters and motor cars. The Organ has now been functioning for over two months, but it shows no signs of closing down. What is required is a ruling by the Allies as to the status of the Organ of Liquidation. During March, the Organ requested the Government to draw up a Law dealing with "Military Justice." Admitting that this subject comes under the purview of the Organ, although even this is open to doubt, it is hard to understand the reasoning which prompted the Organ to insist that no military lectures may be given in schools, and that no meetings at which military subjects are discussed may be held. The view held by the great majority of both foreigners and Bulgarians is that the Organ of Liquidation is performing its task in a manner likely to lead to trouble, and is not befitting the nations it represents.

Democrats and Narodniaks.

The Democrats and Narodniaks have concluded a working agreement very similar to the one made a year ago. The previous agreement was arranged by M. Liaptcheff on behalf of the Democrats, and M. Bourouff on behalf of the Narodniaks. Owing to the machinations of certain party politicians the agreement concluded

last year did not continue, but this time the agreement is on a more solid and stable basis. Democrats and Narodniaks represent about 25 per cent. of the present Sobranье.

Bulgaria and Russia.

In her relations with Russia, Bulgaria finds herself in a very difficult position. Last week, a Note was received from the Ukrainian Government which accused the Bulgarian Government of intriguing with Wrangel against Soviet Russia. The Note stated that any move by Wrangel against Russia would be considered by the Soviets as a hostile act of the Bulgarian Government. On the other hand, certain critics of Bulgaria, some of whom reside in Fleet Street, write that Bulgaria is only biding her time in order to make a definite alliance with Moscow.

M. Yaneff, the acting Minister for Foreign Affairs, declared last week that the policy of the Bulgarian Government lay neither with Wrangel nor with the Soviet. This is true.

The Balkan Committee.

The Memorandum prepared by the Balkan Committee for the Genoa Conference has been reproduced and warmly commented on, in nearly all the Bulgarian newspapers. It is noted that the signatories of the Memorandum are numerous and that several new and influential names appear. As Genoa is not to deal with Peace Treaties, it is doubtful whether the Memorandum will have any great effect, but in any case it goes to show that there is a current of public opinion in England that is not forgetful of Bulgaria's claims.

A New Newspaper.

A new newspaper has been started in Sofia. It goes under the name of *Slove*, which signifies, "word." The paper calls itself non-party, but it is only fair to say that the promoters and collaborators are for the most part members of the Bourgeois parties. The general get-up and style of the paper are considerably in advance of any other Sofia paper, and the news service promises to be both comprehensive and exact. If the standard of the first few numbers is maintained, the *Slove* should prove a very valuable addition to the Bulgarian Press.

Easter.

The Easter holidays are over, and shops and banks are open once again. On Easter eve, the usual service was held in the old Cathedral, but the King was not present, having gone away to his shooting box at Critchim near Phillipopolis.

Personal.

Major Neate, for some time a member of the British Military Mission at Sofia, has arrived to take up his duties as British member of the Organ of Liquidation, *vice* Major Milner, who is returning to England.

M. Charles Maskens, the new Belgian Minister, presented his Letters of Credence to King Boris on Tuesday, March 11. M. Maskens was formerly Counsellor at the Belgian Legation at London.

TURKEY.

Constantinople, April 15.

Angora's "Acceptance."

Now there has been time to examine carefully the nature of the Angora Government's reply to the Allied proposal for an armistice, it should be clear that the Press announcements which described that reply as an "acceptance" were erroneous. The complete evacuation of Anatolia by the Greeks would, *ipso facto*, bring about an armistice, for the simple reason that the two belligerents would be unable to get at each other! The reply of the Angora Government provided additional evidence in support of the contention that the Nationalists have no intention of negotiating until the Allies have completely discarded every weapon they possess, which would enable the Angora Government to dictate its own terms. By describing the reply to the Allied proposals as an acceptance, the European Press has once again fallen into a trap, for although the Angora Government never had any intention of accepting the Allied proposal, it realised the imperative necessity of avoiding

all appearance of returning a blunt refusal as compared with the Greek reply. Hence the reply was couched in terms to the effect that the proposal was accepted—but the Allies must discard their weapons first. In reality the reply was to the effect that the proposal was not accepted, and another completely different proposal accompanied the refusal. In view of the repeated declarations of Nationalist leaders, and in the absence of any reason to warrant the assumption that the Angora Government has not every intention of acting in conformity with those declarations, there should be no grounds for surprise at the nature of the Angora Government's attitude.

As a matter of fact, the attitude of Angora in the matter was clear from the outset, for the publications of the Anatolian Agency, which are directly inspired, chiefly by Mustapha Kemal himself, left hardly any room for doubt as to the nature of the reply that would be made. For instance, shortly before the Allied proposal actually reached Angora, the Anatolian Agency published a report to the effect that the British Government had made secret overtures to the Angora Government for the conclusion of a 25 years' agreement upon the condition that the Angora Government should terminate anti-British propaganda in return for the evacuation of Anatolia by the Greeks. The announcement terminated with the sneering comment: "The British seem to think that this country is Egypt." Neither has there been the slightest respite from the vicious anti-British propaganda campaign in Anatolia, and in such circumstances it was impossible for careful observers on the spot to share the optimism that was expressed in Europe on the strength of Angora's "acceptance."

The Peace Proposals.

Although the Angora Government has not yet replied to the Allied peace proposals, the reply communicated by the Sublime Porte has aroused the utmost indignation amongst the Nationalists. Once again Izzet Pasha has been the subject of venomous attacks both in the Assembly and in the Anatolian press, and the Anatolian Agency has expressed the opinion that it is high time to prove conclusively to the whole world that the only government possessing the right to voice the desires of the nation is the Great National Assembly. The Sublime Porte's reply is violently condemned as a betrayal of the country to its enemies, and Izzet Pasha is openly accused of having come to a secret arrangement with Lord Curzon. Seldom, indeed, has the Angora press exceeded its present outburst of hysteria, the essential reason for which is clearly the persistence of the Sublime Porte in maintaining its status as the official Government of the Sultan as recognised by the Allies and the rest of the civilised world.

Under these conditions, it is hardly logical to expect a very satisfactory reply to the peace proposals from the Angora Government, and the objections already formulated in the Angora Press are not of a nature to induce optimism. It has been pointed out in previous letters that the Turkish problem long ago emerged from the stage of a mere territorial dispute, and that the real issue rather involves the Angora Government's conception of "independence." This view is being fully borne out, for while the territorial question is given due prominence, equal emphasis is being laid upon the necessity for securing the "political, economic and financial independence of the nation." Unless the Nationalists make eleventh hour concessions of an extensive nature in these respects, it is difficult to see how their views can be reconciled with the legitimate interests of the Allies, even when allowance has been made for the most generous concessions by the latter.

The Capitulations.

Emphasis needs to be laid upon the question of the Capitulations, the complete and unconditional abolition of which will alone satisfy the Nationalists. No fair-minded foreigner who knows anything about the question will deny that in many respects the Capitulations stand in urgent need of alteration, in that they give foreigners in Turkey certain undue advantages over

Ottoman subjects. There are very few foreigners, however, who would care to risk residing in Turkey without the essential guarantees for security of life and property which the Capitulations provide; and it would be an unwarrantable betrayal of both honour and interest for the Allies to consent to the unconditional abolition of the Capitulations. Carefully shepherded foreigners have written glowing accounts of the Kemalist administration, but it is less than twelve months ago that a British subject was fiendishly tortured and done to death by slow strangulation in the streets of Angora after a mockery of a trial. He was highly educated and cultured man being a graduate of Edinburgh and Heidelberg Universities, but in spite of the obvious preposterousness of the charge of espionage that was brought against him and in spite of his being an Indian Moslem he was barbarously done to death for political reasons. Similar treatment has been meted out to thousands of unfortunate victims of Kemalist "justice" during the last two years and it is this "equality of treatment" that the Angora Government guarantees for both foreigners and Christian minorities, as well as for its political opponents amongst the Turks themselves. What has taken place in Cilicia since the evacuation of that country by the French is a sufficient testimony in itself. The question of the Capitulations is thus one that touches the vital interests as well as the honour of the Allies, and it is to be hoped that these considerations will not be set aside, whatever other concessions may be made in the interests of peace.

The Position of the Central Government.

The attitude of the Angora Government has become a source of serious embarrassment to the Cabinet, and another crisis is in prospect. The resignation of the Minister of Finance, Faik Nuzhet Bey, was brought about by certain differences between that Minister and the Allied Financial Commission established during the administration of Damad Ferid Pasha, and it is possible that the next holder of that most difficult office at the present moment will be a member of the new Administration. The Allied proposals appear to be producing the result of bringing the relations between the Central Government and Angora to a head, and it is doubtful whether the present Administration can remain in power if the proposals in question produce any results.

Constantinople, April 24.

The Allied Proposals.

The nature of the Angora Government's reply to the Allied Note of April 15 should be ample proof of the mistake made by the press of Europe in describing the Nationalist reply to the Allied armistice proposals as an "acceptance." It would have been equally logical—or illogical—to have described the European armistice

of 1918 as having been accepted by the Allies! For the attitude of the Angora Government is frankly that of victors towards the vanquished. According to the Angora point of view, the bayonets of the Kemalist army have forced the Allies to bow their heads, and the "vanquished" must therefore withdraw, afterwards the Angora Government will—dictate peace! Those who signed the Treaty of Sèvres have been forced by the Kemalist army to "lick away their signatures," in the inspired language of the Anatolian Agency, and will be forced to endorse the National Pact on their knees by signing a new treaty drawn up by the Grand National Assembly.

Although the tone of the replies of the Angora Government to the Allied Notes is blander than that of the Anatolian Agency, both are inspired by the same spirit of cast-iron intransigence. There is nevertheless reason to believe that some of the Angora leaders are beginning to lose their nerve, for the resignations of the Commissioners for Finance and War, Hassan Bey and "Keup-rulu" Kiazim "Pasha," are plainly connected with the financial and military situation of the Angora Government. The explanation given by Nationalist circles in Constantinople for the resignation of these two Ministers, namely their disagreement with the "conciliatory" nature of the Angora Government's reply to the Allied proposals, cannot be accepted, for the simple reason that the reply in question is uncompromising. It has been no secret for a long time that the Angora treasury is in very low water, and that the number of desertions from the army has reached a serious figure. There is also very good reason to believe that in spite of the inflated verbiage of the Anatolian Press, the unbending attitude of the Angora Government is not a true reflection of the sentiments either of the mass of the population or of the army in general. The Young Turks are notorious gamblers, but among them there are a few who realise that the longest run of good luck must come to an end sooner or later, and the reasons for the resignations of the Commissioners for Finance and War are undoubtedly connected with their realisation of the extreme improbability of increasing the already very heavy Turkish winnings by continuing to stake everything on "swords."

If there were no outside influences at work in Angora, there might be some hope of breaking down the uncompromising policy of Mustapha Kemal to a certain extent, but it is unfortunately certain that the policy of the Angora Government is being shaped by Russian counsels. There is also reason to believe that the Kemalists have received some clandestine encouragement from the French, and it is exceedingly unfortunate, to say the least, that the Allies should not have been able even yet to establish complete harmony and unity of purpose among themselves. The obvious contradiction between acceptance of the "totality of the peace terms" and the qualification "subject to discussion of particular points" was a serious flaw in the Allied Note, and clear evidence of incomplete union and sincerity amongst the Allies themselves. It is inconceivable that any of the Allied chanceries acting independently would have made such an error of diplomacy as to have used the bizarre term "particular points" instead of "matters of detail." The Angora Government naturally utilised the loop-hole which one cannot help concluding must have been designedly introduced into the Note.

The Angora Government's Reply.

Stripped of all verbiage the Angora Government's reply to the Allied Note of April 15 amounts to a rejection both of the armistice proposal and of the general peace conditions, which are described as not being of a nature to satisfy the national desire to be rid of "political, economic and juridical chains." This particular passage of the Angora Government's reply is in reality the most important part of the whole communication, and amply confirms what has been pointed out in previous letters to THE NEAR EAST regarding the Nationalist Young Turk interpretation of the term "independence." The offer to send delegates to discuss matters at Ismidt is obviously merely a manoeuvre with the object of throwing upon the Allies the ostensible responsibility for breaking off the tentative negotiations.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

A "SEMITIC NATIONAL HOME."

To the Editor of "The Near East."

Sir,—Your correspondent, Mr. Adolf Waley, has put forward a suggestion for the solution of a very difficult problem, the problem of reconciling the Arabs of Palestine to the trying of the Zionist experiment in that country; and it would be a happy thing if the two parties, Arab and Zionist, would act upon the suggestion. But is there any probability of their ever doing so? Family feuds, we know, are always more bitter than those between parties who are unrelated, and it always seemed to me when I was travelling in the East that, though Arab and Jew might tolerate one another up to a point, they could never be real friends. They have many characteristics in common, though, no doubt, their points of unlikeness are far more numerous than the points of any likeness between them; but I, for one, fear that they are never likely to settle down peaceably in Palestine. Yet Mr. Waley's letter opens up an alluring prospect, and it is to be wished that the Arab and Jewish leaders could be persuaded to consider this suggestion with care, and, if possible, together.

I am, etc.

London, April 29.

PARTY POLITICS IN GREECE.

To the Editor of "The Near East."

Sir,—In the lexicon of the newspaper world accuracy and impartiality are the fundamental concepts.

This thought came into my mind when reading the notes of your Athens Correspondent in the issue of your Journal of April 6.

Many statements not quite in accordance with fact are made therein. He states that there were present in the Chamber of Deputies 303 Deputies at the time the vote of confidence in the Government was asked for. The exact number was 263, and of these 10 refrained from voting, M. Gounaris obtaining the votes of 164 of the remainder. It will readily be seen, therefore, that the majority in favour of the Greek Premier was 89. Your Correspondent also states that the Mussulman Deputies did not even appear at the sitting of the Chamber—I myself, who was present throughout the entire sitting, counted nine, and spoke to five.

Your Correspondent's explanation of a second crisis being averted is crude and misleading. To those who were not in direct touch with the political pulse of the moment it appeared that there was a certain danger of the Government falling, but to others who had fully realised and appreciated the finer diplomatic points of the situation it was apparent that there was no possibility of a ministerial crisis. M. Gounaris was assured of a sound working majority before he replied to his critics, who after all, did little more than once again traverse well-beaten tracks in their criticisms, and this assurance became a conviction before the Premier concluded his speech.

The truth of the position is that Greece possesses no other man who could adequately fill the position of M. Gounaris, a position fraught with much care and anxiety, chiefly because of the chaos that prevailed in the country's internal and external affairs when he was first called upon to assume office. His personal sacrifices of time and labour would also have availed him little had he not the attribute of obtaining the closest loyalty and unstinted support of his ministerial colleagues.

Criticism is easy; generalisation in speeches is easy, but the outstanding fact overwhelms the opposition to which M. Gounaris had been subjected, that not one

of the Leaders of the several small parties against him in the Greek Chamber had the pluck or the grit to take the Greek Premiership when it was offered to them. They preferred displaying their gifts of empty criticism to their few listeners who, themselves, failed to appreciate the situation in its depth of seriousness—they preferred, when tested, to reign in the snug security of their own little parties than to brave the uncertain and stormy elements of higher and better things. I do not know the Greek Premier personally; I have little interest in local politics, and I nurse no brief for the present Government, but the moral courage displayed by the Premier intrigues me, and my admiration is readily given to him as a Man who for the sake of his country carries on in the face of all difficulties, and who displays such a kindly forbearance towards the obvious weaknesses of his detractors.

I am, etc.,

J. B. HARRIS.

THE BALLADS OF MARKO KRALYEVITCH.

To the Editor of "The Near East."

Sir,—I am indebted to your reviewer for a very friendly notice of my translation of the Marko ballads, but some of his criticisms seem to call for a word of comment. He says, for example, that the omission of Dozon's "L'épopée serbe" from the bibliography is "unfortunate." If he turns to page 189 he will find the name of this book in its proper place under the heading "Auguste Dozon."

At the same time the list makes no pretence to be exhaustive. It consists almost entirely of books either read or consulted by me, and I admit that the short essay on Marko in the *Oxford and Cambridge Review* of 1911 had escaped my notice.

Again he says: "'Pola pije' is an oversight for 'polu.'" He is mistaken. Then the phrase 'josh ono shlo zhezhenno zlato' was troublesome because of the vagueness of its application. My difficulty was with the words 'josh ono shlo' and not with 'zhezhenno zlato' as the reviewer appears to think. 'Iaistina' is the name given to Marko's servant in one of the ballads, and I did not think it necessary to write a note on its etymology. I felt there was a real danger that my modest craft might founder beneath an overload of annotation and I therefore strove to dispense with notes as far as possible. Thus Mount Athos was not commented on; sufficient information can be found in any encyclopaedia.

Njemadija according to your reviewer, is equivalent to the land of the "N jem-tsi" or Germans. He is in good company, for Vuk is of the same opinion. My Serbian referee, however, thought the obvious derivation a very dubious one, and in deference to his opinion I struck out "Germany" and substituted the "N jemadija" of the original. I agree that "Brđjanin" means "of the Brda," but I allowed myself, on this occasion, to use an English word, which, less crabbed in appearance was yet reasonably descriptive. With regard to "kesedjia" I relied on Vuk's definition: 'ein türkischer Strassenrauber: turcicus equo vectus,' and after weighing the claims of 'highwayman' and 'outlaw' decided finally on the latter.

The word *prezime* is a mistake which had been overlooked and I am glad to have had it pointed out.

It is most interesting to learn that an annotated English version of Marko has existed in MS. for twenty years. If I had been aware of the fact I should assuredly not have attempted the task. I am conscious of a thousand shortcomings and imperfections in the very limited scope of my essay, and am correspondingly grateful for the suggestive and helpful criticism contained in your review.

I am, etc.,

NEAR EAST BOOKSHELF.

AN ASIATIC ANTHOLOGY.

"TRANSLATIONS OF EASTERN POETRY AND PROSE." By **Reynold A. Nicholson, Litt.D., LL.D., Lecturer in Persian in the University of Cambridge.** (The University Press, 1922. 8s. 6d. net).

The literatures of Arabia and Persia are the growth of a thousand years: they reflect every phase through which man's intellect has passed, and have idiosyncrasies which pass the average Westerner's comprehension. Professor R. A. Nicholson stands foremost in a little group of European scholars who have mastered the languages of Hither Asia; he has added to a great reputation by giving the world an anthology which preserves much of the elusive flavour of the original works. Poetry, being the supreme expression of a nation's soul, almost defies translation, especially into a language so poor in assonants as English: and the renderer's task is further complicated by the fact that the metres used by Arabian and Persian poets differ widely from our own. The following specimens prove that Professor Nicholson has triumphed over the difficulties that beset him:—

From **Abū Nuwās**, a boon companion of the Caliph **Harun-al-Rashid**. (780-809 A.D.)

Make the most of Youth, it stayeth not for ever.
Let the wine flow round from morn to eve—one river!
Pour into thy cup a sparkling ruddy vintage
That will melt to ruth the miser's hardest vintage,
Sought and chosen out of old for Persia's ruler,
Dowered with twin delights of fragrancy and colour.
Seest not that I have pawned my soul for liquor,
Kissed the mouths of fair gazelle and foaming beaker?
'Tis because I know, full well I know and fear it,
Far apart shall be my body and my spirit.

A truly catholic spirit inspires this quotation by the illustrious mystic **Abi'l Khair** (967-1049):—

Not until every mosque beneath the sun
Lies ruined, will our holy work be done;
And never will true Musalman appear
Till faith and infidelity are one.

Jalāl u' d-din Rumi (d. 1273) is Persia's greatest mystic poet: but he seems to have anticipated Darwin's epoch-making doctrines by singing:—

I died as mineral and became a plant,
I died as plant, and rose to animal,
I died as animal—and I was Man:
Why should I fear? When was I less by dying?
Yet once more I shall die as man to soar
With angels blest; but e'en from angelhood
I must pass on: all except God doth perish.

The quintessence of mysticism is to be found in a poem on the Creation by **Jāmi** (1414-92) who was Persia's greatest genius. It begins:—

From all eternity the Beloved unveiled
His beauty in the solitude of the Unseen;
He held up the mirror to His own face,
He displayed his loveliness to Himself,
He was both the spectator and the spectacle,
No eye but His had surveyed the universe.

Of equal interest are Professor Nicholson's extracts from the copious prose literature of Arabia and Persia. Some of them are tinged with quaint humour, which

rarely appears in Asiatic poetry, e.g., "An Ass that died of love," recounted by the historian **Mas'ūdi**, who died A.D. 976:—

The Caliph **Mutawakkil** said to **Abu'l 'Anbas**: "Tell me about your ass and his death and the poetry which he recited to you in a dream." "Yes, O Prince of the Faithful, my ass had more sense than all the Cadis together; 'twas not in him to run away or stumble. Suddenly he fell sick and died. Afterwards I saw him in a dream and said to him, 'O my ass, did I not keep thy water cool and thy barley clean, and show thee the utmost kindness? Why didst thou die so suddenly?' 'True,' he answered, 'but on the day you stopped to converse with so-and-so, the perfumer, about such-and-such an affair, a beautiful she-ass passed by: I saw her, and lost my heart, and loved so passionately that I died of grief, pining for her.' 'O my ass,' said I, 'didst thou not make a poem on the subject?' 'Yes,' he answered, and then chanted—'I was frenzied by a she-ass at the door of a perfumer. She enthralled me, smiling coyly, showing me her lovely side-teeth, charmed me with a pair of soft cheeks coloured like the *Shaikurani*. For her sake I died and had I lived, then great were my dishonour.' I said 'O my ass, what is the *Shaikurani*?' 'This,' he replied, 'is one of the strange and uncommon words in the language of asses.'" **Mutawakkil** was delighted, he ordered the minstrels to set the ass's poem to music and sing it on that day.

The poet **Jāmi** tells the following story regarding **Amr** the son of **Bahr**, nicknamed **Jāhiz**, the "Goggle-eyed":—

Jāhiz said: "I never felt so much ashamed of myself as one day when a woman laid hold of me and led me to a brassfounder's shop, and said to the master—'Like this!' I was at a loss and begged him to explain. 'She bade me make for her an image of the Devil,' he replied; 'and when I said that I did not know what it should be like, she fetched you as a model!'"

It is to be hoped that future editions of this fascinating book will give the Arabic and Persian originals side by side with Professor Nicholson's translations.

F. H. S.

INDIAN UNREST.

"ABDICATION." By **Edmund Candler.** (London: Constable. 7s. 6d. net).

Mr. Candler has given us in this successor to "Sir Ram," which he published some years ago, a brilliant and many sided study of the present state of discontent in India. When we ask as **Skene** asks **Riley** "What's your remedy?" we do not find an answer here. The author does not show us whether his opinions are those of **Riley**, with his arguments for giving India complete self-government, or those of **Skene** when he says: "You do not think about our responsibility to the masses."

Riley is the editor of the *Thompsonpur Gazette* (**Thompsonpur** and its purity native half **Gopalpura** are described as being situated in the "New Province"), and scandalises the official population by his views. But he is able to see the danger of **Baraktullah**, an unscrupulous Mohammedan journalist, a great supporter of the Hindu-Moslem entente, who distorts **Ghandi's** words and persistently incites the people to violence chiefly because "poison pays," and to realise that his form of extremism is not any more likely to help matters than old **Colonel Hobbs** to whom "Indians were still children to be meted out reward or punishment according to the convenience or inconvenience of their conduct as it affected British interests. He was convinced that the Reforms were part of some Hun-inspired Semitic intrigue to undermine the British Empire, for which sole purpose Mr. Montague has been treacherously appointed Secretary of State." **Riley** is not a practical politician but an idealist who is haunted by the magic of the East, and when the pro-

THE JEWS

By **HILAIRE BELLOC**

Sunday Times: "An excellent piece of work. It shows that carefully acquired mastery of the subject in hand which marks all its author's utterances on important subjects; its honesty is undeniable, its kindly intent can be questioned by no candid reader."

Jewish Chronicle: "An indictment of Jews, against whom he rakes up every absurd and a thousand times disproved allegation, flinging them down as fact. His indictment is almost entirely compounded of the garbage and the filth of all the gutter press, the emanations of low-minded and foul breathed slander."

Outlook: "Perfectly sincere."

Times Lit. Sup.: "Closely reasoned analysis and logical argument."

Daily Telegraph: "Well-balanced, reasonable and suggestive."

prietors of the *Thompsonpur Gazette* finally dispense with his services—after his refusal to open a Dyer fund in the paper—he learns how to operate for cataract and wanders away to Tibet.

All Mr. Chandler's characters, the Englishmen and the Indians of many types, are splendidly drawn. Banarsi Das, who was a friend of Siri Ram, is the central figure amongst the Indians. The greatest achievement of this powerful book is the portrayal of his vacillation between adherence to Ghandi and to the British Raj which has so often befriended him, of his easily roused enthusiasm, of his hopeless cowardice and of the unrelenting grimness of his end. There is so much humour as well as such tragedy in his story that he is a figure who will not easily be forgotten.

The book gained an additional topical interest by being published just after Ghandi's arrest. There is a most arresting description of Ghandi's visit to Gopalpura, which really does give an idea of the extent of his influence. We feel we can almost see the Mahatma sitting "cross-legged on the folded hood of the motor like a diminutive Buddha," so vivid is the scene.

One chapter in which Mr. Chandler lets us see more of his great gift of humour without introducing any touch of caricature is that in which he tells us about the luncheon party given by Amba Pershad, an extremely clever cultured Brahmin, to introduce Sir Anthony Greening, a globe-trotting Labour M.P., to the leading Indians of the city. It is delight to read it, from Amba Pershad's rescue of the M.P. from the egregious Barak-tullah, who always addresses him as "Sir Greening" to the last sentences "on the whole Sir Anthony had been a success. The Nawab's son up aloft in his camel carriage was thinking: 'What a wonderful people they must be, if even their coolies are like that.' It was the only reflection that disturbed his tranquillity during the afternoon."

Apart from the tragic history of Banarsi Das, that pathetic product of European education working on an Eastern mind, the book has no plot and is really a representation from many angles of the problem now facing the Government of India. The author sometimes leaves this subject to write of Riley's love of the East, which was not killed after three years of war in Mesopotamia. He is haunted by a vision of Orguné in "Sohrab and Rustam," and there is real romance in the description of his wanderings in search of this magic place.

This is most distinctly a book that is well worth reading, both for its political interest and its very real literary merits.

MUSICAL NOTES.

BEETHOVEN AND THE L.S.Q.

It is a common practice to hail the return from abroad of any musician or body of musicians with such a remark as "fresh from Continental triumphs," and in speaking of the London String Quartet, who have toured practically the whole world, it has become a universal cliché. As a matter of fact, it is, like most clichés, a lie: foreign triumphs do not make musicians fresh, but only their Press agents. We know very well the deterioration which the L.S.Q. underwent last year, and we put it down then, perhaps wrongly, to their undoubted successes in America. But it was a different matter this time, and it is a great pleasure to welcome a notable improvement in their playing: our pride in them is once more installed.

They played during their recent visit to London the whole of Beethoven's seventeen Quartets, and though

I heard them in the first nine only, I dare swear that the interpretation of the last eight also, the most difficult, has vastly improved. Their tone, collectively and individually (but for the viola) is still far from being a Flonzaley tone, their rhythm just as distant from a Léner rhythm, but they have a directness, a technical finish, and a unanimity that make their readings at the least enjoyable and at the best moving. For me their highest playing was in the third movement—the Andante with variations—of the Fifth Quartet: here they launched and floated the themes with superb craftsmanship. But their lightness and grace made nearly all the fast movements a pleasure, and their slips in intonation were but few. In the slow movements of the first nine quartets, those great conceptions which so surely foreshadow the Beethoven of the third period—you can trace even in the Andante I have mentioned the master who later gave us the Arietta of Op. 111—there was a dry beauty of expression that scarcely compensated for richness and depth of tone, a correctness of feeling that came rather from scanning than from plumbing. And one peculiarity of the L.S.Q., a peculiarity in which they on all possible occasions indulged was an over-sharpening of attack, amounting almost to a stab, which, wanted in some places, became monotonous in others. However, in technique and scholarship generally the L.S.Q. is equal to most quartets in the world, and where, as in the early Beethoven Quartets, soundness is the virtue most required, their readings are hardly surpassable.

ON GRAMAPHONE RECORDS.

Among the vocal records recently issued by "His Master's Voice" Company, here are some of the most prominent:—

First in musical importance is Chaliapine, in Rimsky Korsakoff's "The Prophet." The great Russian is in good voice, and gives a magnificently intense rendering of a song that is peculiarly suitable for his dramatic temperament. All sorts of tone-colours he puts in against the suggestiveness of the accompanying background.

Walter Hyde brings two tenor works of Wagner: "Winter storms have waned," Siegmund's Love Song, from "Die Walkure," and "My Trusty Swan," Lohengrin's Farewell. They are good singing, without being distinguished, with clarity as perhaps their chief virtue.

Rosina Buckman is heard in "Thou art flown," from Offenbach's "Tales of Hoffman," and in Mendelssohn's "On Wings of Song." The first is rather uninspired, and sung with fitting mediocrity; but the smooth rhythm of the second is spoiled only by the orchestral accompaniment.

Those interested in the season of the British National Opera Company, which began this week at Covent Garden, will be glad to have the record which Clarence Whitehill, the American baritone, has made of "Mein Vater," Amfortas' Prayer from "Parsifal." Whitehill has been specially engaged to sing in the "Ring" cycle in London, and this record shows well the qualities of his voice, though there is perhaps too little variety in his tone-colour.

There is very beautiful singing indeed in "Vien, Leonora, a piedi tuoi," as sung by Battistini. This excerpt from Donizetti's "La Favorita," is sung with real vocal mastery, which Londoners may hear demonstrated this week, when Battistini visits us; the phrasing is delightfully smooth, the rhythm firmly elastic, the tone graded and coloured as of a stringed instrument.

I confess to not being moved at all by Tetrizzini's singing of "Ah! non giunge uman pensiero," from Bellini's "La Sonnambula." Possibly I am spoiled for all these purely technical things by the Galli-Curci records, as which I can conceive nothing so perfect. There is something marvellous in all such pyrotechnical displays, but Tetrizzini's tone seems to me poor enough, far less excellent than that of several less well advertised sopranos.

ANDANTE.

PERSONAL AND GENERAL.

To-Day.

May 4 (New Style).
April 21 (Old Style).
Ramadan 7, 1340 A.H. of the Moslem Calendar.
Ayar 6, 5682 of the Jewish Calendar.

Sir Herbert Samuel, High Commissioner of Palestine has arrived in England.

For reasons of health the Marquess Curzon left town this week for the seaside.

M. Benesh, Secretary to the Czecho-Slovak Legation, left London last week for Prague.

Sir Dhunjibhoy Bomanji has taken his departure from town for Paris.

The Greek Chargé d'Affaires and Mme. Rizo Rangabé have returned to town from Genoa.

The Afghan Minister, Abdul Hadi Khan, has left London to make a short visit to Paris.

Mr. R. Storrs, District Governor of Jerusalem, is coming home and is expected to arrive in England in the course of this week.

Prince Christopher of Greece, brother of King Constantine accompanied by his wife left Cannes on April 29 for Paris.

Major-General the Hon. John and Lady Isobel Gathorne-Hardy and Miss Gathorne-Hardy have returned to 17, Radnor Place, from Egypt.

Major-General Sir Charles Townshend has notified his intention not to contest his seat for the Wrekin Division of Shropshire at the next General Election.

Colonel de l'Etat-Major Georges Ostitch, Military Attaché at the Legation of the Kingdom of the Serbs, Croats, and Slovenes, has left town for Belgrade on leave.

King Alexander of Serbia arrived in Paris on April 30 from Belgrade. His Majesty's visit is of a purely private character it is understood and he is travelling strictly incognito.

The engagement is announced between John Keith Wallace Arden, of Rossett, Ceylon, and Froxfield, Hants, and Alice Joyce Liberty, elder daughter of the late R. D. Vernon, J.P., of High Wycombe, Bucks, and Mrs. Vernon, of The Gables, Nuwara Eliya Ceylon.

The engagement is announced between Lieutenant (E) James Breaks, R.N., second son of the late Captain J. Breaks and Mrs. Breaks, Rochester, Newlands, and Phyllis Hobbs, younger daughter of Mr. and Mrs. H. Hobbs, of Bournemouth and India.

The engagement is announced between Jack Ross Gifford, M.C., R.F.A., only son of Mr. and Mrs. G. H. Gifford, Lynch Cottage, Winchester, and Joyce Maud, youngest daughter of the late Percy Wansborough Stevens, barrister-at-law India, and of Mrs. Percy Stevens, Dunoolti, West Tarring, Worthing.

Lord Meston is delivering three Rhodes lectures on India's New Constitution at University College, London. The chair at the first lecture, which was due to be given yesterday, was taken by the Secretary of State for India Viscount Peel. The two remaining lectures are to be delivered at half-past five on May 10 and 17.

A marriage has been arranged between Captain Roland Le Fanu, M.C., the Leicestershire Regiment, youngest son of Henry Le Fanu, retired Indian Civil Service, and Mrs. Le Fanu, and Marguerite, eldest daughter of Mr. and Mrs. George J. Lumsden, Tarvit, Cupar, Fife.

The engagement is announced between Captain John Reginald Carter, O.B.E., Royal Corps of Signals, eldest son of the late Lieutenant-Colonel J. R. B. G. Carter, Indian Army, Bombay Political Department, and Mrs. J. R. B. G. Carter, of Mahi Kantha, Priory Avenue, Hastings, and Constance Madeleine, eldest daughter of Mr. and Mrs. C. A. Guy, of Upland, St. Helen's, Hastings.

The forty-second annual Burma Dinner will be held at Princes Galleries, Piccadilly, on June 1, at seven for 7.30 p.m. The Right Hon. Viscount Peel P.C., G.B.E., Secretary of State for India, will preside. Those proposing to attend are requested to send their names and addresses to the Hon. Secretary, Mr. Geo. O. Stiven, 6, Fenchurch Avenue, E.C. 3, from whom tickets (price £1 each, exclusive of wines) can be obtained. Early application for tickets will greatly facilitate the necessary arrangements.

The twenty-fourth anniversary of the birthday of the Shah of Persia, who upon his father's abdication was proclaimed King in 1909, was duly celebrated in London. The Minister here, Mirza Davood Khan, K.C.M.G., received from Major-General Sir John Hanbury-Williams (Marshal of the Diplomatic Corps) the customary message of felicitation from King George, and immediately telegraphed the full text to Paris, where the Shah is now staying. Throughout the day there were numerous callers at the Legation, 47, Bramham Gardens, and cards were left on behalf of many officers of State. The national tricolour of green, white and red was flown by all business houses that are connected with Persia. In the afternoon a reception was held by the Minister, and was largely attended by members of the Diplomatic Corps, representatives of the Persian Colony in London, and many English friends.

APPOINTMENT.

The Secretary for the Colonies has appointed Lord Stanley to be an additional Private Secretary (unpaid)

THRESHER & GLENNY.

INDIAN, TROPICAL & COLONIAL OUTFITTERS.

(Established 1755).

Qualified by long experience as specialists in outfitting for the Near and Far East, also make a feature of catering for the requirements of

VISITORS FROM OVERSEAS

particularly in tailoring, in which department a general excellence of materials and workmanship is allied to moderation in respect of prices conforming to the present call for economy.

Our system of recording measurements and details embodies every condition essential to the entire confidence of gentlemen wishing to replenish their kit whilst resident abroad.

W.C.2.

TELEPHONE CENTRAL 1209.

OBITUARY.

The death has occurred, at the age of ninety-one, of Lord Sinclair. He served with the 57th Foot in the Crimean War, taking part in the actions of Balaklava and Inkerman, was A.A.G. to the Forces on the Bosphorus, and saw service in the Indian Mutiny.

The death occurred recently of Colonel F. W. Begbie. Most of his military service was passed in India, where he served in the Chitral Campaign, 1895. During the European War he served, among other places, in Burma and with the Mesopotamia Field Force.

The death has occurred, at the age of twenty-five, of Captain L. C. Carus-Wilson, M.C. His death was caused by an illness contracted on service in the Near East. He recently represented the War Office during the installation at Cairo of the first link of the Imperial Wireless chain.

The death has occurred of Colonel Sir James Hayes-Sadler, K.C.M.G., C.B. He was an experienced administrator, whose spheres of service included India, the Persian Gulf, and Somaliland. His many appointments number: in 1881, assistant agent to the Governor-General of Baroda; in 1891, Political Agent with the Emir of Afghanistan; in 1892, Political Agent and Consul in Muscat; at 1893, Acting-President and Consul-General, Persian Gulf; and in 1898, Political Agent and Consul in Somaliland Protectorate. After his retirement he actively supported the British Red Crescent Fund, which was formed to relieve sufferers from the Balkan Wars.

Our Cairo Correspondent writes (April 22):—Widespread regret has been expressed at the tragic death of Mr. Arthur Bacot, F.E.C., which has occurred as a result of an attack of typhus fever. Mr. Bacot, who had a world-wide reputation, particularly in connection with insect-borne disease research work, came out to Egypt in February last by arrangement with the Lister Institute of Preventive Medicine of which he was the Entomologist in order to carry out, with Dr. Arkwright, Bacteriologist of the same Institution, an investigation into the method by which human beings become infected with typhus by the louse. They had been busy since the beginning of February on a wonderful series of experiments which promised to produce invaluable results, when about three weeks ago Mr. Bacot developed a temperature and it was found that he was suffering from typhus. The attack proved most severe and within a fortnight ended fatally. In the meantime his colleague, Dr. Arkwright, also developed typhus, but although the attack in his case was also severe he is now out of danger, and it is confidently expected that he will recover. Mr. Bacot had been engaged for many years on the investigation of plague and typhus and had gained a knowledge and experience of the work probably without equal in the world. Certainly he was one of the leading experts on the subject and his death is a terrible loss to medical research.

THE P. E. F.

The April *Quarterly Statement* of the Palestine Exploration Fund contains a good portrait of the late Mr. Walter Morrison and a grateful tribute to his memory. Professor John Garstang contributes a useful article on "Eighteen Months' Work of the Department of Antiquities for Palestine"; and there are reprinted from the *Expository Times* portions of an article on "Thirty Years of Palestine Exploration" by Professor Q. A. S. Macalister. The Rev. M. H. Segal writes on "David's War against the Philistines"; Mr. E. J. Pilcher on a "Bronze Weight from Petra"; and Asad Rustum on "New Traces of the Old Lebanon Forest." The "Notes and News" give interesting particulars of excavations and other subjects; and there is a further instalment of Philip Baldensperger's "The Immovable East."

NEWS IN BRIEF.

It is stated that the Egyptian Government has decided to negotiate an extradition treaty with Palestine.

At a representative meeting of Europeans and Indians held in Calcutta recently it was decided to erect a statue of Lord Ronaldshay, in commemoration of his Governorship of Bengal.

Hazrat Mohani, who presided over the Moslem League's meeting in December and was arrested last week in Cawnpore, has been committed for trial on a charge of sedition, and will be tried on May 5.

News has reached Constantinople that the insurrection in Georgia against the Reds is spreading and that the insurgents have gained considerable successes. The Reds are, however, being reinforced.

The Constantinople correspondent of *The Times* reports that with two exceptions the Turkish Press comments on the news of the murder of Beha-ed-Din Shakir and Jemal Azmy at Berlin in the same fashion that Talaat's death was commented upon. Both victims are described as martyrs to the faith.

OPHTHALMIA IN PALESTINE.

The Order of St. John of Jerusalem in England has for some years maintained an ophthalmic hospital in Jerusalem. Last year there were 1,312 in-patients and 12,100 new out-patients with 62,237 consultations and 3,001 operations. There is, unfortunately, no lessening of contagious eye disease in Palestine. Not until education spreads to the children and the villages and homes are properly planned and constructed and the duty of personal cleanliness appreciated can a beginning of the prevention of these diseases be expected. Meanwhile (the Warden states) the actuality of an appalling amount of eye disease remains. The Order of St. John spent £3,646 in the hospital last year, being £1,893 more than the income received.

GENOA.

Whatever may be the merits of the new diplomacy, its methods tend even less at Genoa than in other scenes of its peripatetic activities since the war to soothe the nerves of a distraught world. Never before were there so many trained observers on the spot; even the editors of important newspapers having thought it expedient to proceed there in person and act as their own "special correspondents," and never before was there such an output of news from official and semi-official and unofficial sources. But never before was it more difficult to evolve out of this shifting and highly coloured kaleidoscope any intelligible picture of what has happened or is happening, and still less of what is likely to happen. Our indomitable Prime Minister is, we are told by his devoted admirers, riding the tempest with unerring courage and perspicacity. His critics declare that he is exhausting one desperate device after the other to drive his waterlogged ship through the waves that are submerging him. The truth, we imagine, lies between these two versions. From the very start, his speech in the House of Commons when he pleaded for a viaticum in the shape of a somewhat jejune vote of confidence lacked not only the precision but the robust faith which so often inspired him during the war, because it lacked the solid foundation upon which his faith, and ours, then rested, *viz.*, the assured cooperation of trusted Allies all equally determined to reach the one appointed goal of a common victory. His great driving power could then be relentlessly applied to that one purpose. But when he was addressing Parliament before he departed for Genoa, he left upon the minds of many of his hearers the impression that, whilst he realised perhaps more clearly than other European statesmen the urgent need for economic reconstruction as the only or the surest avenue to the restoration of real peace between the war-weary nations of the world, he was inclined still to rely mainly upon his own driving-power for the fulfilment of what was rather a vision than a considered plan of campaign. He forgot that mere driving power, splendidly effective in war-time and in cooperation with willing Allies, is an important but by no means all-sufficing quality in complicated negotiations conducted under less compelling pressure than that of actual war, not only between Allies whose views as to reconstruction and the restoration of real peace conditions have come to vary very widely, but also with ex-enemy States whose standpoint is, of course, essentially different, not to speak of neutral States that are again on a different plane, and, last but not least, such an incalculable quantity as Soviet Russia.

Hence the appearance of unreality which the extraordinary series of thrills and shocks recorded day after day from Genoa presents to the observer who is sufficiently remote from the seismic zone not to feel the ground actually rocking under his feet, as Mr. Lloyd George tells us he does. We share his desire to see normal relations restored with Germany if she shows any genuine disposition to discharge within reasonable limits her liabilities for the enormous evil she did in the war, and especially for the wanton devastation of Northern France and Belgium, and we agree with him that, however abominable the present régime in Russia, some *modus vivendi* should be found which might at least reopen the door to ordinary business relations with the Russian people, who cannot be allowed

to perish for the sins of their rulers without doing grave mischief to the whole world, including ourselves. But when Mr. Lloyd George affects to see in the Treaty of Rapallo with its unpleasantly close resemblance to an inverted Treaty of Brest-Litovsk little or nothing more objectionable than a breach of the diplomatic proprieties peculiar to Genoa, we find it rather difficult to take very seriously his blood-curdling assurances that if we do not all promptly follow suit and embrace Germany and Russia as they have just embraced each other, Europe will be speedily converted once more into a ghastly shambles. This is surely a misapplication to mere rhetorical purposes of a driving power which can only be effective when it has something more than words behind it. It betrays at least a loss of that sense of perspective which is essential to statesmanship. An angry Germany and a hungry Russia may constitute a dangerous combination. But we and our Allies have faced still more dangerous combinations in the past, and we did not face them merely with S.O.S. signals, nor even with pacts to be grudgingly entered into between States driven into them, it would seem in a fit of general bewilderment rather than by any conviction of their practical utility. We give the Prime Minister credit for having something more substantial in his mind than his language, fluctuating repeatedly between almost lighthearted optimism and the gloomiest pessimism, has hitherto conveyed. But, with all due deference, we are left at a loss to know what he really means. Take for instance his reference to the absence of America from Genoa. It is obviously a very grievous loss to such a gathering as that over which Mr. Lloyd George actually presides. Some have from the first doubted whether that gathering was not foredoomed to failure from the moment when the United States announced that they would have no part or lot in it. But Mr. Lloyd George has known all along that America would not go to Genoa, and that one of the reasons for which she refused to go there was that she declined to have anything to do with Soviet Russia. It may be a good or a bad reason. It is one that Mr. Lloyd George cannot have forgotten and cannot reasonably affect to ignore when he is pressing for the very thing which the United States declared they would on no account do. Equally Mr. Lloyd George knew that France was only following him to Genoa with the utmost reluctance and on conditions even more clearly set forth than the reasons given by America for her abstention. Is it not somewhat illogical on his part to suggest that France is queering his pitch because she declines to abate those conditions now that she has given way to his solicitations to the extent at least of following him to Genoa?

It is these curious *non sequiturs* that puzzle the plain Englishman. There must be some explanation to them locked away for the present in the Prime Minister's bosom. But until it is forthcoming we can only watch with a certain amount of scepticism the melodramatic developments of this singularly staged piece. There are elements of comedy in it when we hear of the Archbishop of Genoa exchanging menus with M. Tchitcherin and of kid-gloved Bolsheviks with little red flags in their buttonholes paying compliments to the gallant scion of the House of Savoy on board a battleship named Dante Alighieri, and we trust that they will not make room before the whole thing is over for the more tragic elements which Mr. Lloyd George in his Cassandra-like mood foresees. But there is something disconcerting in a succession of crises, each pregnant, it would seem, with some fresh ultimatum, even though watered down apparently as soon as it has been conceived. It is hardly our conception of a pan-eirenikon, or we might doubt whether it would not have been wiser to go on jogging along, even in the extremely uncomfortable conditions which obtained before Genoa rather than to try to force the pace in a way that suggests: "*Embrasse-moi ou je te tue*" as the most appropriate motto for a great international feast of love. We are disposed nevertheless to believe that, if the nations are not yet in a mood to embrace one another, none of them is in a position to start again so soon on the ruinous

game of killing one another. There is an old Italian saying about Genoa which it would not perhaps be courteous to recall when she is doing her best to entertain hospitably the innumerable representatives of countless nations. But it is to the effect that everything which she produces is abnormal. In the long course of her proud history she has never perhaps produced anything quite so abnormal as the Conference which will henceforth be associated for better or for worse with her name. We still hope that the Conference will at any rate prove abnormal in this sense also that it will end by having generated a vast amount of ugly smoke but no fire.

TRAVEL NOTES.

EGYPT AND THE SUDAN.

The Personal Element.

Far too small a proportion of the people who travel to Egypt—or for the matter of that, live there—make their way to the Sudan. Luxor and Assuan provide sufficiently attractive goals to satisfy the great majority of those who are not content with Cairo alone, and these two places have the advantage in regard to fares of being considerably cheaper. Even when considerations of expense do not enter into the question, a journey southwards by Nile steamer has so much to commend it, and sounds so much pleasanter than the prospect of travelling by rail to Khartoum, that again others make the mistake of cutting out the Sudan from their programme. It is unfortunate that it should be so. A visit to the Sudan, at least for Britons, has the double

KHARTOUM: The Palace.

attraction of enabling them to combine all the pleasures of Egypt with the stimulus that comes from the contemplation of what their countrymen have achieved and are achieving in regard to a little known, but not unimportant, section of the white man's burden.

— o —

Great Britain has every reason to be proud of her record in Egypt; but the visitor goes there to see the greatness of past ages and to revel in the luxurious climate, not to contemplate the moral and material progress achieved under British supervision. In the Sudan one is more conscious of studying a chapter of contemporary history; we can watch the daily advance made in the work of bringing prosperity to a country that under a period of misrule, not many years distant, was gradually being converted into a land of desolation and death.

— o —

Civil Services.

This distinction thus drawn by visitors between the two countries is reflected in the attitude of the officials. It is the exception in Egypt to hear "shop" discussed with enthusiasm or even with keen interest. Work is associated with office attendance, and when the office is

left, relief is sought from its questions and all that immediately concerns the country as a whole. Not so in the Sudan. There administrative problems, under whatever category they fall, seem to prove more absorbing, and no conventional diffidence is felt in discussing them. The British official in Egypt can urge in his defence that his work is no longer of the creative order as is that of his colleagues in the Sudan; for the most part he acts in a corrective capacity—at best as an adviser. *Sic vos non vobis* is the motto that he applies to his own case. The pride of pioneer work associated with the days of Cromer has been lost, and some of the drawbacks of bureaucracy—apathy, red-tape, inaccessibility—have been allowed to creep in. To this circumstance may be due in no small degree delinquencies attaching to the Egyptian Civil Service. Where the interest of their superiors has become blunted, minor officials lacking the same fine traditions find full scope for Oriental methods. If questions that should engage from the first the personal attention of heads of departments have to be submitted through their subordinates, it is almost inevitable that priority should acquire a monetary value.

The Egyptian State Railways.

Fortunately there are exceptions, even though their total effect is to prove the rule. No department offers a more striking contrast to the state of affairs described than the Egyptian State Railways. Here we have the patriarchal system at its best, and radiating throughout the whole service, with the result that the Egyptian subordinate is acquitting himself in, for him, possibly the hardest sphere with far more credit than he can

ON THE NILE. (The effect of the Assuan Dam is felt over 100 miles up the Nile. Note the doomed palms on the right.)

claim in departments where there has not been the same stimulus, and personal direction. Of the 30,000 railway personnel, only 243 are non-Egyptian. Naturally the higher posts are held by British officials; but there are now Egyptian Assistant Traffic Managers, the whole signalling staff is Egyptian, and in the Cairo Railway Works out of a staff of between three and four thousand less than sixty are non-Egyptian.

— o —

A Nationalist deputation once waited on the Railway Administration to call attention to the reprehensible way in which foreigners were staffing the railways to the exclusion of Egyptians. Before the delegates warmed to their task they were invited to pay a visit to the workshops. On their return their mission remained unfulfilled; they had discovered that the grievance that had stirred their patriotic souls so deeply had no foundation in fact.

— o —

Now that the Egyptians are gaining the measure of independence to which they aspire, they will do well to resist all temptation to bureaucratize the State Railways. Let them retain the existing patriarchal system that is working so well under the present General Manager, Brigadier-General R. H. D. Blakeney, C.B., D.S.O., R.E., and continue the traditions of which he has proved

himself so conscientious an exponent. If the railway system is to be run effectively and in the interests of the State, and is not to be subordinated to the political game, its working must be kept out of the reach of possible Ministerial ineptitude.

— o —

At the Cairo Railway Works locomotive engines are not merely put together and repaired, but can now be entirely remodelled; big bogey passenger coaches are constructed and all the necessary iron foundry work is done. There must be few railways in the world at which stones cannot be thrown; but there is little fault, if any, to be found with the running of the Egyptian Railways. In comfort they may have to rank second to the Sudan system in which a simpler organisation throws less responsibility on the individual native official. If only

CAIRO: Mosque Tomb of Tewfik Pasha.

the rates for passengers and goods could be reduced the Railways would deservedly rank high in public esteem. Charges are, without doubt, excessive, at a period when trade is bad, and the Railway Administration would certainly reduce them, if it had a free hand. But it is handicapped by an enormous stock of coal—enough perhaps for two years yet—bought for it at top prices by the Government, which hesitates to write off a bad investment.

— o —

There is one thing to remember about the Egyptian State Railways; they are actuated by a desire to study the comfort and supply the wants of passengers. If they seem to fail at any point, the fault will be due to the circumstances or to the material with which they have to work, rather than to any absence of good will. Special trains or coaches are supplied more readily than, probably, on any other system. They may have to be asked for, and passengers approaching Egypt should see to it that they do not lack the facilities offered through the failure of the steamship company to give due warning of their requirements. At Port Said it is a great convenience to have a special train waiting at the quay, instead of having to transfer oneself and one's luggage to the station, with possibly a long wait before the ordinary train starts. Too often, however, it is the remissness of the steamship authorities that causes passengers to miss this boon.

JERUSALEM IMPROVEMENTS.

Mr. E. Keith-Roach, First Assistant Civil Secretary of the Palestine Government, is going to America next month for a lecture tour in the interests of the Pro-Jerusalem Society. This Society was founded in 1918 by the Military Governor for the purpose of protecting the antiquities and increasing the amenities of Jerusalem and the surrounding district, and of giving encouragement to arts, handicrafts, and industries in consonance with its general objects. Among the undertakings which the Society has already accomplished are the reconstruction of the Suk Kattanin, one of the finest mediaeval bazaars in the East; the clearing of the Citadel of Jerusalem and the city walls; the repair of the Dome of the Rock; and the creation of a park and garden system.

PRESS ON THE NEAR EAST.

In consequence of queries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Great Britain and the East.

In the *English Review* for April, Mr. Austin Harrison has a picturesque article called "Theodora's Lions." He likens Theodora in her difficulties after she had been found out to the Prime Minister. Without mincing matters he describes what he considers to be the political plight of the Premier, attributing much of the trouble to the way in which the East has been handled:—

The East is again the Scheherazade of our Empire. Flung to the wolves for the divulgence of the Viceroy's telegram, Mr. Montagu has performed one great service in that the public now know something about India; and also something about the startling feeling existing in the Moslem world relating to our Philhellenic dismembership of the Turkish or Caliphian Empire, which, after all, has a soul: another lion. Most of us never dreamt of this one, but to find him actually demanding the modification of the Treaty of Sévres as a principle does seem, not unnaturally, to good Coalitionists pretty cool and, after Amritsar, indelicate. No wonder that Lord Curzon was angry. It upsets the Calcutta "sweep." That India should ask us to do our duty by Islam exceeds all limits, and so exit Mr. Montagu and enter Gandhi the "Saint," in gaol. India has so long been a forbidden subject that we generally stop at Macaulay's essay; yet as the result of the war India, the East, has blazoned forth into significance, cutting across our European delimitation of the map, flashing from East to West a strange and new-begotten—Christianity. We sense it in the person of Tagore. It burns in the exiguous frame of Gandhi. It is, as it were, a new revelation permeating an unbelieving and cynical West, rising as in olden times from the East which never dies. But we must leave ethics severely alone; we are not yet re-attuned to such callings. It is the political or conscious East that concerns us here. And this incredible fact stands out. The war has left us with the ageless problem of the East, and once more we are face to face with Islam. Such is the significance of Turkey through our pro-Grecian policy of castration. Such is the significance of India's unrest, within the Empire. Such is the call of the East as it clashes with the now hopeless materialistic policies of Europe strangling and suffocating herself on the fruits and hatreds of war.

Over Greece, we backed the wrong horse. Captivated by M. Venizelos, the Premier launched out on his Philhellenic transmaritime adventure which has lodged Greece in the new annexation called Ionia and got us into considerable trouble with France over the old Crimean question of Constantinople. We never seem to have considered Moslem and that we are the guardians of Eastern evolution. We never seem to have considered that so long as Russia was imperial she was Turkey's enemy, but that with Russia overthrown, in defeat she might easily become Turkey's friend; and so Constantinople is once more Europe's Mediterranean problem. Degrade the "Caliph of Stamboul," and the East is involved. That means our Empire, for we are the "white elephants" of Oriental consent. This is not diplomacy, it is philosophy; it is the cultural antinomy of the East and West, and we stand before a great historic anti-climax. There are lions by the Ionian Sea to-day in consequence. Asia Minor for Turkey is the cry—and Constantinople. No wonder the Die-hards emptied various bottles of champagne when Mr. Montagu missed his tiger.

Hitherto the problem of Turkey has always been her buffeting-basis with regard to Russia, the prize being Constantinople, and so on the policy of the balance of power the "Sick Man" has been Europe's nightingale. It was the policy of Pitt, of Beaconsfield, of the Congress of Berlin; and against it was Fox, who leaned towards Russia, and subsequently Gladstone and Anglican Church Liberalism, which after 1918 saw in the Cathedral of St. Sophia a basis of union with Greek Orthodoxy—hence a certain denominational enthusiasm for the Venizelos Greek expansionism, which would assign the gates of the Bosphorus to Greece. The Montagu-Reading policy, more deft, more spacious, reverted to Disraeli. As Jews, they understand Islam; their instincts are pro-Allah, not pro-Russian, hence their Indian policy, which has culminated in the present crisis. Hence, too, the difficulty with France, who, more perceptive than the pro-Greek Premier, saw in Constantinople an invaluable bait to offer a regenerated Russia, friendship with whom has long been, as we all know, a cardinal axiom of French diplomacy. Her clandestine agreement with Turkey is the result; thus France breaks her own Treaty of Sèvres.

And so once more the liquidation of Turkey is Europe's difficulty. If the problem of Turkey is Asia Minor, Constantinople will remain the central aim of geographic Russia. That is why we refused to "liberate" Northern Caucasia—Koltchak and Denikin making the reservation of that territory conditional. But we are in a special difficulty because Turkey is the gateway to the East and our Empire is socketed on Islam; we cannot afford to make historical enemies of both Russia and Asia, and now less than ever, with the rise of Eastern peoples into consciousness, as we to-day witness in Egypt, and India, and that is why the French, with considerable astuteness, signed up behind our backs with Turkey much as the Kaiser did some years before the war, when he acclaimed Mahomet as his spiritual "friend."

He points out that a re-naturalized Russia will certainly treat as Alsace-Lorraines "the excisions so bonnily made out of historical Muscovy"—Poland, Bessarabia, the Caucasus and so on—and continues:—

That is where Turkey enters the European Concert with her peculiar geographical position, her deathless Caliph, her martial idiosyncrasies, and her problem is: To be or not to be? In our treaties we have committed every conceivable mistake. We have castrated Russia who saved France in the War over and over again; we have castrated Turkey, thereby stirring up the embers of religious fire in Islam, the reverberations of which are rocking the cornerstones of our Empire. And why? To please M. Venizelos; to satisfy some six million Greeks who, like Poland, fancy themselves as the young lions of New Europe, and but for public alarm at our national expenditure we should no doubt have financed Constantine's Anatolian war.

Our "young lions" may think that Tank control is the proper way, but the public which has to pay the cost, and all men with any vision, see only disaster in this setting-up of weak, vainglorious peoples at the expense of powerful nations who have been temporarily crushed by war; and the truth is that both over Turkey and Russia we have stalked into

a predicament calculated to plunge all Europe into a cycle of war at no very distant date. The French quickly realised our stupidity with our New Jerusalem, our Ionian Empire, our Arab Protectorates, our Constantinople-Philhellenic navalism, and cut right across us, and now little Greece, sinking also into "paper" inflation, is at a loss how to carry on. What we did at Versailles was to amputate all the big Powers in order to set up weak Powers armed to the teeth, thereby ensuring their inevitable bankruptcy, as to-day we can see by glancing at the exchange quotations of Poland, Roumania, Greece, Czecho-Slovakia, etc., all of whom know that the day that they disarm the balance of real, as distinct from "paper," power will move inexorably against them.

The Turks, who gamely refused to sign the Treaty of Sèvres, understand their position, and now ask us to give them back Asia Minor under some form of League of Nations rights, and with this they include Thrace. Here we have an historic issue. Are we to bottle up Russia as before 1914? Are we to drive the Turk out of Europe from Homeric or Levantine sentimentalism? Or are we, taking the long view, to seek accommodation with some prospect of averting the next great war? Were the League of Nations a true tribunal, the fruit of example, and vested with international authority, this Russo-Turkish problem might be referred to such a body for guidance; but, constituted as it is under French tuition, it would seem mere futility to anticipate any finding different from that which assigned Silesia to Poland at the behests of the Quai d'Orsay. Spring is at hand, and unless something is done the Greeks may suffer defeat in Anatolia and may, especially as France is acting in collusion with Turkey, be driven ignominiously into the sea. There is only one wise course, and it is to revise the Treaty of Sèvres, lock, stock and barrel, and leave the Turk his bag and baggage in Asia Minor, unless under a Tory Administration we want to have an Ireland in Egypt and India with what the champagne club would style "firm" government.

Palestine.

In *The Times* of April 26 is an article upon the "Burden of Palestine," in which it is stated that the invidious position of the Jews in Palestine is weakened by "the exceptional privileges granted to the Zionist Commission." It continues:—

We have said before that we sympathize with the spiritual aspirations of the Zionists. There is something in them that is profoundly akin to the longing of many wanderers upon the earth who here have no abiding city but who seek one to come. For that very reason we regret that Zionism has been narrowed down to a political issue. For Jews nurtured in their religious tradition Palestine is a symbol and a dream. It is something deeper and broader than the little corner of the Levant which, with its Arab population, has become a modern political problem dovetailed into British Imperial policy. It is distressing that in the Zionist movement the stirring aspiration towards an ever-distant ideal has been linked up with a narrow local issue. What the multitude of Jews desire is not the little town now dominated by the Mosque of Omar, but

a memory that has become refined to an endless hope in the Jerusalem that is above and is free, Jerusalem the golden, whose halls stand all jubilant with song. The practical problem of Palestine, for the solution of which this country is now responsible, is something entirely different from the spiritual problem of Jewry, which in political Zionism has been materialized, tied down to time and place, and so brought into wholly unnecessary conflict with local claims and instincts. Of these local claims and instincts this country must be sedulously considerate, in virtue of its mandate over Palestine, and also in view of the reverberations of Palestinian policy in the wider Arab-speaking and Islamic world. For this reason a way out of the present dilemma must be sought in the elimination of political Zionism in Palestine and in the abolition of those political privileges of the Zionist Commission which make it appear as a secondary Government and encourage the belief that its action heralds the domination of an immigrant minority. The whole problem must be reduced to modern and practical dimensions and solved by the tried method of impartial British administration. Then, and only then, will it be possible to remove the ever-present fear of complications, which may impose a heavy burden upon the British people.

"Paris and the Near East," by H. Charles Woods; and "The Serbo-Albanian Frontier," by Captain H. E. Goad, in the *Fortnightly Review* (May).

MULE versus MOTOR IN PERSIA.

A letter received recently in London from Teheran gives some particulars of the state of the roads in northern Persia during the past winter. The writer reports that one English traveller who left Baghdad for Teheran towards the end of November spent two days on the journey between Tairuk and Kermanshah, which is usually done in from seven to nine hours. The very muddy and soft state of the road necessitated the car's running on high gear in many places. A second traveller, who left a month later—a few days before Christmas—took eight days between Tairuk and Kermanshah, and was compelled to abandon his car at the latter place and continue his journey by carriage. A few days later two other European travellers motoring over the same road took seven days to reach Kermanshah. After leaving that point and when at the top of the Assadabad Pass they ran into a blizzard, and had to take shelter in a hut for three days; while the snow, accumulating on the road, completely covered their car. At the end of three days they were rescued from the hut by a party sent out from Hamadan with mules; but the car had to stay where it was until the track was sufficiently beaten down for it to pass over to Hamadan. These two travellers also continued their journey to Teheran by carriage.

The letter goes on to say that in the first two or three weeks in February the weather had been very cold at Teheran and the ground was covered with snow. In that period there had been two very heavy falls of snow, one leaving over a foot in depth on the ground; and, the writer adds, in such circumstances it is safe to conclude that the Assadabad and Avegh passes are almost impassable.

In such conditions it seems that the old-fashioned mule can hold its own with its modern rival. The explanation lies no doubt in the fact that since the departure of the British military authorities the roads have not been kept clear of snow, and that owing to the general lack of care their surfaces are becoming extremely bad. The Persian road authorities, indeed, seem to do little or nothing for their preservation, although they collect very high tolls—600 krans on each motor car between Teheran and Quaritu. The road, it need hardly be added, was constructed by the British Army, at a cost of about £1,500,000.

THE SUEZ CANAL.

At the first of the staff lectures of the summer term at the French Institute, Cromwell Gardens, last week, M. Vieille, Professor at the Institute, lectured on the Suez Canal and its creator, Ferdinand de Lesseps. The lecturer said that the critical moment in de Lesseps's life was his appointment as French Vice-Consul at Alexandria. It was chance that first turned his thoughts to the undertaking that made him famous. A case of cholera on board caused his ship to be put into quarantine in Alexandria harbour. De Lesseps was bored with his compulsory idleness, and read with eagerness some volumes of an enormous work written by the professors who accompanied Napoleon on his Egyptian expedition. He was particularly attracted to "The Canal of the Two Seas." From this moment de Lesseps dreamed continually of the canal which should unite the Mediterranean with the Red Sea. It took 23 years for his dream to come true. In due course de Lesseps returned to France and settled on the land as a gentleman farmer. He never forgot the canal, and when he heard that the Khedive Mohammed Ali was dead and that Said, his son, had succeeded, he knew that his hour had struck. Said had long been a friend of his, and Said consented to the plan, should his generals view it favourably. The generals were hardly expert engineers, but they appreciated a fine horseman, so when de Lesseps on horseback cleared a dangerous high wall they forthwith approved his schemes. Egypt now supported de Lesseps, but he had another formidable adversary to subdue—the British Government, inspired by the redoubtable Lord Palmerston, who was jealous at the idea of the installation of a French company on the Suez isthmus. Lord Stratford, at Constantinople, was bidden to do all he could to obstruct the plan, but happily failed. In November, 1869, the canal was completed.

A YUGOSLAV VIOLINIST.

The Yugoslav Press Bureau states that M. Zlatko Balokovitch, the great Yugoslav violinist, is at present in London, where he hopes shortly to appear before the British public. He is also making preparations for an extensive tour in the United States. He recently scored a remarkable success in a Church concert held in the Cathedral at Zagreb and arranged by his concert-director Norbert Dunkel and attended by some 8,000 persons.

King Fuad is to be asked by a deputation from the Munifia Province to direct the immediate repatriation of Zaghloul Pasha from Seychelles, owing to the effect of the climate on his health.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

A Commonplace Budget.

Much behind its time, like the spring weather that we are hoping for, the Budget is with us at last. It contained no surprises. The semi-official forecast, which appeared last week, was remarkably inspired as is usually the case on these occasions. The income tax is reduced by a shilling, there are slight reductions in the postal and telephone charges, and *inter alia* a reduction of the duty on tea as a sop presumably to the very few among us who are not amenable to the high income tax. In short a somewhat featureless Budget, and one that is not likely to call forth paeans of admiration from any section for it is recognized only too well that the reductions in taxation represent the very least the Government could have offered, and that, had the recommendations of the Geddes Committee been carried out in their entirety, there could well have been a reduction of two shillings or more in the income tax. As it is the the present reductions are not justified by economies, and are made only at the expense of the sinking fund.

Turkish Reparations.

The long-delayed settlement of the claims of British subjects against Turkey has very naturally given rise to much dissatisfaction which found expression this week in a meeting of those interested at the offices of the Association of British Chambers of Commerce. It is now three and a half years since the Armistice, and so far it would appear that no steps have been taken to assist them to obtain compensation. The claimants, it must be remembered, had a very great deal to do before the war with the development of British trade with the Levant (which, incidentally, according to the latest returns, now makes a very poor showing), and their activities have been crippled since the Armistice as a result of their financial position. In this connection it is worth quoting the words of Viscount St. Davids at the recent meeting of the Smyrna-Aidin Railway. "You can never begin to build up English trade in Turkey again until you reimburse and compensate the unfortunate English merchants, who in the old days have done so much to push British trade and whose services must be utilised in the future if that trade is to be revived."

Eastern Bill Rates.

For some time it has been anticipated that there would be a reduction in the rate of interest on bills charged by the Eastern Banks. For a period 8 per cent. was charged, and this was reduced some months ago to 7 per cent., and now there is a further reduction to 6 per cent. This decision is very welcome to the business community as far as it goes, but it does not go far enough as the old rates of 8 and 7 % are being maintained as regards old business. It scarcely needs pointing out that this is an injustice to the drawer of the bills to which this applies, who have to bear the loss while being in no way responsible for the delay in payment. Admittedly the trade position in the East has been very critical and still is

in a more or less serious state, but it has surely improved sufficiently for it to be possible for the banks to contemplate a flat rate for bills.

The Crisis at Genoa.

The position at Genoa is much less hopeful than when I wrote a week ago. Then it seemed almost certain that an agreement would ultimately be reached, but events since then make it no very arduous task to contemplate the opposite eventuality. When the prospect of a conference was mooted no one thought it could have any adverse effects though few were optimistic. It is now considered, however, that failure at Genoa will be a very real disaster, and this feeling found its interpretation on the Stock Exchange last week when a distinctly nervous feeling developed. Genoa has, in short, come to be the crux of reconstruction, with success meaning the rapid development of trade and the solution of the problem of the exchanges and failure perhaps the first step on the progress to a greater Armageddon. If Mr. Lloyd George leaves Genoa unsuccessful it will be because the project was too ambitious. A conference without Russia might have been like Hamlet without the Prince of Denmark, but it would have been certain of achieving something, and would have paved the way to an agreement with Russia. As it is we can only hope that even now it will be found possible to reach an understanding.

Egyptian Cotton.

The decision of the Egyptian Government to support the cotton market is not unexpected for there had been indications for some time that something of the kind might be attempted. Those who have been in favour of the purchase of cotton by the Government have no doubt reinforced their arguments by the aid of precedents, but it may be pointed out that conditions now and when cotton was previously purchased are very different. If the Government's operations are to be severely limited then no anxiety need be felt, but if there is any question of support to the market on an extensive scale then there will be justifiable cause for apprehension, for the course of cotton is very uncertain and it would take an amount equal to Egypt's revenue during the current year to "corner" the market. Developments will be watched with considerable interest,

as the amount of prudence that marks the intervention in the market will be taken as affording an indication of the nature of the Government's future financial policy.

Telegraph Company's Concessions.

At the meeting of the Indo-European Telegraph Company the chairman, Mr. J. Herbert Tritton, was able to give encouraging news regarding the progress made towards restoring the company's service which has been interrupted since July, 1914. He announced that the company had been advised by the Russian Department of Posts and Telegraphs that their concession from the Moscow Government was signed in April. This concession covers the whole territory traversed by the company's line from the Polish frontier on the West to the Persian frontier on the east. Mr. Tritton stated that the condition of the company's line is more satisfactory than could perhaps have been expected. "We are informed from a reliable source," he stated, "that the line is workable for a stretch of over 200 miles north-west of Odessa, whilst East of Odessa a similar state of affairs exists for 300 miles into the Crimea. Beyond the Straits of Kertch the line is in working order between Ekaterinodar and Tiflis. Between Tiflis and Erivan there is a short section where the repairs have not yet been completed. The section Erivan-Djoulfa, on the Russo-Persian frontier, has undergone repair and is now in working order, as is also the company's Persian section, Djoulfa to Teheran."

Commentator.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated April 24 :—Condition of Crops. April 19—In North-East United Provinces, outturn of wheat is not quite as good as expected due partly to early hot winds and to rust from subsequent rains. April 21—In Bengal more rain urgently required. April 24—In Assam, prospects of tea and outturn of spring rice fair. Local rain in Tenasserim and Malabar on April 18, in Assam, Konkan, Malabar, and South-East Madras on April 19, in Malabar and South-East Madras on April 20, in Assam and Malabar on April 21, in Assam, and Madras Deccan on April 22 and 23. Local rain also in coffee districts of Mysore on April 20, and of Coorg on April 19, 21 to 23. Markets. Cotton.—Bombay cotton market steady. Fine M.G. Oomras, Rs. 380 May, Rs. 395 July. Bombay cotton arrivals from September 1, 1921, to April 16, 1922, were 2,417,000 bales as compared with 1,740,000 bales during the same period of the last year. Piece-goods.—Bombay imported piece-goods market barely steady. Wholesale enquiries are not encouraging, but good retail enquiries in most styles. Prints generally quiet : local goods moving well. April 19—Delhi piece-goods market discouraging owing to stringency in money market. Jute.—April 21—Calcutta jute market strong and sellers very reserved. April 22—Hessians and Heavies quiet but steady. Shellac.—April 24—T.N. Rs. 185.

No change in bank rates.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:

The Bank undertakes the warehousing and sale of goods consigned

NEED FOR AN ALL-INDIA GAUGE POLICY.

Mr. F. G. Royal-Dawson, M.Inst., C.E., in the course of a paper before the Indian Section of the Royal Society of Arts on April 28 on "The need for an All-India Gauge Policy," said when the traffic began to exceed the capacity of a single line, the railway was faced with the alternative of doubling or conversion to a wider gauge. In the case of the metre gauge the cost of conversion to broad gauge was, generally speaking, rather less than that of doubling, while the immediate effect of conversion was to double the capacity of the track. The point to note was that all railways must incur additional capital expenditure from time to time to meet the natural growth of traffic, so that if it became a recognised rule that the metre gauge railways, which, as already noted were still practically all single track, should be converted to broad gauge in preference to doubling as soon as their traffic exceeded the capacity of a single track, the metre gauge would be automatically eliminated in course of time, practically without incurring any expenditure beyond that which would have to be incurred in any case to meet the growth of traffic. So much for existing metre gauge lines. An exception might be made in the case of Burma and the Assam-Bengal railway, which being more or less isolated from the general railway system of India, could be left out of the conversion scheme for an indefinite period without detriment to public interests. Other metre gauge areas would also be left undisturbed so long as the traffic was insufficient to justify conversion.

The construction of new lines on the metre gauge would have to be restricted by legislation in such a way as not further to prejudice the position. To meet the objections of those who argued that the poorer and undeveloped districts of India would not yield sufficient traffic to make a new broad gauge line pay its way, he proposed that 2ft. 6ins. and 2ft. feeder lines be permitted as at present, on the understanding that such lines be converted to broad gauge as soon as the growth of traffic was sufficient to justify the cost of conversion.

The above were the three salient features of a policy which, if carried out intelligently and consistently, would rid India, in course of time, of the curse of the dual gauge without involving more expenditure, practically, than that required to meet the natural growth of traffic. In considering the practicability of carrying out such a policy, it should be noted that the principal railways of India were state-owned, of which three were also state-managed, the remainder being company worked on such terms that Government got by far the greater share of the profits as the pre-dominant partner. Moreover, the present time was specially favourable for considering the question, for the recent five years' programme, drawn up by the Railway Board, showed that all available money for the next five years would be required for the rehabilitation of existing lines, so that the construction of new lines would be practically suspended during that period.

BRITISH MOTOR CARS IN PALESTINE.

The Federation of British Industries is informed through its correspondent in Palestine that though the percentage of motor-cars in that country per head of population is fairly high cars of British make are almost unknown, and few manufacturers are represented.

The correspondent states that the reason for this is that, with few exceptions, British makers do not turn out a car suitable either in design or price. A car for the Palestine market should be between £350 and £400 in price, and must be light and have plenty of clearance. Moreover, it is suggested that it would be a great advantage if the wheels were of the same size as the Ford, in order to reduce tyre costs. It is considered that if any British firm could produce a cheap, light colonial model car a ready market would be found in Palestine.

The Customs duty amounts to about 12 per cent. on the invoice price of imported cars.

The ordinary general meeting of the Suez Canal Co., will be held in Paris on June 12.

Owing to a short circuit an explosion of fire-damp occurred in a colliery at Lupeni (says Reuters' Bucharest correspondent) resulting in 160 casualties. Of these 82 are reported dead, 54 being completely incinerated. The other dead are terribly mutilated.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

ROUMANIA.

Bucharest, April 20.

The Housing Question.

The housing crisis is acutely felt in practically every large town in Europe; in Roumania, however, and especially in Bucharest, it has reached its climax, owing to the very restricted number of houses built in comparison with the enormous growth of population, and it is therefore no wonder that the house rent question, or in other words the question of the alleviation of the more and more strained relations between landlord and tenant, now figures as one of the most important items of the programmes of all political parties. Of course, this question could only be solved by a big building campaign supported by the State or large private concerns who would be willing to grant long credits.

The House Rent Bill.

It must be admitted that during the debating of this Bill the Government and especially M. Florescu, the Minister of Justice, on seeing the opposition encountered in Parliament, from the Press and from public meetings, towards the end showed signs of considerable conciliation by accepting the numerous amendments proposed in Parliament. As an example, as many as 34 amendments were moved and accepted in respect of one single clause.

Essential Points.

The following are the essential points of the new Bill: In principle all expiring rent contracts are extended for one year ending May 6, 1923; during which time the Government intends to draft a more comprehensive Bill for a longer period. This extension applies also to foreigners in the employ of the Roumanian State as well as to those foreigners in whose countries Roumanians enjoy similar advantages. Taking as a basis the rents that existed on May 6, 1916, for the old Kingdom, and May, 1914, for Transylvania, Bukovina and Bessarabia, the rents for dwellings have been doubled; for co-operative societies, small workshops and small factories trebled; and for offices, shops, large workshops and large factories the increase is fivefold. But for hotels, music-halls, cafés, café-chantants, cabarets, theatres (excepting those run by Roumanian actors), cinemas, banks, offices of commercial and industrial stock companies, and clubs (excepting political and "cultural" clubs) the privilege of extension has been lifted and these are therefore subject to free transactions between landlord and tenant. Any sub-letting of any portion of a house falls to the benefit of the landlord. All taxes must be borne by the landlord, but should they be increased, the increment will be divided between the landlord and the tenant.

Protection of Tenants.

From the summary of the above law it will be seen that, as the last House Rent Law expires on May 6, 1922, and an urgent expedient had to be found, the Government's chief intention was to prolong the present state of things until the autumn, when a definite law will be drafted. In the meantime, however, it protects the bulk of the tenants against mass eviction and accords the landlords a moderate increase of income from their properties. As to the regulation with reference to banks and joint stock companies, etc., the object is to compel them to build their own premises.

HEAD OFFICE: SOFIA, BULGARIA.	

BULGARIA.

Sofia, April 19.

Reparations.

It is announced that the Inter-Allied Commission have accorded to the Government until May 20 to reply to their Note.

M. Stambolisky is expected back in Sofia at the beginning of May, and the Agrarians are due to hold their annual congress on the tenth of the month. Up to the present the rate of exchange has not been at all affected by the Commission's Note, the leva in fact showing a slight tendency to rise. It is now the considered opinion of thinking Bulgarians that a refusal to comply with the Commission's requests may lead to very serious consequences. The Press continues to thunder away against the Commission, but it seems to forget that when Bulgaria signed the Treaty of Neuilly, she did sign away for a number of years a certain amount of independence. Annex to Article 131 of the Treaty, which deals with Bulgaria's financial obligations, distinctly specifies in paragraph 3 the powers enjoyed by the Commission.

The opinion held by certain quarters is that the terms imposed by the Commission would have been considerably lighter if a Government other than the present one had been in power. There is, however, authority for contradicting this view; the terms would have been much the same no matter what Government had been in power.

YUGOSLAVIA.

Belgrade, April 20.

The New Internal Loan.

The Minister of Finance has received authority from the Government to invite the subscription of a new loan of a milliard dinars. A part of the loan will be converted into Lottery Bonds, but the interest and premiums must not be over 7 per cent. per annum. The loan will be used solely for public services and railways and it is interesting to see that the "20 per cent. coupons" (the 20 per cent. was retained by the Government when the Austrian crowns were replaced) and the War Indemnity Bonds will be accepted as part payment for this new loan. To what extent it will be taken up by the public remains to be seen, but unless one is a strong optimist it is difficult to anticipate that it will go through with flying colours.

There is undoubtedly plenty of money in the country, but the peasants do not seem to be willing to open their purses just now, and I think this will continue until the new taxes are introduced. The Government is giving them a last chance to subscribe to the loan and get their bonds, since afterwards when the 200 per cent. increase in income tax is introduced they will get only a receipt for their money. It is curious that there is a shortage of paper money just now. It is hardly possible to come across a 100 dinars note of the old issue, these notes are all hoarded by the peasantry, who prefer to have "pre-war" money than any of the Government securities.

The latest improvement in the exchanges has relieved the financial stringency and the grain and produce markets are now showing more activity. The upward tendency of the cost of living has also been checked and if the harvest, which is really in a splendid state at the present time, is safely brought in, we may again expect the revival of trade relations between England and Yugoslavia.

The general desire on the Belgrade market is to unload the stocks, the more so in view of the possibility of importing the goods at much better prices, since the purchasing power of the dinar is now constantly increasing. Anyway the trade *impasse* seems to be at an

end, and if the present favourable wind from Genoa continues to blow the ship of trade should quickly get up full speed ahead. It is high time it did!

Offers of an American Loan.

The Government has received two offers from some American bankers, each one offering 50 million dollars. The Americans are proposing to lend 60 per cent. in cash and the remaining 40 per cent. would be placed at the disposal of the Government for purchases in the U.S.A. Both offers are on the basis of 7 per cent. interest per annum. The Minister of Finance returned from Genoa to consider the offer, and has received authority to proceed to negotiate, but owing to the importance of his presence in Genoa he is to return in two days. There is also an offer from a Belgian banking group, but since it is less attractive than the others it has been placed in "suspense."

ALBANIA.

Tirana, April 14.

The Financial Situation.

Albania has been suffering for some time from an economic crisis. The wealth of the country is far from increasing, and the resources of the State are small.

Trade is suffering from the closing of the Eastern frontier, where Serbs and Greeks place all possible difficulties in the way of transit; on the other hand Albania by the sea remains tributary to Italy and Greece, the two countries which have the monopoly of the service of boats, a monopoly in fact if not in right.

In order to meet the grave financial crisis the Government finds itself compelled to make the greatest economies in its expenses. However the events of the past month have caused enormous expenses, in part covered by voluntary gifts and in part by the fines which have been imposed on the towns of Durazzo, Shiak and Kroja.

Platinum Mines.

For some weeks it has been known that platinum mines have been discovered in the neighbourhood of Pogradetz, south-west of Lake Ohrida, in the same valley where it is believed there are rich coal deposits near the surface. It was M. Sederholm, member of the Commission of Inquiry which the League of Nations sent to Albania, who made the discovery. The Government has so far made no statement regarding the mines. But it is said that it is looking for a company to take up the concession.

India's imports for the year ended March 31 amounted approximately to Rs. 206½ crores, as compared with Rs. 335½ crores for the year 1920-21, and Rs. 208 crores in the first post-war year. The exports amounted to a total of Rs. 243½ crores, as compared with nearly Rs. 242 crores in the previous year, and Rs. 309½ crores in 1919-20.

CONSTANTINOPLE BONDS.

The committee in respect of the City of Constantinople Municipal 5 per Cent. Loan of 1909 have pleasure in notifying the depositors of bonds under the agreement of November 9, 1921, that Coupon No. 23, due December 14, 1921, may now be presented to the National Bank of Turkey, 50, Cornhill, London, E.C., for encashment.

It is hoped that arrangements will shortly be completed for the payment of a small percentage of the other coupons in arrear (Nos. 9-22, inclusive), and negotiations are in progress for making funds in hand in Turkey available for this purpose.

Bondholders are invited to deposit Coupons Nos. 9-22 with the National Bank of Turkey, in return for a certificate of receipt, upon which payments, when made, will be endorsed. Bonds may still be deposited with Messrs. Baring Brothers and Co., Ltd., in assent to the agreement of November 9, 1921.

GREEK FORCED LOAN.

The British Chamber of Commerce at Athens have telegraphed the London Chamber of Commerce to the effect that they have been authorised to undertake the collation and protection of British claims for exemption from contribution in respect of this loan, and that British firms having monies outstanding in Greece should forward declarations to them (The British Chamber of Commerce at Athens, 6a, Rue Dragatsaniou, Athens) without delay.

Engineering Topics.

By Our Engineering Representative.

A Useful Appliance.

Amongst other devices recently brought to my notice is a new design of electric boiling ring, the most noticeable feature of which is its small weight, which is only 6 lbs., in spite of the fact that it is 8 ins. in diameter and 3 ins. in height. The heating element is strongly and substantially made, and consists of a continuous spiral of high-resistance wire, in eight rows, threaded through mica strips which are strengthened by metal. The holes through which the resistance wires pass are fitted with metal eyelets to prevent any wear on the actual mica itself, and the top of the stove is formed of stout wires passing through the tops of these strips, whilst beneath the element is a highly polished reflector which not only makes use of radiant heat but ensures that the whole of the heat given off by the glowing wires is brought into effective use.

I also hear that a new combined electric heater and fan will shortly be placed on the market. In this the heating element will consist of seven connected portions any or all of which can be brought into action by means of a dial switch so that a wide range of heat control is available. The fan, which is controlled by a separate switch, is so placed that it draws air over and through these heating elements and drives it out through an opening in the front of the apparatus, so that a room can be warmed by heated air driven in any desired direction.

A New Switch.

A new type of switch has just been introduced by a leading firm of manufacturers which should be of particular value in all installations, as mines, where comparatively heavy currents are being dealt with. In such positions a certain amount of trouble often occurs with the switches, as the contacts become burned as a result of frequent use, and a defective connection consequently exists between the switch parts. More especially is this the case where the workman or assistant, ignorant to a greater or less extent of the principles of electricity, tries to turn the switch on or off slowly or by degrees, so that when the switch bridge is nearing or leaving the live contacts an arc is drawn which sets up local fusing. With this things soon go from bad to worse, and it is not long before a new switch is required. In the new design under notice the switch makes, as well as breaks, contact very quickly, this being carried out by means of strong, coiled springs which are said to be unbreakable. As soon as the handle has been moved slightly, the springs "take charge" and drive the contact home with considerable speed and force, reversing this operation as soon as a movement of the switch is made into the off position. The effective and useful life of these switches is said to be much higher than those of the ordinary kind often installed by those who study cheapness rather than efficiency.

A Vauxhall Victory.

The secretary of the Royal Automobile Club of Australia writes me that he has completed his programme of competitions for 1922 and that several interesting reliability trials, hill climbs and long distance runs are included. The results of these should not only add to the prestige of British cars but should give an impetus to sales.

I note that the opening event in the programme was a one-day reliability run of 106 miles from Sydney to the foot of the Bulli Pass and back by way of Campbelltown and the Parramatta road to the starting point. The distance is not great, but the gradients, surface, and general character of the road render this a really stiff trial.

That veteran 20 h.p. Vauxhall, which has been running in and winning at Australian events for the past eight years to my knowledge, was once again successful, and scored the maximum number of points in its class, which was the open event for all comers. Its petrol

consumption was at the remarkably low rate of nearly 37 miles per gallon, which means that the driver used less than three gallons for the entire journey. There would have been a second Vauxhall triumph in this event as a 30-98 was going great guns when it developed sparking plug trouble which put it out of the running. After all, as I have so often pointed out, some better scheme in connection with the awarding of points or deduction of marks ought to be devised. It is as manifestly unfair to penalise a car and its engine for a cracked porcelain in a sparking plug as it is to deduct points during a reliability run because a thread of Sea Island cotton in a tyre has given way under strain and caused a burst. Few of us would be able to get full marks for living a sober and upright life if we were penalised every time a button came off or a bootlace broke!

Old London Bridge.

As most of my readers are aware, a proposal has been put forward to demolish the ancient arch of old London Bridge which was discovered recently during building excavations. I for one would be extremely sorry to see such a famous landmark as this destroyed, although there appears to be very little hope of it being kept as the preservation would cost approximately £7,000. I have but little doubt that if a fund was commenced to cover the cost of preserving this historical landmark Londoners would respond to it eagerly.

Water Turbines.

In May, 1920, Sir W. G. Armstrong, Whitworth & Co., Limited, initiated a hydro-electric section as a part of their Civil Engineering Department, to secure orders for water turbines to be manufactured at their Elswick Works to the designs of a well-known Norwegian firm. The volume of business laid before the hydro-electric section since it was first established was such as to cause the board to decide to form a separate hydro-electric department, as a unit apart from the Civil Engineering Department, as from January 1, 1922. The new department, like the old hydro-electric section, is dealing with complete water power development schemes throughout all the various stages, no less than with the various component parts of such schemes, civil engineering, mechanical and electrical.

Messrs. Armstrong now have survey parties out in many parts of the world looking into projects which have been brought before them for submission to the powerful financial group with whom they are working in the city of London, and it can only be anticipated that the part they will play in the coming era of intensive hydro-electric development in the Empire will be a very important one—and not only in the Empire but in all parts of the world.

LONDON PRODUCE REPORT.

Sugar Lower.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in moderate demand at unchanged rates. Tate's cubes and mineral water sugar have shed 3d. each at 53s. 6d. and 48s. 9d. respectively, while London granulated and Lyle's granulated have dropped a similar amount at 48s. 3d. and 48s. 6d. respectively. A firm tone has prevailed in export descriptions. West Indian crystallized has been steady at 42s. 6d., while white Mauritius is 9d. higher at 44s. Cane sugar quotations are:—April, 14s. 6d.; May, 14s. 6d.; August, 14s. 6d.; and September, 14s. 6d. White sugar quotations are: April, 20s.; May, 19s. 9d.; August, 20s. 1½d.; September, 20s.; October-December, 19s.

Coffee.—Unsteadiness has been in evidence. Costa Rica has shed 2s. at 120s., while East Indian has dropped 8s. at 122s. Nairobi has declined 6d. at 110s. The futures market has been quiet. Quotations are:—May, 60s.; July, 61s.; September, 60s. 6d.; and December, 60s.

Dessicated Coconut.—Firmness has continued throughout the week, but a higher tendency is anticipated shortly.

Rice.—Japan rices have been in better demand and good business is passing. The demand for American Java rice has been quieter during the past week, more attention being paid to Burma rices.

Green Fruit.—Shipments of oranges during the week have been small, and prices are harder. The Jaffa orange crop is estimated at 1,000,000 cases, of which it is estimated that Great Britain's share will be 400,000 cases. A great improvement in the demand for lemons has been noticeable during the week, and prices have firmed up for Messina lemons. There is a scarcity of Naples lemons, but it is anticipated that larger shipments will arrive in view of the excellent prices now in evidence. Australian and Tasmanian apples are now being discharged from various steamers. Egyptian onions are now arriving in larger quantities and of better quality.

Oilseeds.—Prices are firmer. Indian linseed remains unchanged at 21s. 6d., while La Plata has gained 3d. at 21s. 3d. Rape-seed has been steady with Toria unaltered at 18s. Cottonseed has again advanced, with Indian 1s. up at 21s., Sakellarides, 4½d. up at 12s. 4½d., while Egyptian black at 12s. 9d. has risen 11½d.

Oils.—The tone has been brighter. Linseed oil has advanced 1s. at 43s. Rape oil is higher with the crude variety at 45s., and refined at 48s. an increase of 2s. in both cases. Cottonseed oil. Increases are to be noted in all cases. Refined is 1s. up at 49s., Egyptian crude is 2s. 6d. firmer at 42s. 6d., deodorized is 1s. up at 54s., while technical has gained 3d. at 42s. 3d.

Oilcakes.—Linseed cake has been steady at 300s. ton. Cotton-meal cake shows no change at 280s. ton; while coconut cake and cottonseed cake are both unchanged at 160s. and 180s. ton respectively.

THE MESOPOTAMIAN HARVEST.

(From Our Own Correspondent.)

Baghdad, April 13.

The harvest of the wheat and barley crops has commenced in the south and will commence in the Baghdad district in a few days. Crops show every promise of being heavy, and prices are still falling.

SCHEME FOR GRAIN ELEVATORS IN BULGARIA.

(From Our Own Correspondent.)

Sofia, April 19.

A scheme proposed by a Canadian-American group which provided for the erection of a grain elevator system throughout Bulgaria, was due to come before the Sobranje at the close of its last session. On account of pressure of other business, consideration of this scheme has been held over until next month.

Reports from Central and Southern Bulgaria indicate that if the necessary amount of rain-fall is experienced in May and June, the 1922 harvest should be a record one.

ROUMANIA'S HEMP INDUSTRY.

There are about 20 undertakings in Roumania occupied with the industrial utilisation of hemp, says the *Argus*. The most important are in Galatz, Jassy, Berveni in the Satmar district, Zimnicea and Iratosul Mare, near Arad. The hemp employed is partly grown in Roumania and partly imported from abroad. As the home grown hemp is inferior owing to its dark colour, large quantities are imported from Italy and Yugoslavia.

TURKISH CROP CONDITIONS.

The following extracts are taken from the report of Captain C. H. Courthope-Munroe, Commercial Secretary to the British High Commissioner, Constantinople, on the economic and financial conditions in Turkey in February of this year:—

Cereals.—At the commencement of the year exceptionally fine weather was experienced, which alarmed the farmer to some extent. It was feared that the crops, growing too rapidly under the influence of the warm sunny weather, would be caught by the bitter winds that blow from the Caucasus later in the spring. From news received, however, the crops in Anatolia appear to be 25 per cent. better than those of previous years. The production of the Vilayets of Konia, Kastamouni and the Sandjaks of Nigde and Kaisarea is considerably in excess of the original estimate. The harvest in the Adalia district has been so plentiful that local dealers have applied to the Kemalist Government to allow admittance into Adalia of cereal merchants from Lebanon and Syria to effect purchases. Large quantities of cereals are collected at Affion-Kara-Hissar and Eski-Shehir. The satisfactory harvest is also partially due to the measures taken by the Kemalist Government, granting exoneration of active service to cultivators, who were conscripted and ordered to cultivate 10 deunums of land. Many of the stocks, however, have probably been destroyed by the belligerent Governments.

Tobacco.—Samsoun, which is the chief centre of the tobacco growing industry in Turkey, has been under Kemalist control throughout the whole year. No British subjects have been allowed to land and very little information has, therefore, been obtained. Export, however, of tobacco from this district has been taking place, and it was reported, in the month of April, that 5 million kilos had already left that port during the year, the majority of this, however, being the previous year's stocks. The factory of Samsoun has been working full time and the value of its output for this year is estimated at 3 million Ltqs. A quantity of this tobacco was transported from Anatolia to Adalia, and thence to foreign buyers. By the middle of the year 1920 the crop had been practically entirely disposed of, but the 1921 crop is estimated at being only one-third of that of last year owing to the shortage of labour and the deportation of planters. Tobacco growing in the vilayet of Smyrna has been very poor this season owing to the fact that the peasants can obtain no financial assistance to meet the depression in the tobacco trade. Of the 6 million okes of the Smyrna crop only 16-20 per cent. were of

good quality. The crop for 1921 in the Broussa district is both poor in quality and quantity. The crop throughout the remainder of Anatolia has been equally poor. Reports as to the actual production are most conflicting.

Silk.—By far the greatest proportion of the silk produced in Turkey comes from the Broussa district. The silk crop for the year 1921 has been a great success compared with the last few years, despite gloomy forecasts to the contrary. In 1920 the output from the Broussa Vilayet was 950,000 kilos. In the present year it has reached 1,350,000 kilos, which shows a distinct improvement. Each bag of eggs, instead of producing from 38 to 42 kilos of cocoons as in the previous year, produced on an average 58 kilos. The increase is explained by the fact that villagers, fearing that owing to the loss of mulberry trees, many of which were cut down during the war, they would be unable to feed the usual number of silk-worms, accepted fewer bags of eggs than previously. The temperature has been very favourable, and the average time for the rearing of silk worms has been from 40-45 days. The output of silk per kilo is between 11 and 12 kilos of cocoons to 1 kilo of silk. The result of this good crop has been a boom in the silk weaving and spinning trades.

Information has been received from the *La Generale Soie*, Broussa, to the effect that in July 570 pans were in operation, whilst in October this number was increased to 1,154. The reasons for this increase of the spinners were the following:—The destruction or compulsory stoppage of spinning factories in the interior; the arrival of a quantity of refugees, who were for the most part spinners, and found employment in the factories. Cocoon cultivators were getting very good prices, and arrivals of dry cocoons surpassed all expectations. As the factories were unable to absorb all the cocoons that arrived, there was an appreciable difference in price between the raw material and the raw silk, and it was in order to realise this profit that the spinners made such big efforts to repair and instal new factories.

The general situation in the silk industry has considerably improved, and it is certain that Broussa is becoming the centre of the silk trade, which up to the present was Constantinople.

Valonea.—The crop which averaged during the last years before the war about 1,200,000 quintals fell in 1921 to only about 400,000 quintals, and this year's present stocks in Anatolia are estimated at 300,000 quintals. This is due to the general unrest, the lack of labour and transport, and to the industrial conditions in Germany and Russia and the old Austrian Kingdoms, which no longer form a market for this commodity. Furthermore, tanners, especially those in England, got accustomed during the war to the use of more rapid processes and in many cases modified their plant for this purpose. This year the United States, which previous to 1907 imported no valonea, is by far the largest consumer.

Hazelnuts.—The majority of exports of hazelnuts from this country were to Trieste, Marseilles and Hamburg. The new crop is estimated at about 700,000 kantars. The old stocks are exhausted and consuming centres are already asking for forward shipments. Owing to the situation in the centres of production sellers are having difficulties in effecting shipments. Arrivals from Black Sea ports amount to about 100,000 bags of which about 95,000 have been exported to consuming centres. Stocks at Black Sea ports are estimated at 75,000 bags.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 127s. cwt.; (Canadian), 115s. cwt.; (American), 100s. cwt.; butter (Danish), 181s. cwt.; (Australian), 164s. cwt.; (New Zealand), 173s. cwt.; cheese (Canadian), 101s. 6d. cwt.; (New Zealand) 70s. cwt.; lard, 72s. cwt.; eggs (Danish), 15s. 3d. per 120; (Styrian), 11s. 3d. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar), 1s. 2d. lb.; cocoa (Ceylon good to fine), 90s. cwt.; coffee (Costa Rica), 132s. 6d. cwt.; (East Indian), 132s. 6d. cwt.; (Central American) 104s. cwt.; (Jamaica), 68s. 9d. cwt.; (Mocha longberry), 105s. cwt.; (Santos, superior), 71s. 6d. cwt.; ginger (washed Cochín), 52s. 6d. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore Black), 3½d. lb.; (Muntok white), 7½d. lb.; pimento, 2½d. lb.; raisins (Valencias), 75s. cwt.; sultanas (Smyrna), 121s. 6d. cwt.; currants (Vostizza), 70s. cwt.; (Amalias), 57s. cwt.; sugar (Tate's cubes), 53s. cwt.; (Lyle's granulated), 48s. 7½d. cwt.; (Mauritius crystals), 44s. 3d. cwt.; (West Indian crystalised), 43s. 3d. cwt.; (centrifugal), 15s. cwt.; tapioca (fair Singapore), 1½d. lb.; rice (Rangoon No. 2) 13s. 7½d. cwt.; (bran Rangoon), 66 2s. 6d. ton; cinnamon (firsts), 11½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; tea (Indian, common to good common), 1s. 1½d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2½d. lb.; (medium to good), 1s. 6½d. lb.; (fine to finest), 2s. 7½d. lb.;

Java (common to good common), 10½d. lb.; wheat (English white), 56s. 6d. qr.; wheat (Australian), 59s. 6d. qr.; barley (malting), 43s. qr.; barley (feeding), 36s. 6d. qr.; oats (English), 25s. 6d. qr.; oats (La Plata, ex-ship), 25s. 6d. qr.; maize (La Plata), 41s. 3d. qr.; flour, 46s. 6d. sack.

Metals.—Aluminium, £122 10s. ton; antimony (English Regulus), £30 15s. ton; bismuth, 9s. lb.; copper (standard), £59 13s. 9d. ton; copper (electro), £65 ton; gold bars, 93s. 5d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 97s. 6d. ton; galvanised sheets (24 G), £16 5s. ton; lead (soft foreign), £23 10s. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 27s. 9d. unit; nickel, £175 ton; platinum, 360s. oz.; plumbago, £16 ton; quicksilver, £10 16s. 3d. bottle; spelter (G.O.B.), £26 18s. 9d. ton; tin (standard), £155 17s. 6d. ton; wolfram, 10s. unit; zinc sheets, £35 10s. ton; tin plates (20 by 4), 19s. 4½d. box; silver bars, 34½d. oz.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 6d. lb.; tartaric, 1s. 3½d. lb.; ammonia (sulphate), £16 11s. 6d. ton; arsenic (white powdered), £35 5s. ton; benzole (standard), 2s. 5d. gallon; bleaching powder (35 per cent.), £12 15s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 119s. 6d. cwt.; Potassium: Bichromate, 7d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £38 10s. ton; permanganate, 9½d. lb.; prussiate yellow, 1s. 1½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 130s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 5½d.; alkali (58 per cent.), £8 13s. 9d. ton; chlorate 3½d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £15 13s. ton; prussiate, 9½d. lb.; nitrate, £15 1s. 3d. ton; glycerine (crude 80 per cent.), £75 ton; glycerine (industrial 1260 per cent.), £100 ton; lemon oil, 3s. 6½d. lb.; quinine, 2s. 10d. oz.; red lead, £34 ton; white lead, £37 15s. ton; white ground lead, £48 7s. 6d. ton; sulphate of copper, £27 5s. ton; sulphate of iron, 75s. ton.

Miscellaneous.—Cotton: (American), 10.29d. lb.; (Egyptian Sakel), 10.20d. lb.; jute (first grade c.i.f.), £28 12s. 6d. ton; jute (lightnings), £24 15s. ton; Oilseeds: Linseed (La Plata), £20 7s. 6d. ton; palm kernals, £18 8s. 9d. ton; castor seed (Bombay), £16 7s. 6d. ton; Sesame seed (China), £24 10s. ton; soya beans, £12 13s. 6d. ton; Oils: Linseed, £41 5s. ton; olive (Spanish), £70 ton; rape (crude), £43 10s. ton; soya, £37 12s. 6d. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 70s. ton; coconut (Ceylon), £39 12s. 6d. ton; cotton (crude), £40 10s. ton; ground nut, £44 15s. ton; Rubber: Plantation (No. 1 crepe), 8d. lb.; smoked sheet, 8d. lb.; fine hard Para, 11d. lb.

The measure of Reputation is the measure of Quality.

This acid test applied to the great name of "UBEL" reveals the sterling value of the products bearing this name.

"UBEL" fittings are known throughout the world to be the embodiment of efficiency and reliability—the product of specialised large-scale manufacture.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Jaffa, March 25.

Rain is badly required for the crops. There have been large arrivals of building timber during the last week.

Nicosia, April 15.

The month of March has been an exceptionally dry one throughout the Island; and although the barley crop is more or less assured and above the average fears are expressed as to the wheat crop.

There is nothing of interest to report with regard to exports beyond the fact that two small cargoes of carobs, one for the United Kingdom, and the other for France, and a cargo of some 3,000 tons of Cyprus barley for Hull were exported during last month.

Some ten thousand tons of copper pyrites are now ready for shipment, and regular shipments of asbestos will be effected as from the end of this month.

About 50 aero-motors have been imported recently from Canada, and an improvement in dollar exchange will no doubt result in increased business in this article.

The local agents of the Ford Motor Company have imported a couple of motor tractors, and demonstrations will commence on the 17th inst. in the Messaoria plain, the most fertile part of the Island.

Constantinople, April 22.

The improvement recorded in this market has not been maintained. The peace negotiations seem to be dragging along, and trade with Anatolia remains interrupted. Some development is to be noted in consignments made to the ports of South Russia, notably as regards foodstuffs.

Manufactures.—The position is unchanged. The arrivals, which have markedly decreased, consist mainly of cabots destined for the ports of the Black Sea.

Sugar.—The strength of this article continues. The demand is maintained in all the chief markets. Our market alone, as a result of large arrivals and the lack of outlets, quotes prices lower by from £1 to £1½ than those in the countries of origin. Quotations:—American 9.25 dollars per 100 kilos, Dutch, £23½ per ton; here in transit American £20 per ton; Dutch £22½ per ton; in customs £25½ per 100 kilos.

Coffee.—The market is very firm, and prices are higher. Large purchases are recorded on the part of Americans. The new crop is announced to be short, and more than half of the old crop is in the hands of the Brazilian Government. Prices are from 4s. to 5s. down on our market on account of the financial crisis, and the lack of outlets.

The Directors of the South Indian Railway have decided to pay on July 1, an interim dividend from surplus profits of 2 per cent. less income tax (compared with 2 per cent. paid on July 1, 1921), making with the interest guaranteed for the half-year ending June 30, 1922, namely 1½ per cent. less income tax, a total distribution for the half-year of 3¾ per cent.

QUIET AND DULL TONE.

The Influence of Genoa.

(From Our Own Correspondent.)

London, Tuesday Morning.

Short weeks make comment singularly difficult in a weekly journal, and this week has been circumscribed by reason of the usual holiday on May 1. It was just as well, perhaps, that there should have been a cessation of business on that day for there would have been very little doing until the Budget provisions were definitely known. To-day we shall see the effect of them, and I assume that a certain amount of activity will result though sight must not be lost of the fact that to some extent the reduction in income-tax has been discounted in advance. The shilling is in accordance with expectations though not with hopes, and it is obviously less than might have been done. But we must hope for better things next time.

Adverse Influences.

The past week has to some extent seen the continuance of general activity in the markets but there have been conflicting influences and it is not possible this time to refer to buoyant markets since in certain directions dullness has developed as the result of the unpromising situation at Genoa. Until last week Genoa failed to count as a market influence but the realisation that the end of the conference without anything being decided would by no means leave things as they were before it began had the effect of inducing a certain amount of profit-taking with the inevitable consequence that prices fell away somewhat. Besides Genoa the position with regard to the engineering negotiations has had an unfavourable effect.

The Outlook.

The new issues to which I referred last week are beginning to make their appearance, and no doubt the reduction of the income tax will have the effect of greatly increasing the number as there will naturally be a tendency to endeavour to take advantage of the large funds available for investment. Apart from the pending issues to which I have already referred there is no fresh development that calls for comment. Obviously the prospect of Near Eastern Loans in the near future will depend to a very large extent on what happens at Genoa.

Gilt-Edged.

Gilt-edged have been affected by the prevailing influences, and a rather dull tendency has been in evidence. Consols are 1 down at 59, the Conversion Loan at 70½ shows a decline of a point, while War Loan Fives are 2.3-8 down at 90.3-8½. Indian stocks have been exceptionally strong, the Seven per Cent. Loan being 2½ up at 115, while the 3½ per cent. Loan has gained 2½ at 67½, and the 3 per cent. Loan is ¾ up at 57½.

An irregular tendency has obtained in the foreign group, European securities being generally inclined to dullness as a result of the international situation. French stocks have been weak, with War Loan Fives 2½ down at 45½, while German three per cents. have shed 1-8 at 2½. Italian Rentes are, exceptionally, 1½ up at 26. Russians have all been weak, the 4 per cents. being 8½, while the 4½ per cent. 1909 Loan is 12. Brazilians have been inclined to droop with, the 5 per cent. 1914 Funding at 72½, while the 5 per cent. 1913 Loan has shed ¼ at 64. Chinese securities have weakened, and no doubt will ease off still further to-day as a result of the opening of hostilities.

Industrials Quiet and Dull.

The political situation, the pending Budget, and the labour position combined to reduce business within very narrow limits last week. A rather dull tone obtained, and in a number of directions prices tended to react somewhat. Tobaccos have been a dull spot, with Bats 6d. lower at 70s. 6d. and Imperial Tobaccos 1s. 6d. down at 57s. 9d. Dunlops are unchanged at 8s. 3d.

Textiles have been firm with Coats unchanged at 3.3-32 while Courtaulds are 3s. 9d. up at 48s. 3d. Iron and Steel securities have been on the dull side. Vickers have shed 6d. at 11s. 6d., Guest Keens are 2s. 9d. down at 33s. 6d., while Armstrongs are 1s. 6d. down at 10s. 6d. x.d.

Shipping securities have reacted. P. and O. Deferred are 12 down at 328, Cunards are 21s. 9d. x.d., while Furness Withys are 33s.

Oils Irregular.

The same influences that have affected Industrials have made themselves felt in the Oil market, and while in some cases activity prevailed the tendency has been in the main for prices to touch lower levels. Burmahs are unchanged at 5.7-8, while Anglo-Persian at 4.11-16 have shed 1-16. Mexican Eagles at 3.17-32 are 1-16 down. In the Trinidad group Centrals have been a weak spot on unfavourable reports, and at 2.11-16 are 1-16 down. Leaseholds are 1.7-32, a gain of 1-32.

Oilfields of Egypt have been the feature in the Egyptian group, rising sharply to 8s. 3d., a gain on the week of 3s. 9d. Anglo-Egyptian Bare 1-16 lower at 1.11-16. Among Roumanians Phoenix are 1s. 3d. down at 27s. 6d. Steaua Romanas are 13s. 3d., Roumanian Consolidated are 1s. 3d. lower at 14s. 3d., while Dacia Romanos are ¾. Writing as I am at a special disadvantage this week I shall abstain on this occasion from my usual hints as to the course of the market.

Banks Steady.

Banking securities have on the whole been fairly steady. Chartered of India are 17½, while National of India are 40½. P. and O. Banks are 13.5-16.

In Egyptian securities Aboukirs are 23s. x.d., Beheras are 8.7-8, a gain of ¼, Gharbieh Lands are unchanged at 1½, Sidi Salems are the same at 7-8, and Union Foncières are 1-8 up at 2.1-8.

ANSWERS TO CORRESPONDENTS.

Inquiries on financial subjects are invited from our readers, and will be answered in this column.

Dundee.—Quite enough in my opinion. I should be inclined to get out now.

T.T.—Sell half your holding, and you might with advantage invest the proceeds in the oil share which, as you are no doubt aware, I have recommended on several occasions in these columns.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on April 21 were as follows:—Agricultural Bank of Egypt, £5 19-32; Alexandria Water Co., Ltd., £8, 13-16; Anglo-American Nile Steam, £2 27-32; Associated Cotton Ginners £7-8; Banque d'Orient, Fr., 53½; Behera Ord., £E.8, 3-8; Braseries d'Egypte, Fr. 70; Building Lands of Egypt, £13-16 Cassi di Sconto Priv., Fr. 125; Comptoir Fin et Com. d'Egypte, £15-16; Consolidated Lands, Pt., 15-16; Credit Foncier Fondateur, Fr. 975; Credit Foncier Act, Fr. 690; Credit Foncier 1880 Oblig. Fr., 326; Eaux du Caire, Capital, Fr., 80; Eaux du Caire Jouissance, Fr., 116; Egypt and Levant, S.S. Ord., 30s. 3d.; Egyptian Delta Light Railways, £4½; Filature National d'Egypt, £0.5-8; Immeubles d'Egypte Soc. an des., £0.3-8; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Co. Pref., £3½; Kom Ombo Ste an de Wadi, £9-16; Kom Ombo Ste An Fondateur, £30; Land Bank of Egypt, Parts de Fond, £14½; Lots Turc., £7½; Menzaleh Canal Navigation Pt 225; Nungovich Hotels, £7.3-16; Ramleh Railways, £2½; Urbaines et Rurales, £3 3-32; Union Fonciere Fond, £4.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers and exporters. Specialities:—Exports: Medicinal herbs, dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old Dundee, and Calcutta makes.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

SHIPPING INTELLIGENCE.

OTTOMAN LIGHTHOUSES.

A subject of considerable interest to British shipping firms was raised at the recent meeting of the Association of British Chambers of Commerce when a resolution concerning the concession for Ottoman lighthouses was carried unanimously. The terms of the resolution were as follows:—

That when, in accordance with the spirit of the provision of the Treaty of Sevres, which Treaty has still, however, to be ratified, the time comes for His Majesty's Government to consider the adaptations to meet new economic conditions of concessions granted by the Turkish Government to Allied Nationals before October 29th, 1914, all questions arising out of the concession for Ottoman Lighthouses granted to two private persons over fifty years ago for twenty years, and since renewed for two periods of fifteen and twenty-five years each to the Concessionary Company, be carefully weighed.

That before recognition of the last renewal of the concession for 25 years from September, 1924, obtained from an unstable Government in 1913, in return for an advance of £T500,000 the reserves stipulated by His Majesty's Government in 1895 for a revision of the tariff of dues five years before the expiry of the concession in 1924, which stipulations were confirmed by Note of the Ottoman Ambassador in London dated October 8, 1896, be insisted upon.

That in view of the great changes in the construction of modern steamers, and the large profits made by the Concessionary Company, the complete revision of the tariff of dues on the basis of a reasonable interest and sinking fund on the capital cost of maintaining the lights in the reduced territory covered by the concession, is necessary.

That His Majesty's Government be urged to consult and obtain the views of British Shipping and Shipowners' Associations, and other interested parties before making any definite arrangements with the Concessionary Company.

MOTOR TRANSPORT FOR EASTERN MEDITERRANEAN.

According to the *Solo* a scheme has been drawn up by Ingegnere Enrico Krasnowsky for the immediate organisation of motor transport in the Eastern Mediterranean and Southern Russia.

The movement has been promoted by the Instituto Italiano per l'Esportazione Commerciale o Coloniale, 12, Via Pontaccio, Milan, and by Ingegnere Pravesi, president of the Unione Industrieli Meccanici Italiani per Relazioni Economiche con l'Oriente. Various engineering, transport and forwarding companies have adhered to the scheme.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Moora for Bombay (Liverpool, May 16).

Anchor Brocklebank Line.—S.s. Magdapur for Calcutta (Birkenhead, May 13); s.s. Holywell for Port Said, Colombo, Madras and Calcutta (leaves London, May 16); s.s. Masirah for Port

Said, Colombo, Madras and Calcutta (leaves London, May 27) s.s. Mangalore for Calcutta (Birkenhead, May 27).

Bibby Line.—S.s. Lancashire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 10); s.s. City of Boston for Rangoon (Middlesbrough, May 10); s.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 24).

Clan Line.—S.s. Clan Ogilvy for Bombay and Persian Gulf (Birkenhead, May 8); s.s. Clan Chattan for Colombo, Madras and Calcutta (Birkenhead, May 18).

Cunard Line.—S.s. Cypria for Gibraltar, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Swansea, May 25).

Ellerman Line.—S.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 6); s.s. Maronian for Gibraltar, Melilla, Malta and Alexandria (Liverpool, May 15); s.s. Flaminian for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, May 18).

Ellerman's "City" Line.—S.s. City of Agra for Calcutta (Birkenhead, May 9); s.s. City of Florence for Bombay and Karachi (Birkenhead, May 19); s.s. City of Chester for Calcutta (Birkenhead, May 22).

Ellerman's "Hall" Line.—S.s. Trafford Hall for Bombay, Karachi and the Punjab (Liverpool, May 12).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenbeg for Port Said, Port Swettenham, Singapore, etc. (London, May 4); s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, May 18); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, June 1).

Harrison Line.—S.s. Defender for Calcutta (Liverpool, May 13).

Henderson Line.—S.s. Henzada for Port Said and Rangoon (Birkenhead, May 17).

Holt Line.—S.s. Calchas for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 4); s.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 4); s.s. Phemius for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 4); s.s. Eumaeus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. Glaucus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18).

Johnston Line.—S.s. Wingate for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, May 13); s.s. Cundall for Galatz and Braila (Liverpool, May 20); s.s. Incemore for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 3).

Moss Line.—S.s. Siptah for Gibraltar, Malta, Syra, Smyrna and Constantinople (Liverpool, May 13).

Papayanni Line.—S.s. Bavarian for Malta and Alexandria (Liverpool, May 5); s.s. Gerano for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 20).

P. and O. Line.—S.s. Nagoya for Colombo, Madras and Calcutta (London, May 5); s.s. Caledonia for Bombay (London, May 5); s.s. Soudan for Bombay (London, May 6); s.s. Nore for Colombo, Madras and Calcutta (London, May 19); s.s. Egypt for Bombay (London, May 19); s.s. Macedonia for Bombay (London, May 26); s.s. Mantua for Bombay (London, June 2); s.s. Sardinia for Colombo, Madras and Calcutta (London, June 2).

P. and O. British India Line.—S.s. Chindwara for Bombay and Karachi (London, May 12); s.s. Nardana for Colombo, Madras and Calcutta (London, May 13); s.s. Matiana for Colombo, Madras and Calcutta (London, May 26); s.s. Mandala for Bombay and Karachi (London, June 2); s.s. Nevasa for Bombay and Karachi (London, June 16).

Prince Line.—S.s. Stuart Prince for Tunis, Malta and Alexandria (Manchester, May 5); s.s. Soldier Prince for Tunis, Malta, Alexandria and Syria (Manchester, May 15); s.s. Cyprian Prince for Malta, Alexandria and Syria (London, May 15).

The Oriental Gas announce an interim dividend at the usual rate of 3½ per cent., less tax, on account of the year ending June 30.

ANCHOR LINE

First-Class Passengers only.
LIVERPOOL TO BOMBAY.
KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

16, Gracechurch Street, London, E.C.3.

Cotton & Cotton Goods.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Friday.

Although a fairly steady tone has prevailed in the market during the past week the actual amount of business done has not been anything to boast about. There has been nothing to stimulate buyers to further activity, and the slackness in trade during the past fortnight is causing manufacturers to wonder how they can keep restarted looms running. Taking the market as a whole, however, optimistic views are held with regard to future developments, but any progress towards better times will be slow. The wages settlement has given general satisfaction. With regard to cloth rather better advices have been received from Egypt, and it has been stated that clearances are much better out there. No sales of any weight have been mentioned, however. A little more business has been done for Constantinople in grey staples, and printing and finishing styles. Egyptian yarn quotations have been rather irregular, and users have only purchased from hand to mouth. A fair amount of cloth inquiry has been about for India, and some moderate transactions have been recorded in a variety of fabrics. Trade for China has been practically at a standstill. Buyers for the remaining minor outlets both East and West have not been altogether idle. American yarn quotations have been somewhat easier, and sales have been within restricted dimensions.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended April 26 :—

The holidays over, quite a good business has once more taken place in this section of the market. The visible enquiry has seemed hardly sufficient to warrant the estimate of 2,300 bales, but no doubt a certain proportion was business that had been pending for some little time, and which had been held up by the approach of Easter, and the somewhat obscure trade situation. No new feature in the demand has been noticed here, and buying continues to be on similar lines to those indicated in our previous reports of the past month or so. Good Fair to Fully Good Fair still claim the most attention, and so far there seems but little disposition on the part of spinners to purchase the higher grades. Enquiry for Low Cotton (6d.—9d.) is still met with in certain quarters, but we doubt if much actual business is taking place at these prices, at any rate on the spot. Alexandria appears to offer better value for the money in this class of cotton than Liverpool, at the moment. Brown and White cottons have been quite neglected, and only a small business has taken place in Uppers. We are of the opinion that White cotton could be placed, if only the prices asked bore some resemblance to the actual value of the commodity as cotton, but, with so many outside growths to compete against, it is useless for holders to put fancy prices on this class of cotton, on the ground that it is scarce—that is if they wish to sell. For the time being, the days of fancy prices are over. Spinners cannot afford to pay them—and the wise ones experiment with substitutes, which they can obtain at more reasonable cost. C.i.f. business continues to run on quietly conservative lines.

Contrary to popular opinion, the settling of the cotton wages dispute, while, no doubt, lifting a certain amount of weight from the market locally, entirely failed to bring about that fresh access of business which in most quarters it had been hoped would be the case. India continues to "enquire" freely, but does not seem to get beyond that stage, and it is very obvious that the cloth buyers are still in a position to control the price. On the other hand, the spinners and manufacturers are showing an increased tendency to harden their prices and to stop selling under cost, and so to a certain extent something in the nature of a deadlock would seem to have been reached. This is of course unfortunate in that a period of quietness will probably result, for some time at all events, but it may prove the best step towards an improved business in the near future. Some excitement was caused during the week by the news that the Egyptian Government had commenced to support the market in Alexandria by buying spot cotton there, and a rapid rise of about $\frac{3}{4}$ d. per lb. occurred in our "futures" market as a consequence. The excitement subsided as quickly as it had arisen,

and the inevitable reaction occurred on the day following. The general impression here is to the effect that very considerable purchases would have to be made before any permanent effect could be produced on our spot market, where the strongest opposition would be encountered from buyers, who, in face of conditions ruling in Manchester and district to-day, would be very loath to follow anything in the nature of a rapid advance. Total sales estimated at 2,300 (350 Sudan). Quotations of Fair in Upper and Brown qualities are raised 50 points; those of Good Fair and above, in the same growths, 75 points. In Sakellaridis, quotations of Fair, Good and above, are advanced 75 points, whilst those of Good Fair and Fully Good Fair show a rise of 50 points only. F.G.F. Sakellaridis to-day 17.50d.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report dated April 21 state :—Since our last report the futures market has been rather dull, the turnover of business being very restricted. The factors which have contributed to this dull state of affairs and caused the drop in prices of about one dollar for both Sakel and Ashmouni contracts are the following :—(1) Absence of demand of any importance from spinners, (2) continued large daily arrivals from up-country, (3) weakness of the Liverpool Egyptian cotton market and the New York cotton market, and, finally, the uncertain political situation. If prices are not lower, it is because the holders of spot cotton are in a relatively satisfactory financial position and do not press their cotton for sale, and because of the possibility that the Government may eventually decide to purchase cotton for the sake of avoiding a break which would be a heavy blow to its popularity. However, one must confess that the prospects for the near future are not very bright, owing to the heavy existing supplies and to the many difficulties still impeding the recovery of the textile industry. The most important of these difficulties are the continued strikes in America, the unsettled wages question in England, and, finally, the financial chaos all over Europe and the unsatisfactory start of the Genoa Conference.

Spot.—Our market was closed on Saturday for the Easter holidays and on Monday owing to the Sham el Nessim festival. For the remaining four days total sales amount to 6,400 Bales, of which we estimate 4,800 Bales Sakel, 1,100 Bales Uppers, 300 Bales Brown, 100 Bales White and 100 Bales Pilon. Arrivals from the interior at the beginning of the week were large but they have shown a considerable falling off during the last three days owing to the holidays. The climatic conditions have been this week about normal. Sowings are now almost entirely completed all over the Delta, but the progress of the plant is far from being uniform; generally speaking the Central Delta districts, where the finest cotton of Egypt is grown, are again this year the most delayed. Owing to the feared serious shortage of water during the coming months, the adoption of a 24 days interval between two irrigations has been decided upon and this long drought may have, eventually, considerable effect on the yield if we do not have cool weather from June to August.

COTTON TRADE REVIEW.

Manchester, April 29.

The Imperial Ottoman Bank in its weekly cotton trade review states :—

The outstanding feature of the week has been the settlement of the wages dispute. The agreement is that 40 per cent. shall

THE AGRICULTURAL BANK OF EGYPT.

NOTICE IS HEREBY GIVEN that at a General Meeting of the above-named Company, held in Cairo on the 27th April, 1922, it was decided that a Dividend of 8s. per Share on the ORDINARY Shares of £5 each and £10 per Share on the DEFERRED Shares of £5 each should be paid on and after the 4th May, 1922, at THE NATIONAL BANK OF EGYPT in Cairo, Alexandria and London (6 & 7, King William Street, E.C.4).

Payment will be made in London less Income Tax.

The said Dividends will be paid to the holders of Ordinary and Deferred Share Warrants to Bearer on presentation of the respective Dividend Coupons (ORDINARY No. 19, DEFERRED No. 18) at the above Banks.

Forms for listing the above-mentioned Coupons will be supplied on application by the Bankers above mentioned.

Coupons must be left with the Bankers for previous examination.

By Order,

B. HORNSBY,
President.

Cairo, 27th April, 1922.

be deducted from "List" rates immediately and a further 10 per cent. in six months time; no other alteration to be made within the next twelve months. On current wages this is equivalent to 3s. 3d. in the £ at once, and a further 10d. in six months time. It is to be feared that an unfortunate impression was made abroad by the original demand of the employers for 75 per cent. reduction from "List" rates, which proves to be almost twice as much as has finally been arranged; it would be preferable in future if exaggerated demands of this nature could be avoided. The usual trial of strength is now proceeding between buyers and sellers in order to determine who is to have the benefit of the consequent fall in production costs and, not unnaturally, actual business during the past week has fallen off to a slight extent, though probably the amount of negotiation has been larger. At the moment buyers appear to have the upper hand. There is no doubt at all that more machinery is now in operation than was the case two months ago, but the reduced turnover during the past fortnight is raising doubts whether it will be possible to keep all of it running.

Yarn.—The yarn market remains steady, though very little activity can be reported. Spinners are reported to have rather big stocks still on hand in some counts, but as output is probably being kept to the level of consumption stocks on hand are not being increased. The anticipated activity following the adjustment of the wages question has not yet materialised, and such business as has been done is said to have shown little or no profit.

Cloth.—This market has also been quieter than recently. Although enquiry remains on a fairly good scale, much negotiation is necessary before the orders can be brought to book. Bombay and Calcutta are still the principal buyers, and a certain amount is going through for other parts of India. Egypt is said to be buying for replacement such goods as greys and whites when these can be purchased on a low basis, but otherwise the Near East does little. The opinion is gaining ground, however, that stocks on hand are steadily being liquidated, and this factor is becoming a more important one in fixing quotations.

Raw Cotton.—This section remains in the dull state recently reported, and there is very little change on balance from last week's figures. The time is near when we may expect the usual scare news with regard to the growing crop, but in the meantime the weather reports from America are almost the only matters of interest. Closing prices are as follows:—Fully Middling, 10.36d.; Egyptian Fully good Fair, 17.50d.

The Egyptian Markets announce a final dividend of 5 per cent. and bonus of 2 per cent., less tax, making 12 per cent. for 1921 on ordinary shares.

The Calcutta Electric Supply Corporation announce a final dividend at 6 per cent. actual, making 10 per cent. for the year plus a bonus of 1 per cent.

The directors of the Oriental Telephone and Electric Company recommend, subject to final audit, a final dividend for 1921 of 6 per cent. on the ordinary shares (free of tax), making 10 per cent. for the year, free of tax, plus a bonus of 2 per cent., also free of tax.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Bulgaria.

Oil.—The Directorate of Railways and Ports, Sofia, invites tenders for the supply of 900 tons of machine oil; 150 tons of wagon oil; 400 tons ordinary cylinder oil; 60 tons special cylinder oil; 10,000 cases of petrol. The total estimated value of this contract is 17,630,000 levas. The material must be supplied in barrels, and not otherwise. Delivery time: three months for 300 tons machine oil, 50 tons wagon oil, 150 tons ordinary cylinder oil and 5,000 cases petrol; five months for 400 tons machine oil, 100 tons wagon oil, 150 tons ordinary cylinder oil, 60 tons special cylinder oil and 5,000 cases of petrol, and seven months for 200 tons machine oil and 100 tons ordinary cylinder oil. The contractor must pay a tax of 300 leva for every analysis on acceptance of the different kinds of oil and petrol. Tenderers must deposit a sum equal to one per cent. of their estimate, which must be increased to five per cent. when the contract is placed. Payment terms are not specifically mentioned, but they are probably the same as for previous adjudications. The methods of payment in the previous adjudications were half against documents, the suppliers putting up a bank guarantee against this sum, which will be freed against arrival and final acceptance, the balance also being paid on final acceptance. (D.O.T.) May 10.

The Sudan.

Cane or Beet Loaf Sugar.—The Director, Commercial Intelligence Branch, Central Economic Board, Khartoum, invites tenders for the supply of four thousand metric tons net of cane or beet loaf (Ras) sugar to the Sudan Government c.i.f. Port Sudan. Tenders must be accompanied by samples and must conform to the specifications and conditions of tender set forth in the special form on which tenders must be submitted. Copies of this form may be obtained on application to the Sudan Agency, War Office, Cairo. The Sudan Government is not bound to accept the lowest or any tender. Tenders should be in double sealed envelopes clearly marked "tender for sugar." May 10.

Company Meetings.

AGRICULTURAL BANK OF EGYPT.

The report of the directors on the working of the bank for 1921-22, submitted to the shareholders at the nineteenth ordinary general meeting held at the offices of the bank in Cairo on April 27, states:—

The directors have to report that the net profits of the bank for the financial year 1921-22, in accordance with Article 40 of the statutes, amount to £E.512,999.561. From this amount there has to be deducted:—I. the service of the debentures, £E.236,053.264. II. the provision for the reserve fund, £E.15,304.777. III. the provision for the special reserve fund as per Article 40 of the statutes, £E.10,725.002. — £E.271,082.063, leaving £E.241,917.498. And there has to be further deducted:—IV., dividend on £1,250,000 preferred shares, £E.48,750; V., commission to the National Bank of Egypt, £E.704.187—£E.58,454.187, leaving £E.183,463.311, which is available for distribution as dividend on ordinary and deferred shares. The ordinary shares have to receive, in the first instance, dividend at the rate of 5 per cent. per annum, £E.125,990. The balance of £E.62,503.311 is available for the ordinary shares to the extent of one-half, or £E.31,281.656, and for the deferred shares to the extent of one half, or £E.31,281.655.

Ordinary Shares.

The amounts therefore available for dividend on these shares are as follows: Balance from the year ending 31-1-21, L.E.327,239.528; interest for the year, accrued on the above balance, L.E.16,301.976 — L.E.343,601.504; Dividend at the rate of 5 per cent. per annum, as stated above, L.E.120,900.; further amount available, L.E.31,281.656; total L.E.495,783.100. The directors propose to pay a dividend at the rate of 8s. per annum for the financial year 1921-22, amounting to L.E.193,440. and to carry forward the balance of L.E.302,343.100.

Deferred Shares.

The amounts available for dividend on these shares are as follows: Balance from the year ending 31-1-21, L.E.255,933.364, interest for the year, accrued on the above balance, L.E.12,790.668; total, L.E.268,730.032; amount available as above, L.E.31,281.655; total, L.E.300,011.687. The directors propose to pay a dividend of 4s. per share amounting to L.E.78,000. and to carry forward the balance of L.E.222,011.687.

In making these proposals we recommend the maintenance of the same dividends as those paid during the past four years. In order to do so it will be necessary to draw on the balance carried forward to the credit of the ordinary and deferred shareholders' accounts. We have effected during the past year changes in certain of our investments, both in the general investment account and the general reserve investment account; we have also realised part of our holding in National War Bonds in order to obtain the funds needed for new mortgage business and we have transferred £50,000 nominal of British Government 5 per cent. War Loan 1929-47 from the general investment account to the account of the general reserve fund.

*The loss resulting from the sale of certain of the securities held for the general reserve investment account amounted to L.E.30,588: this loss has been debited to the general reserve fund. The loss on the realisation of the securities held in the general investment account has been charged to the fund for provision for depreciation on investments, which has thus been reduced from L.E.245,000 to L.E.195,672. This amount of L.E.195,672 is more than sufficient to cover the difference between the prices at which the Government securities stand in our books and the market price on January 31st, 1922. We now hold £2,800,300 nominal of our own debentures which have cost us £2,264,700, as shown in the balance sheet. The Mortgage Company of Egypt, Ltd., for the year ending 31st March, 1921, again distributed a dividend of 12 per cent. on the ordinary shares. In view of the heavy taxation on profits to which companies with their central direction in England are subjected, measures were taken during the year for the transfer to Egypt of the control and full administration of the Mortgage Company. When completed, these measures will, we are advised, result in an appreciable reduction of the tax which is paid to the British Treasury. The business of the Mortgage Company was more active than in previous years but the fluctuations in the cotton market have prevented a normal disposal of the crop and some of the borrowers who still hold their cotton have not paid their instalments. Some increase must then be expected in the arrears due to the company on the 31st March, the close of the financial year.

Arrears.

On the 31st January, 1922, the total arrears outstanding were L.E.223,988—against L.E.172,700 on the 31st January, 1921.

	Capital L.E.	Interest L.E.	Total L.E.
Accrued up to January 31st, 1921	99,658	73,102	172,760
Of which collected or written off from 1st February, 1921, to 31st January, 1922	67,503	53,602	121,105
Leaving	32,155	19,500	51,655
To which have to be added the arrears of 1921-22	101,356	70,977	172,333
Making a total on January 31st, 1922, of	133,511	90,477	223,988

Of the sum of L.E.223,988 in arrear shown above, L.E.90,477 represent interest. No credit has been taken in the profit and loss account for any part of this sum, since, in accordance with the statutes, only interest actually encashed can be included in the profits. The whole of the remainder, viz., L.E.133,511 representing capital overdue, has, as required by the statutes, been deducted from the profit and loss account before arriving at the balance available for distribution. Consequently any encashments made on account of the sum of L.E.223,988 will go entirely to the profit of the year in which they are effected. Up to the 15th of March the encashments since the 1st February, 1922, on account of the arrears of L.E.223,988 amount to L.E.25,500.

The percentage of the annual instalment collected is the lowest for some years past. This is chiefly due to the fall in the price of cotton in October and to its subsequent fluctuations and the consequent difficulty experienced by most of our clients—who are small landowners—in finding purchasers of their crops in the villages at the real market prices. A sum of L.E.458,352 was collected out of the annual instalment of L.E.630,985 and L.E.119,481 was collected from the arrears, making a total collection of L.E.577,833. The total of arrears carried forward is L.E.223,988, as compared with L.E.172,700 in the previous year.

The total of loans exceeding L.E.1,000 each was L.E.111,764 on 31st January, 1922. Our arrears on these loans were L.E.6,630.

Land Acquired.

The area of land owned by the Bank remains at much the same figure as in the previous year, as can be seen from the following table. We hope that we shall be able to sell gradually the 432 feddans remaining on our hands at satisfactory prices. The number of expropriations made by the Bank during the year are as follows: Number of cases in hand on 1-2-21, 402, number of cases begun during 1921-1922, 656, total, 1,058; Cases settled, 541, balance, 517; Cases brought to expropriation, 48; balance pending, 460. In 20 of these cases of expropriation 69 feddans were bought in by the bank, and in 28 remaining cases 133 feddans were bought in by third parties. The directors beg to thank the staff at head office and the agencies for their satisfactory work during the year.

INDO-EUROPEAN TELEGRAPH.

Near East Concessions.

The Fifty-fifth Ordinary General Meeting of the Indo-European Telegraph Company, Limited, was held on April 26 at the company's offices, 18, Old Broad Street, E.C.

Mr. J. Herbert Tritton, the chairman, presided.

The Secretary (Mr. John I. Bethell) having read the notice convening the meeting, the Chairman, in the course of his speech in moving the adoption of the report, said:—Taking first the accounts for 1919 and 1920, there is really very little to say. In the accounts for 1920 appears an item in the balance sheet showing the expenditure incurred, £43,926 4s 7d, in preparation for the re-establishment of the line. The directors had determined to have in readiness not only the main requisites, telegraph wire and posts, but, as far as possible, minor accessories, and purchased these when opportunity offered. In the year 1921 they pursued the same policy, and the accounts of that year will show a large increase on the figure I just mentioned, including as they will the most modern appliances in connexion with road transport and supervision. I much regret that we are still without the necessary information from other administrations to enable us to close the books for 1921. You may be interested to learn that ours is not the only telegraph administration suffering under this disability.

The investments continue to show an appreciation, while, having regard to actual political developments, the position of the Russian assets may be regarded in a somewhat more favourable light; the directors are, therefore, of opinion that any drastic step, such as writing off, need not at the moment be taken. With regard to the final dividend for 1921, the equalization of dividend fund is, as the shareholders were informed at the last meeting, now exhausted, and the total dividend for 1921 is therefore restricted to 7 per cent.

The report for 1921 contains a paragraph as follows:—"There are, however, at this moment certain important developments which the directors hope to have in shape to report to the shareholders at the general meeting." I am very pleased to inform you that the directors have at last good news to communicate. The Polish concession was signed some time back. Within the last few days we have been advised by the Russian Department of Posts and Telegraphs that our concession from the Moscow Government was signed on April 12. This is, of course, a very important fact, as the concession covers the whole territory traversed by our line, from the Polish frontier on the west to the Persian frontier on the east, transiting various Federated States, who have also approved the concession. We owe much to the efforts of our representative in Russia, Mr. Watt, in this connexion. Our concession from Persia is already in existence, and that from the German Government, although not actually signed, owing to international politics, has for a long time been agreed in principle and should offer no difficulty.

Shareholders will be glad to know that the condition of the company's line is more satisfactory than could, perhaps, have

been expected. We are informed from a reliable source that the line is workable for a stretch of over 200 miles north-west of Odessa, whilst east of Odessa a similar state of affairs exists for 300 miles into the Crimea. Beyond the Straits of Kertch the line is in working order between Ekaterinodar and Tiflis. Between Tiflis and Erivan there is a short stretch where the repairs have not yet been completed. The section Erivan-Djouffa, on the Russo-Persian frontier, has undergone repair and is now in working order, as is also the company's Persian section, Djouffa to Teheran.

Further, you will be pleased to hear that the Black Sea cable, Odessa-Constantinople, is again in working order, and, we understand, has already been officially opened by the Soviet Government representatives at Odessa. This cable will, therefore, shortly be able again to carry the classes of traffic formerly dealt with by it, and will, we hope, help to re-establish business relations generally with Southern Russia and the Black Sea ports. We are also informed by the Indo-European Telegraph Department that their Persian lines are in good order and are available at any moment.

The most arduous part of our work is, undoubtedly, the section from the German and Polish frontier on the west to the Polish-Russian frontier on the east. Much of our line in that territory has absolutely disappeared as a separate international line, and where three or four wires were suspended there are now 10 to 20 of all sorts, including telephone wires; we, therefore, in accord with the Polish Government, arrived at the conclusion that our line must be rebuilt in a new location—namely, along the great *chaussées*, or high roads. Our engineering staff is on the spot, as also the material required, but the work of building a fresh line of some 400 miles will occupy some months.

It is of the utmost importance to the shareholders that the Indo route should again carry international traffic, and the directors are making arrangements where the company's line cannot at once be made available to obtain from the Governments concerned the temporary use of a wire or wires to enable us to carry through-traffic.

This should offer no difficulty, and the directors hope before long to be able to announce that the Indo route is once more carrying international traffic, after being totally interrupted since July 31, 1914.

The resolution was carried unanimously.

IONIAN BANK.

Greece's Financial Position.

The ordinary general meeting of the Ionian Bank, Ltd., was held on April 27 at the offices of the company, Basilidon House, Moorgate, E.C., Sir John Stavridi, Chairman of the company, presiding.

The Secretary, (Mr. Wm. A. Shaw, Litt.D.) having read the notice convening the meeting and the report of the auditors, the Chairman said the year had been one of extraordinary difficulty and perplexity, causing the directors to act with the greatest caution. Nevertheless, the business had considerably expanded and the profits had responded. Last year he warned the shareholders that, having regard to the financial boycott imposed upon Greece by the Great Powers, and to the prolongation of the war in Asia Minor, Greece might find herself in such financial straits as would lead to disaster. Since then war expenditure had continued and no assistance from outside had been obtained, and those months had been a searching trial for the country. Since the autumn of 1912 Greece had never been at peace, and if her finances had withstood the strain it must be attributed to the inherent virility of the race and the adaptability of her public financiers. So far Greece had largely escaped the effects of the world-wide depression following the boom of 1920, and her temporary prosperity was reflected in the balance sheet now presented. The truth of the matter was that the trials of the Greek State had necessitated forced paper issues, which had depreciated the drachmae currency, reflected in Greek bank balance sheets in inflated figures of deposits and profit. Further, the vagaries of Greek exchange had caused speculation in exchange, and at such a time the banks were bound to make the middleman's profit.

These views made him utter a word of caution. They all looked forward to the time when Greece would be at peace, when demobilisation would have removed the one disordering influence in her finances, and when the drachmae would return to par. The process of deflation would inevitably result in a contraction of the mere volume of the bank's business in the figures of the balance sheet and the items of profit and loss account. While, therefore, he congratulated the shareholders on as prosperous a year as the bank had ever enjoyed he must forecast the possibility of some contraction in the near future, but this outlook need cause them no apprehension. In proportion as deflation rehabilitated the drachmae so it would improve the sterling value of their Greek profits. For the moment, however, there was no question of contraction or deflation. Greece was being saved temporarily by the fall of the drachmae, and as her chief exports were a virtual monopoly she was able to exact to the full the advantages of a depreciated currency. Last June the Government, to arrest the rapid depreciation of the currency, passed a special law establishing a consortium, formed of representatives of most of the Greek banks and members of the Government, its function was to regulate the export of capital and thus to stabilise exchange. This scheme had acted as a drag on the movement of capital into and out of Greece, and had made the ordinary depositor suspicious of parting with his foreign deposits. The consequent accumulation of unutilised capital in the country

and abroad had run up the price of securities in Greece and the value of deposits abroad in pounds, francs or dollars, expressing respectively the internal and international depreciation of the drachma. This, however, was probably the only theoretical objection which could be raised against the scheme, the operation of which had admittedly been in the direction of control of imports and also of checking exchange gambling, both these results being incontestably beneficial.

Inherently Greece was sound, but she could not stand the cost of war save by subsidies, which were denied her. If she were at peace and her army and fleet demobilised she would right herself speedily, but as these conditions did not yet prevail she was faced with a daily increasing deficit, now amounting to 2,547,618,110 drs. All the bank's new branches recently opened were developing very satisfactorily.

The expansion of the balance sheet figures must have impressed itself upon the shareholders. It arose partly from satisfactory business in Greece, Egypt and London, and partly from the conversion of the drachmae accounts at the par rate of exchange. The adoption of the latter system swelled materially all the figures in the accounts, without affecting the sterling balance of profits. The directors were considering the conversion in future of the drachmae assets at the exchange of the day on which the books were closed, at all events until the exchange was stabilised. If this alteration were made in the next balance sheet, the figures would show a truer position in sterling, though they would not be properly comparable with those now presented. If the directors' recommendations were adopted, the reserve fund would be increased by £20,000, reaching £150,000, entirely in sterling. In cash notes, investments—mainly British Government short-term bonds—and bills receivable the bank held £2,729,317, almost automatically realisable in case of need, showing a very strong position. All the investments stood in the books at considerably below market price, and there had been a further considerable increase in value since 31st December. They showed a net profit of nearly £20,000 more than last year, with the result that, in addition to the usual dividend and bonus of 7 per cent., tax free, the Board recommended the transfer of £20,000 to reserve fund and of £5,000 to the pension fund, the latter now reaching £39,650.

The report and accounts were unanimously adopted.

COMPANY NOTES AND REPORTS.

Madras Electric Tramways.

The net profit of the Madras Electric Tramways (1904) for 1921, after debiting interest and London office expenses, making provision for Debenture stock sinking fund and transferring £10,000 to depreciation and renewal, was £9,744, making with £5,555 brought in £15,299. The directors recommend a dividend on the ordinary shares of 5 per cent. for the year, free of tax, carrying forward £6,430. The traffic receipts and running expenses in rupees show decreases of 15.5 per cent. and 10.5 per cent. respectively on 1920.

Ceylon Timber and Rubber Syndicate.

The report of the Ceylon Timber and Rubber Syndicate for 1921 states, that as a result of the alteration in labour laws of Ceylon cost advances can no longer be considered an asset; the directors have accordingly decided to write them off. The amount brought in was £964; add reserve for excess profits duty (no longer required), £4,001; total, £5,955; deduct loss for the year, £3,229; cost advances written off, £1,341; income-tax, £488, leaving to be carried forward £807. The rubber crop (restricted) was 353,944 lb., against 391,503 lb. for the previous year; net price realised, 7½d. per pound. The estimated crop for the current season is 430,000 lb.

In September, owing to the company's financial requirements, the management was transferred to the Anglo-Ceylon and General Estates Co., Ltd., who have agreed to advance up to £4,000, making an immediate issue of debentures unnecessary. In consequence of the transfer, Mr. G. H. Champion and Mr. T. A. Ball resigned their seats on the board, and Sir Edward Rosling was appointed a director. Shareholders are asked to sanction payment to Mr. T. A. Ball of 200 guineas as compensation for loss of office. Extraordinary meetings are to be held for the purpose of adopting new articles of association, the old articles being unsatisfactory and out of date.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 22 amounted to £7,689.

The ordinary general meeting of shareholders of the Union Foncière d'Egypte is to be held on May 15, at 4.30 p.m., at the Head Office of the Company, 4 rue Fouard Ier, Alexandria.

The annual ordinary general meeting of the Egyptian Delta Land and Investment Co., Ltd., will be held at the offices of the company, 14, Sharia Sheikh Abou-el-Sebaa, Cairo, on Friday, April 28, at 4 p.m.

With regard to a recent report that the Ottoman Government has abolished Customs duties on the entry into Turkey of motor vehicles destined to ensure the public services and that oil and the material necessary to ensure these services will also be admitted without charge, we are informed that Customs duties are still being charged as before.

NOTES OF THE WEEK.

The Italo-Turkish Agreement.

To nerves already affected by the political excursions and alarms that have marked the course of the Genoa Conference the news that a separate Treaty had been concluded between Italy and Turkey came as an unpleasant jar, and the shock was not much alleviated by the earliest assurances given by the Italian Government, while withholding the details of the agreement. } The British Government at once took the view that, whatever the subject of the negotiations might have been, there ought to have been no separate undertaking with Turkey at this particular time, when the Allies were trying to find a basis for joint action with regard to Turkey; but it has since accepted the assurances of the Italians that no violence has been done to the Allied cause. The agreement is with the Constantinople Government, and the latter is said to have undertaken to examine favourably Italian applications for certain concessions for railways, mines and public works in Asia Minor. There are no counter-concessions nor undertakings on the part of Italy, no agreement of any kind between Italy and Angora, and no supplementary agreement of any kind with Constantinople. Whether the full text of the treaty will throw any further light on the strangely accommodating spirit shown by the Turkish Government remains to be seen; but coupled with the French Treaty with Angora, it suggests that the only difference between post-war and pre-war Constantinople will be that the shadow of the German military incubus will be lacking; precisely the same intrigues will lower the prestige of the Continental Powers in the eyes of the Turks.

Reported Outrages at Kharput.

A terrible story of wanton outrage and callous and systematic ill-treatment of Armenians and Greeks is told by Major Yowell, Director of the American relief work at Kharput, who with three other American workers has been deported by the Turks, and has arrived in Constantinople. Out of thirty thousand Greeks deported, five thousand are reported by Major Yowell to have died on the way from Sivas to Kharput, and another five thousand to have died at Kharput or west of it. The relief workers were not allowed to take charge of the dying deportees' children; and "all along the route the Turks were allowed to visit refugee groups and select the women and girls whom they desired for any purpose." As to the Armenians in the district,

they are described as being in a state of virtual slavery, prohibited from travelling even within the country, and subjected to legalised robbery of every description. The story, in a word, is thoroughly revolting and reminiscent of the worst days of Abdul Hamid or of Talaat Bey and the Germano-Young Turk régime.

Effects in Europe.

We do not know how far it is based upon Major Yowell's personal observations and how far upon hearsay, and we do not lose sight of the fact that he declares that "these American deportations are the culmination of a long series of unfriendly acts." But unless it can be refuted, and promptly, by the Turks, it is bound greatly to harm them in the eyes of the world. If it be shown to be substantially true, it will stir up feeling throughout Europe and America with results most prejudicial to Turkish interests as a whole, and will mean that the Entente Powers will be compelled to insist upon stringent guarantees for the protection of minorities in Turkey. Indeed, it is the very obviousness of these results that makes it natural to wonder whether the facts of the case can be actually as bad as they are represented. Even if we do not credit Angora with any moral aversion from such proceedings as those described, we find it difficult to believe that it would, at this time, be so blind to the consequences that must follow on such crimes.

The Allies and the Turks.

The prospect of a really satisfactory arrangement between Greeks and Turks seems almost as remote now as it was before the opening up of the present negotiations. The reports from Kharput, alluded to above, have already had their natural effect upon the Greeks; and the conduct of our Allies in entering into separate agreements with the Turks, whether of Constantinople or of Angora, is not calculated to help matters forward. Unfortunately there is increasing evidence that the policy of self-seeking at the cost of the Alliance is sometimes pushed to dangerous lengths. From a source which we have every reason to regard as trustworthy, comes a report that at a dinner given at the French High Commission in Constantinople in honour of General Gouraud, the latter in an after-dinner speech said that the Turks would do well to reject the recent proposals of the Allies, as they would secure much better terms by holding out. With such an example of Allied "unity" before them, is it wonderful that the Turks feel safe in embarking upon that protracted process of haggling against which Lord Curzon has

actually warned them? If this kind of thing is to go on—and it would not be difficult to give other examples—it would be as well if all pretence of any common Allied policy in the Near East were abandoned.

Great Britain and the Sudan.

Lord Allenby has returned to Egypt from the Sudan, and has expressed his satisfaction with what he saw in the latter country. He told the Cairo correspondent of *The Times* that wherever he had gone the people expressed contentment with the present system of government, and he was able to give reassurances regarding the future of the country to a number of the leading chiefs who visited him at the Palace in Khartoum. Referring to a fear which was known to be very widespread among the people of the Sudan, that there might in future be a less close association on the part of Great Britain in the development of their country, he told the chiefs that the British Government had no intention of the kind; and he reminded them of what Mr. Lloyd George said on the subject in the House of Commons in his declaration regarding Egypt, made on February 28. The chiefs, Lord Allenby declared, might return and tell their people that Great Britain would not abandon the Sudan. In view of the persistent attempt on the part of Egyptian agitators to represent that the Sudan is and must remain Egyptian, it is just as well to have this point restated from time to time, and if the Egyptians are wise they will note carefully what Lord Allenby has said. In view of all that he has done for them, they cannot regard him as anything but a good friend; and when they find him underlining what the Prime Minister has already stated so emphatically they will be wise to take the very clear hint.

Egypt and the Sudan.

Unfortunately the low Nile affords an opportunity to mischief-makers in Egypt to represent it as due to British action in withholding water for the Sudan; and those Egyptians who claim that the southern country should be put under the rule of Cairo are making the most of the circumstance. There have been several attempts to influence the Commission now working on the drawing up of the Egyptian Constitution to regard the Sudan as integrally Egyptian; and Prince Toussoun has suggested that the Ministry should insist upon the abolition of the Anglo-Egyptian Sudan agreement. We can only hope that the declaration just made by Lord Allenby at Khartoum will put a stop to this very foolish agitation, which can do no good, and may do much harm.

The Lesson of Syria.

Obscurity still envelopes the situation in Syria, for most of the news which does leak through to Cairo and thence to us is promptly contradicted by the Havas Agency or by French official sources; and it does not appear probable that we shall get at the facts of the case until the whole trouble is over. In the meantime we may note one or two of the wider lessons that may be drawn from the incident. There can be no doubt that France as a whole is disappointed and almost surprised at the turn events have taken in Syria, and Frenchmen somewhat naturally attribute the painting in of the background of the picture to Great Britain, whose support of the Arab movement was never in consonance with France's known designs in Syria. France will never trust the Arabs as Great Britain is trusting them; indeed she thinks so naïf a faith not only undesirable but foolish. She is consequently determined (and there

can be no doubt that she will be successful) to quell firmly and fearlessly all manifestations of pan-Arab agitation.

Great Britain and France.

This fundamental difference between their respective attitudes towards the Arab question sometimes makes one despair of any accord in the actions of Great Britain and France in the Near East. General Gouraud, who, we believe, is destined to be the Lyautey of Syria, has an extremely hard task in front of him, more difficult, perhaps, than that of Lord Allenby in Egypt; and he is openly aggrieved that the British Administration in Palestine should have adopted so passive a policy towards his difficulties. There is a hazy feeling in France that Great Britain is maliciously pleased at her Ally's troubles in Syria, and it is certainly thought there that this country is ready and willing to profit by any weakness or hesitation on the part of France. But we know this is not the truth: England has too many of her own troubles, and very assuredly does not wish to add to them. She cannot, perhaps, go so far as France in wishing to exterminate or to moderate the ideas of independence now surging in the minds of so many of the peoples of the Near East, but she is convinced, as General Gouraud is recently reported to have said, of "the imperious necessity for close Franco-British co-operation in grappling with the common danger." There is a long road in front of these native peoples before they attain to complete self-rule, and we are not without hope that the administrations of at least Syria, Trans-Jordan and Palestine may approximate each other in the future more closely than they have in the past. For to treat these several countries as individual and independent problems will be fatal; no number of local differences can obscure their essential oneness.

Persian Finance.

The Teheran correspondent of the *Pioneer* reports that the Persian Mejliss has approved the Cabinet's decision to engage American financial and other Advisers, and that Mr. Morgan Shuster's name is mentioned in this connection. The American Government is to be asked to lend its assistance in securing capable persons, and the Persian Minister in Washington is understood to have taken steps in this direction already. It is natural to conclude that Persia is looking to America for financial assistance as well as for a Financial Adviser, and it will be interesting to see what America thinks of her as a borrower. One thing is certain: Persia's need of help, especially of financial help, is urgent; and though she may find it less easy to believe, even now, her need of guidance is hardly less urgent. Whoever goes to her rescue will have no easy task, but Mr. Morgan Shuster showed himself when he was in Persia before a man of parts, and if, with his country's approval, he steps into the breach now we shall be able to think that he may succeed—if he is allowed to do so by the Persians and their neighbours.

The Indian Frontier.

The welcome absence of disturbing news from India continues, and the most interesting item of last week was the disclosure of a difference of opinion between Whitehall and Simla regarding the measures of defence required on the Waziristan section of the Frontier, a matter of such intricacy that immediate unanimity is scarcely to be expected. No very great sensation seems to have been caused so far to turn this difference of opinion into a "crisis," in which Whitehall is necessarily

in the wrong, and we sincerely hope that the troubled waters of Home politics and Frontier technicalities are not destined to intermingle just at present. There is of course an obvious risk that the pressure to economise in India may induce, or drive, Simla to go a little below the margin of safety, as has happened once or twice before; in that case the savings of the summer would probably be swallowed up in a winter campaign, and we take the essence of the situation to be that the authorities in this country are anxious to avoid the possibility of such an unfortunate result.

The Geography of Economy.

It may be worth while to point out that the pressure to economise on the Frontier is by no means conducted on racial lines, and a study of published opinions leads rather to the conclusion that it is largely a matter of geography, for taking a line through Lahore, Allahabad and Calcutta, it might almost be argued that the pressure increases with the square of the distance from Peshawar. The attitude of some of the Calcutta journals in particular is remarkable to those who have studied the records of the days when a hostile frontier was close at hand and the citizens of all races used to go into a panic on very slight excuse. The "pacifism" of Madras has been much less in evidence since the Moplah rebellion recalled the South of India for the moment to a sense of realities; and perhaps Calcutta would have rather less to say about cutting down the military budget if the malcontent Waziris happened to live within convenient raiding distance of Chowringhee. Big empires have drawbacks of their own, and not the least of them is the danger of a want of sympathy with the fellows who live on the other edge of the map.

Military Administration.

We fancy a good many readers, military as well as civilian, will sympathise with Sir William Robertson's comment on the budget debates at Delhi, that the Commander-in-Chief would have been more usefully employed in attending to the training and administration of his troops, and that his position would be strengthened rather than weakened by the appointment of a Minister of Defence to take over the new burden of leading the legislature on subjects of military import. Lord Rawlinson is a tolerably effective speaker, but that may be described as a fortunate accident, and, as things stand, the men responsible for future appointments may have to choose between a first-class soldier who cannot speak, and a second-class one who can. The danger of either selection is so obvious that there is much to be said for a division of labour which should secure an effective speaker in the Legislature, and an effective soldier at the head of an army which still insists on personal command.

THE WEEK AT HOME.

London, Monday evening.

Genoa.

There is no longer any doubt that Genoa is a wash-out. Mr. Lloyd George has done his best, or better than his best, but he cannot work miracles, and the antagonisms of Europe have been too much for him. France and Belgium on one side, Russia and Germany on the other, have proved irreconcilable. It may be argued that the Conference never had a fair chance; the Russo-German treaty wrecked it at the start, and the publication last week of the alleged military clauses of that treaty has not helped matters. These clauses will

probably be denied, but how many people will believe the denial? It is to the interest of both Russia and Germany to crush Poland, and the treaty seems expressly designed to that end. Other clauses in the treaty are aimed at Afghanistan and India—a fact which has not escaped attention in Anglo-Indian circles.

This is not a very hopeful basis on which to build a new Europe, and France does not believe a word of the Bolshevik protestations, nor, in spite of the Coalition Press, do many people here put their trust in these murderers of princes; and M. Chicherin's denial of Soviet complicity in the murder of the Tsar has made a bad impression; even the *Daily News*—which may be treated as a foolometer in Russo-German credulity, told M. Chicherin politely that he was a liar. Moreover, the Russians have not really talked business about recognition of their repudiated debts, and the city here distinctly sympathises with France over that matter; a fact which does not lose in significance when it is added that the city by no means sees eye to eye with the whole of French political or financial policy, which is thought a little exigent and autocratic. But the theory industriously promulgated in some quarters, that France is aiming at a hegemony of Europe similar to that of Germany ten years ago, is not yet taken very seriously here. For one thing, the French population is down by four millions, and for another, it is obviously to the interest of Germany to spread reports of this character. However that may be, the reaction on the English mind, as I pointed out last week, is that a little isolation will do us no harm—this policy is definitely advocated in one of the weekly reviews this week—and it will be interesting to see whether Mr. Lloyd George has his ears close enough to the ground to hear these popular murmurs.

The Prime Minister's Future.

There is naturally a good deal of speculation as to the effect of Genoa on Mr. Lloyd George's future policy and position. It is his first definite failure. It is no disgrace to him, and there are some people who say that to fail in this piece of political idealism does him more honour than many of his previous successes. That may be the judgment of history, but in contemporary politics a failure is a failure, and paid for immediately in loss of prestige. This is a factor to be reckoned with in home politics. He is being advised by candid friends in the press to think a little less of European and rather more of home and Imperial affairs, but the difficulty in home affairs is that the Conservatives are in a majority, and do not believe in the Prime Minister's ideas of reform.

All these things make one rather dubious of forecasting the future of home politics. But on the whole I fancy that the betting is increasingly against a summer election.

The Academy and Opera.

This year's Academy seems to have a rather better collection of pictures than usual, or else the critics are more merciful. The best picture to my mind is the portrait of Mr. Bernard Shaw, and the worst are those inevitable nature scenes with cows in the foreground and a cloud or a mountain at the back.

The music season is in full swing. The opera people at Covent Garden are doing their best in rather difficult circumstances. The programme is distinctly good, and "Parsifal" is now being played to full houses.

The Budget.

Sir Robert Horne's first budget, introduced last week, was a distinct success. It knocks a shilling in the pound off income-tax, which is equivalent to taking off the last straw before the camel's back is broken; fourpence a pound off tea, with a parallel reduction on coffee and cocoa; and a halfpenny off letters and postcards, while the Sunday collection of letters is restored.

The confectionery trade had expected a reduction off sugar, and is howling at the Chancellor on this account; but the chocolate and toffee makers are not exactly ruined paupers as the result of the sugar duty. Tobacco and beer, both of which are numbered among the profiteers, are taxed as before; there is room for a reduction of prices on present costs. The entertainment tax goes on, despite the wails of the actors.

The inhabited house duty is to go up, and the farmers' income-tax is to go down; there is to be no repayment of debt this year, and the sinking fund is suspended. A few stern critics have denounced this concession to empty pockets, but it was the simple truth that the nation was taxed beyond its capacity, and people simply could not stand the pace. If trade revives, the Chancellor's little gamble on income-tax will not cost him much; and in any event the pensions account will be a good deal less next year, while economies are being made as rapidly as possible in general expenditure, so that with any luck the dismal predictions of a heavy deficit in 1923 should not materialise. At any rate, nobody is looking the Chancellor's gift-horse in the mouth, and we all hope for the best.

The City View.

The City seems to think that the Budget on the whole was as good as was to be expected in the circumstances, although it dislikes the Corporation Profits Tax as one that discourages enterprise in trade because it penalises the ordinary shareholder. But the reduced Income-Tax automatically sends up the yield of securities, which in the present coming-on disposition of the investor, is a bull point; and anything that reduces the cost of living like the reduced tea duties, is all to the good. Orthodox financiers are also relieved that Sir Robert Horne did not take the easy course of "making posterity pay" by capitalising the pensions account, although he was strongly pressed to do so in certain quarters. The Chancellor has justified his growing reputation as a sound man in Lombard Street.

Railway Rates.

Another organised protest is being made against the continued maintenance of high transport rates by the railways. It was high time, for the present charges, both for passengers and goods, are perfectly indefensible. Almost everything else has fallen except transport

charges, with the result that trains run half-empty and industry is bled white. Commercial men have a real grievance, but they will have to push hard and long before the companies make any concession.

Doctors' Fees.

A similar but smaller controversy has blown up about the fees charged by specialists. Some people have a mania for consulting Harley Street, and it appears that the medicos have put their charges up. As they have to pay extortionate rents and taxes, and custom compels them to do half their work at the hospitals for nothing, one can hardly blame them; after all, they want to go on living as much as their patients.

But there is something wrong with the system. I remember years ago being hauled off to Harley Street, and being told I should probably have to undergo an operation; the fee would be 250 guineas. Even with the fear of death before my eyes, this was more than was in my particular till at the moment, and I doubt whether banks will grant overdrafts payable in the next world. When I explained my difficulty, the great man thought for a moment, and offered to do it for nothing—which was almost as embarrassing. He explained that it would hurt his professional reputation to take a lower fee, but it would not hurt him to take no fee at all. One sees the point, but it seems absurd nevertheless—the more so as I was sent next to a great physician, who charged me only three guineas for telling me there was nothing really the matter except overwork, and that a week in bed was the real cure.

Cocaine.

A good deal of anxiety has recently been expressed about the spread of drug-taking, and more particularly the growth of the cocaine habit. At one time I thought this was rather exaggerated, I suppose for the simple reason that I am not a devotee of the stage-door or the night-club. But there have been several suicides of late in which cocaine has been the direct or indirect cause, and many other criminal cases in which it has been suspected although not actually proved to have played a part. The police keep a sharp look-out for the degraded people who traffic in this forbidden commodity, and the magistrates give them sharp sentences when caught, but unfortunately the profits are high, as the victims of the disease will do anything to get at the poison.

The Week's Books.

"The Real Tsaritsa" (Thornton Butterworth) by Madame Lili Dehn, a personal friend of the late Empress, is an appreciation rather than a strict biography of a much maligned woman. As a private individual she was loved by many; as a Queen she was not altogether successful, but it must be remembered that her husband was a weak man in a very difficult position. The author declares that there was no foundation for the accusations of pro-Germanism; she does not really clear up the Rasputin business.

"A New Medley of Memories" (Arnold) by the Right Rev. Sir David Hunter-Blair, the most human of Benedictine monks, is one of those books whose almost every anecdote is both good and new. I extract one: "An old peer from the country presented himself at a levee at Dublin Castle; and His Excellency (the Viceroy) engaged him in conversation, starting as usual with the weather. "Wonderful rain we've been having; everything coming up out of the ground," said the Viceroy. "God forbid," said the old peer. "I said everything was coming out of the ground" repeated H.E. slightly raising his voice. "And I said, 'God forbid!'" retorted the old gentleman; "I've got three wives buried under it." OCELLUS.

BY AIR TO BAGHDAD.

We hope to publish next week an illustrated article, "By Air to Baghdad," descriptive of a recent flight from Cairo to Baghdad and back. This will be followed by a second illustrated article dealing with the Royal Air Force in the Middle East.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, April 29.

The End of the Season.

Easter week may be regarded as bringing the winter season to a close. Reviewing the latter, one may with truth say that it has been a successful one. Admittedly nowhere near as brilliant as pre-war seasons—that could scarcely be expected in view of the change which class and other conditions have undergone all the world over—it has nevertheless been the best that we have had since the war. With falling hotel prices and, if only the steamship companies can be induced to reduce their fares, cheaper travel, the next season ought to be still better, and the Association which is looking after the tourists' interests of Egypt could well concentrate its efforts on securing more favourable terms from the shipping companies, though I must admit the latter are a very tough nut to crack.

In this connection some attention might be directed towards making Helwan a more attractive resort from a social point of view. It is a wonderful place, situated as it is in the heart of the desert, within relatively a stone's-throw of Cairo. Its air possesses a healing balm for all ills of the mind and body, while it boasts of sulphur baths which are unrivalled in the world and make it the only winter health resort of its kind in or within hail of Europe. Of hotels it possesses several excellent ones, of which the "Grand" stands out as the most comfortable and most accessible. Helwan has a very "sporting" golf links but on the purely social side it is sadly lacking in amenities. It is, indeed, surprising that a place with such natural attractions should be so overlooked by those who cater for the public and any syndicate which had the enterprise to put up a little money in order to provide Helwan with social amenities—for which there is ample local scope both as regards space and opportunity—ought to make a good thing out of its initiative.

Egypt at the Imperial Institute.

News has been received here that when the King and Queen recently visited the Imperial Institute they were much interested in the Egyptian exhibits, and purchased two of the rugs exhibited there. It is not generally known that, like India, Egypt has a Court of its own at the Imperial Institute, where articles of every description manufactured and produced in the country are exhibited. The exhibits are not yet quite complete, but what is shown should give an admirable idea of the agricultural and industrial resources of this country and a visit would well repay anybody's while.

Among the articles shown are Amria rugs, which are manufactured by the Bedouin at Amria in the Western Desert, and are much in demand owing to their durability and their quaint colouring. It was two of these rugs that H.M. the Queen recently purchased, and I am informed that a much wider selection than is on show at the Imperial Institute is to be found at the agency established at the London School of Weaving, No. 13, Old Cavendish Street, by the Frontier Districts Administration under whose direction the carpet-making industry is carried on at Amria.

Alexandria Flower Show.

An excellent flower show was held in Alexandria last Saturday under the auspices of the Alexandria Horticultural Society at San Stefano. The show was opened by Prince Omar Toussoun, who has long been a generous supporter of horticulture in Egypt. Most of the prize-winners were Europeans but there were quite a good number of exhibits from Egyptians and the show certainly gave evidence of the growing interest in horticulture and of the advance that has been made of late years.

Possible Clue to Recent Shootings.

The police are at present engaged in investigating a case which has all the promise of an interesting sequel

to the recent shooting of Englishmen. The other evening the informer in the conspiracy case which came before a Military Court last month, was in Bulaq Street when he was suddenly shot at from behind and wounded in the leg. To the police he made a charge against a certain man of his acquaintance, who on being arrested declared his innocence and accused three other men. The latter were arrested and their houses searched. In one of them was found an Army Service revolver, for which the man had no licence. Quite naturally, considerable secrecy is being maintained with regard to the evidence which the inquiry is producing. It is, however, interesting to note that the revolver seized is of the same pattern as the one used in several of the attempts on Englishmen, and that the arrested men belong to the Railway Workshops. It is thought that these facts, combined with the attempt on the informer in the recent conspiracy case, may lead to the identification at any rate of the assailants who attacked the Englishmen connected with the Railways, where it is known that a secret society has existed for some time. If sufficient evidence is forthcoming to convict the men now under arrest, and in any case when the man in whose possession the unlicensed revolver was found is tried, it is sincerely to be hoped that there will be no repetition of mistaken clemency such as was shown in the recent conspiracy case.

An Opposition Meeting.

For the first time under the new régime the opposition have this week been allowed to hold a public political meeting. Hitherto the Government has prohibited these meetings on the ground that public peace might thereby be troubled; and it was for this reason that the meetings organised in Cairo, Tanta and Shebin el Kom did not take place. Nothing daunted, however, the members of the Wafd organised a meeting at Giza on Thursday last, and as an experiment the Government allowed it to be held. Everything passed off without any incident, and the meeting broke up in an orderly fashion after passing a resolution to address a petition to King Fouad begging him to obtain the release of Zaghloul Pasha from the Seychelles. This and other incidents clearly indicate a marked improvement in the local political situation, and one can only hope that neither side will do anything to cause a recrudescence of the agitation and restlessness from which the country has suffered only too long, or to put any further obstacles in the way of the *rapprochement* towards which all parties appear to be drifting.

IRAQ (Mesopotamia).

Baghdad, April 27.

Conferences.

The conference at Kerbella is over, and it can with safety be said that it achieved nothing. There were no startling demands put forward, and the resolutions carried were formal and meaningless. The extremist party had placed high hopes on the meeting, but only saw them completely shattered. After the conference many of the more important sheikhs in the country came to Baghdad and have been holding an unofficial sheikhs' conference, as a result of which it is said that they have forwarded a resolution to the King in which they set out their views regarding the present state of affairs and their ideas concerning the future. The King has received deputations from the sheikhs, and has

SCHOOL OF ORIENTAL STUDIES.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

probably learned a great deal about the tribal point of view. It is well that he should do so, for there is danger that his views may be warped by continual contact with the Effendis of Baghdad.

Cabinet Reorganization.

The reorganization of the Cabinet has now been completed. Sassoon Effendi, the Minister of Finance, has been approached and has consented to remain in office; a decision which gives universal satisfaction, for there is no one who denies his ability and his capacity for work. His job is a particularly thankless one, faced as he is with a large expenditure to be met from a small and, it is to be feared, a diminishing revenue. For a country whose revenues depend to the extent of those of Iraq on the price of agricultural produce, the recent fall in prices is a heavy blow; while the complete stagnation of trade is playing havoc with the Customs receipts.

Ja'afar Abu Timman has now consented to assume office as Minister of Commerce, and Abdul Muhsin al Saadun has been appointed Minister of Justice. He was the deputy for the Muntafiq in the Turkish parliament, but little is known of his capabilities.

Army Topics.

Recruiting for the Arab army has improved recently, and in one area at any rate recruiting has for the time being been suspended, and men who are obviously unsatisfactory are being weeded out. In Mosul, however, recruits are not coming forward as eagerly as had been hoped.

The method of recruiting is a subject which is likely to provide some very lively discussion when the National Assembly meets. There are many—and the Minister of Defence, Ja'afar Pasha, is among them—who consider that the only basis on which a satisfactory army can be recruited is conscription. It is pointed out that many of the men who are enlisting now, under the voluntary system, are of a very poor type and never likely to make good soldiers, while a large majority of the more desirable recruits find other employment. Conscription would, it is claimed, make it possible to refuse the wrong type, and take only those who seem likely to make really good soldiers.

The financial side of the question is of importance also. At present the pay of the voluntary soldier is Rs.45 per month, and as a result the cost of the Army, small though its numbers are, is an intolerable burden to the country. The conscript need not be as highly paid, and also the exemption fees paid by those who wanted and could afford to avoid military service would provide a source of revenue which, some optimists even go so far as to say, would almost pay for the maintenance of the Army. There are, of course, arguments on the other side, such as the extreme unpopularity of the measure and the difficulty of enforcing it outside the towns; but there remains the fact that desperate situations demand desperate measures; and the finances of the State of Iraq, if not desperate, bear no very rosy complexion.

General News.

The Maude Bridge at Baghdad has had another very narrow escape. Only a day or two after it had been reopened for traffic after its first accident, a motor boat belonging to the Bridges Conservancy Staff caught fire and drifted down on to the bridge. Fortunately it was possible to extinguish the flames before the bridge structure caught fire, but the boat itself was completely gutted and the bridge came very near to disaster.

The number of new buildings under erection in Baghdad is a hopeful sign, and New Street is beginning to assume a much more respectable appearance. Messrs. Strick Scott and the Anglo-Persian Oil Company have emerged from their undignified seclusion in back streets and occupy fine new offices in New Street; Orosdi Back are building a new store in River Street; and the Auqaf Ministry is erecting houses and shops in several places in New Street. The Banks, however, are still housed in a manner quite unworthy of them and their prestige, and it is to be hoped that they will follow the lead given them by others.

PALESTINE.

Jerusalem, April 23.

Promising Excavations.

Excavations which promise useful results were begun recently by the American School of Archaeology at Tell-el-Ful under the supervision of Dr. W. F. Albright, the Director of the School. Tell-el-Ful is a conspicuous landmark, three miles north of Jerusalem, and a few hundred yards to the east of the Nablous road. It is a terraced hill surmounted not by the usual familiar *weli* or shrine, but by a small, presumably artificial mound. The curious shape of the whole is very distinctive and a striking feature of the northern horizon as seen from Mount Scopus. It dominates the whole of the country round about, and must have been for long ages an important strategic position; it required very little acuteness to realise that the mound must conceal the ruins of a series of citadels which housed the outpost garrisons covering the northern approach to Jerusalem. The name Tell-el-Ful (mound of beans) in itself offers no clue to its ancient identity; but from the topographic material supplied by the Old Testament and Josephus there is not very much doubt that it is to be identified with Gibeah of Saul or Gibeah of Benjamin.

The excavations have not yet proceeded very far. The fellaheen who own or cultivate the affected ground are demanding exorbitant sums as rent and anticipatory claims for damages; and, on hearing that what the excavators expected to get in return for their trouble was a considerable amount of *ta'arikh* (history), they lodged a claim for at least a fifty per cent. share of this *ta'arikh* as well. The few soundings that have already been made have, however, served to give the main outlines of the archaeology of the hill. The top hillock was, as everybody expected, found to be entirely artificial, comprising the remains of some three, at least, Hebrew and Jewish fortresses. The topmost one is post-Exilic, judging from the pottery discovered; the second, is supposed, on account of the stonework and "pebble-pottery," to be Solomonic (we learn from I. Kings that King Asa, about 900 B.C., built in haste a fortress at Geba of Benjamin); while the third is attributable to the period of Saul.

The excavations begun last autumn by the University Museum of Philadelphia, on the site of Beisan, and discontinued with the coming of the rainy season, were restarted early in this month.

Learning from Experience.

Palestine at the moment seems wholly at peace. The feasts—Christian, Moslem and Jewish, have passed off without the least sign of excitement; a local Mohammedan festival which annually brings together vast crowds of fellaheen to the neighbourhood of Jaffa and the adjacent Jewish colonies, also passed without incident. The Arabs would seem to have drawn the inference that disturbances of the peace are scarcely worth the trouble. The fellah is a peaceful soul, really; the agitator can only stir him to action by tales of horrors inflicted on his fellow-believers, or the prospects of easily gained loot. These were the incitements applied last year in the May troubles; but by this time the fellah has discovered that the horrors were fictitious, and the loot excessively dangerous either to get or to keep. The stories at present current about the large stocks of arms acquired by the Jews up and down the country are most certainly exaggerated; but though they stir the ire of the Arab, they tend at the same time to instil in him a certain feeling of hesitation before embarking too light-heartedly on attacks on Jewish villages.

The "Black and Tans," or, more officially, the British contingent of the Palestine Gendarmerie, have not yet made their appearance, but are expected with great interest.

Rival Messiahs.

Where else in the world save in Jerusalem could you have the vision of three messiahs seated all in a row? Such was the sight to be seen at a lecture given in Jerusalem last week. Jerusalem, as is well known, suffers from an excess of cranks of all kinds, and from

excessive representation of the smaller and more bizarre religious sects. But over and above these there are a few self-accredited messiahs. They claim no followers, are quite law-abiding, and very much out-at-elbow; but this does not greatly discourage them: it is always open to them to appraise the truth of their message in inverse proportion to its popularity. One of them is the divine ambassador entrusted with the propagation of pure undiluted Gospel: he is much the seediest of the three. Another sees the only salvation of the world in a return of both Jew and Christian to the beliefs and practices of the days in the first century when all Christians were practising orthodox Jews: his position is slightly vague, since he is not wholly clear whether he himself is the Messiah or only his fore-runner. The third is minded to start afresh that pre-Christian sect known as the Essenes, a Jewish community which was strongly influenced by Persian dualism, and from whose religious rites some suppose Christianity to have borrowed.

A "Christian Science" Venture.

Another level of enthusiasm is represented by a recent arrival in Jerusalem who proposes to enrich local journalism with a daily paper, in English, Arabic and Hebrew, devoted to the cause of Christian Science. One has often wondered why Christian Science has never figured conspicuously before in the Holy Land. The new venturer—a lady, of course—evidently means business, and has invested heavily in house-property and bought a printing-press.

GREECE.

Athens, April 30.

The Premier's Return.

The President of the Council, accompanied by General Exadactylos, M. Mallah, Member for Salonika, and M. Criezis, one of the Managers of the National Bank of Greece, returned to Athens *via* Patras on Wednesday night. On the following morning M. Gounaris was received by the King, and shortly afterwards a Council of Ministers was held at the Ministry of Justice, at which the situation in general and the question of Greece's reply to the Allied peace proposals were discussed.

The National Assembly had been convoked for Thursday night; but as the majority of the deputies residing in the provinces had not arrived in the capital, the sitting was postponed until next Monday (May 1).

The Bulgarian Minister.

The new Bulgarian Chargé d'Affaires, M. Pierre Cannef, who arrived in Athens a few days ago, has presented his Letters of Credence to the Minister for Foreign Affairs. M. Cannef informed M. Baltazzi that King Boris' Government had appointed M. Kissimoff Bulgarian Minister in Athens, and that that gentleman would shortly arrive here to take up his duties.

The Italian Minister, Signor Montagna, has returned from Rome *via* Brindisi by the s.s. 'Leopolis.'

The Defence of Ionia.

Three of the leading members of the "Defence Committee of the Micrasiares," M. Apostolos Psaltos, M. Michael Argyropoulos, and M. Constantine Hadjiapostolou, have arrived from Smyrna to ascertain what the Government's intentions are with regard to the evacuation of Asia Minor, and what steps official Greece proposes to take to ensure the protection of the Christian population in the occupied regions after the departure of the Hellenic troops. The three delegates were received by M. Gounaris and the Minister for Foreign Affairs, and also conferred with M. Stergiadis, who has been in Athens since the beginning of the week. To the Press representatives who visited them at the Grande Bretagne Hotel where they are staying, the delegates declared most emphatically that the Defence Committee was determined to oppose by force of arms the restoration of Ionia to the Turks.

General Papoulas' Letter.

In order to put a stop to the persistent rumours which have been in circulation of late to the effect that General Papoulas was favouring the revolutionary movement in

Ionia, and that he had even agreed to take command of the volunteer battalions now under formation, the Greek Commander-in-Chief has addressed to the Athens Press the following letter:—"I am greatly surprised to hear that many rumours were recently circulated by persons who are ill-disposed towards me owing to certain measures which I was obliged to take against them in the performance of my duty. Those responsible for these rumours are trying to make believe that I am acting on my own initiative, and contrary to the orders of the responsible Government. I am, therefore, obliged, in order to put a stop to these false reports, to declare once for all that, knowing my duty, I have neither undertaken, nor is it possible that I should undertake, any such obligations without the consent of my Government. I strongly impressed upon the delegates of the patriotic organizations who presented themselves to me that the Army was faithful and devoted to the Country and to the King, and that it would only obey the orders of the Government."

General Papoulas arrived in Athens on Friday, and after conferring with the Minister of War, M. Theotokis, was received by the King.

Miscellaneous News.

Prince Andrew, who has been appointed Commanding Officer of the First Greek Army Corps, stationed at Yanina, has arrived in that town.

General Exadactylos, Chief of Staff, has returned from Genoa, whither he had accompanied the Prime Minister, and has resumed his duties.

The new Swedish Minister, M. Charles de Virsen, has presented his Letters of Credence to King Constantine.

By order of the Minister of War all Officers and Regimental Sergeant Majors posted to the Army of Asia Minor, must re-join their units within twenty-four hours.

The Prefect of Patras reports that from March 29 to April 7 (O.S.) seven cases of plague, six of which were

fatal, occurred in that town. All the schools there have been closed.

It is reported from Smyrna that a numerous Turkish band of irregulars attacked the Greek Gendarmerie station at Tiremanlar in the district of Kinik. The station which was defended by nine gendarmes under a police second lieutenant, put up a stubborn resistance, and finally succeeded in dispersing the bandits. Five of the gendarmes were killed and their officer was wounded. The Turkish casualties are not known.

ROUMANIA.

Bucharest, April 28.

The Political Situation.

Although it is generally said that politics are second nature to the Roumanian, this time a psychological fact is noticeable which deserves special mention. After the very strained political situation of the past few weeks in regard to home politics, when almost the entire Opposition withdrew from Parliament and the Opposition press published vehement articles daily against the Government, as if by enchantment a sudden truce seems to have set in. The Opposition do not wish to cause the Government any difficulties at the present moment when it is representing the interests of the country at Genoa, where questions of paramount importance for Roumania are at stake. This shows that when vital questions of an external character are to the fore Roumanian politicians know how to subdue their internal squabbles; and it further signifies that the Opposition and the entire country endorse the attitude taken up by the Premier at the Genoa Conference.

This passivity on the part of the Opposition, however, does not imply a renunciation of its preparation to attack the Government when the discussions at Genoa are over. There is a marked tendency on the part of the Nationalist Democrats as well as of the Tzaranists to achieve a *rapprochement* with the Transylvanian National Party; and it remains to be seen to which of these two parties the Transylvanians will give preference.

The Nationalist-Democrat Party has already held its general congress for the purpose of defining its attitude in the coming political campaign and towards the other Opposition groups. On this occasion M. Jorga announced that his party is in full agreement with the Transylvanian Nationals, with whom he is prepared to collaborate. Towards the Peasants' party he is well-disposed, but he could not consider collaboration with it until it frees itself from certain elements among its leaders.

The congress of the Transylvanian National Party, which was to have taken place about this time, has been postponed; while the Tzaranists will convoke their congress only after the Transylvanians have fixed theirs.

The Government having the tacit support of the entire Opposition for its external policy, is taking advantage of this lull to carry out undisturbed its work of preparing the necessary reforms for the new Constitution. This preparatory work can easily be completed during the present long parliamentary recess.

Hungary Claims War Damages.

The representative of the Magyar Government on the Commission of Reparations in Paris submitted the other day a memorandum demanding that Roumania should either restore or refund the counter-value of the objects and valuables commandeered by her Army during the time of occupation of Hungary in 1919. The Hungarian Government has fixed its claim at 2½ milliard francs in gold.

The Roumanian Press in commenting on this claim is at a loss to understand Hungary's pretensions, considering that Roumania was attacked by the Hungarian Army in 1919, and that in self-defence she was compelled to take up arms against Hungary; the sequel of which was the annihilation of the communist régime and the restoration of public order and of a legal Government in Hungary. It is further considered paradoxical that a vanquished country should claim damages from the victors whom she provoked.

General News.

King Alexander of Yugoslavia and his cousin Prince Paul, who spent the Easter Holidays with the Roumanian Royal family, left Sinaia last Thursday for Paris.

The wedding of King Alexander and Princess Marie has now been fixed definitely to take place at Belgrade on June 4.

M. I. C. Bratianu, the Prime Minister, during his recent short stay at Rome was received in audience by the King of Italy as well as by the Pope.

A delegation of Poles, consisting chiefly of professors, merchants and journalists, is now on tour through Roumania, visiting the University centres and various other places of industrial and economic interest.

BULGARIA.

Sofia (undated).

The Genoa Conference.

News transmitted by the Bulgarian Delegation from Genoa, has on the whole been encouraging. M. Stambolisky has had conversations with all the leading statesmen and he is particularly pleased with the reception accorded him by Mr. Lloyd George. Government circles pin great faith on the outcome of these informal conversations, trusting that they may lead to a delay in the payment of reparations. Local diplomatic circles are, however, of the opinion, that Bulgaria will obtain nothing tangible from Genoa.

Government's Reply to the Ukraine.

The Bulgarian Government have issued the following reply to the Note addressed to them by the Ukrainian Republic:—"The former soldiers of General Wrangel have been admitted into Bulgaria as refugees; they were disarmed on landing in Bulgaria. It having been said that a certain number of their arms had been hidden, the Bulgarian Government ordered a thorough search to be made. This search did not, however, reveal any hidden arms. The Bulgarian Government are desirous of maintaining law and order in the country and are able to reassure the Ukrainian Republic that they will not tolerate within their frontiers any organization likely to harm the Ukrainian Republic.—(Signed) R. Daskaloff, Acting Prime Minister."

The Military "Organ" of Liquidation.

The papers still continue to be full of criticism of the military "Organ," whilst the latter have not been idle in issuing denials of numerous statements that have appeared. Denials or no-denials, one thing remains certain, and that is that the "Organ" tried to double the size of its officer personnel, but met with a curt refusal from at least one of the Allied Powers.

The Agrarian Congress.

At the end of next month there will assemble at Sofia the annual congress of the Agrarian Party. The main subject on the agenda will be the note of the Inter-Allied Commission. The Agrarians still show themselves very opposed to accepting the guarantees demanded by the Commission. In this connection, it is interesting to note that the Commission have declared that receipts from the Pernik Coal Mine, Customs, etc., will not be diverted into the Reparations, as some papers have stated will be the case.

In reality, the Commission are only demanding guarantees against the non-payment by Bulgaria of 10 million gold francs in 1922 and thirty million in 1923.

An Unknown Diplomatist.

The new newspaper *Slovo* has not been long in making itself notorious. Last week the summary of an interview with a diplomat of high standing was published in the *Slovo*. Whoever the diplomat may be, he showed a very thorough grasp of Bulgaria's present financial situation. His identity is naturally much commented on, as it is not usual for diplomats to make declarations regarding the internal affairs of a country to which they are accredited. The Inter-Allied Commission issued a *communiqué* stating that the declarations did not emanate from a member of the Commission, whilst M. Daskaloff, the acting Prime Minister, also stated that he could not conceive of any diplomats' making such declarations.

On the other hand the *Slovo* maintains that the diplomat is not a "bogus" but a "real" one.

Bourgeois Party.

Pourparlers are now in progress with a view to the conclusion of a Democrat-Obedinist-Radical coalition. In the event of such a coalition being formed, there will be approximately 25 per cent. of the Sobranye grouped in a bourgeois *bloc*. After the Agrarians, this group will be the strongest in the Sobranye. The main hindrance to the formation of such a coalition is the unwillingness of certain Radicals to join the Obedinists.

TURKEY.

Constantinople, April 24.

The Italian Withdrawal.

The withdrawal of the Italians from the Sokia-Scala Nuova area has been followed by mutual accusations of "massacre" between Turks and Greeks; but it is impossible at the present moment to judge what has really taken place beyond the reoccupation of the Italian zone by the Greeks. A glance at the map will be sufficient to reveal the strategic importance of the area in question owing to its proximity to the Smyrna-Aidin Railway. Kemalist *communiqués* announce that the Turkish troops are being reinforced, but in view of the situation of the sector, it is hardly likely that any serious fighting can take place there.

St Dunstan's Bazaar.

The four latter days of the last week were devoted to a bazaar held at the Riding School of the Turkish War School, which is the Headquarters of the British Corps of Occupation. The Bazaar was organised by Monsignor Barry Doyle, the popular Roman Catholic Army Chaplain, and Domestic Prelate to H.H. the Pope, for the benefit of St. Dunstan's Institution for Blinded Soldiers. Monsignor Barry Doyle set himself the task of raising £1,000 sterling, and it is a pleasure to be able to state that he has more than succeeded. The bazaar itself was a great success, and was generously supported not only by the British, but by H.M. the Sultan, who presented a wonderful carpet for the lottery, and by the Greek Patriarch, who subscribed a large sum of money. Such a circumstance raises hopes that after all it may be possible for the bitterest enemies to "meet on the bridge of humanity," to use a felicitous phrase employed by Major General Franks upon a charitable occasion in favour of Turkish refugees.

CYPRUS.

Nicosia, April 18.

The Greek Element.

The Archbishop has received a telegram from the "Hellenic Committee of National Defence," working under the presidency of General Frantzes, at the Ritz Hotel, London, which aims at upholding the provisions of the Treaty of Sévres, requesting him, as "Ethnarch of Cyprus," to give his benediction to the work of the Committee, to direct that prayers shall be made in the churches, and to appoint representatives of Cyprus. Thereupon His Holiness called a meeting of such members of the "National Council" as were in Nicosia, including the Bishops, who decided to accede to the request. A benediction was sent in the name of the Church, and three Cypriots resident in London were nominated to represent the island, *viz.*, Mr. C. S. Hourmouzos, journalist, M. Papadopoulos, a doctor, and M. Zachariades, merchant. Opinions are much divided as to the Archbishop's action. The Nicosia paper *Phone tes Kyprou* entirely disapproves of the step taken. It considers that His Eminence has acted too precipitately, and that he should have consulted a full Council. There is nothing (except that both work for Greek unity) in common between the two bodies. They pursue different paths, and an attempt to combine or identify the two movements may weaken and injure the one, or the other, or both. Cyprus might and should aid the London Committee by contributing to its funds, but nothing more. M. Venizelos warned the Cypriot

delegation when in England to avoid mixing up the aims they have in view with those of the unredeemed Greeks elsewhere. However, says the *Phone*, the step has now been taken and it is to be hoped that no harm will come of the unfortunate decision. General Frantzes has telegraphed an account of the meeting held at the Ritz Hotel. An oath of fidelity was taken by representative Greeks of the following countries:—Britain, France, Italy, Roumania, America, Australia, South Africa, Tunis, Egypt, Sudan, Epirus, Thrace, Turkey (Constantinople), Asia Minor, Cyprus, and the Dodecanese.

The "National Council" continues to hold meetings at the Archbishop's residence. Its "Executive Council" has been discussing the question whether the Legislative Council has been legally elected, and as to the legal means which can be used for pronouncing its laws to be invalid! The proceedings partake of the nature of a farce. No outsiders are admitted to the meetings of the Council, which has acted in a very foolish manner in boycotting the Nicosia horse races, on the ground apparently that they have the support of the High Commissioner and Government officials. This is generally condemned, and is a very unpopular proceeding. The Press in general supports the Council.

The Holy Synod.

The Synod has been dealing with the long-standing question of the marriage of cousins (of the sixth degree blood kinship, and the fifth of marriage relationship). Two of the Bishops (those of Kition and Papho) have taken the view that such marriages should be sanctioned, and that such unions as have been carried out in the past without ecclesiastical sanction should now be recognised. The Archbishop is in agreement. The *Phone* takes the Synod to task and considers that, although the Church of Cyprus is autocephalous, it should not introduce innovations on important matters without arriving at an understanding with the whole of the Orthodox body. As it is, henceforth Greeks who belong to Greece proper, to Alexandria, Constantinople, Jerusalem, or Antioch, cannot lawfully contract marriages which would be recognised in Cyprus. Obviously in such circumstances troubles and complications might arise amongst families living under separate Church jurisdictions. The Synod is being lectured in several other quarters.

General News.

There is no diminution of serious crimes, but rather the contrary. Several murders have been reported, while thefts and burglaries are frequent.—The Assize Court will have a long list to deal with. It is understood that the High Commissioner, Mr. M. Stevenson, will proceed to England on leave in June.—Paper money is to be largely withdrawn. All notes of £5, 5s., 2s. and 1s., placed in circulation at various dates since 1915, will cease to circulate after April 30, and must be exchanged into silver at the Imperial Ottoman Bank, or Commissioner's offices before that date.—Great satisfaction is felt owing to the withdrawal of the prohibition to export animals, *viz.*, horses, mules, asses, camels, and cattle (excepting milking cows). More rain is needed in all agricultural districts.

ASIA MINOR.

Smyrna, April 19.

H.M.S. 'Iron Duke' flying the flag of the Mediterranean Commander-in-Chief, Admiral de Robeck, arrived here on Easter Monday. The Admiral gave a dinner to Sir Harry and Lady Lamb, Miss Lamb and a few friends the same day. On Easter Tuesday the Admiral and his staff were invited to a lunch at the Racecourse by Sir Harry Lamb, and witnessed the annual meeting of the Smyrna Race Club. Four Turkish-owned horses and four Greek-owned horses won prizes, the Greek Commander-in-Chief's prize of T£500 being secured by the Turkish-owned horse ridden by a Turkish jockey. The Steeplechase for Allied officers was a disappointment, as no other officer appeared to dispute the race with Major M. A. B. Johnston, who had a walk over. The 'Iron Duke' sailed for Constantinople at half-past six the same evening.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

'IRAQ, SYRIA AND PALESTINE.

To the Editor of "The Near East."

Sir,—There is much talk to-day about the wonders of French Colonial Administration and the utter failure of the British. We often read of the, sometimes exaggerated, French wonders in Morocco as compared with the troubled situation in Egypt; of prosperous and quiet French Indo-China compared with India; and lately of troubles in 'Iraq and Palestine, while, we are assured, Syria is already being transformed by the French into a land of "milk and honey." It is however, often ignored that Morocco has been brought within French influence by long and slow conquest, whilst very few are aware of Egypt's metamorphosis under British guidance during the last forty years, from a vassal state of Turkey, loaded with debts and overrun by despotic pashas, into one of the most prosperous and democratically ruled states in the Near East, a creditor State, and one soon to be recognised as a Sovereign State on equality with others. As to the situation in 'Iraq and Palestine, whilst the British difficulties in those countries are known to the whole world, rigorous censorship in Syria imposed by an over-zealous Administration, hides the facts even from the French public.

The British Government, and the British public, cannot be indifferent to the present misfortunes of Syria, as the country was liberated by British soldiers, and the promise made to the Arabs—without which we could not have made a single pace forward in Palestine and Syria—applies both to the Arabs of 'Iraq and to the Arabs of Syria who form the majority of the population. I therefore take the liberty of trespassing on your valuable space to put clearly before your readers the present situation in Syria, as I am afraid the recent letter of Mr. Daniel Oliver, throws a false, or, rather, an incomplete, light on the state of affairs there.

Mr. Oliver in his magnificent but rather isolated abode at Ras el Metn, a village in the Lebanon Mountains, either does not know what is happening in the interior, or is prevented from informing us on the situation there. The insignificant tract of rocky and arid mountains of the Lebanon is not all Syria, and if the situation is as described in that small and easily governed country, it changes when one penetrates into the interior. Mr. Oliver does not write about the recent murder of one of the prominent Syrian Heads of the Lebanon itself, or of the conspiracy near Damascus to kill General Gouraud and his suite, or of the frequent raids of Arabs on the railway between Rayak and Aleppo and its continuous "sabotage," or of the frequent risings in Damascus, or, last, but not least, of discontented Aleppo and the unhappy situation east of Aleppo on the Euphrates, not to mention the unsatisfactory condition of the country both financially and economically.

I resided in that wonderful country before the War and had the pleasure of being amongst its liberators in 1918. I was there in 1919, when the country was enjoying its short independence; but a recent visit a few months ago brought home to me the fact that however gross are the British mistakes in 'Iraq and Palestine they are reparable and are being repaired, but that France has erred irreparably in Syria.

In the early part of 1920, owing to the long deliberations of the Peace Conference, Syrians took the bold step of deciding themselves as to their future. They declared their independence, nominated Emir Faisal as their King, and formed the Syrian Congress at Damascus, which was meant to include representatives from Syria, Palestine and 'Iraq. The British Government, realising the absurdity of the Sykes-Picot Agreement, did not

oppose the new step, and the French Government looked upon it as a farce. However, when, later on, the new State opposed any further French penetration to the Interior, and when representatives were nominated by the Lebanese themselves to the Syrian Congress, the French Government was alarmed, and French troops, under General Gouraud, marched on Damascus, not without opposition, reversed the Government, exiled Emir Faisal, and declared Martial Law. This was done also in Aleppo, and still exists in the two provinces.

This irremediable step alienated the sympathies of the Arabs, from the Persian Gulf to Alexandretta and from the Mediterranean and Red Sea to the Syrian Desert. The French occupation (or "Mandate") has been and is still a very difficult business as the majority of the population is against it. French troops have managed to keep order in that small part of Syria called Lebanon, and in towns like Damascus and Aleppo; but Arab tribes have been in constant rebellion in the country, and the French troops concentrated on the towns have had rather difficult times. Railway communication between Aleppo and Rayak was continuously interrupted by frequent raids and transport on the line was only possible, by armoured trains. Meantime communication between the towns of the interior and Aleppo was not possible, as the whole country east of Aleppo towards the Euphrates was hostile to the French; and it is only lately, since the Angora treaty was signed, that it has been possible to secure some order and security, by using the troops relieved from the Cilician frontier.

Apart from the hostility of the Arabs to the French Mandate, there is no doubt that the unsatisfactory economic and commercial state of the country, as well as the bad administration of the provinces, have contributed to the maintenance and perhaps increase of discontent. The Syrian judges his ruler by results. In 1919, when the country enjoyed its short-lived independence, it was also enjoying the illusory prosperity which existed also in Europe at that time. Besides, both the Palestine, Turkish and 'Iraq frontiers were open, and the country had a relative security, which the Arabs tried to maintain quite successfully. However, simultaneously with the French occupation all the frontiers were closed, communication became unsafe, and business throughout the country was paralysed. This condition did not improve, but tended to become worse. It was hoped that the Franco-Turkish agreement would open the northern frontiers; but the French, in their anxiety to treat with the Turks, made no stipulation that could benefit Syria, and the Turkish frontiers remain closed. Such a state of affairs changed the sympathies of the Christian and Jewish commercial communities who joined with the Arabs in rising against the Mandatory Power. The situation was further rendered intolerable by the excessive taxation imposed on the country, a necessary step to pay the abnormal expenses of the different Governments.

When it is remembered that before the War, when the country was in a better financial and economic condition than it is to-day, it was hardly found possible to maintain four or five ill-paid Governors, with limited staffs, at Aleppo, Beyrout, Damascus, Baghdad and Jerusalem, it is no wonder that people revolt to-day at having to maintain ten highly paid Ministers together with their innumerable Staffs and Foreign Advisers at Beyrout, Damascus, Aleppo, Amman, Jerusalem and Baghdad. The French, faithful to their motto *Divide et impera*, were not satisfied with detaching Syria from 'Iraq and Palestine, but divided what was left into three sovereign States endowed with their Ministries and advisers.

I will not dwell on the misgovernment of the country by Advisers mostly chosen amongst Colonial officers who, though they may be splendid officers are not all that could be desired for the particular work they are called to do; on the imposition of a depreciated French currency on a country used to Egyptian guineas and to Turkish gold and silver; on the control of public opinion and the muzzling of the press; or on the

inefficiency in handling the country's economic and financial affairs. I will only repeat that it is a pity the French public is not alive to the Syrian miseries, as I am sure that the Chamber, rather than suffer such a state of affairs, would order the withdrawal from Syria.

This was the political and economic situation a few months ago, and to judge by recent reports it has not improved. It will, therefore, be seen that whilst the British troubles in Mesopotamia appear to be settled by the granting of Arab independence and permitting the choice of an Arab prince, the French in Syria have far from settled their difficulties. It is not easy to see how the French can maintain their position in the future except by the sword. Such a situation would be incompatible with the promises of the British Government to the Arabs, especially seeing that the Syrians are not ex-enemies.

It may be argued that the present situation in Syria concerns only France. I believe it concerns the British Government in many respects. First, the British Government must fulfil its pledge; secondly, Syria is a neighbouring country to Palestine and 'Iraq; and last but not least, England is a member of the League of Nations, from whom France holds her present mandate. It should also be borne in mind that England by calling the sons of King Hussein to 'Iraq and Transjordan has indirectly encouraged the Arabs; and in years to come if an attempt is made to liberate their "patria irredenta" the British Government will be placed in an awkward position, both as regards the Arabs and their French Allies.

I am, etc.

NORMAN PHILIPPS.

Davos-Dorf, Switzerland.

May 1st, 1922.

CONDITIONS IN PALESTINE.

To the Editor of "The Near East."

Sir,—There are one or two references in your current issue to conditions in Palestine, upon which, I trust, you will permit me to offer a little comment.

(1) In your leading article you observe: "But for this we might not now have Arab and Jew ready to fly at one another's throats in Palestine." The suggestion that the Jews are ready to make an unprovoked attack upon the Arabs is utterly unjust and cannot be substantiated by any evidence. The disturbances that have taken place in Palestine have been of three kinds: (a) unprovoked attacks by Arabs upon Jews (Jerusalem, Jaffa, Chedera, Petach Tikvah, etc.), (b) fighting between Arab Moslems and Christians (Kerak), and (c) fighting among Arab Moslems themselves (near Hebron, as reported in your issue of April 27, page 554). There has not been a single case of Jews starting an attack upon Arabs. The Jews desire to live in complete amity with the Arabs and to co-operate with them for the betterment of the country.

(2) Your Jerusalem Correspondent refers to what he calls "the childish ineptitude" of the Zionist Commission, and alleges that they have "mismanaged the greatest opportunity" that the Jews have ever had. This is rather strong language to use, especially when unsupported by even a shred of proof. Is your correspondent acquainted with even a tithe of the work done by the Zionist Commission or with a tithe of the difficulties it has had to overcome? Is he aware that during the last three or four years it had increased the Jewish population in Palestine by 20,000 settlers, mostly young and hardy workers; that it has increased the extent of land previously owned by the Zionist Organisation by more than three times; that it controls and maintains 137 schools of various grades with a budget of £100,000; that it has effected some important works of drainage both in Jerusalem and near the shore of Lake Tiberias; that it controls thirty-one agricultural settlements and has planted over a million trees; that it has lent over £120,000 for various productive purposes, including a loan to the Palestine Government; that it

has prompted the General Mortgage Bank of Palestine, with a nominal capital of £200,000, and helped to finance the Palestine Workmen's Bank to the extent of £40,000? Within less than four years the Zionist Commission has spent over £1,000,000 on various economic and cultural undertakings. A mere enumeration of its many-sided activity would occupy a whole issue of your esteemed paper. Your Jerusalem Correspondent would be well advised to make himself acquainted with a little of this activity before again indulging in unwarranted criticism.

I am, etc.,

The Zionist Organisation,
Central Office,
30th April, 1922.

ISRAEL COHEN.

[The sentence in our leading article to which Mr. Cohen refers was merely a passing reference to a state of affairs which is, unfortunately, notorious; and was not intended to indicate that all Arabs and all Jews in Palestine are on bad terms. As to the quotation from the letter of our Jerusalem Correspondent, we would point out that our Correspondent wrote: "... the childish ineptitude that has marked the Zionist Commission in so many of its actions" (the italics are ours). Without communicating with our Correspondent, we cannot, of course, be certain, but we conclude that he had in mind some of the utterances of Zionist propagandists which have been responsible for so many of the Arabs' fears. Nobody would call in question the skill shown by the Zionist Commission in the direction of its economic and cultural undertakings.—Ed.]

GEOGRAPHICAL NAMES.

To the Editor of "The Near East."

Sir,—I was much interested in learning, through the letter which appeared in your issue of April 6, that there exists a Permanent (Official) Committee on Geographical Names.

I should like to call the attention of this committee to the geographical name that is always, erroneously, written "Bosphorus." Any Greek scholar would be able to give the derivation of the word as from "Bos," an ox, and "Poros," a ford, making Bosporos (or, anglicized, Bosphorus), literally, "Oxford." Bosporos is the way in which it is written in Greek, and I cannot explain how the "ph" was introduced. If the word were written in Greek "Bosporos," it might be taken to mean a place where a tax or impost was levied on cattle crossing from Europe to Asia Minor, or *vice versa*; but this is not so. To suppose a derivation from "phoros," as in "Christophoros" (Christopher), would be rather too far-fetched. Besides, I repeat, the word is not written in Greek with a "ph," but with a "p."

I am, etc.,

C. H. BUTLER

Athens.

April 24.

THE PALESTINE DELEGATION.

The National Political League entertained at Luncheon at Claridge's Hotel last week the Palestine Arab Delegation and some British friends. The hostesses were Lady Byron and Miss M. A. Broadhurst. Sir W. Joynson-Hicks, M.P., presided. The Chairman proposing the health of "The Delegation," said that they had been waiting now at the door of Great Britain asking for justice for ten months. He felt confident that they would yet get justice, for England at heart was with them. Why the Balfour Declaration had ever been made was one of the mysteries of war time. It had never been submitted to the House of Commons, but it had been engineered by the Zionists secretly with the Government. Now it was being used against the Palestine Arabs in a way that stained our honour. He appealed to the English people not to raise up another Ireland in Palestine. Mr. Shibly Jamal, responding, made a glowing eulogy of the sense of honesty and justice of the British people. He was confident they would do justice to Palestine. The Palestinians were not going to be cozened and tricked as Jacob the Jew once tricked Esau the Arab.

MUSICAL NOTES.

ON GRAMAPHONE RECORDS.

One of the most valuable records that "His Master's Voice" Company have issued is Strauss's tone-poem "Till Eogenspiegels lustige Streiche," complete in four sections on two discs. It is conducted by Albert Coates, a little heavily perhaps, but with admirable proportion. The upper strings and woodwind come through with beautiful clarity, though there is still the obscurity, at present ineradicable, in the lower strings and in the brass. But otherwise the record is one of fine workmanship.

It is still chamber music which makes the records of most lasting enjoyment, and this fact is maintained in the playing, by the Beatrice Hewitt Pianoforte Quartet, of the final (rondo) movement of Brahms' Quartet in G-minor, Op. 25, and of the final (allegro) movement of Dvorak's Quartet in E-flat, Op. 87. The balance of tone is good, the technique generally adequate, and the rhythm, especially in the Dvorak, notable.

Of the soloists, Heifetz must come first. The records that this young Russian makes are consistently remarkable. The purity of his tone and the unsurpassable clarity of his technique are in reproduction extraordinarily good. One heartily wishes that he had spent his time in something better than Tchaikovsky's Valse called "Serenade," which is a poor melody, with poor scoring. Even the brilliance of Heifetz (with that simply marvellous E string) cannot conceal its essential poverty.

Arthur Beckwith, the leader of the Royal Albert Hall Orchestra, has made a double-sided disc of Edward German's "Berceuse" and of Hubay's "Zephir." The first tune has little variety, and is in the most easily imitable of German's manners, but it is played with excellent richness of tone and breadth of rhythm; there are, however, at least two bad slips in intonation. In the second is revealed Beckwith's technical dexterity, with splendid work in harmonics.

Lamond is responsible for the one pianoforte record in this April batch: he has chosen Rubinstein's "Bacarolle," Op. 50, and the fast movement of Beethoven's Sonata, Op. 10 No. 2. The Rubinstein is worthless musically, being but tawdry "pianisticism," though Lamond certainly makes all of it that can be made; and concerning the Beethoven movement I must repeat what I said a few weeks ago of Lamond's playing of the previous movement: his handling of it is too rough and brusque. Lamond's magisterial mood encompasses him too thickly at times, and here we want less masterfulness and more grace. But of course his technique is sparkling, particularly his *staccato* touch.

There remain but one or two serious vocal records that I have not yet remarked.

Olga Haley's singing of Frank Bridge's "Love went a-riding" and of Lidgey's "All in a Garden Green" thoroughly deserves mention, for she is a very worthy mezzo. In the first song there is splendid tone and verve, but it is not a woman's song; and in the second, which is a pretty ballad, she has nothing to do but be her rhythmical self to succeed completely.

The vocal duet does not very often make a satisfactory record, and no exception to this rule can be made in favour of the singing, by Rosina Buckman and Edna Thornton, of "Power Eternal," from Rossini's "Stabat Mater," and "Sainted Mother," from Wallace's "Maritana." This choice of music is strange enough, but in any case the words are not very clear, and no personality in the performance is evident in the reproduction.

For those who do not greatly care for what is assumed to be "high-brow" stuff, there are in this issue some excellent records. First I should put Jessel's "Parade of the Wooden Soldiers," as played by H.M. Coldstream Guards Band. No one who saw the Chauve-Souris in their recent visit to London will forget their most delightful performance to this music, which, being essentially theatrical, at once calls up the stage setting. On the reverse side of this disc is a slight "Little Dolly Dance," rather perfunctorily done by the Mayfair Orchestra, but quite pleasing with its *pizzicato* strings and deftly inserted percussion.

For those who like Coleridge-Taylor's "Hiawatha" H.M. Coldstream Guards have recorded the ballet music from it, and it would be silly to try to spoil the enjoyment of hundreds with any personal opinions of mine.

Finally, there is a record which is fun enough: it is made by the Light Opera Company, and contains on one side a set of Neapolitan songs, and on the other some of the more popular English (or American) songs of to-day. An amusing pot-pourri.

BATTISTINI.

Battistini, the Italian baritone who is described as "the greatest living master of *bel canto*," has revisited London after an absence of sixteen years. I heard him for the first time last week at the Queen's Hall, though of course one already knew something of him through his gramophone records.

I came away from his recital curiously disappointed. His was the kind of voice I most admire; purity, control, proportion and technique were all perfect; never a false quality, never a forced emotion. And yet with all this command of colour and of mood, there was missing for the most part just that purely vocal thrill, that lyric personality in the voice, that natural magnetism of which I suppose age inevitably dispossesses a singer. Battistini is now sixty-five: I would have given much to hear him at forty-five. For I do not greatly care to listen to the things in which his unsurpassable technique brings him triumph—things like Carissimi's "Vittoria!" or Donizetti's "O tanto Amor," or the Prologue to "Pagliacci." What were his greatest renderings were Paisiello's "Il mio ben" and Gluck's "Spiagge Amate": here an absolute perfection of form was present with an almost absolute perfection of substance. That Battistini is a consummate master is not in doubt for a moment: a man who can sing Mozart, Verdi, and Massenet with such dignity and fitness as he did is a rare artist indeed, and he should be so acclaimed. But for myself, as I have said, I just missed the purely intimate thrill that makes form and substance dissolve to become an indivisible perfection. And I readily believe that Battistini in his younger days would so have dissolved the component parts of his very high art.

ANDANTE.

THE PALESTINE GENDARMERIE.

Mrs. McNeill, President of the St. George and St. Barbara Société de Bienfaisance, 12, Queen's Gate Place, S.W.7., appeals for books for the officers and men of the British section of the Palestine Gendarmerie. Colonel McNeill is in command of the Corps.

THE OSIRIAN MYTH.

"THOTH, THE HERMES OF ANCIENT EGYPT." By Patrick Boylan, M.A., Professor of A cient Languages in the University of Dublin. (The Oxford University Press. 10s. 6d. net).

The present generation has witnessed a welcome change in the Christian's attitude towards rival creeds. Time was when missionaries who carried the Cross into "heathen" lands believed Hindu deities to be manifestations of the Evil One, and branded the founder of Mohammedanism as an impostor. The study of comparative religion has broadened the theologian's outlook: intolerance and vituperation have given way to sympathy and an earnest desire for deeper knowledge. It is generally recognised that no race possesses a monopoly of divine truth; that all the great organized religions are inter-related, and that their evolution should be examined with perfect impartiality. The new departure is admirably exemplified by Professor Boylan's monograph on the god Thoth, who gained a foremost place in the pantheon of ancient Egypt, and many centuries later governed the everyday life of Hellas as Hermes. Professor Boylan's study is based on the version of the famous Osirian legend given by Plutarch's treatise "Isis and Osiris." In the Greek historian's day it took the form of a lawsuit for the throne of Egypt tried before the gods of Heliopolis. Osiris figured as a civilising monarch, Isis was his faithful wife, Horus his son and heir, Set his wicked brother, and Thoth was a brilliant advocate who helped Osiris to secure justice. Harking back from the Plutarchian story, Professor Boylan traces the evolution of the primitive nature-myth whence it sprung through all the changes wrought by popular fancy and priestly speculation. He arrives at the conclusion that Osiris was originally adored as the active and Isis as the female element in Nature; while Set personified the fierce sirocco which destroyed vegetation in the Nilotic delta. In his view Thoth was an independent deity who presided over the Dead. As the worship of ancient Egypt concerned itself solely with life in the world of spirits, Thoth grew in importance and finally cast his fellow-gods into the shade. It was inevitable that the legends relating to him should be interwoven with those which clustered round the protagonists in the struggle between the Powers of growth and destruction which primitive races evolve for the phenomena of Nature.

Professor Boylan writes for Egyptologists, but laymen unversed in the hieratic script will not fail to appreciate the scholarship and acumen which he has brought to bear on an esoteric field of research.

F. H. S.

THE CAMBRIDGE MEDIEVAL HISTORY.

"THE CAMBRIDGE MEDIEVAL HISTORY." Vol. III., with Maps. (Cambridge University Press: 50s. net.)

The third volume of the Cambridge Medieval History has just been published, and it is a duty to salute its appearance. No historical student can forget the stolidity and indigestibility of the first two volumes, but neither can he deny the indispensability of the whole series. The most noticeable feature of this volume, which is devoted to Germany and the Western Empire, is the absence of original German scholarship, but the period dealt with is scarcely highly enough coloured for the removal of this drab weight to make much difference.

So far as we are able to judge (and mention of the countries with which *THE NEAR EAST* particularly deals is naturally but scanty), the Editors of this work have done conscientiously and well. It is true that they bring home to one more intimately than ever the force of the old saying that "Oxford historians are dull on purpose: Cambridge historians because they

cannot help it," but as a matter of fact, here it is the period, not they themselves, that made them unable to help it. At this period the countries of Europe were groping mistily for stability; dawns were but breaking; little had quite crystallized out by the end of this volume. As the Editor, Dr. Whitney, points out, the line of continuity did indeed remain unbroken (except by the Moors in Spain and by the establishment of the Normans) throughout the time from the death of Charlemagne to the middle of the Eleventh Century, but either the new impulse of affairs took such old forms or the old impulse such new forms that the essential unity is difficult to perceive. It is only by the mastery and the consequent ordering of such details as may be found in this volume that the preceding and sequent unities of Western Europe may be understood.

On so indefinite a period it is hard to make definite comment. But we may touch on one point, which closely concerns this journal; it is hinted at in the helpful Introduction: we mean the terror which at this time the Saracens were locally causing, that terror, which, as Dr. Whitney says, "in a form vaster and more undefined, was to form, later on, a dark background for the history of Europe as a whole." It is in a description of the inroad into Spain of the Arabs that one of the best chapters in this history has been written. The author of this chapter, which is entitled "The Western Caliphate" is Dr. Rafael Altamira, and he has achieved a brilliant balance between necessary detail and general observation. He sketches the establishment of the Ummayyad Emirate in the Eight Century, the subsequent civil wars of the Moslems in Spain, and the efforts, frustrated by Abd-ar-Rahman III, to drive out the Moslem civilization. However, resentment towards the Arabs grew until the Caliphate eventually fell in the Eleventh Century. With the passing of the suzerainty of Spain to the Christian kingdoms, this chapter ends, but not without a demonstration of the fact, which Disraeli in another context remarked, that the Arab civilization succeeded in Spain because of its superiority to that of the Northern States, the culture of which it absorbed.

With the other chapters it is not in our province to deal; some are excellent, others readable, and a few merely sound. Two or three are fascinating, and none more so than Professor Lethaby's masterly description of "Byzantine and Romanesque Arts."

We still think the Maps, which, incidentally, together with other parts of the Volume, had been prepared before the War, hardly worthy of the text: fuller detail would in no way have lessened their clarity.

A NEW MAP.

We have received from Messrs. John Bartholomew and Son, Edinburgh, a copy of their new Map of the Middle East, which is drawn to a scale of 1:4,000,000, or 63 miles to an inch. Its field extends from Kutais in the North to just below Riyadh in the South, and from Chios in the West to Gwattar (or Gwadar) in the East, thus embracing many points of particular interest at the present time; and it will, we think be found very useful by all who wish to follow intelligently events in this region. Naturally, some of the boundaries shown are likely eventually to need redrawing, while others have to be left frankly undetermined; but since the colouring is orographical it will be easy to make such emendations and alterations as may be required, and the sheet will be of value for many years to come. The railways are clearly marked and the lettering is upon the whole distinct, while the scheme of colouring serves its purpose well and does not confuse the eye. The drawing and printing are good and the price (3s. 6d. mounted on cloth, or 5s. dissected, mounted and folded) is certainly moderate.

PERSONAL AND GENERAL.**To-day.**

May 11 (New Style).

April 28 (Old Style).

Ramadan 14, 1340 A.H. of the Moslem Calendar.

Iyar 13, 5682 of the Jewish Calendar.

The Maharaja, of Kapurthala has arrived at Bordeaux.

General Muhammad Wali Khan, Afghan Envoy Extraordinary for Europe, has left Paris for Kabul.

Senor Romero, Spanish Minister in Bulgaria, has concluded his visit to London and returned to Sofia.

His Highness the Aga Khan, now staying in Paris, is expected in London towards the end of this month.

Viscount and Viscountess Ebrington, who have been for some time in India, have arrived in town for the season.

The Crown Prince of Persia and his suite left Marseilles last week in the P. and O. steamship 'China' for Bombay.

Prince Nicolas of Roumania has returned to London from Bucharest and is staying with the Roumanian Minister at 50, Grosvenor Street.

Commander Jean Bouboulis, Naval Attaché at the Greek Legation, and Madame Bouboulis, are now in residence at 104a, Park Street.

M. Stoicesco, Counsellor at the Roumanian Legation in Paris, who accompanied Prince Nicolas to London, has gone back to resume his diplomatic duties.

M. Stergiades, the Harmost of Ionia, has returned to Smyrna from Athens, and General Vlachopoulos, Military Governor of Anatolia, from Sokia and Scala Nuova.

It is officially announced in Belgrade that the condition of M. Pashitch, Prime Minister of Serbia, is very satisfactory.

Viscount and Viscountess Milner, who recently returned from abroad, are now at Sturry Court, their residence in Kent.

Mr. E. N. Corbyn, Governor of Khartoum, left the Sudan on leave on April 20. He is expected to return on September 1.

Sir Nicholas Dodd Beatson Bell, K.C.S.I., K.C.I.E., late Governor of Assam, has been ordained and intends to engage in Church work at Whitby, Yorkshire.

General Haddad Pasha, the personal representative of King Faisal, has arrived in London, and is staying at the Carlton Hotel. He is unfortunately laid up with a slight attack of dysentery.

Our Baghdad Correspondent writes (April 27):—Miss Gertrude Bell, C.B.E., left Baghdad by aeroplane yesterday for Jerusalem, where she will meet Sir Hugh Bell.

A marriage is arranged between Captain Roland Le Fanu, M.C., the Leicestershire Regiment, youngest son of Henry Le Fanu, retired, I.C.S., and Mrs. Le Fanu, and Marguerite, eldest daughter of Mr. and Mrs. George Lumsden, Tarvit, Cupar, Fife.

THE PERSIA SOCIETY.

President: Lord Lamington, G.G.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia,

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

Mr. Ormsby-Gore, M.P., will preside at an afternoon meeting, organised by the Conservative Women's Reform Association, on the 12th inst., at which Professor Arnold Toynbee will speak on his experience in the Graeco-Turkish War.

King Fuad was patron of the athletic sports meeting organized by the Cairo Y.M.C.A. on Easter Monday, and the prizes and cups were distributed by Lady Congreve, wife of the G.O.C., Egyptian Expeditionary Force.

The engagement is announced between Captain W. L. Fawcett, M.C., 9th Gurkha Rifles, youngest son of the late J. E. Fawcett and Mrs. Fawcett, of Heron Court, Knaresborough, and Margaret Ann, only daughter of Mr. and Mrs. Lewis Ilbert, of Dunstone, Yealmpton, Devon.

The Minister of the Kingdom of Serbs, Croats, and Slovenes, returned to London last week from The Hague, where his Excellency, who is also accredited to the Netherlands, presented his Letters of Credence to the Queen. M. Gavrilovitch was accompanied by Mme. Gavrilovitch and M. C. Fotitch.

It has now been decided that the marriage of King Alexander, King of the Serbs, Croats, and Slovenes, with Princess Marie of Roumania, shall take place in Belgrade on the 31st inst., and not as previously arranged. The King and Queen of Roumania will leave Bucharest on the 29th inst., and will sail up the Danube to Belgrade.

The engagement is announced between Dr. E. P. Scott, of 78, Portland-Place, W., son of L. P. Scott, and nephew of Sir Harvey Adamson, K.C.S.I., and Sybil, daughter of Mrs. Bannister Hawkes, of 38, Grosvenor-Gardens, S.W., and granddaughter of O. C. Hawkes, J.P., of South Bank, Edgbaston.

The engagement is announced of Henry William Mirehouse, M.B.E., Lieutenant the Prince of Wales's Volunteers, elder son of Mr. H. G. Mirehouse, Les Chalets, St. Helier, Jersey, and Amabel Marcia Ellen, only daughter of Mr. H. A. Smallwood, C.M.G., Financial Secretary to the Government of Palestine, and Mrs. Smallwood, of Jerusalem.

Dr. E. S. Crispin, Director of the Sudan Medical Department, left Khartoum on April 20 for England on leave, after expiration of which he will retire from service in the Sudan. There was a large number of notabilities at the station to see Dr. Crispin off. Sir Herbert Jackson Pasha, the Acting Governor-General, the members of the Governor-General's Council and Heads of Departments, as well as other officials were present.

The King received at Buckingham Palace on May 6 Major W. G. Strover, 50th Kumaon Rifles, Officer-in-Charge, and the King's Indian Orderly Officers as fellows, who were presented to his Majesty by Lieutenant-Colonel A. D'A. G. Bannerman, Political Aide-de-Camp to the Secretary of State for India: Honorary Lieutenant Krishna Ghosle, Bahadur, 128th Pioneers; Honorary Lieutenant Joseph, Bahadur, 2nd Queen Victoria's Own Sappers and Miners; Subadar-Major Nanjappa, Bahadur, 64th Pioneers, and Subadar-Major Vishram Rao Chowan, 116th Mahrattas.

APPOINTMENTS AND PROMOTIONS.

The King has been pleased to approve of the appointment of General Sir F. J. Davies, K.C.B., K.C.M.G., K.C.V.O., to be Aide-de-Camp-General to the King, with effect from April 26, 1922, in succession to General the Earl of Cavan, K.P., G.C.M.G., G.C.V.O., K.C.B. General Davies has been General Officer Commanding-in-Chief, Scottish Command, since 1919. Before that he was Military Secretary at the War Office. In the war he served in France, the Dardanelles, and Egypt.

OBITUARY.

The death has occurred, at the age of seventy-nine, of Lieutenant-Colonel G. T. Plunkett. Colonel Plunkett entered the Royal Engineers in 1862, and became lieutenant-colonel after twenty-seven years' service. He took part in the Sudan Expedition in 1885. In 1894 Colonel Plunkett was the author of a "Conversation Manual for India" and an "Anglo-Arabic Vocabulary," and also published "Walks in Cairo" and other volumes. He was a keen friend of Italy.

A message from Bombay announces the death of the Maharaja of Kolhapur. His Highness Shahu Chhatrapati, Maharaja of Kolhapur, was born in 1874, and was the adopted son of his predecessor in the title. He was educated at Rajkumar College, Rajkote, Bombay, and by special tuition, and the honorary degree of LL.D. was conferred upon him by Cambridge University in 1902. He was an honorary colonel in the Army, and a member of the Royal Agricultural Society. He was created G.C.S.I., in 1895, G.C.V.O., in 1902, and G.C.I.E. in 1911. Kolhapur is a native State of some 3,200 acres in the Province of Bombay, and has a population of nearly 900,000, and the late Maharaja was one of the ruling Princes of India, and a descendant of the "Great Shivaji," founder of the Maratha Empire.

THE ARAB HORSE SOCIETY.

At a Council Meeting of the Arab Horse Society held in London last month the following new members were elected—Maj. T.R. Badger, Carlton Park, Market Harborough, Northants; Miss Elspeth K. B. Colquhoun, 16, Westbourne Terr., London, W.; Mrs. A. B. Horner, Burleigh House, Epping, Essex; Mrs. A. D. Hough, Parsonage, Theydon Bois, Essex; Mrs. S. G. Hough, Springhouse Park, Theydon Bois, Essex; Mrs. S. H. Hough, Blunts Chase, Theydon Bois, Essex; T. B. Jenkinson, Virginia Ranch, Dog Pound P.O., S. Alberta, Canada; Charles Lees, Loanda, Wickwar, Glos.; The Hon. Mrs. C. H. Strutt, Blunts Hall, Witham, Essex; The Hon. Mrs. R. E. L. Vaughan Williams, High Ashes Farm, Holmbury St. Mary, Dorking, Surrey; R. E. Lomax Vaughan Williams, High Ashes Farm, Holmbury St. Mary, Dorking, Surrey. Governor—Claude Tryon, 10, Grays Inn Square, London.

Mr. W. F. Saunt was co-opted Member of the Council in the place of Lieut.-Col. P. D. Stewart, D.S.O., elected Vice-President.

The London Show Accounts were duly passed, and details arranged in connection with the Arab Classes at the Summer Shows.

The Council then adjourned until their next meeting on Tuesday, May 30.

OLD HEBREW WRITING.

Some little brown scraps of papyrus, shown by Professor Flinders Petrie to members of the Jewish Historical Society recently, are said to contain the oldest Hebrew writing known, apart from stone inscriptions. Professor Petrie, who was lecturing to the Society at University College on the status of the Jews in Egypt, said the papyri were part of four letters whose discovery a few weeks ago in Middle Egypt had come as a surprise. They dated from the third or fourth century, and were ordinary business letters, like the bulk of the Greek papyri of that age. One of them contained an inquiry about cinnamon and salt, and another was written on part of a Greek document, probably of the Third Century. Another interesting exhibit was a reproduction of a hieroglyphic inscription, found by the Professor on a temple monument at Thebes, and the only one to mention the people of Israel. He also showed a model of the Temple Hill at Jerusalem, of which a replica was set up by the exiled Jews in Egypt under one of the Ptolemies, when they attempted to found a new Jerusalem near Memphis.

ARAB SURGERY.

Dr. E. Lloyd, who has had charge of the hospital of the Church Missionary Society at Omdurman, gives the following account of Arab surgery in the "C.M. Outlook" for May:—

"There is a very common disease in the Sudan which follows a prick in the foot by a thorn. A slowly-growing swelling develops, and the patient loses the use of his leg, and finally dies

of exhaustion. No treatment is of any use except amputation and this operation is, therefore, one of the commonest which we have to perform. Before our arrival it used to be carried out as follows: the patient was seated in one of the grass-walled huts which the Arabs build, and the diseased foot was thrust through the wall. An obliging friend then took a two-handed sword, such as is still carried by the Arabs, and with one blow removed the diseased leg, the wound then being cauterized. The Arabs have now realized that modern surgery can improve on this method."

NEWS IN BRIEF.

The French and Greek Governments have adhered to the proposal to prolong the powers of the Mixed Courts in Egypt for an indefinite period.

A Central Labour Federation has been formed at Bombay, under the auspices of the Indian Trades Union Congress which is intended to act as a provincial executive for the Bombay Presidency on behalf of the Congress.

A bomb was exploded in Sofia on April 30 and killed two persons. The police arrested some 30 Communists, among them, it is said, the bomb-thrower. In consequence, apparently, of these arrests, the demonstrations on May Day passed off without incident.

Certain coins discovered in a tomb at Cesis (Wenden), in Latvia, in 1910 have recently been identified by the secretary of the Afghan Mission to Berlin as being of Arabian origin dating from the first century of Islam.

The Cairo correspondent of *The Times* states that the Commandant of Police in Damascus has been dismissed for failing to grapple with the recent situation.

A message from Kabul states that the war between the Dirs and the Swats has ceased in order to allow the combatants to harvest the crops. A truce till August has been signed and police are guarding the battlefield.

IRAQ.

The Mohammerah tripartite Agreement between Great Britain, Iraq and Nejd may well prove a more important document than appears at first sight. Ibn Saud of Nejd has not taken kindly to the accession of King Faisal to the throne of Iraq, and was only persuaded to recognize the *fait accompli* by the promise of a subsidy from Great Britain. The vexed question of the Iraq-Nejd frontier, however, remained unsettled—a circumstance of which the Akhwan ("Brethren" *i.e.*, Wahabis) took advantage by raiding border tribes who preferred allegiance to Iraq to the strict tenets of the Wahabis. On March 11 a more formidable raid was carried out at Abu Ghar and Shaqrah by Faisal ibn Dawish, one of the Sultan's chief commanders, and after British reconnoitring aeroplanes had been fired upon by the raiders it became necessary to use the Royal Air Force to disperse the Akhwan concentration. In spite of the natural indignation caused in Iraq by these events—a Cabinet crisis supervened—Sir Percy Cox refused to allow his efforts to bring about an understanding between Iraq and Nejd to be shipwrecked, and called upon Ibn Saud to repudiate the action of his lieutenants, and to compensate the Iraq tribes for their losses. Omitting somewhat pointedly all reference to the latter demand, the Sultan apologised and undertook "to deal with anybody found at fault and to put a stop to further depredations." In the meantime his delegates were approaching Mohammerah for a conference with the representatives of Sir Percy Cox and the Iraq Government, and it is to the credit of the latter that it did not insist upon a complete liquidation of the raid incident before the meeting. In his correspondence with the British High Commissioner on the subject, King Faisal showed that he was fully prepared to second any statesmanlike measures for the benefit of Iraq, however high public feeling might be running against the Akhwan. He expressed the hope that the arrival of the Emir's representatives "would prove to be a healthful preliminary step towards the resumption of friendly intercourse and the cementing of relations of alliance between the two neighbouring countries." The conference decided to make the boundary between Iraq and Nejd conform with tribal organisation rather than with an artificial alignment across the desert. Certain tribes are allotted to Iraq, others to Nejd. If the agreement is observed in the letter and in the spirit by all the Sultan's followers, a notable contribution to the peace of the Middle East, and perhaps of a still wider region, will have been made. Tribal differences in the desert south of the lower reaches of the Euphrates may seem unimportant amid the world's present preoccupations; but—as has been so often insisted upon in THE NEAR EAST—any unsettled question in the Near or Middle East may ultimately embroil the whole of Europe. Quite recently Ibn Saud convinced himself, on the strength of the favourable reception accorded to his messengers in Damascus, that he could count on French support for a policy of pinpricks against King Faisal. Possibly subsequent events in Syria have satisfied him that his intrigues with the French would not commend themselves to the Arab world.

The establishment of friendly relations with Nejd will be of considerable advantage to Iraq, but it will still leave that country in an indeterminate and unsatisfactory condition. As is known, negotiations are in progress

for a treaty between Great Britain and Iraq, and until that treaty is ratified the success of the experiment to which the British Government is committed in Iraq is in the balance. Success depends on King Faisal's rulership; but we have made him ruler over a practically bankrupt concern, without power or any real authority. No man under such conditions, if they are unduly prolonged, can hope to win through. The British Government's position is not without difficulty. It is responsible to the League of Nations for the proper exercise of the Mandate, and it hesitates to give up any of its authority until it is assured that the Arab Government can make good. The vicious circle is thus complete, and only bold action on the part of Great Britain can break it. The existence of the Mandate is regarded as the negation of independence, and is fastened upon by enemy propaganda as proof that Iraq is not a separate Moslem State but a British province. It is pointed out that real authority rests with the British High Commissioner, and the experience of the Akhwan raid is cited to show that King Faisal has no power even to protect his own frontiers. This may be a perverted method of reasoning, but we have to deal with those among whom it makes a convincing appeal. Once again, as in Egypt, Great Britain would seem to have to choose between taking her courage in both her hands and in being compelled ultimately to go farther than there is need to go to-day or than the interests of the country justify. It is no longer a question of making Iraq a success; the British Government has already relinquished its responsibility in this respect, and is committed to making the Faisal régime a success. Incidentally it will be doing its duty by the country at the same time; but the point to remember is that, having handed over to King Faisal, Great Britain must now enable him personally to make good. If this aspect of the situation is once grasped, the solution becomes easier; but a Treaty must commend itself to the sense of the nation as a whole, or it may share the fate of the Anglo-Persian Agreement.

The Mohammerah Agreement offers some justification for the contention of those who are in closest touch with the Arabs that they are far from providing, as is generally supposed, the most hopeless material for the formation of a modern State. In the opinion of some observers acquainted with conditions in both countries the material on the banks of the Tigris is as good as, if not superior to, that on the Nile. The Arabs are capable of getting things done, and it is noticeable that the main grievance of the Administration with existing conditions is that, when so much needs to be done, everything is at a standstill owing to the vagueness of the present position. In Western minds there may be much virtue in marking time; the Arab does not appreciate the process. In Iraq it has served only to disillusion him. The expectations formed at the moment of the liberation of Mesopotamia from the Turks have not materialized; even such as were renewed when King Faisal mounted the throne seem to hang fire, and all the time insidious propaganda is reaching the Arab's ear that he has been "let down," that Great Britain is not the friend that she claims to be, that, as Arab aspirations can never be realized under her aegis, a complete break must be made with the British and their nominees. There are, of course, many in Iraq who are proof against all intrigues of this nature, but so far little has been done to help them. European standards of political wisdom cannot be applied to Iraq; we must take the people as we find them, and make the best of the material that there is to hand. It is not the fault of the Arabs that a vast amount of British money has been squandered on the country. Indeed, they point with dismay to the fact that this money was squandered, because practically nothing was spent on reproductive works. It is for that reason that Iraq is to-day so nearly a bankrupt concern. The railway system serves military purposes and can never pay, because it makes no attempt to tap revenue-producing sources, such as the best agricultural districts or the pilgrim passenger traffic. Until the Administration is provided with a loan for railway construction,

it must meet an annual deficit on its railway budget. An extension of irrigation is also needed; as soon as the main works are completed, whole districts are ready to build at their own expense the canals that will bring water to the cultivable area. This unexpected appreciation on the part of the settled Arab of the benefits of irrigation suggests that his prosperity will rapidly attract his semi-nomad neighbour, and that gradually Iraq will be able, just as Egypt has done, to count upon a steady immigration of the desert Bedouin. There is no desire to overpaint the picture. Early exaggerations in regard to Iraq were soon followed by equally unbalanced pessimism. The truth, as can easily be discovered to-day, is that Iraq is a land of considerable potentialities, that can only be developed slowly; but there can be no doubt that it will amply repay money invested intelligently in it. First of all its political status must be settled on satisfactory lines, and at the same time Great Britain, having identified herself with the existing régime, must take without delay the few steps required to make that régime a success.

TRAVEL NOTES.

EGYPT AND THE SUDAN.

(Continued).

The best advice that can be given to those who contemplate a visit to Egypt is not to be in a hurry. Spend a short time there rather than miss seeing it altogether; but extend your stay to the utmost limits possible. The programme-tourist may still need our sympathy and prayers, but he or she is certainly past writing for. Are they not all armed with guide-books, if they should ever find a moment to spare from their time-tables? "Passengers by the s.s. Heruar will assemble at 8.15 a.m.

KHARTOUM: GORDON'S STATUE.

to drive to A. On the return journey visits will be paid to B, C, and D. Lunch will be served at 12.45 p.m. and at 1.30 p.m. a start will be made for E. The train for F. leaves at 6 p.m. All baggage must be ready by 4.30 p.m." So runs the normal notice prominently displayed in the hotels. But how thoroughly they enjoy it.

— o —

It was one of such a party who was inspired to utter an epigram. He had been watching, from the train, an Egyptian on the railway platform, and on being told

that he was engaged in his devotions and not in acrobatics, remarked: "I guess, what these people want is more work and less prayer, while in the States we want more prayer and less work."

— o : —

Those who intend to visit the Sudan will hardly wish to spare the weeks entailed in the steamer journey from Cairo to Luxor and Assouan and back. They can console themselves with the reflexion that they will have two delightful days on the Nile each way between Shellal and Wady Halfa, and that they will, therefore, not miss altogether the attractions of the river trip. The Egyptian State Railways are prepared to convey the traveller from Cairo to Luxor in thirteen hours and

KHARTOUM: EMBANKMENT STREET.

on to Assouan in eight or nine more (six-and-a-half hours' actual travelling). But they also cater for the more deliberate sightseer, and it is no longer necessary to go by steamer, if one wishes to visit places *en route* such as Beni Hasan and the Speos Artemidos (Station: Abu Kirkas), Abydos (Station: Baliana), Esna, Edfu or Kom Ombo. For breaks in the journey however, time-tables and possibly the Railway officials will have to be consulted.

— o —

For the journey to Khartoum Wagons-Lits coaches are attached to the night train from Cairo to Luxor. According to the present time-table a two-hours' stay at the latter station leaves time for a visit to the river front and for as much more as the disposition or energy of the individual passengers suggests. Either on the outward or the homeward journey a stay will be made at Luxor, and at Assouan. Until the former of these places has been visited the traveller can claim only an imperfect acquaintance with Egypt. At Gizeh within sight of the Pyramids, still better on the day's trek between Gizeh and Sakkara, and above all in a camping expedition to the Fayoum, one can absorb some of the charm of the desert, and understand why Egypt exercises the hold that it does on the imagination; but in choosing Thebes and Karnak—on opposite sides of the Nile at Luxor—as the site of their finest temples and their chief burial ground, the rulers of ancient Egypt showed an aesthetic sense of the first order.

— o —

With the noise and bustle of Cairo left far behind it is possible at Luxor, in the winter season, to feel an exhilaration that is entirely restful. The air itself must

ASK FOR

WHITE HORSE WHISKY

BY APPOINTMENT.

be the whole tonic, for one is conscious of losing nothing of the effect even when one is not gazing on the stately Nile and beyond, over the broad belt of cultivation, to the Libyan Hills. In the latter are the tombs of the Kings and of the Queens—a group of Egypt's sights which most people will place without hesitation at the head of the list. India may contain much that is superlatively impressive; Nature has provided a wilder setting for some of Greece's antiquities; but those whose mummies were laid to rest in chambers cut out of the interior of the hills, approached in some cases a hundred yards by stairways, passages, and rooms all hewn out of the solid rock, have nothing to fear from comparison with any of the other great ones of the earth.

— o —

Even the Pyramids to my mind represent something more obvious than the positions chosen by the kings of the eighteenth and nineteenth dynasties for their burial places. A journey to Upper Egypt shows that their builders went to nature for their inspiration, for there are many hills rising abruptly from the desert which resemble a pyramid. But while both Tombs and Pyramids would be prompted by the same desire for undisturbed seclusion for the body after death, the architects of the former must surely have been gifted with more subtle powers of imagination. But they reckoned without posterity. I must confess to *feeling* an apology to Amenhotep the Second as I looked upon his mummy in its sarcophagus in the inner chamber of his tomb hill at Thebes.

— o —

While on the subject of the Gizeh Pyramids I must mention a curious discovery that stands unwittingly to the credit of the Royal Air Force. On the way to Khartoum I was shown a photograph of the Great

KHARTOUM: THE BRIDGE OVER THE BLUE NILE.

Pyramid taken from the air. The owner had recently been given it and had not made any special study of it. In the leisure of the steamer trip between Shellal and Halfa it required no effort to discover in a corner of the photograph a portrait of an ancient Egyptian head with high forehead. The profile of the face was formed by the road leading up to the Pyramids from the Mena House Hotel; nostrils and mouth were clearly marked although we were unable to decide what the particular objects would be on the ground. I hoped to secure a copy of the photograph for reproduction in these pages, but was not successful in tracing it on my return to Cairo.

— o —

From Luxor to Shellal the railway is of narrower gauge; but this disadvantage has not been allowed to detract from the passengers' comfort. Windows of blue glass keep out the glare, and with regard to dust the situation is certainly better than would be expected in the case of a train travelling for so many hours over such a track. For most of the way the line has avoided

encroaching upon the cultivated area, by running alongside on the desert surface. If our American epigrammatist ever passed over this route, he will have

A SAKKIYA (WATER WHEEL) ON THE NILE.

realized that his *bon mot* does not apply to the fellaheen. As one watches the various phases of native life from the train one appreciates that industry is a virtue of the Egyptian agriculturalist. We may even hope that it is reluctance to be taken too far or too long away from his work rather than any more obvious shortcoming that prompts the villagers to bury their dead in such close proximity to the living.

TROUBLES IN SYRIA.

The Palestine Arab Delegation now in London in a statement made to Reuter's Agency says:—

The troubles in Syria continue, and skirmishes in which several lives were lost on both sides have already taken place in the Homs region between the Arab natives and French troops. The British authorities have been informed that it may become very difficult to prevent an invasion of French territory by the Arabs of Trans-Jordan, who have been pressing their chief, the Emir Abdullah, to let them go. While Mr. Bell, an Englishman and director general of the Hejaz Railway, was walking in the streets of Damascus he was taken for Lord Milner by the crowd, and soon shouts of "Long live Lord Milner, the champion of Arab unity! Long live Great Britain!" rent the air. Mr. Bell found himself forced to acknowledge these acclamations by repeatedly raising his hat. All shops were closed at Damascus on April 28 as a protest against the sentences passed by the French courts martial on leading Nationalists of twenty, fifteen, and ten years' imprisonment. The fifty Nationalists arrested at an Arab café have gone on hunger strike, all the sweets and delicacies sent them by friends having been distributed among the gaolers. The streets of Damascus are patrolled day and night by tanks, machine-guns, and armed troops, and several casualties have occurred in encounters between troops and the population.

PRESS ON THE NEAR EAST.

In consequence of queries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Situation in Syria.

The issue of *Palestine* for April 29 contains a useful summary of general conditions in Syria. After outlining the proximate causes of the recent outbreaks, it continues:—

The incidents which are reported are not in themselves of great gravity, nor is there any reason to suppose that the French authorities are not perfectly capable of coping with the situation. They are, on the other hand, symptomatic of a general malaise which cannot but be a source of some anxiety. It would be misleading to suggest that the French have made no material progress in the task of pacification. Though Northern Syria has long been largely out of hand, the situation in Southern Syria has perceptibly improved since the French occupation. The area in which Syria marches with Palestine is much less disturbed than it was before the French ejected the Damascus Government, and Palestine is no longer flooded with Christian refugees. Even in the interior anarchy no longer prevails in the same degree as in the period of chaos which culminated in July, 1920. The weakness of the Damascus Government and its tendency to drift into the hands of irresponsible adventurers are, indeed, in themselves a strong argument for the presence, for the time being, of a Mandatory Power.

Nevertheless, it must be admitted that the French Administration, admirable as is some of the work it has done, is nowhere very popular in Syria. For a variety of reasons, into which it is not now necessary to enter, the French were somewhat coldly received from the outset. There was none of the enthusiasm which their traditional association with the Levant had led them to expect. Nor can it be said that they have succeeded since the Occupation in winning the goodwill of the Syrians. Though there is no open hostility on a formidable scale, the population continues to maintain an attitude of reserve. It shows little disposition to accept in a friendly spirit the advice and assistance of the Mandatory Power. Its mood is at best one of reluctant acquiescence. The Christian minority which was disposed to welcome the French in the expectation of favours to come has been disillusioned. The Christians had confidently counted on ascendancy, and the Lebanon saw itself a favoured province. These hopes, for which there appeared at first to be some foundation, were not realised. With the disappearance of the Arab Government of Damascus, the French became directly responsible for the administration of an overwhelmingly Moslem Syria and began to shape their policy accordingly. But while they disappointed the Christians by refusing them favoured treatment, they were not successful in winning the allegiance of the Moslems. Syria has not been exempt from the unrest which is perceptible throughout the Moslem world. Mustapha Kemal's successful defiance of the decrees

of Europe had its repercussions throughout Syria and his operations directly affected the northern area. The Angora agreement, though evidence of French goodwill towards a Moslem Power, was also evidence of French weakness in face of Moslem pressure. Again, all parties were disappointed by the slow development of self-governing institutions and by the tendency—which has been severely criticised in the French Parliament—to impose on Syria what appeared to be a swollen bureaucracy. The aims which France had in view were the more readily open to suspicion in that the terms of the Mandate have never been made public. While the draft Mandates for Iraq and Palestine were published more than a year ago, the Syrian Mandate still remains a mystery. Finally, the economic situation is none too healthy. The French have actively applied themselves to the development of the country and have put in hand a number of important public works. On the other hand, they have shown a tendency to adopt a colonial policy which regards the Syrian market as a French preserve, and they have incurred some resentment by their manipulation of the currency, which has imposed upon Syria a depreciated Syrian franc. Add to this the general depression from which Syria has suffered in common with the rest of the world and it will be realised that political disappointments have not, up to the present, been offset by a marked advance in material prosperity.

Such are some of the causes of the present discontent. It must not, however, be assumed that the Syrian problem could, in any circumstances, have been easily disposed of. A so-called Syrian Congress at Cairo has recently repeated the demand which had previously been made at the Geneva Congress last autumn for the immediate termination of the Mandate. This would be no solution. The formula of Syrian independence is at present almost meaningless. Syria has not and has never had any real political unity. It is honeycombed by local and religious jealousies. Even such centres as Beirut, Damascus, and Aleppo have no well-developed sense of a common interest and a common nationality. The wilder districts to the north and east would be wholly out of the control of any Syrian Government that might be established, and are frankly in need of pacification before any appreciable progress can be made. The itinerant Syrian emigrés who are demanding independence may in some cases be men of high ideals, but they are wholly out of touch with realities. Again, Syria has been educated under the Turkish régime in a bad tradition, and is singularly poor in public-spirited, disinterested and enlightened men of affairs. In such circumstances, it can be confidently predicted that the abandonment of the Mandate—if that were conceivable—would be followed by chaos and anarchy and not improbably by the eventual return of the Turk. Whatever the mistakes of the French Haut Commissariat—its difficulties are, after all, not unlike those with which France was faced in the early stages in North Africa—there can be no doubt that Syria will continue for some time to require the active assistance of a disinterested trustee.

Meanwhile, the situation in Syria is of interest as an indication that Arab countries are not easily administered, Zionism or no Zionism. We shall

RANKEN**CIVIL AND MILITARY TAILORS,****20, George Street, Hanover Square,****London, W. 1****(W. O. LAMBERT Representative)****& CO., LTD.****And at CALCUTTA, DELHI, SIMLA,

be surprised if another illustration of that fact is not sooner or later supplied by 'Iraq. Nothing could be more naïf than the suggestion which is sometimes made that it is only where there is Zionism that there is trouble. We can only hope that the unrest in Syria will not have reactions in Palestine, in which some of the same anti-European agencies are at work. There are disquieting rumours of Bedouin movements on the border of the French zone in Transjordan. The entourage of the Emir Abdullah, who himself set out in the first instance to recover Damascus, cherish ambitions which are well known. It is to be hoped that the Emir will not be tempted to fish in troubled waters. An incursion into the French sphere from Transjordan would not contribute to the improvement of Anglo-French relations, and would prejudice that close co-operation between the two Mandatory Powers which is essential to the effective discharge of the lofty responsibilities they have accepted in the Middle East.

The Italo-Turkish Pact.

The *Manchester Guardian* of May 4 begins an article upon "Italy and the Triple Alliance" thus:—

The Italian Government has followed the example of the French and has concluded a separate treaty with the Angora Government in return for mining and other "concessions" in Asia Minor. It is not a pleasant incident, and greatly increases the difficulties of an already dangerous situation. Italy, France, and Great Britain are the three countries which, as the result of the war, are jointly responsible for the settlement of the Near East—for the vital question of the freedom of the Straits; for the withdrawal of the Turkish military power from Europe; for the security of the helpless Christian minorities, Greek and Armenian, in the renovated Turkey which might yet achieve the position of an ordered community and a decent Government in its natural home in Asia Minor. These are large issues, involving the peace of great and populous regions, the rights of many nationalities, and the future order of the world. They could be effectively solved only by the common and disinterested action of the three Great Powers immediately concerned. Two of these have now broken away. It is not merely that in so doing they have sought certain exclusive material advantages for themselves or their citizens; that by itself is a small matter, and they would be welcome to any such partial and not very glorious gains. But by so doing they have, to an extent as yet only very imperfectly known, tied their hands and disabled themselves from acting impartially in the common interest in a matter which concerns, in varying degrees, every country in Europe and to which they are in the position of trustees. It is a wretched and, we are bound to add, discreditable failure which can now only be atoned for, first, by a frank disclosure of the terms of the whole of their engagements to the Kemalist Government and, secondly, by joint action in concert not only with each other but with the rest of the European Powers to protect the common interest and to settle this great matter, so far as possible, on a basis alike morally defensible and giving promise of stability.

It proceeds to allot a certain amount of blame to the British Government for "the present deplorable situation," and concludes:—

It is vain to cry over spilt milk. What is now needed is cards on the table, a frank disclosure of the agreements come to by any or all of the three nominal Allies, and an honest resumption of a common policy which shall have the needs of Europe for its objective rather than the sordid gains of a traffic in concession or the dubious advantage of a diplomatic pull. What does that

mean? It means first and foremost that the rights of all nations to free passage through the Straits, in peace and in war, should be now and for ever secured and that their title shall rest, not on the agreement and ultimately on the force of any particular Power or combination of Powers, but on the concert of Europe; in other words that all the Powers shall have a hand in the settlement and shall be alike responsible for seeing that it is respected. That necessarily implies that the Straits and as much of the shores of the Straits as is needed for their security shall be neutralised, that a commission of all the nations chiefly concerned shall be established on the analogy of the admirable and perfectly successful Danube Commission which controls the mouths of the Danube, and that this Commission shall itself operate under the authority of the League of Nations. No armed force would be needed, any more than it is needed in the case of the Danube Commission, but every Power represented on the Commission and every member of the League of Nations would, in the last resort, be bound to see that the authority of the Commission was upheld. A settlement not very different from this was contained in the unratified Sèvres Treaty, and, if there is to be peace in the world, it must be revived. The meeting of all the Powers at Genoa gives an opportunity for taking immediate steps towards such a solution. Here is another opportunity for Mr. Lloyd George to retrieve past errors, and to prove himself the good European which at heart he surely is.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

The Position at Genoa.

After the events of the past week it would need considerable optimism to believe that there will be a satisfactory issue to the Genoa Conference. The intransigent attitude of the Bolsheviks would seem to put entirely out of court any possibility of a settlement. As they were perfectly well aware of the essential concessions on their part before an agreement could be arrived at one is left with the conclusion that their participation in the Conference may have had as an object the sowing of dissension among the Allies. Assuming, as would now seem to be necessary, that the Conference is a failure, what then? Presumably efforts will be made by various countries to make separate agreements, and there is likely to be great competition for Bolshevik favours.

An Atmosphere of Oil.

We have had a foretaste of the future this week in the atmosphere of oil which has literally enveloped Genoa and threatens to embitter proceedings which could never be described as exactly smooth. As in the case of the Conference itself reports of the progress of the negotiations have been very conflicting. It would, however, appear that, while nothing definite may have been arranged, the Shell group has at any rate progressed a considerable distance towards obtaining the desired concession. The Stock Exchange is usually a reliable gauge in these matters, and it will not have escaped notice that "Shells," to use the technical terminology, have displayed a distinct hardening tendency. The rival American group have apparently had no success at all with the Bolsheviks, but it would be premature to draw any conclusion from this with the memory of Mesopotamia, and it is not to be expected nor desired that there should be a monopoly in the development of Russia's oil resources. In this connection a significant development has been the dispatch to Genoa of a French oil expert.

The Russian Oil Position.

Whatever arrangement may be reached with regard to the oilfields it is very clear that the group concerned will be dealing in "futures." According to the most reliable information the position of Russia's oilfields to-day, despite the frenzied efforts of the Bolsheviks to restore them to their normal position, is only a shade better than that of the country's other commercial activities as a result of Soviet misrule. The oilfields are being operated, and there is a gradual increase in production, and that is all that can be said. Their restoration to normal conditions depends as everything else does on reconstruction in Russia. An interesting light is thrown on present conditions by an article which we publish on page 643 in which it is explained that production has become entirely a question of food. When the Government is in a position to feed the workmen after the harvest there is abundant labour, but as

scarcity begins in the spring the workmen begin to disappear, and production drops until the next harvest.

Egyptian Cotton.

The intervention by the Egyptian Government in the cotton market is reported to have commenced some days ago, and up to the present would appear to have had little effect, since instead of hardening, prices have, as a matter of fact, weakened to some extent. As I suggested last week the cotton market is a very dangerous medium for intervention, and it is to be hoped that the Government will exercise the greatest prudence in attempting to support it, and will not, if it finds that only by extensive commitments is it possible to keep prices up, continue to pursue a policy which lays itself open to criticism from several points of view. Not the least of these is the inadvisability of attempting to maintain an uneconomic level of prices. An attempt to do so can at best have only transient results, since sooner or later prices will find their proper level.

Mineral Development in Egypt.

One of the most important questions for Egypt is the adequate utilization of the country's oil resources, and that this is engaging the attention of the Government is shown by the recent visit of the Minister of Finance to the Red Sea mining areas. In the course of a statement made on his return to the Geographical Society Sidky Pasha paid a tribute to the enterprise of the foreign companies and urged Egyptians to emulate their activities. There have been rumours that it is the intention of the Government to acquire the property of one or more of the existing oil companies, but there has been no confirmation of the intention, and Sidky Pasha's speech, according to the summary that has reached this country, contains nothing suggestive of any such project. At the present stage of Egypt's development the active participation by the State in the exploitation of the country's mineral resources would be a distinctly hazardous venture. Enterprise of this kind is emphatically best left to the individual.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

ROUMANIA.

Bucharest, April 20.

Commercial Conventions.

The Spanish Minister at Bucharest has approached the Roumanian Government for the purpose of drawing up a special commercial convention. M. Vintila Bratianu, the Minister of Finance, replied that at present he could not conclude a special convention because the ruling Customs Tariff is already low enough. As to removing prohibitions, the Minister explained that Roumania could not afford to do it so long as her currency is so depreciated.

M. Bratianu further gave it to be understood that the above applies not only to Spain but to all other countries, and that should Roumania make a special convention with any one country, Spain will be afforded a similar advantage.

New Export Regulations.

The Export Committee attached to the Ministry of Commerce and Industry has taken the following decision with regard to the export of potatoes, onions and pigs: Export permits for potatoes and onions will be granted only to producers and professional exporters of these products with the proviso that 25 per cent. of the exportable quantity should be offered for sale for home consumption at the maximum price of Lei 0.40 per kilo. for potatoes and Lei 1.50 per kilo. for onions. As regards the export of pigs, exporters will have to reserve for home consumption a quota of 33 per cent. from the quantity intended for export.

As is known the Roumanian State had contracted loans in France and Switzerland, guaranteed by wheat deliveries, which have been carried out to a certain extent. It has been ascertained lately that the existing stocks of wheat will just suffice for home consumption up to the new crop, and as on the other hand there is a fairly large stock of superior quality wheat-flour in the hands of the millers, it has now been proposed to the French and Swiss Governments that flour instead of wheat should be accepted until the new harvest. Switzerland has agreed to this proposal, and it is hoped that France will also consent to this change.

Merchants' Debts in Foreign Currencies.

The necessity of finding a way out with regard to the thorny question of settling the debts of Roumanian merchants in foreign high currencies—but in such a manner as to satisfy both the debtor and creditor—is constantly cropping up. There is no doubt that the continuous postponement of a solution of this question is a stumbling block to fresh business.

Since the last meeting between the delegates of the various Roumanian Chambers of Commerce and the Minister of Finance there are signs that a decisive step in this direction is contemplated. In order to establish

statistics as to the extent of such debts, the Bucharest Chamber of Commerce has addressed a circular letter to local firms asking the amounts they owe in foreign inflated currencies as well as the payments already effected from 1920 to March 31, 1922.

IRAQ (Mesopotamia).

Baghdad, April 28.

New Customs Tariff.

The new Customs Tariff to take effect from April 3 last has just been issued, and shows heavy rises under nearly every head. On the following articles the duty has been raised from 15 to 20 per cent. *ad valorem*:—Arms and ammunition, cinematograph films, clocks and watches, confectionery, explosives, fireworks, glass bangles and beads and false pearls, gold and goldware, jewellery and jewels, motor vehicles and launches, musical instruments, pneumatic tyres and tubes, silver and silverware, sugar and saccharine, toys and games and requisites for games and sports. While most of the articles in the list are luxuries it is to be regretted that Government has considered it necessary to raise the duty on motors and tyres and tubes, for in a country where distances are so long as in Iraq and where railway communication is so meagre, cars may well be said to have passed out of the category of luxuries.

The second schedule contains the new tariff on liquors and spirits and the following rises are made. (1) Ale, Beer, Porter, Cider and other fermented liquors from 4½ annas to 8 annas per Imperial gallon. (2) Liqueurs, Cordials, etc., containing spirit (a) Entered in such a manner as to indicate the strength is not to be tested; from Rs. 20 to Rs. 25 per Imperial gallon. (b) If tested. From Rs. 18-12 to Rs. 20 per Imperial gallon and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof. (3) Perfumed spirit, from Rs. 18-12 to Rs. 30 per Imperial gallon. (4) Spirit which has been rendered effectually and permanently unfit for human consumption; from 11 per cent. *ad valorem* plus 3½ annas per kilo of 2.65 lbs. to 15 per cent. *ad valorem* plus 3½ annas per kilo. (5) All other sorts of spirit, from Rs. 18-12 to Rs. 20 per Imperial gallon, and according to London proof. (6) Salt (when refined or when unrefined and imported under Iraq Government Special Permit) from 15 per cent. *ad valorem* to one anna per kilo. None of these increases are open to serious objection but the last item in the new tariff may well prove shortsighted. The export duty on dates packed in boxes or cases has been raised from one per cent. *ad valorem* to 3 per cent. *ad valorem*. It is feared that this last change may only render more difficult the disposal of the date crop.

Dangerous Driving.

The chief topic of conversation in motoring circles during the week has been the Interim Report of the Department Committee on the Regulation and Taxation of Road Vehicles, and whilst there is general agreement with the proposed abolition of the speed limit it is evident that there is a wide spread opposition to the conclusions arrived at with regard to dangerous driving. On this point a good deal will probably be said in Parliament when the forthcoming Bill concerning the consolidation of Acts with regard to motor vehicles comes up for discussion. The position taken up by the Committee seems on the face of it to be fair: "We will abolish all speed limits," they say, "and the motorist shall be free to drive at any speed he pleases, provided that in so doing he does not endanger the public. If he abuses the concessions we recommend, he will have to be punished and the penalties for dangerous driving will be severe."

As it stands, no motorist would wish to raise any objection to the statement. No one wishes to condone dangerous driving; a motorist would be the first to condemn anyone found guilty of such an offence. The "road-hog" is a thing of the past; no motorist worthy of the name would ever drive carelessly or recklessly in places where he endangered the life or limb of any other road user. Should one do so, he would receive far less consideration from a court of motorists than from the most severe Stipendiary. So far motorists and the Committee are in agreement.

The point of disagreement is reached, however, when we consider what constitutes dangerous driving and how cases of driving to the public danger are to be dealt with. Dangerous driving is much on a par with "intent to do bodily injury," and in the latter case the first thing is to show that some person or persons were threatened with harm. A man may, for example, carry an axe down a street unquestioned; if whilst doing so he attempts to injure anyone wilfully he can be punished. But as the proposals of the Committee stand there is no need to show that the motorist's "dangerous driving" endangered anyone. It will be sufficient for any policeman, without any corroborative evidence, to say that on such and such a date he saw the motorist driving in what he considered a dangerous manner, and to secure a conviction on that mere statement. There will be no need to shew that anyone was placed in danger, no need to produce evidence from any person endangered—indeed, the road may be perfectly free from pedestrian or other traffic at the time! The average man would, in such case, ask how anyone could, in that event, be driving dangerously if there were no one about to be endangered. The police view is that it is unnecessary to show that any other road user was placed in any risk. Their reading of the law is that it is sufficient to say that a driver was driving in a manner that would have been dangerous to anyone had there been anyone about. This may, and doubtless does, seem absurd, but nevertheless it is the view that will be carried into law if the forthcoming Bill is not closely watched in the Commons and a provision inserted that a conviction for dangerous driving cannot be obtained unless there is clear and supported evidence that some person or persons were actually placed in danger by the manner in which the car was driven.

A further point which will have to be made is that a motorist who is considered by the police to be driving dangerously must be stopped and told that he will be proceeded against in order that he may have an opportunity of collecting any evidence in his favour and of making a clear note of his speed, the condition of the road, the position of other vehicles and any other facts that may tell in his favour. As the recommendations stand, a motorist, driving dangerously in the view of the police, will be allowed to proceed without any indication that he has been held to be committing an offence and allowed to drive for weeks in ignorance of any impending proceedings until he is eventually served with a summons to appear to answer a charge. Such a manner of proceeding is not only distinctly unfair, since the motorist after the lapse of a few weeks will probably have no idea of where he was at the time of the alleged offence, but it comes very near to aiding and abetting on the part of the police who saw the offence committed. The view might be taken that if a policeman saw a man driving in a manner dangerous to the public and did not warn him and do his best to prevent him continuing his criminal behaviour, but on the contrary wilfully permitted him to go careering about endangering the safety of the King's subjects, that policeman was either "aiding and abetting him" or was actually an accessory after the fact. Whilst it would be interesting, no doubt, to see how a court of law regarded such a view, it is evident that no opportunity for raising such a defence or counter-charge should be allowed to arise through any oversight, ambiguity, or unfairness in the new motoring law.

Copper-nickel-Steel.

The experiments made in connection with the tertiary alloy of copper-nickel-steel are being continued, and it would not occasion much surprise amongst metallurgists if some exceptionally fine results, over and above what has already been accomplished, were achieved. Until a comparatively short time ago the idea was fairly general that copper was a deleterious element in the steel, and therefore careful selection had been made so as to work with ores in which this element existed only in small quantity as compared with nickel. Experiments then proved that it was unnecessary to make nickel steel only by alloying refined nickel with steel in certain definite proportions. It was then discovered that nickel-copper ores, or the slags wasted in the ordinary process, might be smelted directly into steel. It has now been found that copper, up to a certain proportion, may be considered as taking the place of an equal amount of nickel, and it is said that it produces a superior product which can be manufactured at much less cost than nickel-steel made in the ordinary way.

It appears that the best results are obtained where the ratio of copper to nickel is as one to three or four parts. Apparently the total copper content should not be in excess of about one per cent. if the copper is to be considered as replacing an equal percentage of nickel and the steel produced is to be put to the ordinary uses for which nickel steel is employed. But at the moment of writing it is impossible to speak definitely as to what has been done, and further information will be awaited with interest.

Oil Notes & News.

THE OIL INDUSTRY IN SOVIET RUSSIA.

(From a Correspondent.)

One of the features of the nationalisation of industry in Soviet Russia can be accurately defined. In the course of one year there is a certain fluctuation common to nearly all branches of industry. Every autumn production grows. This increase continues to the end of the winter, or the beginning of spring. Production then falls rather abruptly, and almost comes to a standstill in summer. The increase of production is of course only relative in comparison with the pre-revolutionary activities, and even in the most successful months very little is produced. These fluctuations in the working of nationalised industry are due to the system of food supplies introduced by the Soviet. In the main industries the food ration is the principal part of the earnings of the workmen. Under the present conditions in Soviet Russia the food ration is essential for the existence of all industrial concerns. Industry obviously cannot exist without Government food supplies in a country where private trade is only permitted on a very small scale, and where private individuals are scarcely permitted to avail themselves of the railway system. Whether all kinds of restrictions of trade constitute a sound economic policy is another matter. The Soviet Government obtained the supplies required for distribution among the workers and the officials by means of requisitions from the peasants. As is well known these requisitions of corn have resulted after four years in the curtailment by the peasants of the area under cultivation, and in spite of all their efforts the Bolsheviks are unable to secure sufficient quantities of corn and other foodstuffs for the workmen.

In the autumn, after the harvest, requisitions are carried out with comparative success. But after the first skimming, so to speak, it becomes more and more difficult to secure the grain. When the new year comes requisitions produce very little, and amount almost to nothing in the spring and in the beginning of the summer, notwithstanding the drastic measures of the Soviet authorities. That is the explanation of the fluctuations of the scale of production. When the corn bins of the Soviet are filled workmen are attracted to the nationalised factories, and the productive capacity of the latter is on the increase. In the spring there is a shortage of food, the workmen disperse, and production slackens.

The oil industry suffers from the same disability, and undergoes the same fluctuations year after year. The

Soviet Government is not in a position to provide foodstuffs for the year in Baku and Grozny. The stores of food become exhausted sooner or later according to the success of the requisitions, and the production of oil diminishes at the close of every season. Last year in both the above-named regions supplies were available for a comparatively long period, and as late as May production amounted to 375,400 tons, but in the course of the next two months it fell to 319,000 tons. In the autumn of 1921 there was an increase, and towards January, 1922, the monthly production in both regions rose to 364,000 tons. At first sight the region of Baku was particularly productive as the amount of oil rose from 191,000 tons in July, 1921, to 249,000 tons in January, 1922, (*Economicheskaya Zhizn*, April 15.). This last figure is the highest reached under the Bolsheviks and amounts to about 40 per cent. of the average monthly production in 1915. Even these quantities, comparatively large according to Bolshevik standards, do not suffice to meet the requirements of the average month (about 400,000 tons), and the old stores, the remnants of the anti-Bolshevik period, had gradually to be depleted. This year there was an acute shortage of food in Baku as early as in January, and the production of oil fell to 232,000 tons in February, (*Economicheskaya Zhizn*, March 25.). The Soviet press does not conceal the fact that in the future production will continue to fall. A leading article of the *Economicheskaya Zhizn* of March 31 states that "it is a mathematical certainty that unless boring is intensified we shall be left without oil in 1923." The Soviet specialists consider that in order to obtain sufficient quantities of oil about 2,500 sazhen will have to be bored monthly—a contingency which the Bolsheviks cannot face. The shortage is not only in food. Notwithstanding the foreign trade of the Soviets the quantity of technical appliances is on the decrease. Also, the Soviet Government cannot secure paper money in sufficient quantities for the oil industry of Baku. The characteristic feature of the entire industrial system of the Soviets was here repeated, and for several months the workmen were not paid their wages in paper money. The condition of labour is a clear indication of the fact that the system is totally abnormal. About 30 per cent. of the workmen in Baku have to submit to compulsory labour. The *Economicheskaya Zhizn* of April 14 stated that in January out of 14,627 workmen in Baku, 4,595 worked under compulsion. There is no likelihood of any improvement in the production as long as compulsory labour is applied on such a large scale. The Soviet Government this year has dared to obtain by force from the peasants much less corn than last year and there can be no doubt that the shortage of food will be more acute in the future. The fall of the production of oil in Baku which began in January, will hardly be arrested until the autumn. Owing to the existence of old stores the Bolsheviks have not as yet been in dire need of oil, or, to be more correct, the shortage of oil in Central Russia was due primarily to the inefficiency of transport and not to the lack of oil. Oil is carried to the centre of Russia from Baku chiefly in the steamers going up the Volga. According to the schemes drawn up by the Central Soviet institutions, about 2,800,000 tons of oil were to be shipped to the North from Baku during the summer, and the Soviet Government will find itself short of oil for the first time in the course of the coming summer season, as by the first of February the stores in Baku amounted only to 1,600,000 tons—less than one-half of the stores available twelve months ago. Only part of the fresh supplies is stored, the remainder is being continually sent northwards by rail. There can be no doubt that this year the stores will be depleted to such an extent that the export scheme will not be carried out.

The condition of Grozny is worse than that of Baku. According to the *Economicheskaya Zhizn* of April 4, the monthly production for January and February was 115,000 and 113,000 tons respectively, i.e., less than in

July, 1921. The paper says: "The position is extremely difficult owing to the lack of material resources and of money" (Money—i.e., paper roubles unpaid to the workers.). In Grozny, as elsewhere, the workmen have not yet received their wages for several months. From October, 1921, till February, 1922, the oil industry of Grozny obtained from the respective Soviet institutions only 23 per cent. of the required supplies. Compulsory labour is also applied on a large scale. At the end of February out of 13,876 workmen—4,500 worked under compulsion (*Econmicheskaia Zhizn*, April 4).

All the information supplied by the Soviet press tends to show that both these oilfields, the richest in Russia, are dragging on a wretched existence. In the present conditions in Russia, where private initiative is strictly limited, and industry is functioning under the direction of the unwieldy Soviet machine, there can be no hope for any improvement.

INDO-BURMA PROGRESS.

A progress report is being circulated to shareholders in the Indo-Burma Oilfields (1920) in which it is stated that the new refinery commenced operations on March 15 and is working satisfactorily, except for a portion of one set of tin-making plant, which, owing to delays on the part of manufacturers, has not yet reached Rangoon. Pumping commenced on the Yenamma field on January 12, and at Padaukpin on March 7, the output to the end of March being 2,707.4 tons. The progress report is indicated as follows:—January (20 days), 490 tons; February, 992.8 tons; and March, 1,224.6 tons. Drilling operations have been expedited, and during the three months ended February 28 the total footage drilled was 12,434 ft., of which 10,626 ft. represented work on the Yenamma field. The number of wells thus brought in was nine, with an initial yield of 283 barrels of crude oil daily. The average yield is thus very considerably greater than the original prospectus estimate. During the next few months the output is expected to exceed the present capacity of the refinery, and negotiations have been practically completed for the sale at satisfactory prices of any such excess output.

In order to increase the drilling programme without increasing the capital a scheme has been approved whereby the company will undertake on behalf of third parties to drill wells at a fixed price on the company's property, the profits from the first crude produced being applied to the repayment of the cost of drilling and equipping the well, and thereafter to be divided as to one-third to the third parties and two-thirds to the Indo-Burma Oilfields (1920).

ROUMANIAN CONSOLIDATED DEVELOPMENT WORK.

The Roumanian Consolidated Oilfields announce that production from April 1 to 15 was 1,018 tons. Metres drilled 296 (971 feet). Development work—Moreni, well No. 42, depth 757 metres; good progress has been made with the English reamer. No. 44, drilled 10 metres to 820 metres, cased to 815 metres. No. 51, transporting heavy lumber to site. No. 61, drilled 24 metres to 592 metres. No. 71, erecting derrick. No. 83, drilled 31 metres to 737 metres; insertion of 12½ ins. casing to be started after Easter holidays. No. 101, erecting derrick. No. 102, drilled 49 metres to 262 metres. No. 104, the 8½ ins. English casing has now been inserted to 853 metres, and drilling ahead with Pennsylvanian system will be started after holidays. (Foundation source expected at 927 metres.) No. 106, rigged up and ready to commence drilling. Gura Ocnitei—Well No. 4, depth 706 metres; fishing for lost bit. Aricesti—Well No. 5, depth 119 metres; well No. 6, started to drill; well No. 7, rigging up. Chiciura—Well No. 10, depth 620 metres, preparing to resume operations. Baicoi—Well No. 3, depth 697 metres; the sand has risen to 520 metres.

The following import duties on cinematograph films imported into Egypt will be in force for one year as from April 18. Developed, new or used, £E.7,500 per kilo, and Virgin £E.3,000 per kilo.

H.M. Commercial Secretary at Bucharest has forwarded a copy and translation of a Ministerial Decision, dated March 23, which prohibits the exportation from Roumania of natural tartar; artificial tartar or crystals of tartar known as "vinaccia"; dried wine lees; calcium tartrates and any raw material of tartareous origin.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Egypt.

Drugs, etc.—The Department of Public Health invite tenders for the supply of drugs required for the period of six months from October 1 next. The tenderer must be a person residing in Egypt or must have a representative in Egypt. June 15 (D.O.T.)

Blacking.—The Egyptian Ministry of War invite tenders for the supply of 30,000 lb. of blacking. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 16.

Sailors' Navy Blue Serge.—The Egyptian Ministry of War invite tenders for the supply of sailors' navy blue serge. Particulars can be obtained from and samples seen at the office of the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 24.

Brooms and Brushes.—The Egyptian War Department invite tenders for the supply of brooms and brushes. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 17.

Weighing Machines.—The Physical Department of the Ministry of Public Works, Cairo, invite tenders for the supply of platform weighing machines and also for counter scales and appliances. Tenders must be sent to the Controller, Physical Department, Ministry of Public Works, Cairo. Drawings must be furnished. Representation by an agent resident in Egypt is essential. June 1. (D.O.T.)

India.

Boiler Tubes, etc.—The High Commissioner for India invites tenders for the supply of:—1. Tubes; boiler, steel, solid drawn, of various sizes, for locomotives—No. 14,000. 2. Pins, keep, split, bright, and screws, iron, of various descriptions and sizes. 3. Mild steel plates, plain, of various sizes—125 tons. 4. Enamel ware utensils (slop pails, pots, basins, ewers, spittoons, etc.). 5. Insulator cups, porcelain or glass—No. 430,000. 6. Paints, dry, and ground in oil, of various descriptions, and driers. Forms of tender may be obtained from the Director-General, India Store Department. Tenders close on May 16 for No. 1, and on May 26 for Nos. 2 to 6.

Cast Iron Waterpipes.—The Jharlia Water Board, Topchanchi, near Gomoh, on the East Indian Railway, invite tenders for the supply of 3,300 tons of 21-inch cast iron water pipes and special castings. June 7.

Girder Bridges.—The East Indian Railway invite tenders for the supply of girder bridges. Tenders should be addressed to the Secretary of the Company, 29 and 30, Nicholas Lane, London, E.C.4. May 17.

Palestine.

Coal.—The Crown Agents for the Colonies, acting for the Administration of Palestine, invite tenders for the supply of 15,000 tons large Welsh steam coal, c.i.f. Haifa. Forms of tender and conditions of contract may be obtained at the office of the Crown Agents for the Colonies, 4, Millbank, London, S.W.1.

RECENT ADJUDICATIONS.

Reuter's Cairo correspondent in a recent message states that a £70,000 contract for the supply and installation of pumping machinery at Atf in Lower Egypt has been secured by a British concern. There was keen competition on the part of Swiss, German, French, Dutch, and other firms, but the contract was awarded to the Associated British Manufacturers, who are agents for the English Electric, Paterson Engineering, and Glenfield and Kennedy companies.

COMPANY NOTES AND REPORTS.

Bombay Gas.

The profit of the Bombay Gas Company for 1921, after allowing for interest and exchange, was £23,853, making with £25,713 brought forward £49,566. After placing £805 to reserve and £537 to renewal fund, the directors recommend a dividend of 4 per cent., less tax, making 8 per cent., carrying forward £25,824.

Calcutta Electric Supply.

The report of the Calcutta Electric Supply Corporation for 1921 states that the profits for the year, including interest, were £221,532, making with £42,386 brought in £263,918. Deducting interest, dividends, etc., paid and accrued, totalling £101,202 (income-tax and excess profits duty having been met out of reserves made last year), leaving £162,716. The Directors recommend writing off the cost of share issue £9,446, reserve for taxation £6,931, to reserve £9,000, to depreciation and renewals £43,326, to insurance £5,000, final dividend on Ordinary shares at 6 per cent. (actual), making 10 per cent. for the year, plus a bonus of 1 per cent., leaving balance carried forward of £43,230.

Stock and Share Markets.

QUIET AND INACTIVE TENDENCY.

Foreign Stocks Weak.

(From Our Own Correspondent.)

London, Tuesday morning.

The past week has been anything but exciting. At first the Budget was responsible for a certain amount of activity, but as I have pointed out, its effects had been largely discounted in advance, and the hardening tendency soon came to an end. Subsequently Genoa has dominated the situation, and has been responsible for the development of considerable dullness, notably in the foreign group. It is curious to think that until the last week or two Genoa should have had no effect at all, while now it is the principal restraining influence on business.

Course of Markets.

Until the situation clears considerably the course of the markets is likely to be extremely irregular, and in the circumstances it is to be expected that the tendency to hold aloof from commitments will again be in evidence. It is by far the soundest policy at this juncture. If only matters had gone smoothly at Genoa business in all markets would by now have broadened out into something akin to a "boom." As it is stagnation is to be anticipated until some idea can be obtained of what is going to happen. That the markets will only temporarily be under a cloud would appear certain. Some *modus vivendi* is certain to be arrived at on the Continent even if only by the medium of separate agreements between the various countries, while a further reduction in the Bank Rate will probably before long give helpful support to the markets.

New Issues.

Since I last wrote several large new issues have made their appearance, and a number of others are due in the near future. Before this paper appears there will be an issue of £1,250,000 six per cent. bonds for the Port of Calcutta which should prove very popular with investors. Other issues of special interest will be those contemplated by various oil companies. Needless to say recent developments make it all but certain that there is no prospect of any Near Eastern issues in the near future.

Gilt-Edged React.

The Gilt-edged group is always among the first to be affected by untoward happenings abroad, and there has been a rather pronounced tendency this week to reaction as a result of Genoa. Yesterday, however, the tone was rather harder. Consols at 58.5-8 show a loss of 3-8, the Conversion Loan, exceptionally, is a point up at 77½, while War Loan Fives have shed ¼ at 99.1-8 x.d. Indian stocks have been fairly firm, the Seven per cent. Loan gaining ½ at 115½, while the 3½ per cent. Loan is ½ up at 69, and the 3 per cent. Loan has gained ¾ at 58.

As might be expected the foreign group has been exceptionally dull on the international situation. French stocks have drooped, War Loan Fives being 1¼ down at 44, while German three per cents. at 2.7-16 show a loss of 5-16. Italian Rentes have been weak, and are a point down at 25. There has been nothing doing in Russians, the prices of which are unchanged. Brazilian bonds are somewhat lower, with the 5 per cent. 1914 Funding 2 down at 70 x.d., while the 5 per cent. 1913 Loan is a point down at 63. Chinese securities fell away at the beginning of the week, but have firmed up on later developments.

Industrials Inactive.

On the whole a fairly firm tone has obtained in the Industrial group, but business has been on a very restricted scale, and in the majority of cases price changes have been unimportant. Tobaccos have been in strong request, and prices have sharply advanced. Bats are 2s. 9d. up at 79s. 3d., while Imperial Tobaccos at 59s. 6d. show a gain of 1s. 9d. Dunlops are unchanged at 8s. 3d.

Textiles have been steady with Coats 3-32 up at 3.3-16, while Courtaulds at 49s. 6d. show a gain of 1s. 3d. Iron and Steel securities have been fairly firm. Vickers are 9d. up at 12s. 3d., Guest Keens have gained 6d. at 34s., while Armstrongs are 6d lower at 16s. x.d.

Shipping securities have been somewhat irregular. P. and O. Deferred are 3 down at 325, Cunards have shed 6d. at 21s. 3d. x.d., while Furness Withys are 2s. down at 31s.

Oils Quiet.

Oils have succumbed to the prevailing influences, and a very quiet tone has generally prevailed, while in some directions pronounced weakness has developed. Burmahs are unchanged at 5.7-8, while Anglo-Persian, which have been a strong spot throughout the week, are ¼ up at 4.15-16. Mexican Eagles have displayed some irregularity, and are 1-32 down on the week at 3½. The feature of the Trinidad group has been the weakness of Centrals, which at 2.3-8 are 5-16 down. Leaseholds are 1-32 up at 14.

Among Egyptians, Anglo-Egyptian B are 1.13-16, a gain of 1-8, while Oilfields of Egypt have fallen away a little after their rise of the previous week, and at 7s. 9d. are 6d. down. In the Roumanian group Phoenix have been rather dull, and at 26s. 9d. are 9d. lower. Steaua Romanas are unchanged at 13s. 3d., Roumanian Consolidated are 3d. down at 14s., while Dacia Romanos are the same at 3. In the prevailing circumstances it is scarcely likely that there will be any great developments in the Oil Market in the next few days, though, of course, if events at Genoa took a particularly bad turn prices would undoubtedly fall away as none of the markets is more sensitive than this to foreign influences.

Banks Firm.

Banking securities have been fairly firm. Chartered of India are 17.3-8, a fall of 1-8, while National of India are unchanged at 40½. P. and O. Banks have continued their advance and at 14 show a gain of 11-16.

In Egyptian securities Aboukirs are 3d. lower at 22s. 9d. x.d. Beheras are 8.5-8, a drop of ¼, while Gharbieh Lands are unchanged at 14. Sidi Salems are 7-8, while Union Foncières are unchanged at 2.1-8.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from overseas buyers.

COMPANY MEETING NOTICES.

ALEXANDRIA WATER COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN that the forty-fourth Ordinary General Meeting of the Shareholders will be held at the Company's offices, Alexandria, on Thursday, the 1st June, 1922, at four o'clock in the afternoon, for the transaction of the ordinary business of the Company, pursuant to Act of Parliament.

Holders of share warrants to bearer desiring to attend or to be represented at the Meeting must deposit their share warrants in London before the 20th May, 1922, or in Alexandria before the 27th May, 1922, until after the Meeting at Messrs. Barclays Bank, Limited, 1, Pall Mall East, London, S.W.1, or at the Anglo-Egyptian Bank, Limited, Alexandria, or at some other approved bank in London or Alexandria.

Dated, Alexandria, Egypt, the 21st April, 1922.

By Order of the Board,

K. B. WOODD SMITH, Manager.

THE GHARBIEH LAND COMPANY, CAIRO.

THE ORDINARY GENERAL MEETING of the above Company will be held in Cairo on the 30th May, 1922. Shareholders wishing to be represented at that Meeting should lodge their Share Warrants with the Anglo-Egyptian Bank, Limited, 27, Clements Lane, E.C., not later than the 14th May.

Near East Markets.

LONDON PRODUCE REPORT.

Oilseeds Rising.

(From Our Own Correspondent).

London, Monday Evening.

Sugar.—Home refined has been in good request at moderate rates. Tate's cubes and mineral water sugar have been firm features at 53s. 6d. and 48s. 9d. respectively; while London granulated at 48s. 3d., and Lyle's granulated at 48s. 6d. have been firm. Export descriptions have been steady. West Indian crystallized remains unchanged at 42s. 6d., while white Mauritius has gained 3d. at 46s. 6d. Cane sugar quotations are:—May, 15s.; June, 15s.; August, 15s.; and September, 15s. White sugar quotations are:—May, 20s. 3d.; June, 20s. 3d.; August, 20s. 3d.; September, 20s. 3d.; and October-December, 19s. 4½d.

Coffee.—All quotations are 2s. lower. Costa Rica is now 118s., East Indian, 120s.; and Nairobi, 108s. The futures market has been firmer. Quotations are:—May, 65s.; July, 63s.; September, 63s. 6d.; December, 61s. 6d.; and March, 62s.

Dessicated Coconut.—Prices have shown signs of firming up. Home consumption has been better.

Rice.—Burma "Two-Star" rice has been in marked request during the week, and is fetching good prices. Quotations for American Java rice continue to firm up while the demand has been good.

Green Fruit.—Arrivals of oranges during the week are of excellent condition, while quotations are satisfactory. Messina lemons have again been in favour at firmer prices. Naples lemons are dearer. Some irregularity has obtained in the prices of Australian and Tasmanian apples, while arrivals have been on an extensive scale. Egyptian onions are improving, but shipments are lighter.

Oilseeds.—Prices are harder. Indian linseed is 1s. higher at 22s. 6d., while La Plata has shed 3d. at 21s. Rapeseed is higher with Toria 6d. up at 18s. 6d. Cottonseed has been variable with Indian unchanged at 21s., while Sakellarides has advanced 3d. at 12s. 7½d., and Egyptian black is 1½d. down at 12s. 7½d.

Oils.—A harder tone has been in evidence. Linseed oil has advanced 1s. 6d. at 44s. 6d. Rape oil is unaltered with crude at 45s., and refined at 48s. Cotton oil has been a steady feature. Refined at 49s. is steady as also Egyptian crude at 42s. 6d. Deodorized is unchanged at 54s., but technical has gained 1s. 9d. at 44s.

Oilcakes.—Linseed cake has been firm at 300s. ton. Cotton-meal cake at 280s. ton is the same, and coconut cake and cotton-seed cake are unchanged at 160s., and 180s. respectively.

THE IRAQ (MESOPOTAMIA) HARVEST.

(From Our Own Correspondent).

Baghdad, April 27.

Harvesting is now in full swing from Baghdad southwards. Irrigated crops are excellent everywhere, but late sown unirrigated crops found a dry April more than they could cope with and in the Busreh district even the early sown unirrigated crops were none too good. Prices are low, and there should be a considerable quantity available for export.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co. report as follows for the fortnight ended April 22:—

Sultanas.—The total estimated sales are 170,255 bags as against 103,000 bags for last year. The total estimated sales are 165,455 bags, compared with 103,375 bags for 1921, while the estimated stock unsold amounts to 4,800 bags, against 125 bags for the previous year.

Markets.—There has been a visible improvement in the demand for sultanas since the beginning of the month. Purchases are on a small scale, but daily operations have been recorded, gradually tending to increase since the Easter Holidays. Exchanges have been very erratic over the interval, rendering it difficult to arrive at any accurate computation of values in foreign equivalents. The general trend has been upwards however, and, roughly, prices show an advance of about 8s. over the level of a month back. Demand has been mostly for good qualities which are becoming scarce. The finest sorts are altogether unobtainable.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton & Co., Liverpool, report as follows for the period ended May 2:—

Currants.—Notwithstanding the interference of the Easter holiday a fair amount of business has been effected during the month, advancing prices and cheerfulness being the predominating feature, but although prices in the lower and medium grades are shillings in advance of those ruling in March we are yet considerably below the parity of the Greek market. Shipments continue extremely light, the Cressado, just arrived, only bringing 200 tons for the market. The Tyria docked a week before the holidays, and fears were entertained that buyers would delay their purchases, but upon samples being available considerable interest was exhibited, and supplies were quickly disposed of; Amalias 60s., 61s.; bold Zante 61s.; small Zante 62s., 63s., were the grades in most request. Small fruit is now scarce, being almost cleared, up to 67s. being paid for ordinary small Vostizza. Some transactions have also taken place in Gulf and Vostizza 61s. to 65s., fine Vostizza slow, 70s. to 75s. No other steamer is afloat, the next being s.s. Gerano, now loading. Quotations are:—Pyrgos 57s.; Amalias 61s.; Patras 62s. to 64s.; Zante 60s. to 63s.; Gulf 62s. to 65s.; Panariti 66s. to 68s.; Vostizza 65s. to 75s.

Valencia Raisins.—Extremely slow, only a few selected ¼-boxes changing hands at 70s.

Sultanas.—We are pleased to be able to report that more interest has been shown, but not to the extent that importers were hoping for. Sales in medium qualities, 125s. to 128s.; sulphured varieties, 132s. to 135s., and natural fruit, 135s. up to 142s. 6d. for finest. Californian oil and soda bleached 105s. to 112s. Afghans slow and difficult of sale. Quotations are:—Red Afghans, 90s., 92s.; Yellow, 110s., 115s.

Figs have been pushed for sale and prices are:—Prima, 58s., Genuine, 60s.

£ The traffic receipts of the Egyptian Delta Light Railways for the week ended April 10 amounted to £E.8,513; total for year £E.8,513. For the corresponding period of last year receipts amounted to £E.8,807 and £E.8,807 respectively.

The financial success of the Ceylon Industries Exhibition surpassed expectations. The takings were a little over Rs.100,000, or over double the amount anticipated, and it is estimated that about 125,000 people attended.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa, April 15.

It has been a quiet week owing to the Easter holidays. It has been estimated that the crops of cereals will be deficient for local needs.

Constantinople, May 1

Sugar.—Prices during the period under review have been generally weak despite the more than satisfactory demand. This weakness is due to arrivals in excess of the requirements and to the necessity for importers to dispose of their holdings as a result of the expenses incurred for merchandise after it is warehoused. In centres of origin prices are firm, and in consequence the fall here has not been important. Once the large arrivals are absorbed the market will show an improved tendency, and already even to-day a small recovery is to be recorded. Cube sugar being in smaller supply has advanced sharply. The arrivals are 80 wagons Dutch, and 120 wagons American. Quotations (in transit) :—Dutch crystallised £23½—24, American crystallised £21—21½, Dutch cubes £31½—32; Belgian £31—32; (in Customs)—Dutch crystallised £T27½, American crystallised £T25½, Dutch cubes £T33½, Belgian cubes £T33.

Coffee.—The demand here has been good, but prices are below those in centres of origin which this week have had a new rise of 2s. per cwt. Arrivals are about 4,000 sacks. Quotations :—Rio, first quality, in transit, Ps52, in Customs, Ps71—72; second quality, in transit, Ps49, in Customs Ps69.

Rice.—The first arrivals of the crop have taken place. Both Rangoon and Saigon are very good. Quotations :—Rangoon No. 3, in transit, £16½; in Customs, Ps16½; Saigon No. 1, in transit, £78, in Customs, Ps20.

Oleo.—The market is weak. The arrivals continue to be important, and prices in centres of origin show a tendency to fall. Arrivals consist of about 750 barrels by s.s. Dochet and 600 barrels by s.s. Sangamon. Quotations :—First quality Ps50—51, second quality Ps46—48.

Oils.—There have been very large arrivals of soya bean oil with the result that prices have markedly decreased. Producing countries report a very firm tendency with prices rising.

It is announced that the Roumanian Government has paid the German firms the sum of 350 million marks for the 176 locomotives ordered in that country, and delivery is to be started immediately.

According to the *Times'* Cairo correspondent, the low state of the Nile is causing much anxiety. The supply from the White Nile, which provides the bulk of the summer water, has turned out to be far worse than had been anticipated, and that great tributary is much lower than in any hitherto recorded year, while the Blue Nile is also very low. This shortage of water will seriously affect the cotton crop.

CHEAPER OIL FOR MOTOR SHIPS.

With the rapidly increasing number of motor ships now being placed in commission, owners are naturally desirous of using in them the cheapest grade of oil. Hitherto, the ordinary practice has been to employ what is known as Diesel oil; this is a higher grade than that burned under boilers (boiler fuel oil), which costs from 20 per cent. to 30 per cent. less than Diesel fuel.

In the May issue of the *Motor Ship*, the problem of running the machinery of oil-engined vessels on cheaper boiler fuel oil is dealt with at length, and details of the results attained with a motor ship over a period of six months, using this grade of fuel, are given. No serious difficulties have been encountered, and the achievement is one which cannot fail to have an influence upon motor ship development. It is interesting to note that the large single-screw motor ship recently acquired by Furness Withy and Co., will shortly be operated experimentally on boiler fuel oil.

DEVELOPMENT OF BEYROUT HARBOUR.

The current issue of the monthly circular of the Imperial Ottoman Bank contains an article on the port of Beyrout in which the following reference is made to extension plans:—

From the very beginning of the conception of the port, the plans have been made in such a way as to allow for the possible extensions of the harbour and of the quays as far as the Quarantine, and the Concession Firman contained a clause to this effect. Thus by a simple prolongation of the original breakwater a new smooth water shelter can be created in the large bay on the eastern side of the harbour, as far as the rocky point where the Quarantine is situated.

The following is the project for the extension of the port:— On the side of the sea: lengthening of the outer breakwater by about 950 metres; on the land side: quays, with a uniform depth of at least 8 metres at the base, to a total length of 2,000 metres. Area of sheltered harbour—50 hectares. Construction of a graving-dock for the use of the biggest vessels.

The above extension programme is to be undertaken progressively, in accordance with the needs of the growing traffic. For the present, the company is on the point of constructing general warehouses in connection with the customs, in order to facilitate transit operations, of which Beyrout is the centre.

SUEZ CANAL TRAFFIC.

The annual return of shipping and tonnage of the Suez Canal for 1921 was issued last week as a White Paper. During the year 3,975 vessels passed through the Canal of the gross tonnage of 24,955,823, and the transit receipts amounted to 149,251,267 francs. 2,418 of the vessels were British of a gross tonnage of 15,689,588, while Holland was second with 459 vessels of a gross tonnage of 2,803,119. Italy's figures were 245 vessels of a gross tonnage of 1,297,665, Japan's 227 vessels of a gross tonnage of 1,411,460, and France's 211 vessels of a gross tonnage of 1,399,129. Vessels flying the German flag numbered 35 of a gross tonnage of 240,357.

The number of passengers through the Canal was 295,199 of whom 105,427 were military. Thirty-one passages have been effected by ships drawing more than 8.23 metres of water and being longer than 150 metres and wider than 18 metres. Three hundred and seventy-nine vessels have passed through the Canal for the first time, of which sixty-four were State-owned.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. *Moorla* for Bombay (Liverpool, May 16).

Anchor Brocklebank Line.—S.s. *Magdapur* for Calcutta (Birkenhead, May 13); s.s. *Holywell* for Port Said, Colombo, Madras and Calcutta (leaves London, May 16); s.s. *Masirah* for Port Said, Colombo, Madras and Calcutta (leaves London, May 27); s.s. *Mangalore* for Calcutta (Birkenhead, May 27).

Bibby Line.—S.s. *Yorkshire* for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 24).

Clan Line.—S.s. *Clan Chattan* for Colombo, Madras and Calcutta (Birkenhead, May 18).

Cunard Line.—S.s. *Cypria* for Gibraltar, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Swansea, May 27); s.s. *Brescia* for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice, Trieste, Fiume and Gravosa (Swansea, June 13).

Ellerman Line.—S.s. *Maronian* for Gibraltar, Melilla, Malta and Alexandria (Liverpool, May 15); s.s. *Flaminian* for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, May 18).

Ellerman's "City" Line.—S.s. *City of Florence* for Bombay and Karachi (Birkenhead, May 19); s.s. *City of Chester* for Calcutta (Birkenhead, May 22); s.s. *City of Cairo* for Calcutta (Birkenhead, June 1).

Ellerman's "Hall" Line.—S.s. *Trafford Hall* for Bombay, Karachi and the Punjab (Liverpool, May 12); s.s. *City of Simla* for Bombay, Karachi and the Punjab (Liverpool, May 29).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. *Glenluce* for Port Said, Port Swettenham, Singapore, etc. (London, May 18); s.s. *Glenshane* for Port Said, Port Swettenham, Singapore, etc. (London, June 1).

Harrison Line.—S.s. *Defender* for Calcutta (Liverpool, May 13); s.s. *Actor* for Calcutta (Liverpool, May 27).

Henderson Line.—S.s. *Henzada* for Port Said and Rangoon (Birkenhead, May 17); s.s. *Bhamo* for Port Said and Rangoon (Birkenhead, May 31).

Holt Line.—S.s. *Eumaeus* for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. *Glaucus* for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. *Pyrrhus* for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 18).

Johnston Line.—S.s. *Wingate* for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, May 13); s.s. *Cundall* for Galatz and Braila (Liverpool, May 20); s.s. *Incemore* for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 3).

Moss Line.—S.s. *Siptah* for Gibraltar, Malta, Syra, Smyrna, and Constantinople (Liverpool, May 13); s.s. *Etrib* for Casablanca, Gibraltar, Malta, Cyprus and Syrian Coast (Liverpool, May 20); s.s. *Amarna* for Gibraltar, Algiers, Malta and Alexandria (Liverpool, May 26).

Papayanni Line.—S.s. *Gerano* for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 20).

P. and O. Line.—S.s. *Egypt* for Bombay (London, May 19); s.s. *Macedonia* for Bombay (London, May 26); s.s. *Mantua* for Bombay (London, June 2); s.s. *Sardinia* for Colombo, Madras and Calcutta (London, June 2).

Prince Line.—S.s. *Soldier Prince* for Tunis, Malta, Alexandria and Syria (Manchester, May 15); s.s. *Cyprian Prince* for Malta, Alexandria and Syria (London, May 15).

Cotton & Cotton Goods.

MANCHESTER REPORT.

(From Our Own Correspondent.)

Manchester, Saturday.

The chief feature of importance in the market during the past week has been the upward movement in raw cotton values. This of course has had a hardening tendency on yarn and cloth quotations. The rise was due to the unfavourable weather reports from the American cotton belt. From the point of view of Lancashire, however, it is not desirable that there should be any rapid rise in values. Manufacturers want cheap cotton in order to compete favourably with other countries. Spinners and manufacturers have met with difficulty in getting buyers to pay more money, and it is fairly certain that we shall not witness a period of really healthy activity until all spinning mills and weaving sheds are running on full time. With regard to the cloth demand for the Near Eastern outlets, better advices have been received from Egypt, and more contracts have been arranged than for some time back. Some fairly steady buying in a variety of fabrics has taken place for the Levant and Turkey. American yarn quotations have been stiffer but there has not been any general improvement in the turnover. In certain quarters however orders have been more frequently mentioned. The general inquiry in cloth has been encouraging and some fairly substantial sales have taken place for India in light cloths and shirtings. No business worth mentioning has been done for China. American yarns for home use have hardened and more orders have been booked especially in medium counts. The demand for export numbers keeps up fairly well.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 3:—A rather improved enquiry has been in evidence during the past week, but the turnover of actual cotton remains much about the same. Sakellaridis, about Strict Good Fair, has again claimed the chief share of attention, but during the last two days rather more interest has been displayed in the better grades (an event which has not occurred for some time), and some business has been transacted. The difference between Fully Good Fair and Good Sakel has again narrowed by 25 points. Yesterday's advance in the New York market gave a sort of fillip to trade generally, and a rise in Egyptian futures of 30 points was at once followed by an advance of $\frac{1}{4}$ d. per lb. in the spot prices, and yet when prices were tested little resistance was met with, and it was easy for purchasers to obtain their requirements at anything from $\frac{1}{4}$ d. to 1d. per lb. below the official quotations. The stock of Egyptian cotton held in Liverpool was officially declared at 96,376 bales on April 28. This figure includes 16,899 bales of Soudan. Although this shows a decrease of 7,000 bales on the last figures issued, it leaves a heavy weight of cotton still hanging over the market, which, allowing for 1-3rd as being undesirable cotton, would be sufficient at our present rate of consumption to last this country for nearly three months longer without any outside help, not to mention 18,000 bales in Manchester, and another 8,000 bales afloat. In the meantime, receipts from up country are still pouring into Alexandria and swelling the already considerable stock there. Under the circumstances, we do not see any immediate prospect of an important rise in values. C.i.f. business shows but little sign of broadening out at the moment. Manchester reports made rather dull reading at the commencement of the week, but latterly they have improved and, as we write, the tone there is steady, and there is more business doing at rather better rates. India is still the chief support, and some of the minor outlets are also showing signs of "coming in" again. Total sales, 2,200 bales (includes 400 Soudan). Quotations are advanced

50 points, with the exception of Good and above in Sakellaridis, which are raised 25 points only. Fully Good Fair Sakellaridis to-day 18d.

THE EGYPTIAN MARKET.

The Commercial Company of Egypt in their report dated April 28 state:—Since our last report, the futures market has been fairly active but at the close a rather weaker undertone has been again in evidence. The rise secured has been entirely due to the decision of the Government to buy cotton on the spot market (Official Communiqué Monday last) and to the immediate carrying into effect of this decision. What quantity the Government intends to buy and up to what prices, is not yet known, but the fact that the Government is buying cotton has caused short covering on the part of speculators and some buying back of hedges by native merchants, which has pushed up the market temporarily. It is probable that the risks of the market dropping heavily are now remote, but on the other hand the heavy actual supplies and the poor state of trade all over the world are factors to be reckoned with, and until a real improvement in these conditions takes place we cannot hope for any sustained rise.

Spot.—Total sales this week amount to about 10,000 bales which increased figure is mainly due to Government purchases. of the total sales we estimate 7,000 bales Sakellaridis (1,300 bales Government purchases), 2,500 bales Uppers (1,000 bales Government purchases) 300 bales white, 200 bales brown. Arrivals from the interior have dropped considerably. There is not much to say this week. Climatic conditions have been about normal and the crop is now progressing satisfactorily although it does not appear that any of the initial delay has been recovered.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 1:—

Condition of Crops.—April 26—Bihar and Orissa—Sowing of jute commenced in parts of Purnea, but more rain wanted. Prospects of other crops unchanged. April 28—Bengal—Seasonable rain still absent and jute and autumn rice sowings further retarded. Rainfall.—April 24—General in Burma and South Bengal. Local in Mysore. April 25—General in Upper Burma, Arakan and Chittagong Coast. Local in Tenasserim, Assam and Mysore. April 26—General in Tenasserim. Local on South Burma Coast, Assam and Mysore. April 27—General in Tenasserim. Local in Assam, Upper Burma and Mysore. April 28—Local in Assam, Coorg and Tenasserim. April 29—General in Assam, Mysore and Madras Deccan. Local in Malabar and south-east Madras. April 30—Local in Malabar, south-east Madras, Coorg and Assam. Markets.—Cotton—April 27—Bombay cotton market steady. Fine M.G. Oomras, Rs. 376 May. Rs. 395 July. Bombay cotton arrivals from September 1, 1921 to April 21 1922 were 2,500,000 bales as compared with 1,826,000 during the same period of the last year. Piece-goods.—Bombay imported piece-goods market unchanged. Retail demands continue encouraging, but wholesale demands not active. Prints continue rather weak, but local goods moving satisfactorily. Moderate activity in Calcutta and Madras markets, but some picketing reported from Punjab and United Provinces. Jute.—April 28—Calcutta jute market very strong with prices higher. Firsts, Rs. 73 May; Lightnings, Rs. 64 May, April 28—Hessians very firm with advancing prices. Heavies fully steady. B. Twill Rs. 42.8. Shellac.—April 28—Market weaker, T.N. Rs. 185 to Rs. 190. Rice.—April 28—Special Straits quality rice Rs. 510. Bank Rate.—7 per cent. Hitherto the rate was 8 per cent. from February 16.

The approximate gross production of the Steaua Romana, Bucharest, for the month of April, was 17,500 tons.

The directors of the Anglo-Egyptian Bank have declared an interim dividend of 5s. per share free of tax, for the half-year ended February 28, payable June 1.

The South Indian Railway announce an interim dividend of 2 per cent. in addition to guaranteed interest of 1 $\frac{1}{2}$ per cent. payable, less tax, July 1.

The announcement has recently been made that all insurance companies doing business in Palestine shall deposit with the Government the sum of £E.1,000 in respect of each of the classes of insurance business in which they are engaged.

NOTES OF THE WEEK.

M. Gounaris Resigns.

A fresh Ministerial crisis has occurred in Greece. On a vote of confidence last Thursday the Government secured a majority of one in a Chamber of 321 deputies, with thirteen Ministers taking no part in the division, and the following day M. Gounaris handed in his resignation. His position has all along been difficult; it became still more acute when, to enable the machinery of government to be carried on, he had to resort recently to a forced loan, which affected many sections of the community that had not been disposed to be critical of his foreign policy. As the time approaches for Greece to bow to the inevitable in Asia Minor the idea will naturally gain ground that others may possibly discover an avenue of escape which has not revealed itself to M. Gounaris. M. Stratos, the ablest of the Opposition leaders, has accepted the task of forming a new ministry and expresses confidence in his ability to remain in office. It is not an attractive time for any Greek politician to assume the duties of Prime Minister, but if it falls to the lot of M. Stratos to register the country's acquiescence in the distasteful policy forced upon them by circumstances and the Allies, he will be fortunate in that the Opposition as represented by the Gounarists will know that no stigma attaches to the Greek Government of the day.

M. Venizelos and Greece.

One of the healthiest signs in the Greek political world to-day is the attempt to bridge the gulf between the Liberal Party and the Royalists. Whether the absence of support for the Government in the Chamber indicates that this desirable movement has received a setback remains to be seen. Unfortunately there would seem to be a tendency among certain Greek communities abroad to perpetuate the unhappy division of the country into two bitterly hostile camps. In Greece itself the Venizelist extremists find little real support, but they appear to derive encouragement from overseas, and to be basing great hopes on the return of their champion to Europe. It would be well indeed if the past in Greece could be undone and if the present régime could count on the political help of M. Venizelos. But it has to be borne in mind by those who had no experience of Greece under the late Liberal Government that the return of M. Venizelos to power implies to the bulk of his countrymen the revival of the terrorist system associated with the name of Gyparis, M. Venizelos'

favoured lieutenant, who left the country with his chief and is understood to be finding (until M. Venizelos returns to Athens), North Africa—whether in summer or in winter—less warm than any country in Europe, where Greece enjoys extradition rights. The true friends of Greece deplore the fact; but it is useless for those at a distance to speak of ingratitude to a great man in the case of a country where the iron of that great man's absentee administration entered so deep into the people's soul.

Great Britain and Palestine.

There is to be further delay in the confirmation of the Palestine Mandate by the Council of the League of Nations, but there is no reason to suppose that it will not presently receive the approval of that body. The difficulty between Great Britain and America on the subject is being overcome by a separate treaty guaranteeing to citizens of the United States the same privileges in Palestine as are accorded to British subjects or the nationals of the League States. With the regularisation of the mandate—even if the formal grant has to be withheld until the Turkish question is settled—it should be possible for the Administration to take up a more definite line regarding the policy to be adopted. None of the various pronouncements made has achieved the end in view—a *modus vivendi* for Jews and Arabs, and until there has been a round table conference in Palestine itself no really workable scheme can be elaborated. It is unlikely that the British Government will withdraw the Balfour Declaration; on the other hand it should be able to satisfy not only the Arab Delegation now in London, but, more important still, the general body of Arab opinion in Palestine as well, that the country is not going to be administered on the lines of the exaggerations of Zionist Extremists. The "national government" that the Delegation ask for would probably be bankrupt in a few weeks. Great Britain's task is to assist in the building up of the best possible edifice out of the material contributed by Arabs and Jews. If the two sections were left to themselves, there would be no co-operation, and the country—whichever section was "top-dog"—would suffer. It is evident that collectively the Arabs have a longer administrative apprenticeship to serve than the Jews, and they will be well advised to waste no time in starting it by claiming to be qualified to administer the country by themselves. Their numerical superiority will place them in an unassailable position as soon as they have the requisite administrative experience which they now lack.

Turks, Greeks and Italians.

Our Constantinople Correspondent's letter which will be found on another page gives a good idea of the excitement caused both in that city and in Kemalist circles by the news of the Turko-Italian agreement, and by the Italian withdrawal from the Sokia area. The Nationalists have announced that they will refuse to recognize the agreement, and the Nationalist Press is now very angry with the Italians. As to the Agreement, they will probably very soon come to the conclusion that it is not worth making so much fuss about; but the withdrawal of the Italian forces has certainly given them something to think about. It would appear, however, that they, as well as the Greeks, actually received warning of the Italians' purpose, and that they have, therefore, only themselves to blame for allowing the Greeks to benefit as they have done by the move.

The Allies and the Kemalists.

It is most regrettable that the French should have made it impossible to send a prompt and vigorous reply to the Kemalists' Note suggesting a conference at Ismid to discuss the preliminaries of peace. Italy and Great Britain were averse from accepting the proposal, seeing no advantage in it; but France leaned towards acceptance, for reasons not too difficult to fathom perhaps. In the long run, however, the Nationalists are unlikely to gain many more advantages from lack of unity on the part of the Allies. They are entitled, of course, to turn that lack of unity to their own benefit as often and as thoroughly as they can, but, unless we are very much mistaken, they would be wise to resist the temptation to score a point here or there just now, and to look to the future. If now they would give proofs that they are worthy of the trust which Europe seems disposed at this moment to place in them, they would undoubtedly be consulting their best interests. They and the Greeks both want peace, as Europe does; and Europe is very anxious to see that no more "incidents" take place on either side, to jeopardise the chances of peace. Let both sides, of their own free will, invite the special commissioners, or observers whose presence is so desirable, and a big step towards the desired goal will have been taken.

Egypt and the Sudan.

The hope which we expressed last week when referring to Lord Allenby's speech at Khartoum regarding the future relations between Great Britain and the Sudan has been disappointed. Far from accepting it as a hint, the extremists have seized upon the speech as a pretext for advancing further pretensions; and *The Times'* Cairo correspondent reports that its publication has raised a storm in the vernacular Press. This is to be regretted, as showing how lightly the vernacular Press takes its responsibility towards the Public, while the so-called arguments that it advances show how ill-fitted it is to lead public opinion. But there the matter may be left for the moment. What is really important is the news that the Commission which is drafting the Constitution has actually included in its report a declaration that the Sudan is inseparable from Egypt, that it owns allegiance to the King of Egypt, and that the latter shall be styled King of Egypt and the Sudan. It is hard indeed to guess what can have induced the Commission to perpetrate such folly, and harder still to see how they could hope ever to give effect to the resolution.

Ridiculous Claims.

In connection with these Egyptian demands regarding the Sudan, the Cairo correspondent of the *Morning Post* sends to that paper details of a draft convention prepared for submission to Lord Curzon by the Egyptian Delegation (official) last year. This surprising document, which, owing to the breakdown of the negotiations, was never presented, is far too long to be examined here in detail, but it is fair to say that it appears to have been prepared on the basis of "heads I win, tails you lose." Some slight thought seems to have been spared for Great Britain's interests and position, but the Sudan—and for that matter other "Nile areas which are now outside the Sudan"—are evidently regarded as being destined merely to minister to the needs of Egypt. "Great Britain is to recognise Egyptian sovereignty over Sudan territory," says this remarkable document, and—presumably in return for this privilege!—she (Great Britain) is to "guard" those "Nile areas outside the Sudan" to which reference has just been made. Significantly, the Sudan is to have no military force of its own "except as permitted by Egypt"; it may not raise a loan without Egypt's consent; and it is to be blessed with an Egyptian Assistant-Governor-General. Whether the latter blessing would be highly appreciated can hardly be a matter for doubt. The precious Convention makes very frequent mention of "Egyptian rights" and the rights of Egyptians in the Sudan, and of what the Sudan will *not* be allowed to do; but we fail to find any mention of the "rights" of Sudanis in Egypt or of what the Sudan *may* do, save in regard to the construction of the Blue Nile irrigation works. Upon the whole it is probably just as well that the Draft never was presented to Lord Curzon; for though Great Britain wishes to be generous to Egypt, she does not wish to be so at the expense of the Sudan.

Woman's Part in Egypt.

Like the women of Turkey at the time of the Turkish Revolution, the women of Egypt at this time of change in their country's history are showing considerable activity. A few days ago a deputation of them presented to King Fouad, through his Secretary, two petitions, one asking for the repatriation of Zaghloul Pasha and his fellow-exiles, the other requesting his Majesty to use his influence for the eradication of certain superstitious practices, which are said to have been in vogue on the banks of the Nile from the earliest days. What reply has been or will be returned to the petitions we do not know. The presentation of the second is certainly a healthy sign; and though superstitions rooted in the land since early Pharaonic times are not likely to be eradicated in a few days or a few years, inasmuch as a beginning must be made, the earlier it is made the better. In Ancient Egypt Woman played a more active and much more honoured part than she did in rival lands, and it will be interesting to see whether in this Twentieth Century A.D. she will regain her importance there.

The Persian Cabinet.

The Persian Cabinet has resigned, and H.I.M. the Shah has been notified of the fact by telegraph. As the Valiahd has not yet returned to Persia, the acting Regent has to face the difficulties of the situation—which appear to be complicated enough in all conscience. The demission of the Cabinet is attributed to growing opposition, and it is fairly safe to assume that the

difficulties of the financial situation weighed heavy in the scale in bringing about the decision. According to one report, one of the last acts of the retiring Government was to confirm the concession granted in 1920 for the construction of a railway from Teheran to Kermanshah. This concession was generally understood to have been secured by purely British interests, and if the report referred to is correct it is good news for this country as well as for Persia, as the confirmation would indicate some slackening of the anti-British feeling which has lately been so evident throughout the North. But whether it will be affected by the resignation of the Persian Cabinet remains to be seen.

Forged Antiquities.

The plea, which has so often been advanced in the columns of *THE NEAR EAST*, that Great Britain should once again take an active part in excavations in Babylonia, even if she cannot regain the leading position which she once held in that field, finds strong support in the letter addressed to *The Times* by the Rev. S. Langdon, Professor of Assyriology at Oxford. The Professor's principal object is to issue a warning against the forged antiquities which are now so very common in Baghdad and other places in Iraq; and he declares that since we obtained control of the ancient Sumer and Akkad "nearly all the genuine inscriptions and antiquities have gone to America." The trade in *antikas*, whether genuine or forged, is no new one, of course; and many a traveller who visited Mesopotamia in the last quarter of the last century had good reason to admire the ingenuity of the Jewish and Arab "merchants," if he could not similarly admire their honesty. But that is no reason why the present state of affairs should be tolerated.

Great Britain's Hope.

The purchase of "antiquities" is always a risky business, although it is true that every European and American museum has bought a percentage of its Babylonian objects in the more or less open market. Now that the forgers are so much more expert and so much better equipped in all ways to carry out their nefarious work, the risk has been greatly increased, and the only thoroughly satisfactory way to secure specimens for museums and material for the scholars to work upon is to conduct excavations scientifically. To do that is a costly business, and at the present time the only hope of Great Britain's being able to resume the work so well begun by Rawlinson and Layard, and so strangely neglected of late, lies in the chance that some wealthy individual will do for British Assyriology what many Americans have done and are doing for their museums and archaeologists, and what the late Mr. Walter Morrison did for the British Museum's excavations at Carchemish. At the same time it should surely not be impossible for this country to send a competent Assyriologist to Iraq, to do something towards securing for "the B.M." some portion of such genuine antiquities as may come up on the market, and to help in suppressing the traffic in forgeries. Would it not be a graceful act if the Government of Iraq should invite this country to send out such a one as Adviser to a Department of Antiquities?

If you find this week's issue of THE NEAR EAST of interest, help to make the Paper still more widely known by securing subscribers among your friends.

THE WEEK AT HOME.

London, Monday evening.

The Prolongation of Genoa.

The statesmen still confer at Genoa; Mr. Garvin, as usual, tells us that last week was unparalleled and that next week a miracle may happen. But we have all become political agnostics; the miracles have been postponed so often, and even the daily crisis fails to raise a thrill. Rumour is far more impressive, and there were some astonishing rumours last week of the concentration of aeroplanes and battleships, and the prospect of immediate war. Still more astonishing was *The Times'* report of a conversation between Mr. Lloyd George and M. Barthou, which was subsequently denied—an indiscretion or a blunder which has not done *The Times* any good. There has been more than one protest against the manner in which personal feeling has been allowed to tinge the reporting of events.

But the Russian reply sealed the fate of Genoa. First America, then France, then Belgium disliked the idea of the Conference; and last week Genoa was already dead. Now it is not only dead but damned. The Russian answer was rightly characterised by Mr. Lloyd George as a "shrewish document," and it is best to leave it at that. It was all very well to dissemble their love, but why did they kick our proposals downstairs? Mr. Garvin suggests that it was because Chicherin is afraid of being shot by his own people when he returns to Moscow. That, of course, is his business; the moral for us is that there are some people you can't make a deal with. It is suggested that Genoa has laid the foundations for further negotiations, which may lead to agreement some months hence. As to that we shall see what we shall see; another such Conference would probably make peace impossible for years.

British Foreign Policy.

But the Conference has had its effect on British foreign policy. The Entente with France may not be dead but it is in a state of suspended animation. M. Poincaré has seen to that. But as there is no question of an entente with Germany or Russia, the upshot is that we keep ourselves to ourselves, and look after our own affairs. In other words, we follow America in a policy of modified isolation. On the economic side, we want peace all round very badly. It will help to revive trade, it will give confidence in the stability of civilisation in Europe, it will help to right the exchanges, and generally do something to make the world worth living in. On the political side, however, a Continental war or even the continuance of the present disagreements would not matter so much to us. At present we are in an idealistic mood, and we exhort lions to lie down with lambs. But if the lion and the lamb refuse to agree, the idealistic mood will pass, and we shall become realists. We shall reflect that there is such a thing as a balance of power, and that if the Continental States are so foolish as to fight each other they will weaken themselves still further; and none of them will then be in any condition to become a danger to us for many years. "Dogs delight to bark and bite"—but the cat gets most of the cream.

On the other hand, an alarmist suggested to me last week that the Continent may some day sink its differences, and combine against us. To which the answer is, that if Genoa is any key to the Continental mind, pigs are more likely to fly. Europe does not love us very much, but it hates its immediate neighbours more.

Anarchy in Ireland.

Another Conference has broken down—that between the Irish Provisional Government and the Republicans. The two sides have met for the *nth* time, and failed to agree. The fact seems to be that there is an acute difference of principle, on which neither will give way. Meanwhile pitiful stories are being told by refugees who cross to England utterly ruined; neither life nor property is safe, and according to all accounts the

position is worse now than a year ago, when the much maligned British troops were in the island, and at least afforded some kind of protection. Now there is none whatever against the raider or the highwayman. What seems to be happening is an actual dissolution of society, owing to bands of plunderers taking advantage of the deadlock between the two political factions. Surprise has been expressed in some quarters that the Provisional Government does not put its foot down. Apparently it is not strong enough to do so. The two sides seem fairly evenly matched. But the only people who profit are the robbers of banks, whose outrages are reported every day, but who never seem to be caught. Incidentally freedom of speech and of the press seems almost to have vanished.

On all sides it is admitted that Ireland must fight out her troubles alone. For centuries the Irish have told the whole world that England was the oppressor, and that if the hated Saxon left the island peace would reign, trade would revive, and the ancient greatness of Erin be restored. We have now left the island, and are waiting for the fulfilment of the prophecy.

Raising the 'Lusitania.'

It is said that an attempt is to be made by an American syndicate to raise the 'Lusitania.' Several English salvage companies have discussed the question of raising some of the shipping which lies at the bottom of the English Channel as a result of the submarine war, but it has been generally decided that it is cheaper and more certain to build new ships than to salvage old ones. It would, of course, be a great triumph of engineering skill to raise a huge vessel like the 'Lusitania,' but after seven years submersion it is doubtful whether the hull or the machinery would be worth very much.

The Trade Revival.

Both Mr. Baldwin and Mr. McKenna have expressed the conviction this last week that trade is reviving—nothing that presages a boom, but in a slow and steady fashion. The unemployment statistics indicate that these two great authorities are right. I gather that orders are coming mainly from the Colonies and South America; there is very little doing with Europe—although a contract for the rebuilding of Moscow is being arranged—and the benefits of diminished taxation have hardly been felt as yet at home.

But there is a general feeling that we are over the worst; and that once the engineering strike is over we can look forward to a diminution of distress, if not to positive prosperity. As to the conduct of that strike, I hear of many employers criticising the attitude of the Engineering Employers' Federation as being unreasonable, and the feeling seems to be becoming increasingly bitter. But any attempt to cover the details of these prolonged negotiations would take columns.

Prices and Wages.

The unwelcome fact that prices are rising slightly again is revealed by the index figures for last month. This is not unusual at this time of year, owing to summer stocks not having yet come forward; but as wages are falling everywhere it is peculiarly unwelcome just now.

Meat still remains very high, and this in itself will lend support to the campaign for removing the embargo

on Canadian cattle. Lord Beaverbrook, a Canadian, has been agitating for over a year in his newspapers, and now Lord Northcliffe has taken the question up with his customary vigour. The embargo is supported by British farmers and meat interests, but it is unpopular in the towns. It appears, however, that the Government gave a definite pledge to the Canadians that the embargo would be removed after the war, and it is clear that that pledge will have to be honoured. As the credit of the Government is involved, the sooner it is honoured the better.

A Cold Spring.

Everybody is grumbling over the unseasonable weather. It is cold, there is a horrible north-easter, the sun has hardly broken through the banks of lowering cloud, and May has generally been a failure. A year ago we were in the middle of a summer drought by this time; now we are still sitting over the fire of an evening, and hot bottles are welcome at night. It is to be 1923, according to Sir William Beveridge, when the crops fail and the climate goes altogether wrong, but this year seems to be taking a trial run. The first county cricket matches have been played, but neither players nor spectators can have enjoyed them much.

The Week's Books.

"The Victorian Age" (Cambridge University Press) by Dean Inge, is written from the standpoint of an unrepentant Victorian. The Dean thinks that the two great ages of England were the Elizabethan and the Victorian, but he is quite ready to criticise individuals, thus: "Ruskin was a Protestant mediaevalist, who admired everything in a mediaeval cathedral except the architecture"; and "Browning's method of facing the problems of life like a bull at a fence is characteristically English." Also he lays it down that "Literature flourishes best when it is half a trade and half an art."

"The Population Problem; A Study in Human Evolution" (Oxford University Press) by A. M. Carr-Saunders, is an attempt to cover the whole subject mentioned in the title. It is a long and serious work, which touches on biology and psychology. I have not had time to read much of it, but the little that I have read strikes me as good.

"Creeds or No Creeds" (John Murray) by Dr. Charles Harris, is an attack on the Modernist position all along the line from the Virgin Birth to the fundamentals of philosophy. It is the first definite attempt to reply to the position taken up at last year's Cambridge Conference. Incidentally it accuses the Modernists of being behind the times! It bristles with controversial points, but my theological attainments are not sufficient to say how far the Broad Churchmen's armour will be pierced. But it looks to me as though it were a work of sufficient importance to be answered; it can hardly be passed over.

I only mention "English Prisons under Local Government" (Longmans) for the purpose of saying that it has a long and brilliant preface by Mr. Bernard Shaw. The rest is written by Mr. and Mr. Sidney Webb; and whether because I simply cannot read Mr. Sidney Webb or for the reason that I happen never to have been in prison I stuck fast in the first pages. Others may be more fortunate or more industrious; for myself, I think I should almost prefer penal servitude to a course of our greatest Fabian.

The "Memoirs of the Crown Prince of Germany" (Butterworth) is naturally an interesting book, apart from the fact that the Royal exile is not without some literary ability. He admits that he was "never a blind admirer" of the Kaiser, who was rather apt to dragoon his own family as well as his subjects. It appears that he liked King Edward, "the good uncle and amiable man, a brilliant upholder of his country's interests, and one who would rather have secured those interests in co-operation with Germany than in opposition to her." (Apparently the ex-Crown Prince does not take the "encirclement policy" imputed to England very seriously.) He remarks that "the German Army was not defeated at the Marne; it was withdrawn by its leaders. The battle was lost because the Command gave it up as lost."

From Our Own Correspondents.

EGYPT.

Cairo, May. 6.

Return of High Commissioner.

The High Commissioner and Lady Allenby returned on Tuesday from their annual trip to the Sudan. Their Excellencies travelled back *via* Port-Sudan and had a very rough passage in the Red Sea, which did not astonish us very much, as Lord Allenby always seems to encounter stormy weather whenever he puts to sea. The High Commissioner had an official reception on arrival in Cairo, members of his staff and all the higher British Officials being present on the platform; there was also a British Guard of Honour, which was inspected by His Excellency, who on this occasion wore Field Marshal's uniform. Lord Allenby paid a visit to the Sultan next morning, and since his return has been fully occupied in dealing with the many important questions which have accumulated during his tour of inspection in the Sudan.

The Sudan.

On the occasion of the return of the High Commissioner publication was made of the speech which he delivered at Khartoum on April 26 to a gathering of representative chiefs and notables. This speech was intended to allay the apprehension that existed in the minds of the Sudanese as to the future control of the country—apprehension which had been put on record in a memorandum presented a few days previously to the Governor-General by members of the delegation that went to London in 1919. Lord Allenby made it perfectly clear that the British Government had no intention of abandoning the Sudan or of associating itself with its development in a less close manner than had been the case hitherto, and his words appear to have reassured his audience.

It may be pointed out that the anxiety caused amongst the Sudanese has undoubtedly been due to the articles published in the Egyptian vernacular press claiming for Egypt the control of the Valley of the Nile from its source to its mouth, including possession of the Sudan. While everyone sympathises with the desire of the Egyptians that they should have some substantial guarantee in regard to their present and future water supply, which comes to them through the Sudan, and while everyone would acquiesce in any arrangement which would afford such assurance, no one in his senses can agree that this consideration entitles the Egyptians to apply to the Sudanese principles which they have rejected in their own case. The Sudanese have as much the right to chose their own form of Government as the Egyptians had, and since history serves to confirm the incompatibility of temperament—to use no stronger word—that exists to-day between the Sudanese and the Egyptians, it is nonsensical to talk of the Sudan being made to form part of the Egyptian Empire.

In the circumstances it is particularly regrettable that a member of the reigning house should take up the matter in the manner in which Prince Omar Toussoun has just done; but knowing as one does his own personal fears for the future one can quite understand his desire to pander to the popular cry of the moment, however unreasonable or absurd it may be.

The Changing Order of Things.

A further indication of the changing order of things has been afforded this week, first, by the departure on leave, prior to retirement, of Mr. R. S. Patterson, the Adviser to the Ministry of Education, and secondly by the news of a reorganisation in the Ministry of the Interior, under which, in addition to an Egyptian Director-General of Public Security there will be an English Director-General, who will occupy himself solely with public security affecting foreigners.

The departure of Mr. Patterson has been made the occasion on the part of the Egyptians of a demonstration

of esteem and affection which must have been as gratifying to him as it was unprecedented. Mr. Patterson has spent a full score of years in the Egyptian Civil Service. During that time he has not only acquired an almost unrivalled knowledge of the inside working of the various Administrations, but has established for himself among both Europeans and Egyptians a reputation for sincerity, financial and administrative ability and integrity which has gained for him an almost unique position. It was with the keenest regret that everyone learnt that he was not to succeed to the vacant Financial Advisership, and the severance of his connection with the Egyptian Service has been received with even greater regret.

For the past three weeks Mr. Patterson has been feted by Egyptians of every category from the Prime Minister down to the members of the National Sporting Club, and on every occasion, amid the regrets at his departure, there have been expressed the same sentiments of admiration for his work and of gratitude for the good-will he has always shown towards Egypt—a good-will the sincerity of which, as more than one speaker pointed out, was abundantly proved by his strong advocacy of the present policy, the introduction of which he knew only too well inevitably meant to him the loss of his post. In Egyptian circles I have during the past few days frequently heard the remark that it is a thousand pities that the much desired change in régime should entail the loss to Egypt of a man like Mr. Patterson, whose presence would have been such an assistance in the settlement of the many problems which, it is recognised, must confront Egypt before she can settle down as an independent nation under the Constitutional régime; while I feel I am representing the opinion of the British community when I say that everyone of us feels very keenly and regards as almost a personal loss the departure of one of our compatriots who has so nobly maintained British traditions and—a feature, alas, very rarely to be met nowadays—had gained our confidence so completely.

Gift to Arab Museum.

The Arab Museum has received an interesting gift from Prince Yusef Kamal, in the shape of a valuable Persian carpet made in the sixteenth century. It was originally in one of the local churches. By some means it found its way to France, where it was secured by a Cairene merchant, from whom in turn the Prince purchased it. It is of silk, very handsome in texture and design and cost him L.E.8,000.

PALESTINE.

Jerusalem, April 30.

"The Times" Articles.

The whole of the eight articles in *The Times*, "The Truth about Palestine," by Mr. Philip Graves, have now come through to us here. They have naturally provoked intense interest in all circles—general admiration in British circles, a somewhat guarded approval among the older Palestinian Jewry, and a rancorous opposition from the newer Palestinian Jewish contingent. They have been reprinted in full in *The Palestine Weekly*, an English paper of pro-British, strong Zionist, but Anti-Zionist Commission tendencies; the earlier

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS Director,

articles have been translated in parts of the Arab Press, and also in the *Doar Ha-Yom*, the Hebrew daily paper referred to by Mr. Graves as "of moderate Zionist views"; while in *Ha-Aretz* (which *The Times'* Correspondent pillories as "the recognised organ of the Zionist Commission" given up to "ill-informed, capacious and bitter criticism of the British Administration") the articles have elicited three lengthy leaders full of acrimonious comment. More recently this same paper has made an effort to shift the blame for the present ill-feeling between Arab and Jew from the shoulders of the Zionist Commission to those of the anti-Semitic Gentile. It is a crude, rather hysterical *post hoc propter hoc* argument, describing how forty years ago the Jewish idealists from Russia, wearied by the economic, cultural and religious forces which were pitted against them, determined to lay their aching heads once more on the bosom of their mother Asia; how they lived all those pre-War years on terms of the closest amity with the Arabs, their intimate blood-kindred, closely allied in speech, and their fellow-believers in a pure monotheistic religion; and how these relations were only severed and feelings embittered after the War by the intrigues, incitements and provocative malice of Gentile foes. There is scarcely any attempt to veil the insinuation that these foes are mainly drawn from British officialdom. But, the writer goes on to say, they, the Jews, refuse to be intimidated: they will never relax their efforts towards their ideal of national revival. The blood of the martyrs is the seed of the Church—"a nation which can call on such names as Trumpeldor [murdered by Arabs at Metulla early in 1920], a nation which by pogroms has been robbed of such writers as Brenner [a gifted Jewish author murdered by Arabs shortly after the troubles of May 1, 1921], a nation among the defenders of whose soil were such young men as Absalom Gissen [killed in the Arab attack on Petach Tikvah, May, 1921], will never depart from its homeland, never! never!! It will cleave to it by its very fingernails! In the sight of God and History this Nation has betrothed to itself this Land, in faith and might and blood, to be to it the Motherland."

The Results of Fear.

Mr. Graves' strictures on the personnel of the Zionist Commission in Jerusalem, and especially on its Chairman, are echoed among the bulk of the Jews outside the orbit of the Commission's influence, and even from one or two within. One point which was not made by Mr. Graves should be borne in mind: virtually all the Jewish schools in Palestine are at the financial mercy of the Zionist Commission, and but for the favour of the Education Department of the Commission the large body of Jewish teachers would starve. (It is said that they are three months behindhand in salaries already.) This control is easily wielded and means, of course, the moulding of the minds of the younger generation and the instilling in them of the jingoistic frame of mind which, if it gets much worse, must spell havoc to tolerant relations between Arab and Jew. Another point not sufficiently emphasised by Mr. Graves is the element of fear out of which this jingoism partly arises. The Zionist, especially the East European Zionist, feels that he is fighting against fearful odds: he sees in everything and everybody an open or a hidden foe. And, after all, when we remember the life of the Jew in Russia during this past century, we must sympathise with his raw nerves. He must needs whistle and shout to keep up his courage. And he cannot understand the phlegmatic, chilly and somewhat off-handish treatment that he gets from the ordinary, equally non-comprehending British official. The result is that he deeply entrenches himself in his own grievances, puts forth enormous thought to resist possible undermining, and takes means to strengthen his spiritual and material defences, regardless of the feelings of his ingenuous neighbours. Any protest against this attitude will draw out the old Talmudical saw: "If I am not for myself, who will be for me? And if not now, when?" This they cite as the Golden Rule which in present circumstances must of necessity supersede the other more familiar one. This it is which

underlies most of the innocent ineptitude which characterises the methods of much of Zionist activity in Palestine.

The Englishman's Beverage.

There is also a pathetic ignorance shown in some of these leaders fresh from Russia. Mr. Graves speaks of meeting Mr. Ussischkin in Constantinople and being appalled at his ignorance of the conditions in Palestine. But after all, it was this same Zionist leader who, on wishing to entertain the Governor of Jerusalem to lunch, enquired diligently what was the Englishman's most usual beverage in the East; the result of his research was that the Governor was given nothing to drink but Eno's Fruit Salts.

Educational Difficulties.

A little incident has arisen within the last few weeks which, however bad a complexion some would put on it, is just another instance of this fearfulness in the Jew and his readiness to conjure up out of his own imagination the existence of malign influences. In certain educational circles the need had for some time been felt of some higher course for which the youth of Palestine could study. As things are at present, the student who wishes for something beyond what he gets in the local secondary schools must go to Beyrout or Europe to get it. Naturally this is comparatively expensive, and, besides ruling out higher education for all but a very small minority, means that the pick of the young men of Palestine are either lost to the country or return to it with foreign ideals and a contempt for the place of their birth. The time is certainly not yet ripe in Palestine for a national university such as is at present in view for Egypt; but Jerusalem is amazingly well equipped with professorial talent in Oriental studies: there are at least half-a-dozen bodies, with staffs strong enough to run two or three University Faculties, whose personnel at present do nothing but sit down and grow wiser and lecture one another. So somebody had the bright idea of utilizing these forces, constituting them into a faculty of higher studies—a body which could lecture, encourage systematic study, conduct examinations, and grant diplomas to satisfactory candidates. The scholars of all the various communities, English, French, Greek, Armenian, American, Arab-Moslem, Arab-Christian and Jewish, were invited to come and discuss the question. All came but the Jews. They said that their own Hebrew University was to commence operations almost immediately and would cover such subjects as were proposed by this new body; therefore they did not feel themselves free to join in this more general venture.

It is generally understood, however, that certain of the Jewish scholars were anxious to co-operate, but the word went forth from the same Chairman of the Zionist Commission that this scheme was nothing less than a nefarious attack on the Hebrew University, and that no self-respecting Jewish Nationalist must have anything to do with it. Comment is needless. The abstention has aroused a great deal of indignation, chiefly in Jewish circles. But the episode is a symptom not of a lack of desire to work for the common good of Palestine, but simply of the carking fear and wild-animal-like suspiciousness of the East European Zionist.

YUGOSLAVIA.

Belgrade, May 5.

The Political Situation.

Domestic political questions are now of secondary importance, and with the exception of some Bills and the Electoral Law, Parliament is mainly engaged in carefully watching events at Genoa.

The Electoral Law has been passed, and in its principal details it is a replica of the old Serbian electoral law, which is claimed to be based upon most democratic principles.

Yugoslavia and Italy.

The Foreign Minister has arrived at Belgrade to confer with the Premier—who is still in bed owing to his recent accident—about the negotiations with Italy,

which are proceeding none too smoothly. The general opinion seems to be that the Italians are not sincere and that they are only playing for time; for it is impossible to accept the excuse given by the Italians, that they are afraid of executing their obligations under the treaty of Rapallo because they fear reprisals from the Fascisti. Even if this were true, it would show official Italy in a very bad light. This excuse is really worse than none at all, because on every occasion that the Yugoslavs asked permission to restore order in Fiume, the Italians not only refused to give permission, but threatened to consider any attempt of doing so as a *casus belli*.

In any case the Yugoslavs are convinced that their cause is just, and will certainly soon clear up the situation one way or another; for after all, what is the use of having Treaties, if they are to remain dead letters or "scraps of paper?"

Liubliana, May 1.

Distinguished Visitors.

Professor C. Sarolea, well-known as an authority on Central European conditions and an unwearied champion of the States of the Little Entente, has just been paying a brief visit to Yugoslavia; and on April 21 Liubliana had the opportunity of welcoming him and Miss Jean Findlay, C.B.E. They visited the University, the Museum, the Opera and the Playhouse, and were greatly impressed by the progress that has been made in the intellectual and artistic sides of the nation's life during the three years since the Liberation. The National Museum in Liubliana has long been famous for its almost unique collection of Iron and Stone Age antiquities. It possesses a vase for which an offer of £25,000 was made before the war. Fortunately the offer was refused, and the treasure is now the property of the Yugoslav nation.

The Professor and Miss Findlay called on the Viceroy, and an official dinner was given in their honour at the Hotel Union, where they were received by Dr. Gregorin and Dr. Skaberne, the Chairman and Vice-Chairman of the Yugoslav Society for the Study of English. Both visitors from Scotland took a great interest in the work of the Society, which is already doing much to cultivate ties with Great Britain. On April 23 Professor Sarolea and Miss Findlay left for Zagreb and Belgrade.

Death of a Yugoslav Painter.

The Yugoslav world of art has sustained an irreparable loss in the sudden death of Professor Vlaho Bukovac, which took place in Prague on April 22. Bukovac was an artist after the old academic French style, and not in sympathy with the modern Expressionist movement in painting and sculpture. His work was as well-known abroad as at home, and some of the best examples of it are privately owned in France and England. In 1902 he was appointed Professor at the Academy of Fine Arts in Prague. His death was due to haemorrhage on the brain. Although he was sixty-seven years of age, his working powers were unimpaired, and at the time of his death he had just returned from Belgrade where he had painted a portrait of the King. All who visited the Yugoslav Exhibition in Paris in Spring, 1919, will have a vivid recollection of his canvasses there.

GREECE.

Athens, May 8.

The "Micrasiates."

The three gentlemen from Smyrna who are representing the "Defence Committee of the Micrasiates," and of whom I spoke in my last letter, have had an exceptionally busy week in Athens. They saw every person of importance in the capital, including the diplomatic representatives of Great Britain, France, Italy, and the United States of America, to plead the cause of the Christian populations of Ionia and to explain why the Ions had decided to oppose by force of arms, if necessary, any attempt of the Kemalists to reinstall themselves in the liberated regions. On Thursday morning the three delegates were received in audience by the King, also by the Crown Prince, and on Friday

morning embarked for Smyrna, apparently very pleased with the result of their *démarches* here. Prior to their departure the "Micrasiates" published the following *communiqué* in the Athens Press:—

"The Committee for the Micrasiatic Organisation" considers it its duty to make the following declarations: It confirms its previous statement to the effect that the aim of the Micrasiatic Organisation is of a purely national character and void of any political taint; that it is determined to employ all its forces—both moral and material, in order to defend the liberty of the people of Asia Minor, and for this purpose appeals to the patriotism of all the Hellenes—both rich and poor. It expresses its heartiest thanks to the Government, the Press, the leaders of the parliamentary groups, the deputies, and the people of the Kingdom for the unanimity of the sentiments which they have displayed in favour of the sacred struggle for liberty. The Committee also expresses its profound respect for the British, French, Italian, and American *Chargés d'Affaires* for the sympathetic manner in which they were received by them, and is returning to Smyrna with the firm conviction that Asia Minor will not be abandoned either by the State, or by the Army and the Greek people."

General Papoulas.

General Papoulas, who arrived in Athens ten days ago, has returned to Smyrna by the same boat as the Micrasiatic delegates. The rumours to the effect that certain divergencies had arisen between the Government and the Greek Commander-in-Chief, have been officially denied. The denial states that General Papoulas enjoys the full confidence of the Government.

An Unpopular Action.

It is reported from Salonika that two mosques which were occupied by Greek refugees from the Caucasus have, by order of the Governor-General of Macedonia, been restored to the Moslem community of that town. The Orthodox Metropolitan of Salonika protested

against this action, by which many Greek families are rendered homeless. Moreover, the Metropolitan points out that the mosques in question were originally Orthodox churches. It is generally thought that the threat of certain Moslem Government deputies to support the Opposition has something to do with this inhuman act of the Government.

Miscellaneous News.

Greece will be represented at the marriage of King Alexander of Serbia by the Minister for Foreign Affairs, M. Baltazzi, and the Minister of War, M. Theotokis. The Greek Royal Family will be represented by one of the Princes—probably the Crown Prince.

The remains of the French sailors who fell during the regrettable incidents in Athens in November, 1916, will be transferred to France on the 20th instant.

The military authorities at Adrianople have arrested a Turkish suspect named Arif Hassan who, it now transpires, is a Kemalist officer, and was proceeding to Macedonia on a special mission.

The Hellenic Government has protested to the Entente Powers against the massacres of the Christians of the Pontus carried out by the Kemalists.

An enthusiastic reception was given to the Greek troops by the inhabitants of Scala Nuova (New Efessos). The Kemalists, fearing a further Greek advance, burned down the big bridge on the road to Aidin.

BULGARIA.

Sofia, May 1.

Genoa.

Bulgaria is eagerly following the events that are taking place at Genoa. It has been stated in the local Press that the request of the Bulgarian Delegation for a hearing of the latter's claims relevant to the payment of reparations has been discussed by the Financial Sub-Commission, who have passed it on to the heads of the Conference. Such a piece of news has, of course, caused great satisfaction here, although it is not believed that the Allies will make any real concessions. The controversy between Mr. Lloyd George and M. Barthou does, however, encourage the Bulgarians to think that they may in some way benefit thereby. In so far as reparations go, England is gradually coming to be looked on as the best disposed of the Allies towards Bulgaria. The French point of view, as expressed by the semi-official *Temps*, certainly makes it appear that a great injustice is being done to Bulgaria by demanding both money payments and guarantees during 1922; but as it is gradually becoming known that the *Temps* does not represent the opinion of the French authorities in Sofia, Bulgaria is losing hope in France. The Italian point of view is already known, and so there remains only Great Britain. It should, however, be stated that no signs are as yet apparent which signify that Britain will be willing to grant Bulgaria any important concessions.

The Government and the Inter-Allied Commission.

The Inter-Allied Commission has requested a reply to their Note relative to the payment of reparations by May 20, but M. Stambolisky and M. Tourlakoff, Minister of Finance, are still at Genoa, and show no signs of returning to Sofia. In these circumstances, one is tempted to ask how the Government can reply by May 20. Certainly it has been foolish in asking for a delay till October, as the Commission cannot wait six months for an answer; but it would have been reasonable that a delay should be granted until at any rate the middle or end of June. If the Government agrees to the Commission's terms, that will necessitate a mass of new legislation being drafted. This cannot be done in two or three weeks, and much less can it be done when both the Prime Minister and the Minister of Finance are abroad.

It is understood that the Commission have refused to grant a delay beyond May 20, but their refusal probably means that on the appointed date, no answer will be forthcoming. The Commission will then be free to take whatever course they like, but commonsense

would dictate an early announcement of a month's delay.

A Bomb Outrage.

On Sunday, April 30, a fresh bomb outrage occurred. A group of young Communists and Anarchists had assembled in the town, with the idea of holding a meeting, preliminary to the annual manifestations of May 1. By the order of M. Daskaloff, Minister of the Interior, a squadron of mounted police was sent with orders to disperse the meeting. The Communists refused to disperse, and when charged by the police, threw a bomb. One policeman was killed outright, and another severely wounded. In addition, numerous civilians were killed and wounded, amongst the latter being six children. The police succeeded in rounding up the Communists and lodged them in prison. This afternoon the Communists are due to hold a big meeting, and it remains to be seen whether yesterday's events will be repeated.

Sofia's New Mayor.

The question on most Sofiotes' lips is whether the King will sign the Decree appointing M. Dungelnikoff Mayor of Sofia. Up to the present, the Mayor of Sofia has been elected by the citizens, but recently the Government decided to introduce a law which provides for the nomination of the Mayor by the Government. The law is to take effect as soon as the Royal signature is appended. It is argued in legal quarters that the Government's action is unconstitutional and that it is for this reason that the King has so far not signed the Decree. The situation is rendered the more piquant by the fact that the proposed mayor is a former café attendant.

The Bourgeois parties are up in arms against the selection of M. Dungelnikoff by the Government and several meetings of protest have been held.

Russian Refugees.

Some 20,000 civilian Russian refugees, quite irrespective of Wrangel's army, have temporarily found an asylum in Bulgaria. The League of Nations has now obtained the Government's permission for a further 2,600 to enter Bulgaria. These 2,600 refugees have been in Egypt and Cyprus for the last two years, and have been maintained there by the British Government. By the terms of the arrangement entered into with the Bulgarian Government, the League is going to take over the entire administration of these refugees. They will be lodged in the provinces and work will be found for them as soon as possible. The Government has already shown itself extremely tolerant towards Russian refugees, despite the many hundreds of thousands of Thracians, Macedonians, and Dobrujan refugees who are already in the country. This further proof of hospitality should not be lost sight of by those people who are constantly accusing Bulgaria of bad behaviour.

Sofia, May 10.

Note of the Inter-Allied Commission.

It is now only ten days before the date on which the Government must give a reply to the Inter-Allied Commission regarding the latter's Note concerning the payment of reparations by Bulgaria during 1922. The Commission still shows no sign of granting a delay for the giving of the reply, and as MM. Stambolisky and Tourlakoff are still at Genoa an absolute deadlock seems to have been reached. It appears that the Government do not wish to take any decision until the Agrarian Congress, which assembles at Sofia on May 28.

The point of view of the Bourgeois parties is not very clear. Their Press contents itself with remarking that the economic and financial policy of the Government is the cause of the present state of affairs, and it calls on the Government to resign. Up to the present time these parties have, however, produced no definite policy, and it is difficult to know what their attitude will be. They do not say whether it will be better for Bulgaria to accept or to refuse the proposals of the Inter-Allied Commission.

The Municipality of Sofia.

The question "Who is to be the future mayor of Sofia?" is becoming a matter of almost comical import. By the law of the country, Sofia is free to choose her own mayor, but some months ago a Bill was drafted which provides for the nomination of the mayor by the Government. A certain M. Dignikoff was chosen. This gentleman was formerly a waiter in a café, and although this does not preclude his being a perfectly good mayor his nomination has somewhat roused the ire of the bourgeoisie. The Bill appointing M. Dignikoff to the post has not yet received the Royal assent, and it is said that the King is very unwilling to sign.

Yesterday it was stated that the Government may withdraw the Bill on the grounds that it was not brought forward by the Agrarian party, but only by a few private members. Meanwhile in the recent school election held in Sofia, the Government only polled 2,000 votes against 9,000 Communists and 10,500 Bourgeois.

A Russian Plot.

The arrest of the Russian Colonel Samohvaloff at a Sofia hotel the day before yesterday has led to a bitter Press attack on General Wrangel's army. Colonel Samohvaloff is accused of having plotted with foreigners with a view to making a *coup d'état* in Bulgaria. Other officers of Wrangel's army are stated to be involved in the plot. General Vesmitinoff, the representative of Wrangel in Sofia, has emphatically denied all knowledge of this plot. Nevertheless the affair has made a nasty impression, and will do no good to the prestige of Wrangel's army.

TURKEY.

Constantinople, May 4.

Italo-Turkish Relations.

The conclusion of the Russo-German Treaty appears to have upset the nerves of more than one European Chancellery. A report to the effect that the British Government has protested to the Italian Government regarding the alleged conclusion of a separate agreement with the Angora Government, has been received here with the utmost astonishment, even by Italian official circles—unless Italian diplomatists are marvellous actors. As for the Turks, Hamid Bey, the official representative of the Angora Government in Constantinople, has strongly denied that any such treaty has been concluded, and has backed up his denial by pointing out that the Italian evacuation of the Sokia area was hardly advantageous to the Turks, since the region in question was immediately reoccupied by the Greeks, a circumstance which the Italians themselves must have clearly foreseen.

It is singular that ever since the Bolsheviks set the example in "open" diplomacy by publishing such of the secret Tsarist archives as it suited them to reveal, the ways of international diplomacy have become more tortuous than ever; and it would therefore be unwise to express an opinion on the subject of the existence of a Turko-Italian agreement. Nevertheless, it is hardly conceivable that if such an agreement has really been concluded, both parties would deny its existence with such vigour. After all, most treaties become public property sooner or later, and the denials in question, unless perfectly sincere, reflect not only upon the personal honour of the statesmen concerned, but upon the honour of the nations also. The utmost the most astute Government can hope to effect in the way of secret agreements is to conceal certain parts or clauses of a treaty. Even the negotiations for the conclusion of an agreement can rarely be kept secret, and it is worthy of note that no official Italian representative had been in Angora since the departure of Signor Tuoizzi, who failed to arrange an understanding between the Angora Government and the Consulta. Unless, therefore, there is overwhelming proof to the contrary, it would be unwise to believe the reports concerning the existence of a Turko-Italian treaty calculated to embarrass the British Government.

The Russo-German Treaty.

The Russo-German Treaty is a case in point, for it was known months ago that such a treaty was under discussion, and the intimacy of Russo-German relations has never been a secret for anyone. The almost inevitable corollary to the Russo-German Treaty would appear to be the admission of the Angora Government as a party to that pact, and although Hamid Bey has denied that this has already taken place, the special envoys of the Angora Government are already on their way to Moscow to open negotiations. The envoys are three in number: namely Jevad Abbas Bey, an officer who is deputy for Bolu, and until recently the unofficial representative of the Angora Government in Sofia; Colonel Emin Bey, and Dr. Riza Nur, who was one of the signatories of the Turko-Russian Treaty, and who was recently sent to Kharkov for the exchange of the Turko-Ukrainian Treaty concluded in January of this year. It is just possible, of course, that these events are nothing more than an elaborate *mise-en-scène* calculated to alarm the French and to lead the French Government to make still further efforts to make the British and Italian Governments toe the Kemalist line. It is more probable, however, that although such may be the underlying idea of the Angora Government, the admission of the Angora Government as a party to the Russo-German Treaty will be an accomplished fact in the near future. Such an achievement would be the first step on the part of the Kemalists to effect a re-insurance against possible Russian aggression by opening Anatolia once again to the development of German interests, with a view to pitting Russia and Germany against each other once again! In this connection considerable significance attaches to Hamid Bey's recent statement to the effect that the Angora Government is desirous of commencing negotiations for the resumption of commercial relations with Germany.

The facts of the situation should be tolerably clear now even to the least observant.

The Micro-Asiatic Movement.

Replying to an interviewer to-day, the Greek Patriarch unequivocally admitted that he had played an important part in the development of the Micro-Asiatic Movement, but he emphatically denied that the object of the movement is the annexation to Greece of Ionia. His Holiness insisted that the movement was solely and simply defensive in view of the inevitable extermination of the Christian population if the Angora Government establishes its authority over the whole of the occupied area. Ionia had become a refuge for the persecuted elements of the population of Anatolia, Christian and Moslem also, and it is impossible for the Greeks, in the Patriarch's opinion, to yield to the Angora Government, for they know only too well what that would mean.

It must be admitted that the methods practised by the Kemalists in the Black Sea area and in Cilicia are hardly of a nature to encourage those who wish the world to have faith in the guarantees which the Angora Government is so ready to give. To allege that the Greeks are committing all manner of atrocities in the occupied area is hardly a sufficient answer; for despite Kemalist evidence on the subject, the worst accusation brought against the Greeks by neutral investigators are exceedingly mild in comparison with the established record of the Kemalist Administration, which continues to make use of such homicidal maniacs as Osman Agha, the terror of the Black Sea area.

Angora and Stamboul.

The policy pursued by the Sublime Porte in regard to the Allied proposals has aroused the bitterest indignation of the Anatolian press. There is no need to quote any extracts, for readers of THE NEAR EAST should be familiar with the particular type of scurrility inspired by Mustapha Kemal through the official Anatolian Agency, but it is worthy of note that the *Yeni Gun* recently published a portrait of the Sultan side by side with that of King Constantine, with the rubric, "Two friends who are scheming for the destruction of the Turkish nation!"

ASIA MINOR.

Smyrna, April 22.

Yesterday the Italian troops evacuated Sokia and retired to the port of Scala Nuova (opposite Samos). The British residents and a considerable number of Greek residents also left. The Italians supplied the Greek civilians with uniforms, and aided their escape. A Greek force, numbering about 10,000, marched from Balajik to Sokia and eluded the Kemalists, and entered Sokia last night. The leading Turkish families have also left Sokia and crossed the Meander to the Kemalist zone. There was no fighting or loss of life.

H.M.S. 'Calypso' has arrived at Smyrna, and along with the 'Trinidad' will remain on guard duty. There are also two French destroyers and one Italian in port.

Smyrna, May 1.

Yesterday the Greek Army occupied the port of Scala Nuova, recently evacuated by the Italians, who landed there in May, 1919, just before the Greeks occupied Smyrna.

A Turkish cavass, in the employ of Messrs. McAndrews and Forbes, an American firm, has been severely wounded by Greek soldiers at Alasheir, whilst they were searching for arms.

Captain Buchanan-Wooleston and other officers of the H.M.S. 'Calypso' visited the ruins of Ephesus yesterday, journeying in an excursion train which took the Efsavia Society to Aidin.

Judge Linton Thorpe from Constantinople has arrived in Smyrna and will proceed to hear in the British Consular Courts, the lawsuits which have accumulated since the Armistice.

Smyrna, May 6.

The evacuation by the Italians of their "zone" in Anatolia having been accomplished without the slightest appreciable disturbance in Smyrna, H.M.S. 'Calypso' and H.M.S. 'Trinidad' have left for Constantinople. H.M.S. 'Tumult' (Lieut.-Commander Archer) remains as guardship. The Turks remain quiet on the south and east banks of the Meander with Moughla as their base. By taking over the Italian "zone" the Greeks have recovered two Ionian cities: Magnesia-ad-Meandrum and Priene, the birthplace of Bias.

INDIAN IDEALS.

Speaking at the Lyceum Club recently before the Oriental Club, Lord Meston said we had given our best to the peoples of India, by training them as we had trained our own youth on the philosophy of Bentham and Mill, awakening in them the passionate love of freedom which characterised our race. This had resulted in inculcating into them that racial consciousness which was now the dominant note in what was best in the Nationalist movement. He had regarded this national consciousness with scepticism and scant sympathy; but he was now a whole-hearted convert to it. Diarchy was not ideal, but it was probably the best form of constitution which could be evolved at present, and it was an honest effort on the part of those responsible for the ruling of India to help her on the road to self-expression.

During the six months ended March 31, 1922, the Jewish National Fund spent £E65,634 on the purchase of land in Palestine, £E2,930 on buildings, £E5,149 on planting trees, and £E18,722 on land-reclamation, chiefly in the valley of Jezreel. *Al Ahaly*, the Zaghoulst newspaper in Cairo suppressed for six months in November, 1921, for having published false news and misrepresented the Administration, has again been suppressed, after reappearing for two days.

Three cases of typhus were notified in the Jaffa district of Palestine during the week ending April 24, 1922.

INDIAN ECONOMY.

Lord Inchcape has agreed to act as Chairman of the Committee to be appointed by the Government of India on expenditure. The remaining members of the Committee and terms of reference will be announced later. Lord Inchcape will proceed to India in the autumn of this year to prosecute the enquiry. Instructions are being issued to the Departments of the Government of India to make every preparation which can expedite and facilitate the Committee's work. As a part of this preliminary work, the activities of each branch of the administration will be examined, for the purpose of considering not merely what economy in working can be effected, but also whether the value of the work performed justifies the expense incurred, and of formulating (in advance of the Committee's meeting) proposals for such reductions of outlay as may appear to be feasible, it being borne in mind that, in the case of any activities which, though desirable in themselves, may in the present financial situation be beyond the means of the Government, discontinuance or restriction may in the interests of economy, be desirable. When Lord Inchcape's Committee assembles, the results of such examination will be laid before it. In order that progress of this preliminary work by the administrative departments may be watched, an officer of the Finance Department is being placed on special duty for the purpose. Meanwhile, in order to determine what reduction of staff is possible at Army Headquarters, a small Committee is now, as part of this preliminary work, sitting in Simla, the Chairman being Mr. Innes (Commerce Member of the Viceroyal Council), and the members General Sir Havelock Hudson and Mr. G. G. Sim, I.C.S.

THE INDIAN ARMY.

The Secretary of State for India announces that a decision has now been reached as to the terms on which junior officers of the Indian Army who are surplus to future requirements shall be retired. The main feature of the retirement scheme are: (a) a gratuity of £850 for Subalterns and £250 for Captains with increments for each year of service in the rank held on the date when service for gratuity ends. The increment for Subalterns will be £75, and for Captains £150 a year, (b) in the case of those who do not wish to draw the whole gratuity at once an allowance at the rate of £200 a year for unmarried officers or £300 a year for married officers for any period not exceeding 3 years during which the main part of the gratuity remains undrawn. Free passage will be provided to any port in the British Empire to which an officer and his family may wish to go. The number to be retired has not yet been exactly determined, but it is unlikely to be less than two thousand. The officers affected are those the initial date of whose Indian Army Commissions for the purpose of promotion falls within the period January 1, 1915, to December 31, 1918, inclusive. All possible consideration will be given to any representation officers may make on their own case, but the paramount consideration in the selection of officers for retirement will be the requirements of the service. The India Office and the Government of India are prepared, as far as possible, to advise officers who may be retired as to the best means of obtaining reliable information about careers in other parts of the Empire. Full particulars as to the terms are available on application to the Secretary, Military Department, India Office, Whitehall, and will be forwarded without application to all Indian Army Officers affected who are known to be at present in the United Kingdom. Such officers need take no action except in accordance with any instruction that they may receive.

BY AIR TO THE EAST.

Proposals by Commander C. D. Burney respecting a commercial line of airships to India and Australia have been considered by the Air Ministry during the past two months, and Commander Burney has now received a letter from the Ministry stating that, in the opinion of the Air Council, the scheme as now put forward by him constitutes a notable advance upon any other scheme of the kind which has previously been submitted to them. They point out, however, that any undertaking involving the regular use of airships as a means of communication must necessarily be of a highly speculative nature, especially from the commercial point of view, and at this stage they are unable to make any statement regarding the financial aspect of the scheme.

The Irish Guards, who recently arrived at Constantinople, last week made a ceremonial march through the main streets of the city.

PRESS ON THE NEAR EAST.

In consequence of queries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

France on Islam.

Under the above heading a writer in the *Outlook* of April 22 had an article which suggests that France's position in the eyes of the Islamic world is by no means so secure as is sometimes believed. He refers to the French President's "stage-managed" North African visit as "good propaganda," and to the fact that "Englishmen, whose most cherished belief ten years ago was that we, and we alone, had learnt the secret of dealing with Mohammedan peoples and subject races generally, can now be heard arguing that the methods of France towards her Moslem subjects are far more successful than ours, and instance the perpetual calm that reigns in French North Africa as compared with the chronic unrest in Egypt." But he continues:—

The truth is that the French governing clique is profoundly disturbed about the situation in Algeria and Tunis; in Morocco there is less reason for anxiety since the country is still administered by the great feudal chieftains who do not object to the French Protectorate so long as they are left free in their relations with their followers. The other Protectorate, Tunis, is in a highly unsatisfactory condition. The Tunisian extremists are said to be in close contact with Stamboul and the propinquity of the Senussi helps to stiffen Islamic feeling amongst the lower classes. French observers testify to the "revolutionary spirit" that is abroad, and express satisfaction that at last a "strong" policy is being put into effect. The Tunisian Government has been forced to act very much as we have in Egypt; it has been found necessary to exercise a strict control over the native press, and any paper preaching sedition is suspended. If the unrest were confined to Tunis there would not be so much reason for anxiety. But Algeria itself, the foundation of the imposing fabric of empire the French have built in Africa, is contaminated. The Mohammedan population is showing a spirit which, if it continues to develop, will mean the end of the French domination in North Africa.

French policy in Algeria at one time aimed at the colonisation of the country by immigrants from France. This has failed, for to-day, while the total population is over five millions, only 620,000 of these are Europeans, and of the Europeans only 278,000 are of pure French extraction. Added to this the Mohammedans, mainly Berbers, are increasing far more rapidly than the colonists, at the rate of no less than 60,000 a year. So long as the natives were content to remain in the condition of a subject race the numerical superiority did not so much matter. But their agitation for better treatment resulted in a change of policy which was embodied in the law of 1919. This enfranchised the Berbers, and resulted in the swamping of the 140,000 French electors by nearly half a million natives. Had the Moslem population, as French journalists would have us believe, been Gallicised, and were it thoroughly loyal to France, this would not have mattered. But in spite of the efforts France has made to attract the sympathies of the world of Islam, shown in various ways, some praiseworthy, as in the provision of a Mosque and Moslem Institutes in Paris, others less reputable, as in posing as the friend of Islam, in contrast to the equivocal attitude of our Government, she has not even succeeded in winning over the North African Berbers who remain Nationalist, xenophobe, or whatever label you choose to attach to the frame of mind which shows itself in a disinclination to accept the rule of a foreign race.

And he goes on to state that "the result of the law of 1919 has been to create a definitely nationalist party, as definitely anti-French as the Egyptian nationalists are anti-British." He concludes:—

Trouble is made in various ways. In the towns, by means of strikes, Communist propaganda (the Native North African Proletariat through its representative adhered to the Third International at the Tours Congress), demonstrations, and the methods with which we are so familiar. In the country districts the natives are all armed, and though efforts have been made to call in all arms they have met with scant success. Public security in the provinces is not so good as in Egypt. The local French officials with their reduced powers are unable to cope with the situation. In Oran nine-tenths of the crime goes unpunished, and Oran is not peculiar. The French colonists are selling their lands in disgust, and their places are being taken by Berbers, thus hastening the decline of French influence and prestige.

But we need not continue the story. Enough has been said to prove that the loyalty of the North African natives to France is not so secure as some would believe, that *la France de la Victoire* can in her strength boast no immunity in North Africa from the unrest which has afflicted Egypt and other Islamic countries. Her plight is in reality far graver than ours. We have never pretended in Egypt to do more than administer the country until such time as the Egyptians reached the happy state of being able to do it for themselves. France has undertaken to make Algeria a part of herself, and she has failed. The Berbers have refused to become French citizens, and the old particularist North African spirit, which even Rome was unable to overcome, is now cropping up again as determined as ever. We can leave Egypt and be the stronger for it. But the whole scheme of French world policy, resting on military might, depends on the help that her African Empire can give. And now Algeria, of which it is the corner stone, is becoming anti-French!

The Situation in Egypt.

The New Statesman of May 6 contains an article on "The Egyptian Situation." It begins by saying that though there is good cause to hope that Sarwat Pasha's Ministry will be able and willing to hold the extremists in check, it must not be supposed that the Egyptian question is already settled once and for all. It then briefly reviews the causes of the unrest in Egypt since the Occupation, giving first place to foreign intrigue, religious fanaticism, and the unsuitability of certain officials in charge of Egyptians. It concludes:—

I think if we add to the above considerations the pervading feeling of the upper classes in Egypt that they are as capable of managing their own affairs as other nations already granted independence, or striving by violent means to gain independence, we shall have explained in some fulness the turbulent opposition with which English control in that country is being met at the present moment. A system of intimidation has been introduced in the towns which gives the country the appearance of being united to an infinitely greater extent than is really the case. Indeed, it cannot be said to be united at all if we take into consideration the feelings of the fellahen, who are the truest representatives of Egypt, and form at least two-thirds of the population, and I think we may add to them the merchants and lower classes of the town dwellers—with the exception of the few who are ready to break out into hooliganism at any favourable opportunity. I verily believe that, if it were possible to obtain a free plebiscite, the cry for autonomy and the expulsion of the British from Egypt would be found to proceed from the mouth of not more than five to ten per cent. of the whole population. The fellahen only desire to cultivate their land in peace. They have no taste for politics,

and their ignorance may be judged from the fact that one of them, learning from me that there are rivers in Europe, exclaimed, "Rivers in Europe! Then why do they say that the European nations come and wrangle over the Nile in Egypt because they can't get any sweet water to drink at home." Another one shouted out as I passed him, "*El Ingleez taiyibeen, el fellaheen taiyibeen, kullina taiyibeen*" ("The English are good people, the fellaheen are good people, we are all good people"). Those words told a story. Someone had been trying to influence him against us and his reply had been: "Leave us in peace; all is well." The generation which remembers the evil rule of the pashas is passing away, but the saying quoted by Lane in his *Modern Egyptians* must still be familiar to the fellaheen: "Give me the tyranny of the Turk rather than the justice of the Arab." The Judicial Adviser used to receive innumerable letters in pre-war times begging that it might be arranged that cases in which the writers were involved might be tried before courts where English judges were sitting.

If all European supervision is removed, will the fellah get his fair supply of water from the Nile? Will he again be overburdened with taxes as in the days of the earlier Khedives? Will he be able to stand up for his rights in a way he was not able to do before? Have the higher classes, the pashas and the beys, grown less selfish and greater lovers of justice? Experience alone can show, but I fear the fellah will have no new weapon. He is as he was, resourceless and without that education which he can never have so long as the language of literature remains distinct from the dialect which he speaks, and it is a matter of religion to keep it so because of the affinity of the written language to that of the *Koran*.

But however this may be, the time seems to have arrived when we must give the Egyptians a chance of showing whether or not they are fit for self-government without more than a moral control from outside, and if the leaders of the present agitation are wise they will accept that moral control in the form of a few carefully chosen, tactful and sympathetic advisers, subordinate to the authority of the native Ministers. But if the choice of these men is left to Egypt we shall not, of course, be able to insist that they shall be of British nationality, and I am afraid that many of the present leaders would prefer any nationality to British. Foreign

engineers and experts generally will also be required as before. The Egyptian has yet to be born who can plan a barrage or initiate any important irrigation work.

It may be argued superficially that it is not our business whether the Egyptians govern themselves equitably and intelligently or not. If a nation misgoverns itself, be it even a nation of savages, that, it might be said, is its own affair. But, however true this may be, as a general principle the fact that the Suez Canal which flows through Egyptian territory is a great trade route for all nations between the Mediterranean and the Indian Ocean, brings it about that in this matter the interests of the British Empire are identical with those of the whole civilised world. I do not see, in these circumstances, how it will be possible to leave the country without a foreign garrison—at least in the Canal zone—however completely the control of their internal affairs remains in the hands of the native population.

CAIRO-BAGHDAD MAIL.

In the House of Commons on May 4, in the course of his opening statement in connection with the Post Office vote, Mr. Kellaway, Postmaster-General, referred in very complimentary terms to the Cairo-Baghdad Air Mail Service. He said:

"The most successful of all the air mail services with which this country is associated is that from Cairo to Baghdad. A letter sent from London to Baghdad in the ordinary way takes from 28 to 30 days; sent by air service, it takes only 12 days. The fee charged is only 6d. per ounce, the ordinary fee being 3d. Ten per cent. of the whole Baghdad letter mail is now being sent by air, and the efficiency and reliability which the Air Ministry has reached in this service will, I think, assure in the future that there shall be a great expansion in the use of the air mail in that district. I visualise the time when throughout the Empire we shall be able to provide air services which will make just as great a saving in time as that which the Air Ministry has succeeded in making between Cairo and Baghdad. No man can put any limitation to the possibilities of this service, and the fact that accidents have happened, that the percentage of reliability has not, so far, been very great, is no proof that the Air Ministry and those companies which have with great audacity invested their capital in these services will not succeed in doing for the whole of the Empire what the Air Ministry has succeeded in doing between Cairo and Baghdad. A Civil Aviation Advisory Board has been formed by the Air Ministry, with a representative of the Post Office upon it, and this is its first business:

'To consider the cost and the practicability of setting up an Imperial Air Mail Service.'

They are first directing their attention to the Cairo-Baghdad and the Baghdad-Bombay sections of a possible future Imperial air route to India and to Australia."

MONGALLA PROVINCE.

After spending a short time in Mongalla Province on his recent visit to the Sudan, Lord Allenby sent the following telegram to the Governor:—"I have great pleasure in expressing to you my complete satisfaction with everything I have seen in your Province. My visit has been most enjoyable and the trouble you have taken to ensure its success reflects great credit both on yourself and the members of your staff."

AMERICAN SUPPORT OF ZIONIST POLICY.

Judge Bernard Rosenblatt of New York, the American member of the Executive Committee of the World Zionist Organisation, in view of the resolution passed by the United States Senate endorsing the Zionist programme and the Balfour Declaration, has telegraphed from Jerusalem to Senator Lodge as follows:—"On behalf of my colleagues of the Palestine Executive accept our sincere thanks for the splendid action of the United States Senate in vindicating the Balfour Declaration and thereby maintaining the tradition of America as the protector of oppressed peoples and small nationalities."

MUSICAL NOTES.

GRAMAPHONE RECORDS.

The May issue of "His Master's Voice" 12-in. records, though smaller than usual, is more worthy, for it contains nothing that is not of musical or of technical interest. First in importance, and I suppose in popularity, are the two double-sided discs made from numbers of the revised version of "The Beggar's Opera." Of the times that I have seen this delightful work at the Lyric Theatre, Hammersmith, I have lost count, and, although these records are a very real delight, they will not inhibit my going many times more to the work. But in the meantime they are a most enjoyable substitute. On one side of the first disc are given "Thus gamblers united in friendship are found," sung with buffoon exaggeration and admirable merriment by Scott Russell and Tristan Rawson, "Can Love be controlled by advice?" which, though not too well sung by Kathlyn Hilliard, who is by no means so perfect a Polly Peachum as was Sylvia Nelis, is a gem for the sake alone of its beautiful accompaniment, and the famous "Lillibulero" tune—"The Modes of the Court so common are grown"—it is with delicious fitness that the arranger, Mr. Frederic Austin, has "uncletobied" this tune, giving it a whistling chorus, and here in reproduction, sung by Frederic Ralanow, F. Davies and Chorus, it is a witness to that perfect unanimity which makes the artistry of the present performers of "The Beggar's Opera" unassailable. As I say, the production at the Lyric is perfect in all parts, and in the subsidiary parts this perfection is especially noticeable. On the other side of this disc, there is, for example, "Why, How Now, Madame Flirt," done with the most spirited distinction by Dorothy Smithard and Phyllis Blackburne; and there are also "O cruel, cruel case," in which the noble *timbre* of Frederic Ralanow's magnificent voice is reproduced with quite extraordinary fidelity, and "I'm like a Skiff on the Ocean Tost," which I personally consider one of the finest things in the opera, and although here Violet Marquesita's marvellous grace and rhythm are not quite adequately suggested, this record is one particularly to treasure.

One ought to say something on the orchestra which supplies the basis of all these records: for Frederic Austin has not only scored the opera with unerring skill, he has secured an orchestra every member of which is a master, or rather mistress, both individually and in *ensemble*. It is pleasing indeed to have their efforts so well reproduced on the records. The second of these two discs contains, on the one side, "Man may escape from Rope and Gun," sung by Frederic Ralanow with that singular reserve of tragi-comic suggestion that is one of his most priceless qualities, "Thus When a Good Housewife sees a Rat," typical fun that is fully exploited by Violet Marquesita, and "The First Time in the Looking-glass," in which Ralanow indulges in the richest, most sumptuous buffoonery; and, on the other side, "The Turtle Dove with Plaintive Crying," which Kathlyn Hilliard sings to the accompaniment, drenched in beauty, of harpsichord, viola d'amore, and viola da gamba, an orchestral "Interlude" by Frederic Austin, which is a masterpiece of scoring, and "Old Simon the King," another testimony to the worthiness of the less important members of the cast and of the chorus.

These two records are almost an unalloyed pleasure to listen to, and he who can dispense with them must be an unfortunate man indeed.

But there are also other excellent things in this May issue, of which, for myself I like best the Flonzaley Quartet in the *assai agitato* movement of Schumann's Quartet in A major, Op. 41, No. 3. The balance in the Flonzaley's tone is a constant wonder, their individual tone, the matchless sonorities at their command, and their sense of tonal values are so inexpressibly lovely as to slip from one's memory to dreams. And their phrasing in this particular movement reveals the sounds of heaven.

No doubt many will buy the record that Rachmaninoff,

who is now playing in London, has made of his own arrangement of Kreisler's "Liebeslied," and indeed it is a well reproduced work of splendid, unaffected pianism, but it is a rather dull piece all the same, and though the variations make a good show they are not really masterly.

The record that Elgar has made of his own wonderful orchestrated version of Bach's Fugue in C minor is a little disappointing. It was Goossens who first introduced this version, and made it the rage of England, and at anything less thrilling than his reading one is now inclined to look a little askance. In any case, this record shows Elgar as conductor in subdued mood, and the magnificent dynamic possibilities of the work—that part of the end climax, for example, where the harps sweep up—are insufficiently exploited. But the lower parts are not very well reproduced: perhaps such full scoring demands a little more than the gramophone is at present capable of. On the reverse side of the Fugue is the delicate little ballad from Elgar's "King Olaf" (Little Bird in the Air). It is instinct with Elgar's grace, but its harmonies are not quite free and original.

Of the fourth movement, which Sir Landon Ronald has recorded on a double-sided disc, of Dvorak's "New World Symphony" I do not think very highly. It is well reproduced, particularly in the wood-wind, but the work itself is dull and the themes soon grow threadbare.

The two best vocal records are Martinelli in "Lontan, lontan, lontan da me ne andaste," from Tchaikovsky's "Eugène Onégin," which is notable not only for the pure tone, the fine passion, and the dramatic power of the singer, but for the unusually discreet and artistic accompaniment of the orchestra; and Galli-Curci in "Come per me sereno," from Bellini's "La Somnambula." Here Galli-Curci, though she has one superb shake, shows herself as something much more than a technician, for her phrasing is very beautiful, her sustained note purity itself, and her *pianissimo* exquisite. One hopes she will not long delay a visit to this country.

ANDANTE.

NEMESIS.

Our Athens Correspondent, writing on April 30, sends us a story, the resemblance of which to one told by "Corsair" in "The Caravanserai" on April 6 will no doubt be noticed by many of our readers:—

The Greek papers have been so full of politics lately that a most hideous murder, almost unparalleled in the annals of crime, which was committed a few days ago near Grevena, in Western Macedonia, passed practically unnoticed by the public. In the small village of Spilio, fifteen years ago, lived a family composed of the father, the mother and two children—a boy and a girl. They were very poor, and at the age of thirteen young George, not wishing to be a burden to his father, emigrated to America. Fortune was kind to him as was proved by the cheques which reached the old folks at home regularly each month. At the end of fifteen years George, a rich man now, decided to return to his native village. Arriving at Grevena one morning last week, he left immediately for Spilio. As the village where his sister—now a married woman—was staying was on the way, he called on her to give her various presents he had brought from America. Before leaving, however, George told his sister that as in all probability his old parents would not recognize him after so long an absence he intended to play a little joke on them. He would tell them that he had been working with their son in America, that they had always been inseparable friends and that he (the son) had given him twenty thousand drachmae for his old parents. George was not mistaken: neither his father nor his mother recognized him. On hearing, however, that the stranger was their son's friend they received him hospitably, and as it was getting late asked him to stay in their house for the night. After dinner the supposed friend, who had decided not to reveal his identity until the following morning, produced a huge wallet full of banknotes and counting twenty thousand drachmae handed the money to the overjoyed couple. A few hours later George was fast asleep in the best room of the house, but the old people had already made their satanical plans. They would do away with their guest and appropriate the contents of the "fat" wallet. Both armed—the father with an axe and the mother with a hatchet—they entered cautiously their son's room and after putting into execution their dastardly project and taking possession of the wallet, buried the body in their garden. When on the following morning, the murdered man's sister visited her parents and enquired after George the terrible truth dawned upon the criminal couple. The mother promptly stabbed herself to death, while the old man was arrested and is now in prison at Grevena awaiting his trial.

NEAR EAST BOOKSHELF.

THE PALAEOPATHOLOGY OF EGYPT.

"STUDIES IN THE PALAEOPATHOLOGY OF EGYPT." By Sir Marc Armand Ruffer, Kt., C.M.G., M.D. Edited by Roy L. Moodie, Ph.D. (Chicago: University Press.)

Edited by a distinguished American anatomist, well printed, and illustrated by many excellent plates, "Studies in the Palaeopathology of Egypt" by the late Sir Marc Armand Ruffer is a book which deserves to find a place in all the scientific libraries of the world, even if the interesting subjects of which it treats are dealt with in a fashion perhaps too technical to appeal at first sight to the general reader. The editor of these collected papers of the late Sir Marc Armand Ruffer, Professor Roy L. Moodie, of the University of Illinois, tells us in his preface that the author had intended to retire in 1919, in order to devote himself to the preparation of a book embodying his researches in the diseases of ancient Egypt; and anyone reading these studies, which represent the raw material accumulated for the production of the work contemplated, will realize that Sir Marc's untimely death in 1917 deprived the world of a classic in a branch of science still in its infancy, but which one feels is destined in the future to exercise a considerable influence over those others with which it is closely allied. Palaeopathology is the name given by Sir Marc Armand Ruffer to the science which is concerned with diseases afflicting man in the pre-historic and early historic periods, hence it is one which students of anthropology, medicine, geology, geography and history cannot even now afford entirely to ignore.

Of man regarded as one of the higher vertebrates we perhaps heard more than enough in the latter part of the last century; the story of his development into a social being, laboriously pieced together by a whole generation of scientists, has recently supplied Mr. H. G. Wells with one of his "best sellers," while of his history during the brief period which has elapsed since he first learnt the art of recording it intelligibly we know more and more every day. The study of man whether as an animal or a social being was indeed never more popular than in the present day, when discussions on his origin, his nature, his powers, and his limitations, occupy the thoughts of the speculatively-minded to an extent undreamt of a few years ago. It is thanks to the late Sir Marc Armand Ruffer that we are now privileged to view man in yet another aspect, since in these "studies in palaeopathology" he is presented to us in his character of the eternal patient—the afflicted being burdened with the load of constitutional disease by Nature, exasperated at the disturbance wrought in her ordered scheme of things by the process we have deified under the name of civilization. From the sketches of men who existed in prehistoric times in many parts of the world much has been already learnt of the diseases from which they suffered and of the injuries to which they were liable in peace and war; but the field covered is necessarily limited since the proportion of diseases involving the bony structures of the body is relatively small in proportion to those which leave them unaffected. It is practically only in Egypt that the study of the diseases coming under the latter category and prevalent among the ancients is possible, and we may be thankful to Fate which brought to that venerable land the great pathologist whose labours are recorded for us in this book. The many technical difficulties which had to be overcome

before success was achieved are explained in the passages in which are described in great detail the laboratory processes employed by him for preparing for microscopical examination the tissues of men embalmed in some cases as far back as 5000 years ago. How much the ancient Egyptian practice of embalming the dead has already assisted the modern study of disease is nowhere more strikingly demonstrated than in the chapters of the book dealing with the condition of the arteries of mummified corpses of the XVIIIth Dynasty examined by Armand Ruffer. The facts set forth in these chapters demolish practically all the theories at present current among medical men regarding the etiology of arterial degeneration, disposing at the same time of the belief that this disease is essentially one of modern life. From this alone we can judge the value of the researches of Sir Marc Armand Ruffer in the new field of science opened up by his enterprise, and one hopes that men to follow him in the work will not be lacking in the future, even if the prospect of making any further discoveries concerning the diseases of ancient Egypt does not appear very hopeful. The havoc wrought in her tombs by the plunderers and collectors who were suffered to rifle them unchecked for so many years cannot be undone, and to collect any great numbers of mummies for pathological examination would not now be possible.

The non-medical reader who may make the effort needed for reading this highly technical work may be promised a reward in the train of thought its study must inevitably set in motion in the minds of all to whom the world of imagination is as important as the world of reality. In all the speculations regarding the problem of the antiquity of man, his adaptation to changes in his environment, his migrations, and his spiritual and material development, disease as an influencing factor had been to all intents and purposes ignored until the late Sir Marc Armand Ruffer reminded us that man in common with all living things on the planet has had to struggle for his existence against disease among the myriad forces Nature has ceaselessly ranged against him. Evidence is every day accumulating that more than one branch of our species widely distributed over the earth for a period became extinct in time. How? and why? we are left to guess, but it is not unreasonable to suppose that disease was the determining factor, and that the micro-organism has played a part in the history of man no less important than climate. The ravages of the parasitic disease, sleeping sickness, in Central Africa in recent years has had a marked influence on the distribution of population in the continent, and the influence of epidemic disease on history can hardly be exaggerated. But apart from these wholesale visitations, the prevalence of particular diseases among particular races of men inhabiting certain areas of the world in the past may have had a considerable influence in shaping the destinies of the race as a whole. In Egypt prehistoric man found abundance of food and easy communications; civilization developed rapidly and a mighty empire arose on the banks of the Nile. But while these things were happening the race was becoming enervated by the climate and its increase was checked by disease. Long life appears to have been the portion of few of these people. Among the well-to-do arteriosclerosis took a heavy toll, among the poor osteoarthritis, and nearly all of the ancient Egyptians, Sir Marc Armand Ruffer seems to think, had more than their fair share of dental troubles—all this suggests the steady physical deterioration of the ancient Egyptians until the time when with the conquest of their country more vigorous strains were introduced into the population. Man as a distributor of disease hardly comes within the scope of this work, which confines itself to recording the signs of morbid change found in human remains belonging to certain periods in the history of Egypt, but one doubts not that every tribe, laid under toll to provide the country with the slaves who formed such a considerable portion of its

FRENCH SELF-TAUGHT, GRAMMAR WITH KEY

By J. LAFITTE, B. es L., Principal French Master, City of London School.

For learning the Language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road, and Sea, Cycling, Motoring, Post, Telegraph, &c. Commercial, Naval and Military Terms, &c., Conversations, so arranged that they may be learned AT A GLANCE, with ENGLISH PHONETIC PRONUNCIATION, Tables of Money with Illustration of Coinage, &c.

A course of simple and practical lessons in the Grammar and construction of the French language, progressively arranged and fully illustrated with model sentences; useful exercises throughout, and an Alphabetical Vocabulary.

Crown 8vo., 316 pp. Green Cloth, 6s. net. Postage 4d. extra.

Sold by all BOOKSELLERS. Write for Prospectus & Catalogue No. 25, post free. London: E. MARLBOROUGH & Co., 51, Old Bailey, E.C.

population when the Empire of the Pharaohs was at its zenith, contributed its quota of disease to the common stock. It is interesting to note that Sir Marc Armand Ruffer was able to demonstrate the presence in a mummified corpse of the XXth Dynasty, of the ova of *Bilharzia Hoematobia*, a parasitic disease which, although of wide distribution, is only found to be greatly prevalent in Egypt, which is generally regarded as the country of its origin.

The reflections raised by the perusal of this interesting contribution to the literature of a profession probably as old as the human race bring one to the conclusion that in spite of the pessimists, we have every reason for congratulating ourselves that we are living in days when man's power for combating disease has been raised to the highest capacity it has so far reached in the history of the world. With the science of preventive medicine wholly unknown civilization nevertheless succeeded in maintaining itself for about five thousand years in the Nile valley, and if it survives the Genoa conference, who knows but it may not succeed in persisting into the remote future developed to a pitch far beyond the capacity of our imagination ever to grasp?

E. H. B.

A BURMESE BACKGROUND.

"THE GREEN MOTH." By G. E. Milton and J. G. Scott. (London: Murray. 7s. 6d. net.)

The fact that Sir George and Lady Scott are able to make obvious to the reader all through the reality of their knowledge of life in Burma alone makes this novel worth reading for those who like to be satisfactorily transported into a strange land or to renew their acquaintance with old haunts.

There is plenty of adventure, too, in the story of Darya Molineux, who, to hide her disappointment and sorrow after a tragic experience, went back to her Burmese foster-mother and tried to live in Burma without mixing with the European residents. We must confess that when, at the very beginning, Tom Marjoram carries Darya—who has sprained her ankle—across a rope bridge and announces in the middle that he is going to kiss her and that if she struggles they will fall into the torrent, a dismal recollection of a type of novel in which one is evidently expected to admire this kind of action made us fear that this was the introduction to the domineering hero. It was a relief to find Marjoram cast for the part of chief villain—there is a good crowd of Chinese villains as well—and to see his plans to carry Darya off in his launch frustrated by the matter of fact but noble hearted Deputy Commissioner who leads the heroine away to the conventional happy ending.

SIR PERCY SYKES ON PERSIA.

Lecturing before the Central Asian Society at the Royal United Service Institution on Thursday, Sir Percy M. Sykes told the story of the events in Persia during the war, and his own part in them. Persia, he said, was a neutral state; but her troops were of little military value, and her grandees cared only for making money certainly out of one belligerent, if possible out of two or even three. The inevitable result was that during the course of the war there were few provinces of Persia that did not hear the tramp of alien troops. The attitude of the Persian Government towards himself was friendly so long as it appeared that the Allies were winning, but when in the spring of 1918 Germany made her last great advance, a change took place, and an official declaration was made that the South Persia Rifles were a foreign force and a menace to Persian integrity—this same force they had congratulated him upon a year before, thanking him for restoring the Persian Government and establishing order. He thought the various missions that the British Government had sent into or across Persia had served a purpose in protecting India. If the Germans had got through to Tashkent in Russian Turkestan, they would have found there enough prisoners of war to make two divisions, and they could have equipped these troops and invaded India. A good deal of constructive work was done by the British in Persia during the war; amongst other things a very fine road had been made from the Persian frontier to Hamadan, and, after the armistice, another most wonderful road had been made from Bushire to Shiraz. This had been constructed by General Douglas. In the district immediately under Sir Percy Sykes' own command a very large mileage of tracks had been opened up for wheeled traffic.

In the discussion that followed Lord Lamington said it was a deplorable thing that the South Persia Rifles had not been maintained; but the Indian Government could not find the money, and the Persian Government would not, and so the force had to be disbanded.

Sir Hugh Barnes said that an achievement which still remained was the railway from Nushki to Seistan, making connection between the Indian railway system and the Persian border. But he had read a report from India that it was proposed to pull up the rails and dismantle this line. He hoped such a retrograde proposal would not be adopted; for whatever happened the Nushki-Seistan railway was bound to be of great value in the future. Only four hundred miles separated it from the Russian Trans-Caspian line; if that gap was bridged there would be practically railway communication between India and Europe.

EASTERN PAINTINGS.

An exhibition of Indian and Persian paintings is now open to the public in the Oriental section of the exhibition gallery of the Department of Prints and Drawings at the British Museum. In addition to the main collection, which consists of Persian and Indian paintings (chiefly of the Mogul School) of the 16th and 17th centuries, examples are shown of paintings from Nepal, Eastern Turkestan, Tibet, and Siam, with a few specimens of the contemporary Calcutta School. The exhibition will remain open through the summer and autumn.

"AFRICA AND THE EAST."

Anyone who has travelled in lands in which the Church Missionary Society is at work must surely recognise the value of that work and the splendid spirit of the men and women who carry it on. The Society is now (from May 17 to June 15) holding an exhibition, "Africa and the East," at the Royal Agricultural Hall, Islington; and those who have had no opportunity of seeing its work abroad are thus enabled to form a very good idea of its activities, and to do a great deal of interesting sight-seeing at the same time. India, Egypt, the Sudan, and Palestine are all represented here, to say nothing of lands farther afield, such as China and Japan, which lie outside the scope of this paper; and one and all will repay a visit. We cordially wish the Exhibition all the success it deserves, and trust that it will be the means of furthering and helping greatly the fine work of the C.M.S.

ARABS AND ZIONIST RULE.

The Arab Delegation from Palestine was received on May 10 in the House of Commons at a largely attended conference, consisting of members of the two Houses of Parliament. The meeting was organized by the National Political League. The following resolution, moved by Sir W. Joynson-Hicks and seconded by Captain Elliott, was carried with two dissentients:—

"That this conference of members of both Houses of Parliament, supported by the general public, considers that justice to the Palestine Arab case demands—(1) A national self-government of Palestinians within the terms of the British Mandate; (2) abolition of the Zionist Commission in Palestine; (3) the approval of Parliament of the terms of the Mandate when finally settled by the League of Nations; and requests the members of both Houses in sympathy with the Arab cause to approach the Prime Minister and the Colonial Secretary to press these views upon the attention of the Government."

Sir Herbert Samuel, High Commissioner for Palestine, entertained the Palestine Arab Delegation, now in London, at dinner at the Reform Club in the same evening. Lord Milner was among those present.

Ramadan 21, 1340 A.H. of the Moslem Calendar.

Iyar 20, 5682 of the Jewish Calendar.

Lady Islington arrives in London to-day from Paris.

Mrs. Jack Hubbard has returned to 6a, Pont Street, from Cairo.

The Albanian Minister has taken 8, Onslow Gardens, as his residence.

Mgr. Fan Noli, the Albanian Minister for Foreign Affairs, has resigned.

The Maharaja Jam Sahib of Nawanagar has arrived in London from India.

Lieut.-General Sir George and Lady Barrow have arrived in England from India.

The Bishop of Madras, with Mrs. Whitehead, landed at Plymouth last week from Bombay.

Lieut.-General Sir Aylmer Haldane has arrived at 19, Talbot Square, W.2., from Mesopotamia.

M. D. Frangopoulos, Commercial Attaché at the Greek Legation, has returned to town from Paris.

Mr. Ronald Storrs, Governor of Jerusalem, arrived in England last week on three months' leave of absence.

Mr. H. Lock, General Manager of the Bank of Roumania, has left London on a visit to Roumania.

Lady Rawlinson, who has arrived on a six months' visit from India, will be at 56, Cadogan Square until the end of the month.

It is stated that the King of Egypt will go to Alexandria early in June, and thence soon afterwards to Europe to visit various European capitals.

M. Nicolas Misu, Secretary at the Roumanian Legation, left London during the week-end for Brussels, to take part in the Hard Court Tennis Championship.

Prince Nicholas of Roumania left London on May 14 for Bucharest, in order to attend the wedding of King Alexander of Yugoslavia and Princess Marie of Roumania.

The engagement is announced between Captain E. H. Baxter, 5th Fusiliers, eldest son of Mr. and Mrs. Ernest Baxter, of Rainhill, Lancashire, and Florence Henrietta, elder daughter of Mr. and Mrs. Millar M. King, of Calcutta.

The Cairo correspondent of the *Morning Post* states that the King of Egypt has awarded the Grand Cordon of the Order of the Nile to Mr. R. S. Patterson, who has just retired from the post of Adviser to the Ministry of Education.

At the invitation of the Bulgarian Government, a delegate of the International Labour Office, M. Max Lazard, has left for Bulgaria to make an examination of, and present a report on, the working of the Law on Compulsory Labour, which has now been in operation for two years.

Under the auspices of the East India Association, Sir Valentine Chirol will read a paper on May 22, at 3.30 p.m., on "India in the League of Nations: What she gains." The meeting, which will be presided over by Sir Thomas J. Bennett, C.I.E., M.P., will take place at the Caxton Hall, Westminster.

The engagement is announced of Lieutenant-Commander Harold Francis Beckham Handley, R.N., son of Mr. F. F. Handley (I.C.S., retired) and Mrs. Handley, of Handley Cross, Cheltenham, and Evelyn, only daughter of Commander G. S. Walsh, R.N., and Mrs. Walsh, of Douro Lodge, Cheltenham.

Last Sunday, at Jews' College, Queen's Square House, Guildford Street, W.C., Mr. Israel Cohen, the Director of Publicity in the Zionist Organization, gave a lecture for which he chose the title of "Mr. Belloc and other contemporary anti-Semites." The meeting was under the auspices of the Anglo-Palestine Club.

The Calcutta dinner will be held at the Hotel Cecil on May 30. Lord Cable will preside, and the Right Hon. the Earl of Ronaldshay, P.G., G.C.S.I., will be the guest of the evening. For tickets (£1 is. exclusive of wines) application should be made promptly to Mr. Walter Davies, Hon. Treasurer, Downinhurst, Ealing, W.5.

Over two hundred and fifty guests were present at the banquet given to Sir Gilbert Clayton, the retiring Adviser to the Egyptian Minister of the Interior. They included Sarwat Pasha and all the Cabinet Ministers, three former Prime Ministers, the King's Chamberlain, and all the Governors and notables from every province in Egypt.

Under the auspices of the India Society a lecture will be delivered at the Victoria and Albert Museum on May 19 by Professor J. Ph. Vogel (late Superintendent, Archaeological Survey of India) on "The Relation between the Art of India and Java." The lecture, which will be presided over by His Excellency the Netherlands Minister, will begin at 3.15 p.m.

A marriage has been arranged, and will shortly take place, between Major Alister Ralph Thomson, M.C., 7th D.C.O. Rajputs, Indian Army, third son of the late Sir George Thomson, K.C.B., Indian Medical Service, and of Lady Thomson, and Helen Mary, younger daughter of the late Mr. and Mrs. George Tuchet Robertson, of Instow, N. Devon, and Kurnoul, Tirhout, India.

We are officially informed that at the wedding, which is to take place on June 1, of Prince Alexander and Princess Marie, the first witness (*Kum*) will be H.R.H. The Duke of York, the second witness (*Stari Svat*), H.R.H. Prince Arsen Karageorgevitch, brother of the late King Peter. The Guide of the bride will be H.R.H. Prince Paul of Serbia, and the honeymoon will be spent among the Alps at Bled, Slovenia.

The engagement is announced between Geoffrey Hill, of Langham Mansions, Earl's Court Square, and Liskeard, Cornwall, son of the late Samuel Hill, F.R.I.B.A., and Adelaide Mary, second daughter of the late Lancelot Holland, Inspector-General of Police and Prisons, Colombo, Ceylon.

The marriage was solemnized at St. Mary Magdalene Church, Bournabat, Smyrna, on April 26, between Mr. E. J. C. Charnaud, son of the late Mr. Edwin Charnaud, Inspector of the "Debt Public," Smyrna, and Miss Doris Pengelley, youngest daughter of Mr. and Mrs. Alfred W. Pengelley of Bournabat.

M. Beza, one of the Secretaries of the Roumanian Legation, is shortly leaving London for Roumania to resume the course of lectures delivered last year at the Bucharest University on the Romantic period in English Literature. As the centenary of Shelley falls next June, M. Beza hopes to give some lectures on Shelley and his cycle. He has just concluded at King's College a series of lectures on Roumanian literature.

Excavations of the Egypt Exploration Society at Tell-el-Amarna, 1921-1922, will be the subject of a lecture, illustrated with lantern slides, to be delivered at the Royal Society, Burlington House, on May 23, at 8.30 p.m. The lecturer will be Mr. C. Leonard Woolley, who was in charge of the expedition. Tickets can be obtained gratis on application to the Secretary, The Egypt Exploration Society, 13, Tavistock Square, W.C.1.

On the occasion of the Roumanian National Fête Day—May 10—the Minister and Madame Titulesco received the members of the colony at the Legation, 4, Cromwell Place, during the afternoon.

The Greek Chargé d'Affaires and Madame Rizo-Rangabé gave a luncheon party on May 10 at the Legation, and among the guests were the Grand Duchess George of Russia and Princess Nina, Sir Basil Thomson, and Major A. Boyd-Carpenter, M.P.

APPOINTMENTS AND PROMOTIONS.

The Air Ministry announces that Major-General Sir W. S. Brancker, K.C.B., A.F.C., has been appointed Director of Civil Aviation in the Air Ministry. He filled several staff appointments in India in the early part of this century, and it was there, in the winter of 1910-11, that he first flew as an observer. He went to the War Office in 1913, and was appointed Deputy-Director of Military Aeronautics in 1914, and Director of Air Organisation in 1916. In the latter part of 1917 he was appointed to the Command of the Royal Flying Corps in the Middle East, and he was promoted Major-General of the Air Force in January, 1918. In 1919 he retired in order to devote himself to the development of commercial aviation. He was created K.C.B. in the same year.

The King has appointed Mr. Alexander Ransford Slater, C.M.G., C.B.E. (Colonial Secretary, Gold Coast), to be Governor and Commander-in-Chief of the Colony of Sierra Leone. Mr. Slater is a son of the late Rev. C. S. Slater, of Plymouth, and was born in 1874. Joining the Ceylon Civil Service in 1898, he occupied important positions there until 1912, when he was transferred to the Gold Coast. In 1906 he married Dora, daughter of Mr. H. T. S. Ward, who was Director of Irrigation in Ceylon.

OBITUARY.

The death has occurred of Mr. William Wesley Masterson, American Consul at Plymouth. Mr. Masterson, who was born in 1861, was for two terms of three years Consul at Aden, and he also served at Batoum and at Harput.

The death has occurred of Sir Walter Raleigh, a most distinguished lecturer at Oxford University. During the last vacation Sir Walter made a journey to Baghdad to gather material for a section of the history of the Air Force during the War, and while doing so he contracted typhoid fever.

BATOUM REUNION DINNER.

The first annual Batoum reunion dinner was held last week at the Connaught Rooms. Captain R. E. Chilcott, R.N., was in the chair in the absence of Brigadier-Generals Cokecollis and Tyndale Biscoe. Amongst those present Colonel Dutton, Colonel Barber, Colonel Henderson, Colonel Letham, Colonel Lavers, Major South, Lieutenant-Commander Vevil and Major Wilson. The guests were Lord Raglan and Sir Percy Sykes. The latter during the evening related his experiences in Batoum thirty-two years ago.

THE GOSPEL OF HATE.

The improvement in the position in India which has become so obvious during the last two months makes it possible, and at the same time desirable, to attempt an estimate of the future, based not on momentary outbursts of sentiment or passion, but on the more lasting movements discernible in the stream of national life. There is a tendency in some quarters to assume that all the trouble is over, and that the country is returning to the old apathy which some observers mistook for placidity, but in our judgment that view should be discarded once for all. There may be fewer eddies on the surface of the stream, but the increase in its pace must be accepted as a permanent fact. Indian thought and feeling will insist in finding expression more and more as time goes on: interest in public affairs will spread in ever-widening circles among the population: the peasantry will be brought more definitely into politics; and conditions will steadily become more favourable for the effective formulation of a genuine national policy. Englishmen at least should not complain at such a change, for it is the necessary consequence of their actions during the last hundred years: the magnitude of the achievement can indeed scarcely be overstated, and to those who can judge the present by comparison with the past, the future would be full of promise, if it were not for the emergence of a strange and sinister factor in the spread of racial hate. This factor may justly be described as new. In the past individual Indians may have hated individual Englishmen, or even Englishmen in the mass, but it is only recently that entire classes of Indians have been urged, unhappily not without success, to hate Englishmen in general, as a national and religious duty; and any reasoned forecast of the future must take this new factor seriously into account. It would be a mistake to exaggerate the success already achieved by this poisonous propaganda; racial hatred is still very far from being universal, and competent observers can travel widely in many parts of India without detecting its symptoms; but of its existence there can unfortunately be no question, and the rapidity with which it may extend makes of each existing nucleus a menace to the prospects of a much larger area than is affected at the moment.

The preachers of this gospel of hate fall into two classes. At the outset they were for the most part well-meaning but ignorant enthusiasts. Realising acutely the obvious defects in the national life, they laid the blame for every evil on British rule, and believed that its extirpation would suffice to bring the Millennium to India's door. Had they taken the trouble to learn the facts, they would have been forced to recognise that nearly all the defects on which they insisted were in origin definitely Indian, that Englishmen had long been working for their removal, and that the true sphere of usefulness was the stimulation of Indians to share in the work; but the gift of knowledge was denied to them, and in their ignorance they laboured to eliminate, not the defects, but the most powerful agents for reform. As time went on, these enthusiasts were reinforced by apostles of a very different type, who desired not to reform but to restore the old India, and who realised that, in order to achieve that object, British influence

must be definitely driven out. The anti-British propaganda was thus active and virulent, while the soil was favourable to the seed. The new national self-consciousness was quick to believe good of itself, and evil of others. Year after year, crowds of young men passed from schools and colleges into active life imbued with the idea that England was the enemy. The doctrine became common form in the Press and on the platform; it was not seriously controverted, and to-day it is unquestionably one of the dominant ideas among the Indian middle classes. Of late it has extended to a wider field, for it has been presented to ignorant workmen and peasants in the mass as a short-cut to social and economic salvation; it has undoubtedly made some headway among these classes, and, from the nature of the case, a large and sudden extension among them is a definite possibility of the time, if indeed it should not be described as a definite probability in the absence of effective counteraction.

It is largely on effective counteraction that the future of India now depends. The share that Englishmen can take in this work is small. They are bound, as individuals and in the mass, to abstain from anything which offers reasonable ground for offence; they are equally bound to avoid anything which can be interpreted as fawning on the classes endowed by them with power; it is sufficient that now, as in the past, they should be guided by the traditions of the race, should ignore hatred when it is manifested, and should welcome friendly cooperation. The main burden of the task rests on those Indians, and happily for India they are numerous, who believe that the best hope for their nation lies in its development as an integral portion of the British Empire, who realise the defects and the dangers of the old national civilisation, and who aspire to effect a working synthesis between East and West. The spread of the gospel of hate would be fatal to such hopes and aspirations; left to itself, it will assuredly spread, and its eradication calls for hard and sustained effort on the part of those who cherish the higher ideal. Perhaps the most hopeful feature in the position in India to-day is the extent to which this truth is being grasped, and this precept is being obeyed. We hear from North, and East, and West of insensate manifestations of racial hatred, but at the same time we hear of increasing cooperation, of the growth of friendly social relations, and of the development of mutual respect. Much is indeed being done, but more is needed, if India is to make good her place within the Empire. Of the men of good will, far too many are still diffidently silent; they await the issue, but give no help in its decision; they have not yet learned the lesson that their position can best be defended by attack; their effective intervention at the present juncture would probably be decisive; but so long as they are content to watch and wait, the possibility of disaster remains. We ask them to consider seriously what disaster would mean. The apostles of hate talk glibly of driving the English out of India: the more probable result of their success would be the expulsion of India from the Empire for proved unworthiness of the membership which was so fully offered. The logical outcome would be an India internally free, but with the coasts policed by foreign ships, and the sea-borne trade taxed by foreigners to an extent sufficient to meet existing foreign liabilities. It would then matter little to the world how India was ruled, whether from Kabul or from Khatmandu: it might matter much to Indians, but the world would not be interested in their domestic concerns. They would have missed the chance that is now within their grasp, the chance of going steadily forward towards an equal share in the most progressive political society the world has yet known, the chance of drawing on the wisdom of the West, and of contributing their own ideas to the common stock. The choice is still open, though the position of India in the Empire has undoubtedly been prejudiced by the manifestations of the past year; it is for those Indians who aspire to the higher destiny to insist that further offence shall not be given.

BY AIR TO BAGHDAD

By H. T. MONTAGUE BELL

A TRIBUTE TO A NOTABLE ACHIEVEMENT OF THE ROYAL AIR FORCE.

OVER CAIRO Under the Aeroplane are seen the Esbekiyah Gardens; at the end of the lower left wing, Abdin Palace, the residence of King Fuad; at the lower right wing, Kasr-el-Nil Bridge with a long line of houseboats (dahabeeyahs) stretching to the right.

AT ZIZA: The outgoing Air Mail meets a motor convoy which has just renewed the track across the desert.

A D.H.9a on the Cairo-Baghdad mail service, with Pilot.

BY AIR TO BAGHDAD.

Flying has become a commonplace of the world's everyday life, but a "Passenger" by the Air Mail between Cairo and Baghdad may be forgiven for supposing that in that particular journey there are certain distinctive features which invest it with an interest not attaching to every flight. It must be a dull imagination that is not thrilled by the possibility of setting eyes in one and the same day on the historic lands of Egypt, Palestine and Mesopotamia. But it is not so much the distance actually covered that distinguishes this journey from others as the physical obstacles which have had to be overcome before a regular mail service could be attempted. In the scoring of over five hundred miles of desert in a way that not only provides the pilots with a clearly marked course, but also inspires confidence from the knowledge that a forced descent will leave them easily located in case of need, and in the powers of endurance shown by the pilots in a flight, it may be, of nine hours' duration (for a straight-through flight over the 864 miles that separate Cairo from Baghdad is always aimed at, when conditions permit) a very notable achievement stands to the credit of the Royal Air Force, which should be more widely known and appreciated than it is at present. An important link in the world's communications has been forged by British skill and resourcefulness, and the regularity with which the mail service is maintained justifies the hope that it will prove the precursor of yet wider services embracing the chief centres of the British Empire.

Between Palestine, or rather Transjordan, and Baghdad lies a desert expanse of 532 miles. To navigate this stretch in the air by compass would be a comparatively easy matter; but the risk of forced landings can never be eliminated, and the problem was to provide an infallible means by which help, if necessary, should be available for the stranded pilot. It has been solved by the ingenious expedient of passing a number of lorries and cars over the same track across the desert, and marking off a series of possible landing grounds which will act as a guide to a pilot and enable him to be located by wireless whether during the flight or when compelled to land. The work of mapping the course across the desert was carried out in June, 1921, the western half, from Amman to El Jid under the direction of Mr. John Ball, O.B.E., D.Sc. Phd., M. Inst. C.E., Director of Desert Surveys, Egypt, while the Royal Air Force, Baghdad, made itself responsible for the eastern section.

The Desert Track.

This narrow track—twin parallel lines five or six feet apart—is the pilot's sole navigating chart. On favourable ground it stands out clearly enough, whether from a height of 3,000 ft. or 8,000 ft.; but, as may be imagined, it is none too easy to pick up without any indications as to its locality, nor is it always a simple matter to follow it, when found, if the nature of the terrain has prevented the vehicles from making more than a slight impression on the surface. Occasionally the single track has been reinforced by a number of separate tracks, where the cars and lorries have spread out instead of following one another, as offering an easier mark for the airman; but for the most part the task of the pilot is to hold grimly to the single narrow streak, and should he lose sight of it at any time, there is nothing for it but to circle round in the air or to retrace his course until the track has been picked up again. Apart from the circles on the ground, with letters or figures in them, which indicate landing places, the general configuration of the desert offers an insufficient number of distinctive features to enable a machine to follow the right course the whole way without the help of the track. From the aerodrome of Amman, on the Hejaz Railway—the last place at which the store of petrol can be replenished for the eastward flight—a compass direction is sufficient to locate Kasr Azrak, or Landing Ground "C," the first landing ground, fifty miles away, which with its marshes and pools offers a conspicuous land mark. To avoid bad ground the

track has had to make a detour to the south both west and east of Azrak, but aeroplanes keeping a course due east pick it up twenty-nine miles farther on where the black mud flat, which is a feature of the lava country traversed for the next fifty miles, makes its first appearance. Here and there, where there is a chance of the track being lost, an arrow mark, with barb at each end, has been made on the ground to give the pilot or a motor convoy the direction. When the light and the condition of the ground enable the track to be sighted a distance ahead all is clear flying, and there is no need to crane one's neck over one side or the other to see whether the right course is being kept. The regular whirr of the propeller—in the case of twin-engine machines reinforced by the drone of the engines on a lower note—and no one wishes for cheerier music! On that steady rhythm hangs the success of the journey, for a "cut-out," or a few of those misfires which seem to derive additional violence from the already deafening noise of the flight, will entail a forced landing, and there can be no certainty as to when the course will be resumed.

A forced landing in the desert, owing to engine trouble. Camel thorn much in evidence.

If weather conditions are favourable—it can be very "bumpy" in the air over this stretch of country—there can be few more exhilarating experiences than this rapid thrust through the air on an "even keel." Even with scenery, as the word is generally understood, left far behind, the varied configuration of the ground has an attraction all its own. The average height of the plateau over which we are flying is about 2,000 ft. The surface consists of rolling uplands with shallow depressions; for a time black and yellow are the prevailing colours, where mud flats and basalt boulders contribute with the sand the chief features. These flats are sometimes several miles in diameter; formed as the result of evaporation of drainage water, collecting in depressions after rain and charged with sand and fine reddish yellow mud, they are as level as a billiard table. Outside the volcanic area the desert is more strictly speaking steppe country. Between November and April rainstorms sweep across it, and in the latter portion of this period at least it is covered with an apologetic verdure, over which parched tufts of camel thorn exercise a somewhat aggressive dominion. On the ground itself, as a forced landing soon reveals, nature appears far from unkindly. Innumerable wild flowers are in bloom, all stunted perhaps, except the mustard plant, but diversified enough in colour, with blue and yellow irises, marguerites white or yellow, here and there mignonette, bright patches of maiden pink, and a graceful member of the thistle family with a brown and yellow flower. Animal life is represented mainly by birds, but a convoy may be fortunate enough to restock its larder from a herd of gazelle. During March the sand grouse are busy mating, and one can watch the flocks pairing off; of jackals and hyaenas I can only speak from hearsay. The winding strips of darker green are *wadi* courses, which before many weeks have passed will be as void of vegetation as the rest

of the surface. Uncharted though the desert may be, the countless tracks by which it is scored prove that, apart from well-worn caravan routes, the Arabs find in it good enough grazing for both camels and sheep. In the course of five or six forced landings it so happened that on one only—the third night to be spent in the desert on the return journey—was a visit received from any local denizen.

Earlier in the trip an impressive sight was afforded by a body of Arabs, about a thousand strong, mounted on camels and horses, advancing in wide formation, evidently on raiding bent. Their attitude towards His Majesty's Air Mail was a friendly one, for as the leading aeroplane passed directly over them at an altitude of only two or three hundred feet, it afforded an easy mark for any one with hostile intent. When, moreover, it is remembered what a temptation any special target is to an armed Arab in perfect friendliness towards his possible victim, we must infer that this particular

Apparently convinced by these answers, the Arabs allowed the engine defect to be remedied, and the aeroplane continued its solitary journey. Whether they would have adopted a different attitude if they had known that the replies to their inquiries were one and all inaccurate must remain a matter of conjecture.

The Psychology of the Air.

With the exception of the pilots most of those who have travelled by aeroplane between Cairo and Baghdad seem to have found the journey tedious after a time. It is true that the initial exhilaration experienced from rapid movement through the air is inclined to wear thin after two hours; but as in the case of riding a man can never become a first-class horseman until he has grown "dog-tired" in the saddle, so, I think, a long stretch in the air is necessary, if one is to learn something of the psychology of the air. My eighteen or nineteen hours in the air interspersed with almost as many days spent in the company of members of the R.A.F., filled

MAP OF THE CAIRO-BAGHDAD AIR-ROUTE

raiding party was also well disciplined. Their attitude was in keeping with the general experience of airmen along the Air Mail route, and it may be left to the individual to decide whether motives of kindness or of wholesome respect are the determining factor. There can be little doubt that the action of the Royal Air Force in picking up and flying to Baghdad a wounded sheikh found in the desert, and in procuring for him the medical treatment that saved his life has wonderfully impressed the Arabs in this part of the world and disposed them to friendliness. On the other hand, in view of the nomad weakness to take advantage of any superiority of numbers, the occupants of a temporarily stranded machine are well advised not to reveal to inquiring Arabs the full extent of their plight. On one occasion a pilot on making a forced landing was approached by a number of Arabs whose attitude was expectant rather than friendly. He knew some Arabic, and the following dialogue ensued. "Are you alone?" "No." "How many other aeroplanes are there?" "Ten." "Are they coming here?" "Yes." "Does your aeroplane talk a long distance (wireless)?" "Yes." "Have you told Amman you are here?" "Yes."

me with the profoundest admiration for the personnel of the new Service. For most pilots, I understand, it is a mild form of purgatory to be piloted by someone else. Each pilot has his own particular psychology reflected in the handling of his machine; as the psychology of no two pilots is likely to be identical, there will always be subtle differences in flying technique, and presumably a pilot does not take kindly to methods that are not his own. The layman is not worried by such considerations. Of my own experience I can only say that on the occasion of my finding myself in the air for the first time, after a few attempts to assist the pilot to balance the machine by leaning to one side or the other, as one would in a rowing boat, one quickly settled down to an unmitigated enjoyment of the novelty of the situation—and left the machine entirely to the pilot. One becomes impressed with the stability of aeroplanes, which seem equal to the worst vagaries of the atmosphere.

The day of "stunts" is over; only a fool or a foreigner attempts them outside sports gatherings. The Cairo-Baghdad flight is a serious undertaking, and a pilot needs all the skill and endurance that he can

command to carry out his task. In the first place he is probably flying a heavily laden aeroplane. The favourites with the R.A.F. for the journey are the D.H.9a's — two-seater light bombing machines. In addition to the occupant of the second seat there will be as much luggage and mail matter as can be stowed away, spare tins of petrol will be tied on below the wings and under the fuselage, and even a suit case or cabin trunk may occupy a prominent "overflow" spot. The layman novice has impressed upon him at headquarters before he proceeds to the aerodrome that an additional ounce to his personal luggage may prevent the machine from rising or bring it hurtling to the ground. The warning is right in principle; but is not always confirmed by subsequent experience. When one has been the sixth occupant of a machine, already well laden, meant to carry four or five, or has seen the Christmas-tree effect assumed by some aeroplanes, one acquires a great respect for the capacity of these seemingly frail craft. Usually the pilot knows his machine and its capabilities; and its "Plimsoll" line in his hands does not always correspond with Headquarters' theories. One's sympathies go out to the nervous passenger who, before his own personal effects were stowed on board, overheard the comment of the Headquarters' representative: "Grossly overloaded: grossly overloaded." Diffidently he approached the latter before handing up his kit to inquire whether responsibility rested with the pilot, the officer commanding the aerodrome, or the unfortunate passenger; but he derived no comfort from the laconic rejoinder: "The question of responsibility is settled at the inquest."

The author of the remark may be regarded as a solecism in the Royal Air Force, which is not given to sad reflexions or lugubrious utterances. Airmen, however, differ in one respect from the sister services. Theirs is a new science, and much has yet to be learnt before the conquest of the air is complete beyond all challenge. In R.A.F. messes accordingly "shop" is never taboo; on the contrary, the wise pilot welcomes every opportunity of exchanging notes, for he can never tell when a piece of information may not prove useful. In the air itself there are, perhaps, few surprises left, and short of an actual breakage one can hope to reach the earth at one's own pace. Landing, however, on strange ground is never without its dangers; too short a run, a soft spot or concealed boulders, and the machine may be standing on its head, a minor or major wreck, to say nothing of the fate of the occupants. In these circumstances it is not surprising that, when pilots are engaged on such an enterprise as the Cairo-Baghdad Mail, conversation in the mess should turn largely on "crashes"; for it is preferable to learn from the experience of others than to go through the mill oneself. As for the nine or ten landings that my machines made in the course of the journey to Baghdad and back one would have thought that it was the easiest of operations, for in each case, except, perhaps, one in the desert, the landing was made so smoothly that it was impossible to tell at what point the wheels touched the ground. But then, my pilots were past-masters in

their science, and one at least, holding that almost daily practice was required to ensure a perfect landing, believed in "keeping his eye in" by this means. When I recalled the fact that with the previous mail, a fortnight earlier, five machines had to be used to get two as far as Baghdad, for three had crashed one after the other, I felt relieved to find myself seated behind a pilot who took his profession so seriously. One can imagine what his feelings would be if he found himself behind a brother pilot whose speciality, if report be true, was to point out every feature of the landscape passed over, in a way that suggested that the machine was looking after itself. It was a pilot of this type—his proficiency in flying was not challenged—who brought upon himself from a senior officer passenger, whose nerves were less robust, the historic command "Fly to attention." Hardly less "jumpy" was the experience of a pilot, travelling as a passenger, who on reaching Cairo found his machine, instead of being steered straight to the aerodrome, embarking on a series of

The Judean Hills; the road from Jaffa to Jerusalem.

circles over a particular quarter of one of the suburbs. As the machine drew closer to the house-tops, he began to wonder what line of action on his part was indicated; but to his relief the circling ceased and the direction to the aerodrome was taken. The explanation came, as soon as conversation was possible, with the remark of the pilot, whose wife was living in the neighbourhood: "That was my signal for tea."

A Flight Described.

On the occasion of my recent flight as a passenger by the air mail from Cairo to Baghdad and back the start on Saturday had been postponed on account of unfavourable weather reports along the route. A heavy rainstorm at Helouan during Sunday night suggested that atmospheric conditions were still far from settled, and it was with some misgivings that the order to start, telephoned from "Egypt Group" at Heliopolis, was obeyed on the Monday. The mails were being carried in two D.H.9a machines, with a wireless operator in one

(Aviation Dept.)

and the passenger in the other ; a third machine destined for Amman was travelling in our company. A further storm threatened as the aeroplanes left the ground, and before the northern outskirts of Cairo had been reached it had broken over the city. But the clouds clung to the cultivated area of the Delta, and by keeping a course well over the desert the machines skirted all the way to the Suez Canal—the while in bright sunshine themselves—a sullen compact mass of bursting rain clouds. It was consequently more unfortunate for those who had ordered the start than for the occupants of the machines that the wireless equipment almost from the outset refused to work. No message reached Cairo headquarters from the mail until it had landed three hours later at Ramleh—a distance of three hundred miles—and there must needs be some speculation as to the mail's fate during this period. The journey proved, not unnaturally in view of the weather conditions, a bumpy one, but the wind was favouring and good time was made.

The presence of accompanying aeroplanes keeping a fixed formation gives a sense of companionship in the air, in addition to affording ocular evidence of the reality of those peculiarly unpleasant bumps that one is experiencing oneself. Indeed the antics of the leading machine helped in no small measure to alleviate the vagaries of one's own craft ; it seemed impossible that a body being propelled through the air at from ninety to a hundred miles an hour could suddenly rise, apparently vertically, a score and more of feet and fall again as abruptly the same distance.

The Suez Canal is passed at Kantara, and the route follows the railway line across the desert part of Sinai Peninsula. Quickly enough the surface shows signs of yielding to the efforts of vegetation, tentatively at first,

north and was seen to be heading for Ramleh, R.A.F. headquarters in Palestine. Now D.H.9a's are not supposed to land at Ramleh during the rainy season, because half the aerodrome is out of action, and the other half hardly offers sufficient room to other than light machines for landing and taking off. But the

AMMAN AERODROME: A Vickers-Vimy preparing to resume its journey from Baghdad to Cairo.

pilots of the Air Mail are prepared for emergencies Ramleh, although not expecting the machines, is on the look-out ; a judiciously placed smoke bomb supplies all the guidance necessary, and the difficult landing is negotiated by the three pilots with unerring judgment.

Trouble was in store for the mail the next day. It was Monday afternoon when the three machines landed

KASR AZRAK: the Azure Castle. Landing Ground "C". In Roman times an outpost of the garrison at Amman. Roman building material figures in the present ruins, Crusader and Turkish. The carp abounding in the clear pools are in all probability descendants of the fish introduced by the Romans.

but steadily improving in appearance until the full beauty of the Palestine landscape in spring comes into view. Ahead, however, anything but a land of promise seemed to await us. The course from Rafa was north-east, directly over Jerusalem, and on by way of Jericho to Amman. Over the Judean Hills hung dark storm clouds ; in the best of weathers they are the most inhospitable stretch of country of the 864 miles that separate Cairo from Baghdad, for the chances of finding a safe landing ground are remote indeed. On the day in question they looked particularly uninviting ; but we continued to head for them with a favouring wind at a steady rate of a hundred miles an hour hoping for signs of a break in the clouds that would justify a dash for Amman. But it was not to be, and the feeling of relief, I believe, was not confined to the passenger when the leading machine made a right angle turn to the

at Ramleh. At 6 a.m. on Tuesday Baghdad reported rain with a falling barometer, and a start that day was out of the question. On Wednesday the early morning inspection of the two aeroplanes bound for Baghdad revealed a leaking cylinder in one. To substitute for the mail service the third machine that had come from Egypt required the sanction of Middle East Headquarters in Cairo ; but no sooner had this been obtained than a structural strain was found in the second machine. Accordingly there was nothing for it but to await the arrival of a serviceable machine from Cairo, while transferring the wireless equipment to the substituted machine. The equipment took unkindly to the transfer and occasioned further delay. Not before Friday afternoon was it possible for two machines—still both D.H.9a's—to resume the course, and owing to the lateness of the hour only a brief flight over Judaea was

attempted, to Ziza on the Hejaz Railway, twenty miles south of Amman, where the presence of a convoy from Baghdad had caused a supply of petrol to be accumulated from which the engines could fill up prior to the long flight over the desert. Amman is the capital of Trans-Jordan, now under the rule of the Emir Abdullah. It makes up in picturesqueness what it lacks in qualifications requisite for an aerodrome. The landing ground is too small and ends abruptly in ploughed land; the district would fit in well in the Scottish Highlands, and might possibly add a point or two to their rainfall average. With the R.A.F. accordingly Amman has a bad reputation, as it is responsible almost more than engine trouble for interruptions to the Cairo-Baghdad

The end of the 864-mile flight. The Baghdad air mail arriving at Heliopolis Aerodrome, Cairo.

service. On our homeward journey it befriended two stranded Vickers-Vimy machines at Landing Ground H, and hospitably entertained their occupants when at last they arrived there; on the way out it was cheerfully avoided, and preference was given to Ziza's vast stretch of level veldt, which for the nonce a dump of petrol tins invested with the title of an "all-weather" aerodrome. In the morning, however, the night's frost had to be reckoned with, and although the pilots were busy with their machines at 4.30 a.m. it was past nine o'clock before the engines, for all the coaxing of the incessant "Contact," had thawed into good behaviour and consented to start running.

A non-stop flight of 530 miles to Baghdad had been confidently anticipated; but a minor defect in one of the machines rendered a landing at "M" advisable at the end of two hours. Within an hour a fresh start was

Pilots and Passenger at Ziza, where a vast expanse of level veldt would make an ideal aerodrome. Second and fourth from left: Flying Officer S. T. B. Cripps and Flying Officer J. Whitford, Pilots of the outgoing air mail.

made, from this point all went well, and in only a few minutes over the nine hours of actual flying the Baghdad aerodrome was reached. His Majesty's mails had arrived at their destination; a week late this time, it is true, owing to unavoidable circumstances, but still within sixteen days from London. The previous mail—a fortnight earlier—had also been delayed, at the cost of three crashed machines. Now and again in winter, almost regularly in the summer months when weather conditions are more favourable, a day or at most thirty hours suffice to link the two capitals of Egypt and Iraq. Behind this service, whether delayed or not, there stands out the same brilliant achievement of the Royal

Air Force, calling for a measure of skill, resourcefulness and endurance on the part of its keen, blue-eyed pilots to which everyone who has been fortunate enough to be a passenger by the mail can bear proud witness.

—O—

In a subsequent article I shall hope to deal with the special work of the Royal Air Force in the Middle East, endeavouring to show how the spirit and atmosphere that the Air Service engenders fit it peculiarly for the new duties it is about to undertake in that part of the world.—H.T.M.B.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

The World's Oil Supplies.

While the oil negotiations at Genoa have threatened to eclipse the more immediate *raison d'être* of the gathering the Swedish scientist, M. Arrhenius, in a lecture at the Sorbonne has expressed the opinion that the world's oil supplies are nearing exhaustion. His view is that at the present rate of consumption the life of the world's oilfields is fifteen years. This is not a new theory; it has been raised time and again during the past few years and the strongest argument against it is that those best in a position to know would never display the energy they do in the development of oilfields if there appeared any great probability of this happening. Admittedly it is not a matter on which there can be any certainty, for no one is in a position adequately to estimate the resources of the world's oilfields, but allowing for this in view of the extensive petroliferous regions at present unexploited it seems obvious that, even if the reign of oil is limited as it must be, the end is not likely to be in the time of the present generation.

Lord Inchcape's Task.

The decision to appoint an "Axe" Committee for India needs no explanation in view of the financial situation of that country. There was a deficit of £22,000,000 on the last financial year, and since while taxation is low in India compared with European standards the existing economic conditions do not lend themselves to any great extension of the basis of taxation it follows that the only way to make ends meet is by the rigid curtailment of expenditure. The choice of Lord Inchcape to preside over a Retrenchment Committee could not be bettered. As a member of the Geddes Committee he has been in a position to obtain a unique insight into the question of the reduction of State expenditure, while he has a wide experience of Indian conditions both from the commercial point of view and as a member of the Council of India for many years. If it is possible to solve India's financial problem he and his colleagues may be trusted to find the way. But the solution will be far from easy for so much of the expenditure of the State is now in the hands of the provincial governments and there are very obvious difficulties in the way of any extensive reduction of the military expenditure which forms such a considerable item in the Budget.

The Conference and Afterwards.

While it is still possible that some good will come from Genoa it is difficult as the result of developments during the past week to feel the least confidence in the prospect of any really satisfactory arrangement being arrived at before the end of the Conference. So far as can be seen, indeed, Genoa has been nothing but a waste of time, and the only useful purpose it would seem to have served has been further to illustrate the impossibility of negotiating with Russia at the present time. But we knew quite enough in that respect before. The most serious aspect of the failure of the Conference is that it

will probably have a distinctly retarding effect on European reconstruction.

Egyptian Markets' Results.

Very satisfactory results were obtained by the Egyptian Markets during the past year. A substantial increase was recorded in the receipts from the cattle markets, this being mainly the result of the increase in tariffs which operated during the whole of 1921. The gross receipts from markets amounted to £107,400 as compared with £93,100 for the previous twelve months and the net revenue totalled £59,300 as against £48,400. After provision for the Government's share of the profits there remains a balance of £27,800 as against £22,800. An interim dividend of 5 per cent. was paid on the Ordinary shares, and it is now proposed to pay a final dividend of 5 per cent. with a bonus of 2 per cent., making 12 per cent. for the year as compared with 10 per cent., while a dividend of £9 7s. 4d. is recommended on the Deferred shares as compared with £6 19s. 11d.

Guardian Eastern Report.

From the report of the Guardian Eastern Insurance Company, which has just made its appearance, it is clear that this company is in a fairly satisfactory position. Last year's debit on the profit and loss account has now been reduced to £19,300, and against this there is the considerable appreciation in the company's investments, which consist entirely of British Government securities, to be taken into account. These investments stand in the balance sheet at £163,613, and their market value on April 25 was £190,627. The sound lines on which the company is developing will be gathered from the high ratio of the reserves for unexpired risks.

The Liubliana Fair.

In my recent reference to the forthcoming Liubliana Fair I made no mention of the date by which entries must be sent in. This was because the date then fixed left no opportunity for British participation, and I was given to understand that this would be altered. I am now informed that the date has been extended to the end of June which will give British firms ample time. For the benefit of those interested I would add that I have a limited supply of entry forms for the fair, and shall be glad to supply them on application.

REPORTS FROM OUR OWN CORRESPONDENTS.

EGYPT.

Cairo May 6.

The Government's Cotton Purchases.

The Government's decision to intervene on the Egyptian cotton market has not as yet had the desired effect of raising the price. In local commercial circles it is not expected that the price will rise in consequence of Government buying unless the demand from abroad becomes brisker. In many quarters the Government has been severely criticised for its action which it is stated will jeopardise the funds at its disposal. Whether the present margin between American and Egyptian is really lower than it should be it is exceedingly difficult to say. The views on this point held by those interested in the trade differ considerably. Again it is impossible to know whether the Government is right in its theory that the price of Egyptian has been unduly depressed by "bear" activities at Liverpool and Alexandria. What is known is that considerable pressure has been brought to bear on the Cabinet by a large and influential section of the agricultural community and it is no doubt as a result of that pressure and under the influence of the arguments put forward by it that the Government has again consented to become a buyer of cotton.

In principle Government intervention in such matters is unsound. Egypt is however not organised as other countries. Its present internal position is peculiar and requires peculiar handling. Consequently regarded from a general point of view there is a good deal to be said for the Government's action, and as it has no intention of loading itself to a point where it might incur any serious loss no real harm will be done.

GREECE.

Athens, May 8.

Greek Tobacco in England.

The Greek Chargé d'Affaires in London reports to the Ministry of National Economy that according to official statistics the stocks of Greek tobacco in England amounted to 58,951 bales on April 30. Of this total 21,905 bales were old Greece tobacco, while 37,046 bales were tobacco from the ports under Greek Military occupation.

YUGOSLAVIA.

Belgrade, May 5.

The Conditions of the New Loan.

At last night's Council of Ministers the proposed American loan was discussed. The Government has received a few more offers from America, England, Belgium, and France, but the Morgan Group's offer being the best, it is receiving first attention. The initial

proposal was made at Washington through the Serbian Minister, M. Gruitch, and was further discussed here in Belgrade. In well informed circles it is stated that the negotiations will be quickly concluded and that the banks have agreed to keep their offer firm after May 1 until the Finance Minister returns.

The Government has not disclosed the full details, but it is well-known that the loan is to be one of 100 million dollars, issued at 87, and bearing interest of 7 per cent. Thirty millions are to be placed at the State's disposal at once, even before the loan is passed by the Skupshtina and the remainder is to be used on railways, priority to be given to the Adriatic line and ports. Railway material is to be bought in America, but no names of firms have been specified. The Americans do not demand any control in the State revenue office or Monopolies.

The Syndicate that made the offer consists of J. P. Morgan Blair and Harrington's banking groups. One of their directors is expected shortly in Belgrade. As a result of these negotiations a marked improvement has taken place in the value of the dinar. A much greater improvement is expected shortly and it is anticipated that there will also be a revival of the trade relations with foreign countries.

The import market is daily showing more liveliness, and the enquiries for foreign goods are fairly plentiful now. It would be looking too far ahead to say that the final readjustment of the exchanges is taking place, but taking everything into consideration it would be foolish to ignore the possibility of the readjustment when all visible signs are in favour of it. The success of the Little Entente at Genoa is certainly a guarantee of more settled political conditions, and the promising prospect of this year's harvest will also have a favourable influence on the exchanges.

Miscellaneous.

Telegraphic communications with Albania have been established and also the motor car mail-service between the principal towns of Albania connecting that State with the main centres of Southern Serbia.

A Serbo-Albanian Bank is to be founded soon with branch offices in Valona, Skutari and Durazzo, and should help to promote trading relations between the two countries.

BULGARIA.

Sofia (undated).

The Exchange.

The week has been remarkable for a somewhat rapid and unexpected rise in the value of the leva. Ten days ago the rate on London was 635 levas to the £, whilst

The Clothing & Equipment Company of Egypt

(S.A.)

MANUFACTURERS OF UNIFORM AND CIVILIAN CLOTHING.

Head Office and Factories: CAIRO, EGYPT.

LONDON AGENTS—

MESSRS. J. COMPTON & SONS, LTD., 404-422, OLD FORD ROAD, LONDON, E.3.

Telegrams: ATTIRE, BOWROM, LONDON.

on the 21st the rate had risen to 570. The reasons for the rise are mainly local ones, very large purchases of levas having been made by buyers of tobacco and cereals. It is said that the Italians alone bought 150 million levas with which to purchase tobacco. At the present moment the rate on London is 600 levas to the pound sterling.

Sofia, May 10.

The Elevator Scheme.

Some time ago it was announced that an American firm was prepared to make a loan to Bulgaria, the proceeds of which were to be utilized for the construction of a grain elevator system throughout the country. A Bill dealing with this elevator system has been introduced in the Sobranje. Article 3 of this Bill says that the Bulgaria Agricultural Bank is authorised to sign a contract with the Macdonald Engineering Company of Chicago with regard to a loan for the construction of the ironwork of the elevators on the following conditions:—The American firm is bound to construct in Bulgaria the necessary ironwork for the elevators, representing a tonnage of 312,000. The necessary means for this construction are to be supplied by the bonds of a loan concluded abroad through the medium of the Macdonald Engineering Company. During a period of five years from the beginning of the work the construction of elevators with a capacity of 160,000 tons is obligatory.

The machinery, materials, and installations will have to be imported from abroad, being purchased in those countries where the bonds of the loan are placed. The enterprise will be exempted from all rights of patent duties, taxes, and other similar charges. The correspondence between the company, the bank, and other official departments will be exempted from stamp duties. The contract to be signed by the Agricultural Bank and the company in regard to the enterprise will also be free from taxation. The Bulgarian Agricultural Bank is authorised to raise a loan abroad in accordance with Article 7 of the law referring to this bank, and will be assisted by the Macdonald Engineering Company. The loan will be of £2,000,000 sterling, guaranteed by the State. The redemption of this loan will be effected in the course of 20 years by means of taxes levied on cereals. The project has not yet been agreed to.

BRITISH CONSULAR REPORTS: I.—KOWEIT.

UNSUCCESSFUL PEARLING SEASON.

The following extracts are taken from the report of Major J. C. More, D.S.O., Political Agent, Koweit, on the trade of Koweit for 1920-21:—

The year under review was unfavourable for trade, owing to the strained relations which existed between the Sheikh of Koweit and the Ruler of Nejd, as a result of which all trade with Central Arabia was entirely suspended throughout the greater part of the year, and a feeling of great insecurity existed in Koweit town itself, which was not conducive to commercial enterprise. Peace was re-established with Nejd in March, but there was not time for its effect to be appreciably felt before the close of the year. The pearling season on which the prosperity of a large number of the inhabitants of Koweit depends, was not a successful one; the number of Koweit boats visiting the fishery was small, and, owing to the state of insecurity mentioned above, the fleet was not allowed to go so far afield as usual, consequently the catch was small. In addition to this the prices realised for pearls were not high.

Imports and Exports.

The total imports by sea amounted to £634,268, and the exports to £446,398, the former showing a decrease of 40.23 per cent. as compared with 1919-20, chiefly accounted for by the reduced amount of piece goods imported, which were valued at £90,717 as compared with £384,278. The sea exports, on the other hand, show an increase of 61.6 per cent., chiefly in specie, rice, wheat and coffee, which can be accounted for by the fact that the land routes were closed throughout the greater part of

the year, which resulted in larger re-exports by sea than usual. 77.5 per cent. of the import trade was with India, 10.4 per cent. with Iraq, 8.1 per cent. with Persia, 2 per cent. with Arab coast, and the balance with America and Japan. Of the export trade 38.8 per cent. was with Persia, 25.6 per cent. with Iraq, 24.9 per cent. with India and 10.7 per cent. with Arab coast. The export percentage for Persia was much above the average, doubtless owing to the deflection to that country of a considerable amount of goods which would, normally, have found their way to Central Arabia:

Pearl Fisheries.

Koweit possesses over 7,000 pearl boats; of these, however, many have not been at sea for several years, as owing to the increased demand for labour in Iraq it is now impossible to find crews for them. The average number of boats which visit the banks is now not more than about 320, and was smaller than usual during the year under review. As stated above the season was a bad one.

Sea Fisheries.

The only truly local produce of Koweit is that yielded by the harbour fisheries, which are a valuable asset. Besides float-and-weight nets and lines, traps or tidal weirs, constructed of reed hurdles, are also employed; the fish enter them with the flowing tide and are left behind at the ebb. The majority of the fish caught are consumed locally, but a small proportion is dried and exported to Busreh and elsewhere.

Agriculture.

Neither Koweit nor its environs can boast of any agricultural resources. There are no date plantations, no fields and not many kitchen gardens. A few small villages to the south-east of Koweit supply a limited quantity of vegetables and melons. The chief agricultural centre in the principality is Jahrah. The staple crops are wheat, barley and lucern, but musk melons, water melons, pumpkins, beans and some other vegetables are also grown, and there are some 2,500 date trees. The above crops are mostly irrigated, but a small amount of wheat and barley is grown by rainfall alone. The agriculture of Jahrah might be considerably increased if more money were sunk in it. The next most important agricultural centre is the island of Failakah where wheat and barley are grown with some success on the clayey patches, also melons, lucern and some vegetables. There are some date trees towards the south of the island, but they are not in a flourishing condition, and the agriculture of the island generally is inferior to that of Jahrah. Except in the island of Failakah, less cultivation was done than usual, owing to the unsettled state of the country, and the village of Jahrah was entirely evacuated for several weeks in the autumn.

The only mineral product worked is gypsum mortar, which is manufactured by the simple process of firing rubbish in broad shallow excavations. There is a large gypsiferous tract on the outskirts of Koweit town, and it is found in several other parts of the principality.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 8:—Condition of Crops.—May 3—Bengal: Satisfactory rain has fallen in most of the jute districts and crop prospects there generally improved. Drought continues in North Bengal. May 8—Assam: Prospects of tea, autumn rice and outturn of spring rice fair. May 5—Punjab: Outturn of wheat very good and on the whole better than was at one time hoped. Cotton sowings are in progress but less than last year will be sown. Markets.—Cotton.—May 4—Bombay cotton market steady. Fine M. G. Oomras Rs. 399 May, Rs. 419 July. Bombay cotton arrivals from September 1, 1921, to April 29, 1922, were 2,597,000 bales as compared with 1,907,000 bales during the same period of the last year. Piece-goods.—May 4—In Bombay imported piece-goods market wholesale demands continue quite good and retail enquiries helpful. Jute.—May 5—Calcutta jute market quiet with sellers steady. Firsts Rs. 73, Lightnings Rs. 64. Hessians very firm. Heavy firm, with considerable business in Cubans. Shellac.—May 2—Calcutta market practically unchanged with limited demands. Closing quotations: T.N. Spot Rs. 187, buyers, May Rs. 186, sellers firm. Rice.—May 5—Special Straits quality rice Rs. 522.8. No change in bank rates.

The Economic Resources of Palestine.

1. GEOGRAPHICAL FACTORS.

By Leonard Stein.*

(All Rights Reserved.)

Palestine is often pictured as a narrow strip of territory between the Mediterranean and the Jordan. This is a complete misapprehension. The Jordan is not a natural frontier. Geologically, the Jordan valley is merely a trough between two parallel ridges, created by a fracture, or series of fractures, in what was originally a uniform limestone formation. It is only part of an almost continuous rift, extending from the neighbourhood of Alexandretta, at the north-east corner of the Mediterranean, to the neighbourhood of Akabah on the Red Sea. The Jordan Valley is, in other words, no more than a southward continuation of the valleys of the Orontes and the middle Litani, and is itself continued southwards by the depression known as the Wadi Arabah. This rift is not so much a barrier as a pass. The successive series of plateaux or mountains which flank it to east and west through the greater part of its course are complementary to one another, and form, at each stage, an indivisible whole. Palestine can no more be separated from the territory to the east of the Jordan than Syria can be separated from the great cities of Homs, Hama, and Aleppo, and the remainder of its hinterland to the east of the Orontes. The Jordan must be conceived, not as bounding Palestine, but merely as dividing it. Transjordan and Western Palestine form a single geographical and economic unit.

They are also, in some degree, a political unit. Great Britain, as Mandatory for Palestine, exercises a somewhat shadowy authority over the territory to the east of the Jordan. Exactly how far to the east Palestine can in this sense be said to extend remains doubtful. There is no provision under the Treaty of Sèvres and the supplementary agreements for any intervening area between Palestine and Mesopotamia. Theoretically, therefore, Palestine ends where Mesopotamia begins. This is, however, a somewhat academic question. At an average distance of thirty or forty miles to the east of the Jordan, the plateaux begin to break into the desert and cease to be of economic interest. Skirting the desert, moreover, runs the Hejaz railway on its way to Damascus. The Hejaz railway has a peculiar significance for the Moslem world, which entitles it, for political reasons, to special treatment. For practical purposes, therefore, Palestine may be regarded as bounded on the east by a line drawn slightly short of the desert. In other words, Western Palestine has an extensive hinterland in Ajlun, Es Salt and Kerak, which disguise the historic names of Gilead and Moab. These regions are well-wooded and well-watered. Their high altitude ensures them a more temperate climate and a heavier rainfall than are usually found west of the Jordan. There is an abundance of fertile soil and ample room both for extensive agriculture and for stock-raising on a considerable scale. The potential wealth of this inland area must be taken into account in estimating the economic resources of Palestine as a whole.

The desert on the east is balanced by the Mediterranean on the west. So, too, the ridges of Gilead and Moab are balanced by those of Samaria and Judaea, which form, like them and like the intervening rift, a link in a chain extending from Southern Palestine to Northern Syria.

The coast of Palestine has been specially favoured by nature in two respects. It possesses in Haifa a natural harbour of the first magnitude. North of Carmel the coast of the Eastern Mediterranean is irregular. South of it it is almost straight. Thus, while Syria is relatively rich in natural harbours, Palestine has only one. But that one is of outstanding importance. At the southern end of the Bay of Acre, in which the entire British fleet

in the Mediterranean could comfortably lie at anchor or sheltered by the heights of Carmel to the south and by the promontory of Acre to the north, opening on to the plain of Esdraelon, the gateway of the eastern hinterland, Haifa is, in its natural endowments, without a serious rival between Alexandria and Alexandretta.

The other characteristic feature of the Palestine coast is the coastal plain. North of Palestine, the distance between the sea and the western range is always small, and sometimes inappreciable. On the other hand, on the coast of Palestine, the general slope of which is outwards towards the south-west, marine deposits of recent formation have built up a coastal plain, which broadens out from a few hundred yards at Carmel to nearly 20 miles in the extreme south. The northern half of this strip is the Plain of Sharon. The southern half is Philistia. The entire plain has almost everywhere ample supplies of underground water at moderate depths and has always been justly renowned for its fertility.

From the coastal plain rise the ridges of Judaea and Samaria, corresponding to those of Moab and Gilead across the Jordan. Judaea is, in its general character, a compact and elevated mass of limestone, ill-fitted for agriculture, but hospitable to the vine, the olive, and the fig-tree. Samaria, immediately to its north, is not a plateau, but a highland region of less austere geological structure. Hard and soft strata are intermingled, with the result that within the hill-system are valleys and miniature plains of considerable fertility.

To the north of Samaria the continuity of the western range is suddenly interrupted. A transverse movement of the earth's crust has caused a depression running from Carmel south-eastwards. That depression, under the name of the Plain of Esdraelon, divides the hills, and is continued, as the Vale of Jezreel, down to the Jordan Valley. Triangular in form, little less than 15 miles across at its widest, and seldom rising appreciably above sea-level, Esdraelon carries half-way across Palestine the exceptional richness of the coastal plain.

To the north of Esdraelon, the interrupted Western Range is continued by the hills of Lower Galilee. Lower Galilee, may be described as a less rugged and a more fertile Samaria. Here, too, hard and soft strata are intermingled. The hills are relatively gentle, though their slopes are often rocky and uneven; and they enclose a number of valleys or elevated plains admitting of profitable cultivation.

Last and northernmost comes Upper Galilee, which brings Palestine up to its northern boundary at the foot-hills of the Lebanon. It stands much higher than Lower Galilee, and is, like Judaea, an elevated plateau. Unlike Judaea, however, it is not merely a mass of naked limestone. The limestone strata have been partially covered with sheets of lava. The volcanic soil thus formed retains water much better than the limestone of Judaea. Moreover, the greater altitude of the mountains ensures a better rainfall. Thus Upper Galilee, though not conspicuously fertile, is by no means unproductive, and besides favouring the vine and the olive contains appreciable stretches of arable soil.

We have now surveyed the Western Range. The next stage to the east brings us back to the Jordan Valley, from which we started.

From a narrow strip about two miles wide at its exit from Lake Tiberias the valley broadens out into a plain eight miles across at Beisan and as much as 14 miles across at Jericho. Through the greater part of its course the valley is far below the level of the sea. Consequently, the climate is sub-tropical and unhealthy. On the other hand, the warm moist soil produces a riot of luxuriant vegetation, and is eminently suitable for the cultivation of cotton, flax, maize, rice, sugar, and dates.

One other feature of the valley remains to be mentioned. From 7 feet above the sea near its source, the Jordan falls to nearly 700 feet below the sea at Lake

* This article contains the substance of a lecture delivered recently at the London School of Economics with certain modifications.

Tiberias, and 1,300 feet below it at the Dead Sea. In the six miles between Lake Huleh and Lake Tiberias there is a fall of nearly 700 feet. Accordingly, in the Jordan and its tributaries there is a latent source of water-power which is among the foremost material endowments of the country.

Thus, regarded from north to south, Palestine may be roughly pictured as a strip some 60 to 80 miles wide, enclosed between two parallel seas—the salt sea to the west, the sea of sand and stone to the east, with the Jordan Valley running more or less midway between them, flanked by a line of highlands on either side. To the north Palestine marches with Syria and to the south with Egypt. Both the northern and southern frontiers are arbitrary political lines, which need not here be discussed in detail.

The area of the territory thus defined is not exactly known. It is estimated, however, that the area of Western Palestine is about 10,500 square miles, of which some 4,000 square miles represent what is at present the almost uninhabited desert south of Beersheba. Western Palestine, north of Beersheba, is thus a little smaller than Wales. It should be added that the land further south was once productive and well-populated, and should not be written off as permanently worthless.

Palestine east of the Jordan has never been scientifically surveyed. It is estimated, however, that it is about equal in extent to the corresponding area to the west. Deducting that part of Transjordan which has been placed within the French Mandatory sphere some 9,000 square miles remain, of which an appreciable proportion is at present an almost empty waste.

The total area of Palestine may thus be roughly estimated at about 20,000 square miles, or about two-thirds of the area of Scotland. The inhabited area consists of about 11,500 square miles and is thus about half as large again as Wales. The population of Western Palestine is officially estimated at about 700,000 and that of Eastern Palestine at about 350,000. Both estimates, more particularly the latter, are based on very imperfect data, and even in the case of Western Palestine, the margin of error is probably little short of 20 per cent.

What is certain is that whatever the population may be to-day, it is vastly less than it has been in the past. Regions which are now little better than a sparsely inhabited waste were in Roman times the seat of a dense and thriving population. On this point history and archaeology are unanimous, and are supported by evidence which meets the eye of the casual traveller on every side. The ruins of stately cities, the terraced hills, the remains of cisterns and aqueducts and irrigation channels—these traces of what was once an advanced and flourishing civilization, speak for themselves. And all this is true, not merely of the areas which still contain an appreciable population, but also of the wild and half empty tracts of Transjordan and even of what is now the wilderness to the south of Beersheba.

Some of the reasons for this visible degeneration are self-evident—the breakdown of the Roman barrier against the desert marauders, the Arab, the Mongol, and the Latin invasions, and the progressive demoralization of the Ottoman Government during the long period of Turkish rule which began in 1517.

To all this appears to have been added a gradual process of desiccation. There is a good deal of evidence to show that within comparatively recent times the climate of Palestine was considerably moister than it is to-day, and that regions which are now little better than desert were once by no means waterless. Thus a careful study of the history of the Dead Sea suggests that, in common with most of the great Asiatic lakes, it has been subject to fairly recent changes of level, and that as little as 1,000 years ago it stood appreciably higher than at present. Similar inferences may be drawn from the existence of ruins on an extensive scale (as for instance, at Petra south of the Dead Sea, and Palmyra, in the Syrian Desert), where there is to-day little or no cultivation. Again, the same conclusion is suggested

by the ease with which Egyptian, Greek and Syrian armies crossed what is now the waterless peninsula of Sinai.

Professor Huntington of Yale, who has examined this subject in detail, is definitely of opinion that desiccation has occurred on an appreciable scale in the past 2,000 years. Whether or not his views are accurate in every particular, he has produced enough evidence in support of them to suggest that hasty inferences should not be drawn from the undoubted prosperity of Palestine in comparatively recent times. It does not follow that that prosperity cannot be restored; but it does follow that its restoration largely depends on the provision of substitutes for the natural moisture which has been gradually lost.

As the combined result of war, misgovernment, and desiccation, Palestine was, at the outbreak of war in 1914, little more than a stagnant backwater. The mass of the population was apathetic and unprogressive, and was content to scratch the soil for a scanty subsistence. Such enterprising spirits as there were received no support from a corrupt and sluggish government, which at once discouraged local initiative and deterred the foreign investor. The one sign of economic life was the activity of the German Colonies in the neighbourhood of Jaffa, and on a much larger scale, of the forty to fifty Jewish agricultural settlements which had sprung up in the past thirty years on the coastal plain, in Galilee and on the fringe of Esdraelon. The oases thus created had shown what could be achieved by scientific farming under relatively favourable conditions. The Jewish Colonies in the Plain of Sharon had, for example, succeeded in producing 2,000 kilos of wheat, or 2,880 kilos of barley per hectare (2½ acres), as against a yield of 1,540 and 1,760 kilos respectively from neighbouring Arab land of good quality. The Jews had also contributed appreciably to the development of the orange growing industry, had introduced the vine on a commercial scale, had made a small beginning with afforestation, and were undertaking the scientific study of Palestinian flora at the experimental station they had established near Haifa. Their efforts, however, were of necessity on a limited scale, and were merely an earnest of what it would be possible to achieve under more favourable conditions.

Then came the war, bringing with it the almost complete cessation of such economic activity as there was. Palestine was fought over from south to north. Animals, crops, and transport were requisitioned. Such forest trees as remained were ruthlessly cut down for fuel. Under the British Administration which began its work at the end of 1917, and which became a normal civil Government in July, 1920, efforts have been made to repair this damage. Palestine however, has not yet fully recovered its equilibrium and though its future is much brighter than it was in 1914, its actual economic condition is, in some respects, still sub-normal.

(To be continued.)

AIR MAILS TO BAGHDAD.

The air mail which was despatched from London on May 4 reached Baghdad on May 12-13. The mail due to be despatched by air from Baghdad on May 13 reached Cairo on the next day, and letters included in it for this country should arrive in London about May 22. The next air mail to Baghdad will be despatched from London to-day.

The directors of Clan Line Steamers, Ltd., recommend a final dividend of 4s. per share on ordinary for the year 1921, carrying forward £102,851.

Oil Notes & News.

THE RUSSIAN OIL POSITION.

The oil situation in Russia is the subject of an interesting review which has just been issued by Messrs. Cull and Co., from which we give the following extracts:—

Until 1903, Russia was leading among the oil-producing countries of the world. Then the United States of America overtook her. Two reasons can explain that victory, viz. (1) the right organization of the American trade and (2) the mistaken policy of the Tzarist Government which limited the opportunities for oil production. The Russian State owned about 80 per cent. of the oil-bearing lands, and for the last 25 years has both withheld the granting of new concessions and increased the royalties to the State. Such royalties averaged 45 per cent. of the output and went up as high as 70 per cent. in certain cases. Such policy did not encourage production, and accordingly Russia lost her second place in the oil-producing world in favour of Mexico.

But Russian oil, in comparison with Mexican, is of a very high quality. It contains an unusually large percentage of the most valuable oil distillates—benzine, kerosene, lubricating oils, &c. In the present state of the oil trade generally, this fact adds very considerably to the value of the Russian fields.

In the middle of 1920, the Russian oil-fields were declared nationalised by the Soviet authorities. As is well-known, the chief oil-fields of Russia are situated on the Apsheron Peninsula (Baku) and in Grozny. The effect of nationalisation on the oil industry will be seen from the following figures:—

BAKU OUTPUT.

1913.	1914.	1915.	1916.
Poods.	Poods.	Poods.	Poods.
427,100,000	424,100,000	450,600,000	476,900,000

From May 28, 1920, to May 28, 1921 (the period of nationalisation), the output was 152.04 million poods. At the same time the percentage of gusher oil increased to 23 per cent. from 4.8 per cent. in 1911-1913. True, towards January, 1922, there was an increase in the output, namely:—15,205,000 poods, as compared with 12,860,000 poods in January, 1921. This increase was mainly due to the amount of baled oil.

Production.

	Poods.		Poods.
Nov., 1921 ..	6,168,000	Gusher oil ..	1,609,000
Dec., " ..	7,383,000	" ..	1,501,000
Jan., " ..	7,680,000	" ..	1,600,000
			(about)

GROZNY OUTPUT.

1913.	1914.	1915.	1916.
73,700,000	98,400,000	88,100,000	102,700,000

From May 28, 1920 to May 28, 1921 (period of nationalisation) about 50,000,000 poods. In 1921 the output was about 80,000,000 poods, and of gusher oil, i.e. of such oil which requires neither labour nor organization, there was more than 50 per cent.

The reduced boring clearly shows the failure of the Soviet policy. Lack of food, clothing and houses explains shrinkage

of workmen. During the first year of nationalisation of the industry 60 per cent of the workmen left the oil-bearing lands. No wonder that the boring of wells has practically ceased, as is shown by the following figures (in sajenes—7 ft —of length):—

IN THE BAKU DISTRICT.

1913.	1914.	1915.	1916.	1921.
65,169	51,987	47,827	43,524	about 1,700

IN GROZNY.

1913.	1914.	1915.	1916.	1921.
28,878	39,402	25,447	—	about 1,000

This stoppage of production is to a certain extent a blessing in disguise. Instead of being wasted, the oil waits for the producer who will know how to get it and how to use it. The nationalisation of the oil industry is responsible for its paralysis. Possibly there were some in Russia who thought that an industry, where so much is spontaneously furnished by nature (gushers), could be carried on without private initiative, and even without capital. But hard facts show that there is no salvation for the oil industry of Russia except by private efforts and by fresh private investments.

The Genoa negotiations demonstrate that the Soviet Government have to surrender to capitalism and to private initiative. The laws of economic development are stronger than artificial theorising. Lenin has admitted in one of his speeches that Communism has failed in Russia: industry is not possible without private enterprise, and the peasants want land as freehold! Hard object lessons have taught Russia what private property means. Communism is rapidly giving way to Capitalism and, perhaps in the near future Russia, will be a country with the strongest capitalistic mentality.

The British Burmah Petroleum Co., Ltd., report that the production of crude oil, including that of the Rangoon Oil Co., Ltd., for April amounted to 71,997 barrels.

Engineering Topics.

By Our Engineering Representative.

Disintegrating Atoms.

The investigations which have been made during the past fifteen or twenty years into the constitution and relation of the elements have been of considerable value to engineers and metallurgists, but it is evident that we have yet a good deal to learn regarding the constitution and behaviour of atoms. There appears to be no doubt that the atoms are electrical structures, all of the same general type, and that they consist of a minute charged nucleus surrounded at a distance by a distribution of negative electrons. As Sir Ernest Rutherford pointed out recently the work of Moseley has shown that an unexpectedly simple relation exists between the elements, and most of my readers are aware that according to the latest developments of science it would seem that the old-world alchemists, and the seekers after the Philosopher's Stone, may not have been so wide of the mark as our extremely ignorant fathers may have supposed. It may be some years before we are able to take pig-lead into one door of a factory and bring it out at another as ingot gold, but we are certainly getting somewhere in that direction. It appears that, apart from its mass, the properties of an element, in certain research work, were defined by a whole number which represented the charge on the nucleus and the number of the outer electrons. This number also gave the ordinal or atomic number of the element arranged in order of increasing weight. All the known elements were defined by numbers starting from one for hydrogen and ending at 92 for uranium and only a few numbers were missing. Any discussion of the structure of an atom must necessarily resolve itself into two parts: the one being connected with the laws controlling the position and movements of the outer electrons and the other the constitution of the nucleus.

It was interesting to hear that the atoms of the elements were very stable structures and in order to break them up it was necessary to use concentrated sources of energy to overcome the powerful forces holding the nuclei together. It seems that the most suitable agent for attack is the swift alpha particle from radium. The atoms were bombarded by a stream of these, and occasionally one of them passed sufficiently close to the nucleus to effect its disruption. Experiments made in this direction shew that in this way swift hydrogen nuclei have been liberated from the atoms of nitrogen, fluorine, sodium, aluminium and phosphorus, but it must be mentioned that so far the amount of disintegration has been on a very small scale.

Raleigh Productions.

At the invitation of the Raleigh Cycle Co., Ltd., I was able to make a thorough inspection not only of

their new works but of the various manufacturing processes connected with the production of pedal and motor cycles in their older factories. As a result of this I can personally testify to the extreme care which is taken to see that every part leaves the works in perfect condition. Cranks, axles, spindles, cups, cones, frames, wheels and handlebars are thoroughly tested by experts, and finally the finished product is put under conditions as closely approximating to road work as possible. In the motor cycle department, I was particularly interested in seeing that every engine was subjected to an hour's bench test, being "run in" under their own powers. Incidentally I may say that from some figures I jotted down, I find that the lightweight engine, which is supposed to be a $2\frac{3}{4}$ h.p. engine actually develops $6\frac{1}{2}$ h.p. at 3,000 revolutions per minute, whilst practically 14 h.p. is given out by the 5-6 h.p. engine at 3,400 revolutions per minute. I noted, too, that after the motor cycle engine had undergone this test, and had been assembled into its frame, it was taken out for a 15 mile road test before being sent out to its destination.

More Records.

The Wolseley "Ten," that exceptionally fine little production which I have mentioned before in these columns, and which set up no fewer than 15 new records in the Light Car class at Brooklands last November, has just put up a remarkable performance. A few days ago it was sent round the track for 12 hours' continuous run, during the course of which it set up 13 new records, including the 8, 9, 10, 11 and 12 hours', the 600, 700 and 800 miles—it ran 800 miles at an average speed of 70.21 miles per hour—and the 1,000 to 1,300 kilometre record.

I might mention that the Brookland's regulations do not now permit any attempt at 24 hours' records in one stretch, so the car was locked up for the night, and next morning was started on a further 12 hours' run, at the conclusion of which it had covered just over 1,465 miles at an average speed of just over 61 miles per hour. This constitutes the double 12-hour record for the British Light Car class and also for British cars irrespective of class. Incidentally, I may as well emphasise the fact that this model is not a specially designed racing car but a standard Wolseley "Ten," modified to suit racing conditions and fitted with a stream-line body. I should say that this is by far the most strenuous and exacting trial yet accomplished by a vehicle of the light car class and is a striking proof of the efficiency of Wolseley Standard designs, and of the strength and soundness with which these cars are built.

Power at Minimum Cost.

The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.

It is easy to start and runs unattended for long periods.

Stock and Share Markets.

MARKETS DULL AND INACTIVE.

Influence of Genoa.

(From Our Own Correspondent.)

London, Tuesday morning.

Genoa has again been the dominant market influence, and an up and down tendency has been in evidence corresponding to the eternal vicissitudes of the conference. Early in the week a very dull tone prevailed, but conditions improved somewhat later, and yesterday while the tendency was still quiet a rather better tone was noticeable. What happens to the markets in the immediate future will depend very largely on developments on the Continent. It cannot be said that the omens at the moment are any too bright, and it looks as if we were in for a short period of inactive markets. Certainly the changed conditions will demand much greater caution at present on the part of the investor, and it will not be at all surprising if there is a strong tendency to hold aloof from commitments at any rate in the more speculative sections for the time being.

Prospects of Rising Markets.

One thing has to be remembered, and that is that the markets will need very little encouragement to burst into activity, and if, as is quite possible, things abroad take a sudden turn for the better then we are certain to see rising markets. The pity is that it will not be a sign of improving trade but the opposite. The real improvement in trade when it comes will be anything but a bull point for many markets.

Rush for New Issues.

The events of the past week or so can leave no doubt in anyone's mind as to the money available for investment in sound securities. New issues have been taken up as soon as they have appeared, and in most cases have been greatly oversubscribed, this being particularly the case as regards three Indian issues. In the case of one of them subscribers only received something like 6 per cent. of the amount of their subscriptions. The prospect with regard to Near Eastern Loans is now distinctly unpromising, and as the countries concerned are unable to obtain accommodation here they are naturally turning to other countries, and are finding a much greater readiness to meet their requirements.

Gilt-Edged Quiet.

A quiet tone has ruled in the Gilt-edged group. Consols are 1-8 down at 58½, the Conversion Loan has dropped a similar amount at 77.5-8, while War Loan Fives are 99.3-8. Indian stocks have been rather variable. The Seven per Cent. Loan has lost ½ at 115, the 3½ per cent. Loan is ¼ up at 69½, while the 3 per cent. Loan is also ¼ up at 58½.

The foreign group has naturally been adversely affected by happenings at Genoa, and a rather variable tone has ruled, price changes when they have taken place being mainly in a downward direction. French stocks have been dull, War Loan Fives being ¼ down at 44½. German three per cents. are unchanged at 2.7-16. Italian Rentes have further weakened, and are a point down at 24. Russians are about the same, the 4 per cents. being 9, the 4½ per cents. 12½, and the 5 per cents. 15½. Mexican securities have been a specially dull spot with the Five per cents. down to 69. Brazilians are about the same, while Chinese securities have been dull.

Industrials Inactive.

There has been very little doing in the Industrial group, but while business has been on a very restricted scale a good undertone has been in evidence in the markets, and it would obviously take very little to bring about a very marked change in the level of quotations. Tobaccos have been fairly firm, with Bats 3d. up at 79s. 6d., while Imperial Tobaccos are 6d. up at 60s. Dunlops have weakened slightly, and are 3d. down at 8s.

A steady tone has ruled in Textiles. Coats are unchanged at 3.3-16, while Courtaulds are 6d. down at 49s. Iron and Steel securities have been fairly firm. Vickers are unchanged at 12s. 3d., Guest Keens are 6d. down at 33s. 6d., while Armstrongs are unchanged at 16s. x.d.

Shipping securities have been inactive. P. and O. Deferred remain at 325. Cunards are 3d. up at 21s. 6d., while Furness Withys are unchanged at 31s. A feature of the Industrial group of recent weeks has been the activity in Indian railway securities which have shared in the revival in Indian Government securities. In some cases very considerable advances have taken place.

Oils Irregular.

A market peculiarly sensitive to external influences like the Oil is bound to be a very uncertain quantity in present conditions. During the past week Genoa has been decidedly a bear point, and the tendency generally has been one of irregularity although in some directions strength has developed. Burmahs have shed 1-8 at 5½, while Anglo-Persian Ord at 4.13-16 are a similar amount down. Mexican Eagles are 3.17-32, a gain of 1-32. With the exception of Apex, which have been in strong request, closing at 2.5-16, Trinidad issues have been out of favour, though Centrals are a shade better than the previous week at 2½. Leaseholds are unchanged at 1½.

Among Egyptians Anglo-Egyptian B are unchanged at 1.13-16, while Oilfields of Egypt are 1s. down at 6s. 6d. In the Roumanian group Phoenix have come in for further support and at 29s. are 2s. 3d. up. Steaua Romanas are 3d. down at 13s. Roumanian Consolidated are 3d. up at 14s. 3d., while Dacia Romanos are 13-16.

Eastern Banks Strong.

The feature of banking securities has been the strength of Eastern bank shares. Chartered of India are 5-8 up at 18, while National of India are 1½ up at 42. P. and O. Banks are 9-16 up at 14.9-16.

In Egyptian securities Aboukirs are 9d down at 22s. Beheras are unchanged at 8.5-8, while Gharbieh Lands remain at 1½. Sidi Salems are 1-8 lower at ¾, while Union Foncières are 1-8 up at 2½.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old Dundee, and Calcutta makes.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from overseas buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Imported in the Near East of similar goods.

SHIPPING INTELLIGENCE.

VARNA'S GROWING IMPORTANCE.

(From Our Own Correspondent)

Sofia, May 10

Although Varna has always occupied an important position in the economic life of Bulgaria, the refusal of the Allies to grant Bulgaria an economic outlet to the Aegean Sea has considerably enhanced the importance of the town. Situated in the North-East corner of Bulgaria, almost all steamships plying between the Russian ports and Constantinople call there. Trade is fairly brisk and about 15 per cent. of the goods that are landed come from England.

Varna now boasts of over 50,000 inhabitants of which some 5,000 are Greeks and a slightly less number are Jews. Most of the shipping trade is in the hands of these two races, but Bulgarians are also increasing their interest in maritime affairs. One or two companies have been founded with the object of trading with Russia. But so far their efforts have not been successful. Trade by barter is the method most in vogue and recently a boat laden with cereals left for Odessa to return to Varna with a varied collection of jewellery and furs. Up to the present the experience of Varna merchants shows that luck is the dominant feature regarding trade with South Russia.

As a summer resort, Varna claims to be the foremost in Bulgaria, numbers of Sofiotes as well as others spending their holidays by the sea. Between the town and the Royal Palace of Euxinograd quite a number of villas have been built, and as excellent bathing is to be had on a sandy shore Varna is a pleasant place at which to spend a few weeks. The landlocked bay offers good boating, whilst some distance from land there are mackerel and other fish to be caught.

No account of life at Varna is complete without a mention of Russian refugees of whom there are about 2,000 in the town. The women work in restaurants, many new ones having been started, whilst the majority of the men eke out an existence in some way or other. Altogether Varna gives to a stranger the appearance of a prosperous and thriving town, which will greatly benefit when trade with Russia is possible once more.

CONSTANTINOPLE QUAYS.

In the House of Commons on May 2 Mr. Myers asked the Prime Minister whether certain quays at Constantinople had been purchased by the Foreign Office or any other Government Department; if so, would he indicate the time and terms of Parliamentary sanction to the purchase and the price paid; whether any profits had accrued from the transaction; and to what purpose such profits had been devoted?

Mr. Chamberlain: The Constantinople quays, which are

managed by a company, have not at any time been purchased, either by the Foreign Office or any other Government Department.

Mr. Myers: Is the right Hon. Gentleman aware that the terms of the alleged transaction, as set forth in this question, showing the price paid, the amount of the profits, and the purpose to which the profits have been devoted, associated with the names of Lord Grey and Lord Hardinge, are given in Colonel Repington's book?

Mr. Chamberlain: No. I am not aware of what is contained in the book, but my information is what I have just given to the House.

Mr. Myers: If the information is to be found in that book, then, having regard to the seriousness of the situation, what action will be taken?

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Vinolia for Bombay (Liverpool, June 2).

Anchor Brocklebank Line.—S.s. Masirah for Port Said, Colombo, Madras and Calcutta (leaves London, May 27); s.s. Mangalore for Calcutta (Birkenhead, May 31); s.s. Maidan for Port Said, Colombo, Madras and Calcutta (London, June 6); s.s. Manipur for Calcutta (Birkenhead, June 7); s.s. Mathar for Port Said, Colombo, Madras and Calcutta (London, June 20).

Cunard Line.—S.s. Cypria for Gibraltar, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Swansea, May 27); s.s. Brescia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice, Trieste, Fiume and Gravosa (Swansea, June 13).

Ellerman Line.—S.s. Maronian for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, May 18).

Ellerman's "City" Line.—S.s. City of Florence for Bombay and Karachi (Birkenhead, May 19); s.s. City of Chester for Calcutta (Birkenhead, May 22); s.s. City of Cairo for Calcutta (Birkenhead, June 1); s.s. City of York for Calcutta (Birkenhead, June 15).

Ellerman's "Hall" Line.—S.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, May 29).

Glen Line.—S.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, May 18); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, June 1); s.s. Pembroke for Port Said, Port Swettenham, Singapore, etc. (London, June 15).

Holt Line.—S.s. Eumaeus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. Glaucus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 18); s.s. Pyrrhus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 18); s.s. Elpenor for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 18); s.s. Eumaeus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 25).

Johnston Line.—S.s. Cundall for Galatz and Braila (Liverpool, May 20); s.s. Incemore for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 3).

Moss Line.—S.s. Etrib for Casablanca, Gibraltar, Malta, Cyprus and Syrian Coast (Liverpool, May 20); s.s. Amarna for Gibraltar, Algiers, Malta and Alexandria (Liverpool, May 26).

Papayanni Line.—S.s. Gerano for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, May 20); s.s. Malatian for Malta and Alexandria (Liverpool, June 7).

P. and O. Line.—S.s. Egypt for Bombay (London, May 19); s.s. Macedonia for Bombay (London, May 26); s.s. Mantua for Bombay (London, June 2); s.s. Nyanza for Colombo, Madras and Calcutta (London, June 16); s.s. Kaiser-I-Hind for Bombay (London, June 16).

P. and O. British India Line.—S.s. Matiana for Colombo, Madras and Calcutta (London, May 26); s.s. Mandala for Bombay and Karachi (London, June 2); s.s. Mantolia for Colombo, Madras and Calcutta (London, June 9); s.s. Nevasa for Bombay and Karachi (London, June 16).

LONDON PRODUCE REPORT.

Apple Arrivals Poor.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in fair demand at unchanged rates. Tate's cubes and mineral water sugar have been steady at 53s. 6d. and 48s. 9d. respectively; while London granulated at 48s. 3d. and Lyle's granulated at 48s. 6d. have remained unchanged. Export descriptions have been firm. West Indian crystallized remains the same at 42s. 6d., while white Mauritius has shed 3s. at 43s. 6d. Cane sugar quotations are:—May 15s. 0d.; June, 15s. 0d.; August, 15s. 0d.; and September, 15s. 0d. White sugar quotations are:—May, 20s. 1½d.; June 20s. 3d.; August, 20s. 4½d.; September, 20s. 3d.; and October-December, 19s. 6d.

Coffee.—All prices are firm. East Indian is the same at 120s.; Costa Rica is firm at 118s.; and Nairobi is unaltered at 108s. The futures market has been steady. Quotations are:—May, 65s.; July, 62s. 6d.; September, 62s. 6d.; December, 60s. 7½d.; and March, 61s. 6d.

Dessicated Coconut.—A good demand has been maintained throughout the market, while quotations are on a more steady basis.

Rice.—American Java rices continue to be in good demand, while Spanish Japan rices have been neglected due to the high prices being demanded. Attention is being given to the Italian variety which is good and the price of which is comparatively low.

Green Fruit.—Arrivals of oranges have been smaller, resulting in higher quotations. There has been a general falling off in the demand for lemons, while prices have hardened. Fine fruit is scarce. The condition and quality of apples arriving have been most disappointing. Large sacrifices are being made to clear the market of bad conditioned fruit. The market for Egyptian onions has been steady.

Oilseeds.—Unsteadiness prevails. Indian linseed has been steady at 22s. 6d., while La Plata has gained 6d. at 21s. 6d. Rapeseed has risen with Toria 6d. up at 19s. Cottonseed has been firm. Indian is unaltered at 10s. 6d., while Sakellaridis is unchanged at 12s. 7½d., and Egyptian black is steady at 12s. 7½d.

Oils.—A firmer tone has characterised the market. Linseed oil has gained 1s. 9d. at 46s. 3d. Rape oil has been steady with crude at 45s., and refined at 48s. Cotton oil has remained the same as last week with the exception of Egyptian crude which has gained 6d. at 43s. Refined and deodorized are both firm at 49s. and 54s. respectively, while technical shows no change at 44s.

Oilcakes.—Linseed cake has been firm at 300s. ton. Cottonmeal cake has been steady at 280s. ton, and coconut cake and cottonseed cake at 160s. and 180s. ton respectively are the same.

CROP CONDITIONS IN IRAQ.

The Agricultural Bulletin of Iraq (Mesopotamia) gives the following particulars of crop conditions for the month ended March 15:—

As for the month of January, the month of February continued to be unusually mild and the current winter season has been exceptional in that not on a single occasion have frosts been recorded in Baghdad. Rains continued to be plentiful in Upper Iraq and there was a general and fairly heavy fall of rain early in March. The growth of all vegetation has continued and it is the general opinion of the Arab population that the desert and steppe lands are better covered with herbage than in any year which they can recall.

As previously reported, the mild season induced certain varieties of fruit trees to flower prematurely and owing to the absence of late frosts no harm has resulted. The flower spathes of the date palm have for the same reason appeared some weeks earlier than is customary, and provided insect attacks are not severe, the Arabs anticipate a good date season. Both irrigated wheat and barley are bumper crops, and here again the incidence of rust disease is likely to be the main factor which will determine the quantity and the quality of the cereal crop.

Condition of Crops.

The clearance of the Yusufiyah Canal has been completed and though labourers were obliged to defer the sowing of crops owing to the demand for manual labour in clearing the canal the area that has been sown to cereals exceeds that of previous years. The crop on this canal, though rather backward, is in good condition. There has been a considerable extension in the cultivated area commanded by the Saklawiyah. The Hillah and Gharraf crops are in prime condition. Winter vegetables are plentiful and citrus fruits continue to be marketed.

The Director of Civil Veterinary Services reports outbreaks of rinderpest in the Dialah and Busreh areas. Altogether 814 animals were inoculated; 145 died before veterinary assistance could be rendered and six infected animals were treated with success. Sheep pox was reported from Kut; 200 animals were treated with success. Fodder supply is everywhere plentiful, and the condition of stock continues to be particularly good.

Experimental Farms and Research.

Land has been prepared on all farms to receive the cotton crop. A comprehensive cropping scheme for various experiments has been prepared for the Central Farm at Rustam, where plant breeding and experimental work with cotton will be continued.

Experimental wheat on all farms is making satisfactory growth. The autumn sown flax crop at Kut has made exceptional growth and has attained an average height of 3ft. 6ins. Land has been prepared for 100 acres of cotton at the Central Farm with the primary object of propagating the seed. Four acres of land have been planted with poplar and willow cuttings on a semi-commercial scale. The analysis of soils from the Amara area was completed during the month.

District Work.

The demand for cotton seed was appreciably in excess of the supply, and despite the high cost of the seed distributed by the Government, which was designed to ensure that the cultivators would give it special attention, the demand has been well in excess of the supply. Cash payment which is demanded for the seed may later induce some of the cultivators to reduce their demand. The total amount of seed now available is sufficient to sow about 2,500 acres. The necessary records will be maintained by the District Staff of all plots of cotton grown from seed supplied by the Department of Agriculture.

Arrangements are completed for demonstration work in silk culture with headquarters at Bequba. Considerable difficulty has been experienced by the commercial firm who imported 2,000 packets of silk worm eggs, which should normally be sufficient for 4,000 families, in disposing of the eggs. The main difficulty is that of cash payment, which silk cultivators are not accustomed to. Arrangements are in train for the Agricultural District Staff to collect on behalf of the importing firm a specified quantity of silk cocoons at the end of the season. This is being done in the mutual interests of the importing firm and of the development of the silk industry. The question of arranging periodic visits of local school children to the silk depot is under

City Office: 10/12 Cophall Avenue, E.O.2.

consideration in consultation with the Department of Education.

An agricultural officer, accompanied by the Assistant Entomologist, has proceeded to the steppe lands of Upper Iraq to experiment with two imported solutions in controlling outbreaks of locusts. Owing to the heavy rains experienced in this tract in the current season, the local inhabitants are of the opinion that all the locust eggs have been killed by excessive moisture in the ground.

It is pleasing to be able to record that the local agents for the Anglo-Persian Oil Company have succeeded in reducing the price of bulk kerosine oil, Qalyan Brand, from 13½ annas to 10½ annas per gallon, which action has been much appreciated by all owners of pumps. The question of co-operative ownership of oil tanks by pump owners is under consideration.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the month ended April 29 :—

The activity in opium reported in our last monthly circular of March 31 has continued throughout the present month with gradually advancing figures until we reached as high as 12s. per lb. C.I.F. for 12 per cent. The reason of this advance is not only owing to a brisk demand from consumers, but also to our depleting stocks, as the arrivals of the drug from the growing districts are small and far between. We have been informed that constant shipments of opium are being effected from the North Asia-Minor ports to Russia, which we presume are destined for the Far Eastern Markets by way of Siberia. This, as everyone understands will very soon deplete our Interior stocks, especially as our crops are getting less and less every year.

Another factor which must be taken into consideration is the high prices for labour, which growers, when they can find it, have to pay. In pre-war times the average price of labour in the Interior nowhere exceeded 10 pence per day for every able bodied man, and now it is over 12s. and at that figure farmers complain that there is a great dearth. The total amount of opium which changed hands during this month is about 15,680 lbs. and the average Sterling price paid is 11s. 3d. per lb. C.I.F. port of destination. The arrivals to date are 1,300 cases against 1,370 at same date last year, and our stock in first and second hands is now 930. The exchange is weak at Ps. 650 per pound sterling for cheque on London, and 0.68.3-4 dollars for one Turkish pound.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud & Co., Smyrna, report as follows for the week ended April 29 :—

Sultanas.—The total estimated arrivals to date amount to 170,450 bags as against 103,500 bags for the corresponding period of last year. The estimated sales were 166,450 bags compared with 103,375 bags for last year, while the estimated stock unsold totals 4,000 bags as against 125 bags for 1921.

Markets.—The sultana market continues in firmer tendency. It will be noted that total sales this week amount to about 10,000 boxes. Stocks during April have been reduced by about 300 tons. Remaining available supplies for export are assessed at about 1,300 tons, mostly of inferior qualities.

CURRENT PRICES.

General Produce.—Bacon : (Continental), 144s. cwt. ; (Canadian), 128s. 6d. cwt. ; (American), 100s. cwt. ; butter (Danish), 188s. cwt. ; (Australian), 170s. cwt. ; (New Zealand), 172s. cwt. ; cheese (Canadian), 92s. cwt. ; (New Zealand), 78s. cwt. ; lard, 70s. 6d. cwt. ; eggs (Danish), 16s. 6d. per 120 ; (Styrian), 12s. per 120 ; chillies, 162s. 6d. cwt. ; cloves (Zanzibar), 1s. 2½d. lb. ; cocoa (Ceylon good to fine), 90s. cwt. ; coffee (Costa Rica), 132s. 6d. cwt. ; (East Indian), 125s. cwt. ; (Central American), 104s. cwt. ; (Jamaica), 69s. 9d. cwt. ; (Mocha longberry), 105s. cwt. ; (Santos, superior), 71s. 6d. cwt. ; ginger (washed Cochin), 52s. 6d. cwt. ; nutmegs (110's to 80's), 11½d. lb. ; pepper (Singapore black), 4d. lb. ; (Muntok white), 7½d. lb. ; pimento, 2.1-8d. lb. ; raisins (Valencias), 67s. 6d. cwt. ; sultanas (Smyrna), 119s. cwt. ; currants (Vostizza), 71s. 6d. cwt. ; (Amalias), 59s. cwt. ; sugar (Tate's cubes), 53s. cwt. ; (Lyle's granulated), 48s. 4½d. cwt. ; (Mauritius crystals), 44s. 6d. cwt. ; (West Indian crystallised), 42s. cwt. ; (centrifugal), 14s. 9d. cwt. ; tapioca (fair Singapore), 2d. lb. ; rice (Rangoon No. 2), 14s. 1½d. cwt. ; 1½ (bran

Rangoon), 16 6s. 3d. ton ; cinnamon (firsts), 11½d. lb. ; mace (fair Singapore), 1s. 6½d. lb. ; tea (Indian, common to good common), 1s. 1½d. lb. ; (medium to good), 1s. 6d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 1s. 2d. lb. ; (medium to good), 1s. 6d. lb. ; (fine to finest), 2s. 7½d. lb. ; Java (common to good common), 10½d. lb. ; wheat (English white), 59s. 6d. qr. ; wheat (Australian), 60s. 9d. qr. ; barley (malting), 45s. qr. ; barley (feeding), 30s. 6d. qr. ; oats (English), 36s. qr. ; oats (La Plata, ex-ship), 20s. 3d. qr. ; maize (La Plata), 39s. 1½d. qr. ; flour, 47s. sack.

Metals.—Aluminium, £122 10s. ton ; antimony (English Regulus), £30 15s. ton ; bismuth, 9s. lb. ; copper (standard), £59 18s. 9d. ton ; copper (electro), £66 ton ; gold bars, 93s. 5d. oz. ; iron (No. 3 Cleveland), 90s. ton ; hematite (mixed number), 97s. 6d. ton ; galvanised sheets (25 G), £16 5s. ton ; lead (soft foreign), £23 11s. 3d. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 30s. unit ; nickel, £175 ton ; platinum, 300s. oz. ; plumbago, £16 ton ; quicksilver, £10 2s. 6d. bottle ; spelter (G.O.B.), £26 18s. 9d. ton ; tin (standard), £149 17s. 6d. ton ; wolfram, 10s. 1½d. unit ; zinc sheets, £35 5s. ton ; tin plates (20 by 14), 19s. 6d. box ; silver bars, 35½d. oz.

Chemicals.—Acids : Boric, 61s. cwt. ; oxalic, 8½d. lb. ; citric, 2s. 1½d. lb. ; tartaric, 1s. 3½d. lb. ; ammonia (sulphate) £16 11s. 6d. ton ; arsenic (white powdered), £35 5s. ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £12 10s. ton ; borax crystals, 29s. 6d. cwt. ; cream of tartar, 118s. 90s. cwt. ; Potassium : Bichromate, 6½d. lb. ; chlorate, 4½d. lb. ; caustic, £33 10s. ton ; nitrate, £37 10s. ton ; permanganate, 9½d. lb. ; prussiate yellow, 1s. 1½d. lb. ; sulphate (90 per cent.), £15 5s. ton ; Sodium : Crystals, 130s. ton ; bi-carbonate, £11 5s. ton ; bichromate, 5½d. lb. ; alkali (58 per cent.), £9 1s. 3d. ton ; chlorate, 3½d. lb. ; caustic (70 per cent.), £23 ton ; hyposulphite, £16 ton ; prussiate, 9½d. lb. ; nitrate, £15 1s. 3d. ton ; glycerine (crude 80 per cent.), £75 ton ; glycerine (industrial 1260 per cent.), £100 ton ; lemon oil, 3s. 6½d. lb. ; quinine, 2s. 10½d. oz. ; red lead, £36 ton ; white lead, £39 5s. ton ; white ground lead, £49 15s. ton ; sulphate of copper, £27 5s. ton ; sulphate of iron, 75s. ton.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 8½d. lb. ; 80 to 89 lbs., 8½d. lb. ; 70 to 79 lbs., 8d. lb. ; 60 to 69 lbs., 7.3-8 lb. ; 59 lbs. and under, 6½d. lb. ; (second), 90 lbs. and up, 6½d. lb. ; 80 to 89 lbs., 6.7-8d. lb. ; 70 to 79 lbs., 6½d. lb. ; 60 to 69 lbs., 5.7-8d. lb. ; 59 lbs. and under, 5.1-8d. lb. ; Cows (first), 60 lbs. and up, 6.7-8d. lb. ; 59 lbs. and under, 6½d. lb. ; (second), 60 lbs. and up, 5d. lb. ; 59 lbs. and under, 5d. lb. ; Bulls (first), 4.5-8d. lb. ; (second), 3d. lb. ; Kips (first), 4½d. lb. ; (second), 3½d. lb. ; (third), 2.7-8d. lb. ; Calcutta Market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 7.8 to 13 ; Durbhargas, 6 to 7.8 ; Patnas, 5 to 6. Salted cows, 4 to 7.8. Arsenic hides (buffalo), 4 to 8. Skins : Calf, 8 to 10 per 20 lb. ; goat, 200 to 240 per 100 pieces.

Miscellaneous.—Cotton : (American), 11.12d. lb. ; (Egyptian Sakel), 17.22d. lb. ; jute (first grade c.i.f.), £29 17s. 6d. ton ; jute (lightnings), £27 ton ; Oilseeds : Linseed (La Plata), £21 11s. 3d. ton ; palm kernals, £18 7s. ton ; castor seed (Bombay), £16 17s. 6d. ton ; sesame seed (China), £24 12s. 6d. ton ; soya beans, £12 12s. 6d. ton ; Oils : Linseed, £44 7s. 6d. ton ; olive (Spanish), £70 ton ; rape (crude), £44 10s. ton ; soya, £38 7s. 6d. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex-tank), 70s. ton ; coconut (Ceylon), £39 12s. ton ; cotton (crude), £42 5s. ton ; ground nut £44 15s. ton ; Rubber : Plantation (No. 1 crepe), 8½d. lb. ; smoked sheet, 8½d. lb. ; fine hard Para, 10½d. lb.

The Burma Railways announce in addition to guaranteed interest of 1½ per cent., an interim dividend of 1½ per cent. in respect of surplus profits, both less tax, payable July 1.

Coupons due May 15 of the Persia 5 per Cent. Sterling Loan 1911 will be paid on and after that date at the Imperial Bank of Persia, 25, Abchurch Lane, E.C.4, or at Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, E.C.3.

Cotton & Cotton Goods.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in its report for the week ended May 5 states :—

Since our last report the futures market has been fairly active although the undertone has certainly not been as good as one would expect. This week's sensational rise in the New York market, which at one time brought high prices for near positions to about 20 cents, has but slightly influenced our market, this poor response being due to the heavy accumulation of stocks here and in Liverpool, and the very poor demand for actual cotton from the leading consuming countries. As a secondary cause of this somewhat depressing state of things may be mentioned a carters' strike which has this week seriously impeded business as is shown by the poor export figures. The prospects of an early settlement of the dispute are good. Speculation has again been more or less inactive, and it is apparent that before committing themselves on the bull side speculators would like to see a substantial reduction in the existing stocks or hear really bad reports on the progress of the new crop. The Government has this week bought very little cotton, and it is apparently not its intention to buy on rising markets. The local political situation keeps rather quiet, and on the Stock market a very firm tone still prevails, quotations all round registering considerable advances, this being especially the case with gilt-edged securities.

Spot :—Total sales amount this week to about 9,000 bales which figure includes 500 bales Sakellaridis bought by the Government ; of this total we estimate 6,600 bales Sakellaridis, 2,200 bales Uppers, 150 bales Pilon and 50 bales White. The last two days have shown considerably increased activity but the demand always remains in the inferior qualities.

The Government purchased about 500 bales Sakellaridis F.G.F. and F.G.F. to Good from 34 to 35 1-2 at the beginning of the week but afterwards withdrew from the market. The bulk of the business done has been in the grades G.F. and below although there has been a slightly increased demand for the better qualities. The basis in general remains unchanged, with the exception of Good which is slightly firmer.

Climatic conditions have been more or less favourable and the present state of the plant is satisfactory. The proportion of resowings in general has not been heavier than the normal. The water supply is hardly adequate for all requirements and complaints are more or less general.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Friday.

The market during the past week has been distinctly dearer. The further advance in raw cotton values has stimulated demand in yarn and cloth. Although from the point of view of Lancashire higher prices for the raw material are not desirable if the increased values are maintained it will give our customers abroad more confidence in placing orders. The two mill disputes in Oldham are not considered very serious. In the cloth

section there has been a considerable demand about for the outlets of the Near East and useful orders have been secured for Egypt and the Levant. Egyptian yarn quotations have hardened, and on the whole increased demand has been met with, but the total sales have not been important. There has been a big cloth inquiry for India, and sales have been arranged in a wide range of fabrics. China has been quiet, but the auctions are to be resumed there next week. American yarn quotations have been higher, and spinners have reported more activity. Altogether the prospects of the market at the moment are the most encouraging we have experienced for some time back, and, generally speaking, higher values all round are anticipated, as the American cotton crop has had a bad start, and there is every likelihood of a shortage of the raw material during the coming season.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 10 :—

The past week has proved to be the most promising one we have witnessed for a considerable time—at least as far as actual concrete results are concerned. The general daily enquiry has shown improvement, and Uppers and Brown cottons have been attracting more attention. Sakellaridis, of course, still claims the largest share, but this week Sudan cotton has also been much in request (no less than 1,000 bales having been purchased on one day alone), and as we write this demand, which has been the feature of the week, shows no signs of flagging. In sympathy with American futures, our futures market has displayed an upward tendency, but the advance has not as yet been reflected on the spot, where one finds the greatest difficulty in obtaining anything like the official quotations ruling. Spinners are still fighting against the smallest advance in the price of raw material.

C.i.f. business has continued to run on quiet lines only. Manchester reports have been consistently good throughout the week, and there seems but little doubt that a real improvement in trade has at last become manifest. Business with India appears to be broadening out, whilst Egypt and other of the smaller outlets are again adding their quota. The Shanghai auctions are to be resumed next week, and it is hoped that, now that order has been more or less restored in China, the weight of that country's buying power will once again be felt to advantage. Crop reports from Egypt are, on the whole, favourable, although in certain districts complaints are forthcoming of water shortage. It is possible that this shortage may become more acute as time goes on. The acreage planted appears to be slightly in excess of the 1921 sowing. Estimated sales 4,600 bales (includes 1,700 bales Sudan). Quotations of " Good " and above in Sakellaridis are reduced 25 points ; other quotations are unchanged on the week. Fully Good Fair Sakellaridis 18.00d.

MANCHESTER COTTON REVIEW.

The Imperial Ottoman Bank report for the week ended May 13 states :—

The past week has been the best in the cotton trade from every point of view for a very long time. The settlement of the wages question for a definite period, and the strength of the raw cotton market, have combined to induce in buyers a sentiment more favourable to the placing of orders even at slightly higher prices than those recently ruling. Another factor which has undoubtedly helped the market is the slight improvement of the exchange in India and China.

Yarn.—In this market good business has been done, and prices are firmer than a week ago. The weak spots amongst producers are fewer, and the tone generally is improved. It is interesting to note from the Board of Trade returns the rapid way in which our exports of yarn are developing. Whilst from one point of view this is good it represents the loss to this country of a certain amount of weaving formerly done here, the countries to which this yarn is being exported evidently doing this themselves. Shipments of yarn last month amounted to 21,328,000 lb. against

COMMERCIAL BANK of GREECE, Ltd.

CAPITAL PAID UP—Drs. 20,000,000.

RESERVE FUNDS Drs. 10123,920,45/00.

Head Office : ATHENS.

Branches:—Piræus, Salonika, Patras, Vola, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Aegion), Nauplia, Larissa, Triccala, Mitylene, Canoe.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:

The Bank undertakes the warehousing and sale of goods consigned

18,750,700 lb. in March, and 8,852,700 lb. in April, 1921, which was, however, an exceedingly bad month.

Cloth.—This section is perhaps not quite so firm as yarn, as the higher prices now generally quoted are acting to a certain extent as a deterrent to the placing of actual business. Nevertheless makers are in a much stronger position, and there is a tendency on the part of buyers to meet them in price. India has again been the principal buyer. China is operating more freely following the better political news. Egypt and the Levant have also shown more activity and the same may be said of South American markets. Shipments last month amounted to 302,598,200 square yards against 303,857,500 square yards in March, and 186,760,700 square yards in April last year.

Raw Cotton.—Whilst this market has maintained this upward tendency of the preceding week there have been several fluctuations, but there is a net rise on the week in fully middling American of 58 points. The strength shown has imparted itself as above-mentioned to all sections of the trade. Closing prices:—American fully middling 11.73d., Egyptian Fully Good Fair, 18.00d.

CZECHO-SLOVAK BANK RATE REDUCED.

At the monthly meeting of the Bank Committee attached to the Czecho-Slovak Ministry of Finance the Finance Minister presiding, it was decided to recommend the reduction of the bank rate from $5\frac{1}{2}$ to 5 per cent. The Committee expressed the hope that the reduction would favourably affect the industries of the country, which are suffering from a temporary depression owing to the loss of markets through the high value of the Czecho-Slovak crown. The Committee further reported that from 15th March to 15th April the fiduciary circulation had been reduced by 350 million crowns. The exchange rate of the Czecho-Slovak crown maintains its high level, a result to which the success of the State Loan floated in England and the foreign loans of the municipality of Prague have contributed.

ROUMANIAN CONSOLIDATED.

The Roumanian Consolidated Oilfields, Ltd., production for the period April 16 to 29 amounted to 1,030 tons. Development work was as follows:—Moreni, well No. 44: drilled 16 mètres, to 836 mètres, cased to 832 mètres. Well No. 51: making road and derrick foundations. Well No. 61: drilled 42 mètres, to 634 mètres. Well No. 83: depth 738 mètres, cased with $12\frac{1}{2}$ in. collared pipe to bottom. Well No. 101: Erecting derrick and cased hand-dug. Well No. 102: drilled 63 mètres, to 325 mètres. Well No. 104: Drilled 14 mètres, to 867 mètres. The first gas-sand has now been reached, and this well should strike the powerful oilsand at about 900 mètres, instead of the 920 mètres previously estimated. Well No. 106: drilled 56 mètres with rotary to 66 mètres. Gura Ocneitei well No. 4: depth 706 mètres; cleaning with corkscrew bit at bottom. Chiciura well No. 10: depth 620 mètres; lowering Mannesmann poles. Aricesti well No. 5: depth 119 mètres, loosening 18 in. casing. Well No. 6: drilled 11 metres, to 23 mètres. Well No. 7: rigging up.

THE LATE MR. A. E. BENACHI.

Mr. A. E. Benachi, whose death occurred recently at Alexandria, was a member of the firm of Choremi, Benachi and Co., and a member of the Cotton Association. He was 44 years of age, and was the second son of Mr. E. A. Benachi, who was senior partner of Messrs. Davies, Benachi and Co., cotton merchants, Liverpool, until his retirement some years ago. Mr. Benachi was educated at Rossall, and joined the Liverpool firm, of which he became a partner. He went to Alexandria ten years ago. Mr. E. A. Benachi, his father, was Lord Mayor of Athens, as well as being Minister for Trade in the Venizelos Administration during the war.

The quantity of gold extracted from the mines in India during February, amounted to 34,090 oz., valued at Rs.23,14,441.

The Burma Railways Company announces, in addition to a guaranteed interest of $\frac{1}{2}$ 5s. per cent., an interim dividend of $\frac{1}{2}$ 15s. per cent. in respect of surplus profits, payable July 1, both less tax.

A Reuter message from Constantinople states that Javid Bey, the former Unionist Minister of Finance, has been elected unanimously as the delegate of the Turkish bondholders on the Council of the Ottoman Public Debt.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Egypt.

Drugs, etc.—The Department of Public Health invite tenders for the supply of drugs required for the period of six months from October 1 next. The tenderer must be a person residing in Egypt or must have a representative in Egypt. June 15 (D.O.T.)

Blacking.—The Egyptian Ministry of War invite tenders for the supply of 30,000 lb. of blacking. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 16.

Sailors' Navy Blue Serge.—The Egyptian Ministry of War invite tenders for the supply of sailors' navy blue serge. Particulars can be obtained from and samples seen at the office of the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 24.

Brooms and Brushes.—The Egyptian War Department invite tenders for the supply of brooms and brushes. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. May 17.

Weighing Machines.—The Physical Department of the Ministry of Public Works, Cairo, invite tenders for the supply of platform weighing machines and also for counter scales and appliances. Tenders must be sent to the Controller, Physical Department, Ministry of Public Works, Cairo. Drawings must be furnished. Representation by an agent resident in Egypt is essential. June 1. (D.O.T.)

General Repairs.—The Inspector, South Division, State Buildings Department, Cairo, invites tenders for general repairs for ten months from June 1, 1922. May 24.

Drums.—The Department of Supplies Stores, Savoy House, Cairo, invites tenders for the supply of 550 drums of 4 gallons new or second hand in good condition. May 12.

Baling Cloth.—The Director-General, State Domains Administration, Sharia El Falaki, Cairo, invites tenders for the supply of baling cloth, cotton sacks, and grain sacks. May 15.

Carbide of Calcium.—Tenders are invited by the Postmaster-General, G.P.O., Alexandria, for the supply of $12\frac{1}{2}$ tons of carbide of calcium. Delivery October 2, 1922. June 15.

Paper etc.—Tenders are invited by the Superintendent, Government Press, Bulaq, Cairo, for the supply of paper, bristol-board, and mill-board. June 20.

Binding Cloth etc.—Tenders are invited by the Superintendent Government Press, Bulaq, Cairo, for the supply of binding cloth and roller composition. June 24.

India.

Boiler Tubes, etc.—The High Commissioner for India invites tenders for the supply of:—1. Tubes; boiler, steel, solid drawn, of various sizes, for locomotives—No. 14,000. 2. Pins, keep, split, bright, and screws, iron, of various descriptions and sizes. 3. Mild steel plates, plain, of various sizes—125 tons. 4. Enamel ware utensils (slop pails, pots, basins, ewers, spittoons, etc.). 5. Insulator cups, porcelain or glass—No. 430,000. 6. Paints, dry, and ground in oil, of various descriptions, and driers. Forms of tender may be obtained from the Director-General, India Store Department. Tenders close on May 16 for No. 1, and on May 26 for Nos. 2 to 6.

Cast Iron Waterpipes.—The Jharia Water Board, Topchanchi, near Gomoh, on the East Indian Railway, invite tenders for the supply of 3,300 tons of 21-inch cast iron water pipes and special castings. June 7.

Girder Bridges.—The East Indian Railway invite tenders for the supply of girder bridges. Tenders should be addressed to the Secretary of the Company, 29 and 30, Nicholas Lane, London, E.C.4. May 17.

Gas Engine, etc.—Tenders are invited by the High Commissioner for India for the supply of:—(1) Gas engine, horizontal, single cylinder, and generator. (2) Scales and weighing machines. (3) Machines, lithographic, rotary. (4) Tin sheets. (5) Springs, helical and volute, for engines, etc.

Forms of tender may be obtained from the Director-General India Store Department, Belvedere Road, Lambeth. June 2 for Nos. 1 to 4, May 30 for No. 5.

Palestine.

Coal.—The Crown Agents for the Colonies, acting for the Administration of Palestine, invite tenders for the supply of 15,000 tons large Welsh steam coal, c.i.f. Haifa. Forms of tender and conditions of contract may be obtained at the office of the Crown Agents for the Colonies, 4, Millbank, London, S.W.1.

Bulgaria.

Bar Iron.—The Bulgarian Directorate of Railways and Ports invites tenders for the supply of:—78,300 kilogrammes flat iron bars; 136,750 kilogrammes round iron bars; 6,650 kilogrammes hexagonal iron bars; 46,250 kilogrammes square iron bars; 12,000 kilogrammes angle iron. Delivery is required c.i.f. Bulgarian, Black Sea or Danube Port within four months of the date of the order. May 26 (D.O.T.).

Yugoslavia.

Shirts and Pantaloon.—The Direction of the Serbian Army invite tenders for the supply of 100,000 shirts and 100,000 pantaloon, for delivery as follows:—25,000 pieces in 75 days, 50,000 pieces in 105 days, 25,000 pieces in 120 days. Further particulars may be obtained from the offices of the Banque Franco-Serbe, 30 Coleman Street, E.C. May 23.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from a recent report received by the Imperial Ottoman Bank:—

Constantinople, May 6.

Business remains feeble here, the position in Anatolia paralysing more and more the activity of our traders. Imports are restricted to absolute necessities, and consist chiefly of foodstuffs such as flour, sugar, butter, rice. The financial crisis continues.

There is no change in the market for manufactures. Transactions are restricted. It is hoped that some sales will be made with the approach of the Bairam holidays.

Sugar.—The demand locally and for the ports of the Black Sea and of Syria has strengthened the market. American sugar has been done at £21½ per ton and Dutch at £24 per ton. Sugar in customs has hardened by £T2 per 100 kilos. Quotations are:—£T26½ for American, and £T27½ for Dutch.

Coffee.—Prices have further increased in Brazil. Here the quotation is Ps.50-56 in transit. Stocks are estimated at 4,000 sacks.

Rice.—This commodity remains firm on all the European markets. Quotations:—Saigon No. 1, Marseilles shipment, 84 francs per 100 kilos; Rangoon, Alexandria shipment, £16 per ton; here Ps.16½-17 per oke.

CLEARANCE OF GOODS IN SYRIA AND LEBANON.

A Decree of the French High Commissioner in Syria and Lebanon provides that reliable importers may import goods into Syria and Lebanon without immediate payment of Customs duties, credit being allowed for a period of one month on payment of an extra ½ per cent. of the duty. In order to obtain this credit the importer must give bills for the amount, bearing interest at the rate of 6 per cent. per annum.

LIVERPOOL CHAMBER OF COMMERCE.

At the annual meeting of the Greek and Levant Trade Section of the Liverpool Chamber of Commerce, Mr. J. Irving Rogers (Messrs. J. Irving Rogers & Co.) was re-elected chairman, and Mr. E. L. Kenyon (Messrs. Levy Kenyon & Parker) vice-chairman. A cordial vote of thanks was accorded to the retiring vice-chairman (Mr. Acratopulo) for his work in connection with the section during his term of office.

The following resolution was passed by the Section: "We, the members of the Greek and Levant Section, whilst considering the Hague Rules preferable to the conditions of present bills of lading, and having, therefore, already recommended their immediate adoption, consider, in common with all the leading traders' associations of Great Britain, that the said Hague Rules should form the basis of a legal enactment on the lines of the Canadian Water Carriage of Goods Act, 1910, in accordance with the recommendation of the Imperial Shipping Committee, 1921, and urge upon the Government to forthwith pass an Act to this effect."

NATIONAL BANK OF GREECE.

The Economic Outlook.

The ordinary general meeting of the shareholders of the National Bank of Greece was held on March 25 at the head office of the bank at Athens. The governor, M. D. Maximos, read on behalf of the general council of the bank the report for 1921 the chief points of which are given below:—

"The Asia Minor campaign" said M. Maximos "was carried on during the past year exclusively with our own financial resources. Foreign financial aid, which is indispensable in every war, and which constitutes one of the most important factors of success, was completely lacking. No loan or credit was granted to the Government from abroad during the whole year under review, and it became necessary for it further to intensify its financial efforts as the country was exhausted by long years of war.

"From the beginning of the Great War until to-day, Greece has received financial assistance from abroad to the extent of £6,540,000 (against the credit of £11,895,321 3s. 6d., granted by the British Government, according to the terms of the agreements of February 10th, 1918 and May 19th, 1919), of 15,000,000 dollars (against the similar credit of 48,236,629.05 dollars from the United States) and of 7,342,702.97 dollars (from the Canadian Government for the purchase of wheat), or advances in all amounting to 280,328,000 francs, but, on the other hand, she advanced for the maintenance of the French troops in Macedonia a sum of 309,468,044 drachmae (capital and interest up to the end of 1921). As these two sums approximately balance each other, owing to the rate of exchange at the time the advance was made for the French troops, the only real assistance received by Greece has been a certain quantity of war material, the share of which to be charged to her according to her general financial and economic situation (in pursuance of the terms of the agreement of February 10th, 1918) has not yet been fixed.

"The world-wide economic crisis continued throughout the year 1921. In spite of every endeavour, the economic and industrial stagnancy showed no signs of amelioration. The prevailing international political uncertainty and the difficulties in the way of business relations aggravated the economic situation to such a degree that the past year may be looked upon as one of the worst ever experienced. Unemployment was so great, especially in those industrial countries which possess a healthy currency, that, in the case of England for example, the British Premier described the position as the worst period in respect of unemployment which that great nation had to confront for a whole century, or from the end of the Napoleonic Wars. This wholly abnormal and very dangerous situation is due to the reduction of the power of consumption, owing to the want of means to pay for articles of consumption, to the closing of important markets, to the reduction of the world's trade almost to one-half of the pre-war volume, and to the fluctuations and fall of the different exchanges. Fortunately certain comforting signs of an improvement in the unfavourable conditions under which mankind had to live during the past year began to appear on the internal economic horizon at the commencement of the present year.

"In spite of the fact that the international economic situation last year was such as I have briefly described it above, and that during the whole of the year we were carrying on the greatest war that the Greek race has ever yet known, our markets showed signs of very great powers of resistance and no serious irregularity presented itself during the period under review. Trade, industry and agriculture continued their regular course, thanks to the assistance accorded them by the credit institutions of the country, whose position is excellent.

"The National Bank, although circumstances compelled it to remain at the side of the Government, and to afford it every financial assistance in its power, in order to carry on the great national work, nevertheless kept its doors open to serve the requirements of the commerce, agriculture and industry of the country. It was only the agricultural needs of Western Thrace that we were unable to satisfy as widely as we should have desired. This question will in the near future form one of our chief cares, as the future welfare of the country depends upon the exploitation of its agricultural wealth. The data which we possess, and which we are studying, show that a very great increase in our agricultural production can be achieved by systematic work. Once this is done, Greece will become one of the richest countries in Europe, thanks to her other sources of wealth as well. This object requires as a *sine qua non* the harmonious and assiduous co-operation of the three chief factors, viz., labour, capital, and the mechanism of the state. We have no doubt that the Government will devote its attention to rendering healthy the finances of the state by enforcing a programme of the strictest economy in all branches of administration and by bringing about a corresponding increase of the national revenue. We also hope that the proper measures will be taken with a view to securing a more harmonious functioning of the administrative machinery. We must, all of us, however, contribute all the aid in our power in enforcing these measures which are indispensable for our economic restoration.

"During the year under review Greece, like most other countries, passed through a period of great fluctuations in the rates of foreign exchange. The exceptional conditions in which

our country found itself during this period, the influence of which naturally affected the price of the drachma, were chiefly responsible for this result. We had need of large amounts of foreign exchange for the supplies of the army, which was fighting in places where its expenses had to be paid in foreign money. The influence of this fact on the rate of foreign exchange might have been mitigated if the Government had imposed the drachma as legal tender in the occupied territory. But, for political reasons, it was thought better not to adopt this measure. Consequently, speculation developed on a large scale, and grew to such dimensions in May last that the Government was compelled to take steps to secure a monopoly of the handling of exchange by those banks which do business in Greece. The banks, with that patriotism which has always distinguished them, placed their services at the disposal of the State, as well as part of their disposable funds in exchange. In this way, by Law 2612 of May 11-24 a Consortium of Banks was created, which included on December 31, 1921 (January 13, 1922) 25 banks with a capital of £1,636,519 of which the National Bank had covered £1,000,000. This organisation in our opinion rendered most important services to the country, since, thanks to it, it was found possible to restrict the demand for exchange and to fix the rates on the basis of the offers and the real needs of the market, and to avoid the great fluctuations consequent on speculation, the result of which is extremely harmful to the economic life of the country.

"Foreign trade shows considerable improvement in the year under review, as will be observed from the following figures, issued by the Statistics Department of the Ministry of National Economy:— Imports (1920)—Dr. 2,131,038, 321; (1921)—1,673,619,410; Difference—457,418,911. Exports (1920)—Dr. 604,112,647; (1921)—816,991,190; Difference—152,878,543. Total (1920)—Dr. 2,795,150,968; (1921)—2,490,610,600; Difference—304,540,368.

"In spite of the situation caused by the war, an improvement in our balance of trade is to be noted. Imports have fallen by 21.46 per cent., whilst exports increased by 23.02 per cent. The falling-off in imports is partly due to the fall in prices in the international markets, to the limitation of the allotment by the Consortium of foreign exchange to applicants, and to the rising of the agio. It would be advisable to make every effort to develop the agricultural products of the country by which we may attain to equilibrium in our foreign trade. Many factors contributed to compensate the adverse balance of trade, chief amongst them being remittances from emigrants. The sums remitted during the year 1921 through our bank alone amounted to about Dr. 830,000,000."

M. Maximos then supplied information about the agricultural produce of the country. The currant crop was satisfactory, as were the prices obtained. Tobacco fell short of the 1920 crop, and the same was true of oil, as the year 1921 was not a good year for olives. Other products were satisfactory, and the agrarian population was flourishing.

The special interest taken by the bank in the development and organization of agrarian credit met with satisfactory results this year as well. The favourable results noticeable encouraged the administration to persevere in their policy of fostering agriculture, a policy which, even if the bank did not derive from it any profit to speak of (owing to the low rate of interest and the expensive nature of such business), yet afforded the satisfaction that by its encouragement of agriculture the bank was fostering on more general grounds the most important wealth-producing factor in the country. The new capital invested in 1921 in agrarian credit under one form or another amounted to Dr. 73,241,309.

The Governor then reminded the shareholders that last year a Convention was signed and ratified which prolonged the privileges of the bank until the end of the year 1920, and extended them at once to the new territories. He emphasized the importance for the bank of this Convention, which assured it a long life, so that it could give it services to the country without hesitation and could handle the important questions arising from time to time in a broad spirit. He also expressed the thanks of the bank to the Chamber and the Government for the interest they took in the bank and their recognition of the bank's services to the country.

"During the year under review," continued Mr. Maximos, "The loans which we were able to advance to the Government without any inconvenience, from our disposal funds, as you will observe from the data and conventions which have been laid before you, were indeed very important. But, in the circumstances prevailing, I think that nobody can possibly claim that the bank should overlook the urgent need which dictated the granting of this assistance to the Government. Besides the fact of this urgent necessity, all due measures were taken to prevent the least difficulty arising in the way of the bank's ministering to the general needs of the country, and moreover by the action of the bank the economic situation of the country was greatly benefited. We should be forgetting the traditions of the bank were we to fail in showing the elasticity demanded by the circumstances at a moment when the whole nation, three years after the signing of the Armistice, is striving with its own financial forces to fulfil the just aspirations of the race."

"The productive business of the bank at the end of the year 1921 showed an important increase in all branches, compared with the results of the previous year. The average capital engaged in the year 1921 in these branches also showed a general increase compared with the previous year."

"The increase in the deposits with the Bank during the past year is worthy of special remark. The total deposits at sight at fixed terms, and savings-bank deposits amounted on December 31 (o.s.) 1921, to Dr. 1,909,312,000; and on December 31, 1920, to Dr. 1,191,258,000. The average for the year was in 1921, Dr. 1,517,750,000; in 1920, Dr. 948,432,000.

On the other hand, the total of deposits in general within the year, together with interest, amounted to Dr. 8,409,372,793.93, whereas in the previous year they only reached Dr. 6,522,304,004.42 or, in other words, the increase during the year 1921 amounted to Dr. 1,944,008,189.51 or 29.8 per cent. Another point worth noting is the movement under deposits and withdrawals of deposits, which reached a total of Dr. 16,295,157,610.66 in 1921, or an increase of Dr. 3,788,195,082.26.

"The profits of the bank during the year 1921, were exceptionally satisfactory. The administration feels obliged nevertheless to draw attention to the fact that these results must be considered as abnormal, as they arise from extraordinary business on the one hand, and on the other from latent profits deriving from previous years, which had to be shown after the signature of the Convention providing for the participation of the state to a considerable extent in the profits from January 1-14, 1923."

"We distributed out of these profits dividends of 250 dr. for the first half year and 300 dr. for the second half, whilst transferring to reserves during the whole year the important sum of 85,000,000 dr. We believe that no objection will be raised to this measure, proposed by the administration to the general council of the bank, as the importance of strengthening our bank by generous transfers from profits to reserves must be clear to all, seeing that the period through which we are passing is a critical one, and it is necessary that the guarantees afforded by the National Bank shall correspond with circumstances and the scale of the business of the Bank."

"In concluding this report, we cannot refrain from once more extolling the endurance which the country has displayed in the critical period through which we are passing. Although the Government has had to cope with the most difficult period of the economic life of the kingdom, on account of the great war which we are carrying on, the financial machinery has nevertheless worked smoothly. We are consequently justified in regarding the future with complete confidence."

The report was unanimously adopted.

NEW EGYPTIAN.

The twenty-first ordinary general meeting of the members of the new Egyptian Company was held on April 5, at the head office of the company, 4, rue Adib, Alexandria, Egypt.

The Chairman (Mr. H. E. Barker), speaking in French, said: The year which is just gone by and for which we now present to you the balance-sheet and accounts, was a very difficult one. The values of the year preceding had to be adjusted. Besides which, the drop in the price of cotton, as well as the curtailment of the cotton crop, made it difficult to clear up all contracts or to entertain new business. For the above reasons we have concentrated first of all on getting in our rents, and we are pleased to be able to close the year with scarcely any arrears under this heading. Furthermore, we have actively taken in hand the getting in of our annuities, and practically the greater part of our arrears of the year 1920 have been encashed. Excepting the case of one expropriation of 101 feddans we do not anticipate having to take any proceedings worth mentioning in order to have a clear and absolutely safe portfolio. The fact that we do not entertain any sale of land without making provision for a margin of at least 50 per cent. makes us absolutely secure.

Last year's sales (457 feddans) can be considered most satisfactory and the prices obtained very remunerative. Practically the whole of our lands in Upper Egypt have been sold, and there will only be slight expenses connected therewith for a very few years still; owing to the fact that we must keep on a reduced staff there for getting in the money due to us and superintending the irrigation plant. This expense will disappear in three or four years' time, and we will then be able to sell the pumping installations that we have on the sites.

We have put in a lot of work in the improvement of our estates this year and we have every reason to hope that Banawan and Seila will be well advanced at the end of the current year, all the heavy work having already been completed. We are very pleased with the results so far and our success is proved by the sales that we have already put through.

As regards Bessentaway, the problem is more difficult. We have already taken in hand 500 feddans, but we must only speak with prudence and reserve with regard to the rest of this estate as the problem of getting water to irrigate the land is a very difficult one.

We have been successful in acquiring half of the very large majority of shares of the Société Belge-Egyptienne de l'Ezbekieh. This business appears to be most promising and we have every reason to hope that it will be an investment of the very first class for our reserves. The entire property consists of 65,000 metres of land situated in the very heart of Cairo. 27,000 metres are built on and consist of buildings of the very first class and 12,000 metres are still available for building purposes. The surplus is made up of streets and out-buildings. This business has been done in half partnership with the group Allard of Brussels, so that our interests are well represented in Belgium, and we are very pleased to have secured this interesting and cordial collaboration. We will still have a few payments to make in order to obtain for ourselves the complete independence of the venture.

These difficult and very complicated negotiations which have ended so successfully for our company have been very skilfully conducted by our colleague on the Board, Mr. Edward Nathan, who during several months was constantly going to and fro between London, Brussels, Paris, Switzerland and Egypt, and it is solely owing to his personal efforts and the great responsibility which he took upon himself that your company have acquired this business.

In order to make provision for a large part of the capital invested in this business we desire to transfer to reserve account which stands to capital reserve £40,398 12 8 the "Premium account," which represents the profit on our last share issue 47,017 1 4 and to take from the carry over 42,584 6 0

making in all a general reserve £130,000 0 0

You will also have noticed that we invested the sum of £E.60,000 in scrip in order to employ our loose cash. The scrip is taken down at cost price in the balance-sheet, and, in view of our payment for the Ezbekieh business, will form our working capital for the future. We hope that the improvement in the political situation will bring about a normal state of things this year which will permit us to continue the development of the company on the lines that we have marked out.

The Chairman: I will call on the auditors to read their report.

Mr. Jamieson (for Messrs. Price Waterhouse Peat and Co.) read the report.

The Chairman then moved: "That the directors' report, together with the annexed statement of accounts, duly audited, be received, approved and adopted, and that a dividend of 16 2-3 per cent. (or 2s. 6d. per share for the year 1921), free of income-tax, be paid."

Mr. Edgard Suarès seconded.

The resolution was carried unanimously.

The Chairman then proposed that Mr. Edward Nathan be re-elected director of the company pursuant to article 71 of the company's articles of association, which was seconded by Mr. Edgard Suarès and carried unanimously.

Mr. Roche then proposed that Messrs. Price Waterhouse Peat and Co. be re-elected auditors of the company, which was seconded by Mr. A. Lanari and carried unanimously.

The proceedings then terminated.

COMPANY NOTES AND REPORTS.

Egyptian Markets, Ltd.

The report for the year ended December 31 states that the number of cattle market days lost during the year was 91 as compared with 1,602 during the year 1920. At December 31, none of the company's cattle markets was closed in consequence of cattle plague. The gross receipts from the cattle markets, exclusive of slaughter houses, show an increase of £11,697 as compared with the year 1920, the total being £60,512 against £54,815. This is in a great measure due to an increase in the tariff charges sanctioned by Government in May, 1920, and which operated during the whole of the year under review as compared with 7½ months in 1920. The gross receipts from the general markets for the year under review were £39,039 as compared with £36,722 for the year 1920, an increase of £2,017. The net receipts from the slaughterhouses worked during the year were £1,236 against £1,553 during 1920, a decrease of £317. One slaughterhouse was taken over by the Government in March, 1921, leaving 43 with the Company against 44 during the year 1920. The expenses in the trading account show an increase of £3,057 under rents, salaries and wages, and a decrease of £2,002 for cost of maintenance and repairs of markets. The net profit derived from this source is £4,616 as compared with £8,064 for the previous year, a decrease of £3,448, due to the abnormal trading conditions in Egypt during the year. The net revenue from all sources for the year 1921 amounted to £59,292 18s. 7d., as compared with £48,416 18s. 11d. during the previous year, an increase of £10,875 19s. 8d. After deduction of the amount of £24,800 12s. 3d. which it is estimated will be required to meet payment of the Government share of profits, for 1921, a balance of £34,432 6s. 4d. remains, which, with the amount of £11,351 14s. 4d. brought forward from 1920, makes a total of £45,784 0s. 8d. to be dealt with. After meeting the fixed charges of the annual premia for the amortisation of the share capital and debentures, amounting to £3,789 1s. 6d., debenture interest £2,840, and carrying the sum of £5,000 to reserve, as compared with £2,500 for the year 1920, a balance of £34,154 19s. 2d. remains available for distribution. The directors recommend the payment of a final dividend (No. 35) on the ordinary shares for the year ended December 31, 1921, of 5 per cent. and bonus of 2 per cent., making with the interim dividend of 5 per cent. paid in November, 1921, a total of 12 per cent. for the year, absorbing in all £20,064, and in accordance with the terms of the memorandum of association of the company, and subject to the settlement of the proportion of profits due to the Government and to such corporation profits tax as may be payable, the payment of a dividend (No. 12) on the deferred shares at the rate of £9 7s. 4d. 19/300 per share for the year 1921, which will absorb £2,810 1s. 7d. and leave a balance of £10,380 17s. 7d. to be carried forward, which balance is also subject to the settlements above referred to.

NOTES OF THE WEEK.

An Adriatic Settlement.

The negotiations for a settlement of the Fiume problem and other, lesser problems attaching thereto have come to a satisfactory conclusion; and M. Nintchitch and Signor Contarini, who opened them about five weeks ago, are to be congratulated on having well laid the foundations of what will, we hope, prove to be a good understanding between Yugoslavia and Italy in the Adriatic. For, as we observed at the time of the first meeting, the negotiations opened in a spirit of good will, and it is good will that has brought them to a successful ending. Nevertheless, there were lately some signs of restlessness, especially on the part of Yugoslavia, and there was always a risk, if no great one, of another hitch, if not a rupture; and it is gratifying to learn that the avoidance of such a misfortune is in some measure due to the good offices of the British experts. That British assistance was not entirely welcomed by Belgrade is clear from our Correspondent's letter which appears this week; and it is, therefore, all the more agreeable to find that it has been so successful and so valuable.

Terms of the Agreement.

By the agreement just reached—which at the time of writing awaits the final approval of the Belgrade Government—it is arranged that a joint commission shall preside over the reorganisation of the Free State of Fiume, and shall be in charge of the organisation of the harbour. It is also to delimit the eastern portion of the boundary fixed by the Treaty of Rapallo. It is to consist of three Italians and three Yugoslavs, and any disputed point is to be left to the arbitrament of the Swiss President. Italy agrees to hand over Sushak, and Yugoslavia undertakes to do everything in her power to assist the resumption of traffic between Fiume and the interior; while Zara is to have a hinterland, in order that it may resume traffic with the interior and the neighbouring islands. Moreover, an agreement regarding the protection of minorities is to be embodied in the new Treaty, and a commercial treaty is also to be prepared, either separately or also for embodiment in the main Treaty. The settlement appears to be as satisfactory as could have been expected; and if not actually quite out of the wood yet, both parties may be congratulated on being very nearly so according to all appearances.

The Greek Cabinet Crisis.

The Ministerial crisis in Greece, after the failure of M. Stratos to command the support of the Chamber, has been solved by the formation of a Coalition Cabinet under M. Protopapadakis as Prime Minister, with both M. Gounaris and M. Stratos in the Ministry. If this arrangement is loyally supported by both Gounarists and Stratists, it should prove the best possible way out of Greece's difficulties. The country has to face the evacuation of Asia Minor, which, whatever the personal opinion of individuals regarding the step, is bound to be seized upon as a political weapon by those who can fix technical responsibility upon their opponents. If both M. Gounaris and M. Stratos are members of the Cabinet that has to accept the inevitable, they cannot throw stones at one another, and if the formal signature of the Greek Government to any treaty embodying the evacuation is affixed by another leader, the position of the two protagonists *vis-à-vis* the country is not compromised to the same extent. In view of the fact that it is to the interests of the Allied Powers to save Greece as much political unrest as possible and to have her acting in friendly cooperation with them, in spite of all the troubles that they have brought upon her, it is strange that they hesitate to take the one step which would go far towards stabilising the political situation in Greece—the formal recognition of King Constantine. The present position is entirely anomalous; the Allies' attitude towards the King is petty-minded, and does Greece harm, without helping them in any way. On this point Great Britain should think of her own reputation for common honesty and fair play. It is conceivable that France will no more think of recognizing King Constantine than she will of abandoning the idea of receiving reparation from Germany. There is no need for the British Government in this matter to be tied to the French chariot-wheel.

Turkish Atrocities.

Once again the Western world has been profoundly stirred by reports of Eastern methods of dealing with enemies. The Turkish Nationalists, appreciating the fact that the time-honoured straightforward massacre attracts too much attention in Europe beyond the Danube, have set about ridding themselves by other means of enemy subjects or sympathisers in their midst. Collecting large numbers of their intended victims, they have marched them to and fro over the Anatolian highlands in the depth of winter until the inevitable and intended end came. The Allied Powers

rightly denounce the ruthless barbarity of the Turks, but in proposing a commission of inquiry into the matter again lose sight of the only practical way of attaining the object in view. It is desired to protect minorities in Turkish territory. There is only one feasible way of doing this ; it is to prevent the Turks from feeling the necessity of destroying or oppressing those minorities. Turkish history is made up of periods of laudable tolerance towards alien subjects and periods of systematic extermination. The problem for the Allies is to see that the capacity for tolerance is never over-ridden by other considerations.

Turkish Psychology.

In replying to a question put by the Hon. Aubrey Herbert, who has consistently worked for the adoption of a sane policy in regard to Turkey, Mr. Austen Chamberlain suggested that the Turkish atrocities of the last few years could not be associated with the Greek landing at Smyrna, because they had begun before that event. We shall not be accused, it is to be hoped, of seeking to exonerate the Turks, if we put forward the thesis that the atrocities have been perpetrated from a perverted, but none the less genuine, instinct of self-preservation. During the Great War there was an outcry in every country for imprisoning all enemy subjects. Whether Greece is embroiled or not, the Greeks are always enemy subjects to the Turks, if Turkey is at war, and in view of their numbers in Turkish territory they are regarded as a very formidable menace. To shut up all the Greeks in prison would be a physical impossibility, even if the plan commended itself to the Turks: the only alternative, according to Turkish lights, is to put them out of harm's way by massacre or deportation. Turkey has been at war continuously since 1916; the landing of the Greeks at Smyrna, therefore, in 1919 was merely an episode, but it made the Greek subjects of Turkey a graver danger than ever and called for more effective measures of dealing with them.

The Safeguarding of Minorities.

The Allied Powers are to blame for sending the Greeks to Smyrna, and M. Venizelos who accepted and welcomed the mission on behalf of Greece was singularly blind or indifferent to the fate of his fellow-countrymen in Turkey. On this point it is the fashion to maintain a conspiracy of silence when Turkish atrocities are being discussed. There will never be peace in the Near East until the psychology of the peoples is studied and understood. So long as the Turks consider themselves to be fighting with their backs to the wall—the fact has been repeatedly urged in these columns—they will adopt what they regard as precautionary measures against enemy subjects in their midst. If, therefore, the Allies want to safeguard these people from oppression and worse, they must see to it that the Turks cannot look upon their subjects of foreign extraction as actual or potential enemies. In other words, there must be the guarantee of integrity of Turkish territory—always subject to good behaviour—which Mr. Lloyd George's instinct prompted him to suggest when he spoke of the Turkish homelands. Unfortunately he forgot his own statesmanlike utterance, and sent Greek troops to Smyrna as a pawn in the game against the Italian Government of the day. From that ill-omened move have sprung far more than half of the present troubles in the Near and Middle East.

The problem will not be solved by commissions of inquiry, which can only establish facts already well known, especially as their findings, as in the case of the Smyrna incident and the Serbian annexation of Montenegro, are liable to be suppressed, when truthful and exhaustive.

Iraq and the Mandate.

Reports have appeared in the daily press that King Faisal has definitely refused to accept the Mandate of Great Britain over Iraq. It will be a matter for surprise if this bald statement represents all the facts of the case. For some time past King Faisal has been drawing attention to the difficulty of his position in view of the Mandate. The word has been seized upon by the Nationalists of Iraq and has been made to appear as aggressive and as objectionable as the word "Protectorate" in Egypt. It was hoped that a formal treaty between the two countries would overcome the difficulty, as there was no question of Iraq's dispensing with British help. A treaty as between two equal contracting parties, it was thought, would provide unchallengeable evidence of the country's independence. The British Government agreed and a document satisfactory in all its actual clauses has been drafted. Unfortunately, King Faisal holds that his difficulty will not be met by the mere absence of any reference to the Mandate, which is the proposal put forward by the British Government; he wants a definite statement in the Preamble to the effect that the Mandate is abrogated and replaced by the Treaty. To this the British Government replies that it cannot repudiate the Mandate without challenging the whole basis of the League of Nations. The Mandate is Iraq's charter of proper treatment that the League has imposed on the Mandatory. If Great Britain repudiates it, her action will be followed by repudiation in other quarters, and there will no longer be any safeguard for the countries which are not yet able to stand alone. This point of view has been placed before the Iraq Government.

The Danger of Delay.

King Faisal's difficulty, no doubt, remains: but there must be some way out of it. Possibly, it would not loom so large, if things were made easier for him in other directions by the British Government. As pointed out in our leading article a fortnight ago, Great Britain has not "played the game" in leaving King Faisal with an empty exchequer and without executive authority. If both these drawbacks were simultaneously overcome, the people of Iraq would have other things to think about than whether a Mandate—regarding which some have very vague and probably erroneous ideas—is compatible with the teachings or traditions of Islam. Above all, it is a case of *Bis dat qui cito dat*. The trouble with Turkey, the trouble with Egypt—both have arisen or been accentuated by dilatory handling. If trouble with Iraq is to be avoided, the point now at issue—which has already been under discussion for five or six months—must be settled at once. There could be no better use for the Geddes axe than that it should descend on the necks of those responsible for protracted negotiations. It will be too late to wield it when additional military expenditure is called for in Iraq.

Iraq's Disabilities.

There are other directions in which a little expert interest in Iraq on the part of Great Britain would provide King Faisal's régime with a better chance of

making good. His Majesty's Government has dumped its surplus goods on an already slumping market; it has introduced one of the most expensive monetary systems in the world, and has not provided Iraq with any paper money at all. Iraq has to pay sterling for Indian notes. If she had any credit, she could issue her own notes, and this she would do, provided that she were allowed to do so. Further, it is hard to justify the policy that refuses to allow her to retain a working balance until her credit is reestablished and her customs revenue is assured. His Majesty's Government has certain matters on its hands which cannot be settled satisfactorily for a very long time; it has others which, if given careful consideration and undivided attention for a short space of time, could very easily be settled on a sound basis. It is a thousand pities that these comparatively small matters, but vital to the Empire's peace of mind, have to put on one side, and allowed to become aggravated, on account of the major pre-occupations.

The Indian Frontier.

Last week the cable told us once again of negotiations giving the promise of a long step forward in the pacification of Waziristan, but the details furnished do not strike us as very encouraging. Roads to provide lateral communication in the North will of course be useful, and we may agree that for a time at least they will furnish peaceful occupation to those tribes which join in the undertaking, but roads by themselves will not suffice to cure the evils which lie at the root of the recurring unrest. It is, we think, generally agreed that poverty is one of the greatest, if not the greatest, of these evils, and in order to cure it you want not merely roads, but goods to move along them. The discovery of some mineral, such as oil, in paying quantities would probably be a speedy and final remedy, but unfortunately there are no grounds for expecting such a development, and it is not easy to suggest alternatives coming within the bounds of possibility. For all that it is worth while to insist on the fundamental feature of the problem, because the more attention is given to it, the greater is the hope of a solution. Make roads by all means, but do not neglect the attempt to make profitable use of the roads when they are made.

India and the Opium Trade.

The statement defining the attitude of the Indian Government to the opium trade reached this country aptly enough, for the somewhat hectic agitation regarding cocaine has of late shown signs of widening, and some letters have appeared denouncing India as demoralising the world by the continuance of its exports of opium. The Indian case may be stated shortly as follows. For an indefinite number of centuries India supplied most of the world with the purest and least noxious form of opium, in fact the champagne of the trade. Ten or fifteen years ago, India backed Philanthropy to the amount of four millions sterling yearly, but Philanthropy could not stay the course, and the race was won by Demoralisation, for when the Chinese were deprived of their champagne, they took to the more noxious local product, or to the highly concentrated forms of the drug which some other nations were only too ready to sell. India will put no more money on Philanthropy, but she is willing to back International Control, if that somewhat uncertain animal can be trained; on this point the news from the Geneva stable is not altogether encouraging, but

the next active move must come from the Commission of the League of Nations, not from any producing country acting by itself.

International Control.

The difficulties in the way of international control can be appreciated from the fact that among the chief producers of opium are Asia Minor, Persia, Afghanistan and China, countries where the writs of the League of Nations can as yet scarcely be said to run. A report in our commercial columns last week spoke of the depletion of the Smyrna market for the drug by constant shipments to Russia, probably *en route* for the Far East, and we do not see what authority is likely to stop that traffic just now. In Persia politics are far too uncertain to leave any hope of action in such a matter. The Ameer could probably stop production in Afghanistan if he wanted to, but nobody is in a position to bring pressure to bear if he is not inclined to act. The central government in China has tried, and its failure is notorious, nor can we count on such a rapid recovery in its strength as to enable it to dominate the distant provinces where the drug is chiefly produced. Control on paper is of course perfectly feasible, but we fear that really effective control is unattainable in the present temper of Asia.

THE WEEK AT HOME.

London, Monday Evening.

Back to Business.

Genoa has petered out; the statesmen and the editors depart. Everybody is home again, but it cannot be said, "never more to roam again," for Genoa is to be transferred to The Hague in a few weeks. In his farewell speech in Italy, Mr. Lloyd George maintained that Genoa had been a great success, not so much for what it had done as for what it had begun to do; the first instalment was exciting enough, but nothing to the thrills we shall get if we only take the next number. One seems to have heard all this before: "man never is, but always to be blest," and there are many sceptics abroad. The Prime Minister declared that peace was in the hearts of the peoples. But the existence of a military alliance between Germany and Russia is confirmed, and this can only aim at the reduction of Poland and Lithuania and other border States. The contrast is somewhat marked. Moreover the Bolsheviks were not so anxious to do a diplomatic and commercial deal with ourselves as some enthusiastic spirits had supposed; and the solid common-sense of Mr. Hoover

as to the worthlessness of attempting agreements or business with Moscow has not passed unnoticed.

Mr. Lloyd George has made as valiant an effort for peace as he formerly did for war, and no doubt he will say that victory can no more be achieved in a day in the one case than in the other. That is true, but there is not the same popular "will to victory," as the Germans would say, in the struggle for peace. A pact for non-aggression is all very well, but it does not harmonize with the aggressive treaty between Moscow and Berlin. We are to have a great speech by the Prime Minister on Genoa this week at Westminster, but unless he deals with that contrast effectively it will be rather heavily discounted.

A Government Defeat.

It was unlucky that the Government should have been defeated in the House of Commons at this juncture. They were attempting to economise, by making teachers' pensions contributory; the amount—some two millions odd—was relatively small, but the principle was important. The teaching profession did very well out of the war, and they have no intention of giving up a single ounce of their pound of flesh; with the result that they lobbied members, and put fear into their hearts. Everybody knew that the Government was right, but members ran away, and the Anti-Waste people were nowhere to be seen.

The teachers will have done themselves harm in the long run by their action. The Geddes report suggested that their salaries should be reduced, but the general public thought the recommendation went too far, and the advice was shelved. Now the teachers have shown themselves unwilling even to contribute to their own pensions, although every other department of the State service does so; with the result that the public will think they are too grasping altogether, and refuse to support them in future. It was a bad mistake in tactics, and will do the teachers more harm than the Government.

Ireland.

It seemed at first sight as though there would be nothing to add to my last week's note on Ireland, for the negotiations between the Provisional Government and the Republicans broke down again. But on Saturday, to the general surprise, it was announced that an agreement had been arrived at. The published details, however, of the concordat only make the situation worse, for they amount in fact to fairly complete surrender on the part of the Provisional Government to the Republicans.

Two results seem likely to ensue. In the first place, it is more than doubtful whether the treaty as ratified by the British Parliament will be ratified by the Sinn Féin Assembly, in which case the whole settlement is liable to be reopened. In the second place the Provisional Government have apparently abandoned their first desire for an agreement with Ulster, and are giving way to the Republican demand for a war on that province, which has long been ravaged by the independent troops. Should that attempt be carried out, it would obviously be impossible for the British Government to stand aloof.

To quote an authoritative statement in one of the weekly papers: "Many landowners in the South and West propose to sell what they can of furniture and stock, write down their mansions as a total loss, and depart from Ireland. . . . In several towns in Munster attempts at readjustments (of wages and prices) have ended in the proclamation of miniature Soviets. This will not endure, for the peasant proprietor, on whom the small country towns depend for their existence, will reduce his buying and selling to a minimum, force down the standard of living, and present the amateur Communists with a *fait accompli*. In Connaught a land war has recommenced; those menaced are not the Protestant ex-landlords, but the big graziers, who are Catholic and nominal Nationalists."

The truth of this melancholy picture in the *Outlook* cannot be disputed; it implies the progressive destruction of civilised society in Ireland, and it is having its effect on England, whither these poor refugees naturally flock. It is increasing the Conservative belief in firm and stable government in this country, and it is rendering the position of Liberal upholders of Home Rule very difficult.

A City Election.

There was a by-election in the City of London last week, consequent on the retirement of Mr. Balfour—it goes very much against the grain to write "Earl" Balfour, his new title—and a little mild and decorous excitement was aroused. The Conservative Association proposed Mr. E. C. Grenfell, a very well known and popular banker, as candidate, and it seemed unlikely that there would be a contest. But Sir Vansittart Bowater, who had once been a Lord Mayor of London, butted in, and as he was also a Conservative, the contest became a personal one, the only discernible principle at stake being that the one represented the financial and the other the commercial interests of the City. In the end finance won, by ten to six thousand votes. Mr. Grenfell is not an orator, and I should doubt whether he has any political ambition, but he will speak with great weight on high finance, and in that respect he will add strength to the present House of Commons.

Business Changes.

In other respects the City is changing. The banks have reverted to pre-war hours, and the Stock Exchange has decided to go back to speculative business, or what strict moralists call gambling in contangoes. This step has been avowedly taken in the interests of the small houses on the Stock Exchange, which have had some difficulty in living of late, and which complain that the regular investment business has been to a great extent taken from them by the big banks. I gather that there is some truth in this, but there is a good deal of criticism of the decision to return to speculative business. It certainly enlarges the business of the Exchange, but it means taking risks, and not only the public but the brokers often burn their fingers at the game.

However, I suppose that is their business. I remember the story of a clergyman who preached a moving discourse against gambling. Congratulated afterwards in the vestry by his churchwarden (who was also a banker) on the soundness of his sermon, the parson confessed that he would never have been able to preach with such sincerity, had he not lost his Easter offering in the Kaffir market.

Cricket.

The summer seems to have come at last, but the cold winds of early May have left their mark on the cricket scores. Already there have been nearly twenty completed innings of less than a hundred. This suggests at first sight that the batting has been mastered by the bowling, but Mr. Sidney Pardon, who is the best current writer on cricket matters, disputes this conclusion; indeed he holds that the bowling is of even lower quality than the batting, and prophesies that if we are in for a spell of hot weather and hard wickets, the scores are likely to be heavy. On the whole, it is evident that we are still nowhere near the pre-war standard.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, May 13.

The Sudan Controversy.

A veritable tempest is raging in the vernacular press on the subject of Lord Allenby's speech at Khartoum and the claims of the Egyptians to the Sudan. The press seems to have lost all sense of proportion in its campaign, and the hysterical outcry of the extremists appears unfortunately to be having its effect on what one would normally regard as the rational-minded element; for the Constitution Commission has taken the somewhat unexpected step of putting on record in its report that the Sudan constitutes an inseparable part of Egypt; that it is under the sovereignty of, and owes allegiance to, the King of Egypt, who should be styled King of Egypt and the Sudan; and that its limits and its form of government should be settled in a separate law. There can be no doubt that the Commission has been led to take this step by the outcry in the press and by its desire to allay the excitement which at present exists; for it knows full well that the question of the Sudan cannot be discussed with Great Britain until after the Constitution has been promulgated and Parliament has been convened. Moreover, it is noteworthy that when Mr. Lloyd George's speech of February 28 to which to-day such lively exception is taken, was first published here, no comment whatsoever was made, nor did the inclusion of the Sudan amongst the reserved subjects arouse any criticism. One cannot help thinking therefore that the present outcry is entirely due to a desire on the part of the Opposition to weaken the position of the Cabinet.

The Mixed Tribunals.

The question at issue between the Mixed Courts and the Egyptian Government, *viz.*, the scale of pay, has advanced a step further since I last referred to it. As may be remembered, the Mixed Courts claimed a raising of the scale of salaries, first, because it has not been altered since the Tribunals were created in 1876 and no longer responds to the altered conditions of life obtaining to-day, and secondly, because the introduction of the new régime has increased the importance and the dignity of the position which these Courts are called upon to fill. Conversations on the subject had already been engaged with the Egyptian Government earlier in the year, but the promise then given had not been realised, and the Judges, returning to the charge, had sought the support of their respective Diplomatic Agents.

Last week the Judicial Adviser went to Alexandria and had an interview with the President and other members of the Court of Appeal. As a result of this interview the Court appointed a special committee consisting of the President, the Vice-President, one European and one Egyptian Counsellor and the Procureur-General, to go to Cairo and lay the matter again before the Prime Minister. The interview took place last Sunday, and I gather that assurances of a nature satisfactory to the Judges were given by the Prime Minister and the Minister of Justice. For the time being, therefore, diplomatic pressure will not be brought officially to bear on the Egyptian Government. It is, however, sincerely to be hoped that the Cabinet will hasten to meet the claim of the Mixed Court Judges, which is all the more reasonable and worthy of consideration seeing that their colleagues in the Native Courts have had their scale of pay successively raised until many of them now draw higher salaries than members of the Mixed Bench who had been specially selected and brought to this country, and that they agreed without demur last year to the Government's proposal to increase the Mixed transfer and registration fees so as to bring in an additional annual revenue of L.E.100,000

although at the time they were already feeling sore at the ungenerous treatment they were receiving.

The Departure of Sir Gilbert Clayton.

The departure of Mr. Patterson, Adviser to the Ministry of Education, has been followed this week by that of Sir Gilbert Clayton, Adviser to the Ministry of the Interior, and in a week or so the only Advisers who will remain will be the Financial and Judicial Advisers, to whom special duties are to be assigned under the proposed Treaty. Sir Gilbert Clayton's departure has aroused widespread regret. He has served most of his time in Egypt, first in the Egyptian Army, then under the Sudan Government, during the war as Director of Intelligence and Political Adviser to the Egyptian Expeditionary Force, and during the past three years as Adviser to the Ministry of the Interior. His has been no easy task; for the Interior even under normal conditions bristles with political and administrative problems, but he has the satisfaction of knowing that he has bridged over the difficult and delicate period intervening between the 1919 troubles and the introduction of the new régime in a manner which not only has proved satisfactory to everyone but has shown his ability and gained him the respect and confidence of all who have come in contact with him.

A visible sign of the position he holds in the opinion of the Egyptians has been afforded by the presentation of a casket which the Governors in the provinces and the cities have made to him and by the banquet which was given in his honour by leading notables from all over the country. The sincerity of the expressions of good will and regret which were voiced by the speakers as well as the warm send-off he had this morning at the Station should console him for the loss of his post, which, as Sarwat Pasha pointed out in his speech, he

knew he would lose as soon as the policy which he backed was introduced.

The Traffic in Narcotics.

The Egyptian Government has this week promulgated a decree forbidding the importation of narcotics, including opium, cocaine and morphia, without special permission. There is no doubt that some such measure was badly needed, for cocaine-taking has increased very much of late years and it is only to be hoped that the penalties inflicted will be such as will act as a deterrent.

The Irrigation Problem.

Mr. Dupuis, who was engaged last summer by the Egyptian Government to advise it with regard to the execution of the various irrigation works, the technical details of which have been approved by various public commissions, left last week after presenting his first report. The main question on which he has been asked to advise is the order in which the various works should be undertaken, so that the restricted amount of money at the disposal of the Government may be expended in such a manner as to meet the pressing agricultural needs of the country and produce more immediately remunerative results. The fight in reality is between new works to provide more storage accommodation, and thus more water throughout the year, and improvement in the existing system of distribution and drainage so as to make the present supply go further than it does now; and Mr. Dupuis has been occupied in collecting the views of the cultivators, who after all are the people most directly concerned.

There is, I understand, a good deal to be done with regard to the improvement of the existing system, for at present many estates are not fully productive because the drainage is defective, while remodelling of the distribution system would benefit estates at the tail end of canals which at present get their proper share of water only in really good years. On the other hand there is a crying need for more summer water, which can be provided only by the creation of more storage accommodation, and the present year, when the White Nile levels are far lower than they have ever been and the cotton crop is threatened, is an illustration of the relief which more storage accommodation would bring to the country.

It will be interesting to see the conclusions arrived at by Mr. Dupuis in regard to this intricate subject, which is further complicated by the fact that opposition to the erection of new irrigation works is in many cases prompted not by the conviction that improvement in the existing irrigation and drainage system is more pressing but by hostility to the erection of such works in the Sudan, owing to the belief, unfortunately fostered by the Zaghoulis for their own ends, that this would place Egypt at the mercy of Great Britain! Those who nowadays still cling to the belief that the White Nile Dam will give Great Britain complete control over Egypt shut their eyes to the fact that if she really wanted to secure control in this manner the refusal of the Egyptians to build the Dam on the White Nile would not prevent her. After all Great Britain could herself easily provide the few millions required for this work if she deemed it a necessary part of her Imperial armour, and in view of the illustration which this year's low Nile has afforded of the dire need of more storage accommodation the refusal by the Egyptians to agree to construct any works in the Sudan savours of cutting off their noses to spite their faces.

IRAQ.

Baghdad, May 11.

Tribal Wisdom.

The tribal party, to the evolution of which reference was made some weeks ago, have during the past few days asserted themselves in no uncertain manner. None realised better than they that the conference at Kerbela was organised by the extremists to obtain an expression of opinion unfavourable to the Mandate

from the tribal leaders and their religious heads. The tribal sheikhs, however, saw through the manoeuvre, refused to sign any anti-Mandate resolution, and at the close of the conference proceeded *en masse* to Baghdad, where they spent several days working out their ideas and their demands and reducing them to writing. Meanwhile several of the more important sheikhs had interviews with the King and with the Adviser to the Ministry of the Interior, and are understood to have set forth their ideas very plainly. The memorandum prepared by and signed by all the most important sheikhs of the country was a comprehensive document and laid special stress on the necessity of King Faisal's loyally accepting the Mandate, and upon the unsuitability of a very large proportion of the persons who are being given important Government appointments.

The result of a long series of interviews is that the sheikhs have been persuaded not to hand in their Memorandum, but it is understood that King Faisal has promised to make careful enquiries into the points raised by them and to meet their demands as far as possible. It is clear that not only King Faisal himself but also the whole of the Baghdad effendi class are profoundly stirred by this action by the tribal sheikhs. The effendi class always professes to look down on the tribesmen as savages possessing no intelligence in political matters and quite unable to unite for concerted action, and the events of the past few days have seriously upset all their hypotheses. The general results, however, are good. A steadying influence has come into play at a moment when it was badly needed, and the eyes of those who think that the views of a noisy minority of semi-educated effendis in Baghdad are necessarily those of Iraq as a whole have been opened. Things in Iraq have during the past few weeks been very critical, but the Government has survived one very important stage of the crisis, and it is hoped that lessons will have been learned which will be of assistance in the future.

Budget Difficulties.

Another crisis no less serious is very close at hand in the Budget for 1922-23. Rumour is busy with the expedients which are to be adopted in order to make both sides balance. It is said that the salaries of all officials are to be reduced, that large savings in the budget of the Ministry of Defence are to be made by the introduction of conscription, and even that certain areas of Government land are to be sold. It seems probable, however, that any discussion or publication of the Budget proposals will now be held over until the National Assembly meets; for the electoral law was published this week, and it is said that the elections are to be held at a very early date.

The Electoral Law.

The new law has met with a good deal of criticism and up to date but scant approval. The criticism has, however, been lacking in sting, and most of it does not deserve any attention. It would be interesting to know how it comes about that Sulaimaniyah has been included among the *lewas* which make up the State of Iraq, as set out in the first section of the law. Sulaimaniyah is an entirely Kurdish *lewa*, which has all along remained independent of the Arab Government in Baghdad and administered under the direct control of the British High Commissioner; and no signs are yet visible that any considerable body of opinion in that *lewa* wants to be included in the State of Iraq. The definition of an Iraqi is given as: "all Ottomans living now in Iraq and not claiming to be nationals of a foreign State." Round this definition centres one of the chief zones of criticism. In the first place there are many who indignantly assert that they are not Ottomans and that to call them so is an insult, while others maintain that the definition is too wide and allows many persons who are not really Iraqis to vote as such. It is pointed out that all Armenian, Assyrian and Turk refugees now living in Iraq obtain a vote under this definition, and the opinion is given that such persons should not be allowed to vote, as it is not yet shown that they have a permanent stake in the country. On the other hand

it is by no means certain that these persons want a vote, and it may well be that they will claim to be nationals of Turkey or of the hoped-for Armenian State.

The Assembly is to consist of 100 members of whom five will be Christians, five Jews and 20 tribal representatives. The remainder will be elected by the vote of the whole body of electors. The country has been divided into three electoral circles corresponding to the old vilayets of Basrah, Baghdad and Mosul, and it is laid down that the representatives of any constituency must be from among the inhabitants of the circle in which the constituency is situated. This ruling has come as a great blow to Baghdad, for it had confidently expected that it would be able to send a horde of politically minded advocates and others to most of the tribal districts and by securing their election, leave the administration of the country entirely in the hands of the Baghdad effendis; they are showing their disgust and disappointment in having their effective area thus circumscribed. The suffrage is given to all persons over the age of 21 who pay taxes to Government or to a municipality, or who inhabit a house on which taxes are paid and who are not suffering from any legal disability. Preparations are now being made to hold the elections at an early date.

The Muhammerah Conference.

A Conference was held during the past week at Muhammerah attended by delegates from the Iraq Government, the Sultan of Nejd and the British High Commissioner, to discuss points at issue between the King of Iraq and the Sultan of Nejd and to settle the boundary between the two States. A complete agreement was reached on all points. It was decided that it was not practicable to delimit a frontier between the two States topographically, but that it was better to allot certain tribes to each State, and to impress on these tribes the necessity of observing their respective tribal boundaries. By this arrangement the Dhafir, who recently attacked the Iraq Camel Corps and Desert Police near Nasiriyah, are allotted to Iraq. The representative of Iraq was Subih Bey, Minister of Communications and Works; and of the Sultan of Nejd, Ahmad Ath Thanaiyan, who is well known in Baghdad, where he was for some time representative of Ibn Saoud.

Sir Arnold Wilson arrived in Baghdad from London by air mail on April 29, having completed the journey in only nine days, and left again for Muhammerah on May 2 whence he is said to be going to Shiraz.

PALESTINE.

Jerusalem, May 14.

A War Memorial.

A simple but impressive ceremony took place last Sunday in St. George's Cathedral, when a small window was unveiled by General Wardrop, O.C. Troops in Palestine, in memory of the officers and men belonging to the 60th London Division, who fell during the Palestine campaign of 1917. It was this division which received the surrender of Palestine on December 9, 1917. The Prince of Wales' Volunteers, who have garrisoned Jerusalem for the past two years, paraded with their band, and towards the end of the ordinary Sunday morning service the whole congregation, civil and military, assembled under the window. Kipling's "Recessional" was sung, Sir Wyndham Deedes, Acting-High Commissioner in Sir Herbert Samuel's absence, read a passage from the Book of Wisdom, General Wardrop followed with a brief statement about the window and its donors. It had been given by the surviving officers and men of the Division, and designed and in part executed by men who had been present at the time of the City's surrender. The unveiling of the window was performed by General Wardrop, while the "Last Post" was sounded in the distance by bugles and drums. On this occasion the "Last Post" had an added poignancy; this was the last public appearance of the Prince of Wales' Volunteers before leaving Jerusalem

twenty-four hours later. It was no doubt inevitable in the interests of economy, but it is a matter of keen regret that an English Christian Regiment is now replaced in the Holy City by Hindu troops.

Lectures and Entertainments.

Having in mind its limited number of enquiringly-minded members, there can surely be few places more hardly beset than Jerusalem in the way of lectures. The lecture-season usually begins in the late autumn, rises to a furore by the early spring, and dies away gradually after the close of the tourist-season. The lecture-going public is not very numerous—a few of the more earnest officials and a few earnest wives of officials, a very much smaller number of members of the innumerable religious bodies, and the inevitable schoolmistresses. These are raised to a respectable total by the presence of other lecturers, who out of sheer *esprit de corps* come along to swell the audiences of their colleagues. Jerusalem would seem to be an elaborate mutual improvement society; there are times of the year when there are four to five lectures a week to be attended (and if you can endure lectures in other languages as well as in English, this number can easily be raised to seven or eight).

A long course at St. George's was brought to an end last week when Mr. H. C. Luke, the Acting-Governor of Jerusalem, lectured on the "Subdivisions of Islam." The course began early in January and continued week by week. The first group of lectures was devoted to Jewish subjects, during Lent Christian topics were dealt with, and after Easter a short series was given on Islam. Public interest seemed chiefly to be attracted by the lectures on Jewish subjects, those on Christianity and Islam attracting comparatively small audiences. At present Mr. W. J. Phythian-Adams, Assistant Director of the British School of Archaeology and Curator of of Palestine Museums, is giving to crowded audiences a course on geography, history and archaeology of the eastern Mediterranean. Certainly lecture-going might be ranked first among the dissipations of the Jerusalemite.

There are concerts in plenty; but they are not strongly supported by the British element. "The Jerusalem Musical Society" came into existence at the beginning of the year, and it has organised fortnightly classical concerts. On the whole, they have maintained a fairly high standard both in quality of programme and performance. But the society has served to expose the unmusical nature of the British community as a whole; the audiences have been about ninety-five per cent. Jewish, while the performers, both professional and amateur, have been almost exclusively Jewish.

It is an undesirable aspect in Jerusalem social life that whatever activity develops, in spite of the best intentions to the contrary, it always and quickly assumes to itself a "single community" complexion. There is the Sports Club; this is predominantly a British official coterie. Others are not definitely excluded: in fact an earlier effort to create an avowedly Government Official's Sporting Club was frowned out of existence by the High Commissioner. But the result is nearly the same as if all but the British community were barred. The reason, of course, lies entirely in the habits of the majority of the other residents; the type of Palestinian who has the money to spare to join such clubs has very different views as to what constitutes healthy recreation. On the other hand, the Musical Society is predominantly Jewish; this again is unintentional. To the Oriental, European music is very much of an acquired taste, requiring a prolonged residence in the West; and it is regrettable but true that the British official rarely possesses an educated musical taste. Yet again there is the Jerusalem Dramatic Society. This draws, though in much smaller numbers, on much the same type as the Sports Club. There do, as a matter of fact, appear to be one or two Palestinian Jews among them; but on closer inspection they turn out to be the owners of the large entertainment hall hired by the Society for its performances.

This last Society has, during its existence, given two very creditable displays. Last October it did "Twelfth Night," and last week it performed a modern play called "The Dawn of To-morrow." The Society specially distinguishes itself by its stage management, and the external details of presentation, which have so far been irreproachable. In actual acting powers it is perhaps below average amateur standard, since it draws its talent from a very restricted circle. But the disciplined order and punctuality that have so far marked its public performances, call forth the awed admiration of the older established Jerusalem residents. It is the normal thing, for example, for a Jewish theatrical performance to begin an hour late and finish somewhere about two the following morning. The skill of the performers is usually of a very high order, only the trouble is that where forethought is demanded in the organisation of detail, there is always a delay or a breakdown in the arrangements. We strike here one of the root defects—or, not to beg the question, characteristics—of the Russian Jewish temperament; though careful of the content it is careless of the form.

YUGOSLAVIA.

Belgrade, May 11.

From Genoa.

A report that Mr. Lloyd George is going to arbitrate between Yugoslavia and Italy has not been received enthusiastically in Belgrade, but since their cause is so obviously just the Yugoslavs are ready to put their neck under the very sharp axe. However, it is feared that even the attempts of Mr. Lloyd George may be fruitless, since the Italians cannot realise that the only way of settling the differences is by executing strictly the treaties concerned. The new Italian policy of splitting the dispute into small questions and treating each separately has been definitely rejected by the Yugoslavs, and at last night's meeting the Yugoslav Government decided either to have everything settled in Genoa, or to go before the Tribunal of the League of Nations and obtain a settlement in that way.

The Italians now disown the letter of Count Sforza in which he promised in the name of the Italian Government a loyal execution of the Treaty of Rapallo.

Relations between Albania and Yugoslavia.

The question of future relations between these two neighbouring States is, if not altogether vital, of very great importance to both of them. Because of the Italian policy of turning the Albanians against the Yugoslavs the latter must always make suitable counter-moves, and seek to bring the Albanian people nearer to them.

Bulgaria is suspected of cherishing hopes of stirring up the trouble in the southern provinces with the aid of Albanian outlaws, but that must be crushed in the most energetic manner. Recent disturbances in Macedonia are held here to show signs of Bulgarian initiative although they originated in Albania, in the so-called neutral zone. The Yugoslavs have already renounced all territorial claims against Albania, but in spite of that, frontier differences will always remain and unless cordial relations are firmly established these differences will always give cause to "incidents" and a lot of ammunition will be used up quite unnecessarily.

Not even the greatest expert could draw the frontier between these two States without being unjust and almost equally hard on both nations, because their respective peoples are so intermixed. Constant fights in the past have created very strong feeling between the two nations and the consequences are still felt; therefore it is very necessary for both of them to lay old, harmful, methods aside and to take together a new path which may lead them to friendship and peace.

Monastir has been the scene of another explosion, on a much smaller scale, but quite sufficient to frighten badly everybody in the town.

ROUMANIA.

Bucharest, May 6.

Roumania and Genoa.

The external situation is at the present moment the Government's chief anxiety; it is not too bright, for there is little hope here that the Soviet Delegates will give a satisfactory reply to the Note of the Allied and neutral powers. In general, however, Roumania is well satisfied with the way things are progressing at the Genoa Conference, both in respect of the questions which directly concern her, and with the part she is playing at the Conference; for her delegates have been admitted to all the principal Committees and especially to the one that is handling the Russian question. The local Press is commenting favourably on the attitude taken by the Little Entente in appealing to their senior colleagues to maintain solidarity among the Allies.

The Bessarabian Frontier.

Rumours were lately spread that fighting had taken place between the Soviet and Roumanian troops on the Dniester frontier. The Ministers of War and Interior hastened to deny these rumours categorically, explaining that the whole affair reduces itself to a few attacks from starving Bolshevik gangs, whose chief object is to plunder the villages on this side of the Dniester. As such attacks are almost everyday occurrences along that particular frontier—and they are easily repelled—the Government emphatically repeated that there is not the slightest ground for anxiety as far as the defence of the Roumanian frontier is concerned.

Martial Law on the Dobruja Frontier.

Owing to the frequent attempted incursions on the part of *Komitajis* along the Dobruja boundary a few months ago, the Roumanian Government was compelled to introduce Martial Law within the zone of 30 kilometres along the Dobruja frontier. Since such disturbances have not reoccurred and in answer to a request from a delegation of Dobruja Senators and Deputies, the Government has now consented to reduce this military zone to fifteen kilometres.

British Soldiers in Bucharest Cemetery.

By arrangement with the Imperial War Graves Commission the remains of five British soldiers buried in various parts of Roumania were conveyed to Bucharest and were permanently buried here on April 27 in the portion of the Lutheran Cemetery acquired by a recently formed Anglo-American Cemetery Committee. The names of the soldiers in question were: Private R. Bobley, 12th Hampshire Regt.; Private James Stirling, Seaforth Highlanders; Lance-Corporal A. Scott, Seaforth Highlanders; Corporal H. Mott, Royal Engineers; and Private Darvill, Royal Engineers. The remains had been located and conveyed to Bucharest by Captain A. F. Menzies, representative of the Commission in Macedonia. A portion of the burial service was read by the British Chaplain here, the Rev. Claude Hinscliffe. The ceremony was attended by the British Minister at Bucharest, Sir Herbert Dering, and others present were: Col. F. J. Duncan, Military Attaché, Mr. Millington Drake, First Secretary to this Legation, H.M. Consul, Mr. L. Keyser; Commander W. A. Thompson, Head of the British Naval Mission to Roumania; the American Consul-General, and a number of British residents.

Coalmine Catastrophe.

Public feeling was deeply affected by a disaster which occurred the other day at the Armaka coalmine near Petroshani (Transylvania), Roumania's principal coal-field. In one of the galleries a terrific explosion took place owing to an electric current coming in contact with the natural gases in the pit. Unfortunately there were about 150 miners at work in this particular gallery at the time of the explosion, and more than 100 of them lost their lives. The majority of the victims were found carbonized and many others torn to pieces by the explosion, which was heard five miles away. As such a catastrophe is so unusual an event in this country, this mishap has been vested with the character of a national misfortune, so that at the burial of the victims—which was done at the State's expense—the King, and

two members of the Cabinet, and many other high officials were present. Lists for public subscription for the relief of the victims' families are being circulated throughout the country, to which the State and the public are responding very generously. The King headed the list with 100,000 lei.

Roman Remains in Transylvania.

While excavations were being carried out at Cluj (the capital of Transylvania) for the purpose of erecting a large building, a portion of a ceiling in mosaic was unearthed, which is ascertained to date back to the Third Century—about the time of the Roman occupation of Dacia. The other portion of the ceiling cannot be brought to light, as it is under the foundation of the adjacent house. This is not the first discovery of Roman remains at Cluj, for it is known that this town is built on the ruins of the famous Roman fortress "Napoca," which was abandoned by the Roman Legions during the Third Century at the order of Emperor Hadrian.

General News.

A British Naval Mission, headed by Commander W. A. Thompson, has arrived at Constantza, for the purpose of re-organizing the Roumanian Navy.

The First of May was celebrated by the working class without any incidents.

The Minister of Domains and Agriculture has announced that the dividing of the land among the peasants in the whole of Transylvania will begin very shortly, commencing with the farms belonging to the State.

Bucharest, May 14.

Roumanian Aeroplanes.

The Aircraft Department of the War Ministry celebrated last Thursday the christening of the first series of ten aeroplanes built in the country. Divine service was conducted by the Primate of the Roumanian Orthodox Church in the presence of Genral Nicoleanu, Col. Rujinski, M. Silisteanu, the French, Italian, Czechoslovak and Yugoslav Military Attachés and many Roumanian pioneer aviators. The aeroplanes are of the "Brandenburg" type, with two seats and fitted with 220 H.P. engine. The actual cost of the machine is 185,000 lei, and it is said that a similar machine from abroad would cost 1,500,000 lei.

Departure of the King and Queen.

The King and Queen of Roumania left on May 14 for Athens, *via* Constantza, on a Roumanian destroyer. This sudden departure is due to a telegram received from Prince George on Sunday morning, announcing that Princess Elisabeth's condition has taken a turn for the worse, and that an operation must be performed owing to the setting in of pleurisy. This news, which spread like wildfire throughout the country, has saddened the Roumanian people, with whom Princess Elisabeth was always a great favourite. On hearing the news many social functions were postponed, including the *Soirée dansante* at the Polish Legation, and it was further noticed that no official person was present at the races on Sunday, although it was the Roumanian "Derby Day," on which occasion even the Royal Family never failed in previous years to be present. On Tuesday services of intercession for the health of Princess Elisabeth will be held in all the churches of the country.

King Ferdinand before leaving Bucharest signed a decree-law, by which General Vaitoainu, the Prime Minister *ad interim*, together with the Ministers' Council, have the right to exercise the regal prerogatives during the Sovereign's absence from the country.

War Indemnities from Germany.

The Roumanian Government has decided to renounce the 2782 horses accorded by the International Reparations Commission as war damages from Germany, in order to have them replaced by locomotives, tools, machinery and other metal goods, part of which have already begun to arrive from German factories.

General News.

M. Tanner, the Minister of Finland, left Bucharest for Helsingfors on Monday, May 8. Although under the pretext of leave, it is rumoured that M. Tanner's

departure is definite, owing to the suppression of the Roumanian Legation at Helsingfors, which measure was recently taken as an economy.

The *Monitorul Oficial* of May 11, announces the appointment of M. Nicolae Cerchez as Director of the Postal, Telegraphic and Telephonic Services, in place of M. I. Pitulescu, who has been transferred to the Ministry of Communications as Technical Councillor.

It is reported that the British Cruiser 'Cardiff' has arrived at Simla, having on board Rear-Admiral Tyrwhitt, Commander of the British Naval Squadron at Constantinople, who will visit Roumania's ports.

TURKEY.

Constantinople, May 12.

The Turko-Italian Agreement.

Until the Italian Government fulfils the promise to communicate to the British Government the details of the arrangements made with the Sublime Porte, the mystery surrounding the matter will remain. According to the official statement made by Izzet Pasha to a local journal on May 9, only "an exchange of views" has taken place, and the surveys to be made after the conclusion of peace by Italian experts, "involve no engagement." Izzet Pasha then declared: "The present negotiations bind neither of the two parties, and only signify, in reality, a simple promise between those interested. If the survey which will be carried out by Italy in certain parts of our country produce favourable results, the economic questions interesting both countries will be the subject of further investigations."

It will be noted that Izzet Pasha spoke of "the present negotiations," thereby implying that no definite conclusion had been reached, but in the same breath he mentioned a "promise" which nevertheless is not binding. It is to be feared that Izzet Pasha, who is justly regarded as an honourable and straightforward

soldier, has listened to evil counsellors. Incidentally there is at present no indication of the manner in which the negotiations were—or are—being conducted, but it is worthy of note that M. Carasso, who is now an Italian subject, but who was largely instrumental in organising the Committee of Union and Progress in its early days, is now—or was recently in Rome.

The details of the agreement, so far as they are known, have already been published in the European Press, but it may be asked why, if that agreement is so innocent in nature, has such secrecy been maintained? Why also are Izzet Pasha's explanations couched in such ambiguous language as to be unintelligible? Why, moreover, is the Angora Government so intensely annoyed about the matter? The Kemalist representatives both in Rome and in Constantinople have been instructed to protest and to inform the Italians that the Angora Government considers any agreement that may have been concluded as illegal and therefore invalid. At the same time, a certain tension has arisen between the Italians and the Kemalists on account of the evacuation of the Sokia area, which was apparently carried out by the Italians without giving the Kemalists sufficient warning to enable them to reoccupy the territory in question. The Kemalists insist that the Italians acted deliberately at the instigation—needless to say—of the British, for the Kemalists are apparently convinced that in comparison with British statesmen, Machiavelli was a child. Would it were so!

The Political Situation in Anatolia.

Information regarding the political situation in Anatolia has been exceedingly meagre during the last few weeks, but there can be little doubt that a crisis of no little importance has arisen in Anatolia. According to reports from sources that have been usually reliable, the Angora Government will not be able to maintain an army in the field for another winter. If this is true—and there is good reason to believe that such is the case—the reasons for the crisis are not far to seek. Even a cursory study of the Turkish press at the present moment is sufficient to indicate the line of argument which is the basis of the policy of the Angora Government. Britain and France, in the first place, are apparently definitely estranged from each other—a result for which the Kemalists, or rather Young Turks, have been striving indefatigably ever since the Armistice; Italy is pursuing a purely opportunist policy; Germany is now allied to Russia, and Russia is allied to Anatolia. On June 1, if the calculations of the Angora Government are accurate, the French will invade Germany, and there will be a complete reshuffle, which may result in strong trumps falling to the hand of the Angora Government. From the outset, the Anatolian press has openly foretold and the Stamboul press presaged in more veiled terms, the failure of the Genoa Conference. In both cases the original inspiration doubtless emanated from M. Araloff, the Bolshevik envoy in Angora, who has been playing Codlin to General Pellé's Short.

In these circumstances, all talk about a renewal of hostilities upon a large scale may be safely discounted for the time being. No one knows better than the Kemalist General Staff that a successful offensive against the Greeks is at present out of the question on account of the insufficiency and imperfection of transport, apart from other serious difficulties, and the Greeks have realised that there is nothing to be gained from making another attempt to capture Angora. June 1 is the day for which each side is waiting.

The Micro-Asiatic Movement.

Nothing has ever more clearly demonstrated the remarkable *esprit de corps* which is the most striking characteristic of the modern Greek spirit, than the developments which have followed the menace of the re-establishment of Young Turk dominion over Smyrna. The Venizelist movement has been practically absorbed by the Micro-Asiatic Movement, and both Constantinists and Venizelists have, for the moment at all events, buried their differences. The "deserters", officers and soldiers who have been kicking their heels in Constanti-

nople for the last eighteen months, are returning to Smyrna and will be restored to their ranks. Every Greek knows perfectly well that no Greek Government could possibly consent to the unconditional abandonment of the Christians of Ionia to the Young Turks, and in this respect the Government of M. Gounaris has secured the support of its bitterest enemies. No one has worked harder to produce this result than the Greek High Commissioner in Constantinople, M. Triandaphilakos, whose fatherly counsels on the one hand, and skilful pleading on the other, have apparently reduced partisan heat on both sides to the cooler temperature of common-sense. It may be that both sides have made certain mental reservations, but M. Triandaphilakos has at all events scored a great success in his own quiet way, and may yet make still further progress.

The American Testimony.

The report of Major Yowell and his three colleagues concerning the treatment of Christians in Anatolia, which was published in *The Times* of May 6, has been the subject of animated controversy in foreign circles here. As usual, the subject has been debated from partisan points of view, and what both sides have forgotten is that the value of the report lies not in the statements made, but in the status of its authors. Similar reports have been published during the last two years, but they have always emanated from interested parties—Greek or Armenian. The American report, is, however, the first authentic statement on the subject that has been obtained for the information of the general public from reputable eye-witnesses. Educated and cultured people of the status of the four officials of the Near East Relief Commission who are responsible for the report, may have made mistakes and may even have exaggerated to a certain extent, for human nature is fallible, but deliberate invention cannot be attributed to them. Their report, therefore, can only be discounted to the extent that is necessary when ordinary human failings are taken into account. Moreover, as their statements completely harmonise with what is known to have happened before when the same individuals dominated the Turkish Empire as those who now dominate Anatolia, the report, when all allowances are made, forms one of the most damning indictments of Young Turk rule that have ever been formulated.

The Arrival of the Irish Guards.

The Irish Guards upon their arrival marched through the town to their quarters, preceded by a drum and fife band. General Sir Charles Harington took the salute at Taxim Square, and all the British who witnessed the sight felt a thrill of pride as the splendid body of men marched past.

CYPRUS.

Nicosia, May 5.

Attitude of the Greek Community.

Those who have watched the agitation among the "Greeks" of Cyprus for union with Greece for many years past can hardly be surprised by the present situation, or by the audacity which is now displayed by their leaders. Step by step they have advanced, taking advantage of the far too great measure of freedom, always abused, which has been allowed them. A more glaring example of their presumption can hardly be given than that just manifested at Nicosia. A draft law is under consideration which provides for an increase of the stamp duties to be levied on leases of properties, contracts, receipts, etc. The King's Advocate recently requested the advocates of Nicosia, as a body, to express their views respecting the proposed measure. In their reply, which has been published in the Greek Press, they state that, while unanimously disapproving of any such increase of taxation, they are unable to express any opinion on the details of the Bill, as they are firmly of opinion that the present Legislative Council is not lawfully constituted, and consequently that no act passed by it can have any legal or binding force.

The Greeks have in fact reached the limit of audacity, puerile as it is. They refuse to sit on the Council, and then contend that without them the Council cannot legally act! While residents and older officials are not surprised, visitors to the island may well be astonished, and wonder why some drastic remedial action is not taken to meet a situation which no other Power would for a moment dream of tolerating.

General News.

Owing to the death of one of the Maronite Members of the Legislative Council, an election will presumably be held shortly. Possibly it may be decided once more to hold a general election; but in such case the Greeks would no doubt abstain from sending candidates, and there would merely be a repetition of their late tactics.

Dr. S. G. Papadopoulos, now practising in London, has been requested by the Hellenic Government to represent Greece at the International Medical Congress, to be held in London in July.

Dr. E. Corsellis has been appointed Chief Medical Officer. The appointment gives great satisfaction in all communities. Dr. Corsellis has been for many years in the island, as District Medical Officer at Limassol, and has on many occasions acted as C.M.O. A farewell dinner has been given to Dr. and Mrs. Corsellis at Limassol, where they will be much missed.

The close time for partridges and francolin has been extended, being now from February 15 to September 14: while shooting of hares and other game is from August 12 to February 14. The fee for a gun licence is raised from 10s. to £1.

A British Club in Constantinople.

It is a matter for regret that the steps taken in Constantinople for the formation of a British Club have not yet been crowned with success; but in view of the present economic position in Turkey the temporary failure cannot create surprise. At a meeting of the General Purposes Committee held on May 12 it was formally resolved that the time was not opportune at present for proceeding with the proposal put forward by a sub-committee, that a special campaign should be started to raise the £5,000 required for the first year (a guarantee of only £2,000 was obtained). But it was arranged that the work of the sub-committee in keeping in touch with the members of the British community should be continued in order that the first favourable opportunity might be taken for proceeding with the scheme.

The Zionist Delegation which left for the United States a few months ago, has succeeded so far in raising £350,000 for the Palestine Foundation Fund.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be written as briefly as possible and must be written on one side of the paper.

EDUCATION AND JERUSALEM.

To the Editor of "The Near East."

Sir,—In your issue of yesterday's date, you refer to an attempt made in Jerusalem to organise a body of persons who could supply courses of higher study, such as are at present needed in Jerusalem. You say that Mr. Ussischkin prevented Jewish scholars from assisting the scheme, because he held it constituted an attack on the projected Hebrew University. Whatever may have been the attitude of Mr. Ussischkin (and I have no information respecting it), it is certain that Dr. Eder, one of his colleagues on the Zionist Executive in Palestine, welcomed the formation of "a mixed committee for the promotion of Oriental Studies." He wrote a letter to the *Doar Ha'Yom*, saying "anyone who regards this as opposed to the contemplated Hebrew University, understands neither the spirit which prompted the ideal nor the steps that are being taken towards its fulfilment."

The *Palestine Weekly*, which you have described as a paper of "strong Zionist" tendencies expressed in its issue of April 7 great annoyance at the "discourtesy" and "foolishness" of the Jews who abstained from attending the meeting called to promote the scheme. Its comments are, indeed, quite similar to your own:—"it is just another example of the bane of the Palestinian in general—to read into every innocent detail the most sinister politics, and of the Jew in particular to succumb to his special weakness—a hyper-trophied suspicion."

The Zionists in Palestine are not as sectarian as your Correspondent supposes.

I am, etc.,

May 19.

THE DODECANESE.

To the Editor of "The Near East."

Sir,—In a fervent and eloquent Appeal for the cause of the "Friends of Italy" Movement in London with which he concluded the splendid concert given yesterday at the Wigmore Hall, my esteemed colleague and Hon. Sec. of the Movement, Chev. T. Sambucetti, mentioned Mazzini's noble dream for Italian unity and his high moral "Credo" which included liberty for all nations.

I quite understand Chev. Sambucetti's noble zeal for everything that tends to promote the study of Dante's language, beautiful specimens in which he himself, and a few of his English girl pupils, recited to their audience yesterday. But, thinking that words can have little or no value unless they are accompanied by deeds, I feel tempted to ask my dear colleague:—Does he think that the high-principled Credo of the great Italian patriot and martyr of Italy's freedom is acted upon to-day by his own country with regard to the Dodecanese? And does he think that the continued harsh and really unspeakable measures of the Italian authorities there, aiming at suppressing the expression of the national conscience of the Dodecanesians, "—as Greek as a Greek people can be," as the editor of the *Church Times* puts it—and breaking their social structure, are likely to make the Dodecanesians forget their Hellenic nature, or promote the "work of peace," also mentioned in yesterday's concert?

I am, etc.,

C. S. HOURMOUZIOS,

Of the Foreign Press Association in London.

49, Prince's Square,
Hyde Park, W.2.
May 15.

In reply to statements recently made in the House of Commons the Turkish Press Bureau in Paris announces that since the Armistice "the most rigorous justice and most perfect order have not ceased to reign in Turkey," and describes the statements made to the contrary as "fantastic assertions."

GREAT BRITAIN AND EGYPT.

Egyptian Press Views.

While the people recognize that the period is one of transition and of preparation for the serious business which awaits the Parliament when elected, they are restive under the restraint which prohibits the holding of public meetings either of men or women. Petitions are being presented to King Fuad directly—not through the Government—praying that this may be removed. The position of the King is much discussed, and there appears to be a desire to approach H.M. directly, not through Ministers, who are always regarded with suspicion. The subject receiving most attention for the time being in the native Press is that of the Sudan. The theory that the country and the whole Nile valley form part of Egypt, as one and indivisible, is accepted as unquestionable. The past history of the Sudan is represented as fully bearing out this claim, and by a curious process of reasoning the benefits conferred by British Administration are attributed to Egyptian influence. There is still no reference to the question of a garrison. The desire for the return of Zaghoul Pasha and his fellow exiles is wide-spread and insistent.

The *Akhbar*, in a leading article, says that the British have quietly and persistently pursued a definite policy, which aims at severing the Sudan from Egypt, and setting up a Sultan—perhaps the Mahdi's son—under British protection. The dreams of British imperialists regarding the control of Egypt and the Sudan would so be realised. It has been said that England regards the latter as a valuable ransom to be given by poor Egypt. The English will not think of evacuating Egypt until they effect the entire control of the Sudan, the produce of which will then be transported, not through Egypt, but by way of Berber and Suakin. All the sources of the Nile being controlled, they will construct dams and irrigate whatever areas they choose, to the possible detriment of Egypt. "Is our Government alive to all this or will it remain silent till it is too late?" Ever since the ominous declaration of January, 1899, Egypt has apathetically looked upon the Sudan as if it were a foreign country. The English have recently observed there with great ceremony an anniversary, their aim being to treat the Sudan as a part of the British Empire. Not a word was said about Egypt, as if her ties of language, religion, customs, and interests counted as nothing. In the past it was the Egyptian Government that conferred decorations upon distinguished Sudanese; but now England assumes the sole right to bestow them, the Sudanese not being recognised as belonging in any way to Egypt. Formerly Egyptian officials were wont to go to the Sudan to cultivate friendly relations and mutual interests, as between two brothers. Now Lord Allenby goes there, while our (Egyptian) Ministers take no interest in the country, or shirk the fatigues and inconvenience of the journey, although the Sudanese question has so vital a bearing on the situation. Sidky Pasha, now Minister of Finance, went unofficially to the Sudan in 1919. Why does he not go there officially now? Why does not the Government advise King Fuad to go there, and remind the people of what his predecessors did for the country? Responsible officials should be roused to action, for the matter is of pressing importance. Egypt without the Sudan is the burial ground of her people. Sidky Pasha, in the introduction to a long report which he made, says:—"Of all the stabs given to Egypt since the occupation of 1914 the declaration of 1919 was the

deepest and most painful. If a blow so deadly was given while Britain was associated with Egypt, what is to be the result when the Sudan is completely severed and claimed by Britain?" When the deputation of Sudanese visited England they were not allowed to pass through Egypt, as if it were a plague spot closed by quarantine. It was supposed that they went to negotiate a separate treaty. Sidky Pasha has denied this, and said that there was no truth in the assumption that the Sudanese desired closer relations with England. The deputation evidently went under the pressure of British influence, not of their own initiative. The Government says the writer, instead of prohibiting public meeting, should devote its attention to the all-important matter.

The Ex-Khedive Abbas II.

Both the *Ahram* and *Akhbar* publish an account of an interview which the Editor of the *Progrès de Lyons* had with the ex-Khedive Abbas Hilmy before a visit of the former to Egypt. "The statements of the Allies," said the ex-Khedive, "during the war, respecting the self-determination of nations had their effect in the East, and especially in Egypt, in view of the aid given to the Allies by Egyptians. They sought their freedom, and seeing that they remained under alien rule they began to take steps themselves. Like Ireland and India they sought to be rid of 'protection,' and will no doubt succeed in the very near future. My country is on the threshold of new freedom." After a pause, he said: "I do not attach importance to the manoeuvres of the British Government regarding independence; for it is sufficient to read the reservations in order to realise that no steps are really being taken to abolish control. The present policy of Britain towards Egypt is due to the movement to boycott English trade. I am sure that an Egyptian who understands the real interests of the country and puts aside personal considerations, will demand the release of Zaghoul and his compatriots. "There," he said, "are my views and hopes for my country, which will be fulfilled sooner than many Europeans imagine."

The *Mokattam* says that the women of Egypt, not being allowed to hold meetings, attend lectures at places where they are able to speak, and express their views. They recently assembled to hear one by Dr. Ibrahim Zekki in the American College. A deputation of ladies will go to Abdin Palace to present two petitions. One, signed by 2026 women, addressed to King Fuad, asks for the return of Zaghoul on account of his age and indifferent health. His Majesty, they say, they are sure will not allow freedom to some of his subjects and not to others. They pray for long life for the King and for Zaghoul Pasha. The other petition prays that the Premier will take steps to abolish the custom of holding *Zars*. (A *Zar* is a sort of *fete des dames* having for its object the casting out of devils, or curing of epileptic and other complaints. Women of all classes assemble for a *Zar*, either at some Saint's tomb or in the privacy of the harem. The process of exorcism consists in working the demoniac into violent excitement by the recitation of spells, by burning incense, etc. This often leads to great expense. Sheep, fowls, or other victims are killed, and the flesh distributed to guests and visitors. Sometimes the patient is required to obtain jewelry or special articles of dress, etc. Liberal presents are made to the female exorcists. Educated ladies consider it is high time that a stop should be put to these proceedings.)

The Freemasons.

The Grand Master of the Cairo Lodge, Idris Bey Ragheb, has sent a petition to the King, begging that he will bring about the recall of Zaghoul and other exiles. The Press supports a proposal, widely approved, that the contributions which it is customary to give to the poor at the end of Ramadan (*Zekal el-sitr*) should this year be sent to poor Turks in Anatolia. If this is carried out it is to be hoped that the gifts will really reach the sufferers for whom they will be intended. The Banks are sending considerable sums of money to King Fuad, to be distributed by him at his discretion.

NEAR EAST BOOKSHELF.

THE SERBO-ALBANIAN FRONTIER.

"A DIFFICULT FRONTIER (Yugoslavs and Albanians)." By Henry Baerlein. (London: Leonard Parsons. 6s. net).

A mesquin little book, which, however, is not without knowledge, has been written on the frontier between Serbia and Albania, by Mr. Henry Baerlein. He has called it "A Difficult Frontier." The frontier is, indeed, so difficult that it hardly appears. Its map is hidden in one unostentatious page, which at first sight, escapes the reader's attention altogether. The frontier is, in fact, only an excuse for a propagandist pamphlet. In the index, there are scarcely any place-names, which occur inevitably in any serious work dealing with delimitation.

Mr. Baerlein is not a champion of the Slavs, but of the present Yugoslav Government. The Serbs and the Montenegrins have their faults, but they have also their great virtue of courage, and they deserve a more chivalrous defence than that accorded to them by the author. I can imagine a snobbish and peevish old lady, who believed herself a friend of Sir Hamar Greenwood, writing an eulogium upon similar lines with regard to that statesman's Irish policy. Belgrade is the spiritual home of Mr. Baerlein, and he regrets, apparently, that Yugoslavia has any frontiers.

Take, for instance, his references to Montenegro, which he thinks was once a grand country. He speaks, in language of almost touching simplicity (page 20) of the Montenegrin Vespers on the Christmas Eve of 1703. "Those," he says, "who participated in the Montenegrin Vespers, were not likely to forget the incidents of that impressive ceremony." Here the ceremony is impressively described—the blessing of the weapons, the candles still in the quiet, frosty air, etc. "Then every house was visited in which there was a Moslem and the choice was given them of repudiation or of death. With such missionaries and with such subjects as these to work upon, you could not quite hope that the negotiations would be pacific. Many of the Moslems, young and old, were slaughtered"—and so on, with a description of the "chosen men," who were weary but content with their night's work, at its end in the rudimentary cemetery at Cettigne. One wonders what happy phrases Mr. Baerlein would have found to have described the more spectacular battue outside the Louvre on St. Bartholomew's Eve, if he had been a friend of Charles IX and of Catherine de Medici, and whether he would have felt sympathy for the fatigue of the "missionaries" on that occasion.

Montenegro ceases to have anything fine about it (including frontiers) the moment that it is opposed to Belgrade. Mr. Baerlein tells (page 75) of a (nameless) Mohammedan priest, who became Orthodox and was appointed a major in the Montenegrin Army. The said priest was supposed to have killed 500 of his parishioners because they would not be baptised. "Since the Montenegrins did not restrain that over-zealous man, the villagers were not in favour of that country." Again (page 102), he speaks of the "thoughtless voice of the mob of Montenegro," though he can be jubilant when a Montenegrin in Yugoslav pay insults a British officer, Captain Brodie.

His references to the Italians are always direct. On page 110, he states that Prenk Bib Doda was assassinated by the Italians, which was not the report of Mr. Morton Eden, the British official who was with Prenk Bib Doda at the time.

The book is written in a curious style, and the reader is half puzzled to know if it is a school-boy's writing, or a foreign school-master translating, as for instance (page 31): "It is true that several towns with large Albanian majorities were made over to the Serbs—very much, as it turned out, to their subsequent advantage—yet, being separated from their hinterland, this was a doubtful gift." And again (page 64): "They (the Serbian authorities) have, like most of us, sufficient to

regret—for example, the person whom they sent to Pëc, when they wanted the land to be distributed, was King Peter's Master of the Horse. He was thoroughly unsuitable and caused a great deal of dissatisfaction." Why?

The author judges the Albanians by their past history, and not their present achievement; he criticises them by the standard of their most primitive customs of yesterday and not the sacrifices and progress that they have made. On parallel lines, England should be judged by the superstitions of the West Country and the ignorance of Lincolnshire peasants.

He spends several pages in an austere, if not entirely grammatical, castigation of the League of Nations and its intervention in the Yugoslav advance in Albania. According to Mr. Baerlein, this advance never really occurred. The explanation of the League's action is, that Mr. Lloyd George was too busy to think of this question and had allowed "some incapable person," whose identity, oddly enough, never transpires, to act in his name. This poor fool "was so little versed in the business that he did not even know that the League of Nations is not a gendarme to carry out the decisions of the Ambassadors' Conference." He really ought to have known better than that. "He should also have known that the League of Nations does not, except if invited to arbitrate—concern itself with the unliquidated problems left by the War, such as the Turkish question." Who is this anonymous idiot? But Albania had ceased to be a Turkish question in 1913 and in 1921 had been admitted into the League of Nations, and so was twice emancipated. All this is really written to prove that the present frontier is inequitable because the Yugoslavs may be raided by the Albanians. Mr. Baerlein carefully omits to say that, after France, the Yugoslavs have the second biggest armed force in Europe, equipped with modern weapons, and a population of 15 millions, and a country many times the size of Albania, while the Albanians are only 1½ million and have no organised army and only antiquated weapons.

This book is worth reading, if it can be procured from a lending library, as a study of inefficient propaganda.

I. M.

SIR JOHN MALCOLM ABRIDGED.

"MALCOLM'S MEMOIRS OF CENTRAL INDIA." Abridged and edited for Colleges and Schools. By C. H. Payne. (London: Routledge. 3s. 6d. net.)

Sir John Malcolm's "Memoir" ranks definitely as a classic, and any tampering with the text calls for justification. We think Mr. Payne makes out a good case for the rather drastic treatment he has applied. The original is badly arranged, encumbered with much dead matter, and frequently obscure; it is indispensable but nearly unreadable. Mr. Payne gives us practically all the valuable historical portion, arranged in short chapters, clearly printed on decent paper, with a useful sketch-map, all for the very moderate sum of three and sixpence; and in these hard times the price is by itself sufficient justification, for it brings the best part of an inaccessible classic within the reach of nearly everyone. The editing has been well done, but there are a few obvious errors, or perhaps misprints, such as the date 1491 for Timur's invasion (p. 10), or 1577 for Aurangzeb (p. 18), which should be corrected if a further edition is called for.

PERSONAL AND GENERAL.**To-day.**

May 25 (New Style).

May 12 (Old Style).

Ramadan 28, 1340 A.H. of the Moslem Calendar.

Iyar 27, 5782 of the Jewish Calendar.

Lady Crosfield returned to London last week from Paris.

M. Jan Masaryk, Counsellor at the Czecho-Slovak Legation, has returned from Prague.

Mr. A. O. Lamplough, who is generally expected home at this time of year, is lying ill in Cairo.

The Governor of Bombay on May 20 unveiled a statue to Lord Hardinge on the Apollo Bunder.

General Sir John and Lady Maxwell have returned to 103, Lancaster Gate from the South of France.

M. Yovan Yovanovitch, the Yugoslav Consul-General, and Mme. Yovanovitch, have returned from Paris.

It is stated from Bombay that the Maharajah of Bikanir has sailed for England, acting on medical advice.

M. Gregoire Michalesco, Commercial Attaché at the Roumanian Legation, is back in London from the Legation in Paris.

M. R. Th. W. Djuvara, Secretary at the Roumanian Legation, is back in London, after accompanying Prince Nicolas to Paris.

The marriage of Lieutenant-Colonel Sir Albert Stern, K.B.E., C.M.G., and Miss Helen Orr Lewis will take place at Cannes on Tuesday, June 6.

Air Vice-Marshal Sir John Salmond had the honour of being received at Buckingham Palace on May 17 by the King upon his appointment as Air Officer Commanding, Iraq.

Lady Grey Egerton has left London for Bombay, where she will join Sir Philip Grey Egerton, and will proceed with him to Australia for two months, returning to London in October.

The Duke of York is due to leave for Belgrade on Saturday. A special delegation, presided over by the Military Attaché in London, who is now at Belgrade, will meet him at the Roumanian frontier.

The King has conferred the G.C.M.G. upon Lieut.-General Sir James Aylmer Lowthrop Haldane, K.C.B., D.S.O., in recognition of services as General Officer Commanding-in-Chief, his Majesty's Forces in Iraq.

A marriage has been arranged between Otto M. Lund, only son of Captain and Mrs. Albert Lund, 38, Lowndes Street, Belgrave Square, S.W., and Peggy, daughter of Mr. and Mrs. Frank Harrison, Colaba Hill, Bombay.

The Grand Duke and the Grand Duchess Cyril, who have left Cannes, will be present on June 1 at the marriage at Belgrade of the King of the Serbs, Croats, and Slovenes and their niece, Princess Marie of Roumania.

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

Admiral Sir John de Robeck arrived at Victoria last week on his return from the Mediterranean. He handed over the command of the Mediterranean Fleet to his successor, Vice-Admiral Sir O. de B. Brock at Marseilles on May 13.

Monsignor Barlassina, Patriarch of Jerusalem, is now in England, sent officially by the Holy See, to discuss the possibility of entering into negotiations with the British Government respecting the problem of Zionism in Palestine.

The Indian Gymkhana Club have an interesting list of cricket fixtures for 1922, with their customary match against the M.C.C. at Lord's on July 28 and 29. Their new ground at Osterley was due to be opened yesterday (May 24) in a game against High Wycombe.

M. Titulescu, Roumanian Minister in London, left London on May 21 for Paris, to meet M. Bratianu, Roumanian Prime Minister, who has just returned from Genoa. He was due to leave Paris yesterday for Roumania, thence to go to the wedding of Princess Marie.

Our Bucharest Correspondent writes (May 14):—Prince Carol, Princess Helen, and Prince Michael, accompanied by Princess Irene of Greece, the sister of Princess Helen, arrived last Tuesday at Sinaia from Athens.

The Moslem Festival of Eid-el-Fitr which marks the conclusion of the month of fasting will be observed at the Mosque, Woking, on Sunday, May 28. Among those expected to be present are the Persian Ambassador, the Afghan Minister, the Turkish Chargé d'Affaires, the President and Secretary of the Palestine Delegation and representatives of the Hejaz and Iraq.

The annual Sir George Birdwood Memorial Lecture will be delivered at the Royal Society of Arts to-morrow afternoon by Sir Thomas W. Arnold, Professor of Arabic, School of Oriental Studies, the subject being "Indian Painting and Muhammadan Culture." The chair will be taken by 4.30 p.m. by Lord Peel, Secretary of State for India.

It is with much regret that we learn that Princess Elizabeth has had a relapse following her attack of typhus, and her condition is now serious. Unless a change for the better takes place within the next week, it is anticipated that the wedding of King Alexander of Yugoslavia and Princess Marie of Greece will be postponed.

At the Walker Galleries, New Bond Street, an exhibition was opened on May 22 of water-colour drawings of India (chiefly Cashmir and Central India) by Mrs. Lucy Pelling Sultan Ahmad. The exhibition is open until June 3. At the same galleries is being held an exhibition of water-colours of the Sands and Waters of Egypt by Bridget Keir—this closing on May 27.

A reception in honour of Sir Herbert Samuel, High Commissioner for Palestine, and of Lady Samuel, is to be given by the Council of the English Zionist Federation on Tuesday evening, May 30, at 8.30 p.m., at the Empress Rooms, Royal Palace Hotel, Kensington. Further particulars can be obtained from the secretary, English Zionist Federation, 44, Bedford Row, W.C.

Colonel Georges Ostoitch, Military Attaché to the Legation of the Kingdom of the Serbs, Croats, and Slovenes, will be in attendance on the Duke of York during his Royal Highness's visit to Belgrade for the marriage of King Alexander and Princess Marie of Roumania. The King and Queen of Spain will be represented by the Prince of the Asturias, and the French Republic by Marshal Franchet d'Esperey.

JERUSALEM AND THE MISSION.

The Jerusalem and the East Mission is thirty-four years old. It is not a missionary society: it is the representative of the Church of England in the Near East, "beginning at Jerusalem," and the J.E.M. Fund exists to provide the Bishop in Jerusalem with the means for supporting, consolidating, and expanding the work of the Church. The Bishop represents the whole Anglican Communion at the Mother City of the Faith; and it should be remembered that the Anglican Communion embraces the great daughter Churches of the Dominions and the Episcopal Church of America. Archbishop Benson reconstituted the Bishopric in 1887, after a lapse of five years, appointing to it Archdeacon G. F. Popham Blyth, who had just retired after twenty-five years' service in India and Burmah. The Bishopric possessed then not a stone or a foot of ground. The Bishop collected, by personal letters of appeal, throughout the English Church world, the funds out of which he built and maintained the Cathedral, Bishop's House, Clergy House, schools, library, and medical work at Jerusalem: church, hospital, and schools at Haifa, Beyrout, and in the Lebanon: churches and schools in Egypt: and established chaplaincies at many stations and outstations in Egypt and Cyprus. At the close of the twenty-seven years of his episcopate the Church of England was firmly established in the Near East, and in almost every case in its own buildings; and this made it possible to reopen immediately the Church's work—spiritual, medical, and educational—in Palestine as place after place was liberated. To our soldiers these stations of the Mission, and especially the Cathedral at Jerusalem, have been centres of comfort and fellowship. The Mission stands for what is best and truest in missionary service. Missionary societies make their appeal to different sections of Church thought at home, but the J.E.M. makes its appeal to *all* sections of the Church, because it is the authorized and authoritative representative of the Church itself at the capital of Christendom.

The Annual Meeting of the J.E.M. was held at Church House on May 16. The Bishop of London, Chairman of the Council, presided, and the speakers were Viscount Goschen, C.B.E., who has lately returned from a visit to Palestine, and Archdeacon Stacy Waddy, Archdeacon of the Church of England in Palestine, who is on short leave from Jerusalem. The Hoare Memorial Hall was well filled, old and new friends of the work mustering in the most encouraging way. After the opening prayers, and the reading (by Archdeacon Beresford Potter, Archdeacon in Cyprus) of a short passage from Isaiah, the Bishop of London made a few introductory remarks. He emphasized the necessity of maintaining a fair and true representative of our Church in Palestine.

Lord Goschen, while modestly describing himself as only a recent visitor to Palestine, showed a thorough grasp of the many-sided problem of the country and its needs, and of the value of the Mission in its spiritual, medical, and educational work. He made no reference to the difficulties besetting us as Mandatory Power for Palestine, but dwelt rather upon the spiritual aspect of our trust; the moulding and establishing of the youth of Palestine, of whatever creed; the immense possibilities of the task, and the immeasurable promise of the future; and the duty of the laity to care for and so supply the temporal necessities of Church work, so that those to whose hands the actual labour was entrusted might be time-free and mind-free for their task. He had travelled extensively in the Empire and off the beaten track, and had seen there the clergyman and the layman at their ceaseless and unassuming work; and their question was ever, "Do they know over in England about the work?"—"not 'my' work, not even 'our' work, but always *the work*." He could not help feeling that people at home knew far too little of the work being done abroad. He was asked to address the students at St. George's College, and had hesitated to comply, feeling the difficulty of finding common ground between them and a traveller like himself, but he had spoken to them as a College man to College men, and in that had found a point of contact. He was convinced that these boys, of many races and many creeds, gained through their education a mutual understanding and a sense of fellowship which would endure even though the stress of later life might throw them into opposite camps. The speaker made a warm and sincere appeal to the audience and to lay people generally to give to the Church in Palestine that support to which it was entitled and which was essential to it in the sacred and far-reaching work entrusted to it. It was a most impressive speech—sober, dignified, and earnest.

Archdeacon Waddy also sounded the grave note of our Christian and our Imperial responsibilities in Palestine. After long oppression the people of the land were lifting their heads in fresh hope once more, because of the coming of the British.

They looked to us for justice, fair play, and freedom to expand. England had freed Palestine at a terrible cost, as the great military cemeteries everywhere bore witness; our men had given their lives for Palestine: "we must not let them down" by undervaluing our charge and our responsibility. He was no pessimist, but very deliberately he warned us people at home that the problem of Palestine was also the severest testing of our Empire. The hopes and the faith of the people centred in us, and if we failed them now the Land would be the worse rather than the better for our coming. He was amazed at the hunger of the people for English education, for the help of the English Church: they desired and demanded that the education should be Christian, they would not thank us for an education shorn of its religious principles. The boys and girls passing through our schools were the hope of the country and its promise for the future. He had been called an anti-Semite because he had criticised the programme of political Zionism. With Jewish hopes and ideals for the revival of Jewry he was full of sympathy, but there was no denying the fact that the extremists, though a minority, were upsetting the balance of peace in Palestine, and that many manifestations of anti-British feeling out there were due to their activities and pronouncements, with which the Arabs were beginning to identify the British Government. He had many Jewish friends, and was frequently asked by them: "Why does the British Government persist in dealing with Zionism as if it were the expression of the whole of Jewry? It is *not*." One Jew said to him, after the Jaffa riots of May, 1921: "I have lived here for thirty years in peace with the Arabs, and never saw anything like this before." Another Jew told him how an Arab sheikh, on hearing of the riots, galloped from his village to the Jewish Colony to see if his friends there needed his help. If the British Government persisted in its present policy it would be doing a grave injustice, not only to the Arabs, but to the majority of the Jews themselves who were not political Zionists. He paid a feeling and sympathetic tribute to the Eastern Churches. They longed for the help of our Church and would allow her every privilege of counsel, even of criticism, which such fellowship in reconstruction implied. The mission of our Church in Palestine was constructive, not destructive: it stood for justice and for help: it commanded an unique trust from all.

Where to stay in the East.

CAIRO.

THE CONTINENTAL-SAVOY

THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO

THURSDAY, MAY 25, 1922.

EGYPT AND THE SUDAN.

It may well prove to be fortunate both for Egypt and for Great Britain that the Egyptian Constitution Commission should have committed the indiscretion of announcing its intention to incorporate in the draft Constitution a clause equivalent to the annexation of the Sudan by Egypt. The simultaneous publication of a draft Sudan convention, drawn up by Rushdi Pasha a year ago for the benefit of the Egyptian Delegation then about to visit London, proves that Egyptian designs on the Sudan are not a sudden development. As a matter of fact the attention of the Egyptian Nationalists has been directed towards the Sudan for some time past, and unfortunately their propaganda efforts have been furthered by the action of Egyptian officers and officials in the service of the Sudan. At the time of Lord Allenby's visit in 1921 it was found that seditious circulars, printed in Egypt, and addressed to "Our Sudanese Brethren," had been surreptitiously distributed in the Sudan. The Sudanese were called upon to resent British slavery and to clear their country of the tyrant colonizers. Egypt and the Sudan were to join hands to expel the intruders. A further call to revolution was made in a second circular, also purporting to emanate from a "Party of Ulema"; yet another document dealt with alleged English plots against Islam and was a direct appeal to fanaticism at its worst. It is significant of the attitude of the Sudanese that the receipt of these circulars was at once notified to the Government, and a native paper in Khartoum denounced the interference of the Egyptians in Sudan affairs, thereby drawing upon itself the hostility of the authors of the circulars, who devoted another to recommending that the paper should be boycotted. It would have been strange indeed if none of this poison seed from Egypt had found favourable ground in the Sudan, especially as the natives are now being more widely used in the official and business world; but probably the most noticeable result of the propaganda was that it brought home to a number of Sheikhs and notables the danger of the withdrawal of British protection, and led to a deputation to the Government to urge that, if there was a possibility of Great Britain withdrawing from the Sudan, due notice should be given to the Sudanese, in order that they might take betimes their own measures for dealing with Egypt. The implied threat would only be lost on an Egyptian who knew nothing of Egypt's previous relations with the Sudan and was out of touch with present conditions in the country.

If, as is probable, the British Government, from a laudable desire to avoid embittering the negotiations then in progress, refrained from taking the Nationalists to task for their intrigues in the Sudan, the omission would inevitably encourage a section of Egyptian opinion to believe that the Sudan was to be had for the asking. In the London negotiations it was expressly stated that the Sudan was a reserved subject; not a *chose jugée*, be it noted, but a matter in regard to which discussion was to be invited at a later date. It is entirely in keeping with the Oriental mind that the distinction should be seized upon as further proof that Great Britain, if pressed, would not lay undue stress on the retention of the Sudan. From this stage to the wording of Rushdi Pasha's convention and the clause in the draft Constitution is a comparatively small step. Moreover the Committee engaged upon the Constitution

is encountering some opposition because it has been appointed by the Government instead of being selected by the new Parliament when elected and convened. There will always be, therefore, the temptation to justify its own existence by pandering to a popular cry. Now THE NEAR EAST has accepted wholeheartedly the policy of Egyptian independence and yields to none in a sincere desire to see the experiment a complete success in the interests both of Egypt and of Great Britain. But no true friend of Egypt with any real knowledge of the situation would encourage the Egyptians to imagine that they could take over the Sudan or will be allowed to do so. Reference has been made to the Egyptian officers and officials at present employed in the Sudan. The departure of the British from the country would be the signal for the forcible disappearance of every Egyptian left behind. The Egyptians should be under no mistake on this point. Whether the Sudanese approve or whether they disapprove of the presence of the British in their midst, there can be no shadow of doubt that they would not tolerate a single day of Egyptian overlordship. On this point their minds are already made up, whereas the Egyptians, to judge from their attitude towards the question of the Sudan, are living in a fool's paradise. If by any chance their claims were to be conceded, they would experience a rude awakening and the safety of the new State would be at once imperilled. Independent Egypt will have enough troubles within its borders for many years to come, without seeking others in an attempt to enforce its rule on unwilling Sudanese.

In the interests of the three countries concerned the British Government should lose no time in making a definite announcement on the future status of the Sudan. Already Lord Allenby has drawn the attention of the Egyptian Prime Minister to the impropriety of the Commission's incorporating in the draft constitution for Egypt any clause dealing with the Sudan, on the ground that the Sudan is one of the points reserved for future discussion between His Majesty's Government and the Egyptian Government. But this warning is not calculated to deter the extremists, who have had ample opportunity to gauge the value of persistent agitation. Again, although the Sudanese are not likely to support any movement for the exchange of Egyptian for British guardianship, some at least may have had their minds unsettled by trying to determine what the possible effect would be of placing more power in the hands of the native. The gradually increasing numbers of educated effendis will naturally be attracted by thoughts of high office; the Sheikhs and religious leaders may imagine that they themselves would occupy the centre of the picture, with greatly enhanced authority not only over their own tribes or sects but also generally over the whole Sudan. No good, however, can come of these dreams at the present time, and it is kinder to the potential dreamers and to the people as a whole to give them other things to think about. On the other hand Egypt is entitled to know how she stands in regard to her future supply of Nile water, for it must be remembered that a large number of Egyptians will enter the comity of free nations with a somewhat uneasy conscience, knowing nothing of the British frame of mind that renders an unfair distribution of the Nile water unthinkable. The only prospect in view for the average Egyptian is a hostile Sudan treating Egypt in the matter of her water supply as Rushdi Pasha proposes to treat the Sudan. Simultaneously with the declaration of the new status of the Sudan these misgivings can be dissipated by the transfer of the whole question of Nile regulation to a joint Board which will leave Egypt as confident of equitable treatment as she has reason to be to-day. As it is impossible to foresee the course of political events in Egypt and to know when the negotiations for a treaty with Great Britain can be resumed, there is strong ground for settling the status of the Sudan at once. Delay will only encourage the Egyptian camel, having found that he can insert with impunity his head into the Sudan tent, to attempt to follow with his whole body.

THE TURKISH ORTHODOX CHURCH.

BY THE REV. W. A. WIGRAM D.D.

Any old resident in the Ottoman Empire would consider the title of this article as the strangest contradiction in terms if not evidence of profound ignorance on the part of its author. Christians who are Turkish subjects we know, more varieties of them maybe, than we can readily enumerate; but a Turk has always been, as such, a Moslem; all varieties of Christians have been "Rayahs." Religion has always been the determinant of a man's nationality, and one who changed his church and having been *e.g.* Orthodox became Exarchist, was considered on all hands to have changed his nationality also, to have ceased to be Greek and become Bulgarian.

In this changing world, however, when everything that you have is apt to be somebody's else, and even your identity is liable to be taken from you, some attempt is being made to depart from this, the main rule on which the Ottoman Empire has been organized in the past, and to find a Turkish nationalism that shall not depend on religion, and a variety of Christianity that shall be "Orthodox" and yet Turkish.

Whether it is possible for an Islamic empire to remodel itself to this extent is the question, and an interesting question. Young Turks are always sure that it can—when they are in Europe; even as they are sure that the Ottoman Empire can and will reform itself in various other ways: very plausible are the reasons they produce to account for the fact that it has not begun to do so yet. Still, when in Europe that most attractive person, the educated Ottoman, is apt to sit a bit loose to Islam, though he may not always declare his abandonment of the faith of his fathers. On the spot, the problem sometimes looks a little different, and men find that they have under-rated the dead weight of ecclesiastical conservatism, which insists that Church and State shall work in the old way. In any case, the circumstances of the foundation of this "Turkish Orthodox Church" are of sufficient interest to be put on record.

There are scattered in Anatolia, a very fair number of a peculiar people known as the Karamanlis or Karmanlis. Those interested in making out a good case for their numbers, put them at about 500,000 in all; and their villages—for villagers they usually are—are found for the most part in the districts of Afium Kara Hissar and Ak Hissar. They are just one of the many strange survivals in that land, which has been the bridge between Europe and Asia since history began, and where most of the migrating tribes and transitory rulers seem to have left traces of their passage. In language, the Karamanlis are Turks, and are presumably so in blood also, though they write the Turkish language, (such of them, that is, as do write at all), in the Greek script. Nevertheless, they are Christian in religion, and as they belong nominally to the Orthodox Church, they have always been counted as "Roumi" or Greek, by the Ottoman authorities.

Now, some attempt is being made to enrol these people, or to get them to enrol themselves, in a new branch of the Christian Church, that is to be at once "national" or Turkish, and "Orthodox." They are said to "own" 200 churches, which probably means that the bulk of the inhabitants of that number of villages have joined the new body. By Turkish law, the church fabrics would remain "Greek" property, for at least as long as one old woman in the village remained "Greek" in confession; but the excellent

code of law by which Turkey is theoretically governed, has not always much relation to the facts. Further, some 500 priests have (or are said to have) enrolled themselves in this new church, and these are governed by "four priests, endowed with the power of canonically ordaining the Bishops and performing episcopal functions." Their leader is one Papa Eftim, "Archbishop" of Kaisariéh. An ecclesiastical purist would probably ask for more details about these holy functionaries! Was it not once said in England,

"How easily are Bishops made,
By man's or woman's whim.
Wesley his hands on Coke hath laid,
But who laid hands on him?"

We remember a beautiful little episode in "Mesopot" (some eight or nine hundred years ago, of course). "Why do you not consecrate the cemetery, Padre?" said the General. "Must have a Bishop for that, Sir," said the Padre. "Clerk," said the General promptly, "Take down this routine order. 'The Reverend A. B. is appointed temporary Bishop (acting) with this force, till further orders.' Now go ahead, Padre." Is it possible that Mustapha Kemal has played a parallel role to that, in Angora? However that may be, here these "Bishops" are. Further, they are said to have translated the Bible, and some at least of the service books, into Turkish, or—as other accounts say—to be using an "old Turkish version" of the scriptures. Of this we can only say that the Bible Society, which would be much interested in such a text, disclaims all knowledge of it!

According to Turkish accounts, these Karamanlis are of old Turkoman stock, and their ancestors migrated into Anatolia in Byzantine days. It is certain that there was then a fairly steady stream of such immigration. They were often enrolled in the army, though they proved, at times, rather treacherous allies. It was for instance the desertion of the Turkoman auxiliaries to their invading kinsfolk, that decided the field of Melazgerd against the Emperor Romanus in 1071, when he was opposing the advance of Alp Arslan and his Seljuks. When settled in the land, they adopted Christianity as their religion, and naturally became members of the Orthodox State church. When the Anatolian provinces of the Greek empire were lost, and fell to the Turk, these settlers clung to their adopted faith as Orientals will, and so were recognized as "Rayahs" of the "Roumi millet" when the Ottoman Empire was organized.

There are several reasons why they should now desire change, and why a Turkish Government should be willing to assist them.

One of these reasons is undoubtedly that feeling of nationalism that is a new, but very real force in the East. They feel that they are Turks, and yet Christians, and they wish to keep their religion and yet to express their nationality. It must be remembered that, to a Greek, the Orthodox Church is a Greek inheritance. Only the tongue of the new Testament must be used in it, and the notion of allowing a non-Greek to rise to any high rank in its hierarchy is as absurd and unthinkable as the notion (prevalent not so very long ago), of promoting a Welshman to be Bishop of a Welsh see. This feeling has cost both the Anglican and Greek churches dear, and has resulted in more than one harmful schism. It is then quite comprehensible that Turkish Christians should wish for a Turkish church, even as the Bulgarian Christian desired a Bulgarian church.

The traditional Ottoman policy towards Rayahs has

ASK FOR

WHITE HORSE WHISKY

BY APPOINTMENT

always been *divide et impera*, and the Angora Government at this moment is mainly desirous of two things. One is to show its independence of Constantinople, and the other to annoy the Greeks. Both of these objects are served by the recognition of a "Turkish Church," so their attitude is reasonable enough. To these we may add another consideration.

It is known, of course, that the Phanar in Constantinople is a focus of what you may call, according to your point of view, Pan-Hellenic policy, or anti-Turkish intrigue. Turks are apt to reply to this intrigue—are replying in fact—by the use of the only weapon that they understand, *viz.*, massacre. Now if you happen to be a Karamanli (an Orthodox Christian that is, but yet forbidden by birth to hope for any promotion in the Church, and a natural prey for the baser financial agents of the Phanar), it may well be that you cannot get up much enthusiasm for being massacred on behalf of a political propaganda that, to you, spells only oppression, and that you may welcome the idea of a church of your own, that will keep you Christian, will give you an opening, and will not cause you to be massacred.

The attitude of the Phanar authorities towards the new body is still doubtful. Their wisest course would probably be to recognize a new, if small, national Church, and to admit it to membership in the federation of autonomous bodies that form the "Orthodox" Church at large. Such recognition would give them considerable influence in the new body, and would perhaps enable them to check certain rash experiments in theology and Church government, to which its rulers seem inclined at the moment. Such a course, however, requires a good deal of wisdom and altruism in an organization that has pronouncedly pan-Hellenic sympathies. There was some talk of encouraging all Greeks in Anatolia to affiliate themselves to the "Turkish Orthodox" church, and even to allow the body a patriarch (?) of its own. Whether this will be allowed by the Turks, who wish to use the new movement as an instrument to injure the Greeks and to demonstrate their own independence of Constantinople, is more doubtful.

On the information available, an Englishman may wish for the prosperity of the new body, and for the establishment of friendly relations between it and the Greek Church. Turkish policy is now admittedly that of allowing neither Greek nor Armenian to exist in what is left of the old Ottoman Empire. The Turks consider them too dangerous an element to allow there, and they are quite prepared to massacre, in fact are actually massacring in order to carry this policy out. Further they know, having been laboriously taught the fact by recent experience, that they can massacre with impunity, because no European Power is in a position to interfere, even when it wishes to do so.

On this point, on the existence of his right to exterminate an element that he counts dangerous to his rule, the Turk is neither civilized nor civilizable. He is like a man, otherwise sane, who is mad on one point, and with whom it is a waste of time to argue, on that point. The more polished and attractive the individual Turk, the more efficient and merciless he is in massacring the inconvenient; here the writer is speaking of men, now high in Ottoman service, of whom he has personal knowledge. To ask them to extend the rights of civilization to Armenian or Greek, now, is like asking one of Alva's officers (right gallant and polished Spaniards all of them), to spare the rebel and heretic Hollander!

But the Turk is also a kindly gentleman, when he does not feel cause to fear; he has some wish to stand well with Europe, to be considered civilized, to persuade statesmen to acquiesce in his abolition of the Capitulations, and he knows that if you are in the habit of murdering your own subjects, it is difficult to ask European Powers to leave such of their subjects as reside in Turkey unprotected in your hands. Therefore, he will not massacre, unless he sees reason, and if he

sees that his Christian subjects are "Turks" and not Greeks, it is possible that he may not massacre. Hence we may be glad to see those Christians whom we cannot protect, acquiring a position where maybe, they will not need protection, and at worse will be no worse off than before!

KURDS AND THEIR WAY.

A correspondent in Kurdistan writes (April 12) :—

We are having a very peaceful time at present in Kurdistan and I see no reason why it should not last. There will always be, of course, spasmodic murders and attempted murders of the officials of any Government (Kurdish included) of this area, because it is the

A Kurd in his own country.

custom of the country. In the absence of football and other amusements it is a normal outlet for Kurdish feelings. On the whole the population are well contented, and a good spirit prevails between the big people who really matter and the British Political Officers. If this spirit persists, it will offer an excellent basis for the future administrative structure, whatever form that may take.

TOPICS IN PARLIAMENT.

The subject headings are those of the Official Report.

South Persia Rifles (British Officers).—Italy and Afghanistan.—Egypt (Zaghloul Pasha).—Sudan.—Peace Treaties, Commissions : Treaty of St. Germain ; Treaty of Trianon ; Treaty of Neuilly ; International Danube Commission.—India : Potable Spirits (Imports).—(Thursday, 11th May.)

Peace Treaties : Bulgaria (Allied Officers' Pay).—Egypt (Sudan).—British Missions (Ex-Enemy Countries).—India : Prison Treatment ; Moplah Rebellion (Trials).—Asia Minor : Turks and Christian Minorities ; Statement by Mr. Chamberlain.—British Army : Messing Allowance, Iraq.—Egypt : Suspended Newspapers ; Negotiations ; Sudan ; Judges' Salaries ; Deportees, Seychelles.—India : Military Stations (Illumination) ; Marine Officers (Pensions) ; Leper Act.—(Monday, 15th May.)

India : Racial Distinctions Committee ; Police Forces ; Prisoners ; Civil Servants (Free Passages) ; North-West Frontier.—Palestine (Anglo-American Agreement).—Egypt (Prohibited Meeting).—Asia Minor (Turks and Christian Minorities).—(Tuesday, 16th May.)

Abyssinia (Slave Trade).—Vienna (Meat and Milk).—Asia Minor (Turks and Christian Minorities).—India : Military Requirements.—Palestine : Mandate ; Roman Catholic Tribunals.—India : Air Mail Service ; Royal Air Force.—(Wednesday, 17th May.)

A councillorship on the Madras Corporation has been offered to Mrs. Devados, the wife of a local judge. The offer is worthy of note, as being the first of its kind to be made to a woman in India.

According to reports received at Haifa, Atta Pasha El Ayyubi, the Syrian Minister of the Interior, and other officials have been dismissed. Damascus merchants are said to have started a boycott of French goods.

PRESS ON THE NEAR EAST.

In consequence of queries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

A Settlement in the Near East.

The *Saturday Review* of April 29 remarks on the present indeterminate situation in Anatolia, and, having sketched the dangers of delay, concludes :—

There has not been, and is not, any armistice, and fighting has taken place. The delay in reaching a settlement continues, and appears likely to continue indefinitely. The proposal of an armistice was merely a suggestion, and the agreement itself was apparently nothing more than a recommendation. It is very clear that something much more decided in its character is required to bring about peace and a settlement, and it is to this that the three Allies must address themselves now with all possible speed. At first the Greeks, or rather the Greek Government, were understood to be willing to accept the armistice as proposed, and even the agreement with some reservations. Not so the Kemalists. They have only now replied to the Allies, and by what is in effect a refusal. They say that if the Allies will first cause the withdrawal of the Greek Army from Asia Minor, then, and not till then, will they agree to consider terms of peace. Not the terms laid down by the Paris Conference, but terms which they themselves will lay down, among them being the retrocession of Eastern Thrace in its entirety. Mustafa has been talking very loudly and aggressively, but it is easy to understand that he thinks his position would be much improved if the Greek evacuation took place at once, for then he would be rid of the "sanction" or guarantee implied by the presence of the Greek forces—the only restraint on his actions. To this the Allies can hardly assent, nor can Greece be expected to do so. Meanwhile Greek-opinion has definitely turned against the peace proposals of the Paris Conference, particularly against the withdrawal from Asia Minor, and it is stated that the Greek army in that quarter will, as we intimated two or three weeks ago might be the case, form Smyrna and the Smyrna district—the ancient Ionia—into a separate state. Significant of the hardening of the Greek attitude is the reconciliation now going on between the Royalists and the Venizelists, hitherto at daggers drawn since the return of King Constantine. It is therefore all too plain that things are back where they were before the Paris Conference, with this difference—that the situation has worsened appreciably in the interval. Surely the Allies should act. In this matter at least France, we think, may perhaps now be depended on to co-operate effectively with Britain, for the Kemalists, who are hand in glove with the Bolsheviks, have not kept their promises to her, and are quite likely to cause serious trouble for her in Syria, where she has already trouble enough. What is Lord Curzon going to do about it?

Palestine.

In the *Army Quarterly* for April, "Auspex" writes on "The Political Reasons for the continued Occupation of Palestine." After outlining the general march of events in the Holy Land from our occupation to the present day, he points out that the protecting British troops dislike their task and "are sympathetic with the Arab." He continues with comments on the Mandate and on the Constitution :—

The Mandate has not yet been confirmed, and there seems to be some doubt as to the legality of some of the acts of the High Commissioner while it is in abeyance. Our status in Palestine is that of an Army of Occupation. International law gives no power to the military occupier of a country to interfere with domestic questions such as the sale of lands. But however this may be, it is clear that we are creating for ourselves a very serious embarrassment in Asia. Probably there is no question at the moment so fraught with danger to the British Empire as the Khilafat movement. For some unexplained reason the advocates of the Khilafat movement have not yet begun to cite the treatment of the Palestine Arabs as one of their grievances, but that, no doubt, will come, and it is a point on which we are least qualified to reply. We are, in fact, between the Devil and the deep sea, a metaphor which must not be taken literally when I add that on the one hand stands a section of International Jewry and on the other the Arab population of Palestine.

It is very curious to find that the strongest advocates of Zionism in this country belong to the Evangelical Church, who are always well versed in the prophecies of the Pentateuch, and who have more than an intuition that they themselves are the descendants of the Ten Lost Tribes of Israel. It is useless, no doubt, to point out to them that the Jews never held sovereignty over Palestine for more than 250 years; that they were, on their own showing, invaders with very ruthless methods of warfare; that they fought interminably among themselves and that they submitted to conqueror after conqueror both before and after the birth of our Lord. On the same line of argument, the Moors have a better claim to Spain, the Italians to England to say nothing of all the other corrections that have been made in the map by the relentless march of history. The Jews have ever been the finest propagandists in the world, not excepting even the Irish. They wrote their own history. You find no mention of them as a Chosen People in any contemporary writings or inscriptions. Indeed, with the doubtful exception of the Moabite Stone, you find no mention of them at all. But they had inspired writers, and these have brought immortality to their literature. I suppose that if the Moors had had the same eminence in literature and the same genius for amassing wealth they, too, might have been heard at the Peace Conference.

The military occupation has been estimated to cost 2½ millions sterling during 1922-23, and it is perhaps in the hope of saving some of this large sum that the Government has published its draft constitution, a scheme very carefully prepared to placate Moslem susceptibilities, but not in the least likely to remove the causes of unrest. The rock

on which the ship of Zionism will split is the Legislative Council, which is to be composed of 10 official and 15 unofficial members. Out of these 15 the High Commissioner is to nominate 2 and 1 is to represent the Chambers of Commerce. It will be noted that in any matter, such as immigration or land, the official and nominated members with the 2 Jewish members will outvote the Arabs. Moreover, as an additional safeguard against the will of a democracy, the High Commissioner will have power to disallow any ordinance or to reserve any ordinance for the Royal Pleasure, and even if he gives his assent His Majesty may disallow an ordinance within one year after the High Commissioner has assented to it. Such a constitution is not at all likely to conciliate the Arabs; it will provoke a storm among the Zionists. In the present temper of the country it would be most impolitic to reduce the garrison which alone stands between the two contending parties. One of the grievances of the Arabs is that persons who regarded themselves as owners are now being required to sign leases. They were owners until Abdul Hamid declared himself to be their landlord, and they made no resistance partly because it was useless and partly because their taxes were made very light. In 1908 the Young Turks tried to sell their lands, but desisted when they realized what a storm they would provoke. As successor to the Turks, the British Government may technically have been justified in regarding itself as legal owner of these lands, but a very bad impression was caused, which may now be removed by the recent announcement that it has recognized the private ownership of the land at Beisan.

In sending their Delegation to London the Arabs feel that they are making a last appeal to the English people: their disappointment if they find that their appeal has been made in vain may take a form which will cost us a far larger army of occupation to say nothing of the feeling it will provoke among Moslems throughout the world.

The East.

In the *English Review* for May, Mr. Richard Curle has an interesting descriptive article on "The East." For the most part it is a musing picture, but he drops into one philosophic passage, thus:—

I don't pretend to appraise the glamour of the East. To begin with, I don't know the most glamorous Orient lands, and, in any case, the cloak hung too loosely. I reached it at an age when the focus of impressionism has changed and when you cannot read easily into the external world the romance of your own cravings. But the East is still the East, complex and tenacious. One stands bewildered before this pageant, which, like an iceberg, has its chief being out of sight. And yet in perspective the very diversity of mankind is understandable through the study of a single human being. Who knows the East, its motives and its movements, but who knows his next-door neighbour? Such knowledge as we have possesses the doubtful value of empirical investigation and is rendered differently according to its interpreter. I confess that I can't render it at all in any concise form, though merely to say "The East" brings before me a whole series of unified impressions whose totality is wordless. In those Eastern realms of blazing sunlight, where the footing of the West is a mere imprint upon the sands of centuries, there is a haunting suggestion of black magic. It knits them together, the happy races and the sombre, in an obscure Oriental brotherhood whose roots are sunk in immemorial origins. The psychology of Asiatics may often approximate outwardly to our own, but there is a something at the back which the arguments of democracy do not touch, or those abstract words that govern the conduct or express the desires of Occidentals.

We come to them with our logical theories, and behold, they have their own about which they do not argue. The East is weary of the West, weary of its logic, weary of its tutelage. It has accepted from us a smattering of political idealism, but merely, so to speak, as a basis of argument. Easterners don't appreciate in the slightest many of our most cherished illusions, but we can only approach them through our own standards and they can only obtain their wishes by pretending to aim at the goal of these standards. We talk to them of freedom and they reply, "Well, give us freedom," but the one freedom they want is freedom from us. Words, remember, do not have a universally equal significance. What the Oriental really wants is a return to some sinuous Eastern mode of life where the order of things is fixed within and chaotic without.

Indeed, there is much at once incoherent and statuesque about the East. Like the jungle, it decays and grows in the intensity of a silent struggle. Deep down it has its own philosophy of quiescence, that bedrock of the aged Oriental consciousness, but on the surface the jumble of its life is appalling. The generations may alter their external modes, even their external opinions, but the race-mentality remains steadfast. The further I left the East behind me, the more did I conceive of it as a kind of abstraction. All you will ever notice is the sheath of its nerves, which veil an idea more powerful, more universal than any other idea in the whole world. But if I could explain what that idea is I should have ceased to be a European. For me to understand Asia would be a contradiction in terms.

If you find this week's issue of THE NEAR EAST of interest, help to make the Paper still more widely known by securing subscribers among your friends.

NOTES AND NEWS.

Devonshire Square
E.C. 2.

Results of the Conference.

At last after many weeks of vicissitudes the Genoa Conference is over, leaving matters, in the economic sphere, very much where they were before it. The Allies are certainly no nearer the solution of the problem of a settlement with Russia, while in place of the intended pact of Non Aggression for ten years we have the unsatisfying substitute of a pact for a few months—a pact which is rendered more doubtful by the circumstantial reports of military preparations by Russia on the Polish frontier. Both these fundamental questions will come up for settlement again at The Hague provided that there are no international developments in the meantime to prevent a further Conference. Whether there is any greater prospect of an agreement in Holland than in Italy must remain to be seen. The Conference at Genoa did not accomplish all that was expected of it because it was impossible to dissociate economics from politics. It may be that the next month or so will have a tonic effect since Russia and Germany will have opportunity to reflect that the way not to obtain credits (which they must have) is to continue to pursue the course they followed at Genoa.

Economic Relations in the Balkans.

So much for the broader issues at Genoa. As regards the Near East it cannot be said that any happier results have been achieved, nor is this surprising as the Russian question was allowed to monopolise the proceedings. There has been no appreciable advance in the direction of a settlement of the Greco-Turkish imbroglio, while a question of almost equal importance, that of the economic relations between the Balkan countries, has been dealt with in anything but a satisfactory manner. If one thing is obvious it is the absolute necessity for the removal of all vexatious restrictions on commercial intercourse between the various States. I am no advocate of free-trade. No one realises more fully than I do the need for protection in certain well-defined cases, but in regard to countries situated like the Balkan States the only hope for rapid reconstruction is by unhampered commercial activity. But those who have most to gain by this are the last to see it, and so there were strong objections on the part of the Little Entente to anything but freedom in respect of tariffs, and the Conference took their point of view, an inevitable development no doubt in view of the trend of the other negotiations but none the less regrettable on that account.

The P. and O. Disaster.

Widespread regret will be aroused by the news of the disaster to the P. and O. liner, Egypt, which on Saturday evening collided in a fog with a French cargo boat, the Seine, and went down almost immediately. There was, unfortunately, a serious loss of life which would have been much greater but for the gallant efforts of those on the Seine. It may be reckoned a fortunate circumstance that the disaster did not happen at another season when the vessel would have had its full complement of passengers returning from leave and the casualties might have been

much more serious. It is of tragic interest to recall that Lord Inchcape, referring at the general meeting of the P. and O. Company in December last to the Company's success in having no serious accident during the year, said "I am almost afraid to mention this record for the past year in case it should be broken during the year now current."

The Cotton Position.

As usual about this period cotton is beginning to come in for considerable attention, and as is invariably the case very conflicting reports are forthcoming with regard to the prospects of the coming crop. The price of cotton, it will be noted, has been hardening for some time, but whether this is justified at the present juncture is extremely doubtful. It is to be presumed that the reason for it is the operations of speculators in anticipation of a shortage, while a contributory cause is possibly to be found in increased purchases by the trade as the result of the slight but growing improvement in the markets. Other causes no doubt have operated, but speculation I imagine to be the principal influence. Eventually, as I have pointed out several times, the price must go up substantially, if only for a period, when the world's markets are once more in a position to take their normal requirements. But that time is apparently still some way off, and it is as certain as anything is that any appreciable rise in the price of cotton goods which must inevitably follow a pronounced rise in the price of the raw commodity can only have the effect of restricting the market outlets.

Land and Mortgage Company of Egypt.

A feature in the report of the Land and Mortgage Company of Egypt of special interest is the recommendation that the uncalled liability of £15 per share should be cancelled. When the company was formed the shares were of the value of £20, but this was reduced to £18 in 1886, and of this sum £3 is paid up. The large debenture issue has been an obstacle hitherto to the proposed step, but the debenture obligations have now been greatly reduced and there should therefore be no opposition to the carrying into effect of a highly-desirable measure from the point of view of the shareholders.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

YUGOSLAVIA.

Belgrade, May 11.

American Loan and the Government.

Yesterday the Council of Ministers had a long meeting, which lasted from 9 till 2 o'clock, to discuss the American loan offers. All the offers were compared and it was decided that that of Blair's group was the best. Subsequently two of the Ministers went to M. Pashitch, who is still unable to attend at his office as a result of his recent accident, and advised him of the results of their meeting. M. Pashitch agreed that Blair's group's offer should be accepted in principle, and that M. Koumanoudi, the Minister of Finance, should sign an agreement with this group.

The Minister of Finance is now preparing a draft of the agreement, and immediately it is signed by both parties the Minister of Finance will be able to draw cheques on New York through the National Bank to the value of 10 million dollars in cash and 15 million dollars for materials. It is expected that the Minister of Finance will have the agreement prepared and signed in the next few days and since the signatures of the American contracting group are already in Belgrade, no unnecessary delays are anticipated. In the course of the next few days the Parliament will have to pass a Bill authorising this loan and fixing the regulations for a sinking fund and other necessary measures for repayment. The loan is to be of the amount of 100 million dollars at 8 per cent. interest per annum and the issue price is 87.

The only communique that has been issued by the Government with regard to the negotiations is as follows:—"At to-day's meeting of the Council of Ministers the Minister of Finance has received authority to conclude an agreement with Blair's Banking Group." At four o'clock two Ministers went to the Royal Palace to advise the King of the decision.

ROUMANIA.

Bucharest, May 14.

The Little Entente and Genoa.

Part of the Roumanian Delegation returned to Bucharest from Genoa last Wednesday. The members expressed satisfaction at the outcome as regards economic questions, especially at the grant of full economic freedom to every state. It was proposed at the Conference that the Little Entente states should accept free trade by abolishing the different import and export restrictions and by granting the most favoured nation's clause to all countries. The Little Entente delegates, however, showed a united front in offering strong opposition to these demands, with the result that every State has the right to choose the measures it thinks suitable for its own commerce.

Banca Generala Notes.

As is known the Peace Treaty of Versailles compelled Germany to repay to Roumania the total value of the Banca Generala Notes issued by the Germans during the time of the occupation of this country. The total

value has been established by the Banca Nationala—who withdrew these notes from circulation—at 2,780 million lei. For the purpose of settling this debt and many other similar questions the German Government is sending a delegation to Bucharest, which is due here on May 20, to negotiate with the Roumanian Ministers of Finance and Foreign Affairs. It appears likely that the Roumanian Government will prefer to receive in settlement German goods needed for the country's reconstruction instead of payment in cash at different dates.

New Export Regulations for Cattle and Foodstuffs.

In order to check profiteering and to reduce the present high cost of living, the Government has decided to introduce the following export regulations for cattle, fish and other food products:—

The export of the following foodstuffs is entirely prohibited: Eggs; milk and its bye-products (butter, cheese, etc.); raw, smoked and salted fish and salted meat; fats of all kinds (lard, bacon); vegetable oils; fish in every form; caviare excepting black caviare.

The following may be exported with a special authorisation and subject to the conditions shown below:—

Horned cattle (oxen, cows, rams) only from Transylvania, Banat, Bukovina and Bessarabia; "Podolia" oxen from the age of six upwards; cows from the age of eight upwards; rams from all parts of the country. Export permits for these cattle will be granted on condition that the exporter provides the home market with a quota of 50 per cent. at the price of four lei per kilogram for live oxen weighing from 250-300 kgs. and six lei for those over 300 kilograms. Cows will be sold under the same conditions at three and five lei per kilo respectively, and rams at four lei per kilo.

The export of pigs will be allowed only against a special permit and under the following conditions:—The exporter will have to provide the home market with a quota of one-third at the price of six lei per kilogramme of live pigs weighing 80 to 150 kilos, and at seven lei per kilo for those over 150 kilos.

The export of onions and potatoes (old crops) is free with a special authorisation only from Transylvania, Banat and Bukovina. The exporter will provide the home market with a quota of one-third at the price of 1.50 lei per kilo for onions and 0.50 lei per kilo for potatoes.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 15:—

Condition of Crops.—Further additional rainfall in Bengal jute districts has improved prospects of jute crops. Sowings on high lands in full progress. Prospects of other crops good.

Markets.—Cotton.—May 11—Bombay cotton market steady. Fine M.G. Oomras Rs. 419 May, Rs. 439 July. Bombay cotton arrivals from September 1 to May 6 were 2,677,000 bales as compared with 1,977,000 bales during the same period of the last year. Piece-goods.—May 11—In Bombay imported piece-goods market wholesale demands quiet; retail enquiries fair; ruling rates steady and local goods moving freely. Picketing in United Provinces strengthening. Jute.—May 13—Calcutta jute market very firm. Heavies firm but quiet. Hessians very firm. Firmness of jute and gunnies due more to local bulls buying than to export orders. Shellac.—May 12—T.N. Rs. 102. Business passing. Rice.—May 12—Rangoon. Big Mills Special Straits Quality Rice Rs. 520.

Negotiations are reported to be under way in Vienna for the creation of a selling syndicate of all the Czecho-Slovak iron companies.

The Economic Resources of Palestine.

II.—AGRICULTURAL POSITION.

By LEONARD STEIN. *

(All Rights Reserved.)

It will now be convenient to survey the economic situation as it actually is and then to indicate briefly the grounds which exist for expecting a quickening of economic life in the near future. Agriculture naturally comes first. Palestine is mainly an agricultural country. The official statistics for 1919 show that 61 per cent. of the population of Western Palestine were engaged in farming, while in Transjordan there is no other occupation of any importance.

The principal cereal crops are wheat, barley, and millet. The output in metric tons is as follows:—

	1919—1920	1920—1921
Wheat	45,800	75,200
Barley	25,800	51,900
Millet	15,300	30,400

These figures, like those that follow, relate only to Western Palestine. No statistics exist for Transjordan, and an appreciable addition, which cannot be precisely estimated, must be made on this account. It will be seen that the 1920-1921 crops were almost twice as large as those of the previous cereal year, which were grown under something like war conditions. Even so, Palestine is not self-sufficient in respect of her wheat supply, and is accustomed to import largely across the Jordan from Hauran—a conspicuously productive area, of which the greater part is now included in the French Mandatory sphere.

On the other hand, the high-grade barley of the Gaza District is exported—mainly to the United Kingdom—in appreciable quantities. The exports amounted in 1913 to nearly 19,000 tons. There is also, as a rule, a small exportable surplus of millet.

In addition to cereals, Palestine produces considerable quantities of fruit and vegetables. Vegetables are grown in great variety, but are mainly reserved for local consumption. The only exception is in the case of water-melons, of which about a million are exported annually to Egypt, Syria, and other Mediterranean markets.

The fruit-crop is of much greater importance. The principal products are olives, oranges, grapes and almonds, of all of which there is, in some form, an exportable surplus. The olive flourishes in every part of the country. The output is partly reserved for local consumption and partly exported in the form of olive-oil or soap. There are some hundreds of small oil-presses, with an estimated average annual output of 3,500 tons of olive-oil. Much of this is utilized for the manufacture of soap, the annual production of which has reached as high a figure as 9,000 tons and which finds a ready market in Egypt and Arabia. The principal centre of the soap industry is the Moslem city of Nablus.

The output of oranges amounted in 1920-1921 to 17,077 metric tons, as compared with 13,300 in 1919-1920. There is a large export trade, which rose from 456,000 boxes in 1905, to 870,000 in 1911, and 1,608,000 in 1913. Of the 1913 exports, more than half went to Liverpool. Since the war the trade has declined, and only 831,000 boxes were exported in 1920-1921. This will, however, probably prove to be a temporary setback due to abnormal conditions arising from the war, and there is no reason why the trade should not at least regain its former dimensions. The prospects for this season's crop are promising and it is anticipated that the total crop for 1921-1922 will amount to one million boxes, all but a small percentage of which will be exported. It may be noted in passing that the Arab and Jewish orange growers of the Jaffa District have recently formed a combine for the management of the export trade—a fact which suggests that Jews and Arabs are perfectly capable of working together in their common economic interests.

* This article contains the substance of a lecture delivered recently at the London School of Economics with certain modifications.

As regards almonds, this year's harvest is estimated at 2,227,000 lbs. from the Jewish colonies, together with about 700,000 lbs. from other sources.

Vine-growing is almost entirely in the hands of the Jewish colonists, by whom the wine industry has been mainly built up. Their annual pre-war output of wine averaged a little over a million gallons, of which 80 per cent. consisted of dry red wine. They also distil yearly about 6,600 gallons of cognac, and obtain, as a by-product, 13-15,000 lbs. of tartar. The wine finds a market in Egypt and the Eastern Mediterranean, and was exported to the value of £60,000 in 1913. In 1920-1921 the value, in spite of higher prices, fell to £50,000; and in view of the contraction of the world-demand for wine, it may be doubted whether any large expansion of this industry is to be anticipated.

Apart from wine and soap, pre-war Palestine possessed no important industries, with the exception of the manufacture of *articles de piété*—the olive-wood and mother-of-pearl ornaments which are sold in considerable quantities to tourists and were exported abroad in 1913 to the value of £21,000.

Thus before the war, the economic importance of Palestine was almost negligible. Its local production of food-stuffs, coupled with a small export trade in barley, oranges and wine, and supplemented by the expenditure of tourists and charitable contributions from abroad, just sufficed to enable the mass of its somewhat inert and unenterprising population to maintain a humble standard of subsistence.

The present place of Palestine in the world's markets can be seen at a glance from its trade and shipping returns. In 1913 the imports via Jaffa and Gaza were valued at £1,420,925 and the exports at £906,533. A substantial addition must be made for traffic through Haifa, for which no pre-war statistics are available. Since the war Palestine has been busily replenishing her exhausted stocks at inflated prices, while her productive capacity has been temporarily checked and her markets contracted.

Thus in 1920-1921, the total imports were valued at £5,521,633, as compared with £1,420,925 in 1913, and the exports at only £E.771,701, as compared with £906,533. As compared with 1919-1920, exports slightly declined and the apparent adverse balance of trade rose by nearly a million pounds. The figures for the first nine months of the current financial year (Apr.-Dec. 1921) show that there has been a slight recovery in exports, which are £E.32,211 in excess of those for the corresponding months of 1920. Imports, however, have also risen by £E.405,171, and the apparent adverse balance is more pronounced than ever.

It remains only to refer to the shipping returns. Steam-shipping only is here taken into account. In 1913 the steam-shipping entered and cleared consisted of 1238 vessels of a total tonnage of 1,961,702. In 1919-1920 the figures were only 357 vessels of 466,714 tons. In 1920-1921, they had risen to 720 vessels of 809,033 tons. Even this figure, however, is small and is well below the 1913 standard.

It may be added that as a result of the transfer of the Austrian Lloyd vessels to Italy, the Italian flag predominates in Palestine ports, and British shipping, though it comes second, is by no means as fully represented as it very well might be.

(To be continued.)

Messrs. De Zoete and Gorton have removed to 63, Gresham House, Old Broad Street, E.C.2.

The supply of rolling-stock in Czecho-Slovakia has greatly improved, and there is a considerable surplus of trucks.

Engineering Topics.

By Our Engineering Representative.

Re-energising Magnetoos.

In the construction of magnetoos for motor car, motor boat, and motor cycle ignition several points have to be considered, not the least of which is that steel retains imparted magnetism not only in relation to the length of time to which it has been submitted to the magnetic influence, but also in relation to its hardness. As a general thing the harder the steel the less the magnetic properties it obtains under treatment but the longer it will retain them. It follows, therefore, that if magnet steel is not unduly hard it will become fairly well saturated, as an electrician would call it, and if it is hard its saturation will be correspondingly less. It also follows that if it is soft it becomes highly magnetic but loses its magnetism comparatively quickly. For magnetoos as high a magnetic saturation as possible is desirable, which usually means fairly soft magnets. These give an intense spark, but as they lose power after a time they may need re-magnetising after varying periods of service. A number of methods may be adopted to bring back this lost power, the usual procedure being to apply an electro magnet for a series of short periods to the poles of the magneto magnets. To do this properly it is necessary to take down the magneto, and as most car owners are averse to touching their magneto more than is absolutely necessary this method is not in favour. A magneto re-charger, in which a motor car firm of international repute are, I believe, interested, is so designed that the re-conditioning of the magneto can be carried out whilst it is on the car, and as this prevents any risk of upsetting the timing or damaging the armature windings it is a method which should be certain to become popular. The method employed consists in connecting one lead to the terminal post and the other to a ground connection and giving a series of shocks of about 4 seconds duration; the pressure of the supply being about 15 or 20 volts and the current of a value of about 25 amperes. A large London depot is adopting the method as standard and as part of its service system. In this case the re-charger operates on a 110 volt, 60 cycle, single-phase circuit and the current was converted to continuous current by means of a rectifier. This, I noticed, was of a simple design, and comprised the usual lead and aluminium plates in an acid solution. These, with an ordinary type of switch on the alternating current side and an ammeter on the direct current side were contained in a small neat case. A twin cable was plugged into circuit and taken to the magneto which was in service on a small car of well-known make. The ground or earth wire was attached to the exhaust pipe for convenience, although naturally any other part of the chassis would have done provided it were not insulated from the engine frame carrying the magneto. The application

of four or five brief "shocks" was quite sufficient to bring the magneto magnets up to full strength, and the cost of the work, as will be seen, was very low. Quite a number of these re-charging sets are already in use in one of the Dominions, although as yet they are not so well known in this country.

British Boiler Production.

The works at Hyde, formerly owned by Messrs. Tinkers, Ltd., and recently acquired by the Spearing Boiler Co., are being re-equipped and adapted to the construction of water tube boilers on a large scale. The present capacity is 3 large boilers per week, but extensions are being carried out with a view to increasing this capacity considerably. The firm has ordered a large set of electrically operated plate-bending rolls capable of dealing with plates of 1.25 inches in thickness and up to 20 feet in length, a feature of this apparatus being a hinged bearing which will permit of the finished cylinder being withdrawn without trouble from the top roller. The machine is driven by means of a 75 horsepower electric motor through accurately cut gearing, and a feature worthy of special notice is that the rolls are fitted with an electric braking device. A 20 horsepower motor is used for the adjusting of the top or bending roll, and a feature of engineering interest is that each end of the roll is clutch operated so that adjustment may be made for bending plates for the construction of taper or conical boilers or cylinders. Considerable improvements have been made recently in British boiler practice, and overseas buyers in particular should make a point of keeping in touch with all developments.

Prague Motor Exhibition.

Under the auspices of the Prague Automobile Club, a successful Motor Exhibition was held in Prague at the end of April. The industry in Czecho-Slovakia is likely to receive desirable impetus from the publicity provided by the Exhibition, at which British goods were effectively shown. The chief distributor in Czecho-Slovakia for the Dunlop Rubber Co., Ltd. (Mr. J. O. Jech of Prague), had a particularly good stand, and showed all the principal Dunlop products from cycle tyres to solids.

Midland Club's Hill Climb.

In the Midland Automobile Club's hill climb on Shelsley Walsh, an event is to be included for ladies driving fully-equipped touring cars. There will also be the usual closed and open trials with cups for fastest time and formula wins and a team event for clubs affiliated to the R.A.C. To meet the wishes of several intending spectators certain alterations are to be made in the surface and sides of the road to ensure greater safety for both competitors and onlookers.

British Consular Reports.

II. BUNDAR ABBAS.

The following extracts are taken from the report on the trade and commerce of Bundar Abbas for the Persian year ended March 20, 1921, by H.M. Consul at Bundar Abbas, Mr. A. W. Fagan, I.C.S. :—

Only a very small proportion of the goods landed at Bundar Abbas is consumed in the place itself; the bulk is forwarded to Kerman, Yazd and other distributing centres in the interior. Bundar Abbas is simply the gate of South-Eastern Persia, through which goods pass on their way to and from the interior. The population is estimated at about 16,000 persons, about two-thirds of whom usually migrate to Minab and other parts of the district in the summer partly to escape the excessive heat, and partly to gather in the date harvest. The inhabitants are of a very mixed strain. The better class merchants are of Persian origin, but among the lower classes negro, Arab and Baluch blood predominate. The local language is a patois known as Bandari, a conglomerate dialect in which can be discerned traces of Arabic, Baluchi, Persian and even Swahili. The official language however is Persian, and the better classes can also speak and write it correctly. There is also an increasing tendency to learn English, and instruction in that language is now given in the local school by a native of India; many of the rising generation, therefore, should possess a practical knowledge of the language in a few years' time. The British Colony consists of about 100 Hindus from Shikarpur and about 40 Khojas.

Landing Arrangements.

The roadstead is an open one and very shallow, but on account of the islands is very sheltered. Port, in the European acceptation of the word, there is none; there are neither wharves nor lights, and, owing to the shallowness of the water, ships are compelled to anchor about one and a half to two miles out. A buoy in about 5 fathoms at low tide, placed and maintained by the Royal Indian Marine authorities, marks the best anchorage at a point $2\frac{1}{2}$ miles from the shore at the nearest point slightly east of the British Consulate, and about $3\frac{1}{2}$ miles from the Customs pier. Many ships, however, anchor opposite the town as it is more convenient for discharging cargo.

The various shipping agents maintain about a dozen lighters in all, into which goods are transferred from steamers. The sea is very seldom rough enough to interfere seriously with lightering, but ships are more often delayed by calm weather than by rough, since in the case of a large shipment the lighters at the disposal of the agents concerned are often insufficient to take all the goods in one trip, and have to discharge their goods and sail out again to the steamer, a process which, if there is little or no wind, is laborious in the extreme. Moreover, goods are landed on a short masonry pier, which possesses no cranes, and is high and dry at low water; lighters can therefore only come alongside for about four hours at high water, and have frequently to wait a long time before they can discharge their cargo.

On the pier goods are handed over by the shipping agents to the Hamal Bashi, who for a fixed charge conveys goods from the pier to the Customs-House, and from the Customs-House to the merchant's warehouse. Goods lying on the pier are exposed to all weathers, and though the construction of a shelter has often been mooted, it has not so far been effected. Rain falls so seldom that the problem only occasionally becomes prominent. The status of the Hamal Bashi has recently undergone modifications; until recently no written agreement was in force between him and the merchants, and he accepted no liability for claim for damage. In 1914, however, a written agreement was executed between the Hamal Bashi and the

leading British and Persian merchants, under the terms of which the Hamal Bashi accepted full responsibility for goods while in his charge, i.e., from receipt on the pier until delivery at the merchant's warehouse; he also deposited a substantial monetary guarantee to cover losses, and various rules were drawn up to expedite the handling of cargo. The Hamal Bashi arrangement is not altogether satisfactory in practice as the presence of a middleman between the Lighterage Company and the Customs tends to confuse the question of responsibility, and increases the leakage of goods.

The Customs premises are very confined, and owing to lack of space much confusion frequently prevails. Goods can be either placed in an open courtyard, when no charge is made and no responsibility accepted by the Customs, or they can be placed in a Customs warehouse, in which case the Customs accept full responsibility and make a small charge. The upper storey of the Customs building (formerly a Portuguese factory) is utilized by the Deputy Governor of Bundar Abbas as his office and official residence, and if that were vacated by him, the congestion in the Customs premises would be relieved, additional accommodation secured and traffic in the courtyard considerably reduced. The majority of merchants leave their goods in the courtyard to avoid the extra expenditure, and primitive though the system is, it works fairly well in practice and few complaints are received. Demurrage is charged at the expiration of 10 days on all goods. Merchants are entitled to have their own bonded warehouses, in which case they are at liberty to make their own arrangements for the conveyance of goods from the pier to the warehouse, and are not compelled to utilise the services of the Hamal Bashi. This is much the most satisfactory system to adopt for a large importer, but in practice only shipping agents can take advantage of it as importers generally do not receive their bills of lading until a week after the arrival of the goods.

Trade Routes.

Goods having passed through the Customs and reached the consignee's warehouse have then to be sent up by him to the interior. Caravans start from a particular spot on the outskirts of the town and goods have to be conveyed from the merchants' warehouses to the starting point. The monopoly of this carrying trade is let out on contract for 300 toman per annum and the lessee charges 2 kran per camel load and 1 kran per donkey load from the warehouses to the starting place. The means of transport are camels, donkeys and mules, the last mentioned, however, being scarce and expensive. Kerman is the chief centre to which goods are sent, and the journey to that place takes about 40 days for camels, and about 30 days for donkeys. The journey to Yazd takes about 60 days for camels and 50 days for donkeys. A camel will carry about 400 lbs. and a donkey about 180 lbs.; loads have to be distributed equally on each side, and packages should not therefore exceed half that weight nor 40 inches in length for camel transport and 26 inches for donkey transport. Consignments received from the United Kingdom are generally re-packed and covered with tarred sacking before being forwarded. The roads are extremely rough and goods are exposed to all weathers. The trade routes have been comparatively safe during the year 1920-21, only one minor robbery having been reported in the district.

(To be continued)

The second Buda-Pest Orient Fair will be held from June 17 to 20.

In the House of Commons on May 22 the Anglo-Persian Oil Company (Payment of Calls) Bill was read a second time.

The Algerian Oilfields, Ltd., announce that the production from the leased area for April amounted to 149,700 kilos.

The traffic receipts of the Egyptian Delta Light Railways for the week ended April 30 amounted to £8,792; total for the year £25,533. For the corresponding period of last year, receipts amounted to £10,343; total for the year £29,317.

Stock and Share Markets.

BUSINESS ON SMALL SCALE.

Quiet Tone Prevails.

(From Our Own Correspondent.)

London, Tuesday morning.

There has been very little doing in the markets during the past week. The termination of the Genoa Conference had no influence one way or the other, its unsatisfactory ending having been already discounted, and the principal factor during the past week has been the possible effect of the new regulations, which came into force yesterday, permitting transactions for the account. It was generally anticipated that there would be a great increase in the volume of business, but this has not proved to be the case, and the tone yesterday was surprisingly quiet. No doubt the reversion to pre-war conditions will have a healthy effect on business in due course, but probably not to the extent expected, for many brokers are not taking at all kindly to the idea of carrying over, and quite a number are understood to have informed their clients that they do not propose to undertake such business at all.

Colonial Loans.

After the outstanding success that has attended recent issues the result of the New South Wales Loan came in the nature of a surprise. It was a $4\frac{1}{2}$ per cent. issue offered at 95, and over 90 per cent. of the stock was left with the underwriters. Another similar issue is being made this week for the Straits Settlements, and it will be interesting to see how it goes. Should it meet with a similar fate one can only form the conclusion that the reduction of the rate of interest on capital has now gone ahead of the economic conditions.

The Small Investor.

A matter in connection with recent issues, indeed with many issues since the war, that calls for comment is the treatment meted out to small investors. It would really seem that many companies do not desire to encourage small holdings. Occasionally in the case of a loan that is heavily oversubscribed the statement is made that subscriptions of a moderate amount have not received an allocation. But companies are very glad to have the small investor's money when an issue is only just subscribed. Obviously it is a matter that requires attention, for it is distinctly in the interest of the companies themselves that the small investor should receive consideration. Many companies have shown during the past few years that they realise this by dividing the shares so as to make them more accessible to the ordinary investor.

Gilt-Edged Dull.

A dull tone has prevailed in the Gilt-edged market. Consols at 57.5-8 are 7-8 down, the Conversion Loan is 5-8 down at 77, while War Loan Fives at 99.11-16 are 3-8 up. Indian stocks have been fairly steady. The Seven per cent. Loan is $\frac{1}{4}$ down at 114 $\frac{3}{4}$, the 3 $\frac{1}{2}$ per cent. Loan has shed $\frac{1}{4}$ at 69, while the 3 per cent. Loan is $\frac{1}{2}$ down at 57 $\frac{3}{4}$.

Generally speaking inactivity has prevailed in the foreign group, there being a tendency to wait and see what follows on the Genoa Conference. French stocks have been inclined to droop, War Loan Fives being 2 down at 42 $\frac{3}{4}$. German 3 per cents have been a specially dull spot and close 7-16 down at 2. This is of course attributable to the outlook for the end of the month. Italian Rentes remain at 24 $\frac{1}{2}$. Russians have been dull, the 4 per cents. being $\frac{1}{2}$ down at 8 $\frac{1}{2}$, the 4 $\frac{1}{2}$ per cents. $\frac{1}{2}$ down at 12, and the 5 per cents. $\frac{1}{2}$ down at 15. Peruvian Corporation issues and other Peruvian stocks have provided a firm spot. Other South American stocks are much as before.

Industrials Quiet.

The Industrial market has been inclined to be stagnant, with prices inclined to irregularity. It has been

in fact, quite one of the duller weeks of late. No doubt presently things will show a tendency to brighten up, but, of course, the general outlook is anything but encouraging, and until international conditions improve it would be too much to expect any great development in this market.

Textiles have been exceptionally a firm spot. Coats are unchanged at 3.3-16, while Courtaulds are 1s. 3d. up at 50s. 3d. Tobaccos have been steady. Imperial Tobaccos are unchanged at 60s., while Bats are 6d. down at 79s. Dunlops have hardened to 8s. 6d. Iron and Steel securities have been variable. Vickers are 9d. down at 11s. 6d., Armstrongs are 16s. 6d., while Guest Keens are 9d. up at 34s. 3d.

Shipping securities have been rather dull. P. and O. Deferred are 5 down at 320. Cunards are unchanged at 21s. 6d., while Furness Withys are 1s. down at 30s.

Oils Dull.

On the whole the market has been rather idle during the week. A certain amount of activity developed yesterday, but it soon passed away. A little business has been done in options, but dealers generally are showing considerable reluctance to undertake this kind of business. Burmahs are unchanged at 5 $\frac{3}{4}$, while Anglo-Persian Ord are 1-16 up at 4 $\frac{3}{4}$. Mexican Eagles are 1-32 down at 3.9-16. Trinidad issues have been about the same. Apex are unchanged at 2.5-16, Centrals are 2.5-16, a decline of 1.16, while Leaseholds are unchanged at 1 $\frac{1}{4}$.

Among Egyptians, Anglo-Egyptian B are 1.11-16, a decline of 1-8, while Oilfields of Egypt are unchanged at 6s. 6d. In the Roumanian group Phoenix are 28s. 7 $\frac{1}{2}$ d., a decline of 4 $\frac{1}{2}$ d., Steaua Romanas are 3d. up at 13s. 3d., Roumanian Consolidated are 2s. 3d. up at 16s. 6d., while Dacia Romanos are 4 $\frac{3}{4}$.

The French *Journal Officiel* for May 4 contains a Presidential Decree, dated April 28, abrogating the provisions of the Decree of December 11, 1915, which provided that the favourable Customs regime applied to certain Tunisian products on importation into France and Algeria was to be accorded to such goods when carried in Allied or neutral vessels. In consequence, the specially favourable Customs regime will now be applied only to goods carried in vessels flying the French flag.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.
117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old Dundee, and Calcutta makes.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

Near East Markets.

LONDON PRODUCE REPORT.

Lemons in Strong Demand.

(From Our Own Correspondent).

London, Monday evening.

Sugar.—Home refined has been in moderate request at steady rates. Tate's cubes and mineral water sugar have both shed 3d. at 53s. 3d. and 48s. 6d. respectively. London granulated is 3d. down at 48s., as also Lyle's granulated at 48s. 3d. Export descriptions have been quiet. West Indian crystallised is firm at 42s. 6d., while white Mauritius has advanced 1s. to 44s. 6d. Cane sugar quotations are:—May, 14s. 9d.; June, 15s.; August, 15s. 3d.; and September, 15s. 3d. White sugar quotations are:—May, 20s. 3d.; June, 20s. 3d.; August, 20s. 3d.; September, 20s. 4½d.; October - December, 19s. 9d.

Coffee.—Prices are steady. East Indian is the same at 120s. Costa Rica shows no change at 118s., while Nairobi is unaltered at 108s. The futures market has been steady. Quotations are:—May, 64s.; July, 62s. 3d.; September, 62s. 3d.; December, 60s. 3d.; and March, 60s. 9d.

Dessicated Coconut.—Sales have declined considerably during the week, while prices have fluctuated slightly.

Rice.—All rices have been in good demand, and prices generally are unchanged.

Green Fruit.—As regards oranges the market has taken a turn for the better. Large arrivals are to hand this week with the usual slump in prices. Large shipments are afloat, and prices are expected to be low if the demand does not improve. The lemon market is like the weather, very uncertain. For the last few weeks very little business has taken place, and prices have been unsteady, while this week the market has been almost cleared with the arrival of further shipments. Sicilian and Naples lemons have been chiefly favoured, a ready market being found for them. Large quantities of Tasmanian and Australian apples have just arrived. The condition of the fruit shows a slight improvement on previous shipments. The market being light, merchants are holding back the best quality Egyptian onions in anticipation of obtaining high prices for them.

Oilseeds.—A lower tendency has prevailed. Indian linseed has shed 9d. at 21s. 9d., while La Plata has shed 1s. 3d. Rapeseed has advanced with Toria 3d. up at 19s. 3d. Cottonseed is lower with Indian 1s. 3d. down at 9s. 3d., while Egyptian black and Sakellarides have remained steady at 12s. 7½d.

Oils.—A firm tone has been in evidence. Linseed oil has dropped 1s. 3d. at 45s. 6d. Rape oil is firm with crude at 45s. and refined at 48s. Cotton oil remains unchanged in all cases, the quotations now being Egyptian crude, 43s., refined 49s., deodorised, 54s., and technical 44s.

Oilcakes.—Linseed cake has been steady at 300s. ton. Cotton-meal cake is the same at 280s. ton, while cottonseed cake and coconut cake show no change at 180s. ton, and 160s. ton respectively.

ROUMANIAN CROP OUTLOOK.

(From Our Own Correspondent).

Bucharest, May 14.

Up to the present Roumania's agricultural situation is very satisfactory. The rains which have fallen during this spring make the fields look very promising as far as the future crop is concerned. Both the big and small farmers, seeing that nature is helping them, are doing their utmost not to leave a single acre of arable land unploughed and unsown. Good reports have been received not only from the districts along the Danube, the granary of the old Kingdom, but also from the agricultural regions of Transylvania and Bessarabia.

POOR CYPRUS HARVEST.

(From Our Own Correspondent.)

Cyprus, May 5.

The barley harvest is now proceeding in the plains. It is in poor condition, owing to lack of rain during the critical months of March and April. The total rainfall of the (financial) year was only 13.37 inches—considerably below the improved average. The wheat harvest is expected to be considerably below the average.

EGYPTIAN CROPS.

The following particulars of the crop conditions in Egypt are given in the Bulletin of the Egyptian Ministry of Agriculture for the month of April:—

Cotton.—Weather, was on the whole, favourable, though somewhat changeable in some provinces. Scarcity of water has been badly felt in Lower Egypt, and in some cases has delayed sowing. Complaints with regard to shortage of water have also been reported from certain provinces in Middle Egypt, especially from districts lying at the tail ends of canals. Sowing, watering, resowing and thinning are in progress. Slight attacks of cut-worm and aphid have been reported from some districts. On the whole germination is satisfactory.

Wheat.—Weather was, on the whole, favourable. Rust and smut have been reported from nearly all the provinces, but caused no serious damage to the crop. Harvesting the early-sown crop has begun in Beni Suef, Faiyum, Minya and in the provinces of Upper Egypt.

Barley.—Harvesting is general in Lower and Middle Egypt, and has been practically completed in Upper Egypt. Slight attacks of rust and smut have been reported from several provinces, but damage done has been insignificant. The yield is expected to be slightly above the average.

Beans.—Harvesting is general in Lower Egypt and is nearly completed in Middle and Upper Egypt. The yield is expected to be a little below the average.

Bersim.—Slight attacks of cut-worm and dodder were reported from Lower and Middle Egypt. The last cutting is being taken and the seed crop is being left to ripen.

Onions.—Harvesting is in progress in Middle Egypt, and in Upper Egypt is nearly finished. The yield is expected to be below the average.

Lentils.—Harvesting is finished and threshing is going on. The yield is a little below the average.

LONDON FUR TRADE REPORT.

The report of the London Fur Trade Association on the April raw fur skin sales states:—The sales now completed have been attended by a very large number of buyers fairly representing the countries interested in fur skins. The quantities of the staple articles were again large, but the quality on the whole was not up to the January standard. There was good competition

considering the season of the year and the unsettled condition of trade in general. The home trade bought freely in their favourite articles, such as skunk, opossum, wolf, silver, cross, white, red and kitt fox. The American trade bought fewer goods than usual. From France the attendance was rather smaller than at the last sales, but fair quantities of most articles were purchased. Germany again was a considerable buyer in the staple articles and in fine furs. The comparison of prices is with those of January last.

Badger, unaltered; black bear, declined 10 per cent.; brown bear, declined 10 per cent.; grizzly bear, declined 20 per cent.; white bear, unaltered; beaver, large skins unaltered, middling and smalls declined 15 per cent.; civet cat, unaltered; chinchilla declined 15 per cent.; ermine, mostly dressed skins of poor quality, sold cheaply, the few raw skins declined 15 per cent.; fisher, declined 20 per cent.; fitch, declined 20 per cent.; blue fox, unaltered; cross fox, finest skins unaltered, others declined 10-15 per cent.; grey fox, declined 10 per cent.; red fox, better sorts declined 25 per cent.; common sorts declined 10 per cent. Mongolian unaltered; silver fox, best silvery skins unchanged, blacks and common skins declined 20 per cent.; white fox, fine grades unaltered, lower grades declined 10 per cent.; South American fox, best goods advanced 15 per cent., lower grades neglected; white hare, unaltered; kolinsky, unaltered; Persian lamb, unaltered; lynx, sold at full January rates; American marten, declined 30 per cent.; baum marten, declined 30 per cent.; stone marten, declined 30 per cent.; mink, declined 20 per cent.; mole, unaltered; monkey, advanced 40 per cent.; black musquash, declined 10 per cent.; brown musquash, declined 10 per cent.; southern musquash, advanced 10 per cent.; nutria, unaltered; American opossum, declined 10 per cent.; otter, advanced 15 per cent.; raccoon, advanced 15 per cent.; Russian sable, mostly withdrawn, the few lots sold were slightly easier; skunk, prices for good sections showed a decline of 10 per cent., but quality and colour were not equal to the January goods, south-western and southern skins declined 20 per cent.; squirrel, declined 10 per cent.; wolf, best Canadian unaltered, medium sorts advanced 25 per cent., lower grades unchanged; wolverine, slightly higher; fur seals, North West Coast sold at good prices, others mostly withdrawn.

Australian Furs.—Australian red fox, unaltered; Australian opossum, unaltered; wallaby, best qualities advanced 15 per cent., lower qualities unaltered.

Chinese and Japanese Furs.—Civet cat, slightly lower; red fox, declined 15 per cent.; goat rugs, declined 10 per cent.; black goat skins, declined 15 per cent.; grey goat skins, unaltered; white goat skins, none offered; kid skins and crosses, very little alteration; kolinsky, advanced 15 per cent.; slink lamb, advanced 10 per cent.; Thibet lamb skins, slightly easier; Thibet lamb robes, slightly easier; leopard, advanced 10 per cent.; marmot, large skins unaltered, small advanced 20 per cent.; mink or weasel, declined 20 per cent.; pahmi, unaltered; white rabbit, best skins advanced 10 per cent., poorer skins declined 10 per cent.; raccoon, unaltered; wolf, declined 10 per cent.; Japanese badger, unaltered; Japanese fox, unaltered; Japanese marten, none offered; flying squirrel, a poor collection, mostly unsold.

TENDERS INVITED.

*Tenders are invited for the following contracts, and must be made by the dates mentioned.
(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)*

Egypt.

Drugs, etc.—The Department of Public Health invite tenders for the supply of drugs required for the period of six months from October 1 next. The tenderer must be a person residing in Egypt or must have a representative in Egypt. June 15 (D.O.T.)

Weighing Machines.—The Physical Department of the Ministry of Public Works, Cairo, invite tenders for the supply of platform weighing machines and also for counter scales and appliances. Tenders must be sent to the Controller, Physical Department, Ministry of Public Works, Cairo. Drawings must be furnished. Representation by an agent resident in Egypt is essential. June 1. (D.O.T.)

Baling Cloth.—The Director-General, State Domains Administration, Sharia El Falaki, Cairo, invites tenders for the supply of baling cloth, cotton sacks, and grain sacks. May 15.

Carbide of Calcium.—Tenders are invited by the Postmaster-General, G.P.O., Alexandria, for the supply of 12½ tons of carbide of calcium. Delivery October 2, 1922. June 15.

Bulgaria.

Telephone Accessories.—The Bulgarian Post and Telegraph Authorities invite tenders for the supply of:—1 amp. fuses; cartridge fuses for protection from lightning; 3 amp. fuses; line annunciators; carbon lightning arresters. Tenders must be accompanied by a deposit of 5 per cent. of the total amount and may be submitted for each or all of the items. This call for tenders is identical with the one which was notified on January 18 last, and may, therefore, be a fresh call for tenders in connection with the former contract. June 15. (D.O.T.)

India.

Copper wire, carsake elements, tubs, electric cable and web equipment.—The High Commissioner for India invites tenders for the supply of:—Wire, copper, for telegraphic purposes, 205 tons; Carsake elements, No. 1, for Leclanche cells, No. 32,000; Tubs, ablution, galvanised iron, No. 8,750; Cable, electric, V.I.R. insulated tropical class, single braided, single and twin lead sheathed and twin flex, 200,000 yds.; Web equipment (carriers, cartridge, haversacks, etc.). Further particulars may be obtained from the office of the Director-General, India Store, Department Belvedere Road, Lambeth, S.E. June 9.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Alexandria, May 11.

The Alexandria Bourse.

During the past week our market has suffered a sharp setback all along the line due partly to the less reassuring news received from Genoa, and partly to realisations by holders wishing to profit by the prolonged rise that has taken place.

Constantinople, May 8.

The imports of the past week compared with the figures of the two previous weeks show a marked increase. Generally there has been great activity in the port. A hundred vessels of various tonnage have touched at the port.

Carpets are in strong request for Great Britain, America, Belgium and France. Prices are steady and unchanged. There have been important arrivals of mohair from the neighbourhood of Karahissar and Bolovadine. Sales have been effected at remunerative prices. The opium market is very firm, there being an active demand for America.

HOPS IN CZECHO-SLOVAKIA.

The Czecho-Slovak statistical office publishes the following information concerning the cultivation and output of hops in Czecho-Slovakia for 1921. The corresponding figures for the previous year are given in parenthesis:—

The total area in the Czecho-Slovak republic devoted to the cultivation of hops was 7,627 hectares (8,361 hec), of which 7,627 hectares (8,317 hec) were in Bohemia, 40 hectares (41 hec) were in Moravia, and 6 hectares (3 hec) in Slovakia. The total output of hops for 1921 throughout the Czecho-Slovak republic amounted to 299,330 kilogrammes (526,560 kg) of which quantity 288,445 kilogrammes (522,080 kg) were contributed by Bohemia, 1,545 kilogrammes (3,300 kg) by Moravia, 340 kilogrammes (280 kg) by Slovakia.

BULGARIAN LOAN.

Reuter's Sofia correspondent in a message dated May 16 states:—Tenders were recently invited for 500,000 bonds of the Bulgarian National Loan, the first subscription to which took place in February. It is now announced that several foreign houses put in offers and that the best terms were those submitted by the Graphische Anstalt of Budapest, to whom accordingly the bonds were allotted, the price offered being 14.50 Hungarian kronen per bond, payable at the rate prevailing for the krone on May 11, the day on which the bonds were allotted.

The Land and Mortgage Company of Egypt recommends a dividend of 6 per cent. for the year.

LOSS OF P. AND O. LINER.

We much regret to announce the loss of the P. and O. liner Egypt which was sunk off Ushant on Saturday last. The liner came into collision with the French tramp steamer Seine and sank within twenty minutes with the regrettable loss of 102 lives, 16 of which were passengers. Rescue work was very quickly carried out by the s.s. Seine and French warships which arrived from Brest shortly after the catastrophe.

The Egypt, which is of the gross tonnage of 7,941 tons, was built in 1897 by Messrs. Caird & Co., Ltd., at Greenock, and was employed during the war first as a hospital ship and subsequently as a relief vessel for conveying passengers to India. Her sister ships, the Arabia, Persia and India, were sunk during the war with a total loss of 1,175 lives. The s.s. China is the only remaining vessel of this class.

The P. and O. Company, it is worth recording, have had a wonderful record of freedom from disaster in peace time. Only 39 lives have been lost over a period of 50 years, 25 in the steamer Carnatic in 1869 and 14 in the s.s. Oceana in 1912.

KYRENIA'S UNSAFE HARBOUR.

Effect on Industry.

(From Our Own Correspondent.)

Cyprus, May 5.

The town and district of Kyrenia have recently petitioned the Government for a reconstruction of their small harbour in the north of the island—a work which should certainly be provided for as soon as ever circumstances permit. Soon after the British occupation the harbour was constructed. It has not been a credit to the Government or its designers; as, far from having protected shipping, it has proved under certain conditions of weather a place of considerable danger, and several disasters have occurred within it. The Government has replied that as the work would cost £50,000 it cannot be undertaken at present. Locally it is considered that it could be carried out for not more than half that sum. It is represented that trade has suffered a good deal and continues to dwindle owing to the present serious impediment to progress in the district. Much sympathy has always been felt, by British and Cypriots alike, for the people of the Kyrenia.

SHIPMENTS TO CZECHO-SLOVAKIA via TRIESTE.

A recent announcement in the *Prager Tageblatt* states that, according to the terms of the final regulations of the commerce and navigation agreement between Italy and Czecho-Slovakia, a Czecho-Slovakian custom house has been set up in Trieste harbour with sufficient space to conduct the official proceedings laid down by the special agreement. The Italian customs authorities allow transit goods to pass under Czecho-Slovakian seal; but the rights of the Italian authorities in respect to carrying out the duties of the customs control and the harbour police are not limited in any way by the agreement.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Vindelia for Bombay (Liverpool, June 2).

Anchor Brocklebank Line.—S.s. Masirah for Port Said, Colombo, Madras and Calcutta (leaves London, May 27); s.s. Mangalore for Calcutta (Birkenhead, May 31); s.s. Maidan for Port Said, Colombo, Madras and Calcutta (London, June 6); s.s. Manipur for Calcutta (Birkenhead, June 7); s.s. Maihar for Port Said, Colombo, Madras and Calcutta (London, June 20).

Bibby Line.—S.s. Warwickshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, June 7); s.s. Arracan for Rangoon (Middlesbrough, June 10).

Clan Line.—S.s. Clan Monroe for Colombo, Madras and Calcutta (Birkenhead, June 1); s.s. Clan Macmillan for Bombay and Persian Gulf (Birkenhead, June 12).

Cunard Line.—S.s. Cypria for Gibraltar, Melilla, Algiers,

Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk, Poti and Batoum (Swansea, May 27); s.s. Brescia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice, Trieste, Fiume and Gravosa (Swansea, June 13).

Ellerman Line.—S.s. Flaminian for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, June 25).

Ellerman's "City" Line.—S.s. City of Cairo for Calcutta (Birkenhead, June 1); s.s. City of York for Calcutta (Birkenhead, June 15).

Ellerman's "Hall" Line.—S.s. City of Simla for Bombay, Karachi and the Punjab (Liverpool, May 29); s.s. City of Karachi for Bombay, Karachi and the Punjab (Liverpool, June 15).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Harrison Line.—S.s. Actor for Calcutta (Liverpool, May 31); s.s. Huntsman for Calcutta (Liverpool, June 15).

Henderson Line.—S.s. Bharno for Port Said and Rangoon (Birkenhead, May 31); s.s. Amarapoorra for Port Said and Rangoon (Birkenhead, June 14).

Glen Line.—S.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, June 1); s.s. Pembrokehire for Port Said, Port Swettenham, Singapore, etc. (London, June 15).

Holt Line.—S.s. Eumaeus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 25); s.s. Jason for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 1); s.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 8).

Johnston Line.—S.s. Incemore for Piraeus, Syra, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 3).

Moss Line.—S.s. Amarna for Gibraltar, Algiers, Malta and Alexandria (Liverpool, May 26).

Papayanni Line.—S.s. Malatian for Malta and Alexandria (Liverpool, June 7).

P. and O. Line.—S.s. Macedonia for Bombay (London, May 26); s.s. Mantua for Bombay (London, June 2); s.s. Nyanza for Colombo, Madras and Calcutta (London, June 16); s.s. Kaiser-i-Hind for Bombay (London, June 16).

P. and O. British India Line.—S.s. Matina for Colombo, Madras and Calcutta (London, May 26); s.s. Mandala for Bombay and Karachi (London, June 2); s.s. Mantolia for Colombo, Madras and Calcutta (London, June 9); s.s. Nevasa for Bombay and Karachi (London, June 16); s.s. Warfield for Colombo, Madras and Calcutta (London, June 24); s.s. Morvada for Bombay and Karachi (London, June 30).

Prince Line.—S.s. Black Prince for Tunis, Malta and Alexandria (Manchester, June 3); s.s. Syrian Prince for Malta, Alexandria, Syria and Cyprus (London, June 8); s.s. Sailor Prince for Tunis, Malta and Alexandria (Manchester, June 17); s.s. Tudor Prince for Malta and Alexandria (London, June 28).

Cotton & Cotton Goods.

MANCHESTER COTTON REPORT.

(From Our Own Correspondent.)

Manchester, Saturday.

During the past week we have experienced a dearer and healthier market, and there is no doubt that the present position is distinctly more encouraging than has been the case for some months back. Producers have booked orders more freely and it is estimated that there is now more machinery running in Lancashire than has been the case for the past eighteen months. This applies to both spinning and weaving. Many manufacturers have had to turn down orders owing to immediate delivery being required. This point emphasizes the position of affairs in our outlets abroad, and goes to show that the stocks are getting very low. Manufacturers of piece goods have reported a very big enquiry. The situation in Egypt gradually improves, and some steady buying has taken place for those outlets of the Near East. Prices in Egyptian yarns have gone against buyers, and an increased trade has been put through. Producers in this section are stronger. A very encouraging business has been done for India in piece goods, and rather more activity has been displayed by buyers for China. Sales have been recorded for South America and the Continent. American yarns have continued firmer and at the beginning of the week a very large offtake was registered. Taking the market as a whole the position at the moment is the healthiest for quite a time, and traders generally are optimistic with regard to future developments.

LIVERPOOL REPORT.

Messrs. Reynolds & Gibson report as follows for the week ended May 17:—

Another good week has been witnessed in this section, and at the moment there appears every likelihood that the trade will continue to buy for some time to come. The demand has again been of fair dimensions, and Upper and Brown cottons have again attracted some attention, although as usual the bulk of the sales have been made from Sakellaridis and Sudan. Up till now, holders of spot cotton have shown a distinct inclination to meet the demand, and it is really remarkable, for this market, that after a fortnight during which trade has steadily improved, and with a strong and active American market in the background, an advance in prices at Liverpool of only $\frac{1}{4}$ d.— $\frac{1}{2}$ d. per lb. has taken place. There are signs, however, that certain qualities are already getting thinned out, and to-day there was a tendency for prices to harden slightly, although so far this has not been reflected in the official quotations. The selection of F.G.F. Sakellaridis has been modified considerably during the past fortnight, and there is little doubt that in the near future buyers will find it more difficult and more costly to fulfil their requirements, particularly if the water shortage in Egypt assumes a serious character. The Alexandria market a fortnight ago was being supported by the Government there—to what extent is not known—but under the present changed

conditions, we doubt if Government support is required at all, in spite of the large stocks which are held there.

Manchester reports have been consistently good. India and Egypt are furnishing the chief support, but there is also an improved enquiry from China and several of the minor outlets. Spinners and manufacturers are naturally making the most of the "bullish" feeling which is prevalent here and are taking a firmer stand for improved rates. This is having the effect of temporarily checking business, but should bring its own reward in the long run. C.i.f. business has shown some improvement. Total sales, 4,000 bales (including 800 Sudan). Quotations are raised 50 points all round. F.G.F. Sakellaridis 18.50d.

MANCHESTER COTTON REVIEW.

The Imperial Ottoman Bank report for the week ended May 20 states:—

Business continues to improve in this market, and the general tone is again stronger. During the past week operations have been on a fairly free scale, though by no means commensurate with the amount of enquiry received and negotiations entered into. Merchants are hesitating. On the one hand they have no desire to be obliged to make purchases later on at higher prices than those now ruling, but on the other hand the commercial cotton crop is not yet dead, and they are inclined to view the rise of 3d. per lb. in the last three weeks with suspicion.

Yarn:—Prices have advanced all round, and a healthy demand is being experienced. The greater firmness of spinners, of course, acts as a brake on the forward movement, and at the prices ruling during the previous week a very large business could have been done. Whether, even now, spinners are producing at a profit seems to be a debatable question, and it does not seem unreasonable therefore to expect them to maintain their standard for firmer prices as long as orders are obtainable at them.

Cloth:—A big turnover has been done in the cloth market at slightly advancing prices, principally in a great number of small lots rather than in contracts of outstanding size. The opinion is maintained that, if more confidence were felt in the present price of the raw material, large lines would be booked, but all transactions are more or less under the influence of a feeling that quotations have gone ahead too suddenly to withstand a set back at this early stage of the cotton growing season. Early forecasts of the American crop have too recently been entirely falsified by later experience for the lesson to be easily forgotten. India and China have again provided the strongest support, and for the first time for a considerable period quite an appreciable amount of trade is reported for Turkey.

Raw Cotton:—This has been fairly adequately dealt with above. Demand in Liverpool continues strong, and sales during the past week have been large. At the close of the week hesitancy was observable on the part of dealers for the rise, owing to the confused weather reports to hand from America. Closing prices are as follows:—American Fully Middling 12.13d., Egyptian Fully Good Fair 18.75d.

NOTES OF THE WEEK.

The Rutenberg Concession.

A certain amount of not unnatural uneasiness has been caused by the announcement that Mr. Rutenberg, a Jewish engineer from Russia, has secured a concession for the exclusive development of the water-power resources and the provision of electric energy in Palestine. At first sight it seems strange that a monopoly of this sort should be given to a Russian, and the worst fears are aroused when it is found that a preliminary order for machinery has been placed in Germany. There are, however, certain aspects of the matter calculated to reassure public opinion. In the first place Mr. Rutenberg, in spite of his somewhat sensational political history, is actually an engineer, who has devoted two years' study on the spot to the water conditions and power requirements of Palestine, at the instance of prominent British Jews, one at least of whom is a member of the Cabinet. His scheme has been examined and approved by the Colonial Office, and it is only in a technical sense that Sir Herbert Samuel, the High Commissioner in Palestine, is responsible for granting the concession. If Mr. Rutenberg's scheme goes through, it will be because it is supported by official Jewry, to whom Great Britain as Mandatory Power must look for the economic development of Palestine. A mistake has been made in allowing it to be thought that this was a hole-and-corner concession with an unknown foreigner who would proceed to exploit the country for his own personal ends. If the Jewish bodies interested in the future of Palestine will come forward and announce that the scheme will be carried through with their support, there will doubtless be a tendency to overlook the antecedents of Mr. Rutenberg and to give him the credit that he deserves for his enterprise in making an exhaustive study of Palestine's water-power. As to the order for machinery given to Germany, it is a very small one, and will, it is to be hoped, cause the question of further contracts to be carefully considered.

Genoa and Eastern Frontiers.

One of the results attributed to the Genoa Conference is the growth of a conviction in the minds of some at least of the delegates that changes will have to be made in the frontiers fixed by the Paris Conference. If an attempt should be made to give effect to this view, it is to be hoped that no half measures will be adopted. Not only Poland has an unstable frontier; it is even proposed to add to the number by introducing a further

unworkable arrangement in regard to Thrace. The settlement that the Allied Powers sought to introduce in the Near East bristles with injustice. The Treaty of Sèvres has had to go; but the Treaty of Neuilly was even more unjust. Europe is now at a sufficient distance from the end of the war to feel the want of a settlement which, when introduced, will stand the test of a few years' actual working, and will not merely conform with the greed and prejudices of the moment of its elaboration. We would urge a reconsideration of the frontiers so badly drawn in Paris, not in the interest of any one nation, but for the benefit of the whole group concerned. If the question can only be reopened, it will be found that lapse of time has clarified some of the views that seemed so sacrosanct three years ago in Paris.

Charges and Counter-Charges.

The proposal for an inquiry into Turkish treatment of Greeks and Armenians is reported to have aroused strong resentment on the part of the Angora Government. That is only what was to be expected, no doubt, but when Angora declares that the proposal is put forward only for the purpose of delaying the peace settlement many people surely will rub their eyes. To put it mildly, Angora hitherto has shown no feverish desire to push on the peace negotiations, and why it should imagine that Great Britain—or any other European Power—should desire to delay a settlement, it is difficult to understand. In any case there is no good reason why an inquiry of the kind should not proceed *pari passu* with negotiations for peace; although it would undoubtedly be well, indeed absolutely necessary, to keep the two subjects entirely distinct from one another. On the other hand, if there is an inquiry into the alleged outrages, it would be just as well to accept some of the suggestions put forward by the Turks and their friends for making the inquiry as full and impartial as possible. If charges brought against the Turks are to be investigated, let the Turks be given a chance once and for all of proving, if they can, charges which they have brought against the Greeks. And since the question of religion has been thrust so much to the fore, it would be well to have Moslem representatives upon the Commission of Inquiry.

Turks and Arabs

The statement made by Dr. Rechad Bey, in his address to Members of Parliament last week, that the Turks did not ask for lands inhabited by the Arabs, seems to have had a disturbing effect upon Anglophobe Egyptians. These people would naturally prefer to

think that Rechad Bey was mistaken, and one of them has been telling the Cairo correspondent of the *Morning Post* that he himself has actually seen, when in Palestine, "a copy of a letter from Mustapha Kemal to an organisation in Palestine encouraging restiveness pending the 'inevitable re-entry of the Turks into Palestine.' " In view of the past relations between Turk and Arab it is difficult to believe that the Arabs, however sore they may feel in Syria and Palestine against the French and the British, can seriously contemplate allowing the Turk to resume his pre-war rule over them, even if the French and the British withdraw. But it would not be at all surprising to learn that the Arabs, or some of them, had been coquetting with the Kemalists in the belief that France and Great Britain would, if the worst came to the worst, save them from the consequences of such folly. Indeed, the Arabs in their agitation against political Zionism have not hesitated to say that they were better off under the Turk than under the British, and in the North their brethren have said the same thing repeatedly about the French. Whether the Turks "ask for" lands inhabited by the Arabs or whether they do not, they are very unlikely, we imagine, to rule over them again in the near future; but it cannot be denied that their propaganda in those lands has had a success which really is astonishing.

Egypt and the Sudan.

In our leading article last week reference was made to Egyptian intrigues in the Sudan. Both in the administrative and in the educational sphere it was inevitable that Egyptians should be drawn upon for the Sudan Civil Service, and one would have expected to find after a lapse of years among those so selected some of the *esprit de corps* that they must have noticed in their British colleagues. How little reliance, however, can be placed even on those in the highest positions is well illustrated by an incident during Lord Allenby's recent visit, of which a report reaches us by way of Egypt. In one of the provinces of the Sudan Lord Allenby addressed the notables who had come to meet him, repeating much that he had said to a more influential gathering in Khartoum regarding the future relations of Great Britain and the Sudan. As the Egyptian Mamour of the place was an excellent English scholar, he was asked to interpret Lord Allenby's remarks to the audience. In so doing he deliberately mistranslated the speech, giving it the opposite meaning to what the High Commissioner had said. The Civil Secretary of the Sudan Government was fortunately present, and understanding what the Mamour was saying, jumped up, seized him by the shoulders and thrust him out of the way. He then informed the audience that the Mamour had been telling them a series of black lies and proceeded to give them a correct rendering of Lord Allenby's remarks.

"Political" Murder.

Yet another "political" murder has to be added to the appallingly long list of such things which Egypt has produced in the past few years. The latest victim is Bimbashi Cave, an efficient and popular officer of Police, who was murdered in daring fashion in broad daylight. Thanks to the pluck of a lady who pursued one of the murderers on her bicycle, three arrests have been made, and it is much to be hoped that the crime will be brought home to its perpetrator, and that exemplary punishment will be meted out at once to him. This kind of thing cannot be allowed to go on, and we are not surprised

to learn that the leniency shown in recent cases is regarded in Cairo as having been utterly misplaced, and as being accountable to a large extent for the present crime. Unless Egypt is to drift into a state of terror and anarchy, responsible Egyptians who, we hope, do heartily condemn murder and assassination, however "political" it may be, must make their views known, and lead public opinion into healthier channels than those in which it now appears to be flowing.

Consuls in Egypt.

The Egyptians plume themselves upon their politeness and their urbanity, and it would be regrettable indeed if in gaining their independence they should lose any of their good qualities. Yet they have taken a step which has caused umbrage in the Consular Corps, and the incident, as reported by correspondents of the London Press, certainly wears a strange complexion. In connection with the Bairam reception at the Palace, it has been usual for the Consular Corps to receive invitations in its diplomatic capacity, so to say; but last week those invitations were lacking, although the Consuls were informed that they would be received on the same footing as Notables. Now, under the Capitulations, which have not yet been abolished, the Consuls have been regarded as representatives of the sovereignty of the various States; and quite apart from any question of taste or manners, the change was regarded as of political importance. The Consuls, therefore, protested, and negotiations of some delicacy were opened up. As a result, the Corps was eventually permitted to attend the reception as usual, but was received separately, not with the diplomatists as in previous years. In all probability we have not heard the last of the incident, and in any case the question will have to be settled definitely before the next official reception.

Officers of the S.P.R.

In the House of Commons recently, Sir Charles Yate raised the question of the treatment accorded to British officers engaged on service with the South Persia Rifles up to the time of its disbandment. These officers were offered a two years' contract under the Persian Government, and were to receive six months' pay if the contract was broken through no fault of theirs; but in point of fact, on the disbandment of the Rifles they did not receive even the two months' pay awarded to the Persian officers as compensation; and Sir Charles Yate wanted to know what steps the Government intended to take in the matter. The reply he received was that "as the contracts of the officers mentioned were never actually signed owing to the breakdown of the arrangement made with the previous Cabinet at Teheran" . . . no claim would be pressed against the Persian Government. That may satisfy the lawyers, but it is hardly likely to satisfy any ordinarily honest man any more than it will the officers concerned. "Signed" or "unsigned" the pledge was surely implied, and we should have thought that H.M. Government would, if it felt unable to put pressure on Teheran in the matter, liquidate the debt of honour itself. The officers concerned could not, we presume, have been engaged without its consent, and to quibble over the point of the "signing" their contracts strikes us as disingenuous in the extreme.

Indian Politics.

The latest news indicates that India continues tranquil, so much so indeed that there is some ground for anxiety lest ardent politicians should forget the lessons of the

past year. Most of these gentlemen sat loosely on the fence while the non-cooperation movement was threatening the ruin of the country : now they are saying glibly that non-cooperation is dead, and basing on that assertion new demands tending to their own greater glory. As a matter of fact even the discredited programme of concrete measures has not been abandoned by the non-cooperators' organisation ; some provinces are clearly trying to shake themselves free, but the North still talks of boycott, and civil disobedience, and other nostrums of the kind ; and the time for writing the obituary of the movement has not yet come. The most optimistic view consistent with the facts of the moment is that which the cable last week attributed to Sir Sankaran Nair, that the impetus of the movement, as it has hitherto existed, is exhausted, and that replenishment of its funds is doubtful ; we believe that view to be justified, but it would be most unwise to overlook the possibility of a recrudescence.

Dangers of the Future.

Even if we grant that the programme of the non-cooperators is a thing of the past, we must recognise that the ideas underlying it are still widely held. As we have so often pointed out, the essence of the movement is to secure reaction by way of revolution, and its fundamental object is to extirpate from India the influence of the British Empire, which has offered to the masses of the people a chance, such as they never had before, of moulding their own destinies on democratic lines. The attainment of that object would be followed inevitably by the restoration of the old régime of social privilege and spiritual domination. Such ideals are still very much alive, though the measures hitherto taken to attain them may be said to have failed. We must then expect that new programmes of revolution will be attempted when favourable opportunities occur ; we may hope that they will fail to make any serious impression on the masses as whole, but we are bound to recognise that the danger will remain until the natural leaders of the people have succeeded in getting into closer touch with reality.

Hobson's Choice.

A rather absurd example of the unreality of Indian politics was furnished by the recent meeting of the Liberal League at Lucknow. The Liberals are nervous lest Sir Harcourt Butler, whose term of office expires early next year, should be succeeded by another "official" Governor, and they demand that the appointment shall be made "from the ranks of eminent men in public life." Whether any "eminent man" is in the least likely to accept the post is a question which does not seem to have occurred to them. Even in the old days, the United Provinces were notoriously the most arduous and anxious charge in India ; things are worse now, mainly because the local leaders, with a few honourable exceptions, have been content to remain either passive spectators or active critics of the Government's attempt to maintain order ; and at the present moment it is tolerably certain that the post would not appeal to any eminent public man unless he is also an eminent fool. If the Liberals want to have any say in the matter, their first business is to see to it that the post is reasonably attractive ; otherwise they will have to put up with whatever they may get.

THE WEEK AT HOME.

London, Monday Evening.

The Debate on Genoa.

Mr. Lloyd George's account of Genoa was listened to by the House of Commons with respect rather than enthusiasm. He would not admit that he had failed, but even his optimistic spirit could hardly claim that he had succeeded. And his description of the negotiations with the Bolsheviks only deepened the impression that they are impossible to deal with.

The reply to the Prime Minister was feeble in the extreme. Mr. Asquith was even less effective than usual. Mr. Clynes said nothing in a great many words. Lord Robert Cecil was virulent and vitriolic, but his fanaticism once again defeated its own purpose.

There is to be a further discussion this week on German reparations. But the real interest of this debate will lie in the fact that America is now about to lend a hand, through the Morgan financial house, in financing a German loan. This momentous decision, which is not officially approved by Washington but assuredly not privately disapproved, will probably have more effect in stabilising the West of Europe than any political action. It will relieve Germany of the fear of a French attack, and will relieve France of the fear of impending bankruptcy, both of which have been factors making for war in the two countries.

As to the rest of Europe, opinion here is confused and indefinite. The Poles accuse the Russians of amassing great armies for their destruction, the Russians accuse the Poles. Nobody knows what is true, and I doubt whether the ordinary man in the street cares very much. He regards the Poles as entertaining political ambitions and a form of Imperialism which they cannot achieve, but which may easily become a menace to their neighbours ; and as to the Russians, he does not believe a word they say.

The Irish Crisis.

The unreality of last week's debate on foreign policy was at least partly due to the threatening nature of the new Irish crisis. It was fairly evident from the agreement between Mr. de Valera and Messrs. Collins and Griffith that the Provisional Government had capitulated to the Republicans ; and from speeches by these leaders which followed almost immediately upon the signing of the Concordat it was clear that the underlying idea animating the agreement was a combined attack upon Ulster—what de Valera called "a concentration on the North-East Corner."

In addition, the Republicans were solidly against the Treaty with Britain, which seemed likely to go by the board—they have never made any secret of their attitude on this matter—and it became evident that under the Concordat the right to a free general election would be as illusory as that of freedom of speech under the new régime in Ireland.

The British Government, of course, respects the Treaty, although the English people have seen with sorrow the absolute incapacity of the Irish to build upon that basis during the past six months. But if the Treaty is to be torn up and Ulster attacked, a new situation arises, and Mr. Lloyd George accordingly summoned Messrs. Griffith and Collins to London to hear from them an account of the position at first-hand. Long conferences have been taking place over the week-end, and it is unlikely that Parliament will rise next week without an official statement being made.

It is necessary to add that the increasing number of Irish refugees who are crossing every week to England absolutely destitute is having a powerful effect on public opinion. These are Catholic as well as Protestant, and many of them have been stripped of all their possessions and their homes burnt down by alleged Republicans, whose policy seems to be merely that of Bolshevism and plunder.

It is understood that the British Army is being strengthened in Ulster, for use in the event of a Republican invasion, and the Ulster Government have also done their part by rounding up a large number of

Sinn Feiners within the province. Indeed, the capacity of the Belfast Government for prompt action contrasts strongly with the proved impotence of the Southern Executive under Mr. Michael Collins.

Whitsun.

In these circumstances, the Whitsun recess of Parliament will be for a few days only, and the remainder of the session is likely to be crowded and busy. There is no longer any expectation of a General Election; even the advocates of an appeal to the country now admit that it would be impossible before October. And business men are still firmly of opinion that it should be postponed until the end of next year—a view which is privately endorsed by both Liberal and Labour men, neither of whom have found much encouragement in recent events for their policy.

Summer Days.

The summer has come with a rush, and a day or two after shivering over a fire all London was sweltering in a heat-wave. The conscientious stuck to their desks; the others seized the opportunity of seeing the riot of blossom and colour in the country—although they could have seen it in London had they looked, for even St. James's Square looked young and cheery with two or three laburnums out.

Luckily, London is at last beginning to resume its pre-war aspect. Sir Alfred Mond has cleared away some of the wretched temporary Government buildings from the parks, and flowers are beginning to replace the bureaucrats. In the Embankment Gardens a band is playing once more, and office-boys make love to flappers as in the good old days; the Cockney has not lost his capacity for public endearments on the slightest provocation.

Troubles of the Mummers.

The fine weather has brought misfortune to one profession. One play after another is being taken off, and several theatres are closed. There has again been a run of short runs—the shortest was four nights a week or so ago—and the dramatic critics are once more discussing the misfortunes of the boards, "their cause and their cure." Even "Cairo," which was expected to run for years, is coming off soon.

From what one hears, the public are now more critical, and expect better stuff than they tolerated in the hectic war-years; unluckily they get rather worse plays. The result is that the trade of dramatist is very precarious; nobody except Barrie and Milne seem able to make a success of it. Apparently we want some new dramatists rather badly.

A Dog-Collar Fight.

There is every prospect of another ecclesiastical row. Dr. Harris has made a terrific attack on the Broad Churchmen in a large controversial book; he smites them hip-and-thigh, and accuses them of Unitarianism and a few other heresies, as well as of psycho-analysis and neo-Malthusianism. His book is a clever attack from the point of view of rigid orthodoxy, and my impression is that the Modernists deserve a good deal of it—they have been rather asking for trouble lately. It will be quite impossible for them to leave this indict-

ment unanswered, and they have some quite heavy guns, or at least canons, in their camp. Nor will reply be very difficult, for Dr. Harris, like a good controversialist, is silent as to the weak points in his own case.

By the way, as evincing the public interest in theology, I heard recently that Dr. Gore's book, "Belief in God," which was only published last autumn, is already in a sixth edition. For a bishop to be among the best-sellers is indeed a novel experience.

The Week's Books.

The literature of the week has not been very exciting. "The Russian Turmoil" (Hutchinson) by General A. I. Denikin, is a record of war and revolution. The author admits that a revolution was inevitable, but he points out that in 1917 the troops at the front were better equipped than before, and that discipline was not particularly bad until the Soviets and the notorious "Order No. 1" destroyed it.

I take off my hat to "The American Language" (Cape) by H. L. Mencken, a stupendous work. Those who want to know the colloquialisms of America will discover a fearsome collection here, but they must not trust the author as to the kind of English which he suggests is spoken in England. He thinks, for instance, it is quite usual and proper for an Englishman in England to call his sweetheart "a tart," as a kind of affectionate diminutive. If Mr. Mencken ever comes courting here, he had better make a few enquiries first.

The third volume of Mr. John Buchan's "History of the Great War" (Nelson) has just reached me. I have not mentioned the two previous volumes in this column and the fourth and last is still to come. But of the many histories of the war that I have looked into, I say at once and with conviction that this is the history for me.

"Would that mine enemy had written a book," cried Job before the days of cricket. Mr. Warwick Armstrong, who conquered us last year at the wickets, has just published with Methuen "The Art of Cricket," an excellent little book. He discusses his conduct of the game in the Test and other matches, which aroused some criticism at the time, and he says a good deal about the style and methods of various English cricketers. There is also a quite admirable chapter on captaining a team—a matter on which he speaks with more authority than any living contemporary.

One does not criticize "Late Lyrics and Earlier" (Macmillan) by Thomas Hardy; one simply thanks whatever gods Mr. Hardy is willing to recognise for this latest gift from Wessex. It opens with a semi-apologetic preface, but there is no sign whatever of failing powers, or diminishing courage to take the stark view of life which has always characterised our greatest writer.

Many will like the new series of "Studies in Literature" (Cambridge University Press) by Sir Arthur Quiller-Couch; and to this I may add "Excursions in Victorian Bibliography" (Chaudry and Cox) by Michael Sadleir, who has produced something more than a bibliography of that period. Quite clearly there is a reaction in favour of the Victorians, and our sense of perspective is returning. If Mr. Sadleir were not so good a novelist—he is the author of "Privilege," a book that will live—he might make a first-rate critic now that, by his own confession, he has lived down his first extravagances. But now that he has made the *amende honorable* to the Victorians, I hope he will leave criticism to the professors and produce another novel.

Perhaps I may also mention "Maria Chapdelaine" (Macmillan), which has just been published in England. By common consent it is the novel of French Canada, and one of the most impressive pieces of fiction that I can remember.

EGYPT.

Cairo, May 20.

The Constitution Commission and the Sudan.

The sensation of the week has been the publication in an Egyptian review of a draft convention to be signed between Great Britain and Egypt with regard to the future status of the Sudan. This draft was made and read to the Sub-Commission of the Constitution Commission by Rushdi Pasha, who, however, it is said, did not authorize its publication. The explanation of its publication is that it was drafted for the Official Delegation, one of whose Secretaries is the Editor of the review in which it has now appeared; but it is untrue that it ever received the official approval of the Delegation. That the members of that body should have accepted the proposals made by Rushdi Pasha would indeed have been very surprising, for the whole draft shows such an exaggerated view of the situation, and its provisions are so unreasonable and display such a disregard for the British claim for a share in the administration and for the interests of the Sudanese themselves, that its presentation to the British Government could have had but one result, that of its immediate rejection.

It seems indeed a thousand pities that this draft should have been published, and, to go further, that the proposals which the Sub-Commission have submitted to the Constitution Commission should have been circulated to the public before any definite decision had been reached. At a moment like the present the premature publication of such details can only result in unduly raising the hopes and exciting the feelings of the public, while at the same time making more difficult the task of those who are sincerely working towards a final and a satisfactory settlement.

The Mineral Resources of Egypt.

The lecture delivered by Sidky Pasha on the subject of his visit to the Red Sea area attracted a large audience, which included a noticeable number of Egyptians, and the Minister of Finance gave some highly interesting details of the work which is being carried on there. At the present moment over six hundred and fifty tons of oil are extracted daily, or about two hundred and twenty thousand tons per annum. Most of it comes from Hurgada, which is the most promising area being worked at present, and, it may be remembered, saved the fuel situation in Egypt during the war. The best oil comes, however, from Gernsa, where petroleum was first discovered in 1886 by mere chance by a company which was searching for sulphur.

As regards the manganese mines, which are principally on the East side of the Sinai Peninsula, active work is going on, and about three hundred tons per day are being extracted. But the phosphate industry at Safaga, although normally a very paying one, producing as much as one hundred and twenty-two thousand tons in 1921, is for the time being stagnant, owing to the large amount in stock and the depressed state of the market.

The Minister paid a great tribute to the work done by foreign companies in prospecting and working this area, and he made an appeal to his fellow-countrymen to take more practical interest in this subject in regard to which any enterprise would certainly prove remunerative. In view of the fact that, with the population increasing as rapidly as it is doing, agriculture will prove inadequate to provide for the people's needs, he looked to the mineral resources of Egypt as a means of meeting the difficulty, for a proper expansion of the work would provide employment for a large number of Egyptian workmen; it could supply the country with all the petroleum and phosphates it required, and by enabling the royalties to be increased, without unduly handicapping the industry, it would contribute an important addition to the financial resources of the

State, which will have to meet very heavy calls in the near future.

The Treatment of Eye Diseases.

The latest report of the progress of the ophthalmic hospitals in Egypt contains an interesting reference to the debt which Egypt owes in this respect to the late Sir Ernest Cassel. It is twenty years since that generous and charitable man placed the sum of L.E.400,000 at the disposal of the late Earl of Cromer for the training of Egyptian medical men in the science and treatment of diseases of the eye. A commencement was made by the establishment of a single travelling ophthalmic hospital and by the appointment of Dr. A. F. MacCallan, who was entrusted with the work of teaching Ophthalmology and organising the fight against what is one of the most terrible scourges from which Egypt has ever suffered. Slowly the system has been developed until to-day each of the fourteen provinces is provided with a permanent specially built hospital, together with three additional hospitals in Gharbia and five travelling hospitals in tents. The whole of the work is carried out under the direction of Dr. MacCallan by Egyptian surgeons whose special education, he mentions, has been the outcome of Sir Ernest Cassel's original benefaction.

The serious nature of this ophthalmic scourge is evident from the statistics which show that in 1920 ten per cent. of the cases examined at the hospital were found to be blind in one eye, and five per cent. in both eyes, the principal cause of blindness being acute conjunctivitis; and the boon which the movement started by Sir Ernest Cassel is constituting for the country can be gauged from the fact that whereas in 1910 the total attendances of out-patients numbered 109,000, 14,000 new patients were treated and 25,000 were examined; in 1920 out-patient attendances increased to over one million, 108,000 were examined and 95,000 new patients were treated. The capital expenditure which these hospitals have involved has been L.E.100,000, and the annual cost of the service including ophthalmic clinics at Government primary schools in thirteen of the capital towns, where invaluable work is being done in improving the eyesight of the rising generation, is only L.E.33,000. Considering the present scope of the work, this annual charge cannot certainly be considered excessive, but when one bears in mind the extent to which the whole Egyptian nation is suffering from this terrible scourge, the allocation of such an insignificant credit for treatment of such a vitally important matter certainly does not redound to the good sense and foresight of those in the Egyptian Government responsible for the outlay of the country's money to the best advantage.

PALESTINE.

Jerusalem, May 14.

A Moslem Board Demand.

Some eighteen months ago a "Jewish National Council," elected by the whole of the Palestine Jewry, was appointed to treat with the Administration on all matters touching internal Jewish affairs. To counter-balance this, a purely Moslem Board was set up, chosen by a more rough and ready elective system, and known as the "Supreme Moslem Council." In their hands is placed the administration of the large Wakf funds (religious endowments), and the control of internal

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

Moslem affairs. Within the last few days they have considerably harassed the Civil Secretary with the demand that he shall instruct all the District Governors of the country to fine every Moslem found deliberately violating the fast of Ramadan.

Lord Apsley and the Arabs.

Lord Apsley, the son of the proprietress of the *Morning Post*, is at present visiting Palestine. As a result of the attitude towards political Zionism consistently maintained by the *Morning Post*, Lord Apsley received the warmest welcome from the Moslem Christian Association. His public statements have produced nearly as great a sensation as did those of Lord Northcliffe. The latter was fully expected to smile on Zionist activities here; and the Jews were disagreeably startled when he saw fit to do nothing but frown. On the other hand Lord Apsley was expected to encourage the Arabs in their opposition to the British Palestinian policy; but he has hugely delighted the Jews by telling the Arabs not to expect Great Britain to withdraw its Balfour Declaration promise, but to expend their energy in seeking to co-operate with the Jews in the rebuilding of Palestine.

Jerusalem, May 21.

The Strike "Fever."

Palestine at the moment is suffering from an outburst of strikes. It is true that there are not many of them, and that they are not very big ones. But, as with everything else in this country, it is not the thing as it is that matters, but the thing that it is supposed to stand for, the tendency that it may represent, and the complexion that it assumes when looked at in the light of high politics. To the onlooker the labour conditions seem to be top-heavy. The new immigrants come along extremely well versed in higher trade-union tactics, looking at Labour from an idealistic point of view, insisting on being employed and paid by the group instead of individually. This group, *kvutsa*, makes the contract with the employer and makes itself responsible for the sharing out of the pay. In one instance in Jerusalem, a daily Hebrew newspaper employing such a contracting group, set up intertype machines, and so required fewer workmen. When the old contract expired the management refused to re-employ the same number as before. The entire group then adopted strike tactics—"peaceful picketing" and "moral persuasion" (two men are now in prison, and I believe, two in hospital). The "strike" is still in progress, but the management of the paper is persevering and brings out its daily issue without interruption, and seems likely to win the day. The editorial staff have taken to manual labour and find it exceedingly easy; they had at first determined to reduce the contracting group from fourteen to eight; they now find that they can publish their paper with the help of only two skilled typesetters.

In Jaffa the strikes are on a larger scale—one in a large new factory for the manufacture of "silicate-bricks," and the other among the employees of a large building contractor. The strike in one case is a protest against the employment of non-members of the trade-union, and in the other, against the dismissal of employees without the consent of the trade-union. The Jaffa strikes are being conducted in good order, while the newspaper episode has led to vicious assaults—not by the strikers on strike-breakers, but apparently by hired bravos inspired by the Labour Union.

This, no doubt, sounds very commonplace outside of Palestine; but here the impression is not pleasant. Zionists idealism we can understand and sympathise with; but the unattractive aspect is the introduction at the same time of labour tactics which have no bearing on Zionism, however you regard it, and which tend seriously to baulk its smooth progress and supply a basis to the fears of the Arab and the jeers of the anti-Semite; while on purely material grounds the effect is as bad as can be. Palestine's salvation turns on the introduction into the country of productive labour and capital. It could, doubtless, go on in its old way as the recipient of the world's charity, but that is scarcely

what Jews want in the way of a "National Home." Unless the "National Home" is to be a pauper establishment on a large scale, the Zionist adventurer who is by way of being a capitalist and employer of labour must be encouraged and protected. There is a demand that Government should interfere and check these damaging labour disputes; though it is difficult to see what exactly Government can do. It is the Zionist future itself that is at stake and it is clearly to the interest of the Jewish immigrant type to make things easy for capital and would-be employers; but it is actually held by some that the "Achdut ha-Avodah," which organises and subsidises these strikes, has, at least, the moral support of the Zionist Commission. But that we can scarcely believe.

Effects on the Arabs.

The effect on the Arab is curious. One Arabic paper, the *Miraat esh-Sharq* (representing Christian-Arab opinion), makes the following comments and suggestions: "Strikes are nothing strange in Europe, although strange in Palestine. The present age is the age of the working-men. And wethink that before very long, the reins of Government will be in the hands of the working-men in every country of the world. . . . Our intention is to arouse our brethren, the Arab working-men, and to explain to them that their own affairs will never be set in order so long as they possess no organisation to protect their rights in time of need. Will the time come when we shall see organised Arab Labour in Palestine? We must organise labour parties in every department. Once we have done this we shall be able to create a public opinion in the country, and the Government will have to take it seriously and extend to it an attentive ear."

On the other hand, another Arab paper, *es Sabah* (the organ of the Palestinian Arab Delegation which is now in England), follows the more beaten track. After detailing the various strikes, it goes on to say: "This proves clearly what manner of condition the economic state of the Jews has reached, and what is hidden within the bosoms of these Bolshevik workmen. We have long demanded of the Government that it should punish them and eject them from the country, which is not accustomed to such human diseases as these—but it has not paid the least attention."

It is all very well to say that this is infantile, but this is the impression which, as the Haycroft Commission of the Jaffa Riots of May 1, 1921, showed clearly, so easily spreads in Arab circles as a result of the curious blindness of the Jews to the effect produced by their activities on the minds of the nervous and highly susceptible natives of Palestine.

Transjordanian Humour.

The Government of Transjordan seems to be gifted with a sense of humour. As is well known, there are constant complaints from some of the isolated colonies and villages, especially in Galilee, of the incursions of Bedouin from Transjordan, experts in cattle-lifting and midnight surprise attacks. These have necessitated the posting of strong bodies of police to watch the fords of the Jordan above and below the Sea of Galilee. A few days ago *es-Sabah* gave the following paragraph: "Travellers from Amman tell us that some days ago brigands launched an attack on a party of wayfarers on the high-road near Jericho and robbed them of everything they had after a severe battle which was waged between the two parties, and in which an Arab from Salt was killed. We understand that, as a consequence, the Government of Transjordan will request the Government of Palestine to give permission to subjects of Transjordan to carry arms in the midst of Palestine in order that they may defend their lives from attacks of murderers and brigands."

[In a communication that we have received from the Governorate of Jerusalem it is pointed out that the report of disturbances between the villages of Dura and Daheriyah given by our Jerusalem Correspondent as an extract from the vernacular press, in a letter appearing in THE NEAR EAST of April 27, contains certain exag-

generations. The total casualties for both villages were eleven (not sixteen) killed and twenty wounded. No machine guns were used; no trenches were dug, nor was the affray in any sense organised or "officered." The situation was immediately taken in hand by the Police, and the two villages have been bound over under the Prevention of Crime Ordinance. The Government did not send armoured cars to the spot. We may state that there was no suggestion in our Correspondent's letter that the report need be taken *au pied de la lettre*.]

BULGARIA.

Sofia, May 17.

Genoa and Bulgaria.

News received from the Bulgarian Delegation at Genoa makes distinctly pleasant reading. M. Stambolisky has succeeded in securing the attention of the Conference on two matters which are relevant to the economic recovery of Bulgaria. Reparations and the economic outlet to the Aegean Sea will, it is reported, be considered by the Conference; and Mr. Lloyd George, supported by the French and Italian Delegates, paid a warm tribute to the loyalty shown by Bulgaria in carrying out the Peace Treaty. This is the first time that Mr. Lloyd George has openly praised Bulgaria, and the fact has not passed without comment. The Bulgarian Delegates expect to be back in Sofia towards the end of May, in order that the Ministers may attend the Agrarian Congress.

The Wrangel Plot.

A brief reference was made in my last letter to the arrest of Colonel Samohvaloff, a senior officer of General Wrangel's Army. From an examination of the papers found in the possession of Colonel Samohvaloff it appears that the Wrangelists had established a first-class secret service agency in Bulgaria. All important details relative to the Bulgarian Army, the State railways, the leading banks, and other matters have been studied by the Wrangelists and reported on as completely as could be wished. Followers of General Wrangel say that their object in collecting this information was to combat any Communistic movement. The Government declare, however, that Wrangel's object was to obtain control of the country in conjunction with certain Bourgeois parties.

The truth probably lies between the two theses, although most people attach greater importance to the Government's point of view. Meanwhile all members of Wrangel's Army have been ordered to register themselves, and some twenty senior officers have been arrested and are to be deported. Wrangel's soldiers are highly incensed at the arrest of their officers, and are threatening to make trouble.

Amongst the working classes, the effect has been to discredit Wrangel's Army. On the other hand, the Bourgeois parties say that the whole affair has been greatly exaggerated and that the Government, having become friendly with the Soviet at Genoa, is anxious to give the latter a proof of its amity. In any case, what strikes an impartial observer is the undesirability of Wrangel's Army being in Bulgaria at all. It is too big a force for a country possessing only 6,500 soldiers. The Allies, and particularly France, were responsible for its being brought into Bulgaria, and therefore the greater part of the responsibility for the present state of affairs falls on them.

One unfortunate factor is that on the entry of the Army, the present Government is reported to have signed a convention, granting the Wrangelists certain rights. The Russians now claim that in arresting and deporting Wrangelist officers, the Agrarian Government is going back on this convention. The situation is very complex and can only be cleared up when the Allies allow Bulgaria to have an Army commensurate with its needs.

The Municipality of Sofia.

In spite of being urged by the Opposition press not to sign the decree which confers on the Government the

right to choose the Sofia Mayor and Councillors, the King has affixed his signature to the document in question. The Agrarians will, therefore, be responsible for the administration of the capital.

The Forest of Rilo.

The dispute between Italy and Bulgaria anent the forest of Rilo is coming to a head. The forest of Rilo was owned by the clergy, who are very much opposed to a concession for the working of the forest granted to an Italian group. The Bulgarian Government has now proposed that the matter should be settled by a mixed Arbitral Court, the President of which is to be a Swiss, and the other members an Italian and a Bulgarian respectively.

Compulsory Labour.

To-day the women of Sofia are due to commence their spell of compulsory labour. Girls and women between the ages of 18 and 35 years are forced to work for the State for three months, but on payment of 20,000 levas (£33) exemption is granted. Many of the girls will be employed in the different Ministries, whilst others will act as "Clerks of the weather," railway ticket-collectors, and so forth.

Owing to the fact that summer is approaching, the compulsory labour law is not very popular with the feminine sex and in several cases engaged couples have hurried on their marriage in order that the girl may escape from her three months' spell of work!

ALBANIA.

Tirana, May 15.

Foreign Representations.

France has just nominated her consul at Scutari, M. Béguin Billcoq, as Chargé d'Affaires in Albania pending the despatch of a Minister Plenipotentiary, which doubtless will not be long delayed. The delay in appointing a French representative in Albania is attributed to an "incident." Last November, after the decision of the Conference of Ambassadors to accord recognition to the Albanian Government, France designated M. Krajewsky as her representative at Tirana, and asked for his recognition. Now, M. Krajewsky was well acquainted with Albania, for he had served there first as Consul and then (in 1913-14) as Delegate on the famous International Commission of Control. But he was also for three years with Essad Pasha, whose memory is loathed in Albania; and for this reason the Tirana Government felt that his presence might open up old sores, and begged France to choose another representative. Happily, the appointment of M. Béguin Billcoq puts an end to this "incident," and, it may be hoped, begins a new era of regular and cordial relations between the two States.

Apropos of foreign representatives in Albania, I may refer to Signor Castoldi, the Italian Minister. On February 20, after the arrival of the British Minister, Mr. Eyres, Signor Castoldi presented a Note to the Tirana Government, drawing attention to his own position as *doyen* of the Corps Diplomatique. [The Albanian Government replied that Signor Castoldi had not presented his Letters of Credence and that the Consulta had not asked for the approval of Albania to his appointment. At the time of writing, Signor Castoldi is absent, on leave in Italy; and rumour has it that the Consulta intends to appoint a Minister *en règle* to represent Italy at Tirana.

The Delimitation of Frontiers.

The International Commission for the frontiers of Albania has already settled the frontier between the sea and the lake of Scutari, and is now at work in the region of Kastrati and Klementi, where Yugoslavia, in her desire for annexation, is raising difficulties. In regard to the Southern frontier, the neutral zone which was delimited at Paris has just been evacuated by the Greeks; but as an error, which left outside the land between the two lakes of Prespa, had here been made, Albania has despatched a fresh Note on the matter,

The League of Nations.

On the 12th instant the Council of the League of Nations assembled at Geneva, where Earl Balfour, the British delegate, in speaking of the efforts of the Commission of Inquiry sent to Albania, paid homage to the work of the League and to the good offices of the Albanian Government in the pacification and the organisation of the country. The Albanian delegate, M. M. Frasheri, requested the League to send yet another delegate to Albania to supervise the execution of the clauses concerning the evacuation of the Southern borders, so as to avoid any possible difficulties that might arise between Albania and Greece. The League assented to this demand, and it has already nominated a delegate who will shortly arrive at Kortcha (Koritza).

The General Situation.

The internal situation is satisfactory. The Government continues its work of disarming the population, and it is hoped that no difficulties will be encountered.

Parliament, which ought to have met on April 1, will not meet now until September 1. This measure has been taken at the wish of the representatives of the nation, and not as an extraordinary measure imposed by the executive authority.

ANCIENT EGYPT.

An account of Egyptian excavations during last winter was given by Professor Flinders Petrie at University College last week. Of three square miles of tombs of the First Dynasty, by the old forts of Abydos, 500 were cleared of sand. Many alabaster bowls and objects of copper and ivory were obtained in the Royal Cemetery, where there were skeletons accompanied by little granaries for the sustenance of the departed spirit on its journey. Still more remarkable was the evidence of the custom of killing a number of courtiers—60 or 70, as the lecturer suggested—on the death of the King. This was an effective way of ensuring stability of government. When the time came the courtiers' end was generally painless, for they were first stunned with sandbags; but apparently this was not always done effectively, one picture on the screen showing that the victim had made an effort to escape after burial. There was a cats' burial place, with little pots that had contained milk—the first evidence obtained of food being provided for the spirits of animals. At Oxyrhynchus there was a great building which excited curiosity, and, on being examined proved to be a vast Roman theatre with seating for eight or ten thousand persons. Why the Romans should build this great theatre in such a place was an unsolved puzzle.

THE SOKOL GATHERING.

In connection with the forthcoming Sokol gathering, to be held on August 12, 13, 14 and 15, M. B. Bogdanovitch, of the Adriatic Bank, Liubiana, sends us the following interesting particulars:—

On March 5, 1862, Dr. Miroslav Trysh and M. J. Muller founded a gymnastic Society in Praha under the name of the *Telosvishna Yednota Prashka* in opposition to the existing German *Turnverein*. Two years later this Czech society changed its name to "Sokol Association," and this was the beginning of the big "Sokol" movement. The word "Sokol" means "falcon," and in that word the whole idea of this movement is explained. To spread his wings, to soar above his oppressors, and then—to stoop, to pounce on them and kill them dead. Now, after independence has been won, the aim of the Sokol Organisation is to bring the young people up in the spirit of their forefathers, to make them worthy, in mind and in body, to be the citizens of the free Slav States.

In August we shall see them here in force. Not only Yugoslav, but Czech, Polish and other Slav Sokols will gather in Liubiana to give a gymnastic display worthy of their traditions. There will be over 25,000 Yugoslav Sokols present, men and women; from Czechoslovakia 11,718 are prepared to come over, and one hopes that notwithstanding all the transport difficulties, they will be able to attend the gathering, all of them. At the time of writing, one does not know exactly how many other Slav Sokols will attend, but the estimates point to another 8,000 more Sokols and to about 34,000 non-Sokol spectators from all over the world as well.

In one gymnastic display 15,000 men will execute mass movements; this huge body will work in harmony as one man and will show to the world the perfect mutual understanding which results from a common iron will.

I believe this will constitute the record as regards number of persons executing massed movements.

Quite naturally, all the Sokol Societies are working their hardest to make this gathering a complete success and so to show the world that all Slavs are but one body and one mind, that the same will, the same force that gave their forefathers the power to hold out in servitude, then fighting hard to regain their liberty, still prevails to defend what their fathers have achieved in fair fight.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

ZIONISM: THE U.S. SENATE RESOLUTION.

To the Editor of "The Near East."

Sir,—The United States Senate, on May 3, passed the Lodge resolution, which reads as follows:—

RESOLVED: That the United States of America favors the establishment in Palestine of the national home for the Jewish people, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of non-Jewish communities in Palestine, and that the holy places and religious buildings and sites in Palestine shall be adequately protected.

On behalf of the Palestine National League of America, we hereby submit the following facts in regard to the above resolution:

1. No hearing was held by the Senate Foreign Relations Committee on this resolution, although our League requested such a hearing.

2. The Foreign Relations Committee of the House held a hearing at which five witnesses appeared who strongly opposed the resolution. Of the five witnesses two were well-known Jewish Rabbis, one professor in one of the foremost universities of America, who had been in Palestine, and two members of our League. The testimony against political Zionism was so strong that the House Committee has not, up to the present, passed the resolution and it is doubtful if it ever will. The testimony was published in a special pamphlet by the Congressional Record.

3. As to the motives which led Senator Lodge and Representative Fish to introduce the resolution, it is sufficient to quote the *American Hebrew* of April 28, which states: "Dr. Weizmann sent an S.O.S. call to America . . . a young Boston politician suggested the approach to Senator Lodge. Lodge is coming up for re-election. Certain forces in Massachusetts are bitterly opposed to the faithful, senatorial war horse. He is neither happy nor sure in the campaign. The Senator heard the argument and answered the plea." . . . "Young Hamilton Fish, of New York, also has senatorial aspirations." The New York *Sunday Times* of May 7, in an editorial entitled, "Confusion worse Confounded," denounces the Lodge resolution, and exposes the motives which led to it.

4. At the hearing it was brought out that the Zionists in America number only thirty thousand, that they do not represent American Jewry, that there are, among the Jews, many bitter opponents of political Zionism.

5. Several leaders of thought in America, including some of the most eminent professors, and scholars, who are acquainted with the situation in Palestine, are strongly opposed to political Zionism.

P. S. GEORGE,
Chairman, Publicity Committee.

F. I. SHATARA,
President.

New York City.

May 8, 1922.

THE CYPRIOTE ROADS LAW.

To the Editor of "The Near East."

Sir,—We live here under the most autocratic Government in the world. The Cypriote, accustomed to autocratic rule in the past, may perhaps not be always conscious of the truth of what is stated in the opening sentence of this letter.

The latest proof of the fact is contained in a Law passed in Council last week. Its title is the Roads Law 1922. Clause 3 authorizes any labourer employed by

the Director of Public Works to enter upon any land near to any existing or intended road and there do all acts necessary for making or repairing any road. Clause 4 authorizes the same individual to dig, cut and carry away any timber, stone, gravel or any other material, for the purpose of making or repairing any existing or intended road. Clause 5 provides that any person who has sustained damage or loss may obtain compensation by giving notice within two months to the Director of Public Works. Unless these two parties can come to an agreement, the matter must be settled in the District Court.

Now every one who has lived in the Island, and every one who has property of any kind, knows only too well that the Cypriote peasant has no scruples whatever about entering on land and carrying off what he wants. The men composing road-parties are just as careless on this point as the villager, so that, instead of a law to facilitate entrance to land, matters should be left as in the past; and if further legislation is necessary provision should be made for obtaining the consent of the owner of the property.

Some of us pray that His Majesty may be advised to disallow the Roads Law 1922.

I am, etc.,

GEORGE L. HOUSTON.

Kyrenia, Cyprus.

May 12, 1922.

PARTY POLITICS IN GREECE.

To the Editor of "The Near East."

Sir,—The contents of a letter—or at least that part of it pertaining to the figures—in the issue of your journal of May 4, under the heading "Party Politics in Greece," are so ridiculously absurd that, had not the remarks made therein constituted an accusation reflecting directly on a journal which has always stood very high on the pedestal of Press accuracy, I should have spared myself the trouble of replying to them.

I completely fail to see where the writer gets the figure 263 from! But, pardon, I was forgetting that he himself is not included among "those who were not in direct touch with the political pulse of the moment." How comes it then that he, being not only "in direct touch" but also present throughout the sitting of the Assembly obtained such erroneous and misleading information with regard to the happenings in the Chamber on the sitting of 5-18th March, 1922? If the author of the letter considers it worth his while to call on the Keeper of the Minutes of the Parliamentary Proceedings he would regretfully ascertain that the number of Deputies present in the Chamber at the time the vote of confidence was taken was 303 and not 263 as he so cocksurely states. Of those 303, 164 voted in favour of M. Gounaris, 86 against, and 53 (not "10") refrained from voting. The 10 Ministers were, of course, neither included in these figures nor did they vote.

I must ask the author of the letter to read once more—more carefully this time—my notes in your issue of April 6. He will then readily see that I did not say that "the Mussulman Deputies did not even appear at the sitting of the Chamber." What I did say, and what I now repeat, was that "the Mussulman Deputies forming part of the group of Independent anti-Venizelists did not even appear at the sitting of the Chamber." In fact, not only did these, 21 in number, abstain from the sitting, but they even issued the following *communiqué*:—"The group of Independent Mussulmans which last Friday voted against the Government, not wishing to make the position more difficult, has decided to abstain from to-day's sitting of the Chamber." It should be mentioned here that in addition to the 21 Mussulmans, M. Calogeropoulos and his three adherents also refused to vote and left the Chamber a few minutes before the vote of confidence was taken.

So where do M. Gounaris' "sound working majority of 89" and my "crude and misleading explanation of a second crisis being averted" come in? In accordance

with the laws of arithmetic 164 less 139 (86 Liberals and 53 Stratists and Macedonians) would only leave 25. How these 25 votes could be considered a sound working majority with the Damoclean sword in the shape of 25 Deputies (Independent Mussulmans and the Calogeropoulos quartet) hanging threateningly above the Government's head, nobody but the writer of the letter would be able to understand.

I have no complaint to make in regard to the two last paragraphs of the letter under reply, the writer being naturally entitled to his own opinion.

I am, etc.,

YOUR ATHENS CORRESPONDENT.

Athens.

May 17.

THE SERBO-ALBANIAN FRONTIER.

To the Editor of "The Near East."

Sir,—One can sometimes learn a good deal from a critic and I should like to express my appreciation of I. M. who has reviewed in your columns my book "A Difficult Frontier." He says that "its map is hidden in one unostentatious page, which at first sight escapes the reader's attention altogether." Messrs. Stanford, the map-makers, and my publishers did indeed think that by putting it opposite the title-page they were giving it a position where it could not fail to attract the most superficial reader. They were evidently wrong and perhaps your critic will advise them what they ought to do in my next book.

That, I think, is about all I have to learn from your critic, whereas he is clearly in need of some instruction. He obviously does not know the name of the notorious Moslem priest who is alleged to have killed some 500 of his late parishioners for refusing to follow his example and enter the Orthodox Church. Neither does he seem to be aware that General Phillips of Scutari showed in the clearest fashion that he disapproved of Captain Brodie, whose outrageous invasion of Yugoslav territory was met, as I have shown, with firmness, extraordinary forbearance and courtesy. Your critic actually says that I am jubilant because this gentleman was insulted by the Yugoslavs. When, referring to last autumn's consideration of the Yugoslav-Albanian frontier, I say that Mr. Lloyd George, being at that time preoccupied with other things, presumably allowed some incapable person to act in his name, your wonderful critic can only ejaculate "Who is this anonymous idiot?" I believe I showed that this person acted in an unwise manner. "He really ought to have known better than

Bath Club.

May 27.

(The above letter is published exactly as received.—Ed.)

ANGORA AND LONDON.

We are indebted to Mr. A. P. Tully for the following account of an address given by Dr. Réchad Bey to Members of Parliament in the House last week:—

Heretofore there has been little or no direct contact between those who make our laws and direct our foreign policy and the authorised representatives of the Angora—or Constantinople if it comes to that—Turks. Two official missions have come to London, one headed by Békir Samy Bey (then Foreign Minister), and one by Yousouf Kemal Bey. Both came into contact, obviously, with the Foreign Office, as also with a certain limited number of people already well posted in Turkish matters. But there has been no contact between the ordinary M.P. and Angora officials. Hence, when Turkish matters have come up in the House, the huge majority of members might as well have been listening to a discussion on Einstein. A happy initiative was therefore taken the other day when, in response to a whip signed by about a dozen Members of various shades of party and views, some thirty or forty met last Wednesday in one of the committee rooms to hear Dr. Nihad Réchad Bey, Angora Representative in London, and to ask him any questions they might wish.

Amongst the conveners and those present were:—Sir Martin Conway (in the chair), Mr. Montagu (late Secretary for India), Major H. Barnes, Major A. B. Boyd-Carpenter, Sir John Butcher, Brig.-Gen. G. H. Cockerill, Viscount Curzon, Capt. Walter Elliot, Mr. W. Graham, Mr. W. G. Howard Gritten, Com. the Hon. J. M. Kenworthy, Mr. Ormsby-Gore, Sir J. D. Rees, Bart., Mr. Tom Shaw, Brig.-Gen. H. Conyers Surtees, Lt.-Col. John Ward and Col. J. C. Wedgwood.

Space does not permit me to quote Réchad Bey's speech in full, but the following *resumé* of the proceedings is, I think, sufficient for all practical purposes.

After the Chairman had expressed his thanks and welcome to Réchad Bey and his pleasure at the opportunity thus afforded of getting facts at first hand and asking direct questions, Réchad Bey in his turn expressed his appreciation of the kindness and courtesy extended to him.

Turkey, he went on to say, had been little known and much misrepresented in Europe and particularly in England, and the mistaken nature of the treatment to which she had been subjected by Europe was at length being realised after the passing of almost three years and a half since the Armistice. Two scales were used for Turkey, and the principles of nationalities and similar theories (such as the *status quo ante* declaration prior to the Balkan War) were only applied when they were to Turkey's disadvantage. The Smyrna landing of the Greeks and similar moves in the effort to reduce her to a subject race with no vestige of the most elementary rights of an independent nation had roused all Turkey and the whole of Asia besides. An unjust peace was of no use to anybody, not even to the races Europe sought unjustly to benefit. France and Italy had early recognised their error, and a better and more broad-minded spirit was even becoming evident in England. Would that it should develop into real and understanding friendship!

Turkey required a just and durable peace containing no germs of future conflict, and such a peace was impossible unless old methods and prejudices were cast aside and the facts looked at squarely. Both politically and economically the Treaty of Sévres and the policy it represented had proved unworkable failures.

After retracing the history of recent years the speaker demonstrated the falsity of the "religious persecution" theory, and pointed to the treatment of the Christians in Turkey ever since the foundation of the Ottoman Empire. The Turks were then all-powerful and could have either exterminated the Christians or have converted them by force if it had been a principle of the Moslem faith to do so. But instead of that they had respected their Churches and their languages, and had even granted a large measure of autonomy to each community which had survived to this day. Contrasting this with the treatment meted out to Moslems in Macedonia, Crete and elsewhere, he cited figures

showing the enormous reductions due to persecution and pressure of all kinds ultimately resulting in forced emigration to find security; and referring to the continual readiness of Turkey to accept inquiries by neutral and impartial people into population statistics (which the Greeks refused) as well as into the massacre accusations on both sides, he complained that either these neutral investigations were never granted or, when they were and the results proved favourable to the Turks (as in the case of the Inter-Allied investigation in Smyrna and the Geneva Red Cross inquiry in the Marmora coast region) the reports were never given publicity in this country, although every Greek or Armenian tale on doubtful or no authority at once enjoyed the run of the Press.

Turkey only asked for a just peace—the Turkish portions of Turkey for the Turks with complete political and economic sovereignty she had the right to ask, and, as to the minorities question, the troubles had been political and not religious. Turkey desired calm and appeasement in these matters, and the non-Moslem elements must decide to be once again loyal citizens and not be stirred up to revolt and sedition by foreign encouragement and interference. Turkey never intended, and had never intended, to oppose Islam to Christianity. On the contrary she looked with great disfavour on those who, for political reasons, attempted to make capital out of such matters and embittered political matters with a religious flavour.

Questions were then invited by the Chairman, and the first was a distinctly hostile one from Col. Sir J. W. Greig, who attacked the Turkish treatment of British prisoners and said that that explained the *prima facie* prejudice against the Turks. Col. Aubrey Herbert intervened and pointed out the terribly poor condition as to rations etc. of the Turks themselves, and quoted the "melting away" of a whole Turkish division under such circumstances, of which he had personal knowledge. Réchad Bey quoted the opinion of numerous British and French officers and men as to Turkish treatment of prisoners as well as the reputation of the Turk as a "clean fighter." Mr. Ormsby Gore enquired as to the position of Angora as to the Straits. Réchad Bey declared that Angora could not consent to the Greeks holding either Gallipoli or any portion of the Marmora Coast; but the permanent liberty of the Straits to all nations would be quite possible. Other replies were:—*To Captain Elliot*. A buffer state in Thrace was quite possible and even useful. *To Sir Charles Yate*. Bulgaria could certainly have access to the Aegean. A corridor between Turkey and Greece was desirable since Turkey desired no Greek frontier, if it could be avoided. *To Major Glyn*. The reason for the separation of the Governments of Angora and Constantinople arose from the Allied occupation of Constantinople. He did not say that the day that the occupation ceased the two Governments would coalesce, but it was certain that as soon as the capital was in safety and not at the risk of any outside attack there would be only one Turkish Government. *To Captain Elliot*. A treaty of peace and amity had been signed with Russia which first recognised Turkish claims. Azerbaijan, Georgia and Armenia were States forming part of the group of federated republics connected with Russia, and Turkey could neither comment on nor interfere with their domestic affairs. Enver was an adventurer at present fighting against the Bolsheviks. Turkey did not want Enver, and he had no connection whatever with Angora. Minorities must be dealt with by guarantees by all countries.

The proceedings terminated by the thanks of those present to Dr. Nihad Réchad and by his thanking every one for the attention and great courtesy accorded him.

TOPICS IN PARLIAMENT.

The subject headings given are those of the Official Report.

India (German Insulators).—Iraq.—(Thursday, 18th May.)

Trade and Commerce: Binoculars (India).—Constantinople (Allied Censorship).—Asia Minor (Turks and Christian Minorities).—Albania.—Egypt (Deportees).—India: Civil Service; Bills of Lading.—Royal Navy: Turkish Dreadnoughts.—Egypt.—Anglo-Persian Oil Company (Payment of Calls) Bill (Read a second time).—Egypt.—Government of the Sudan Loan (Amendment) Bill.—(Monday, 22nd May.)

India: Civil Service; Burma (Constitution).—Palestine: Arab Delegation; Vatican Mission.—Iraq; Oil Concessions; British Mandate.—Asia Minor (Turks and Christian Minorities).—Egypt: Barakat Pasha; Elwy El Gazzar Bey.—India: Bye-elections; Constitutional Reforms.—(Tuesday, 23rd May.)

India: Civil Service (Pensions).—Indian Subjects, Uganda.—Egypt: Zaghloul Pasha; Constitution Commission (Sudan); Sudan (Lord Allenby's Address); Minorities (British Protection).—(Wednesday, 24th May.)

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Paris and the Near East.

In the *Fortnightly Review* for May, Mr. H. Charles Woods writes on "Paris and the Near East." After making a detailed survey of the various proposals of the Paris Conference—of which in general he approves—he outlines certain defects in conclusion, enumerating them as follows.

(1) Whether the admission be palatable or not, it is necessary to remind my readers that the Turks, and particularly the Turks of the Nationalist Party or of the Committee of Union and Progress, are the last people to forget that the concessions proposed to them have been practically wrung from Europe and from Greece. This fact means that, even should peace be secured, the Allies will be compelled to deal with a very different Turkey from the one which would have emerged had other, or even the same, terms been given to her directly after the armistice. Whilst, therefore, there can be no doubt as to the desirability of the cancellation of the threat to remove the Sultan from Constantinople at some future date, and of the promise to withdraw the Allied forces now in occupation of that city, this evacuation should be postponed, not only until the ratification of the treaty, but until such time as the Turks have indicated their willingness actually to put its terms into operation.

(2) The provisions made, or rather not made, for the protection of the Armenians seem to me to be among the most unsatisfactory features of the whole proceeding. Before and during the war these unfortunate people not only suffered more heavily than any other element of the Ottoman population, but, in contradistinction to the Greeks, many of whom might emigrate to Greek territory should they so desire, they (the Armenians) have no home country, except the now cut-down and Bolshevised Republic of Erivan, to which they can go. Moreover, if it be true to contend, as I have always contended, that Mr. Wilson's and Mr. Lloyd George's promises made to Turkey before the armistice are binding, as they are now being treated as binding, then it is equally justifiable to insist that every endeavour should be made to realise the undertakings of the same gentlemen to the Armenians. Conditions in America, in Europe and in Turkey have changed since then, but this does not mean that the future should be dismissed almost by the expression of a pious hope to the effect that the League of Nations will obtain satisfaction of the traditional aspiration of this race. No stone should, therefore, be left unturned to try to safeguard the lives and properties of a people who are entirely dependent upon the Powers. Thus, should it be impossible (as I think it is impossible) to secure a new Armenian national home at the expense and independent of Turkey, then conceivably some arrangement might be made either for the return of the districts of Kars, Sari Kamish and Ardahan to the Republic of Erivan and for the cession to that State of small parts of the Turkish vilayets of Erzeroum and Van, or, in the alternative, for the creation of an autonomous Armenian district in North-Eastern Asia Minor or in Cilicia. If the Turks are unwilling definitely to agree to such concessions, and after all their agreement is now necessary, surely all parties to the final treaty, including Turkey, who will probably then be admitted to the League, should pledge themselves to accept whatever may be the decision of that body upon the Armenian question.

(3) The adopted scheme of partition for Eastern Thrace and the fact that the status of Western Thrace as an integral part of Greece has not been changed still leave Bulgaria without an adequate access to the Ægean. Although hardly satisfactory, this access was guaranteed under the Treaty of Neuilly, and under a treaty (never, I believe, published, but signed at Sèvres on August 10th, 1920, and still presumably operative) by which the port of Dédé Agatch was declared of international interest and under which Bulgaria has the right to apply to the League of Nations for the appointment of a commission to ensure the proper carrying out of the agreements connected with that port. Now that apparently fresh arrangements are suggested for the protection of minorities not only in Eastern but also in Western Thrace and in Thessaly, it would seem highly desirable that some plan should be devised, not to modify, but to ensure the permanent enforcement of undertakings the non-fulfilment of which is dangerous to the general peace and unfair to Bulgaria.

In the foregoing pages, wherein I have purposely omitted references to what are of necessity technical questions of finance and of the capitulatory system, I have expressly avoided a detailed discussion upon the probable attitudes of Greece, of the Constantinople Government and of the Angora Nationalists towards the Paris decisions. Whilst at the time of writing (April 8th) those attitudes are still uncertain, as Greece placed her interests in Allied hands last autumn, it would seem that her Sovereign and her Government are hardly likely officially to refuse the mediation now offered to them. If this be so, than as Cabinet crises and stormy sittings of the Chamber are the rule rather than the exception in Athens, there remains only the possibility that some committee or organisation of Hellenic national defence may endeavour to damage the interests for which it claims to be working by creating a revolutionary or independence movement in Asia Minor—a movement which might temporarily frustrate the execution of the international agreement. For all practical purposes Constantinople and Angora are possessed of a common policy, and therefore, whereas the Government of the former place is reported to have replied to the Allied proposals in a manner equivalent to their acceptance, it is to be hoped that the Nationalists will not demonstrate serious obduracy by quibbling over what are really details. The conditions now elaborated may not be perfect, and they may not include the complete and absolute fulfilment of the terms of the National Pact. But they embody a solution which should be acceptable to and accepted by all parties. On this ground the widest credit is due to Lord Curzon for the part which he played in Paris, and for this reason recalcitration by Greece or by Turkey, in itself injurious to them, would place either or both of these countries in the wrong before the civilised world.

THE INDIA SOCIETY.

The India Society, 3, Victoria Street, S.W.1, has just issued in pamphlet form the reports adopted at the annual general meetings of 1920 and 1921, together with rules, a list of members, and the future programme. The Committee, it is stated, is anxious to encourage in every possible way original and competent research regarding the numerous manifestations, past and present, of Indian art. The lectures to be given this year include a series on the influence of Indian art on that of other countries in Asia.

THE PALESTINE EXPLORATION FUND.

The 57th Annual General Meeting of the Palestine Exploration Fund took place on May 30 at the rooms of the Royal Society, Burlington House, under the presidency of Sir Herbert Samuel. A report of the meeting will appear in a subsequent issue.

NEAR EAST BOOKSHELF.

ANCIENT INDIA.

"THE CAMBRIDGE HISTORY OF INDIA. Volume I. ANCIENT INDIA." (Cambridge University Press. 42s. net).

The issue of this volume, the first of six, marks the end of the epoch when any single individual, however gifted, could be regarded as an authority on the whole history of India. The mass of knowledge has become far too great for that; and India must now come into line with the West, and recognise periods and departments of inquiry, each to be handled by a separate group of specialists. The Cambridge History is designed on these lines, and the volume before us is the work of a large number of authorities, drawn not from Cambridge alone, but from Oxford and Edinburgh, London and Manchester, Yale and Columbia, and Upsala. As a corollary it must be admitted that no individual reviewer, however insolent, can be in a position to deliver judgment *ex cathedra* on their work. The most he can do is to offer an appreciation of the book as it appears to him; and the present writer feels impelled to begin by offering his humble and hearty thanks to Professor Rapson and his learned team for having brought within manageable compass an enormous mass of facts and theories, which have hitherto been so scattered as to make it impossible for ordinary students to form any just idea of the present state of knowledge. This duty performed, we may try to explain what the book contains, and how its matter is presented.

The volume before us brings the history of India from the earliest times to just beyond the Christian era. It is not, and could not be, final, but, to quote the preface, "it attempts to represent the stage of progress which research has now reached in its task of recovering from the past the outlines of a history which, only a few years ago, was commonly supposed to be irretrievably lost." It is little more than a century since the sky was pitch dark: we are now in twilight, but not more. The first bright star fixed in the firmament was the work of that great Englishman, Sir William Jones, and many lights have been added since his time, mainly by Western scholars, though Indians are now helping more and more. The mischief of it is that each star of fact tends to generate a nebula of theory, sometimes so extensive as to suggest that the day has at last dawned, and the plain man wants most of all to know what he may safely accept as fact, what theories he may regard as probable, and what guesses he will be wise to ignore. In the writer's opinion, this book exactly meets such requirements. Facts are dis-

tinguished throughout from theories, theories are graded as probable or possible, wild guesses are ignored or summarily discarded, and, while nobody is likely to suggest that every contributor is correct in every judgment, the treatment of the material is so eminently sane and reasonable as to produce a feeling of confidence which increases as we read. To say so much is to say that the book is a great success, and, in the strict sense, indispensable to everyone who wants to know anything about the India of the past.

Before leaving the matter of the book, it is necessary to say that there are a few mis-statements of fact in the opening chapter, which describes the geographical features of the country. So far as the physical geography is concerned, this is well done, but the attempt to incorporate administrative details of the moment seems to us a mistake, and it is here that errors catch the eye. We read of a Lieutenant-Governor in Lahore, where the race is as extinct as the dodo; we read that the Ganges is not bridged below Benares, and we think of the great bridge at Sara Ghat; or we read of a railway constructed "of late" from Ahmadabad to Hyderabad in Sind, and we search for it vainly in the latest Indian "Bradshaw." These are of course the merest trifles, but *hors d'oeuvres* should give an appetite for the banquet, and these trifles may lead some readers to suspect the accuracy of more important statements further on.

As to the presentation of the matter, the book is an example of the well-known merits and defects of the co-operative method. It does not 'read itself' as Gibbon does; one must set to work to read it, and sometimes with paper and pencil at hand. The balance is unequal in places; Dr. Barnett on the South is almost cruelly concise, while Mr. Bevan loads his chapter on Alexander the Great with details of little interest for the student of India. Treatment by periods again makes it difficult to follow the development of institutions such as slavery, caste, or land tenure, and we should often be glad of more connective tissue than has been furnished. But against these drawbacks must be set the outstanding merit that each period is treated by a master who inspires our confidence, and, after all deductions have been made, our predominant feelings as we finish reading are gratitude and admiration.

A word must be added of the admirable collection of plates, which illustrate the text in the scientific, happily not the popular, sense of that much-abused word. The coins, antiquities and works of art reproduced are not merely things to look at, but they make the text intelligible where it would otherwise be most difficult. The account of the Greek Kingdoms in the North, to take the most conspicuous instance, is built up in a really wonderful way on the evidence of coins; it is by no means easy reading, but even the amateur can follow it with the aid of the reproductions of this evidence, and no one can fail to appreciate the portraits of such Indian kings as Eukratides or Heliocles. Bibliographies, chronology, and index occupy nearly 100 pages, and, together with adequate maps, contribute materially to the value of the book to serious students.

A CYPRUS GUIDE-BOOK.

"CYPRUS: HOW TO SEE IT." By Alexander R. Kheori. (Alexandria: The Anglo-Egyptian Supply Association. 3s.)

This small guide-book aims at giving information in concise form to travellers who contemplate a visit to Cyprus. Unfortunately, except during the heat of summer when there is a large influx of holiday visitors, especially of Greeks, from Egypt to Mt. Troódos, the island still fails to attract tourists. This is not surprising, since steam communication is very indifferent, and the hotels leave much room for improvement. Strange to say no effective steps have been taken to develop a tourist trade, and the Government, if it does not discourage, certainly does nothing to promote it.

A History of the Arabs in the Sudan

and some account of the people who preceded them and of the tribes inhabiting Darfur. By H. A. MACMICHAEL, D.S.O., Sudan Political Service. In two volumes. Royal 8vo. £4 10s net. Not sold separately.

"Obviously inspired by profound knowledge of the country and all its problems. . . It is a masterly piece of research work." *The Morning Post*.

The Ballads of Marko Kraljević

Translated by D. H. LOW, formerly Lecturer in English in the University of Belgrade. With a plate, reproduced from a drawing by Olive Carleton Smyth. Demy 8vo. 15s net.

"The translation itself is excellent and well balanced between the Scylla of 'fine writing' and the Charybdis of baldness; and it is sufficiently literal to retain something of the atmosphere of the original."—*The Near East*.

CAMBRIDGE UNIVERSITY PRESS

Fetter Lane, London, E.C. 4

C. F. Clay, Manager

The heat of summer, which is very oppressive, is not favourable for tours except in the mountain heights.

It is unfortunate that the illustrations, reproduced from photographs, quite fail to do justice to their subjects, being so blurred that the principal features are in many cases indistinguishable. There are various errors and misprints which should be corrected in future editions. It is, *e.g.*, incorrect to say that snow covers Troödos from November to May. The mountains are only covered after heavy falls, disappearing as a rule after a few days. Much more might well have been said regarding Mt. Troödos, its fine forests, and points of interest. One of the picturesque spots is Mesopotamos so called from its situation between two streams. One of these, says the writer, has given its name to the place *Mesopotamos* which means "Internal River." Here "turpentine trees grow side by side with a peculiar tree called 'Androclia' by the natives." The tree referred to is the arbutus, mentioned by the author in a previous page. It grows abundantly all over the Troödos range. "The pines, laden with their nuts, look like some quaint Christmas trees." Walks and mountain climbing will repay you "as you will surely discover new lovely nooks and outlandish spots that will attract your pen or palette . . ."

With a little more trouble the booklet might be made a much more useful and reliable guide than it now is. It is of very convenient size for the pocket.

WHIMSICAL SMILES.

"I HAVE ONLY MYSELF TO BLAME." By Elizabeth Bibesco. (London: William Heinemann, 7s. 6d. net.)

Princess Bibesco has made an attractive volume of slight episodes illustrating elusive, subtle sentiments. She succeeds in catching the flying moment and putting the passing mood on to paper. It seems to us that this volume will appeal to women very much more than to men, for it is the women who are portrayed with sudden intimate little flashes of insight, whereas the men are described—although, as Princess Bibesco is never at a loss for the illuminating word, often brilliantly described—only as their exterior manners show themselves to the world. She possesses one gift very necessary when an impression has to be vividly conveyed in few words: she is able to produce, with the true magic art, the atmosphere that she has chosen for her background, and we are taken straight, without any fluster, in to her charming rooms and sunlit gardens.

In a way it is a pity that these sketches, with their alluring titles, their sprinkling of wit and their cunning mixture of the expected and the unexpected, should so certainly lead the reader fascinated from one to another until the whole book has been devoured, because after so much of this fare we are inevitably left with an utterly unsatisfied feeling. These ladies, with their complex emotions and their whimsical smiles, playing for ever at a complicated game of skill which is given the name of love, in what a drearily artificial world they live! In spite of the fact that their creator is at pains to show us how modern they are, we are reminded of charming creatures eternally coquetting on an eighteenth century painted fan. But although we may be left wondering whether it was worth doing, we shall almost certainly return to those stories which we thought were the most successful—"Tout Comprendre" and "The Ball" for instance—to admire with how clever a touch it is done.

NEW BOOK.

CHINESE GRAMMAR SELF-TAUGHT.

(In Chinese and Roman Characters)

By J. DARROCH, Litt.D., O.B.E.

Containing the Origin and Structure of the Chinese Language, Romanization Phonetic Script, Phonetic Signs of the Dju-Yin System, The Radicals, Order of Writing the Strokes, Lessons, The Noun, The Pronouns, The Adjective, The Verb, Adverbs, Conjunctions, Dictionary: Chinese-English.

London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.4.

MUSICAL NOTES.

GRAMAPHONE RECORDS.

There remain in the May issue of "His Master's Voice" a few records which, though not perhaps of great distinction, are nevertheless pleasing.

Miss Irene Scharrer is heard in Chopin's Valse in E minor and in his Prelude in F sharp minor; they are both gracefully played, with facile refinement. The reproduction is well done, though some of the subtler details are a little lost.

Cedric Sharpe has arranged for the 'cello "The Question" and "The Answer" of the blind composer, Wolstenholme, but not even his delicate and very perceptive playing can make either of them of any worth. It seems a great pity that so excellent a record should have been made of pieces so consistently undistinguished.

Of two of John Ireland's songs—"When Lights go Rolling round the Sky" and "Hope the Hornblower"—Peter Dawson has made a magnificent record. Everything, both in voice and in accompaniment, is reproduced with most commendable clearness, and for those who do not mind Ireland in his less original moods, this record is one to buy. "Hope the Hornblower" is a much better song than the first, and in it Peter Dawson indulges freely in that downright exhilaration and verve which are the bases of his popularity. No song could have proved better suited to his breezy style.

Lovers of opera will be charmed to have the record that Clarence Whitehill has made of Wotan's Farewell ("Leb' wohl, du kühnes, herrliches kind!" from "Die Walküre"). It is a piece of rich and dignified singing, at once restrained and full.

It is a curious and rather lamentable fact that the more "popular" records are often clearer (particularly the vocal ones) than those of more artistic interest. Here, for instance, is that excellent comedian, Ernest Hastings, singing, so that every word and inflexion can be heard, "And yet I don't know" and "Matilda." The first, expressing the witty doubts of a Yorkshire miser, is a funny classic, but the second, a hit—not too sly because it has to appeal to the music hall audience—at the operatic style, is also quite good fooling.

Those in this country and abroad who love the pretty ballad are scarcely on the decrease, and they will, I am sure, flock to purchase the record which Violet Essex has made from "A Brittany Love Song" and "Piccaninny, mine, good-night." There are any amount of piquant obviousnesses in both, and all well reproduced!

The Coldstream Guards are delightful in some selections from Sullivan's "Box and Cox." This is the kind of music, light, tuneful and fresh in which the band excels, and it is really beautifully played. Particularly is the tone of the wood-wind notable, but there is admirable discipline in all the instruments. The facile "Lullaby," for instance, is played with the easiest mastery.

ANDANTE.

A story lies in the writing of a novel by Mr. Maurice Samuels. A Roumanian by birth, he was educated at Manchester. Going to America in 1914, he enlisted with the American Army, and later served on the Intelligence Staff in Paris. The fascination of the City held him after the war, and he stayed on. "The Outsider" is a novel of the cafés; of the mysterious persons who earn their living in that city by odd and shady means. It will be published early next month by Constable and Co.

An interesting ceremony on May 27, in the Hall of St. Michael and St. George in the Palace of Valetta, united all classes of society when Lord Plumer presented war service badges and awards to members of the St. John Ambulance Association. Lady Plumer attended in V.A.D. uniform, supported by the strong contingent of Malta V.A.D.'s. After the ceremony in the great hall Lady Plumer assembled the V.A.D.'s in the State Drawing Room and read to them Princess Mary's letter thanking the V.A.D.'s for their wedding present.

PERSONAL AND GENERAL.**To-day.**

June 1 (New Style).

May 19 (Old Style).

Shawal 5, 1340 A.H. of the Moslem Calendar.

Sivan 5, 5682 of the Jewish Calendar.

Mr. Imre Schwaiger has arrived at 39, Brook Street, from India.

Lady Sinha has arrived from India. Lord Sinha is still undergoing a rest cure in a nursing home.

Sir Jamsetjee Jeejeebhoy, Vice-President of the Indian Legislative Assembly, has arrived from Bombay.

Colonel Douglas Capitaneano, Military Attaché to the Roumanian Legation, left London last week for Vichy.

Sir Alexander and Lady Roger have left for Constantinople and will return to London about June 25.

M. Titulescu, Roumanian Minister in London, is expected to arrive in London this week from Paris.

Mr. Rudyard Kipling has become vice-president of the Anglo-French Society.

The Bulgarian Minister, M. Stancioff, accompanied by his daughter, was due to arrive in England last Tuesday.

M. Pantcho Doreff, Counsellor to the Bulgarian Legation, and M. A. Angeloff, Secretary, have been appointed to Alexandria.

M. Stambolisky, the Prime Minister, with the rest of the Bulgarian delegation returning from the Genoa Conference, reached Sofia on May 25.

The Lady Rawlinson, on May 27, at Buckingham Palace, had the honour of being invited to luncheon with the King and Queen.

Kathleen, Viscountess Falmouth and the Hon. Pamela Boscawen have arrived at 16, Buckingham Palace Gardens, S.W., for the season on their return from India.

Mr. O. E. d'Avigdor-Goldsmid, of Somerhill, Tonbridge, president of the Anglo-Jewish Association, and Mrs. d'Avigdor-Goldsmid have arrived in Jerusalem on a short visit.

The Prince of Wales has, says the Cairo correspondent of *The Times*, accepted the invitation to visit Egypt, and according to present arrangements will spend June 10 in Cairo.

M. Rade Valdets, a Yugoslav sculptor, has been honoured with sittings by Princess Marie of Roumania, as he has been commissioned to prepare a bust of the future Queen of the Triune Monarchy.

Admiral Sir John de Robeck, Bt. (upon relinquishing his appointment as Commander-in-Chief Mediterranean, and upon his appointments as Commander-in-Chief Atlantic Fleet), had the honour of being received by his Majesty at Buckingham Palace on May 27.

Sir John Salmond left last week for India, along with two high Air officers, in order to investigate and advise on the future use of the Air Force in India, and to report on the subject to the Indian Government. After completing his tour, Sir John Salmond will proceed to Iraq, to take up his new command.

The King has granted to Mr. W. J. Dille, Professor at the Polytechnic School, Cairo, Royal licence to wear the insignia of the Third Class of the Order of the Nile, conferred on him by the Sultan of Egypt (now the King of Egypt), in recognition of good services rendered by him.

A marriage has been arranged between Major and Brevet Lieutenant-Colonel R. S. Wilson, late Lancashire Fusiliers and Egyptian Army, son of the late Colonel T. Wilson, C.B., of Mossley Hill, Liverpool, and Gladys, Cemaes, Anglesey, and Beatrice, elder daughter of the late Charles B. Lucy and of Mrs. Lucy, of High-Meadow, Cloughton, Birkenhead.

The engagement is announced of Captain Leslie Eric Barton, I.A. Foreign and Political Department, youngest son of the late Mr. William Barton, of Preston Deanery, Northamptonshire, and of Mrs. Barton, of Bexhill-on-Sea, and Mary Francis, only daughter of the late Mr. Maurice Dominick Daly and Mrs. Daly, of Cleve Hill, Cork, Ireland.

A wedding has been arranged and will take place in June between John Francis Clare O'Brien, Captain, late Royal Engineers, of the Egyptian Civil Service, younger son of Lieutenant-Colonel Sir Charles R. M. O'Brien, K.C.M.G., Governor of Barbados, and Esther Mary, eldest daughter of Charles Frederic Milward, of The Leys, Alvechurch, Worcestershire.

Mr. A. D. Home, Sudan Political Service, H.M. Consul for N.W. Ethiopia, removed in March the Consulate to Dangila in the north of Agaumdir. Agaumdir is included in the territories ruled over by Ras Hailu, Governor of Gojjam. Hitherto the residence was at Gondar, the capital of Abyssinia prior to its partial destruction by the Emperor Theodore.

It is stated that the marriage of King Alexander, King of the Serbs, Croats, and Slovenes, with Princess Marie of Roumania, will now take place on June 8 instead of the 1st of this month, as previously arranged. The Duke of York, who will attend the wedding as the representative of King George and Queen Mary, had arranged to leave for the Serbian capital on May 27, but it was announced last week that the departure of his Royal Highness has been postponed until Saturday next.

Bishop Marsh-Edwards, of Ringwood, has undertaken the work as honorary secretary of the "Syrian Patriarchate Educational Fund," in succession to the late Mrs. Finn, of Kensington (who was the widow of a former Governor of Jerusalem). The object of the fund is to provide monetary assistance for the furtherance of

THRESHER & GLENNY.

education in the schools with the Patriarchate, and for the provision, when possible, of funds to enable candidates for Holy Orders to continue their studies at our Universities.

The Annual General Meeting of the Lebanon Hospital for Mental Diseases, Asfuriyeh, near Beyrouth, will be held at the rooms of the Royal Society of Medicine, 1, Wimpole Street, W.1, to-day (June 1). Tea will be served at 4 p.m., and the meeting will follow. It is hoped that the following, among others, will be present: Sir Robert Armstrong Jones, Dr. E. W. G. Masterman, Dr. Bedford Pierce, Dr. A. T. Schofield, Dr. Fortescue Fox, Mr. C. E. Mott, Mrs. Arthur Buxton, Lady Scott Moncrief, and Miss Gibb (the Matron).

Our Port Said Correspondent writes (May 15):—Brigadier-General Sir Gilbert F. Clayton Pasha, K.B.E., C.B., C.M.G., late Adviser to the Ministry of Interior, left Port Said last night on the Bibby s.s. 'Leicestershire.' He was officially received at the station by the Sub-Governor Hussein Bey Sabri, and Archer Bey the Commandant of the Suez Canal Police.—His Excellency the Governor Mahmoud Sidkey Bey having travelled down with him. Sir Gilbert was invited to a reception in his honour given by the Governor, when various representatives of the Government Departments here came to bid farewell. Among others who came down to Port Said to see him off was Sherei Pasha, a large landowner in Minieh Province, and a personal friend of Sir Gilbert Clayton. His departure will be much regretted by large numbers in Egypt, and not least by the many Egyptian officials of all grades who had relations with him in his official as well as private capacity.

SIR PERCY SYKES ON CYRUS.

Lecturing before the Persia Society (at 74, Grosvenor Street, W.) on May 24, Sir Percy Sykes described the career of Cyrus the Great. Among the very great figures of history, there was perhaps no one, he said, about whom we had learned so much in comparatively recent times. Previously all our information had been obtained from the writings of Herodotus and the Holy Scriptures, but quite recently a cylinder had been found called the cylinder of Nabonidus—the last of the Babylonian emperors—saying that he had marched his troops against Cyrus, King of Anshan. This had led to further search, other cylinders had been found, and it had been proved that the original founder of the Achaemenian dynasty had had a son, who had conquered a great deal of Elam and made it into a province called Anshan. Thus there had been a double line of kings and it had been as Prince of Anshan that Cyrus had made his entry into the world's history.

Having briefly recounted the story of Cyrus's earlier conquests, the lecturer told the story of the war against Babylon. When the city fell Cyrus rewarded those who helped him, amongst others the Jews. Those who so desired were sent back to Jerusalem. One reason for this probably was that Cyrus intended to attack Egypt, and desired to have a strong party in Jerusalem favourable to himself, Jerusalem being on the borders of the desert going to Egypt. Connected with the fact of Cyrus's favourable attitude towards the Jews was the other fact that throughout the Bible the Persian Empire was never condemned to Hell as were those of Babylon, Assyria and Elam again and again by the Hebrew prophets—who were, it was to be remembered, the political as well as the spiritual leaders of their people. Cyrus enjoyed the unique position of being highly praised in Holy Writ and also by the Father of History. He was a splendid character. Soldiers would appreciate the daring of the man who, when he undertook the conquest of Lydia, had marched a thousand miles from Hamadan into Asia with a hostile Babylonia on his flank and, very possibly, a hostile Egypt as well. As a man he had been reasonable, accessible and of high ideals, one of his maxims being that no man should rule unless he was proved to be abler than the people he ruled over. Xenophon said of him: "Cyrus was able to inspire all with so great a desire of pleasing him that they ever wished to be governed by his opinion."

Among the lantern slides with which the lecture was illustrated was one showing the tomb of Cyrus as it existed thirty years ago. The picture showed a small bush growing out of the tomb. This bush, said Sir Percy Sykes, had become a large tree in 1916, whose roots were thrusting asunder the stones of which the tomb was built, so that water was getting in. The tomb would have been rapidly destroyed; he saved it by having the tree removed.

THE MOSLEM FESTIVAL AT WOKING.

On May 28 at the Mosque, Woking, the Moslem Festival of Eid-ul-Fitr-Kuchich (Little Bairam) was observed. Among those who attended were Lord Headley, the Princess Aziz and Sadiq of Mongrol, the Afghan Minister, the Turkish Charge d' Affaires, the Chief Secretary of the Persian Embassy, the President and Secretary of the Palestine Delegation, the Nawab Sahib of Tohrul, and representatives of Mejaz and Irak. Moslems from Arabia, Syria, India, America, Afghanistan, Turkey, China, and Java constituted the congregation. Khwaja Kamal-ud-Din, the Imam of the Mosque, who conducted the service, delivered the address, in which he said that things created were sustained, and brought to their final perfection under a perfect system of laws and regulations, which he would sum up under three heads: the law of creation, the law of sustenance, and the law of evolution, and Allah was the creator, sustainer, and evolver of the various worlds around us. That mysterious power was the same as the laws and forces of nature, which worked as did the Creator, and so it was that science and religion were in perfect harmony. He exhorted his hearers to study the Koran, on every page of which was inscribed the name of Allah reproduced in 99 forms, each one of them representing his various attributes. If they lived up to these attributes their morality would be secured; to deviate from them would be to tread the path of sin. As God was merciful, so let others be merciful to others, even though they were not of their nationality.

THURSDAY, JUNE 1, 1922.

A SETTLEMENT OF THE TURKISH QUESTION.

Under the heading "The Turkish Orthodox Church," Dr. W. A. Wigram contributed in last week's issue of *THE NEAR EAST* an important article on the Karamanlis, a little known body of Turkish Christians in Anatolia. It appears that the Angora Government, satisfied of the *bona fides* of their sense of Turkish nationality, but confronted with the tenacity with which they have clung for centuries to the Christian faith, is encouraging these Karamanlis to form a Turkish Orthodox Church of their own. Already they claim two hundred "churches" and five hundred priests, under the government of "four priests, endowed with the power of canonically ordaining the Bishops and performing episcopal functions." One of the four priests is "Archbishop" of Kaisariéh. Dr. Wigram embodied in his article a fund of information regarding these Turkish Christians, and is, no doubt, right in hinting that there is much in connexion with the new Church that might not satisfy an ecclesiastical purist. The importance of the establishment of a Turkish Church, however, is obvious. Inasmuch as the movement originated with or has the approval of the Turkish authorities—for the present the Angora Government; because the jurisdiction of Constantinople does not extend to Anatolia—it suggests that the quarrel of the Turks with their Christian subjects is based not on religious, but on political grounds. That this is so has long been known to those more intimately acquainted with Turkish affairs. Dr. Wigram himself bears witness to the fact. He writes: "On the existence of his right to exterminate an element that he counts dangerous to his rule, the Turk is neither civilized nor civilizable. He is like a man, otherwise sane, who is mad on one point, and with whom it is a waste of time to argue on that point. The more polished and attractive the individual Turk, the more efficient and merciless he is in massacring the inconvenient. . . . But the Turk is also a kindly gentleman, when he does not feel cause to fear: he has some wish to stand well with Europe, to be considered civilized, to persuade statesmen to acquiesce in his abolition of the Capitulations, and he knows that if you are in the habit of murdering your own subjects, it is difficult to ask European Powers to leave such of their subjects as reside in Turkey unprotected in your hands. Therefore, he will not massacre, unless he sees reason; and if he sees that his Christian subjects are 'Turks' and not Greeks, it is possible that he may not massacre."

Dr. Wigram was thinking of the Karamanlis only. To ask the Turks to extend the rights of civilization to Armenian or Greek now, he wrote, "is like asking one of Alva's officers (right gallant and polished Spaniards all of them) to spare the rebel and heretic Hollander." But does it necessarily follow that the Turk can never be rid of his fear of the Greek or Armenian? He could

be, we are confident, if the Allied Governments had the least knowledge of the psychology of the peoples of the Near East and would apply it in a settlement of the Turkish question. There was a time when the Armenians were sufficiently contented under Turkish rule to aim at carrying out their political development within the Ottoman Empire. It was the period when they supplied the Sultan with his most intelligent and most trustworthy officials. "The sword to the Albanians, the pen to the Armenians" was the formula of the Turkish administration of those days. Then came Russia's interest in the Caucasus, and she appeared as a rival of Turkey for Armenian support. Great Britain could not afford to be outstripped by Russia as a champion of oppressed nationalities, and she too took up the cause of reform in Asia Minor. The Armenian movement, which originally in the hands of the Armenians themselves meant no harm to Turkey, assumed a different complexion, and was organised for revolution. Abdul Hamid became suspicious and then alarmed; the hideous massacres followed, and the Great Powers, which had done so much to bring them about, were powerless then as they are to-day when Turkey's victims are Greeks. On every single occasion when massacres have taken place in Turkey during the last hundred years—and the list is an appalling one—the motive can be shown to have been fear (which may sometimes go masked under the euphemism "military necessity") and not, as is generally supposed, religious fanaticism. It is at least arguable, therefore, that, if the Allied Powers can convince the Turks that they have nothing to fear from their non-Turkish fellow-subjects, an effective safeguard will have been found for minorities in Turkey.

The problem, then, for the Allies is to eliminate irredentism from Turkish territory. They have failed in the attempt to do this by handing over tracts of Turkish territory to Greeks, and it looks as if they must fall back on the device of guaranteeing Turkish integrity at least for a number of years. There is no room for sentiment in tackling the problem; only a matter-of-fact solution will avail. In this connexion it may be well to bear in mind the Turkish Orthodox Church. When the Greek Patriarchate has adjusted its political squabbles over Royalism and Venizelism, and settled down to a more dignified interpretation of its religious role, it might not be too much to ask of it that it should devote its great influence to establishing and maintaining peace between Greeks and Turks in Turkey. Its first step should be to extend the hand of fellowship to the Turkish Church, welcoming it as a useful factor in establishing better relations between the ruling race and the Christian minorities. Apart from any higher motive prudence should prompt those minorities to give the new régime in Turkey a fair chance. Greece has shot her bolt as far as the coercion of the Turks is concerned, and the Allied Powers have shown that they will not take on the task themselves. It may be that the Turk is incapable of reform, and that the fact will once more be established beyond all challenge within a few years. By that time the Balkan States may have lived down their present-day bitternesses and be ready again to combine against the Turks. The idea embodies a far more practical proposition than any available to-day, and has the double advantage of insuring peace at once in the Near and Middle East, of which all the nations concerned stand in such urgent need.

TRAVEL NOTES.

EGYPT AND THE SUDAN.

Railway Traffic and the Suez Canal.

A recent paragraph in "A Londoner's Diary" in the *Evening Standard* suggests that up-to-date notes on travel in the East may possibly serve a useful purpose. Under the heading "Tourists in the sand" the writer of the Diary tells of a friend "just back from Jerusalem" who "was mourning over a little difficulty that has cropped up." The bridge thrown across the Suez Canal during the war, he states, "is being removed, so that tourists from Cairo desiring to do the overland route have some seven miles to traverse across sand getting from one railhead to another." I doubt whether this picture was ever quite true. To-day in any case it is a complete anachronism.

—o—

The railway bridge across the Suez Canal at Kantara was removed actually last year. Between Kantara West, where the Cairo-Port Said trains now stop, and Kantara East on the other side of the Canal there is very little more walking to be done than the actual length of the pontoon bridge on the water; there are the Customs sheds to be negotiated, it is true, but at a guess I should say that the length is not greater than that which separates the steamer and train at Dover.

—o—

There was no justification for the removal of the railway bridge, and we may be perfectly sure that, if France had occupied the position that is Great Britain's in regard to Egypt and Palestine, the French majority

In the Temple Area of Karnak.

on the Suez Canal Company would never have thought of insisting upon the bridge being taken away. The inconvenience entailed by their high-handed action is not quite so great as suggested in the *Evening Standard*, although enough to cause the Company to be anathematized by travellers, who would otherwise be able to take a through carriage from Cairo to Jerusalem or *vice versa*. As things are the journey is broken at Kantara West, passengers cross the Canal on foot, and only at Kantara East can they join, if they wish to do so, a Wagons-Lits coach for Jerusalem.

—o—

Luggage is transferred at a charge of two piastres each package. One effect of this tariff and of the absence of supervision is to encourage the Egyptian porter to collect the luggage of as many passengers as possible, regardless of the time he may keep any of them waiting. A certain amount of wholesome discipline would enable parties to cross the Canal more expeditiously, and would perhaps be better for the luggage. But the major desideratum is that the railway bridge should be replaced, and it is to be hoped that pressure will be brought to bear upon the Suez Canal Company to allow this to be done before long.

The Journey to Khartoum.

After this digression I return to the point at which these Notes were broken off. In connexion with Luxor it is permissible to express one's regret that the public-spirited action of Lord Carnarvon in carrying out further excavations among the Tombs of the Kings should have recently met with such scant success. For two seasons, I understand, no discovery of importance has been made. Digging continues, however, unremittingly, and visitors to the Tombs are fascinated

The Ramasseum at Thebes; built by Ramses II., part of whose colossal statue is seen lying on the ground.

as they watch the human dredger at work—an endless chain of natives toiling with their panniers of soil or rock to the top of the dump where the contents are tipped out, and hurrying down again to repeat the operation.

—o—

Between Luxor and Assouan there are at least three places worthy of separate visits—Esneh, Edfu and Kom Ombo—but as a rule they will be made to serve as special excursions from one or other of the termini of this stretch of narrow-gauge railway. At Kom Ombo there is a temple for those who are not already surfeited; those who are not ashamed to confess to a strain of materialism may be even more impressed by Kom Ombo's entirely modern monument—the sugar factory. It is not actually the largest of those belonging to the Société Générale des Sucreries et de la Raffinerie d'Egypte; but it has, perhaps, the most imposing setting of any, for the close proximity of the desert in all its unredeemed bareness serves to enhance the particularly luxuriant growth of the cultivated area.

—o—

Assouan.

Not the least charm of Assouan is the fact that its scenery presents an abrupt contrast to that of the rest of Egypt. It is still the battlefield, as it were, of those two irresistible forces, the Nile and the granite hills that sought to bar its way. To the primeval wildness of this spot on the earth's surface the river has added its picturesque touches, while over both the brilliancy of Egypt's sky sheds a radiance of its own. At first sight the rigid rectilinear severity of the Assouan Dam might be held to be wholly incongruous in such a setting; its very stupendousness, however, saves it, and the genii of the spot, I fancy, for all their fury at the first desecration of their solitude, have learned to think kindly of the intruders who conjure out of that massive rampart the roaring torrents that rush in angry disorder under rainbow arches in the floating spray. *Pace* the genii, however, Egypt or Great Britain or both will have made only a half-job of it until the huge volume of water that passes through the sluices of the Dam is utilized for power purpose. No one will want to see the scenery spoiled by unsightly power stations; but it should be possible to harness the energy available without creating eyesores in the way of buildings inappropriately placed.

A short run of twenty-five minutes brings the traveller from Assouan to Shellal, passing through the granite quarries which supplied so many of the Pharaohs with material for their temples and statues. At Shellal the Sudan Government steamer is awaiting a train, and the most attractive part of the journey begins. The boat is as comfortable as one could wish it to be; the scenery never lacks interest for a moment, and one's only regret is that this part of the journey should last for little more than thirty-six hours.

—o—

For half the distance between Shellal and Wadi Halfa the influence of the Assouan Dam is reflected in the appearance of the Nile. Villages are seen on the edge of the river or even in it. The land that was formerly cultivated has been sometimes entirely covered with water; in other cases a strip just above the level of the river has been saved. Where required the villages have been rebuilt at Government expense on higher ground, and liberal compensation was invariably paid. So liberal indeed must it have been that the villagers would seem to be living on it still; for often it is difficult to discover any other means of livelihood, when the new dwellings have been perched in the midst of a particularly barren stretch of ground. We are passing, however through Berberine territory, the chief and best source of Egypt's native servants. The able-bodied men repair to Cairo and other towns for domestic service, leaving their womenkind, the older men and the children to eke out a meagre existence at home, supported, no doubt,

A Sudan Government Steamer, between Shellal and Wadi Halfa.

by some of their savings, until such time as they themselves return for good, with wonderful tales of the big city, and such objects of admiration in the way of table linen and cutlery as they may have been able to glean as the fruits of close attention to their work.

—o—

The white plates let into the walls above the doorways have a more legitimate origin. There is a neatness about the villages with their four-squared houses which bespeaks a well-ordered if not an actually prosperous community. Occasional boats hugging the banks are a reminder of the part naturally played by the river in the country's communications; indeed the whole trip from Cairo to the frontier brings home to one with much emphasis the fact that Egypt is the Nile and the Nile Egypt. In many parts of the river journey the cultivated area must be too restricted to provide for much more than the immediate wants of the owners; the domestic animal is not much in evidence, women predominate as far as can be judged from the signs of life revealed to the passenger on the steamer. Even to these remote spots the great controversies of the day have penetrated; but female emancipation and the length of skirts have been merged into one and the same question. It has been solved. The greater the measure of emancipation from male thralldom, the longer the skirts—for the very good reason that a trailing robe obliterates footprints in the sand. Why should a husband know where his wife goes?

—o—

At Wadi Halfa the traveller enters the Sudan. One is struck at once with a difference in the moral atmosphere from that of Egypt, and it is borne in on one the more one sees of the Sudan. The native shows a greater measure of self-respect than his counterpart of Egypt, and for this the Administration deserves full credit. The first notice that meets the eye on leaving the steamer at Halfa is sufficiently arresting—no tips are to be given to the porter conveying luggage from the boat to the train. What lies behind it cannot be better expressed than in the official notice:—

Travellers, while in the Sudan, are particularly requested to refrain from gaining an easy reputation for generosity by giving money to children, beggars or other people who have not earned it. At present the population of the Sudan has not been demoralised by indiscriminate almsgiving, but it will not require much of this to make the demand 'bakshish' as importunate and annoying to travellers as in Egypt itself, and cause a considerable number of natives to forsake the paths of honest industry for the unwholesome existence of preying upon others.

The Governor-General trusts that all travellers will consider this as a personal request from himself, and at the same time would inform them that if they desire to give any money for the benefit of the inhabitants, contributions for hospitals or relief of deserving cases amongst the poorer classes will be carefully administered by the Governors, and that he himself will gratefully receive contributions for what is the Sudan's greatest need, viz. EDUCATION.

ARMENIANS AND ANGLICANS.

The Archbishop of Canterbury has received a specially illuminated letter from the Catholicos of all the Armenians, together with the Patriarchal Decoration of the First Order of St. Gregory, the Illuminator. This letter and decoration have been presented by the Catholicos, as the head of the whole Armenian people, in token of the gratitude felt by the Armenians for the sympathy shown by the Archbishop of Canterbury, in the words of the Patriarchal letter, "towards the chronic sufferings, persecutions, and martyrdom of the innocent people of the land of Armenia and of our Church in the East." The formal presentation to the Archbishop was made by Dr. Abel Nazarian and General Bragatouni in Lambeth Palace Library last week.

NOTES AND NEWS.

Devonshire Square
E.C. 2.

Yugoslav Loan Negotiations.

The course of Yugoslavia's loan negotiations is apparently proving anything but smooth. The news a week ago was to the effect that a loan had been definitely arranged with an American group, and that the signatures of the parties were alone required to complete the agreement. From our Belgrade Correspondent's despatch this week it will be seen that there has been a hitch in the negotiations over the question of the terms of the loan, which the Americans, it is reported, desire to vary in their favour. Meanwhile another group has entered the field with a more favourable offer, and it would seem probable, therefore, that, unless the first group is prepared to recede from its position, the question of a loan will again be in the melting pot.

Bulgarian Reparations.

Bulgaria has been accorded a few weeks' grace for her reply to the demands of the Inter-Allied Commission. There has been a certain amount of doubt as to the attitude the Government would take up, but the latest reports suggest that the proposals will be agreed to, not very willingly perhaps, but because it is recognised that this course offers the best hope for the country's reconstruction. It is essential that Bulgaria should obtain loans for railway construction and similar projects, and it is beginning to be realised, our Sofia Correspondent points out, that there is no prospect of financial assistance abroad without the support of the Inter-Allied Commission. The experience of some of their neighbours, who are unhampered by reparations, has no doubt helped to convince them on this point.

Egypt's Trade Position.

Elsewhere will be found particulars of Egypt's trade during the first quarter of this year. There was a large increase in exports and a considerable decrease in imports with the result that the adverse balance of trade for the corresponding period of 1921 of £E.10,447,000 has been turned into a favourable balance of £E.3,339,000. From the financial point of view the decrease in imports is unsatisfactory, our Cairo Correspondent points out, as it means smaller revenue receipts, but on the other hand the alteration in the trade balance means a considerable strengthening of the country's position economically. Whether the present state of things will continue will depend on a number of factors, the most important being the demand for cotton, and as regards imports the extent to which it is necessary to replenish supplies. These and other contingencies make the economic outlook somewhat uncertain.

Egyptian Markets.

While the past year—despite the unsettled position—was a satisfactory one for the Egyptian Markets Ltd., the chairman, Lieut.-Colonel A. St. John Cooke, D.S.O., made it clear in his speech at the general meeting that the current year has commenced under not very favourable conditions. The company has been

suffering, he pointed out, from the attempt organised to boycott British institutions and goods; and at one time as many as 48 of their markets were closed for varying periods of time. "At the beginning of this month we were informed," he added, "that all of these, with the exception of six, had resumed business, to the great relief of the bulk of the population and the merchants using our markets. I am glad to say that a telegram has been received this morning which says all markets have now come in except Shandawil, so that that is better than we had really anticipated." The effect of the boycott was a diminution of receipts up to May 13 of £8,175, but Colonel Cooke expressed the hope that this deficit would be reduced before the close of the year.

The Trade Outlook.

The trade position at the present time does not admit of easy generalisation. There is beyond question an improvement, but it is not universal, and while some trades are able to report a better demand abroad, others have the opposite story to tell. Definite success at Genoa would have been quickly reflected in the trade returns, and the moderate results of that conference will, it may be feared, leave commerce much where it was. Trade can only flourish where there is unmitigated confidence, and that there cannot be until it is established beyond a peradventure that the world is really settling down again after the disturbing effects of war. As it is, the tendency is to take no risks, and to wait on events. In other words, traders in all countries are looking to the politicians, and on their capacity to effect a settlement of outstanding questions depends the development of commerce and the solution of the problem of the exchanges. Perhaps what was impossible in the atmosphere of Genoa will prove more possible of accomplishment in the more practical surroundings of The Hague. It is profoundly to be hoped so, for the world, as I have pointed out before, is not in a position to endure indefinitely a state of economic stagnation. That way obvious dangers lie, and it is in the interests of all that the path of trade endeavour should be reopened at the earliest possible moment.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

EGYPT.

Cairo, May 20.

Improved Economic Position.

From the purely economic point of view the statistics of the foreign trade of Egypt for the month of March just published show a marked improvement. The total imports for the first quarter of the year amount to L.E. 10,496,000, which is L.E. 8,900,000 less than at the same date in 1921. Exports amounted to L.E. 12,500,000 as against L.E. 6,500,000 and re-exports to L.E. 1,335,000 as against L.E. 2,403,000. There is, therefore, a trade balance of L.E. 3,339,000 in favour of Egypt as compared with an adverse one of L.E. 10,447,000 at the end of the first quarter of 1921. From the purely financial point of view as far as the Ministry of Finance is concerned this state of affairs is bad, as owing to the very much higher tariff on imports the large decrease in their value means a diminution in revenue receipts but as far as the economic position of the country is concerned the readjustment of the trade balance is a healthy sign.

Under imports the most important decreases were in meat, wheat, and wheat flour (of which 1,100 tons and 31,000 tons respectively were imported as against 36,000 tons and 112,000 tons in the first quarter of 1921); petroleum and oil-fuel, which decreased considerably in value but increased in quantity; coal and worked-iron and steel. The most important increase was in cotton textiles, which jumped from L.E. 1,400,000 to L.E. 1,900,000, and increased very considerably in quantity. (The items in which the greatest increases were registered were cotton piece-goods dyed in the piece and cotton piece-goods bleached).

Under exports eggs showed a marked increase as also did onions, cotton-seed, cotton-cake and, of course, cotton, which doubled in value and increased by 50 per cent. in quantity, a little over one-and-a-half million cantars being exported in the period.

The United Kingdom somewhat increased her share of imports, while those of the United States of America and Argentina showed a remarkable decrease owing to the falling off in wheat and wheat flour purchases. There was a slight contraction in the U.K. share of exports due to a smaller proportion of cotton purchases but the U.K. still takes the major share although the U.S.A. by comparison had a greater increase in its purchases.

Trade between Egypt and the Sudan was much reduced, imports into Egypt falling from L.E. 290,000 to L.E. 197,000 and exports to the Sudan from L.E. 740,000 to L.E. 391,000. The main causes of the decrease in imports into Egypt was a falling off in the cattle and a decrease in cereals, while sugar, flour and cotton piece goods were in the main responsible for the reduction in exports to the Sudan.

YUGOSLAVIA.

Belgrade, May 19.

Loan Negotiations.

The loan offer of Harington's and Blair's groups has been altered. The Americans are not content with 8 per cent. per annum, and demand a further 12 per cent. commission on all purchases effected in the United States. As it is stipulated in the contract that 70 per cent. of the gross value of the loan has to be spent in buying in the open market in America, it does not take long to see what this means. The verbal promise to keep the offer firm until the arrival of the Finance Minister was cancelled by some newly arrived delegate of the group.

A slight change in the situation may again be expected since a new group is making a more favourable offer. Colonel Kratz, representing some Canadian-American

group, is offering 100 million dollars at the issue rate of 87 at 7 per cent. interest per annum, the net amount being payable in cash. It is proposed that the loan should be secured on the Yugoslav River Syndicate and Monopolies, but that the group's representation on the boards of directors should only be in an advisory capacity.

The prolongation of the negotiations is having a very bad effect both on trade and the exchange. The tendency is still to unload stocks, but less so than before; while as regards the exchange everything is brought to a standstill, both sellers and buyers being equally afraid of any considerable transactions.

BULGARIA.

Sofia, May 17.

Reparations.

It is reported that the Inter-Allied Commission have granted the Bulgarian Government until June 30 to reply regarding Reparations. The Sobranje will be convoked on June 1, and as the Agrarian Congress will then have been held, the Government will have the whole of June to put into force the conventions demanded by the Inter-Allied Commission. This is assuming that the Government will accept the Commission's proposals. The indications lead one to believe that they will do so. They are gradually realising that without the support of the Inter-Allied Commission they will not be able to obtain a foreign loan. As soon as foreign bankers see that Bulgaria is going to behave sensibly it is possible that money for railway construction and other useful work may be found.

A Sugar Concession.

It is announced that a concession for starting a sugar factory at Provedia, a town near Varna, has been granted to Mr. Burt-Andrews.

Sofia, May 22.

Reparations.

The Inter-Allied Commission have just informed the Government that the Reparations Commission at Paris have agreed to grant a delay until July 20 for the reply regarding Bulgaria's Reparation payments during 1922. Needless to say this news has been received with much gratification. The Sobranje will be convoked on June 1, which will give ample time for discussion of the Commission's Note. Meanwhile the Commission are considering the question of the fiduciary circulation and also the new tariff charges.

Trade on the Danube.

A month ago the Austrian Danubian Shipping Company restored their transport service. Loads of merchandise not exceeding a wagon will be carried from Vienna as far as Rustchuk.

COMMERCIAL BANK of GREECE, Ltd.

CAPITAL PAID UP—Drs. 20,000,000.

RESERVE FUNDS Drs. 10123,920,45/00.

Head Office: ATHENS.

Branches:—Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Aegina), Nauplia, Larissa, Triccala, Mitylene, Canes.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:

The Bank undertakes the warehousing and sale of goods consigned

The Economic Resources of Palestine.

III.—THE COUNTRY'S POTENTIALITIES.

By LEONARD STEIN.*

(All Rights Reserved.)

An attempt has been made to sketch the economic situation exactly as it is, and the resulting picture is by no means impressive. It would, on the other hand, be a profound mistake to draw hasty inferences from a superficial examination of what are, in reality, transient phenomena. The present economic development of Palestine is far from being the measure of its economic resources. For a variety of reasons, many of which have already been alluded to, those resources remain largely untapped. To-day, however, Palestine is entering upon a new stage in its economic history. The dead hand of Ottoman misgovernment has been replaced by an enlightened and progressive Administration under British auspices. That fortunate change has been accompanied by what is at least equally important—the concentration upon Palestine of Jewish idealism, energy, and capital in a degree disproportionate to the intrinsic merits of the country from the purely economic point of view. Those merits are in themselves not negligible; and, supported by what may be called imaginative finance, the resources of Palestine may now be expected to be developed with more than normal completeness and rapidity.

The present agricultural production of Palestine is, as has been seen, comparatively small. But a glance at the recent report of the Government Director of Agriculture will show that of about two million hectares available for arable cultivation, the total area under annual cropping is only about half a million hectares. In other words, nearly seventy-five per cent. of the cultivable area is at most half-cultivated. This is partly due to the shortage of ploughing cattle, as a result of ruthless requisitioning during the war. But even if the cattle were restored to their normal numbers the uncultivated area would still remain a very large percentage of the whole. This view is fully confirmed by the recent report of the Official Land Commission, which showed that of the State Lands, Tribal Lands, and large estates, a very considerable proportion are quite inadequately utilized.

It should, moreover, be understood that these reports refer solely to Western Palestine. Gilead and Moab, with their healthy climate, their well-watered and fertile soil and their scanty population have a far greater future than all Western Palestine put together.

Nor, again, should it be forgotten that even the cultivated area is, as a rule, cultivated on a minimum scale. The experience of the Jewish and German Colonies has proved, as has already been shown, what can be achieved by irrigation, by fertilization, and by the use of agricultural machinery. These Colonies are, it is true, for the most part in the more favoured districts. It would be rash to assume that what is possible in the Plain of Sharon is equally possible on the stony hills of Judaea. Nevertheless, just as dry-farming has re-claimed the barren wastes of Tunis, so there is no reason why, under scientific cultivation, extensive areas in Palestine, which at present yield next to nothing, should not become vastly more productive than they are.

What is true of the plains and in part of the hills is also true of the Jordan Valley. The sub-tropical climate of the valley and its moist soil make it suitable for a number of commercial crops. Promising experiments have already been made in the cultivation of cotton and tobacco; and there are possibilities in sugar, and flax, as well as in maize, rice, and dates. So far from being utilized, the soil has hitherto been allowed very largely to run to waste and to lose itself in swamps. Drainage will not only add appreciably to the productive area but will also tend to render it habitable by extirpating

malaria. Work of this kind has already been done on a small scale near Beisan where the construction of two canals at a cost of £E.3,000 has drained a pestilential swamp and converted it into some hundreds of acres of fertile soil.

What is true of cereals and commercial crops is also true of fruit, vegetables and flowers, which Palestine is capable of growing in great variety and profusion. Fruit-preserving, tomato-canning, and the extraction of essential oils are industries which it should be possible to develop and for which a market could be found in Egypt and the Eastern Mediterranean. It has been found, moreover, as the result of experiments now in progress, that the Indian silk-worm thrives in Palestine, and the efforts which are being made to introduce the silk industry seem not unlikely to succeed.

The mineral resources of Palestine, with one important exception, to which reference will be made in a moment, appear to be inconsiderable. Even where minerals exist, it is in most cases doubtful whether they are present in payable quantities. There is, for practical purposes, neither coal nor iron. There are, however, traces of other minerals, some of which may prove to be worth exploitation. Near Es Salt, in Transjordan, there are asphalt deposits estimated at 144,000 tons. In the same area are phosphate beds, estimated at 150,000 tons, with a content of from 50 to 70 per cent. Again the waters of the Dead Sea show appreciable traces of bromide and potassium salts. They also contain magnesium salts in considerable quantities. A typical analysis of water lifted from a depth of 1,100 feet shows nearly 15 per cent. of magnesium chloride. There is rock-salt at the south-western extremity of the Dead Sea, and preparations are being made for the exploitation of another series of salt deposits near Haifa.

To the general poverty of Palestine in mineral resources the one possible exception is oil. In the neighbourhood of the Egyptian frontier, south-west of the Dead Sea, and finally on the opposite side of the Jordan Valley, the presence of oil is suspected. At the outbreak of war the Standard Oil Company was about to begin boring to the south of Hebron. These operations had to be suspended during the war. Further researches are now to be undertaken by the Standard Oil Company and other interested parties in various parts of Palestine; and should oil be found in substantial quantities, the economic future of the country will, for better or for worse, be very materially affected.

Whether Palestine has any great industrial future is doubtful. The existing manufactures are, as already seen, few in number and comparatively small in scale. The olive-oil and soap industry might be developed by the introduction of hydraulic presses, and certain agricultural industries might be introduced.

Fruit-preserving and vegetable-canning have already been mentioned. Similarly, the introduction of sugar and tobacco will naturally tend to be followed by the establishment of sugar-refineries and tobacco-factories. So, too, the increase of the cereal production will encourage the development of a milling industry. Palestine is at present in the paradoxical position of exporting Hauran wheat through Haifa and importing flour. A flour-mill on a large scale is already being built by Jewish enterprise at Haifa and is likely to be followed by others.

In the absence of coal, iron, and raw materials of primary importance in general, the development of large-scale industry in Palestine is improbable.

On the other hand, Jewish immigration, bringing with it capital, skilled labour, and a demand for goods and services on the European standard may be expected, in conjunction with the awakening enterprise of the non-Jewish population, to provide the foundation for a number of minor and local industries.

* This article contains the substance of a lecture delivered recently at the London School of Economics with certain modifications.

The developments outlined above are likely, in due course, largely to increase the economic importance of Palestine, not only as producer, but as consumer. Its ultimate demands cannot be foreseen but its requirements in the near future may well make it a market worthy of some attention. In addition to the cotton goods and food-stuffs at present imported, which will continue for some time to be in demand, a number of other commodities are likely to be called for shortly, as the economic development of the country proceeds. These include, in particular building materials, chemical manures, agricultural machinery, window-glass, motor transport, hardware and box-wood for the orange trade.

Two of the most valuable natural endowments of Palestine have designedly been left to the last—its hydro-electric resources and the Port of Haifa.

The economic future of Palestine depends largely on the use that is made of the falls of the Jordan and its tributaries and of the River Yarmuk, which flows into the Jordan from the east, to the south of Lake Tiberias. The rivers of Palestine, if fully utilized, are estimated to be capable of providing it with as much as one million h.p. of regulated energy and with sufficient water for the irrigation of a million and a quarter acres of land.

These are not mere visions. A scheme for the harnessing of these streams has been fully worked out by competent engineers. A concession has been applied for and obtained for the generation of electrical power, for its distribution throughout the country, and for the use of the surplus water for irrigation. The project will be executed by stages; and the first stage is likely to be begun within the course of the next few months.

Its effect on the economic future of Palestine is certain and self-evident. The provision of cheap and abundant electrical power will make possible an industrial development which would be wholly unattainable without it. It will not indeed make Palestine a manufacturing country in the Western sense; but it will vastly facilitate the development of local industries, including those connected with agriculture, and will give Palestine an appreciable advantage over most of its competitors in the Near East. On the other hand, in collecting water now running to waste and making it available for irrigation, it will replace the natural moisture, the loss of which has contributed so largely to the degeneration of Palestine during the past 2,000 years.

The other great natural endowment of Palestine is the Port of Haifa. If the economic future of Palestine is to be appreciated, it must be looked at, not only as a producer, but as an *entrepot* and an intermediary between Europe and Asia. Situated as it is half-way down the coast of the Eastern Mediterranean, on the highroad between Egypt and Syria, and with the vast hinterland of Transjordan and Mesopotamia at its back, Palestine has exceptional facilities for securing access to the expanding markets of the Near and Middle East.

For the trade of those markets the natural gateway is the Port of Haifa. The Bay of Acre, at the southern end of which it lies under the shelter of Carmel, has a shore-length of 13 miles. It is already the terminus of railways converging upon it from the south and east, and connecting it, not only with Egypt, Syria, and Arabia, but also—*via* Damascus and Aleppo—with the Baghdad Line and the vast hinterland it serves. The facilities at present available are rudimentary. The execution of harbour-works was, however, foreshadowed by the High Commissioner in his inaugural speech of July 7, 1920, and is not likely to be indefinitely delayed. Meanwhile, the more fully developed rivals of Haifa to the north are in a position to steal a march upon it; nor, indeed, could it in any event, hope for a monopoly in face of the competition of Beyrout and Tripoli.

Nevertheless, the natural advantages of Haifa are such that, coupled with the settlement of an enterprising and progressive population, they cannot fail in due course to give Palestine a pre-eminent place in the expanding *entrepot* trade of the Eastern markets, and to make it the terminus of the pipe-line which will one day carry westwards the output of the Persian and Mesopotamian oil-fields.

It will be seen from what has been said that while on the one hand Palestine is not without valuable resources of its own, it is, on the other hand, not so richly endowed by nature that it can attain a vigorous economic life of its own momentum. The full development of its potentialities will demand exceptional devotion and energy. There is, fortunately, reason to hope that these will be forthcoming. The presence of a British Administration and the release of Palestine from Turkish misgovernment will in themselves put new heart into its people. To this must be added what is the characteristic feature of the new régime—the concentration upon Palestine of Jewish idealism and enterprise in the conviction that its development is, for the Jews, the translocation of spiritual values into terms of economic reconstruction.

British Consular Reports.

II. BUNDAR ABBAS.

(Concluded)

IMPROVEMENT IN IMPORTS AND EXPORTS.

We give below some further extracts from the report on the trade and commerce of Bundar Abbas for the Persian year ended March 20, 1921, by H.M. Consul at Bundar Abbas, Mr. A. W. Fagan, I.C.S. :—

The main routes to Kerman are three, namely in Sirjan, Baft, and Jiruft. The South Persia Rifles authorities undertook the construction of a motor-road between Bundar Abbas and Kerman by the Sirjan route, but the work was abandoned when nearing completion and the sections of road completed are now fast falling into disrepair. The presence of troops on this road has led merchants to utilize it from considerations of safety, but it is normally the least favoured of the three routes owing to its length, the roughness of the earlier stages and the proximity of the robber tribes of Fars. The Baft route, the shortest and the roughest of the three, has been protected by *tufangchis*, Rifle men paid by the South Persia Rifles, and is the road most generally used by caravans. It is also the post road between Bundar Abbas and Kerman and the post mules do the journey in 10 days on an average. The telegraph line to Kerman follows this route, and telephonic communication is possible departmentally as far as Baft (at a distance of about 180 miles). The Jiruft road is longer, but not quite so steep as the Baft road. It is unguarded, but is farther removed from the haunts of the marauders from South-East Fars.

Trade.

The period of the war was one of unparalleled prosperity for Bundar Abbas. The closing of the Bushire-Shiraz road by the lawless tribes of Tangistan and Fars made Bundar Abbas practically the only gate of South Persia, while the presence of British Indian troops and the formation of the South Persia Rifles served to maintain comparative security on the main routes to the interior, a most necessary condition in the development of local trade. Low rates of foreign exchange prevailed, which benefited the Indian importer enormously, and of which he took the fullest advantage. The telegraph line between Bundar Abbas and Kerman was completed in 1917 and a branch of the Imperial Bank of Persia under a European manager was opened in 1918, and both these factors have materially contributed to the prosperity and development of the trade of Bundar Abbas.

The statistics for the year under review (1920-1921) show the total imports as more than treble those of 1913-1914, and the total exports as more than double the total exports of that year. The total imports for 1920-1921 are less however by about 13 per cent. than those of 1918-1919, and by about 19 per cent. than those of 1919-1920, while the exports show a steady increase every year. The first two quarters of 1920-1921 were very prosperous, but were succeeded by a period of depression which culminated in a financial crisis at the end of 1920. The crisis appears to have been caused partly by the general economic depression all over the world, partly by the rise in the rate of exchange, and partly by the fact that the market had been heavily overstocked.

Imports and Exports.

The following is a brief summary of main articles imported and exported :—

Imports. German beer has been replaced by British and Japanese beer, but the former seems to be more popular. Both are mainly imported from India and the returns of the last three years show an enormous increase on those for 1913-1914. There has been a big increase in brandy, rum, and whisky since 1913-1914, and 1920-1921 shows an advance on the two previous years. Imports are divided between India and the United Kingdom in the ratio of 2 to 1. There is a large increase on the 1913-1914 figures for wheat and flour, but much less was imported in 1920-1921 than in the two preceding years. This is partly due to a good harvest in the country and partly to the control of exports from India, grain being sold for export in Karachi only in limited quantities and only to holders of licences. The local supply is primarily supplemented from the Bushire district. Sugar, both loaf and soft, has been imported in far greater quantities than in 1913-1914, and 1920-1921 shows an advance on 1918-1919 and 1919-1920. The market has now been over-

stocked and the consequent fall in prices has hit the importers very hard. Eighty per cent. of the loaf sugar comes from India 7 per cent. from Belgium, and the remainder from Egypt and the United Kingdom, 95 per cent. of the soft sugar comes from India and 5 per cent. from Java.

Cotton piece-goods form 41 per cent. of the total imports for the year under review. The figures for 1920-1921 show an increase of 300 per cent. on those of 1913-1914, but a decrease of 19 per cent. on 1918-1919 and of 45 per cent. on 1919-1920. Ninety per cent. of the total is shown as coming from India, while the return for the United Kingdom in 1920-1921 is about 1-74 of that for 1913-1914, 1-93 of that for 1918-1919, and $\frac{1}{4}$ of that for 1919-1920. About 2-3 of these goods were probably manufactured in the United Kingdom, but purchased from India, and the remainder are mainly of Indian manufacture with perhaps a very small proportion made in Japan and America.

A very great decrease is shown in the imports of yarn and twist of the past three years as compared with those of 1913-1914, and the reason for this seems to be the slump in the carpet trade during the war, and the consequent accumulation of stocks for export. The importation of silk and silk piece-goods has increased greatly in 1919-1920 and 1920-1921. The increase in the importation of mercery and hardware is due to the assimilation of European tastes and customs among the better classes and the consequent growth of a more modern pattern of shop. There is a great increase in the import of tobacco, both manufactured and unmanufactured, but the returns for the former now exceed those for the latter, which was previously more in demand.

Exports. The only products of the Bundar Abbas district, which are exported, are dates and henna, which come mainly from the Minab district on the eastern borders of the Bundar Abbas area. Statistics show a very great increase in the export of dates, the amount being almost equally divided between Oman and India, and in 1920-1921 represented 10 per cent. of the total exports. Henna (classified under dyes, colours and paints) also shows a very substantial increase, the largest quantity in the last two years being exported to Mesopotamia, with Oman and India ranking second and third respectively. Carpets formed 31 per cent. of the total exports in 1920-1921, and are manufactured almost exclusively in Kerman. Other exports are almonds and pistachios from the Sirjan district, representing 7 per cent. of the total exports in 1920-1921, Assafoetida from Lar 9 per cent., gum Tragacanth from Sirjan and Yezd 5 per cent. and raw cotton from Kerman and Rudbar 3 per cent. All these commodities show a very great increase during the past two years.

PORT SAID NOTES.

The Dredger "Ronaldshay."

(From Our Own Correspondent).

Port Said, May 15.

The magnificent liner Empress of Canada passed through the Canal last week on her way to the Far East, and residents in Egypt are only sorry that she will not come through regularly, as it would go some way towards solving the problem of getting home and out again. She is over 22,000 tons gross with a length of 627 feet and a breadth of 78 feet. She is one of the finest looking steamers that has been seen in the port for many a long day, and in spite of her great size she transited the Canal in perfect safety and in something under average time.

A few days ago a floating object came into the harbour which would have made a good subject for a guessing competition. She turned out to be the dredger Ronaldshay, destined for Calcutta for use in extending the canal system of the Gangetic basin. She appears as if three separate hulls were joined together and underneath are six powerful circular cutters which will eat into practically anything, and between each pair of cutters there is a suction pipe, which draws up the loosened debris into a cistern aboard, from where it is discharged over the quarters in two flexible pipes to the shore, so that not only does she eat a channel but throws up banks on each side as she goes along. The contract specification was that she should cut a channel fifty feet wide and ten feet deep and excavate four thousand tons an hour. However, on her trials she did the extraordinary performance of throwing up ten thousand tons per hour, upon which result the designers and builders deserve the highest congratulations. For propulsive purposes she has three propellers, and is also fitted with three rudders working in unison.

Every pioneer ship has a sentimental, if no other, interest, and the advent of the oil-tank Paul Paix last week was an interesting occasion, for she was the first ship to be built on the Isherwood system of construction. At her launch there was much shaking of heads, and much prophesying that she would immediately break her back. However she is still going strong, and the system is now well established in the engineering world. The only thing that can be said against the ships is that they do not stand torpedoing as well as the ships built on the old conventional lines. However, we hope that that contingency will be a negligible one for many years to come.

The only man-o'-war at present in port is H.M.S. Seraph. H.M.S. Caradoc having left for Alexandria, and according to latest reports is not expected to return here.

Yesterday the City of Auckland homeward bound, got ashore in the harbour for several hours owing to the non-functioning of her steering gear. She was however refloated with the aid of the Canal Company's powerful tug Titan. It is not anticipated that there is any serious damage.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Vindelia for Bombay (Liverpool, June 3).

Anchor Brocklebank Line.—S.s. Maidan for Port Said, Colombo, Madras and Calcutta (London, June 6); s.s. Manipur for Calcutta (Birkenhead, June 10); s.s. Maihar for Port Said, Colombo, Madras and Calcutta (London, June 20); s.s. Manaar for Calcutta (Birkenhead, June 22); s.s. Malancha for Calcutta (Birkenhead, July 1); s.s. Malakuta for Port Said, Colombo, Madras and Calcutta (London, July 4).

Bibby Line.—S.s. Warwickshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, June 7); s.s. Arracan for Rangoon (Middlesbrough, June 10); s.s. Leicestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, June 21).

Clan Line.—S.s. Clan Monroe for Colombo, Madras and Calcutta (Birkenhead, June 1); s.s. Clan Macmillan for Bombay and Persian Gulf (Birkenhead, June 12).

Cunard Line.—S.s. Brescia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice, Trieste, Fiume and Gravosa (Swansea, June 13).

Ellerman Line.—S.s. Gerano for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, June 16); s.s. Flaminian for Gibraltar, Melilla, Malta and Alexandria (Liverpool, June 21); s.s. Andalusian for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, June 22).

Ellerman's "City" Line.—S.s. City of Cairo for Calcutta (Birkenhead, June 1); s.s. City of York for Calcutta (Birkenhead, June 15); s.s. City of Baroda for Calcutta (Birkenhead, July 1).

Ellerman's "Hall" Line.—S.s. City of Karachi for Bombay, Karachi and the Punjab (Liverpool, June 15).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, June 1); s.s. Pembrokehire for Port Said, Port Swettenham, Singapore, etc. (London, June 15); s.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, June 29).

Harrison Line.—S.s. Huntsman for Calcutta (Liverpool, June 15).

Henderson Line.—S.s. Amarapoor for Port Said and Rangoon (Birkenhead, June 14).

Holt Line.—S.s. Jason for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 1); s.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 8); s.s. Titan for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 15).

Johnston Line.—S.s. Pomaron, to be renamed Wraymore, for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, June 3); s.s. Cundall, to be renamed Willowmore, for Galatz and Braila (Liverpool, June 3); s.s. Incemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, July 5).

Papayanni Line.—S.s. Malatian for Malta and Alexandria (Liverpool, June 7).

P. and O. Line.—S.s. Mantua for Bombay (London, June 2); s.s. Nyanza for Colombo, Madras and Calcutta (London, June 16); s.s. Kaiser-I-Hind for Bombay (London, June 16); s.s. Novara for Colombo, Madras and Calcutta (London, June 29); s.s. China for Bombay (London, July 14).

P. and O. British India Line.—S.s. Mandala for Bombay and Karachi (London, June 2); s.s. Warfield for Colombo, Madras and Calcutta (London, June 10); s.s. Nevasa for Bombay and Karachi (London, June 16); s.s. Morvada for Colombo, Madras and Calcutta (London, June 23); s.s. Mantola for Bombay and Karachi (London, June 30).

Prince Line.—S.s. Black Prince for Tunis, Malta and Alexandria (Manchester, June 3); s.s. Syrian Prince for Malta, Alexandria, Syria and Cyprus (London, June 8); s.s. Sailor Prince for Tunis, Malta and Alexandria (Manchester, June 17); s.s. Tudor Prince for Malta and Alexandria (London, June 28).

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY.

KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.

Engineering Topics.

By Our Engineering Representative.

A Useful Cable Rack.

An accessory which is in considerable demand in all situations where electric power is being used on a large scale, and where it is frequently necessary to change the directions of the cables, as during temporary pumping or mining work, is a cable rack which can be easily fixed in place, quickly fitted with the cable supports, and as quickly dismantled and removed. The usual rough and ready plan is to sling the cables by means of rope or raw hide from any convenient support, but this plan is not to be recommended, and, where the labour is unskilled, it may lead to very serious trouble. A new form of rack has just been placed on the market by a leading British firm of electrical engineers which not only presents many advantages but has the added merit of being comparatively cheap. It consists of a back plate which can be fixed to any stone, brick, or wooden wall or partition, or can be spiked to a rock face. It is fitted with a central groove and a series of indentations, and for use with it a number of stout iron hooks of the removeable type are supplied. These can be dropped into place or taken away without the slightest trouble, and mention may be made of the fact that the racks are made for holding from two to six circuits of cables, ranging in cross-sectional area from $1\frac{1}{2}$ to 3 inches. The arrangement is stout, substantial, and to be thoroughly recommended.

Fuel Alcohol.

Considerably greater attention will have to be paid by British motor car manufacturers, especially those engaged in the production of engines and carburettors, to the need of markets abroad, ranging from those of the Near East to Australia and New Zealand. Information to hand from the United States, Cuba and several parts of Central America goes to show that there is a considerably increased production of power alcohol, coupled with a remarkable reduction in its price, and at the moment it is obtainable in quantities in many districts at a much lower price than petrol. It is startling to note that the United States has already made provision for this development and that motor cars are being sold in many markets with the necessary adjustments made for running on ordinary alcohol. Advertisements are appearing shewing that these American cars will give perfect satisfaction with the new fuel, and there is no doubt that unless our manufacturers follow suit we shall again be left behind in the race for commercial supremacy, whether the venue be the Balkans, or the Argentine. Our makers seem a little disposed to regard power alcohol as very much of a dream as a fuel, but so far from this being the case it may be mentioned that in one comparatively small district alone it is selling at the rate of 600,000 gallons per month for motor car use. Unfortunately in this country there has been a prejudice against its introduction; reports of various committees have declared against it chiefly on the ground that the raw material could be put to some use as food stuffs and as a result we trouble very little about alcohol and its wonderful possibilities.

A New Alcohol Report.

The interim report of the sub-section of the Empire Motor Fuels Committee is interesting although it covers much ground previously traversed. A leading engineering paper says it contains "some highly important information relating to the use of alcohol as a fuel for internal combustion engines." But what important information is still wanted? We know motor cars, motor boats, motor cycles, all internal combustion engines of that type will run perfectly well on alcohol; we may be academically concerned with the question of how it can be used most efficiently, what compression ratio is best, and a host of trivialities like that. But the real thing is that the engines will run on the fuel

and if we waste much more time in talk and reports the American cars will have obtained a firm footing on the market because they are being advertised as "the cars that will run on power alcohol." That's the whole point. Our development of engines, carburettors, fuel practice is as advanced as the American, and yet we make no advantage of it, preferring to waste precious time in waiting for reports which will contain valuable information. The only valuable information we need worry about is that the Americans are exploiting the new fuel and we are not.

COMPANY NOTES AND REPORTS.

India General Navigation.

The report of the India General Navigation and Railway Company for 1921 states that owing to political unrest in India culminating in the strike which completely disorganised the company's steamer services for six weeks in June and July, and to the general trade depression coupled with the enhanced cost of running the fleet the surplus in India was insufficient to provide the usual depreciation. In view of the large sums placed to reserve in recent years for such emergencies, the directors consider it right to draw upon the reserves to meet the deficiency. Accordingly £50,000 has been transferred from the reserve towards the depreciation for the year, while £10,000 has also been transferred from amounts specially set aside to provide for accumulated repairs to reduce exceptionally heavy charges under this head during the year. After making these adjustments there is the credit balance of £19,446, making with £26,139 brought in £45,584. The directors have transferred to the Debenture sinking fund £3,500, and recommend a dividend on ordinary shares of 4 per cent., carrying forward £10,210. Rupee items in the balance-sheet have been readjusted from 2s. to 1s. 4d. per rupee, the present position of exchange giving no justification for retaining the higher figure. £22,532 2s. 9d. has been transferred from the fleet replacement reserve to write down the unduly heavy cost of recent additions to the fleet, and this reserve will be further drawn upon during the current year to write down other vessels at present under construction.

Oriental Telephone.

The net profit of the Oriental Telephone and Electric Company for 1921 was £49,227, plus £10,492 brought in, making £59,719. The directors recommend a final dividend of 6 per cent., free of tax, on Ordinary shares, making a 10 per cent. bonus of 2 per cent., free of tax on Ordinary shares, transfer to depreciation and general reserve £10,000, to staff pension fund £2,000, carrying forward £9,991. To meet the renewed demand for expenditure on capital account, unavoidably deferred on account of the war, holding of Government securities, which was accumulated to provide for such contingency, has been realised for £136,702, showing a surplus of over £5,000. The Government of India has now decided definitely not to purchase undertakings of the company and its subsidiaries in India in 1923. The Government has now decided to grant a security of tenure to companies until March 1943.

Stock and Share Markets.

QUIET AND DULL TONE.

Business Restricted.

(From Our Own Correspondent.)

London, Tuesday morning.

We have had another quiet week in the markets. The reversion to pre-war conditions has so far had little effect on the volume of business. Many holders, as I have pointed out, do not propose to give carrying over facilities, though very possibly this attitude would undergo modification if and when conditions generally approximate to those before the war. There has been a little business in options, but the rates quoted have been far from attractive, and would have to come down considerably before there is any great tendency to take advantage of them.

Adverse Factors.

Apart from these new facilities there is nothing to induce activity in these days, and it is not surprising in the circumstances that a rather dull tone should be in evidence. One factor that has adversely affected the markets during the week has been the failure to negotiate a settlement of the engineering dispute. The Prime Minister's speech on Genoa was more reassuring as regards the European situation though the position at the best is not one calculated to inspire overwhelming confidence. On the other hand Ireland has again become a very pronounced bear factor in the markets, and the uncertainty with regard to developments there has undoubtedly affected business.

The Prospects.

In prevailing conditions it would be futile to expect any activity in the markets as a whole. Buoyancy there must be here and there, whatever the position, as the result of what may be termed local circumstances, as for instance, at the present time in regard to Home Rails. But for the resumption of the general upward movement we must await an improvement in the situation. With the European position clearer and with a settlement in Ireland (if such a thing be possible) then the markets should go ahead again.

Turning to new issues it is worth noting the Straits Settlements loan, to which I referred last week, has met with almost the same fate as the New South Wales Loan, over 90 per cent. being left with the underwriters. Evidently investors want more than $4\frac{1}{2}$ per cent. for their money, even if the issue is made at 95. It will be interesting to see how far the terms of the next loan that comes along reflects the results attending these two issues. I shall be surprised if rather more favourable terms are not offered.

Gilt-Edged Dull.

Gilt-edged have been affected by the prevailing conditions, and, generally speaking, a rather dull tone has been in evidence. Consols at $57\frac{1}{2}$ are 1-8 lower, the Conversion Loan, exceptionally, is $\frac{1}{4}$ up at $77\frac{1}{4}$, while War Loan Fives are unchanged at 99.11-16. Indian stocks have shown a harder tendency. The Seven per cent. loan has gained $\frac{1}{2}$ at 115 $\frac{1}{4}$, the $3\frac{1}{2}$ per cent. loan is $\frac{1}{4}$ up at 69 $\frac{1}{4}$, while the 3 per cent. loan is $\frac{3}{4}$ up at 58 $\frac{1}{2}$.

A staidier tendency has obtained in the foreign group, and in many cases price movements have favoured holders. French stocks have improved, with War Loan Fives $\frac{3}{4}$ up at 43 $\frac{1}{2}$. German 3 per cents. have been strong and close at 2.5-8, a rise of 5-8. Italian Rentes are unchanged at 24 $\frac{1}{2}$. Russians have again been a dull spot, the 4 per cents. being 1 $\frac{1}{2}$ down at 7, the $4\frac{1}{2}$ per cents. a point down at 11, while the 5 per cents. are unchanged at 15. Czecho-Slovak 8 per cents. were, exceptionally, rather dull, and are 1 $\frac{1}{2}$ discount. Brazilians have been offered. Peruvian Corporation issues have again been in strong request, the Ordinary going to 4 $\frac{3}{4}$, while the Preference are up to 27. Chinese securities have made a better showing. The 5 per cent. of 1913 are 75 $\frac{1}{2}$, while the 1896 issue stands at 91 $\frac{1}{2}$.

Industrials Inactive.

Once again the Industrial Market has been inclined to stagnancy. Business has been on a very restricted scale, and the tone generally has been unsettled. The uncertainty as to the general course of trade is having an important influence, while the engineering dispute, is, of course, having an effect. If the conditions abroad suggested the imminence of a real revival of trade no one would have any reason to complain of inactive markets.

Textiles have been fairly steady. Coats are 1-32 down at 3.5-32, while Courtaulds are 1s. up at 51s. 3d. Tobaccos have been firm. Bats are unchanged at 79s., while Imperial Tobaccos are 3d. down at 59s. 9d. Dunlops have sharply risen to 9s. 6d. on the news of the appointment of Sir Eric Geddes as a director. Iron and Steel securities have inclined to irregularity. Vickers are unchanged at 11s. 6d., Armstrongs are 6d. down at 16s., while Guest Keens have shed 3d. at 34s. Indian railways have continued to present a firm appearance.

Shipping securities have been fairly steady. P. and O. Deferred are unchanged at 320. Cunards remain at 21s. 6d., while Furness Withys are 3d. down at 29s. 9d.

Oils Quiet.

A rather quiet tone has prevailed in the Oil market. There has been little or no attempt to take advantage of the new regulations. The fact is, I think, that investors are somewhat uncertain as to the course of the market at present, and consequently intend to hold aloof until the position is clearer. Burmahs are 5 $\frac{1}{4}$, a decline of 3-16, while Anglo-Persian Ord are 1-16 down at 4.11-16. Mexican Eagles are 3.13-32, a drop of 5-32. Trinidad issues have been weaker. Apex are 2.1-8, at which they are 3-16 lower. Centrals are also 3-16 down at 2-1-8, while Leaseholds are 1-16 lower at 1.3-16.

Among Egyptians Anglo-Egyptian B. are unchanged at 1.11-16, while Oilfields of Egypt remain at 6s. 6d. In the Roumanian group Phoenix are 4 $\frac{1}{2}$ d. down at 28s. 3d., Steaua Romanas are 3d. lower at 13s., Roumanian Consolidated are 1s. up at 17s. 6d., while Dacia Romanos are 1.1-8.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old Dundee, and Calcutta makes.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from overseas buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

Cotton & Cotton Goods.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Friday.

Compared with a fortnight ago the market has been distinctly quieter, and, generally speaking, buyers have been in no hurry to commit themselves to any lines of importance. Perhaps, however, it is too much to hope for buying to be maintained on the recent level, and the difficulty which is being experienced in arranging fresh contracts has been partly owing to the firmer prices and as a result of many producers requiring longer delivery terms. Spinners and manufacturers, however, are striving to consolidate their position, and there is no doubt that a stiffer front is being presented to buyers than was the case some eight weeks ago. Reports from the spinning and weaving centres indicate that more machinery is now running, and unemployment naturally has been reduced to a considerable extent. Enterprise to a certain extent is being restricted by the financial stringency which is not yet overcome. In the cloth section some steady buying has been recorded for the outlets of the Near East, but on the whole the turnover has not been large. Recent advices from Egypt, however, have read more cheerfully, and leading shippers are of the opinion that the trade position will gradually improve. Yarns made from Egyptian cotton have been firm in quotation, and a moderate trade has been done chiefly in finer counts. An interesting feature has been the improvement in the amount of inquiry for China, but so far no real buying movement has commenced. Less inquiry has been about for India, and scattered transactions have been arranged in light cloths and shirtings for Madras, Karachi and Bombay. Calcutta has been extremely quiet. Fancies have been in request for the Continent and South America. Home trade goods have moved off better. Trading in American counts has not been important, and prices have been fairly well held. Demand has been met with in export numbers for the Continent.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 24 :—

The past week has not altogether fulfilled the promise displayed by the previous two or three. The enquiry has run on much the same lines as usual, attention being chiefly focussed on the grades Good Fair to Fully Good Fair in Sakellaridis and Uppers, with Sudan cotton not far behind in popularity. The futures markets have displayed rather an uncertain tendency during the week, which has been reflected to a more or less extent on the spot, where a considerable range of prices has been apparent, particularly during the last day or two, when cotton has changed hands freely at anything between a $\frac{1}{4}$ d. and 1d. below the official quotations, the easing off in the enquiry and the less favourable Manchester reports causing certain holders to press their cotton for sale. Nevertheless, the market, on the whole, remains very steady, and whilst there has been no disposition hurriedly to advance prices, there seems no likelihood at the moment of any serious decline. Alexandria is the sensitive spot at the moment, but even if there is a temporary cessation of buying over here, the moral effect of the Government behind the market in Egypt will probably suffice to hold prices there until the trade resumes buying. After all, spinners have been buying fairly well for several weeks now, and it seems a reasonable supposition that a pause should be made to enable buyers and sellers to adjust themselves to the altered conditions. Throughout the trade, the seller is trying to better his position and to obtain a more profitable basis for his sales, and signs are not wanting that he is, to an extent, succeeding. Naturally, after such a long period of stagnation, the buyer is slow to respond, and every advance has to be fought for. Under such conditions, progress cannot be made at a breakneck speed; rather it is a matter for congratulation that a trade recovery of such substantial dimensions has so far been made.

Manchester reports have continued to be optimistic, and all without exception, speak of the firm tone prevalent in trade circles. To-day, however, the markets there are reported to be "less active." As we have endeavoured to explain above, this

is not to be wondered at, and should give no cause for despondency. India is not yet replete with goods, and China has, as yet, hardly begun to buy. Taking a broad view, we look to the immediate future with confidence. A "boom" is not likely—and it is not desired, but barring real crop scares, we look for a succession of steady, busy, markets. C.i.f. business has shown some improvement. Total sales 4,300 (includes 1,550 Sudan). Quotations of F.G.F. and below in all qualities are raised 25 points on the week. F.G.F. Sakel to-day, 18.75d.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report for the week ended May 12 state :—

The continued firmness of the New York market and the slightly improved demand from spinners have hardly influenced our futures market, which has kept during the whole week at about the same level of prices, with a negligible amount of business passing. The factors which have been keeping our market so dull of late have repeatedly been mentioned in these reports—the actual heavy stocks and the poor prospects of seeing them reduced to any great extent by trade takings before the new crop is available. Of course, with American cotton worth 20 cents and the Egyptian Government ready to buy in case of a break, a much lower level of prices than the one registered at present can hardly be expected, but, on the other hand, higher prices cannot be looked for before a substantial reduction takes place in existing supplies.

Total sales amount this week to about 8,000 bales; of this total we estimate 6,600 bales Sakellaridis, 1,200 bales Uppers, 50 bales White, 100 bales Brown, 50 bales Pilon. The Government has not been in the market this week. Arrivals from the Interior show a considerable decrease owing to the carter's strike.

Reports from the Interior this week indicate favourable climatic conditions, with about normal progress of the crop. The report on the state of the river for April, 1922, has just been issued by the Hydrological Service and mentions that there is no indication at present of any improvement in the water supply; all the gauges show figures not only considerably below the normal for the last 15 years but also for those of 1914, which year is considered as one of the worst on record.

In their report for the week ended May 19 the Commercial Co of Egypt state :—

Since our last report, the market has been fairly active, with a somewhat larger turnover: the tone has been rather firm. The better feeling which has prevailed during the week is due to the large daily spot sales here and in Liverpool which is generally taken as an indication of a revival in the trade in Lancashire. Reports from England do certainly make better reading, and it is to be hoped that the slight improvement in trade is going to be something more than the "spurts" we have from time to time experienced during the last two years. The Government have maintained their decision not to follow the advance; they have not bought a bale during the past week.

THE NORTH-WEST TANNERY

**SADDLERY, HARNESS,
BAGS, TRUNKS, AND
TRAVELLING REQUISITES.**

PRICES CHEAPER THAN IN ENGLAND.

Fully Illustrated Catalogue sent free on application.

Actual cotton is, in general, well held, and with the knowledge that the Government are ready to step in to prevent a break, holders are not in a hurry to part with their cotton.

Total sales amount this week to about 13,400 bales; of this total we estimate 10,000 bales Sakellaris, 3,000 bales Uppers, 300 bales Brown, 100 bales White. There has been a considerably increased demand during the week and with this and the rise in futures, sellers have become more difficult to deal with, practically all the cotton held being free.

Crop 1922: The plant is progressing normally and few complaints are heard. The night temperatures have been rather lower than desirable, but no damage seems to have resulted.

Water is short, but the shortage at the present time is not a very serious matter. The upper Nile gauges have commenced to show some slight improvement but it is too late to have any effect on the summer supply in the Delta and the prospects of scarcity in July are very real.

MANCHESTER COTTON REVIEW.

The Imperial Ottoman Bank report for the week ended May 27 states:—

An accurate description of the market during the past week would probably be "dull though steady." With a fair volume of business booked during the preceding weeks both spinners and manufacturers have been in a better position to maintain their firm stand against unsatisfactory offers. It now remains to be seen whether this more independent attitude will induce enquirers to increase their bids, and on this point opinion cannot be said to be unanimous.

Yarn.—The yarn market has been much quieter, but the tone remains very firm. Spinners seem in no mind to yield any ground in the matter of prices, and actual business has been to a large extent held up in consequence.

Cloth.—Many merchants assert that India continues to buy quietly in small lots, but it is difficult to hear of any big lines going through. Here, again, producers are trying for better prices, and the tussle between buyers and sellers continues. China is said to be picking up small lots, but there is a feeling that considerably more business is in the background and that slightly lower quotations would result in actual orders. Manufacturers will no doubt maintain their stiff attitude if it is backed up by steadiness, or further improvement, in the raw

material (and consequently in yarns), but it is difficult to see how they could keep up the present semblance of independence if quotations for the raw staple fail to support them. Very little is mentioned of purchases for Egypt, the Levant, South America, and other minor markets.

Raw Cotton.—The market has see-sawed during the last few days, but the week closes with a "bullish" feeling in evidence based on the weather reports from America and their influence on the new crop, backed up by purchases of fairly large quantities, both for immediate and future delivery, of cotton that is going into actual consumption. Closing prices are as follows:—American Fully Middling, 11.84d., Egyptian Fully Good Fair, 18.75d.

OIL NOTES AND NEWS.

Roumania's Lack of Transport Facilities.

Roumania's oil production is the subject of the following comments in the current issue of the monthly circular of the Imperial Ottoman Bank:—

Abundant sources of supply still continue to be tapped, and a new drilling has met with great success, giving about 80 wagons per day continuously. Again the shortage of transport facilities and especially of tank trucks is seriously hindering what should be a splendid element of export. In some cases the new wells have produced quantities of petroleum that cannot be stored, and it has become necessary to erect dykes of earth and sand round the adjacent countryside to prevent the supply from escaping. The petroleum and its residues exported to-day amount approximately to about half the quantity that was exported before the war, but, with improved facilities and adequate supplies of storage tanks, tank trucks, and tank barges, this would quickly be remedied. A move has already been made in this direction, as France and Germany are arranging to supply a number of railway tank trucks.

Oil Concessions in Iraq.

In answer to questions by Lieut.-Commander Kenworthy in the House of Commons on May 23, Mr. Churchill stated that no concessions in respect of oil in Iraq had been granted since the British occupation.

COMPANY MEETINGS.

EGYPTIAN MARKETS.

The annual general meeting of the Egyptian Markets, Ltd., was held on May 24 at Winchester House, Old Broad Street, E.C., Lieut.-Colonel A. St. John Cooke, D.S.O. (Chairman of the company) presiding.

The Secretary (Mr. F. R. Parker) read the notice convening the meeting and the auditors' report.

The Chairman, in the course of his speech in moving the adoption of the report and accounts, said that since they last met in May, 1921, Egypt had passed through another stormy and troubled period, both politically and commercially, but he was thankful to say that this company has successfully weathered the storm, and, notwithstanding all adverse conditions, had not only held its own, but showed results which most advantageously compared with previous years.

As they would have seen by reference to the trading account, the earnings amounted to the record figure of £113,402, the highest previous record being for the year ended December 31, 1920, when they reached £102,314. That improvement was largely due to the increased tariff charges in the cattle markets, which operated during the whole of the year 1921, as against some 7½ months in 1920.

At the last general meeting in May, 1921, they were informed there was no reason to fear that the company's business would be in any way affected by the disturbances which were then occurring in Cairo and Alexandria. This, he was glad to say, proved to be the case, but minor disturbances had since arisen in the districts, and since the close of the company's financial year these culminated in an attempt, organised by political extremists, to boycott British institutions and goods.

As a result of this they had been subjected to a boycott of their markets. In many instances the boycotting was peaceably carried out, but in others it was accompanied by intimidation and violence towards their employees by the turbulent and rougher element, egged on by extremists. At one time as many as 48 of their markets, both cattle and general, were affected for varying periods of time. At the beginning of this month they were informed that all of these, with the exception of six, had resumed business, to the great relief of the bulk of the population and the merchants using their markets. He was glad to say that a telegram has been received that morning, which said: "All markets have now come in excepting Shandawil," so that that was better than they had really anticipated.

He could not speak too highly of the loyalty and courage of the inspectors and sub-inspectors of their markets in some of the disturbed districts, who, notwithstanding that their lives were in very considerable danger from antagonistic mobs, carried out their duties to the company in a most praiseworthy manner. The effect of the boycott was shown in the diminution in receipts as compared with the previous year. From January 1 to May 13, 1922, this had aggregated £8,175, but they hoped that before the close of the current year this deficit would be reduced.

The general consensus of opinion was that normal conditions of trade were slowly reappearing, but this had not yet, so far as they were concerned, evidenced itself to any noticeable extent.

He would like to say a few words regarding Major W. I. le Breton. He joined the Board in 1904, nearly 18 years ago, and for more than nine years of that time he had served as their Chairman. During the whole of the period of his connection with the company he had given, without stint, of his best. Many and serious difficulties had arisen which he had successfully grappled with and overcome.

Years ago he expressed his desire to take the step which had now through ill-health been forced upon him, and they, his co-directors, urged him—some of them making it a personal matter—to continue at least until the termination of the war. This he reluctantly did and had at great sacrifice of health and with unremitting care and attention more than carried out his agreement. He had been daily at the company's offices, and no expenditure of time nor sacrifice of personal convenience was too great if there was work to be done in their interests. The strain and anxiety of the war period it was needless for him to dwell upon, but results spoke louder than words, and he would remind them that during the whole of that terrible period the revenues of the company were so well maintained as to enable the regular payment of 10 per cent. per annum on the Ordinary shares, which under all the circumstances was an accomplishment to be proud of. In the last ten years they had been repaid in dividends more than the whole of their capital.

Substantial shareholders had, he was glad to say, recognised their indebtedness to Major W. I. le Breton, and were proposing to submit for their sanction a resolution authorising that as a small recognition of his services a sum of money be voted to him.

The report and accounts were carried unanimously, the proposed dividends were agreed to, and the retiring directors were re-elected.

Mr. M. L. Evans then moved a resolution in connection with Major le Breton's services to the company, proposing that the sum of £1,000 free of income tax should be voted to him. Mr. H. M. Holman seconded the resolution which was carried unanimously.

A vote of thanks to the chairman and directors and the staff, proposed by Colonel Westropp and seconded by Mr. Holman, was unanimously accorded, and after a brief acknowledgment by the Chairman, the meeting terminated.

SUN INSURANCE OFFICE.

Fair Profits in Spite of Trade Depression.

The annual general meeting of the shareholders of the Sun Insurance Office was held on May 30 at 63, Threadneedle Street, the chairman, the Hon. Sir William H. Goschen, K.B.E., presiding.

The chairman stated that, as had been anticipated at the last annual meeting, the results for 1921 were adversely affected by the general trade depression throughout the world and were less favourable than those of 1920.

If their operations in 1921 did not reach the high standard of 1920 he hoped that they would nevertheless look upon the report and the accounts which were being submitted to them as satisfactory under the circumstances. If he applied another and perhaps sounder criterion to the work of the year and compared their record with that of other British companies, he could fairly say that that record was a favourable one.

If the shareholders cared to extract the figures from the accounts before them they would find that, exclusive of the marine section, the underwriting balance of which was being retained entirely in the marine account, the two remaining categories, the fire section and the accident group, had produced credit balances on the underwriting, i.e., leaving out the interest earnings—of £187,256. As this worked out at rather over 7 per cent. on the premiums of the year he ventured to think that it was a satisfactory percentage for a period which in general had given but a poor harvest of profit to insurance companies.

The fire premiums were £2,199,041, a reduction of £171,948 as compared with 1920. The decrease was entirely in consequence of reduced stocks, reduced values and reduced foreign exchange. The loss ratio was 52.3 per cent. and an amount was carried forward to profit and loss account of £225,059.

He thought they had probably realized, in the course of their study of insurance accounts, that a reduction in premium income in any particular year in itself usually implied a rise in loss ratio, for the year had to bear claims that followed naturally in larger measure the larger business of the immediately preceding year. A loss ratio of 52.3 per cent. for 1921 under such circumstances was perhaps lower than they might have expected. The expenses were high, and this was in part because of the reduced premium revenue. The taxes they had had to meet on the business in various countries had been higher in 1921 than they were in 1920, the premiums of which were better able to bear them. He reminded them that it was not merely in this country that the heavy incidence of taxation resulting from the war continued to be a heavy burden on their industry.

If the three sections of accident business were grouped together it would be observed that there was a fair increase in premiums over those of 1920. The office continued to open out new areas for the cultivation of accident business, and new classes. The loss ratio of 39.5 per cent. compared with 37.4 per cent. in 1920. The underwriting credit balance of the accident department although not quite so good as 1920, was very satisfactory, as would be seen from the fact that a total amount of £55,135 was carried into profit and loss account.

The premiums of the first full year of the marine department were £103,625, an amount which might have been much larger but it had been preferred to build on solid foundations in the hope and expectation that the marine business would in due time make a substantial contribution to the profits of the office. The entire trading balance of the marine operations was carried forward, the interest receipts alone being passed to profit and loss.

Allocations amounting in all to £75,000 had been made from profit and loss respectively to the marine fund, contingency reserve, and pension fund.

He had not been able to speak to them of the past year's trading with unalloyed gratification, although he had wished to convey to them that he thought they had reason to be not dissatisfied with the year's. In many past years their justifiable pleasure in more imposing profits than those of the account now before them had been tempered by the fact that they had to write down more or less substantial sums for depreciation of their investments.

The shareholders no doubt would have been pleased to see that there had been no necessity on this occasion to write down the value of the securities. As a matter of fact the value of the Stock Exchange securities was at December 31 considerably higher than the book value as revealed in the balance sheet, and since the closing of the accounts there had been a further substantial appreciation.

Before he concluded, he would like, on behalf of the board, to pay his tribute to the excellence of the work that had been done by the management and the staff.

He would have them realize that the work of a great insurance office tended to become more and more complex, and required closer and closer study on the part of all connected with it, but he was happy to say that they continued to find the right men to fill the important positions.

The report and accounts were unanimously adopted.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from a recent report of the Imperial Ottoman Bank:—

Constantinople, May 20.

The situation here has not improved despite the approach of the Bairam holidays which each year impart a certain liveliness to business.

Manufactures.—Some sales of cabots for the Black Sea have taken place and also of some seasonable articles for local consumption. Prices remain unchanged.

Sugar.—There has been no change in the market. Java has commenced to offer the new crop, for June,--July shipment at £19½ per ton. In view of the abundance of the crop it is believed that the prices will fall lower. Prices quoted here are below those of centres of origin because of the lack of outlets. Quotations:—American, £20½ per ton, in transit; Dutch £22 per ton; in Customs £25-26 per 100 kilos.

Coffee.—A marked setback which has taken place at Rio has influenced prices in this market where they are now 3s. below those in centres of origin.

Rice.—There is a certain amount of demand, and prices in consequence are higher by Ps. 1 per oke.

ROUMANIAN CONSOLIDATED OILFIELDS, LIMITED.

The following telegram has been received from Ploesti:—"Well No. 104 Stavropo-leos-Moreni struck oil at 898 metres. Made powerful flow of sand and oil. Now shut in. Making additional preparations for handling oil." This well is in close proximity to Phoenix No. 5 and in the same fountain-source.

Production (April 30 to May 13) 1,122 tons. Metres drilled 203 (665 ft.). Development work:—Moreni Well No. 44: drilled 5 metres to 841 metres. Well No. 51: erecting derrick. Well No. 61: drilled 46 metres to 680 metres; preparing to insert 12½ inch collared pipe. Well No. 83: depth 738 metres; pulling 12½ inch casing with hydraulic jacks. Well No. 101: rigging up. Well No. 102: drilled 52 metres to 377 metres; reaming before insertion of 14 inch casing. Well No. 104: drilled 18 metres to 885 metres (as reported by cable, this well struck the fountain-source at 898 metres on May 24 with 8 inch casing, and is now clean after a powerful first flow of sand and oil). Well No. 106: drilled 74 metres to 140 metres. Gura Ocnitei Well No. 4: depth 706 metres. Fishing for bit. Chiciura Well No. 10: depth 620 metres; several more pieces of iron have been extracted and well is now believed to be clear; starting to drill into oil. Aricesi Well No. 5: depth 119 metres; 18 inch casing extracted. Well No. 6: drilled 8 metres to 31 metres.

Following the introduction of modern methods salt production in Greece rose to 7,000 tons last year, as compared with 58,000 tons in 1920. The country is now independent of salt imports and hopes to produce 80,000 tons this year.

LONDON PRODUCE REPORT.

Phenomenal demand for Lemons.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in good demand at the usual rates. Tate's cubes and mineral water sugar have gone back to their recent prices at 53s. 6d. and 48s. 9d. respectively. London granulated has gained 3d. at 48s. 3d. as also Lyle's granulated at 48s. 6d. Export descriptions have been steady. West Indian crystallized has been firm at 42s. 6d., while White Mauritius has shed 3d. at 44s. 3d. Cane sugar quotations are:—May, 15s. 6d.; June, 15s. 6d.; August, 15s. 3d.; and September, 15s. 0d., White sugar quotations are:—May, 21s.; June, 21s.; August, 20s. 10½; September, 20s. 10½d.; and October-December, 20s. 3d.

Coffee.—A steady tone has prevailed. East Indian is unchanged at 120s., Costa Rica is firm at 118s., and Nairobi is steady at 108s. The futures market has been firm. Quotations are:—May, 65s.; July, 63s.; September, 62s. 6d.; and December, 60s.

Dessicated Coconut.—There is still a large falling off in business and quotations for shipment have shown a slight decline.

Rice.—The demand has not been so great as last week's, but the market has been firm, and a slight advance in prices is to be noted.

Green Fruit.—The orange market is still retaining its strength, and the demand has been exceptional for the time of the year. Many shipments are now afloat, the condition of which is said to be good. The present heat wave has caused a phenomenal demand for lemons. Merchants are paying very high prices to obtain this fruit, and the outlook is far from satisfactory, a further increase in prices being anticipated with future arrivals. More confidence is now being felt with regard to apples. The condition has shown signs of further improvement on last week's arrivals. Egyptian onions are going entirely out of favour and the market is light.

Oilseeds.—Prices have declined. Indian linseed has shed 6d. at 21s. 3d., while La Plata is steady at 19s. 9d. Rapeseed is lower with Toria 3d. down at 19s. Cottonseed has declined with Indian 3d. down at 9s., while Egyptian black is firm at 12s. 7½d. Sakellarides has shed 9d. at 11s. 10½d.

Oils.—There has been a steady tendency all round. Linseed oil has shed eighteenpence at 44s. Rape oil has been a steady feature with crude at 45s., and refined at 48s. Cotton oil shows no change. Egyptian crude is unaltered at 43s., refined, 49s., deodorized, 54s., and technical, 44s.

Oilcakes.—There has been a decline of 10s. in all cases. Linseed cake is now 290s. ton. Cottonmeal cake is quoted at 270s. ton; cottonseed cake at 170s. ton, and coconut cake at 150s. ton.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 22:—

Condition of crops.—May 18—In Punjab, conditions are favourable for sowings of irrigated cotton. Bombay, May 19—New crops in Karnatak decidedly improved by good rain. Bihar and Orissa, May 20—Rain last week greatly improved jute prospects in Purnea. Assam, May 22—Prospects of tea, autumn rice and outturn of spring rice fair. Markets.—May 18—Bombay cotton market steady. Fine M.G. Oomras Rs. 4.25 May, Rs. 4.42 July. Bombay cotton arrivals from September 1 to May 13, were 2,755,000 bales as compared with 2,052,000 bales during the same period of the last year. May 19—Calcutta jute market firm with sellers very steady. Firsts Rs. 75, Lightnings Rs. 66. May 20—Hessians fully steady and rates calm, though advanced jerkily during the week. Heavies fully steady. Calcutta, May 19—T.N. Rs. 180. Demands weak, and prices tend to fall. Rangoon, May 19—Big mills special Straits quality rice, Rs. 520.

No change in bank rates.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., of Smyrna, report as follows for the week ended May 13:—

The total estimated arrivals of sultanias to date amount to 172,490 bags, the sales are 169,490 bags, and the estimated stocks unsold amount to 3,000 bags.

Markets.—Sultanias—The market remains strong. Prices in local currency are unchanged, but sterling equivalents are 2s. or 3s. down on last week's level owing to improved exchange rates. Stocks are gradually narrowing down, and the end of the season is approaching owing to the exhaustion of supplies. The new crop is favourably reported on. The vines are carrying more fruit than last year, and on present prospects a larger yield may be realised.

Figs.—Reports on the condition of the trees are contradictory. Some concern appears to be entertained owing to the male trees shedding their fruit which affects the fructification of the female trees.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 140s. cwt.; (Canadian), 135s. cwt.; (American), 99s. cwt.; butter (Danish), 128s. cwt.; (Australian), 159s. cwt.; (New Zealand), 173s. cwt.; cheese (Canadian) 84s. cwt.; (New Zealand), 173s. cwt.; lard 73s. cwt.; eggs (Danish), 14s. 10½d per 120; (Styrian), 10s. 9d. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar), 1s. 2½d. lb.; cocoa (Ceylon good to fine), 87s. 6d. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt.; (Central American), 104s. cwt.; (Jamaica), 69s. 9d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 69s. 6d. cwt.; ginger (washed Cochint), 50s. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7½d. lb.; pimento, 2 1-8d. lb.; raisins (Valencia), 55s. cwt.; sultanias (Smyrna), 119s. cwt.; currants (Vostizza), 71s. 6d. cwt.; (Amalias), 59s. cwt.; sugar (Tates cubes), 52s. 9d. cwt.; (Lyle's granulated), 48s. 1½d. cwt.; (Mauritius crystals), 44s. 3d. cwt.; (West Indian crystallised), 42s. 1½d. cwt.; (centrifugal), 14s. 9d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 3d. cwt.; (bran Rangoon), £6 8s. 9d. ton; cinnamon (firsts), 11½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; tea (Indian, common to good common), 1s. 1½d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Java (common to good common), 10½d. lb.; wheat (English white), 58s. 6d. qr.; wheat (Australian), 61s. 3d. qr.; oats (English), 36s. qr.; oats (La Plata, ex-ship), 26s. 3d. qr.; maize (La Plata), 39s. 1½d. qr.; flour 47s. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 3d. lb.; tartaric, 1s. 3½d. lb.; ammonia (sulphate) £16 11s. 6d. ton; arsenic, (white powdered), £35 5s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £13 15s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 118s. 9d. cwt.; Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9½d. lb.; prussiate yellow, 1s. 1½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 130s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 3d. lb.; alkali (58 per cent.), £9 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £16 ton; prussiate, 9½d. lb.; nitrate, £15 1s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton; lemon oil, 3s. 6½d. lb.; quinine, 2s. 10½d. oz.; red

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Egypt.

Drugs, etc.—The Department of Public Health invite tenders for the supply of drugs required for the period of six months from October 1 next. The tenderer must be a person residing in Egypt or must have a representative in Egypt. June 15, (D.O.T.)

Carbide of Calcium.—Tenders are invited by the Postmaster-General, G.P.O., Alexandria, for the supply of 12½ tons of carbide of calcium. Delivery October 2, 1922. June 15.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millièmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Travelers' blankets.—The Egyptian War Department invite tenders for the supply of travellers' blankets. Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. June 2.

Bedford cord.—The Egyptian War Department invite tenders for the supply of Bedford cord. Further particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. June 5.

Paper, Bristol Board, Mill-board, etc.—The Superintendent of the Government Press, Boulak, Cairo, invites tenders for the supply of writing paper for certificates; strong writing paper for certificates; strong writing paper for registers and books; strong writing paper for registers and books coloured; bristol boards coloured; bristol boards coloured for covers; paper for file covers; cream wove paper for forms; coloured paper for forms; mill-board; gummed paper, required for the year 1922-3. Representation by a local resident agent is essential. (D.O.T.) June 20.

Dubbin.—The Egyptian War Department invite tenders for the supply of dubbin. Further particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W.1. June 10.

Malta.

Stationery.—Tenders are invited for the supply of stationery for the Government of Malta. Sealed tenders (in duplicate) will be received by the Director of Contracts, Malta, up to 10.30 a.m., on June 8. Printed forms of tender may be obtained and samples may be seen at the offices of the Crown Agents or the Colonies (Pattern Room), 4, Millbank, S.W.1.

Bulgaria.

Telephone Accessories.—The Bulgarian Post and Telegraph Authorities invite tenders for the supply of:—1 amp. fuses; cartridge fuses for protection from lightning; 3 amp. fuses; line annunciators; carbon lightning arresters. Tenders must be accompanied by a deposit of 5 per cent. of the total amount and may be submitted for each or all of the items. This call for tenders is identical with the one which was notified on January 18 last, and may, therefore, be a fresh call for tenders in connection with the former contract. June 15. (D.O.T.)

India.

Copper wire, carsake elements, tubs, electric cable and web equipment.—The High Commissioner for India invites tenders, for the supply of:—Wire, copper, for telegraphic purposes, 205 tons; Carsake elements, No. 1, for Leclanche cells, No. 32,000; Tubs, ablation, galvanised iron, No. 8,750; Cable electric, V.I.R. insulated tropical class, single braided, single and twin lead sheathed and twin flex, 200,000 yds.; Web equipment (carriers, cartridge, haversacks, etc.). Further particulars may be obtained from the office of the Director-General, India Store, Department Belvedere Road, Lambeth, S.E. June 9.

EAST INDIAN TEA.

The report of the East India Tea and Produce Company for 1921 states that the tea crop was 2,178,750 lbs. against 2,327,970 lbs. F.o.b. cost 7.66d. per pound, compared with 7.79d. per pound; average net price realised 10.43d. per pound, against 7.12d. per pound. The estimate for 1922 was 2,582,000 lbs., but owing to drought it is doubtful if this estimate will be realised. The profit for the year was £25,581, less Debenture and other interest and Debenture trustees' fees £24,931, leaving a net profit of £650. After adding surplus on taxation the reserve was £4,029, making a total of £4,679, reducing debit balance brought in to £79,439 carried forward.

'BALKAN' NATIONAL INSURANCE COMPANY.

FOUNDED 1895

Capital paid up	5,000,000
Total reserves as per December 31st, 1920	53,200,000

NOTES OF THE WEEK.

"The Near East" and the Honours' List.

It is with particular satisfaction, which is not affected by the curious mistake in the biographical details supplied by the Government Department issuing the List, that we find among those upon whom the honour of knighthood has been conferred on the occasion of the King's Birthday the name of one of the proprietors of THE NEAR EAST. Sir Robert Gardiner is not, as stated in the Honours' List, Editor of the paper. We cannot cavil at the further statement that THE NEAR EAST is "a publication much valued in Egypt, Palestine and the East," but, as its *raison d'être* is the promotion of British interests in the Near and Middle East, we shall not be far wrong in seeing behind the recognition accorded to the Chief Proprietor—although well merited on other and personal grounds—an appreciation in Great Britain as well of the value of THE NEAR EAST.

The Asia Minor Inquiry.

Now that the United States has notified its acceptance of the British invitation to be represented on the Commission which is to investigate the treatment of minorities in Asia Minor, it should be possible for the matter to pass from the discussion stage to that of action. As we have already indicated, we see little practical value in the Commission. There is no reason for disbelieving the testimony either of those members of the American Relief Mission who have already given their evidence of Turkish excesses, or of those other members of the same Mission who have brought similar reports of murder, rape and pillage committed by the Greek army in its retreat from Anatolia. These things unfortunately happen in the East and everybody knows that they are inevitable, whenever a war takes place. If the Western Powers wish to stop them, they will not do it by Commissions of Inquiry, but only by calling off the war. They themselves deliberately set the Greeks against the Turks in Asia Minor, and they might just as well say that they did not realize that the combatants would use artillery as complain of the excesses on either side. Of course, the Turks are worse than the Greeks; it would be a monstrous thing if they were not. But why go through the farce of establishing the fact by means of a Commission? While the Allied Governments are discussing the matter, further excesses are taking place. If, on the other hand, they stop the war which they began by means of the Greeks, and have since found themselves unable to continue profitably with Greek

agency or in any other way, there is some ground for supposing that the excesses in Asia Minor will come to an end.

Roumania's Improving Outlook.

The Roumanian Minister of Finance, M. V. Bratiano, has been spending a few days in London on a special mission, and to Pressmen who have interviewed him he has expressed himself in the most optimistic way concerning his country's future. Possibly the optimism may not be entirely unconnected with the reasons for his visit; but in point of fact the outlook for Roumania is distinctly promising. She was hard hit by the War; and though she has added greatly to her territory as a result of the War, the additions have necessarily meant the facing of some fresh problems. But, as M. Bratiano informed one of his interviewers, Roumania is rapidly accomplishing the work of consolidation; her railways, which suffered terribly in the bad times, now suffice for the needs of the national business; and her financial position is better than it was a little while ago. The Budget, which in 1919-1920 showed a deficit of 3,200 million lei, shows this year a deficit of 200 to 300 million lei, and by 1923 revenue will balance expenditure. There is still lost ground to be made up in Roumania as elsewhere, but the improvement is marked, and M. Bratiano's optimism appears to be justified.

The Palestine Power Concession.

In any discussion in the House of Commons on the contract given to Mr. Rutenberg for the development of water-power and the supply of electricity in Palestine it is to be hoped that members will not spoil their case by failure to understand the actual facts. We have seen it argued that "assuming that power supply in Palestine should be dealt with as one undertaking, a concession of this kind ought to have been put out to public tender." But neither the British Government nor the Palestine Government had any views on the subject of power supply in Palestine until this Mr. Rutenberg, who had spent two years in the country investigating the subject under, we believe, the auspices, or with the knowledge of, Sir Alfred Mond and Lord Rothschild, produced an elaborate report and applied for the concession. It was presumably open to anyone else to have studied the matter on the spot; but it would have been difficult for the authorities to have taken Mr. Rutenberg's report and to have said: "We will put up to auction the concession based on your personal investigations and technical experience." At least they must have paid very handsomely for this making use of the report, and

we imagine that neither the Palestine Government nor the British Government was anxious to do this. The mistake that has been made is to have observed reticence on the subject all this time, and then to have allowed Mr. Rutenberg to appear as the exploiter-to-be of Palestine under a British Mandate, when in reality the actual concessionaires will be "official Jewry," to all intents and purposes.

The Murders in Egypt.

A protest made formally by the British Government to the Egyptian Government regarding the murder of Bimbashi Cave met last week with a somewhat mixed reception in Egypt. The Note drew attention to the frequent murders of foreigners and to the inefficiency of the protection afforded them by the Police; and it made it clear that the Egyptian Government will be held responsible for payment of adequate compensation for every foreigner wounded or killed. The Egyptian Government's reply was not entirely satisfactory; for it referred to the crimes as the work of "a handful of criminals," and offered no satisfactory explanation of the increasing daring shown by the murderers, or of the fact that they always escape while other criminals hardly ever do so. The Egyptian Press also showed an inclination to make light of the crimes and to deprecate the payment of fair compensation to the families of the victims. Fortunately, the Egyptian Cabinet appears to have woken to the fact that the matter was not to be airily dismissed. It has agreed to pay fair compensation to the widow of Mr. Aldred Brown (murdered in mid-February); while the Police have been given wider powers, and the inquiry into the murder of Bimbashi Cave is being conducted with more energy. As a result—hardly satisfactory—it has been discovered already that the murder was witnessed by half-a-dozen Egyptians, who kept silence on the subject!

The Troubles of Persia.

The Persian Cabinet crisis to which we alluded a fortnight ago, is still—at the time of writing—in existence. The Mushir ed-Dowleh is reported to have informed his Imperial master that he found it impossible to keep any Cabinet together so long as the Sardar Sipah continued to enact the part of Dictator; and a day or two later he followed this announcement up by tendering his resignation once more. The situation is certainly an uncomfortable one, not to say an undignified one, for any self-respecting Prime Minister, but, without further data to go upon, we do not feel quite certain that Riza Khan's insistence upon keeping his hand on the helm is an entirely bad thing for Persia. The Persians themselves seem unable, even at this serious juncture, to make up their minds what they do want—except entire "freedom" from "interference" by any foreign Power. One Teheran journal remarked lately that there was no difference between aggressive Britain and encroaching Russia; and endeavoured to make its readers' flesh creep by assuring them that any understanding between Mr. Lloyd George and M. Chicherin would spell the doom of Persia! That being so, the journalist who wrote the article must have rejoiced at the ending of the Genoa Conference. And meanwhile Simko, the Kurdish outlaw, amuses himself by harrying the Shah's troops.

Palestine Exploration.

For excellent reasons, archaeological work in Palestine makes a wider and possibly more forceful appeal to the public than similar work in any other country can be expected to do. Presiding at the annual general meeting

of the Palestine Exploration Fund last week, Sir Herbert Samuel paid tribute to the excavations at Askalon, which are now claiming the attention and energies of the society, and expressed a hope that the work would not be hampered by lack of funds. We have expressed a similar hope on more than one occasion, but we make no apology for referring to the subject again; for since Great Britain has made herself responsible for the administration of the Holy Land, there has been what may be conveniently described as a boom in excavations there, and it behoves us to see that the "P.E.F." work is able to hold its own with that now being carried on or shortly to be carried on, by American and French universities and societies. As Mr. Ronald Storrs, Governor of Jerusalem, pointed out on the same occasion, the sites of Palestine are unique in their character; and, as his Chief said, archaeologists have already thrown light on many of the problems of the religions which centre in Palestine. If the nature of the work were more widely known, and its claims more generously recognized, the result would quite certainly be the shedding of more light on the past.

"Talking of Axes."

No exception can justly be taken to the terms of Lord Reading's reply to the economy deputation of the Indian Chambers of Commerce, but his language can scarcely be said to encourage hopes of spectacular results from the work of Lord Inchcape and his colleagues when at last they shall get to business. It is noteworthy that Lord Reading laid stress on the surgical analogy, and his reference "to operation, to cautery, to the letting of blood," recalls the opinion we expressed some months ago that in India the Retrenchment Committee will require a scalpel rather than an axe. There is no doubt that, somehow or other, the next budget must be balanced, and to secure that end all luxuries must be dispensed with, but as a matter of fact the Central Government in India spends very little on luxuries, and some of the most useful departments are actually on the verge of starvation. "Chop off his head" may have attractions as a formula for administrative developments such as Labour Exchanges, but when we examine the Indian budget item by item, we find very little scope for its application, and it is quite possible that so skilful a surgeon as Lord Inchcape may decide that in some cases a more generous diet is the proper treatment.

A Sick Industry.

The position in regard to cotton-growing will illustrate our meaning. The true reason for budget-deficits is the poverty of India. An improvement in the quality of Indian cotton would give an enormous and immediate increase in the national income. Its possibility has been amply demonstrated. Much money has already been spent, and if the return is not yet wholly satisfactory, the reason is that one link in the chain remains to be forged. The Central Cotton Committee is prepared to forge that link at a cost of about £50,000 annually for a term of years, a sum too minute to be noticed in an ordinary budget; but it would not come on the budget at all, because the representatives of the trade are ready to provide it by a cess of fourpence a bale on the cotton handled commercially. One would suppose that in these circumstances the offer would be jumped at by a needy Government. All that has to be done is to provide legal machinery for collecting the cess; but apparently the Bill for this purpose is hung up some-

where, and so bad cotton will continue to be grown instead of good, the national income will not be increased, and the tax-collector will go hungry away.

Its Treatment.

In this case the skilful surgeon has to choose between two courses. He can operate on the budget by cutting off the meagre expenditure now devoted to improvement, or he can prescribe a more generous diet for the patient, it being understood that the patient is ready and willing to pay the cost. If the former course be adopted, the great Indian cotton industry will be maimed, and will continue for an indefinite period to stump the country on its wooden leg, and beg for alms in the form of a protective tariff: the alternative treatment will give India a useful citizen instead of a cripple, and one who will, as time goes on, contribute more and more to the necessities of the country. We have little doubt that so skilful a practitioner as Lord Inchcape would choose the latter alternative, but we trust the Government will not think it necessary to await his opinion on the case: what is wanted now is to pass the Cotton Cess Bill at the summer session of the Indian Legislature, and thus enable the essential work to go forward without further delay.

THE WEEK AT HOME.

London, Monday Evening.

The Whitsun Holiday.

There is no doubt that Whitsun at its best, as it promises to be this year, is the ideal holiday. The lilac and laburnum make the country a pageant of colour, the green is still fresh, and the first roses are peeping shyly through the buds; the days are warm, but there's still a wind on the heath, and the salmon is in the mayonnaise. For the next few days, therefore, we forget the depreciated exchanges, the balance of trade, the rot in the theatre, and even the reparations problem; in the spring the young man's fancy lightly turns to thoughts of motor-bikes, with love riding pillion behind, and the City is deserted except for the cats and the charwomen.

Foreign Policy.

Mr. Lloyd George announced the Government attitude on German reparations before the House rose for the few days' vacation. It was an excellent speech, clear in matter and restrained in form; but it was noticed that the Prime Minister looked tired and anxious, and the next morning he left for Criccieth. He needs a longer rest than he is likely to get, for the remainder of the session promises to be full of incident. There is no present likelihood, however, that he will have to go abroad again this summer—the Hague Conference is to be confined to business experts—but his attention will be fully taken up with home affairs.

The Irish Situation.

Mr. Winston Churchill made, as was expected, a long and considered summary of the present Irish position; the speech was by common consent the greatest of his career and it definitely stamps him as the most considerable figure in coming politics next to the Prime Minister. He did not attempt to conceal his disappointment at the course of events since the Treaty; his frankness, indeed may not be altogether welcome in some quarters. But his contention was undeniable. He pointed out that the very day after Mr. Griffiths had accused the Republicans of representing a mere two per cent. minority of Irish opinion the Griffiths-Collins Provisional Government concluded a pact with the Republican leaders giving them practical equality in the Parliament and the Government.

Moreover, the Provisional Government have admitted that they are impotent to repress disorder, and on this matter Mr. Churchill's measured words will long be

remembered. "When we are told," he said, "that twenty determined pistoleers can prevent the citizens of a whole county from exercising their constitutional rights, one sees quite clearly to what a low level at the present moment the civic courage and manhood in Ireland must have fallen. However, that is the first reason which is given that a free expression of the public will could not in any circumstances have been obtained at the present time. If the democracy of Britain, of France, of the United States had been of so weak and poor a spirit in regard to the management of their own affairs, the liberties of those nations would never have been attained, or having been attained, would never have been preserved." That utterance will become one of the classics of oratory.

The general position is that disorder has not noticeably decreased in the South in consequence of the pact and in and on the borders of Ulster it has sharply increased. Raids and frontier fighting there in fact show all the indications of the opening of civil war—religious civil war—for it is not altogether a matter of Republicans and Loyalists, but of Catholics and Protestants. British troops are in Ulster at the request of the Northern Government, so that the Republican project of terrorising and destroying the North appears to be hopeless at the outset. It may be added that British opinion is emphatically behind Ulster, and that it is disposed to be distrustful of Mr. Collins, who has proved a weaker man than Mr. de Valera.

English Opinion.

It is necessary to add that these events in Ireland are having a hardening effect on British public opinion which is very disquieting to the Opposition and to Liberal Coalitionists. Anarchy in Ireland has killed Liberalism for a generation, in the opinion of some genuine Liberals; the remedy they advocated has been tried, and has proved worse than the disease.

The follies and weakness of the Irish régime will react on the amount of sympathy for small States in all parts of the world for the time being; it will not, of course, permanently affect public opinion in the case of those States which are proving their stability on the Continent, for opinion here is never fanatical or consciously unfair; but it will tend a little to reduce the flood of enthusiasm for the small State as the small State which has for some time been in evidence. The Irish gunmen are destroying more than they know; they are not only pulling down life and property in their own island, but they are contributing to the ruin of a great political faith.

A Sporting Week.

The warm settled weather seems to have attracted everybody to Epsom except members of the Government, and the House of Commons was very sparsely represented.

A third favourite won the Derby in Captain Cuttle, and the prophets were all wrong about the second favourite, Pondoland. The going was hard, and the threatened thunderstorm did not materialise. The police arrangements for going down by road were excellent, but the aeroplane that circled over the course advertising a newspaper by emitting smoke clouds was rather a nuisance. If the very heavens are to be used for advertisement, no place will be safe.

The Bottomley Case.

Horatio Bottomley, who was sentenced to seven years penal servitude at the Old Bailey for the conversion of trust funds, was a man whose name is likely to live long even in the annals of roguery. Everybody in the City and West End knew of him, and everybody in politics and journalism suspected his professions of patriotism and religion as cant. The astonishing thing was that the plebs believed in him.

The man had personality and ability; had he been straight he would have made a fortune at the Bar or in business, but there was some moral kink in his nature which seems to have made him love the crooked. He was lucky to have had a long run, for he has been under suspicion many a time this last twenty years; but the spell by which he imposed himself upon the mob is broken.

Capital Punishment.

The poisoner, Armstrong, whose case excited such general interest some weeks ago, was hanged on Wednesday, protesting his innocence to the last. Some laborious statistician has discovered that he was the first lawyer to be hanged in England. It appears that of the various professions, doctors head the list of persons hanged; a parson (the celebrated Dr. Dodd) was executed for forgery a century and a half ago. No journalist has ever been hanged, although many of us murder the King's English every day of our lives.

There has been some discussion again of the old question of capital punishment. Nobody, of course, could say anything in favour of Armstrong, who was a brutal and callous poisoner of a devoted wife, whom he put out of the way in order to get her money and marry again; but some foolish people wrote to the papers deploring that the stigma of having their father hanged should be fixed for life on the man's unhappy children. One may indeed commiserate these poor innocents, who are hardly yet out of the nursery; but the real stigma, of course, resides not in the man being hanged but in his being convicted of the crime. It is curious that the sentimentalist should not see this flaw in his logic.

Two other men awaiting execution have also provided material for this discussion. One, an ex-officer named True who strangled his paramour—apparently a sadist crime—was mentally unbalanced, and his case has again provoked the difficult question of the distinction between medical and legal insanity; in the third case a boy of seventeen is to be hanged. Here the youth of the victim naturally evokes pity, but the circumstances of the case hardly justify pity on any other ground. The boy murdered an old lady in her bed in an hotel; he intended to steal her jewellery in the middle of the night, and

provided himself with a hammer to strike her in case she woke while he was doing so—as in fact she did, when he shattered her head mercilessly. The plea of insanity was not entered in this case; if it had been, and been pleaded successfully, it could have been pleaded in every case of murder.

On the whole I doubt whether the existing law is likely to be changed. Many people are sentenced to death on whom the full penalty is not carried out—juries recommending criminals to mercy when the circumstances justify it, in which case, and occasionally in others, the Home Secretary never refuses to commute the sentence. It is to be noted that the Court of Criminal Appeal, to which every murderer appeals against this sentence, hardly ever interferes. Speaking from memory. I cannot recall a single case in which it has done so.

Another Legal Reform.

A very different kind of legal reform is being carried out in the present session of Parliament; nothing less than a unification of the law of land, which is in a chaotic state, owing to the haphazard way in which successive Parliaments have legislated, repealing part and re-enacting another part of the work of their predecessors. The Bill to deal with the reform is a substantial printed volume, and the debates are so highly technical that hardly anybody except a conveyancing solicitor could make head or tail of them. Out of the fog of words generated by these discussions I gather, or at least I think I gather, that copyhold is to disappear, and other picturesque anachronisms are likewise to go.

I wish they would also make it compulsory for mortgages to be drawn up in simple language, instead of being designedly as obscure as a palimpsest; but probably the whole of the legal profession would reject my proposal as revolutionary, and Lincoln's Inn Fields and county town solicitors, who do business in these deep waters, would condemn me as an utter Bolshevik for so much as hinting at it.

Some Recent Books.

"The Witch-Cult in Western Europe" (Oxford University Press) by M. A. Murray, is an important work. Miss Murray has studied the original records of the witches' confessions at their trials, on the assumption that the witches told the simple truth. This hypothesis yields interesting results. She suggests that witchcraft was in reality a survival of old paganism, and that the witches performed the old heathen rites which Christianity has never been able to suppress. The records of animal sacrifice appear to support her point of view, and I think she makes out her case. The book is likely to become a standard work.

Meredith is not quite everybody's novelist, but a new edition of the collected works which Constable are issuing should bring him within reach of many who have hitherto thought him rather too high-brow for human nature's daily food. As it is thirteen years since he died, the publication of a new popular edition shows that he now takes rank as one of the permanent classics. Personally I am not an ardent Meredithian, but the print, paper, and binding of the new volumes are so attractive that I am rather tempted to buy them. I only wish that somebody would do the same for Conrad.

I suppose that almost as many books have been written about the mystery of the Dauphin who disappeared in French revolutionary days as about the Man in the Iron Mask and Edwin Drood. Each of these books has as a rule some little scrap of evidence but still remains inconclusive, and it was inevitable that sooner or later M. Georges Lenotre, the historian of the Revolution, should turn his attention to the subject. "The Dauphin (Louis XVII); The Mystery of the Temple" (Heinemann) is the result. It is a careful study of all the evidence, and is of absorbing interest.

A very curious and interesting book is "Greek Medicine in Rome" (Macmillan) by Sir T. Clifford Allbutt. The title hardly indicates the full scope of the work, which is an original contribution to histories that will hardly be superseded.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, May 26.

The Constitution Commission.

The work of the Sub-Committee of the Constitution Commission has come to an end, and it handed its report to the Plenary Body before the departure to Europe of the President, His Excellency Sir Hussein Rushdi Pasha. The plenary Commission will review the report during the next couple of months, and it is hoped that the elections will take place in October. The general opinion, however, is that it will not be possible to have everything in readiness before the end of the year.

The most prominent question is the representation of minorities. In the Legislative Assembly a minimum number of seats was guaranteed to them, principally to the Copts, and the principle of safeguarding the interests of the religious minorities has always been recognised by the reservation of one seat for an Egyptian Christian in every Cabinet. The proposal to provide a similar guarantee in the new Chamber of Deputies for the Copts and the other minorities, which have come into existence in Egypt as a result of the War, has been strongly resisted by the Moslem majority. Their contention has been that the nation has been united in its fight for independence and that any such provision in the Constitution would at once imply that it was no longer united. A further argument has been that as Great Britain in her declaration of February 28 reserved to herself the protection of minorities the fact that the elements hitherto recognised as minorities did not now require the constitutional guarantees enjoyed by them in the past would mean that those minorities no longer existed as such, and one further excuse for Great Britain to intervene in the affairs of Egypt would thereby be removed.

A keen controversy is now going on in the vernacular press on the subject, in which quite a number of Copts have intervened on the side of non-representation of minorities. The chief champion of the minorities is Tewfik Bey Doss, a Coptic lawyer, and one of the ablest members of the Egyptian Bar, who has been carrying on a courageous struggle both within and without the Commission. That so many Copts, should stand for non-representation may cause some surprise, but the real reason is that the old intimidatory tactics, which have been so successful in silencing the more rationally-minded Nationalists during the past three years, have once again been adopted, and the Copts in question have been compelled to side with the non-representation majority; although they know full well that whatever success they may achieve at the forthcoming elections, the probability of their having any representation in future Parliaments will be very remote unless there is some specific guarantee in the new Constitution. As a matter of fact those who oppose non-representation of minorities on the plea that Great Britain will thereby have no excuse for intervening in Egyptian affairs are entirely mistaken; for the very fact that no such provision is made in the new Constitution will strengthen any appeal which individual members of the minorities may make to the British Government, and will render it impossible for the Egyptian Government to oppose the latter's intervention.

The Mixed Tribunals.

I understand that there is every probability that a temporary settlement will be reached on the claims for higher grades of pay made by the Mixed Courts. The Cabinet has pointed out that the finances of the Government do not at the present moment permit of its granting the general raising of grades for which the Courts have asked, and it has offered to raise the minimum salaries from L.E. 1,200 to L.E. 1,500 and to grant all the other Judges and Counsellors an immediate increase in pay

of L.E. 200 per annum. I have reason to believe that the Mixed Courts are prepared to accept this offer, but only as a temporary measure pending an improvement in the financial position of the Government. A good deal depends on the action which the Egyptian Government may take in the near future with regard to the Native Courts. If it makes any change in the matter of appointment of the members of those Courts then this will materially increase the importance of the Mixed Courts, and the latter will be fully justified in insisting on an even higher grading than is at present being asked for.

A Remarkable Flying Escape.

With reference to the details given in the London press in connection with the recent aeroplane accident at Heliopolis in which Air Vice-Commodore Drew had such a miraculous escape, it is incorrect to say that he crashed. The facts are that his machine caught fire in mid-air, but he managed to make a most wonderful landing, which, to quote a pilot of experience, was due at least seventy per cent. to Commodore Drew's cool-headedness and skill.

Another Englishman Brutally Shot.

The Anglo-Egyptian community received a terrible shock on Wednesday when it learnt of the murder of Bimbashi Cave, one of the Assistant Commandants of the Cairo City Police. Bimbashi Cave was cycling home from his office at about 1.30 p.m. when he was fired at from behind. No less than six bullet wounds were found in his body, and death took place within half-an-hour. An English lady cyclist, who was passing at the time, most courageously followed the assassin, but he managed to evade her. Bimbashi Cave, who had had long service under the Egyptian Government, was one of the most efficient and popular members of the Police Force, and he will be a serious loss to the Public Security Department. The Anglo-Egyptian community is getting decidedly restive at these repeated murders of its members without any of the assassins being brought to justice; and it is hoped that for the honour of Egypt the Egyptians now in charge of the Public Security Department will succeed in putting a stop to these cowardly and senseless attacks on men who are merely doing their duty.

It is interesting to note that, when it comes to crimes in which Egyptians are the victims, and particularly where the motive is not political, the Public Security authorities rarely fail in the end to lay their hands on the culprits. During the past year there have been several important crimes in Egypt in some of which it looked at the outset hopeless to expect to trace the murderers. In each instance the Police succeeded in bringing the men and women to book. It is perhaps not an unfair deduction to make that, in crimes where the motive is political, and particularly where Englishmen are the victims, there is a bond of sympathy between the assassins and the general public which renders the usual channels of information and detection utterly useless. It is to be feared that in these circumstances until some radical reorganisation in the Public Security administration is introduced, and different methods are adopted, no greater success will meet the efforts to detect the authors of these political crimes. Further, unless whenever an offence is brought home to any man drastic punishment is inflicted on him, all the efforts to put an end to these cowardly attacks will prove unavailable. In this latter connection I have

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

heard on every side the view that owing to the mistaken leniency with which they have handled recent cases the military authorities bear a grave responsibility in regard to the shootings which have latterly taken place.

SUDAN.

Khartoum, May 20.

The Political Situation.

The Egyptian Press has latterly given a very considerable amount of attention to the Sudan and has published various astounding statements as regards the wish of the inhabitants of this country to become subject to Egyptian domination and to have representatives in the legislative council. It is unfortunate that Ramadan should have been chosen in which to give vent to this hysterical outburst, as it is a period during which the great religious chiefs and influential notables of the country have to observe a strict retreat, as behoves good Moslems and also as an example of piety to their following. The 27th of this month, however, will see the end of Ramadan, when some interesting statements will be made by those members of the Sudan Delegation who were alleged to have been forcibly conducted to England in July 1919 and coerced into false expressions of loyalty to the British Empire. That a certain very small community are in favour of Egyptian suzerainty is beyond doubt, and it is worthy of note that this clique is composed for the most part of members of clubs frequented by ex-schoolboys and students of the Gordon College who have imbibed the doctrines of their Egyptian teachers. There is also a certain amount of disloyalty among the very junior commissioned Black officers who have been posted to units with a majority of Egyptian officers. The numbers of these would-be patriots are very small, and a firm attitude on the part of the Government to all seditionmongers would materially reduce their ranks.

What is not recognized by the Egyptian propagandist is that the great nomad tribes of the Northern or Mohammedan Sudan are violently anti-Egyptian, and far from being coerced into expression of loyalty to the British Empire and distaste for Egyptian domination, it is a matter of extreme difficulty to get them to moderate their language when given an opportunity of making known their ideas, as at the Garden Party given by the Acting Governor-General on the return of the High Commissioner from his trip to the South. On this occasion some thirty odd Sheikhs and Nazirs of the more important tribes of the Northern Sudan were presented to his Excellency, and were unanimous in their request that an assurance be given that they would never be placed under Egyptian rule. In some cases the Sheikhs went so far as to demand the removal of Egyptians from all administrative appointments, and accused them of various sins, from bribery to open sedition. The Nazirs of the Hadendoa and Beni Amer spoke perhaps more forcibly to the point than any others, as for various reasons the Egyptian is intensely disliked in the Red Sea Province.

The situation in general is becoming more poignant, and any occurrence that would force the hands of the Imperial Government into taking over the Sudan from Egypt would be welcomed by all who are interested in the country and genuinely concerned as to its future welfare.

The Beit el-Amana.

An interesting land-mark in the annals of the Sudan has been lost through the destruction by fire of the Beit el-Amana, resulting in the loss of many thousand pounds worth of Government stores. This is the old Beit el-Mal of the Khalifa, and has been used for many years as the central Government store for equipment, stationery, leather, etc. Fortunately for the Government a very considerable number of issues had been made before the fire took place, and the loss was not so heavy as it might have been. The incident, however, should have considerable moral effect as evidencing the false economy

of refraining from expending money on fire-fighting appliances. There appears to be no system of fire-hydrants in Omdurman, or, if they do exist, their utility is negated by the fact that the pumping plant on the river bank only works during the day, or when the gentleman in charge of the pump is not too overcome by fatigue to see that the plant is functioning. In any case it appears that water is not available in sufficient quantity to be of any use, and the various units of the Egyptian Army stationed in Omdurman were turned out to do their best with picks and shovels. Insurance companies covering risks in Omdurman will be fully justified in doubling their rates in view of the utter lack of any practical system of fire-prevention.

As a result of the destruction of the depot it is possible that the Government will see fit to build a new store centre in Khartoum, which would result in a very considerable economy in administration of the Department concerned. Until the old Beit el-Amana was destroyed, stores were received in Khartoum, transported thence to Omdurman, and deposited there. On issue, the same stores were brought all the way back from Omdurman by boat, and despatched to their several destinations, thus necessitating four extra and unnecessary handlings. Whilst sympathising with the Government in their trouble, we would respectfully suggest that they adopt for their motto "All things work together for good."

ROUMANIA.

Bucharest, May 24.

Roumania's National Anniversary.

May 10 (Old Style), Roumania's National Fete in commemoration of the anniversary of her independence (1877), her elevation to the rank of Kingdom (1881), and the union of all Roumanians (1859 and 1918)—was again celebrated with traditional pomp and ceremony amid the enthusiasm of the population. The capital presented a very festive aspect, and the national colours were displayed all over the town. Special attention was given to the decoration of the route leading from the Royal Palace to the Cathedral, along which the Royal family drove in state to attend the *Te Deum*; while on the Boulevard Academie, in front of the statue of Michael the Brave, two pavilions were erected, one for the Royal family and the Diplomatic Corps, and another for high officials of State.

At dawn the customary twenty-one guns announced the solemnity of the day, and very soon after the route of the procession began to be thronged by dense crowds eager to see the Royal family and the military parade. In the absence of the King and Queen, who are still detained in Athens by the illness of their daughter, the Duchess of Sparta, it fell for the first time to the Crown Prince to perform the royal duties at the military parade on this auspicious occasion. This circumstance did not fail to have an additional point of attraction for the public. During the parade Prince Carol and Prince Nicolas by his side were on horseback, while Princesses Helen, Marie and Ileana of Roumania and Princess Irene of Greece were seated in the Royal Pavilion. Prince Paul, cousin of the King of Yugoslavia, being on an *incognito* visit, could not participate at the ceremony in an official manner, but witnessed the parade from the balcony of the University just opposite the pavilions. Needless to say both the Royal family and the parading troops were enthusiastically cheered by the people. The rest of the day was devoted to other popular festivities organised by scholastic authorities.

Princess Elisabeth's Illness.

A few days ago the news from Athens about the condition of Princess Elisabeth was again very disquieting. A fresh seat of infection was discovered, necessitating an immediate operation, whereby 300 grammes of water were extracted from the lung. Since the operation, however, the patient's condition has improved considerably, and according to the latest

bulletins from Athens her state of health continues to improve, so that her parents are expected to leave Athens for Bucharest on Thursday, May 25.

Postponement of Royal Wedding.

It is officially announced that, owing to the illness of Princess Elisabeth, the wedding of King Alexander and Princess Marie has been postponed to June 8.

General News.

Prince Nicholas of Roumania returned from London on Saturday, May 18, in order to attend his sister's wedding.

Prince Paul of Karageorgevitch, the cousin of King Alexander of Yugoslavia, arrived in Bucharest from Belgrade on Sunday, May 19, on a private visit to the Roumanian Royal family, in connection with the wedding arrangements.

There are again reports from the Dobruja that *Komitajis* are attacking the villages on the Roumanian side of the Dobruja frontier. Several inhabitants are said to have been killed and wounded, besides many robberies having taken place.

It is announced from Paris that M. Poincaré, at a dinner given in honour of M. Jon I. C. Bratianu, presented the Roumanian Prime Minister with the Grand Cross of the Legion d'Honneur.

BULGARIA.

Sofia, May 22.

Wrangel's Army.

Attention is still very much centred on Wrangel's Army. The Inter-Allied Military Organ of Liquidation have been ordered by Paris to disarm the Wrangelists, whilst the Bulgarian Government are insisting that they must evacuate the barracks they are now occupying.

General Wrangel has addressed Notes and telegrams from Belgrade to the Government, the contents of which are barely worth recording. They hint at vengeance and remind Bulgaria of the great debt she owes to Russia. If the truth be told, Bulgarians are getting heartily sick of being told what they owe to Russia, and are asking why the Russians choose to come to Bulgaria if they have such a poor opinion of the country.

Numerous arrests and deportations of Wrangelist officers have taken place, but at the time of writing the excitement seems to be somewhat calming down. It is, however, necessary to state that the ridiculous rumour afloat to the effect that an English officer has been the indirect cause of the arrest of Colonel Samohvaloff and the subsequent scandal, is absolutely false. The arrest of Colonel Samohvaloff was carried out by the Bulgarian police without any outside hint or assistance.

Agrarians and Communists.

Perhaps the most interesting aspect of the Wrangel affair is the attitude of the Bulgarian Government towards the Soviet at Genoa. It is reported that M. Stambolisky has been in close touch with M. Rakovsky, and it is believed that the two statesmen have come to an unofficial agreement regarding the policy Bulgaria intends to pursue towards Moscow. The Agrarians and the local Communists have certainly been more friendly of late, although this is hardly to be wondered at considering that the Bourgeois Parties are now more or less united in a solid *bloc*.

It has often been said that the Agrarian Government will gradually turn Communist, and whilst this possibility is remote, and in the opinion of the writer unlikely, it is a contingency which must always be borne in mind.

The Bulgarian peasant, who constitutes the backbone of the Agrarian Party, is opposed to Communism; but there are certain groups which lack the sagacity of the peasants and which have distinct leadings towards Communism. Up to the present the pro-Communists are in a minority, and they can only become dangerous if the Party leaders come round to the same view. The Congress of the Agrarian Party next week should prove a good criterion in this respect.

A Street Murder.

Last night, while on his way to dinner at the Union Club, M. Alexandre Grecoff was fired at three times by an unknown assailant. Death was instantaneous, and nothing more has been heard of the assassin. M. Grecoff was formerly Chargé d'Affaires at Berne and was at the time of his death Editor-in-Chief of the new Opposition newspaper *Slovo*. His death has caused a great sensation both in Diplomatic and in Bulgarian circles, where he was very widely known and respected.

The King's Position.

Persons who are in close touch with King Boris are of opinion that the three-and-a-half years which have elapsed since his succession to the throne have told very heavily on the young Sovereign.

He has become pensive and is inclined to worry over the affairs of his realm. This is not surprising, as his position is not an enviable one. He has not left Bulgaria since becoming King, and has led a very solitary existence, with practically no friends and advisers. Lately he has had his sisters with him, but as regards male companionship has had to rely on his Aide-de-Camp and Secretaries.

M. Stambolisky visits him frequently, and relations between the King and Prime Minister are understood to be good. The King's attitude towards the present Government is unknown, but it is felt that he desires to dissociate himself entirely from the unconstitutional methods of his father. He aims at ruling, not governing. M. Stambolisky has several times referred to this trait in the young King's character, implying that Boris was as great an asset as Ferdinand was a drawback.

In these circumstances, all thinking people wish King Boris to retain his throne, with the prospect of his obtaining greater influence in times to come. It is, however, said that he is wearying of his solitude and his helpless position, and that the thought of abdication has entered his mind. No confirmation of the rumour is forthcoming, and there is no doubt that such an act would be a national misfortune. King Boris stands for all that is best in the Bulgarian people, and it may well be that a day will come when he will see the reward of his quiet labours.

TURKEY.

Constantinople, May 25.

The Angora Government's Defence.

The official and semi-official statements issued by the Angora Government in reply to the reports communicated for publication by Major Yowell and his colleagues from Kharput, make interesting reading. The first rejoinder made by the Angora Government consisted of a denial that any massacres of Armenians had been commenced in the Kharput area. Since the American statement contained no such accusation, the rejoinder was feeble, and the "Commissariat of the Interior" therefore caused the Anatolian Agency to publish, on May 22, a more detailed reply, in which Major Yowell, Doctor Ward, and other Americans are accused of having gone to Anatolia for the express purpose of creating discord,—for which reason they were invited to leave the country. These gentlemen, therefore, according to the Commissariat of the Interior, formulated "spiteful and unjust accusations, of which *The Times* correspondent in Constantinople, in his turn, made himself the interpreter," and in reply to these "calumnies" it was considered "suitable" to make the following declarations:—

1. By measures taken at the time, and laws elaborated for the purpose, the government of the Great National Assembly has made allotment (*adjugé la location*) of the landed property abandoned by Armenians, by following in this operation the same procedure as that in force concerning State property. Sums derived from this allotment are paid into a deposit account opened in the name of the proprietors of the above-mentioned properties. Hitherto no requisition concerning these

goods has been carried out by the Angora Government.

2. The legal rights of Armenians are safeguarded by the Courts.
 3. The rights of inheritance of Christian elements are not subject to any restriction. Christians benefit to the same extent as Moslems from the law of inheritance. Reference to the files of the Courts within the limits of Nationalist territory will be sufficient to prove this truth.
 4. Male Christians are never imprisoned unless legal necessity requires such a measure. The registers of places of detention contain the substance for the refutation of such an accusation.
 5. No Christian woman is employed against her will in Moslem families. Information of this nature is nothing else but the application of a harmful plan intended to discredit Turks in the eyes of the world.
 6. No example can be cited of any Turkish official who has made a fortune by pillaging Christians. Turkish officials are suffering privations every day for the realisation of our national aspirations, and would not soil their conscience and their honour by pillage.
 7. With regard to the Greeks, at a moment when the National Government, animated by a sacred ideal of national liberty and independence, although deprived of every means, was making unexampled efforts to ensure the defence of the country, it is difficult to conceive any law which would prevent it from using its right to defence against those who have committed the cowardice of striking its armies in the back. Certain suspected individuals who have been conducted to the Interior suffered no (ill) treatment in the course of their removal, and were left at liberty in their new dwelling place. The sick and the poor coming under this category are protected by the local authorities, and enjoy the liberty of corresponding with their relations. A certain number of them have even succeeded in making fortunes. The records of the agricultural banks clearly prove that funds are despatched by Greeks to their families.
- Before such a truth, to pretend that the Nationalist Government is pursuing towards this element a policy of extermination can only be the expression of pure calumny.
8. As for the accusation that the Government has delivered Christian women and young girls to Turkish passions, this is likewise devoid of all foundation, and is part of a plan which our enemies are trying to carry out to arouse the public opinion of the world against us.

The announcement terminates with an appeal to Americans to defend the truth by publishing what they have seen.

Those who have had any experience of Young Turk administration will realise that item 1 is a plain avowal of the continuation of the policy inaugurated by the Unionists regarding Armenian property, "abandoned"—as the Unionists euphemistically termed it—for the simple reason that the owners had been either exiled or slaughtered. The repeated mention of the "Courts" is decidedly interesting in view of the operations of the notorious "Revolutionary Tribunals" (*Istiklal Mahakemesi*) which are the Anatolian equivalent of the Bolshevik "Tché-ka." Item 7, is worth more than a cursory glance, for it might have been composed by the late lamented Talaat to justify his policy towards the Armenians. It would also be interesting to know whether one of the lucky Greeks who have made fortunes happens to be the reverend Papa Eftim, the priest who claims that the Orthodox Christians of Anatolia are *converted Turks*, and who is described as the "General Commissioner and Representative of the Orthodox Church of Anatolia." This good gentleman is presiding at Kaisarieh over a congress for the organisation of the Orthodox Church of Anatolia, and on May 23, the

Anatolian Agency published in his name a refutation^{ot} of the American allegations in right good Kemalist style. After this, what can the Americans do but hide their heads in shame?

The occasion has also been seized for the intensification of the anti-British campaign in the Anatolian press, which is surpassing even itself in scurrility. Amongst other amusing suggestions made by the Anatolian Agency as a rejoinder to the proposal to send an international commission to Anatolia, the Angora Government calls upon itself to send a commission to investigate British atrocities in India! Incidentally, no British commission will be permitted to go to Anatolia.

Russo-Turkish Relations.

Recent reports from Anatolia indicate that at one moment, a certain coolness arose between the Angora Government and the Bolshevists owing to the reports of secret negotiations between Mr. Lloyd George and M. Chicherin, but any misunderstanding that may have existed was quickly dispersed by the arrival of a considerable quantity of Russian gold. The financial situation of the Angora Government has been desperate, but all arrears of pay have now been made good, and the situation is once again stabilised. In return, to judge from appearances, the Bolshevists have been permitted to develop an extensive propaganda campaign in Anatolia. In addition to a Communist weekly review entitled *Yeni Hayat* ("The New Life"), a new daily has been authorised publication by the Angora press bureau, which is under the direction of the notorious Young Turk propagandist, Ahmed Aghaieff. It is also reported that when Ramadan is over, negotiations will be commenced between Mustapha Kemal and Araloff for the conclusion of a new treaty between Anatolia and the Soviet Government, which will be of much greater importance than the existing "Treaty of Friendship." There is, in fact, every indication that the Kemalists are more than ever under the influence of the Russians, and that French efforts to win them away from the Russians are doomed to complete failure.

CYPRUS.

Nicosia, (undated.)

The Government and the National Council.

The so-called "National Council," having submitted a memorial, asking for union with Greece, the Greek Archbishop has received, through the Chief Secretary, a reply stating that the memorial of the "self-styled National Council" has been submitted to the Secretary of State for the Colonies. The Minister has nothing to add to the letter communicated on June 1, 1921, stating that the Government of His Majesty can hold out no hope that it will agree to the union of the island with Greece; and that the proposal that a plebiscite should be taken cannot be entertained. Needless to say, comments on the reply are similar to those made on many previous occasions, the allusion to the "National Council" as self-styled being specially resented. The agitators have the presumption to call it "the only genuinely representative body in the island." The comic paper *Peirasmos* continues to make fun of the situation, which certainly has its ludicrous aspect. It does not spare its compatriots. Referring *e.g.*, to the foolish resolution of the "National Council" which directed Greek Cypriots not to take part in the Races, if gives other "Draconic resolutions" to the effect that Cypriots are prohibited from indulging in any kind of sport, hockey, lawn tennis, football and riding, from drinking tea or whisky, smoking pipes, wearing helmets from loving any animals or treating them well, from being punctual or clean, or reading during meals."

Russian Refugees for Bulgaria.

The Russian refugees, numbering about 500, have been notified that they will have to leave Cyprus on May 16, by steamship from Egypt, which will bring their compatriots now in that country. The refugees are much distressed by this decision, especially by the order that they are to be settled in Bulgaria, as they had been previously given to understand that they would be sent

to Serbia. Those at Nicosia have begged that they may be allowed to remain there, as they have all found employment which renders them quite independent of help. Several of them are professors who have been teaching at the Greek Gymnasium and the High School for Girls. Permission has been given to a few only to remain, including Dr. Schmitt, a distinguished surgeon, two other doctors, and two officials of the Imperial Ottoman Bank. Permission has been refused to all others. They are being sent to the Refugee Camp at Limassol, at which port they will embark. The Greek community are expressing their gratitude for the various services rendered by Russians, by gifts of money and in other ways.

General News.

The High Commissioner, Mr. M. Stevenson, has been confined to his room by slight indisposition. As soon as possible after recovery, he will proceed to England, with his family, on leave.

An order in Council prohibits recruiting for the military or naval service of any State.

An order of the High Commissioner prohibits all exportation of cows, heifers, mares and foals.

The appointment of Major Flinn, O.B.E., as Assistant Secretary to the Government is confirmed.

PALESTINE EXPLORATION FUND.

The Fifty-sixth Annual General Meeting of the Palestine Exploration Fund was held in the rooms of the Royal Society, Burlington House, at 4 p.m., on May 30, the Right Hon. Sir Herbert Samuel, P.C., G.B.E., High Commissioner for Palestine, in the chair.

After the Hon. Secretary, Dr. E. W. G. Masterman had read the Minutes of the last general meeting and the apologies for absence, the chairman moved the first resolution: "That the Report and Accounts for the year 1921, already printed and in the hands of the subscribers, be received and adopted." In the course of his speech the chairman said: "The new administration of Palestine, established after the happy disappearance of the Turk is, of course, sympathetic to the work of archaeological research. I trust that under that Administration the work of this Fund and of other bodies that are labouring in the same field, may be pursued with even greater success than prevailed in earlier days. The Administration of Palestine has established a Government Museum in which the fruits of research can be exhibited and it already reflects a considerable amount of credit on the Archaeological Department and on the Keeper of the Museum, Mr. Phythian Adams, who is working under the direction of Professor Garstang." After describing the Archaeological work of the American Universities and of the Jewish Archaeological Society, he proceeded—"I twice had the advantage of visiting the works of the Palestine Exploration Fund at Askalon . . . I was greatly impressed by the magnitude of the task which Professor Garstang had undertaken, and impressed also, as everyone must be, by the deep interest of some of the discoveries which he has made. Perhaps the most interesting, though by no means the most picturesque, was a cutting which has been made in a scrap at the edge of a hill going down about 30 feet which showed in various strata the remains of all the different civilisations that have occupied the spot . . . summarizing the history of about thirty centuries. In fact a gauge of history, one might say; a section through time." Re-

ferring to the balance sheet he added: "I was sad to see, on looking through the balance sheet, that during the last year not only was it necessary to sell out some investments to the extent of £500, but also it was necessary to reduce the balance with which you began this year by an equal sum. That is by no means a satisfactory state of things and I earnestly trust that the friends of the Fund will come forward and place at its disposal the resources which are needed if it is to fulfil its task of unearthing the treasures of history which the soil of Palestine still holds concealed."

Mr. Ronald Storrs, C.M.G., Governor of Jerusalem, in seconding the resolution, referred to the untold archaeological treasures which still remain buried in the neighbourhood of the Holy City and described the valuable and unique work of the 'pro-Jerusalem Society' which is endeavouring to preserve all the buildings of interest there and to preserve the city from disfigurements due to modern unsightly erections.

The Chairman of the Committee, Dr. D. Hogarth, D.Litt., C.M.G., referred to the serious loss the Society had had during the past year very especially in the death of Mr. Walter Morrison and Viscount Bryce, O.M., and proceeded to describe briefly the results of the excavations at Askalon and the plans for this season's excavations. In conclusion he announced that he was regretfully obliged, on account of increasing responsibilities at Oxford, to resign the position of Chairman of Committee, but was glad to say that Dr. Hall of the British Museum had been elected in his place. As Dr. Hall was unable to be present, some remarks by him on the prospects of Archaeological research in Palestine were read by Dr. Hogarth.

During the proceedings a resolution was submitted to the meeting by the Hon. Secretary, seconded by the Hon. Treasurer, Colonel Sir Charles Close, whereby some 500 of the regular subscribers to the Fund were put on to the 'General Committee' becoming thereby "Members of the Palestine Exploration Fund." This was carried unanimously. The executive committee and honorary officers were re-elected and after a hearty vote of thanks to Sir Herbert Samuel for presiding and the Council of the Royal Society for the loan of their Rooms the proceedings concluded.

The meeting was a very successful one and better attended than any annual meeting for several years.

TOPICS IN PARLIAMENT.

The subject headings are those given in the Official Report.

Government of the Sudan Loan (Amendment) Bill.—(Wednesday, 24th of May, published in O.R. No. 169, Thursday, 25th May.)

Greece and Turkey.—Egypt: Martial Law; Zaghloul Pasha.—(Thursday, 25th May.)

Egypt (Murder of British Subjects).—Palestine (Mandate).—Asia Minor (Atrocities).—Czecho-Slovakia (Commercial Treaty).—Bulgarian Prisoners.—Indian Affairs.—(Monday, 29th May.)

India: Civil Service (Appointments); Prisoners (Treatment).—Iraq (Budget).—Concessions, Palestine (Mr. Rutenberg).—Near East.—(Tuesday, 30th May.)

Egypt (Mr. Keown Boyd).—Iraq.—Near East (Atrocities).—India: Loans; Civil Servants (Annuity).—Concessions. Palestine (Mr. Rutenberg).—(Wednesday, 31st May.)

If you find this week's issue of THE NEAR EAST of interest, please help to make the Paper still more widely known by securing subscribers among your friends.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE MANDATE FOR IRAQ.

To the Editor of "The Near East."

Sir,—You very rightly concluded your leading article in your issue of May 11 with these words: "First of all its political status must be settled on satisfactory lines, and at the same time, Great Britain, having identified itself with the existing regime, must take without delay the few steps required to make that régime a success." I very much regret that your Correspondent in Baghdad does not see with your eyes. In relating certain happenings there he puts an unfriendly interpretation on the King's action. He talks too of "effendis" in a way that one on the spot should know was misleading. There is no extremist party of Effendis, nor is a hard and fast line to be drawn between effendis and tribesmen. What happened at Kerbella, which was more tribal than anything else and the largest political gathering ever known in Iraq, was in no way organised by extremists to "obtain an opinion unfavourable to the Mandate from the tribal leaders," and the resolution was passed unopposed.

This did two things. First, it asserted the determination to defend the country against the Wahabites—surely a most reasonable resolve—and secondly, it expressed the loyalty and confidence of those present in the King's ability to pursue a policy favourable to the interests of the country—in which again there is surely nothing unreasonable. On the contrary it coincides with the statesmanlike views expressed in your article I have already referred to. The handful of tribal sheikhs on the other hand who went to Baghdad were actuated by tribal motives; for they advocated a settlement which would have made them to all intents and purposes independent of the Central Government, and would have sounded the death-knell of the economic development of the country, now in its first small beginnings. The fact that the King was able to persuade them not to press their proposal shows his influence even over these few sheikhs who form an almost infinitesimal proportion of the people at large. This explanation of mine leaves a very different impression from your Correspondent's letter, which leads any reader to suppose that King

Faisal and the great mass of the inhabitants are against the English, a supposition that is entirely erroneous.

Your Correspondent too, in referring to the Moham-merah Conference, gives no credit to the King for his statesmanlike attitude which, as you state in your leading article, brought it to a successful conclusion. There can be no doubt that the firmness shown at the Kerbella Congress helped the agreement through.

If I may say so, your Correspondent, in the remarks he makes about the matters I have mentioned above, as in the question of Suleimaniya and the Kurds, shows the same spirit as inspired the policy followed in Mesopotamia before the arrival of Sir Percy Cox. In my opinion such views are calculated to harm both British and Arabs. They remind us of the reports which used to be submitted by certain British officials in Egypt before the troubles of 1919, when they were misled by sycophants and timeservers into thinking that the people, whose complaints never reached them, were perfectly satisfied with the actual régime. There is not the slightest doubt that from the Nakib of Baghdad, the Prime Minister and the great friend of the British, downwards through every class there is a confirmed antagonism to the Mandatory form. Arabs and Kurds will all join and support the Arab Government if they find that their Moslem King is not a man of straw, but one who is able to lead them to the realisation of their aspirations. As you have wisely said in your leading article, which I quote once again: "A Treaty must commend itself to the sense of the people as a whole, or it may share the fate of the Anglo-Persian Agreement."

I enclose my card, and remain,

PRO-ARAB.

THE JEWISH TITLE TO PALESTINE.

To the Editor of "The Near East."

Sir,—I shall be greatly obliged if you will allow me to comment on the extract from the article in the *Army Quarterly* quoted in your issue of to-day, although I am fully aware that the inclusion of this quotation in your journal does not necessarily imply that you are in agreement with the views expressed therein.

The writer of the article, in saying that "the Jews never held sovereignty over Palestine for more than 250 years," is guilty of the same perversion of history as that committed by Colonel Vivian Gabriel in his article in last January's *Edinburgh Review*, with which the *Army Quarterly* article has many striking affinities of argument and expression. The fact is, of course, that Palestine was under the sway of the Jewish people from the conquest by Joshua to the destruction of Jerusalem by Titus, a period of 1,500 years, which is even longer than the period of British control over the British Isles. The allegation that "on the same line of argument, the Moors have a better claim to Spain, the Italians to England," is a transparent piece of sophistry which should not deceive the most elementary student of history. The national home of the Moors or Arabs was Arabia and that of the ancient Italians or Romans was Italy, and the conquests they made were mere episodes in their national history. Neither nation owed to the country in which only a mere part of it lived for a time any fundamental or vital feature of its national life and development. But to Palestine the Jews owed everything: it was their national home, as Arabia is the national home of the Arabs; it was the land in which the Jews developed their national culture, language, polity, religion, customs, traditions. And to the Jews Palestine owed everything, for had it not been for their existence, development, and activity therein as a nation, had it not been for their religious genius and intellectual fertility, Palestine would never have become the Holy Land.

I am, etc.,

THE ABBASID CALIPHATE.

"THE ECLIPSE OF THE 'ABBASID CALIPHATE.'" Edited, Translated, and Elucidated by H. F. Amedroz, and D. S. Margoliouth, D.Litt., F.B.A. (Oxford: Basil Blackwell. 7 guineas.)

The seven volumes of Arabic and English, beautifully printed, and bound in attractive simplicity, bearing the above title, represent the labour of two well-known Arabic scholars, and constitute a very important addition to the list of first class works on Islamic history.

Volumes I-III contain original texts in Arabic; Volumes IV-VI an English translation; and Volume VII a short Preface and an admirable index by Professor Margoliouth.

The main topics of these volumes are the happenings in and around the Court of the Caliphs of Baghdad during the tenth century of our era, that is, from the Caliphate of Al Muqtadir to that of Al Qadir. The period is one of very great interest, and the three writers from whose works the Arabic texts are taken are the principal sources which have come down to us for the history of that period. As the general title given to these volumes implies, the period is one during which the power and authority of the Caliphs showed a gradual decline from which they but partially recovered, only to be totally extinguished by the Moghuls in the thirteenth century. Already in the ninth century the Abbasid Caliphs had not only lost many of their richest possessions in the East and West but at headquarters they were reduced to the position of mere figureheads within the Palace controlled and dominated by Turkish upstarts; and the tenth century witnessed the absorption of their remaining territory by the Buwaihids who, in A.D. 945 actually occupied Baghdad itself. The period is therefore one of great importance in the history of the Middle East, and especially for students of Persian history, in that it saw the partial resuscitation of indigenous rule in Persia. Space will not permit us to enter into any detail regarding the main narrative, which is now made accessible to English readers from first hand sources. As examples, however, of specially interesting features, reference may be made to a very full account of the scourging to death of Hallaj, the famous Sufi, which is most vividly narrated; and the quotation at length of a letter addressed by the famous Mahmud Sabuktigin to the Caliph of Baghdad on the occasion of his triumphant entry into Merv.

The Arabic text is taken—as we have said—from the chronicles of three different historians. Volumes I. and II. contain an edition of Books V. and VI. of the Universal History of Miskawaihi, whose narrative extends from A.H. 295-374 (A.D. 908-984). Tabari's famous chronicle goes down to A.H. 302 (A.D. 914), and was continued by Thabit ibn Sanan who goes down to 363 (973). Miskawaihi is therefore a continuation of this last rather than of Tabari, but from about 340 (951) onwards he is himself a first-hand authority. Volume III. contains the narrative from A.H. 370-389 (A.D. 980-998) as compiled by the Vezir Abu Shuja, and all that has come down to us of Hilal as Sabi's history, extending from A.H. 389-393 (A.D. 998-1002). The extract from Abu Shuja is actually an abridgement of the previous portion of Hilal as-Sabi which has been lost. It will hence be seen that from A.H. 295-393 (A.D. 908-1002) we have in these volumes an Arabic text and an English translation of the best authorities which have come down to us for this period of 100 years—corresponding to the tenth century of our era. Miskawaihi's chief aim was to write his history on what we should call "modern lines," that is to say, instead of producing a chronicle of facts arranged in due order as had been done by his great predecessor Tabari, he wished to present a series of events in such a manner as to form a connected narrative held together by an association of ideas and an underlying unity. His work shows a great advance on what had hitherto been achieved by Islamic historians, who, for the most part were apt to treat events on the lines of "Tradition" and be more occupied with adducing a list of successive

authorities for a statement, than with presenting the reader with a connected narrative, but even as it stands now in an admirable English translation it is for the student unacquainted with Arabic not always easy to follow. Our great regret is that owing to the enormous rise in the cost of printing, Professor Margoliouth's intention to add an introductory volume had to be abandoned. It is only to be hoped that he will see his way to supply an introduction in the near future, for we should then have a really serviceable and illuminating narrative of this interesting period.

The method of transcription adopted is not wholly satisfying, for while a distinction is made between the Arabic consonants, for reasons of economy long vowels are not indicated: it is true that these have been supplied in the index, but it is a pity that in certain cases such as the name Hamid where doubt might arise, the long vowel should not have been marked in the text.

The story of the publication of Miskawaihi's chronicle offers a romance in itself, for this important work having remained hidden in rare manuscript copies down to the beginning of the twentieth century suddenly became the centre of attraction to a number of persons interested in early Moslem history. A complete manuscript in six volumes was known to exist in Constantinople, and Prince Teano, a well known Italian patron and scholar, having procured a set of photographs of these Manuscripts invited the Trustees of the Gibb Memorial Fund to include a facsimile reproduction of the whole among their publications. In 1909 Volume I. duly appeared and in 1913 Volume V, as it had been decided to defer the publication of Volumes II. III and IV and to proceed at once with Volumes V and VI as being historically more important. The original Manuscript was not a very easy one to read and the facsimile even less so; Mr. Amedroz, one of the Gibb Trustees, who had devoted much time to the study of the period dealt with in Volumes V and VI—namely the tenth century—set about to transcribe and edit for the press these two Volumes so that before the facsimile of Volume VI had appeared, a printed text had been made ready for publication which rendered totally unnecessary the facsimile of these volumes. Such incidents as these are not unknown in the annals of Oriental research, but with so few workers all told in the field of such limited funds available for publication, their occurrence is much to be regretted.

Owing to the untimely death in 1917 of Mr. Amedroz, it fell to Professor Margoliouth to complete the scheme of texts and translations we now have before us, and for the purpose Mr. Amedroz bequeathed a certain sum of money. Professor Margoliouth is to be heartily congratulated on the admirable way in which he has completed the work left unfinished by his colleague; and the seven volumes under review must inevitably find a place in all Libraries which include Moslem history in their catalogue.

PERSONAL AND GENERAL.**To-Day.**

June 8 (New Style).

May 26 (Old Style).

Shawal 12, 1340 A.H. of the Moslem Calendar.

Sivan 12, 5682 of the Jewish Calendar.

M. Venizelos left London last week for Paris.

The Indian Police Dinner Club have arranged their annual reunion for June 8 (to-night) at the Hotel Metropole.

Viscount and Viscountess Erleigh are proceeding to India in July on a visit to the Viceroy and the Countess of Reading.

Sir Charles Bayley is to be in the chair at the annual Indian Civil Service Dinner at the Hotel Cecil to-night (Thursday).

Princess Antoine Bibesco has left London for her Paris house, 45, Quai de Bourbon, where she will be for the rest of the summer.

A Te Deum was sung at the Greek Church, Moscow Road, Bayswater, on Sunday, in celebration of the name-day of the King of the Hellenes.

The marriage arranged between Captain W. D. G. Batten, 3rd Q.A.O. Gurkha Rifles, and Miss Willson, took place at Twickenham on June 3.

Mr. Hamilton Fish Armstrong, of the Editorial Staff of the *New York Evening Post*, has completed a trip of investigation through the Balkans and Central Europe, and sailed for New York on the 'Homeric' on May 31.

M. Vintila Bratiano, Roumanian Minister of Finance and brother of the Prime Minister, was recently in London on a special mission to discuss an economic and financial *rapprochement* between Great Britain and Roumania.

A marriage has been arranged, and will take place immediately between Captain C. F. Gardner, late 35th Sikhs, and Gladys, widow of Brevet Colonel H. Street, C.M.G., R.F.A., and daughter of the late J. Fenwick Harrison, of King's Walden Bury, Hitchin.

The engagement is announced of Lieutenant A. J. L. Phillips, Royal Navy, H.M.S. Malcolm, only son of Colonel A. Lucian Phillips, Indian Army (retired), and of Mrs. Lucian Phillips, and Lettice, youngest daughter of the late Captain E.K.E. Spence, Bengal Staff Corps.

Monsignor R. Barry-Doyle, who has arrived in London from Constantinople, brought a cheque for the value of £1,402 to St. Dunstan's Hostel for Blinded Soldiers. He raised this sum with the assistance of the sergeants of the British Corps of Occupation at Constantinople.

The engagement is announced and the marriage will shortly take place, of Philip Sidney Woolf, Lahore, Punjab, youngest son of the late Sidney Woolf, Q.C., and Mrs. Sidney Woolf, and Margery Susan, younger daughter of Dr. and Mrs. James R. Lownds, Hillands, Bedham, Essex.

THE PERSIA SOCIETY.

President: Lord Lamington, G.G.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia,

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

The engagement is announced of Ernest George Jolliffe, son of the late Mr. Ernest David Meade Jolliffe, of Sea View, Isle of Wight, and Margaret Lydia Annandale Scott, eldest daughter of Mr. Alexander Scott, Darjeeling, India, and niece of Mrs. Burgoyne-Johnson, 3, Hans Crescent S.W.1.

The marriage will take place in July between Major L. B. L. Seckham, M.C., the Lancashire Fusiliers, only son of Colonel Bassett T. Seckham, D.S.O., Whittington Old Hall, Lichfield Staffs, and Nora, daughter of the late Surgeon-General Sir Gerald Bomford, K.C.I.E., I.M.S., and of Lady Bomford, Dover.

A marriage has been arranged, and will take place this summer in England, between Cecil Pownall Browne, Sudan Political Service, son of the late E. W. Browne and Mrs. Browne of 7, Foulis Terrace, Onslow Square, S.W., and Margaret Laing, of Wycombe, Kingswood, Surrey, elder daughter of the late Alexander Laing.

Sir Herbert Samuel, High Commissioner for Palestine, attended on June 1 a meeting of the Executive of the Zionist Organisation at the Central Office of the Organisation in Great Russell Street. Dr. Weizmann, President of the Zionist Organisation, presided. A number of important questions were discussed, particularly the question of immigration into Palestine.

FOREIGN DECORATIONS.

The King has been pleased to grant permission to wear the undermentioned decorations, which have been conferred in recognition of valuable services rendered during the war:

Order of the Crown of Roumania.

Grand Cross.—Sir Albert K. Rollit, Consul-General of Roumania in London.

Cross of Commander.—Mr. W. H. Crawford Price, Editor of the *Balkan Review*.

Cross of Officer.—Mr. W. T. Parker, of the *Morning Post*.

Order of Saint Sava (Serbia).

Class V.—Miss M. B. Baker, of Bushey, Herts; Miss J. E. Lewis, of Oxford. (For services in connection with the Serbian Relief Fund.)

Order of El Nahda (Hejaz).

Fourth Class.—Sub-Inspector Hakim Said Hasan, Police Officer, attached to the British Agency at Jeddah.

Order of the Nile (Egypt).

Fourth Class.—Capt. H. Gardner, M.C., R.A.; Capt. H. D. Wise, M.C., 18th Hussars; Capt. D. H. Ferguson, M.C., I.A.R. of O.; and Capt. P. S. Brindley, M.C., 3rd (Militia) Bn., R. Warwick. R. (for services connected with the operations against the Garjak Nuers in the Upper Nile and Pibor District, 1919-1920).

OBITUARY.

We regret to announce the accidental death of Sir John Rees, Member of Parliament for East Nottingham. Sir John was for many years connected with the Indian Civil service, being formerly Under-Secretary to the Madras Government, and civil and sessions judge. He took great interest in Eastern and particularly Indian affairs, and in Parliament lost no opportunity of insisting that in disputes between Christians and Moslems it was not necessarily the latter who were wrong and the former right.

BAGHDAD AIR MAIL.

The Postmaster-General states that the air mail for Baghdad, which was dispatched from London, on May 18, reached Baghdad on May 26. This is a particularly notable achievement, as the normal time occupied in transmission by the combined ordinary and air route is between eleven and eighteen days, and by ordinary route all the way it is about twenty-nine days.

The next air mail to Baghdad will be dispatched from London on Thursday, June 15.

BIRTHDAY HONOURS.

The Honours List issued on Saturday, the fifty-seventh birthday of the King, includes five new peers, fifteen baronets, and forty-two knights bachelor, besides appointments to various orders of knighthood.

Particular interest is, naturally, felt by, and genuine pleasure is afforded to, all those associated in any way with *THE NEAR EAST*, in the honour conferred upon Mr. Robert Septimus Gardiner, one of the proprietors of this journal. Among the other honours announced which have a special interest for our readers in the Near and Middle East are the following:—

BARONETS.

Black, Robert James.

Chairman, Mercantile Bank of India since 1906. Director of Shell Transport Company and of the London Bank of Australia. Identified with many charitable undertakings. Has been an important factor in stabilizing and carrying on Anglo-Indian finance.

Moynihan, Sir Berkeley George Andrew, K.C.M.G., C.B., M.B., F.R.C.S.

Army Medical Advisory Board. Professor of Clinical Surgery, University of Leeds. Hon. Surgeon, Leeds General Infirmary. Member of Council of Royal College of Surgeons of England.

Norton-Griffiths, Lieut.-Col. Sir John, K.C.B., D.S.O., M.P.

M.P. for Wednesbury from 1910 to 1918 and for Wandsworth Central since 1918. Late Lieut.-Col. 2nd King Edward's Horse. Rendered valuable war services.

KNIGHTS.

Crowe, Edward Thomas Frederick, C.M.G.

Commercial Counsellor at H.M. Embassy at Tokyo. A senior Member of the Commercial Diplomatic Service.

Gardiner, Robert Septimus.

Principal proprietor of *THE NEAR EAST*, a publication much valued in Egypt, Palestine and the East. Manager of important collieries and shipping undertakings in the North of England.

[Mr. Gardiner, who was formerly Chairman of the British Gas Light Company, is the founder and Managing Director of the Pelton Steamship Company; founder and Chairman of the Rodney Steamship Company; joint Managing Director of John Bowes & Partners Ltd., and General Manager of the Marley Hill Chemical Company and Stella Gill Coke and Bye-Products Company. Mr. Gardiner is a Knight of Grace of the Order of St. John of Jerusalem and an Officer of the Legion of Honour].

McCracken, Robert.

Chairman of the firm of Steel Brothers and Company, Fenchurch Street. Represented Burma in London Chamber of Commerce for many years. Generous contributor to London charities.

(India).

Sharp, Henry Esq., C.S.I., C.I.E.

Secretary to the Government of India, Education Department.

Giles, Robert Sydney, Esq.,

Vice-Chancellor, University of Rangoon, Burma.

Clarke, Reginald, Esq., C.I.E.

Commissioner of Police, Calcutta, Bengal.

de la Fosse, Claude Fraser, Esq., C.I.E.,

Director of Public Instruction (now on special duty), United Provinces.

Beachcroft, Charles Porten, Esq.,

Indian Civil Service (retired), late Puisne Judge, Calcutta High Court, Bengal.

ORDER OF THE BATH.

C.B. (Civil Division).

Lindsay, The Hon. Ronald Charles, C.V.O.

Minister Plenipotentiary in the Diplomatic Service, Assistant Under-Secretary for Foreign Affairs since January, 1921.

ORDER OF ST. MICHAEL AND ST. GEORGE. C.M.G.

Garbett, Colin Campbell, Esq., C.I.E.

Lately Political Secretary to the High Commissioner and Commander-in-Chief for Iraq.

ROYAL VICTORIAN ORDER.

G.C.V.O.

Reading, the Rt. Hon. Rufus Daniel, Earl of, G.C.B., G.M.S.I., G.M.I.E., K.C.V.O.

ORDER OF THE BATH.

K.C.B. (Military Division).

Delamain, Lieutenant-General Sir Walter Sinclair, K.C.M.G., C.B., D.S.O.

(Colonel, 117th Mahrattas), Indian Army, Adjutant-General Headquarters, India.

Wallace, Major-General Alexander, C.B.

Retired pay, late Indian Army.

C.B. (Military Division).

Frith, Colonel (temporary Colonel on the Staff) Gilbert Robertson, C.M.G., D.S.O.

Colonel on the Staff in charge of Administration, Iraq.

Dent, Colonel (temporary Colonel Commandant) Bertie Coore, C.M.G., D.S.O.

Commander, Baghdad District, Iraq.

Parr, Major-General Harington Owen, C.M.G.

Indian Army, Deputy Adjutant-General, Headquarters, India.

THE BALKAN ROYAL WEDDING.

The marriage this week of King Alexander of Yugoslavia and Princess Marie of Roumania is an event of particular importance to the Balkans. Already the Royal Houses of Roumania and Greece are linked together by a double alliance, and Europe may now look forward to the day when the ruling sovereigns of Roumania, Yugoslavia and Greece will be closely connected by personal relationships. For the moment we may pause to congratulate the families and countries chiefly concerned. King Alexander has won for himself as a man of sterling qualities and as a hardworking conscientious monarch the golden opinion of all those with whom he has come in contact abroad, as well as of his own subjects. His marriage has been eagerly awaited by the whole country, which will have good reason to approve his choice of a bride. The Queen Consort is a great-granddaughter of Queen Victoria (and the presence at the wedding of the Duke of York as " Sponsor " will remind both peoples of the fact), but she will be even more welcome in Yugoslavia as a daughter of the King of Roumania. In spite of all the conflicts that have made the Balkans the cockpit of Europe, Roumania and Serbia have never been at war with one another. For two campaigns they have been Allies, and it is fitting that the ordeal which they shared together in the last war should turn out to their common advantage by engendering a lively sense of community of interest. On this the alliance between the two Royal Houses sets a special seal of its own. The Yugoslavs have reason to rejoice that their monarch has chosen as his Queen one who will not only grace her position, but may also be relied upon to perpetuate the traditions of a homely nation, which require that the Queen should be the Mother of her people as well as the first Lady in the land. Queen Marie of Yugoslavia is eminently fitted for her responsible position by instinct and upbringing. If she owes her physical energy to her English descent, she may thank her Latin environment for her vivacity and ready wit, and her Queen Mother for the care with which she has been trained in the domestic arts ; without these she could hope to fill but a part of the role that she is undertaking in a Balkan country.

Apart from the immediate advantages that the Royal wedding will bring to Yugoslavia, we like to think that its ultimate influence will be much more widespread. The hope of the Balkan Peninsula as a whole, to which the destinies of Roumania are inevitably bound, although she lies wholly north of the Danube, as of the individual countries composing it, lies in their eventual co-operation. The form or degree of cohesion matters little : time or the conditions of the day will determine that. What is essential is that the several States should conscientiously keep before them as a goal to be striven for some kind of federation, which will always interpose a centripetal force to the tendency of each State to play for its own hand. Politically the advantages of federation are too obvious to call for comment. The largest of the four countries has only seventeen million inhabitants. Separately they count for little in the councils of Europe ; but as a single unit with a combined population of forty-five millions, they might speak on an equality with any Great Power. In the economic sphere a working federation of the Balkan States must prove still more valuable. Up to the present they have barely reached the threshold of development. Amply endowed with mineral resources, a productive soil and water-power, they form a self-contained unit capable, under scientific exploitation, of reaching a high standard of prosperity. What is chiefly needed is that efforts to this end should be correlated. A tentative move in the right direction at first will suffice, for any attempt to force the pace will defeat the object in view. National prejudices die hard in the Balkans, and it may not help the cause of federation that the first overtures should have been tinged with a communist colouring. Both Governments and peoples, however, have yet to recognize that the world will not stand still for the benefit of nations that act as though the only way to substantiate claims for present favours is by appeals to a mediaeval past. The time has come when the scales can be weighted only by what the people to-day are doing, not by the deeds of their great national heroes. For this reason the happy union of two or more of the ruling Houses is of the best possible augury, for it may turn the thoughts of the peoples to other forms of alliance for peaceful ends. Roumania and Yugoslavia are already members of the Little Entente ; but that body, though intended as a bulwark of peace, is based on military considerations. There is no reason why the Little Entente should not stand, if it can adapt itself to changing conditions ; but it cannot fill the place of a purely Balkan federation, consisting of Roumania, Yugoslavia, Greece, and Bulgaria (with or without Albania), which would rest on the sound basis of a single geographical unit. With the union, then, of the Yugoslav and Roumanian Royal Families, we may hope that a practical step has been taken towards the bringing into harmony of the policies and activities of the two nations, and that cooperation between them will prove a nucleus round which a federation of all the Balkan States can be established.

Alexander,
King of the
Serbs, Croats
and
Slovenes.

Princess Marie
of
Roumania.

THE BALKAN ROYAL WEDDING.

THE R.A.F. IN THE MIDDLE EAST.

By H. T. MONTAGUE BELL.

The Royal Air Force is shortly to be made responsible for the defence of, and the maintenance of order in, Iraq. A senior officer of the Air Service will be Commander-in-Chief, and will have under him, in addition to his Air Squadrons, a military force of all arms. In Palestine a General Officer of the Army will be in supreme command, but a considerable portion of his strength will be in the air, with detachments of armoured cars now included in the equipment of the Royal Air Force. The experiment is viewed with misgivings in some military circles; coinciding, as it does, with a drastic reduction of the strength of the Army, it is regarded as the thin end of the wedge for the supersession of land forces in favour of the junior Service. The value of air strength is not challenged; but it is held in these same circles that the right policy is to make aircraft supplementary to the Army and the Navy, not to raise it to the status of an independent Service.

Whatever views may be held on this point, there cannot be the least doubt that in the Middle East a good case can be made out for giving the Royal Air Force the widest possible scope, if only in order that the experience gained under conditions obtaining nowhere else may be available in the development of the new Service. The problems which the Force has to deal with in Iraq may not be on all fours with the question of the defence of the British Isles or with the conditions of continental warfare; but it is so essentially in its element there, that it would be hard to point to a better training ground for developing the qualities on which success in the air depends. As far as the three Services are concerned different conditions and environment breed the qualifications suited to each arm, and it would be strange indeed if flying did not engender rapidity of thought and action, resourcefulness and self-reliance, without which no airman can be a master of his science. It may be expected too that from the wider horizon that is his in the physical world the airman will derive the habit of a broader mental outlook. If, then, these are the special qualities associated with the Air Service, they are more likely to develop in their own atmosphere than if they are confined within an artificial one; in other words, the nation stands a better chance of attaining the standard of air defence and offence which it requires, if the Royal Air Force is "on its own" than if it is subordinated to the Army and the Navy.

It is an axiom that Great Britain can only exercise control in Iraq with a very light hand. There can be no question of large bodies of troops or of any wide distribution of smaller bodies. On the other hand there must be an adequate force, which has to be British for the time being, to ensure the safety of the country from without and to deter any disruptive tendencies within. Roughly speaking Iraq is in the form of a blunted isosceles triangle, with sides six hundred miles long on a three-hundred-mile base. Rail communication is represented by a single trunk line from Basra to Sharqat, with virtually only one branch line from Baghdad to Khanikin. Danger from without may threaten from any point along the two sides and the base, and will take the form of swift raids in comparatively small numbers rather than any serious hostile concentration, if we except the possibility of a declaration of war on the part of Turkey. Unless strong posts could be established along all the frontiers, a purely military force would be wholly at a disadvantage in

dealing with such raids, and if once it were recognized that Iraq could be attacked with more or less impunity, the country would not long enjoy peace on its borders. The temptation that would otherwise be always present to its neighbours to indulge in raids can only be removed by the knowledge that swift and effective punishment is likely to follow. No purely military force can hope to inspire this dread throughout the length and breadth of Iraq. True, the rebellion of 1920 was effectively suppressed by the Army of Occupation, but this was then of a strength that has not been maintained since and the enemy, being within the country, could be dealt with in the Army's own time. That the Air Force can act swiftly there can be no doubt. From one or other of the three centres, Mosul, Baghdad and Basra, there is no point on the frontier that cannot be reached by aeroplane within three hours of the receipt of any warning. Whether a punitive expedition is effective from the air must be judged from the point of view of the potential raiders rather than by European experience, and on this matter there is a strong consensus of opinion that the Royal Air Force is equal to the task. Certain it is that the people of Iraq and their neighbours have a wholesome respect for aeroplanes and are under no illusion as to their capacity for succour and for punishment. It is not contended that the Air Force can round

A Vickers-Vernon Troop-carrying Aeroplane. This machine carries 12 persons in addition to two pilots.

off its work in the complete way that a military force might be expected to do it. In this connexion, however, it may be mentioned that the introduction into Iraq of troop-carrying aeroplanes will considerably enhance the punitive capacity of the Air Service. The machines of this type already in the country are those known as the Vickers-Vernon, capable of carrying twelve men in addition to two pilots. A few squadrons of these could furnish invaluable military support to an air expedition when the objective has been reached.

The measure of success achieved by aeroplanes against raiding parties is apt to vary inversely with the delay in coming into action. If time is given to the raiders to get away with their booty and to scatter, the amount of execution that can be done by bomb and machine gun is limited. For this reason the usefulness of the Air Force is necessarily curtailed when responsibility is divided, and reference, as on a recent occasion, has to be made to the British Government before hostile movements on the Iraq frontiers can be dealt with on the spot. Under the new order which is to come into operation in October, it will be in the interest both of

ASK FOR

WHITE HORSE WHISKY

BY APPOINTMENT

Iraq and of the Air Force if the latter is relieved of as many restrictions as possible upon its freedom of action. Intrinsically it is not a cheap arm, and economy in use is only compatible with maximum efficiency. If then the R.A.F. is charged with the defence of Iraq, the consideration that the Government of the country is Arab and the Air Force is British must be laid on one side. Responsibility for action should rest with the Officer commanding the Air Force in consultation with the Arab Government. The knowledge that any hostile gathering on the frontier or within it will bring down upon raiders or rebels within a few hours the dreaded peril from the air offers the surest means of maintaining peace for the country, and will enable the air strength employed to be kept at a minimum and will make for the highest efficiency of the Service.

I am aware that on this point I am preaching heresy, because it is an axiom of the British Constitution that ultimate authority rests with the civil authorities. In Iraq, however, we are dealing with an entirely novel set of conditions; precedent does not apply, and there is no reason why tradition should not be scrapped when it clashes with efficiency and success. For a period at least Great Britain has to assume responsibility for the security of Iraq; on grounds of economy she has decided to employ the Royal Air Force in the place of the Army, but unless the work is effectively done, there will be no saving of expense in the long run. If, then, it can be shown—as is undoubtedly the case—that real efficiency is impossible with divided responsibility, let the Air Force be free to act on its own initiative in co-operation only with the Arab Government. The British Empire will not be seriously involved, if a mistake should be made, and it is as easy to change an Air Force Commander-in-Chief as it is his military counterpart.

No one who has been brought in close touch with the Royal Air Force in the Middle East will question its capacity to handle a complicated problem with the same measure of success as would be expected from its sister services. Indeed the novelty of the position in Iraq may make its safeguarding a more congenial task to the youngest service than to the others. In saying this, however, one must not overlook the excellent work done by the late Commander-in-Chief, Major-General Sir Aylmer Haldane, who showed that he could not only suppress rebellion effectually, but could also win the respect and retain the goodwill of those who were at one time in arms against him. General Haldane appreciated the value in the East of the personal factor. The British will never maintain successful relations with the Arabs from a pedestal. Realizing this, General Haldane, undeterred by his inability to speak Arabic, went about the country, seeing as many of the Arabs as he could, and convincing them that the British Army was as useful a friend as it could be formidable as an enemy. In this way he set an example to the civil authorities, who, hard pressed by the amount of routine work that has to be done in Baghdad, are inclined to leave the rest of the country too much alone. It is more than likely that the High Commissioner's first visit of state by aeroplane to a distant Sheikh last March was prompted by the good work done in this respect by

General Haldane. Many a difficulty was smoothed over, and trouble probably averted by the General's cheery remarks or a happily-turned phrase. Air Vice-Marshal Sir John Salmond cannot do better than follow the former Commander-in-Chief's example in this respect. In the Air Force hitherto under the command of Group Captain A. E. Borton, whose brilliant record marks him out as among the most capable of R.A.F. officers, he will have an arm that leaves nothing to be desired in the keenness and efficiency of the personnel. (Whether the material is all that the Force could wish for is another matter, and it would not do to draw hasty conclusions from forced landings or the sultriness of the atmosphere when Rolls-Royce engines refuse to start.) The R.A.F. is not trammelled by red tape and tradition. Discipline in all the essentials is maintained as strictly as in the Army or Navy; but senior officers have been or still are (if need be, or the mood takes them) pilots themselves, and know that the man in the air must be left to his own judgment.

One result of the readiness to take responsibility, it may be noted in passing, is that the R.A.F. can do its work with a smaller personnel. For a long time to come the problems with which the Defence Force in Iraq will be confronted will call for quickness of decision, combined, it may be, with a sympathetic temperament and a ready wit. These are qualities essentially fostered by the atmosphere of the R.A.F., and the British taxpayer need have no anxiety that, if he gives it a free hand in Iraq, he will be let in for wars or other inconvenient commitments. The standard of success by which the R.A.F. will wish to be judged will be its capacity to prevent disturbances of the peace, not to punish them.

The Royal Air Force in the Middle East, however, can do other work than merely policing or defending Iraq. It has shown what can be done in overcoming the physical difficulties imposed upon British Imperial communications by the Arabian Desert. By blazing the trail from Cairo to Baghdad and by maintaining a regular postal service over the route for nearly a year, it has prepared the ground for commercial enterprise, which could never have been expected to take up the work without this preliminary help. The time is approaching when the Royal Air Force should be able to hand over the Cairo-Baghdad Service to a commercial undertaking. But Iraq was never meant to be a terminus in any international scheme of things, and from Cairo to Baghdad is only a single link in a chain that should connect Great Britain and India. Freed from having to maintain the Cairo-Baghdad Service, the R.A.F. in the Middle East can open and operate the route from Baghdad to India, until it is ready in turn to hand over this second section as well to private enterprise. With India as the terminus of the air route, there can be little question of its operation being commercially successful. From the passenger point of view the experience of to-day offers little, if any, criterion. The journey is being done under active service conditions; passengers are not encouraged, although right hospitably looked after when fortunate enough to be able to make the trip; the aeroplanes employed are war machines. it is desired to attract passengers, the conditions under which the journey is made will undergo material modification, for a different type of machine can be installed. It may be necessary, too, to change the route. A direct service between England and India could hardly ignore the claims of Constantinople as a stopping station. The stage from there to Baghdad would be preferable in many ways to the desert route between Egypt and Iraq. The former country would have its branch service, but would not be on the main route. These, however, are details which only the experts can decide. The chief thing for the British public or for those who aim at influencing public opinion in Air matters is to think Imperially, and to realize that in the Middle East, and particularly in Iraq, Great Britain has a training ground for her Air Force which cannot be duplicated elsewhere.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Rutenberg Contract.

The Times of May 29 begins an article on "The Rutenberg Monopoly" thus:—

The idea that Palestine must be modernized is, we suppose, to be regarded as an inevitable result of the acceptance of a mandate over the country by a great European Power. Palestine has been drawn into the current of modern history, and it will gradually adopt the ways and forms of the hurrying West. It is a little startling for those in whose minds Palestine still remains a quiet resting-place for sacred memories to hear of plans for drawing from the waters of the Jordan electric power for a network of factories and railways. That is the way events are moving, and if Palestine is to support a larger population than at present, obviously the resources of the land must be developed.

It then details the contract by which M. Rutenberg has secured a monopoly for the purveying of electric energy in Palestine, and says that although this engineer "disclaims any interest in politics," and in fact, "promises complete impartiality towards Jews and Arabs"—

The fact remains that in its present form the monopoly is distinctively Jewish. The political privileges possessed by the Zionist organization in Palestine have already been a source of friction and of considerable difficulty to the mandatory Power. If these privileges were to be reinforced by a concession that would give the Zionists, directly or indirectly, the economic control of the country, all the difficulties with which the British Administration is now faced would be very seriously intensified. According to Mr. Rutenberg's statement, the Palestine Government has reserved to itself the ultimate control over the scheme and also a share in the profits. Under what conditions? What are the findings of the legal and technical experts of the Colonial Office? Are essentially British interests and especially the interests of sound and impartial administration, completely secured? Who, again, is Mr. Rutenberg? Is the Colonial Office justified in giving him such a large share in the control of the immediate future of Palestine? It is high time that these questions were clearly answered, and we trust that the Colonial Office will make known without delay the character of the negotiations conducted with Mr. Rutenberg and the actual terms of this very important concession.

The Morning Post of May 31 takes up an even more distinctively national attitude, for it says:—

It is not merely that a concession involving control of the waters of the Jordan has been granted to a Russian Jew, but that the declared policy of the Palestine Administration was changed just so far as to permit the granting of that concession but not far enough to permit the granting of other concessions to British applicants, whose prior claim to consideration had been admitted. A British applicant, of unquestionable standing, who had a scheme for the reclamation of a large tract of land was refused a concession on the grounds that the Treaty of Peace with Turkey had not been ratified, and that the mandate of the League of Nations had not been promulgated. Another wholly British application—again on behalf of the most responsible people—was made nearly three years ago. It was for a concession to work the potash deposits of the Dead Sea, to utilise the waters of the Jordan in connection with the erection of the power-station necessary to the enterprise, and to build certain railways. The High Commissioner, to whom the matter was referred by the officials in this country, promised consideration of the project, but postponed definite action until the Turkish Peace Treaty and the Mandate of the League of Nations had been settled. That was in the spring of 1921. A year later the Rutenberg contract was revealed to the world, and, in response to the natural demand for explanations which followed, it was announced that the policy of the Palestine Administration had been changed in certain respects. The Administration had come to the conclusion—the Turkish Peace Treaty and the League of Nations Mandate notwithstanding—that it might consider the granting of certain concessions for enterprises of public utility, and such "certain concessions," oddly enough, included that for which Mr. Rutenberg bid, but excluded those for which application had been made by British subjects. It was discovered, for example, that the scheme for developing the Dead Sea potash fields—which three years before had been regarded so favourably—was barred, not only by respect for Peace Treaty and Mandate, but by the absence of appropriate mining legislation. How curious that when British schemes should be confronted with these clenched antagonisms, the way should be made so straight for that of Mr. Rutenberg, the Russian Jew. The old question recurs—what advantage then hath the Jew over the Gentile? Here is a matter into which the House of Commons might profitably press its investigations. Every circumstance in this transaction cries aloud for explanation, and the reluctance of the Government to provide the explanation strengthens suspicion.

UNITED SYNAGOGUE AND PALESTINE.

At the Council of the United Synagogue recently, Sir Robert Waley Cohen in the Chair, Mr. Newman's motion to the effect that provision should be made to collect "contributions, voluntary or compulsory, from members of the constituent synagogues for the purpose of the advancement of economic and social conditions in Palestine," was last by a large majority. The mover had accepted amendments to omit the words "compulsory or," and to insert the words "religious" before "economic and social"; but these concessions did not affect the general sense of the meeting, which was adverse to the proposal under the present conditions of political Zionism.

A French clerk, who had absconded from Paris with twelve thousand pounds, has been arrested in Athens, where his wife was giving a fancy-dress ball. He gave up two thousand pounds in cash and a new motor-car, explaining that four thousand had been given away, and that £2,500 would be found hidden in a cellar near Paris.

"THE HOUSE OF THE POISONER."

In Omdurman there is a ruin not far from the hospitals of the Church Missionary Society, known to the townsfolk as "the house of the poisoner." So little did the Sudanese understand or appreciate the self-sacrificing lives of the missionaries who worked for them over twenty years ago, that this was the name they gave to the first mission house. To-day large numbers of the Sudanese gladly take advantage of the hospital, and some are being trained as hospital assistants.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

A Loan for Roumania ?

It is essential for Roumania to obtain a substantial loan abroad if the country's reconstruction is to be carried on smoothly, but this has not proved an easy matter to arrange any more than it has for other Balkan countries. Progress in Roumania since the Armistice has not been sufficiently rapid to inspire confidence, which explains why Czecho-Slovakia, whose material resources are far less important than Roumania's, has been able to obtain financial assistance here without difficulty while Roumania has not. Negotiations have recently been entered into, however, in Paris and London as a result of which it is possible that the obstacle to granting a loan will be removed. Should an understanding be reached, it is far from improbable that a loan will be made jointly by France and Britain.

Roumania's Position.

The Paris negotiations have also covered the question of Roumania's indebtedness abroad. A satisfactory arrangement on this point, and the conclusion of a loan which would provide much-needed funds for the purchase of essential materials for reconstruction would mean much for Roumania, and given a fair harvest this year and the continuance of present satisfactory developments in the oilfields would bring within sight the time when the exchange will be nearer parity. Both as regards the harvest and the oilfields the outlook is more than promising. All the reports of Roumania's crops that we have so far received have been exceptionally favourable, while the periodical reports of the various oil undertakings speak volumes as to the development of Roumania's vital industry. Unfortunately until reconstruction is further advanced the oilfields cannot be the asset to the country that they should be.

Palestine's Resources.

If there has been a tendency somewhat to over-estimate the potentialities of Palestine the informative series of articles on the country's economic resources by Mr. Leonard Stein which have been appearing in these columns should serve as a valuable corrective. He has given a careful, measured view of the position as it is and the prospects as he sees them, and the verdict is briefly that a modified measure of development may be anticipated and in certain circumstances even very considerable progress. Agriculture must remain the country's mainstay, of course, and here the scope for advance under favourable conditions is undoubted. It is going too far at present to look upon it as a large granary. There will be time for such eulogies when the work of development has reached a further stage and it is possible to judge more certainly of the outlook. And it must be emphasized that the first essential of any sustained progress must be co-operation on the part of all concerned.

The Prospect.

Outside the realm of agriculture the prospects, Mr. Stein points out, are severely limited. There are a number of small industries in existence, and others are being started, and no doubt as time goes on a consider-

able field for employment will be found in this way, but for very obvious reasons there can be no question of industrial development on a considerable scale any more than there can be in Egypt or Mesopotamia or any other agricultural country. None of the necessary minerals are to be found in Palestine, and the only mineral of importance that the country seems likely to possess is oil. Of its resources of this mineral nothing certain is known so far, but obviously if it exists in paying quantities it will, as Mr. Stein says, materially affect the economic future of the country.

Oriental Telephone and Electric.

A very favourable review of the position of the Oriental Telephone and Electric Company was given at the general meeting last week by the chairman, Sir H. Babington Smith. He pointed out that at the company's own branches the business continued to expand and that there had been an increase of ten per cent. in the number of exchange lines during the year. The net proceeds were affected by the exchange, but the chairman stated that the prospects of further expansion were good. Dealing with the settlement of the question of the Indian licences, which will enable the companies to pursue their operations unhampered by uncertainty as to the future, the chairman said that the conditions accepted by the Government of India would, they believed, "enable the companies to provide a thoroughly efficient service on fairly remunerative terms, and will consequently make it possible further to raise the capital required for the normal growth and improvement of the systems."

The Empire Exhibition.

From many quarters very satisfactory evidence has been forthcoming of the interest that the prospect of an Empire Exhibition at Wembley Park in 1924 has aroused throughout the Empire. On another page will be found a letter from our Khartoum Correspondent discussing the Sudan's part in the Exhibition. The potentialities of the Sudan, as our Correspondent suggests, are too little known, and it is to be hoped that the fullest use will be made of the opportunity that the Exhibition will afford to demonstrate what the country can produce.

REPORTS FROM OUR OWN CORRESPONDENTS.

ROUMANIA.

Bucharest, May 24.

Roumano-German Reparations Conference.

The meeting of a Roumano-German Reparations Commission, which should have taken place on May 20, has been postponed by request of the German Government to a later date.

The settlement of the following questions will form the programme of this Commission: (1) Restitution of the Roumanian National Bank's deposit in Berlin before the war; (2) Settlement of the expenses incurred for the maintenance of the hostages; (3) Restitution of the sums paid by Roumania in partial fulfilment of the Bucharest Peace Treaty of 1918; (4) All reparations due to Roumania by Germany in accordance with the Versailles Treaty; (5) The Banca Generala banknotes issued during the German occupation; (6) The question of German property in Roumania under sequestration.

Roumania's Financial Arrangements Abroad.

The Roumanian Government has received very encouraging news about the progress of negotiations abroad regarding the various financial questions, and particularly with regard to the consolidation and conversion of the Treasury Bonds in private hands. The total value of these Treasury Bonds is estimated at about 1,400 million French francs. In this connection, M. Vintila Bratianu, the Minister of Finance, has been called to Paris by his brother, the Prime Minister, for the purpose of bringing to a close the advanced negotiations. M. Vintila Bratianu left for Paris on Tuesday night accompanied by his financial experts. This fact is very favourably commented on in competent circles here, for it is generally felt that the thorny question of consolidating Roumania's floating debt abroad is at last to be solved, and that it will bring in its wake a general improvement of this country's finances as well as of its rate of exchange.

Local papers report that the Consortium, which is to take over this financial operation, consists mainly of English Bankers, and that the conversion of these Treasury Bonds will be effected for a period of 30 years at an initial interest of 4 per cent., which will gradually rise to 5 per cent. The Governmental press emphasizes the fact that this financial arrangement will be accomplished without Roumania having to pledge any portion of her wealth or having to grant any kind of concession whatsoever.

It is further rumoured that M. Bratianu is also negotiating for a big loan, most likely in America.

Merchants' Debts in Foreign Currencies.

I mentioned in one of my previous letters that the Government is determined to come to the assistance of the merchants who have payments to make abroad in inflated foreign currencies. Negotiations between the Minister of Finance and the Banca Nationala and other big local banks are still in progress, and so far the following principle has been arrived at: A consortium of Roumanian Bankers headed by the Banca Nationala will guarantee to a corresponding group of foreign bankers of each respective country the Roumanian merchants' debts in foreign inflated currencies. On the other hand, the foreign creditors will be asked to extend payment over several years at a reasonable interest. The Roumanian merchants will guarantee the local bankers with adequate securities. This is more or less the underlying spirit of the scheme, as far as the Government and the local bankers are concerned, for the merchants are still pressing for a fixed rate of exchange as a basis, in order that they should know beforehand what their losses would amount to. As the question is still under discussion modifications are still possible.

The Government has now approved the contract concluded between the Ministry of Industry and Commerce and the Millers' Association, by which a quantity of 3,000 waggons (of ten tons) of first quality wheat flour is to be purchased at the price of 5.68 lei per kilogramme.

THE SUDAN.

Khartoum, May 20.

The Coming Empire Exhibition.

It is a source of gratification to all the commercial community that the Government have made known their intention of taking part in the Empire Exhibition to be held at Wembley Park early in 1924. The Sudan through force of circumstances is a parochial kind of country, and the outside world knows very little of its geography or trade potentialities. The Sudan official is a shy bird, and is noticeable for his disinclination to mix with people from other parts of the world when going on or coming from leave, and as he invariably travels in company with others of his ilk a very small amount of information about the country is disseminated by him to outsiders in the course of his travels. The commercial man is naturally much more garrulous, but there are so few of them in the country that they really do not count. Anything in the nature of publicity is, therefore, to be welcomed, and it is to be hoped that full advantage will be taken of this opportunity of showing what the Sudan can produce. A very interesting exhibit of coach building and wagon work could be put up by the railway authorities provided they are not stinted for funds, and an excellent display of leather-work, such as foot-gear and police equipment can be shown by the Prisons Department.

Owing to the lack of confidence in the status of the country, there are practically no important amounts invested in local industries with the exception of the very efficient ginning factories of the Sudan Plantations Syndicate at Wad Medani and Zeidab and a similar institution owned by Mr. Debbas at Suakin. A button factory exists at Atbara, which promises well, and a cement factory was put up at Makwar by the Sudan Construction Company, but this has since passed into the hands of the Government; and the onus of showing what can be done in the way of manufactured articles must therefore rest with the powers-that-be. It is rumoured that the Sudan Chamber of Commerce propose to make up a representative exhibit of the various raw products exported from the country, and it is to be hoped that their effort will be crowned with the success it deserves.

SOME IMPRESSIONS OF SERBIA.

Life in Nish.

(From a Correspondent.)

Nish, next to Belgrade, is the most important town in old Serbia. It was founded by the Romans, and was named by them Najsas. Frederick Barlarossa stayed in Najsas on his way to join the Crusade in the Holy Land.

In the modern part of the town the streets are fairly well laid out with some degree of regularity, but in other parts they can only be described as straggling. No doubt the Turkish occupation has much to do with this as there are many old Turkish houses with very low doors, low ceilings, and curiously shaped windows, placed indiscriminately. The most conspicuous buildings in the town are the Prefecture, a huge square block without any architectural beauty, the gymnasium, and the cathedral. During the building of the cathedral the Turks would not allow the cupolas to be of a certain height so that they should not be higher than the minarets of the mosques, hence the height of the cathedral is out of proportion to the size of the building.

The population is estimated at 30,000, and is composed of the polyglot races of the Balkans and the Orient. Life in Nish is monotonous. In the character of the people there is a strong tinge of Orientalism, but they are remarkably keen financiers; the accumulation of the *pare* is to them the Alpha and Omega of all things. In the evenings the *cafanas* are filled with men who drink bad wine and *rakuja*, play dominos and cards, the monotony being enlivened by the uncanny strains of the Serbian native bagpipes. In the best *cafanas* there is an orchestra composed of *Zigans* (gypsies) who play weird and unmelodious music. There is no theatre in Nish.

There is no canalization, the roads and pavements are execrable, and in rainy weather they become a quagmire. In the North-East part of the town across the river is an old Roman fort that the Turks used as a citadel. About four kilometres to the East of the town is Tchelicula, the place of skulls, so called because of a hill named Chigar at which place Steva Sendgelovitch, a Serbian chief fought a severe battle with the Turks. In order to prevent the Turks from capturing a large number of his troops he allowed them to approach near, and then exploded barrels of gunpowder by which means many Turks also the Serbians and their chief were killed. The Turks cut off the heads of the Serbs and made a pyramid of the skulls. There is now a military hospital there and the place of the mound of skulls is commemorated by two skulls. At Tchelikula is the cemetery, and in a reserved part are the graves of the British soldiers killed in the Great War, in Serbia and Bulgaria. Three British Sisters, who gave their lives in the service of humanity, lie there also.

In the North-East part of the town is the little village Zagoolino Mala. Near to the village, about two years ago a peasant was ploughing when the plough came in contact with a hard substance. On examination it was found to be a building of some kind. A commission was sent, excavations were made, and a sarcophagus and a small house were discovered of Roman construction. Probably it is the site of the old Roman town.

Nish is a very important railway junction between the Orient and the West. In the State railway workshops 1,200 men are employed. The tobacco factory is a state monopoly. This factory produces an enormous number of cigarettes daily. There is a leather factory in which considerable tanning operations are carried on, and an important linen factory, also a factory for enamel ware; in addition a lime kiln and brick kiln have recently been started near Nish but owing to insufficient capital and the adverse economic situation existing, they do not promise well.

Leskovatz, to the South of Nish, is called the Manchester of Serbia. There are factories there in which the manufacture of cloth, cotton goods, rope, porcelain, leather and copper are carried on, and there are also dyeing works.

What Serbia needs is extended railway communications and capital is required to develop the rich resources of the country. No doubt if the prohibitive duties now existing were reduced Serbia would rapidly develop with the aid of foreign capital and skill. Fruits of all kinds are grown, and with capital and skilled direction there is no limit to the export of these products especially plums prepared as prunes. Dairy produce of all sorts could be raised without limit. The breeding of pigs is at present a very large industry, and if factories were established for the curing of bacon an extensive export trade could be carried on. It must not be forgotten, however, that locally there would be no demand for these products. In Macedonia the climate and the abundance of mulberry trees render the cultivation of the silk worm a very sure and prosperous business. Before the war this branch of industry was carried on on a small scale, the cocoons all being bought by a London firm.

South Serbia and Macedonia are in the volcanic zone, as proved by the hot mineral springs found in so many places, for instance, Nishka Bania, Vranska Bania, Vraniahka Bania. Over these places steam hangs like a dense mist. There is no doubt that minerals of various kinds are to be found, but, at present, only copper, coal, lead and sulphur are worked.

In Serbia there are five millions of inhabitants, 85 per cent. are engaged in agriculture. Each peasant owns a plot of land, and he is protected by the laws which prevent anyone from taking his land, his oxen or anything necessary for him to gain his livelihood for debt. The methods of agriculture are very primitive, agricultural machinery has not yet been taken up. Vast areas are covered with forest, and timber of the most valuable sorts is to be found.

INDIAN FINANCES.

Government Plans for Economy.

The urgent need for drastic retrenchment in the Government of India's expenditure was emphasized by a deputation to the Viceroy on May 30 representing the Associated Chambers of Commerce of India and Ceylon. In the course of his reply the Viceroy said :—

In the first place, let me assure you that I and my Government are fully alive to our serious financial situation, and to the importance of establishing equilibrium between actual current expenditure and a reasonable estimate of revenue. We realise the effect of continued deficits and borrowing operations upon trade interests. We clearly recognise that one of the five avenues to be explored, and thoroughly explored, is the question of our expenditure. As regards the latter, we are prepared to place it in the crucible, and put it fully to the test with reference to each Department, and each of its several activities in detail. We intend to prove it by the reaction test of whether the Department as a whole, and each of its activities severally, are absolutely necessary and indispensable, and if the answer to that test is in the affirmative, we propose to employ further searching processes to ascertain whether its activities permit of reduction in expenditure or not; and even if the latter be the answer we will not be content to rest there, but will examine whether as efficient results could not be attained by a complete change of method of treatment. If that points the way to saving, I hope you will be convinced by what I have said that we intend no half measures. We protect nothing, we conceal nothing, we reserve nothing, we do not apply any temporizing measures to our bodily disease, we desire to lay our ailments and the history and facts of our constitution frankly and without reserve before the physician, and we are prepared, as far as it is compatible with efficient government and the primary necessities of safety and good administration, to submit to operation, to cautery, to the letting of blood, or to rigorous diet.

As regards the committee which is to report to the Government of India, we have secured as Chairman, Lord Inchcape. I cannot too highly praise the high sense of public duty which has actuated one of the busiest of men, after his recent arduous labours, to undertake this work; I know that I express the opinion of those before me when I say that we could hardly have secured one more fitted in every way to direct these investigations in India; his knowledge of India where he first made his reputation in business, and his unique experience of problems similar to ours, gained during his membership of the Geddes Committee, single him out as one who is peculiarly gifted for the task in which he has consented to help us. As regards the members of this Committee, I hope and believe that when this, its full constitution is announced, as it will be very shortly, it will command the confidence of all who are interested in the financial condition of India, and will satisfy them of our earnestness of purpose. We are attempting to secure advisers whose qualifications are beyond dispute, who will examine our problems from a wholly novel and unbiassed angle of view, but with the lens of acumen and experience. The Secretary is to be Mr. Howard, Lord Inchcape's own selection. Mr. Howard was at one time associated with our finances in India; he is personally known, I think, to some of your deputation, and I believe the Committee will be able to rely implicitly on his experience of the financial aspects of all questions connected with the Government of India. Liaison officers will be attached to the Committee, to place all our archives at their disposal, and to explain the precise function or alleged function of the various wheels in our complex administrative machinery.

The field of the labours of the Committee is the whole of the administrative machine of the Central Government, and the processes which it controls or drives. This includes military expenditure under the terms of reference already made public. You will have perceived that they are identical, except for minor verbal modifications, with those of the Geddes Committee; they enjoin scrutiny of all Departments and branches,

and of every class of expenditure; but of course, just as with the Geddes Committee, the final determination upon matters of policy will rest with the Government. It should be a waste of time and money to burden those who are to do the expert assay with the labours of the crushing, or with the collection of the spoil for examination. Much of the spade work will be accomplished before the Committee assemble. The preparatory work has already been entrusted to an experienced officer of the Finance Department who is on special duty, and is even now engaged in searching enquiries in each Department. Some of this preliminary work has indeed already been completed. A Committee, which I recently appointed under the Presidency of Mr. Innes, and of which General Hudson and Mr. Sim were members, has finished an investigation into the question of the staffs employed at Army Headquarters. I cannot commend too highly the thoroughness with which this examination was pursued, and the expedition with which their report was submitted. Adequate steps have been taken to ensure that the Committee, when it assembles, will be supplied with full information on every point which it may desire to investigate. As regards expedition, Lord Inchcape's engagements prevent him from reaching India before October, but we hope before then to make a substantial advance into the field of examination in which they have to labour. We have taken every precaution to ensure that the investigation starts under the best possible auspices, and is in a position to dispose of its work with expedition. One result, which we hope for from this preliminary work, is that we may find ourselves able as a result of the Departments' scrutiny of their own expenditure, and of the critical examination carried out by our special officer, to prune off and lop redundant and unnecessary branches in advance of the sittings of the Committee. Instructions to this effect have already been issued to all Departments, and it will be one of the chief tasks of the officer on special duty to watch the progress of this kind of retrenchment, and to direct the enquiries of the Departments into profitable channels; he has also been instructed to devote special attention to cases where the activities of a Department deal with provincial subjects.

I note your observations regarding New Delhi. I can assure you that my Government are fully cognisant of the criticism and discussion in the press and otherwise, relating to this monumental work, and the subject is engaging our most careful attention, with a view, if possible, of restricting the expenditure. I hope that what I have told you will give you confidence in the earnestness of purpose of my Government in spite of what is at times said to the contrary. I have every reason to believe from the reports that come to me from all parts of India that the Government, which is representative of India in a greater degree than previous Central Governments, is inspiring trust and confidence. Whilst desiring to join with you to-day in avoiding controversial issues, I must remind you that my Government have been faced with difficulties of an exceptional nature:—The aftermath of war, trade depression, reduced exchange, high prices, economic distress, troubles in Malabar, and on the frontier, and political agitation, combined to create a most complex situation. In addition, the great changes and problems connected with the working of the reformed constitution had to be compassed in the midst of considerable political unrest. In our judgment, this situation, in its various stages of progression, required careful and patient handling. May I remind you that patience is a political virtue, which often demands greater courage than more picturesque forms of action, but it should never be practised indefinitely. It may surpass the limit of a virtue and become a fault; and we have not hesitated to take resolute action when we thought conditions required it. I hope I may now claim that the policy of my Government has been justified by events; and that India will enjoy a period of greater peace and tranquillity for a time, at any rate; and I trust for a long time. We have comparative peace, we have an atmosphere in which our political life and economic progress can grow and develop on right lines; in this development I am in full accord with you, that the restoration of financial equilibrium in India, based upon retrenchment, where possible, of expenditure, is of most urgent importance, and you may rely upon my utmost efforts to secure this result.

Engineering Topics.

By Our Engineering Representative.

The Spa Clutch.

Some little time ago I was able to test exhaustively the new Spa car and gained a very high opinion of the production. I was particularly impressed with the sweetness of the clutch, which is of the fabric to metal type, and has seven steel and six Ferodo-faced plates, driver and driven respectively. It is, of course, a "dry" clutch, has a wonderfully sweet action, engages without the slightest harshness, and disengages just as smoothly. The clutch pedal shaft, which carries the disengaging fork and the clutch pedal, is mounted solely on the casing which forms the housing of the flywheel and connecting the engine crankcase to the gear box. From an engineering point of view this arrangement is admirable, as it obviates any cross or twisting strains being brought to bear on the clutch withdrawal mechanism. A further point about this clutch is that it can be removed for re-lining or inspection without it being necessary to dismantle the gear box or interfere with the engine or its controls.

Storing Coal.

The new method of storing coal which is not of the best quality is to keep it under water, by which means it is protected from the influence of the air which tends to break it up into dust and to destroy some of its heating properties.

In one of the largest industrial establishments using coal fuel, in which some hundreds of tons are burned under the boilers each week, a vast reserve stock of coal is kept so as to render the firm independent of price fluctuations, labour troubles, or other possible shortages of supply. These reserves are stored in concrete structures which are somewhat similar in design to the ordinary concrete water reservoir. A smaller and similar concrete bin is used for holding some hundreds of tons of coal screenings and dust which is washed out of the larger reservoir and used for banking up, and for keeping fires going during slack periods. The main pit is kept filled with water and as this is kept in constant circulation, the stream flowing from the large to the small reservoir and back again, all coal dust is washed into the smaller reservoir and collects there until it is wanted for use. In this way many hundreds of tons of fine coal that otherwise would be wasted are collected each year.

The pit used for storage is 250 feet long by 150 feet wide by 12 feet deep, and two-thirds of the structure is below the ground level. The capacity of the tank is 7,000 tons, and to stand the weight, together with the weight of the water, the sides are 12 inches thick. Two feet below surface level they join a floor 6 inches thick with an upward slope of $1\frac{1}{2}$ to 1 to a depth of 6 feet where the sloping portion joins the main part of the floor.

Coal is delivered into this bin direct from the railway wagons by means of a tipping arrangement and the capacity of the structure is not limited to the 12 feet depth mentioned as coal can be piled as high as is pleased on top of that actually in the bin. The submerged coal is lifted by mechanical means, and as the water drains away the finer particles of coal are washed out and carried to the dust storage bin. As the screened coal passes into the furnaces it is brought over revolving chain grates, and any small coal that falls through is again washed by water power into the tanks. It is said that the saving by this method of working has been enormous, and has already paid for the erection of the bins and the operating plant.

A New Feeder Box.

Some interesting departures have been made in the design and construction of feeder and network boxes, for electric light and power mains, by a leading British electrical engineering firm. Of the many improvements embodied in the new type, which is known as the C.W.S. type, the following are perhaps the most worthy of

mention:—The fittings are mounted on metallic frames, thus ensuring considerable strength and durability, the spring contacts are adjustable and, further, are renewable. An improved form of grip fuse or link extractor is also provided.

The frame is formed by means of steel rods with rigid end-pieces provided with feet. The insulators are moulded with grooves which fit over the rods, and by means of these it is a simple matter to move the insulator over to any required position. It is claimed—a claim which appears to be fully justified—that this form of construction gives a commendable rigidity and strength, and in addition provides a clear space on the underside of the grid for cables to be spliced or jointed in the box. In addition it permits of ready assembling and jointing, and also enables the interior gear to be packed separately for transit, a feature which will appeal to all overseas buyers, as it tends to reduce breakages to a minimum. The gear is so arranged that the compound level is above the sweated joints. It is stated by the makers that practical work has shewn that in the majority of cases the type of spring clip usually supplied with network boxes is open more or less to criticism, and in quite a number of types the spring clip has been found to be either too flimsy, resulting in excessive heating, or else so constructed that renewal is difficult and expensive. In the spring clip in question not only have these difficulties been dealt with and removed, but the frequent cleaning of the surfaces can, if necessary, be carried out without any trouble. The chief advantages of the new contact are given as being as follows: Easily removable springs; adjustable pressure on contact surfaces; the spring when removed leaves a wide space between the contact jaws, thus facilitating cleaning; the spring itself is not relied upon to carry any current; the spring is always in compression, a form which relieves any fatigue in material; and the design is such that it is practically impossible for the contacts to overheat. These spring clips form part of a loose contact head which is connected to the cable or busbar connections by a grip contact which introduces little or no appreciable electrical resistance. It appears that for bonding work the boxes can be fitted with an attachment consisting of shallow iron pockets split on the centre line and embracing the lead sheath and armour of the cable. These pockets, when bonding is being done, are filled with molten lead, which effectively bonds the lead sheath and armour of the cable to a copper bonding strand attached to the box by a clamp.

EXPORT AND IMPORT DISTRIBUTION.

110, WEST 40th STREET, NEW YORK, N.Y.,
U.S.A.

11th April, 1922.

TO WHOM IT MAY CONCERN,

We take keen pleasure in announcing the fact that ALEX. P. BORG, Esq., of Alexandria, has been appointed our sole agent and representative in Egypt, Sudan, Palestine and the Near East.

It is our sincere hope and expectation that he will do much toward establishing pleasant business relations and we earnestly solicit your inquiries through him, with the assurance that everything humanly possible will be done by him and by us in catering to your needs and rendering you a genuine service.

Respectfully,

UNIVERSAL COMMERCE CORPORATION.

By JOHN W. LIND (President).

IRRIGATION IN ISPAHAN.

The following is an extract from a letter lately received in London from Ispahan :—

It is usually the case that the East moves slowly and takes not too kindly to changes and innovations of any kind, but in regard to one thing at least Orientals are always ready to consider the possibility of improvement, and that is in regard to irrigation. Talk to a Persian or an Arab about plans for giving his land a larger or more regular supply of water, and you will interest him at once. He does not as a rule love modern machinery, but once he has seen how much more efficient is an oil engine or a pulsometer pump than the old-style *shadoof* or *naoura* and he will scrape and save to buy one for himself, if he has land to irrigate.

At the present time two schemes of interest are under consideration which, if they ever come to fruition should prove remunerative to those who carry them out. One is concerned with a project for joining the river Karun and the Zenda Rud in their upper reaches, and it is reported that preliminary surveys in connection with the scheme are to be undertaken at once. It is estimated that the work would cost some 300,000 tomans, and it is suggested that the money should be advanced (to the Government) by the people of Ispahan, and should be repaid in from twelve to twenty years, out of taxes due from the city.

The second proposal is not so ambitious, involving an estimated outlay of from fifty to sixty thousand tomans ; and a syndicate, headed by the Sardar Azam, and supported by local notables has been formed to carry out the work. The idea is to utilize the waters of a small stream which now runs to waste, at a point south of Ispahan. This will be done by constructing a dam in the neighbourhood of Kumesheh, where there is a natural basin which will facilitate storage, which the dam will, of course, raise as water for irrigation purposes.

BRITISH CONSULAR REPORTS.

III. LINGAH.

We give the following extracts from the report of H.M. Consul at Bundar Abbas, Mr. A. W. Fagan, I.C.S. :—

The period of the war did not affect the trade of Lingah to the same extent as it affected that of Bundar Abbas. Lar, the main centre in the interior dependent on Lingah, is not a place of great commercial importance, and the insecurity of the road between Lar and Shiraz and the scarcity of water on that route during the summer months prevented that route from competing successfully against the Bundar Abbas route to Shiraz. Moreover Lingah does not enjoy the same shipping facilities as Bundar Abbas.

The trade of Lingah is largely transit trade imported goods being re-exported to Oman, e.g., cotton piece-goods, wheat, barley and dates. Total imports for 1920-1921 amounted to £352,166 as compared with £180,120 for 1913-1914, £410,064 for 1918-1919 and £390,238 for 1919-1920. Soft sugar formed 24 per cent. cotton piece-goods 22 per cent., and rice 15 per cent. of the total imports. Soft sugar shows an increase of 200 per cent., cotton piece-goods and rice nearly 100 per cent. on 1913-1914 figures, while sugar and rice show an increase on 1919-1920 but a decrease on 1918-1919, and cotton piece-goods an increase on 1918-1919 but a decrease on 1919-1920.

India supplies 60 per cent. of the total imports, Holland 20 per cent. (sugar and tea), Oman nearly 4 per cent. (tobacco, pearls and specie) and the United Kingdom 3 per cent. (cotton piece-goods and specie). Imports of Kerosine show a steady decrease as Anglo-Persian Oil Company's oil is brought in large quantities from Abadan. £829 worth were imported from the United

Kingdom and £270 from India in 1920-1921. As in the case of Bundar Abbas, India is probably wrongly shown as the place of origin of many of the goods, being merely the place of shipment.

The total exports in 1920-1921 were valued at £174,783 as against £126,381 in 1913-1914, and £80,987 and £72,140 in 1918-1919 and 1919-1920 respectively. Specie was exported in larger quantities than in any of these years, but owing to the state of the market no pearls were exported ; the general export trade of the year therefore may be said to compare favourably with those of previous years.

Carpets, mainly Qashqai and other tribal carpets forwarded from Lar, from 26 per cent. of the total exports, cotton piece-goods re-exported to Oman, 6 per cent. wheat and barley (re-exported as the harvest of the district is insufficient for local needs) to Oman 4 per cent., gum tragacanth from Lar 2 per cent. dates (re-exported from Busreh), drugs and medicines, boats and accessories, and manufactured tobacco (re-exported) each 1 per cent. Specie represents 4 per cent. of the total.

The statistics furnished have been taken from Customs returns and may be accepted as fairly accurate except perhaps in the classification of countries of origin and destination. The values given in the returns have been converted at the rate of 27 krans to £1 for 1918-1919, 26 krans to £1 for 1919-1920, and 27 krans to £1 for 1920-1921.

There are small pearl banks near Lingah, but the pearl trade of Lingah has been largely appropriated by Bahrain and the Oman Coast mainly owing to the more favourable Customs conditions prevailing there. The year under review has been an exceptionally bad one for the pearl trade, however, and nowhere have big profits been made.

Copper and iron work, boat building, and the manufacture of cotton sail cloth are staple local industries, but with the possible exception of the last named are not undertaken on a large scale enough to be important for commercial purposes.

Carpets (mainly Qashqai and other tribal carpets), gum tragacanth, almonds, pistachios and rosebuds are brought into Lingah from Lar, and assafoetida from Bastak.

In spite of the vigilance of the Customs Department tea, sugar and coffee are smuggled into Lingah in considerable quantity from Oman, and there is little doubt also that a fair trade is done in arms and ammunition.

Apart from the arms traffic the smuggling of other commodities is partly to be attributed to the severity of the Customs dues and regulations, which are slowly strangling the trade of Lingah. Steamers have of recent years been visiting Dubai on the Oman Coast, where no regular Customs Department exists, and the result of this is that Dubai has acquired much of the trade formerly belonging to Lingah, and many Lingah merchants have opened agencies in Dubai.

According to a report issued by the Metal Industries Association the production of steel in Czecho-Slovakia for the year 1921 amounted to 917,662 tons.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from oversea buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

Stock and Share Markets

MARKETS GENERALLY ACTIVE.

Prices Inclined to Ease.

(From Our Own Correspondent.)

London, Tuesday morning.

To look for activity in the markets in Derby week is to ask for disappointment. Epsom has too magnetic an influence to leave much time for attention to more mundane affairs. It has certainly been so this week to a greater extent than usual, and the enormous increase in the subscriptions to the Calcutta sweep suggests the explanation that the average investor felt that that speculation was enough for one week.

Conditions generally continue to be unfavourable for the markets. It is true that following Genoa there is a tendency to more settled conditions abroad, but what we have gained in that direction we seem to be losing at home. Ireland is again well to the foreground as a centre of trouble. Few seem to expect that the worst will happen in that unhappy island, but the possibility of untoward events is quite enough to have an adverse effect when markets are so sensitive as they are at present. Happily the engineering trouble seems to have blown over so if a settlement is reached with regard to Ireland the way should be clear for the markets generally to go ahead again.

New Issues—Past and Future.

Following the New South Wales and Straits Settlements loans, which, as my readers are aware, met with an unfavourable reception at the hands of the investor, came a British Guiana issue. In this case the terms were much more attractive, a return of $5\frac{1}{2}$ per cent. being offered, and, as might have been expected the loan was a conspicuous success. It simply illustrates, as I suggested last week, that the yield for investments had gone below the economic level. As the British Guiana issue shows there is plenty of money available if only the return is adequate. Besides the question of yield investors are keenly alert in these times to other considerations such as security, as is shown by the fate attending recent French issues in this country. Two railway issues guaranteed by the Government were over-subscribed, and went to a premium, but the two recent shipping issues, which carried no such guarantee, met with little support, and in both cases substantial amounts were left with the underwriters.

Gilt-edged Dull.

Holiday influences and the Irish situation have combined to produce a certain amount of dullness in the gilt-edged group. Consols are $\frac{3}{4}$ down at $56\frac{3}{4}$, the Conversion Loan is 1.1-16 down at 77.3-16, while War Loan Fives have shed 1-8 at 99.9-16. Indian stocks have presented a fairly firm front. The Seven per cent. loan is unchanged at $115\frac{1}{4}$, the $3\frac{1}{2}$ per cent. loan is 1 down at $68\frac{1}{4}$, while the 3 per cent. loan is $57\frac{1}{4}$ x.d.

Inactivity has prevailed in the foreign market and quotations in some instances have shown a tendency to fall away. French stocks, exceptionally, have been strong, War Loan Fives being $1\frac{1}{2}$ up at 45. German 3 per cents. have continued to improve, and are 5-16 up at 2.15-16. Italian Rentes are unchanged at $24\frac{1}{2}$.

Russians have been dull, the 4 per cents. being 7, the $4\frac{1}{2}$ per cents. 10, a decline of a point, and the 5 per cents. 14, also a point lower. Brazilians have been inclined to dullness, while Chinese stocks have been weak.

Industrials Inactive.

Once again there is little change to record in the Industrial group. Business has been on the smallest possible scale, and price changes have been few and far between.

Textiles have been fairly steady. Coats are unchanged at 3.5-32, while Courtaulds are 6d. down at 50s. 9d. Tobaccos have been a firm spot, with Bats 6d. up at 79s. 6d. and Imperial Tobaccos 2s. 9d. up at 61s. 6d. Dunlops, after fluctuating somewhat, close at 9s. 3d., a decline of 3d. on the week. Iron and Steel shares have been steady. Vickers are unchanged at 11s. 6d., Armstrongs are 9d. up at 16s. 9d., while Guest Keens are also 9d. up at 34s. 9d. Indian railways have been firm with Bengal and North Western at 122, Bengal-Nagpur at 97, and Madras and Southern Mahratta at $102\frac{3}{4}$.

Shipping securities have been inactive. P. and O. Deferred are 5 down at 315. Cunards have shed 9d. at 20s. 9d., while Furness Withys are 3d. up at 30s.

Oils Unsettled.

Unlike most of the markets there was a good deal of activity in the Oil group before the holidays, and a somewhat erratic tendency was in evidence. Burmahs at 5.3-8 show a gain of 1-8, while Anglo-Persian Ord at 4.7-16 are $\frac{1}{4}$ down. Mexican Eagles at $3\frac{1}{2}$ are 3-16 up. Trinidad issues have been steady. Apex at 2.1-8 are unchanged. Centrals remain at 2.1-8, while Leaseholds are the same at 1.3-16.

Among Egyptians Anglo-Egyptian B are 1.27-32, a rise of 5-32, while Oilfields of Egypt are unchanged at 6s. 6d. In the Roumanian group Phoenix are unchanged at 28s. 3d., Steaua Romanas are 6d. down at 12s. 6d., Roumanian Consolidated are unchanged at 17s. 6d., while Dacia Romanos are $\frac{1}{4}$ down at $1\frac{1}{4}$.

OIL REPORTS.

Phoenix Oil.

The Secretary of the Phoenix Oil and Transport Company announces that the following telegrams have been received from Roumania:—(1) "Moreni Five: flowed five hundred tons in six hours early Saturday; flowed again eleven evening to eleven Sunday morning." (2) "Moreni Five: including Saturday morning's flow estimate production fifteen hundred tons; half already delivered pipeline. Now repairing fountain shield."

Oilfields of Egypt.

The following cablegram was received by the Oilfields of Egypt on May 30, from the field manager: "Ras Bahar No. 3. 769 ft. Gypsum dark grey shade 703 to 708 ft. little gas. Ras Dhid No. 3. 888 ft. 861 to bottom alternating bands grey shale, cemented sand, rock grey limestone. Species Ostrea 872 ft. Exogyrae 883 ft. (Cretaceous series) all little gas."

Dacia Romano.

The Dacia Romano Syndicate, Ltd., have received news from Moreni that their new well is yielding a violent, but irregular, flow of good oil. When this has settled down it is reasonable to anticipate that the well will give a steady and satisfactory output.

COMPANY MEETINGS.

ORIENTAL TELEPHONE AND ELECTRIC COMPANY.

The twenty-eighth ordinary general meeting of the Oriental Telephone and Electric Company, Limited, was held on June 1 at Winchester House, Old Broad Street, E.C.

Sir H. Babington Smith, G.B.E., C.H., K.C.B., C.S.I., Chairman of the company, presided.

The Secretary (Mr. J. Macleod) having read the notice convening the meeting and the report of the auditors, the Chairman, in moving the adoption of the report and accounts, said that the results of the year 1921 were not unsatisfactory. The net revenue for the year was £49,227. This was almost identical with the corresponding figure, £49,207 10s. for the preceding year. They were therefore able to recommend the payment of the same dividend and bonus as last year.

At their own branches the business continued to expand. The number of exchange lines had shown the satisfactory increase of 10 per cent. during the year. The net proceeds showed a decrease mainly owing to the fall in the Indian exchange; but the prospects of further expansion were good, and under the new arrangement with the Government of India the maximum rates at Madras and Rangoon would be increased.

He now came to the important question of the Indian Licences, and he was glad to be able to inform them that it was at last settled. The conditions accepted by the Government of India would, they believed, enable the companies to provide a thoroughly efficient service on fairly remunerative terms, and would consequently make it possible for them to raise the capital required for the normal growth and improvement of the systems. The terms, briefly, were that the Government undertook not to exercise their option of purchasing under the existing licence before 1943.

Conditions were laid down for securing efficiency in the plant and its operation (including the obligation to provide automatic or central battery plant in all exchanges over 200 subscribers). The maximum rate chargeable for an exchange connexion within four miles of the exchange was raised from Rs. 250 to Rs. 350 per annum per subscriber, subject to certain conditions as to periodical revision of the rates, such revision to be on the basis of a standard dividend of 1½ per cent. on the paid-up capital. He might mention that the rate charged in the past had not, till recently, exceeded Rs. 200.

The agreements applying these conditions to the Bombay and Bengal Companies had already been signed. Those relating to their branches at Madras and Rangoon were practically settled and would be signed in the near future.

Steps had been taken for organizing the Bombay and Bengal undertakings on a new basis, suited to the new conditions, and for raising the capital required for new developments. It was probable that it might be found advisable to form separate Indian companies to take over the systems at Madras and Rangoon, and he anticipated that they might soon have proposals to lay before them at that end.

Mr. Parker Ness had at the request of the board made another journey to the East. He left this country in October last, and had visited Bombay, Calcutta, Madras, Rangoon, Singapore and Hongkong. He was now at Hongkong and would pass through India again on his return journey. His presence in India had been most valuable, and had contributed in no small degree to the successful conclusion of the negotiations and to the settlement of the new basis for the Indian undertakings.

They found it necessary also to ask Mr. W. W. Cook—their consulting engineer—to undertake a journey to India, Singapore and Hongkong for the purpose of advising them on numerous questions which had arisen or might arise in those countries. He was giving particular attention to the question of the use of automatic exchanges in tropical climates and would advise them also on questions of rates and organization generally as well as on the valuation of their plant—a matter of great importance when they were considering the transfer of undertakings to local companies.

The conditions now settled for the Indian licences gave security of tenure for a certain period and a reasonable increase of rates. There was a good prospect of similar arrangements in Hongkong and Mauritius, and perhaps in Singapore also. If those prospects were realized, they would have the essential conditions necessary for progress.

Before concluding, he would like once more to say how much they appreciated the excellent services rendered by the company's staff, both in this country and abroad.

Mr. H. Johnstone Grewing seconded the resolution, which was carried unanimously.

The Hon. Evelyn Hubbard moved the re-election of Mr. G. Parker Ness, the retiring director. He said that all the shareholders knew what admirable service Mr. Parker Ness, their vice-chairman, had rendered to the company. He had very much increased their obligation to him by the work that he was now undertaking. He was on a long and arduous journey and had had difficult negotiations to carry through. He had accomplished his task with great pertinacity and success. Had it not been for his journey they would not be able to report now that the great licences question was satisfactorily settled.

Mr. Grewing seconded the resolution, which was carried unanimously.

A cordial vote of thanks was accorded to the chairman and directors, and to the staff, and the chairman having briefly responded, the proceedings terminated.

COMPANY NOTES AND REPORTS.

Land and Mortgage of Egypt.

The net profit of the Land and Mortgage Company of Egypt for the year ended March 31 was £9,709, making with £10,942 brought in £20,651. The directors recommend a dividend of 6 per cent. for the year, less tax, carrying forward £11,651. The report states that the total outstanding debentures and debenture stock having been reduced by drawings and purchase to £58,525, the directors will submit a resolution for extinction of nominal liability on shares and their conversion into £3 fully paid shares.

Tata Industrial Bank.

The report of the Tata Industrial Bank for the twelve months ended March 31 states that the profit for the year, including the amount carried forward, and after making provision for all known bad or doubtful debts, amounts to Rs. 18,56,733. The directors have made the following appropriations:—In payment of an interim dividend of 10 annas per share, free of income-tax, as on November 15, 1921, Rs. 6,32,279, provision for adjusting securities to or under market value, Rs. 1,70,019, transferred to reserve fund, Rs. 3,50,000, provision for income-tax and super-tax, Rs. 1,38,206—Rs. 12,90,505. The directors now recommend payment of a final dividend of six annas per share (making Rs. 1s. for the year) free of income-tax as on June 1, 1922, Rs. 3,75,092, to carry forward Rs. 1,91,136—Rs. 18,56,733.

Guardian Eastern Insurance.

The report for 1921 states that 26 new life policies were issued, assuring £25,158 for annual premiums £1,064 and single premiums £52. There were no claims during the period. Fire premiums after deducting reinsurances, were £53,926 against £61,517; net losses, £39,750 (73.71 per cent. of premiums), against £33,973. Expenses of management, including fire brigade charges and commission, together amounted to £18,163, being 33.68 per cent. of premiums; interest on fund, £1,680. After providing for losses and expenses there was a profit of £1,453, which has been transferred to profit and loss. On accident, etc., premiums, after deducting re-insurances, £7,683, against £5,846, net losses, £3,127 (40.7 per cent. of premiums), against £1,067. Expenses of management, including commission, £3,073 (40 per cent. of premiums). After providing for losses, expenses and bad debts and for additional premium reserve (£1,129) there was a profit of £1,492 transferred to profit and loss. In marine department, claims, returns and other payments on account of 1920, settled in 1921, were £3,484, and transfer to suspense account to close 1920 required £5,000. On 1921 account premiums were £16,693, claims paid £5,342 and expenses of management £2,722. The fund at the end of the year was £10,063. The company's Stock Exchange investments, consisting entirely of British Government securities, which stand in balance-sheet at £163,613, had a market value on December 31, 1921, of £170,197 and on April 25, 1922, of £190,627.

PERSIA, RUSSIA AND BRITAIN.

The Egypt, Greece and Levant section of the Manchester Chamber of Commerce recently had the following message from Persia submitted to it by a shipper, together with a request that the matter should be taken up with the proper authorities:—

"We hear on unimpeachable authority that on imports from Russia the authorities in the North are imposing the Customs tariff of 1903 while British goods and those from other countries are being charged on the 1920 scale. As the 1920 scale imposed largely increased duties on nearly all descriptions of goods, it is obvious that, unless some alteration is made, British goods stand no chance in competition."

The Secretary immediately got into communication with the Board of Trade (Commercial Relations and Treaties Department), and received the following reply from the Assistant Secretary:—

"I am directed by the Board of Trade to state that negotiations between Russia and Persia are at present proceeding with a view to a conclusion of a Commercial Agreement on Customs and other matters. In the meantime Russian goods are allowed to be imported into Persia on two Customs declarations, one of which is based on the tariff of 1903 (on which basis duty is actually being paid) and the other on the new tariff of 1920, on the agreed understanding that, if the claim of the Russian Government for the admission of Russian goods at the rates of the 1903 tariff is not accepted as the result of the negotiations, the difference between the duties actually levied and those leviable, under the 1920 tariff, will be paid. I am to add that H.M. Representatives in Teheran and Moscow are closely watching the matter, the importance of which is fully realised H.M. Government."

There is now a motor bus service twice daily between Nazareth and Haifa.

The directors of the Great Indian Peninsula Railway recommend a dividend of 10s. per cent. for year ended March 31, making £2 for the half-year, less tax.

The Imperial Bank of Persia announces an interim dividend for the half-year ended March 20 at 3s. per share, free of tax, payable June 15.

SHIPPING INTELLIGENCE.

NEW ELLERMAN LINER.

On May 31 Messrs. Workman, Clark and Co., Belfast, launched from their South Yard the large single-screw first-class steamer "City of Nagpur," which has been built for the City Line Fleet of the Ellerman Lines, Ltd. The new steamer has been specially designed and equipped for passenger service between Great Britain and India. She is over 490 ft. in length, with a tonnage of 10,200. This is the twenty-first vessel built by the firm for the City Line.

PORT EXTENSIONS AT ALGIERS.

Work in connection with the enlargement of the Port of Algiers was inaugurated on April 19, says the *Board of Trade Journal*, when the President of the French Republic laid the first stone of the new port. In a speech delivered at this ceremony, the President of the Algiers Chamber of Commerce stated that the new port would cover an area of 115 hectares, and that there would be constructed, in addition, two new dry docks, five new moles, and new wharves, embracing an area of 175 hectares. Of the funds required for this purpose the Chamber of Commerce had subscribed 135 million frs. out of a total of 180 million frs. Special conveniences would be provided for postal services, and a free zone would be constituted for the purposes of the transit trade.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. *Circassia* for Bombay (Liverpool, June 23).

Anchor Broekbank Line.—S.s. *Manipur* for Calcutta (Birkenhead, June 10); s.s. *Maihar* for Port Said, Colombo, Madras and Calcutta (London, June 20); s.s. *Manaar* for Calcutta (Birkenhead, June 22); s.s. *Malancha* for Calcutta (Birkenhead, July 1); s.s. *Malakuta* for Port Said, Colombo, Madras and Calcutta (London, July 4).

Bibby Line.—S.s. *Arracan* for Rangoon (Middlesbrough, June 10); s.s. *Leicestershire* for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, June 21).

Byron Steamship Line.—S.s. *Maid of Delos* for Patras, Piraeus, Constantinople, Constantza, Sulina, Galatz, Braila, Volo, Salonika, Smyrna, Bourgas and Varna (Liverpool, June 9).

Clan Line.—S.s. *Clan Macmillan* for Bombay and Persian Gulf (Birkenhead, June 12); s.s. *Clan Colquhoun* for Colombo, Madras and Calcutta (Birkenhead, June 15).

Cunard Line.—S.s. *Brescia* for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice, Trieste, Fiume and Gravosa (Swansea, June 13); a steamer will sail on July 13 from Glasgow for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa etc.

Ellerman Line.—S.s. *Gerano* for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, June 16); s.s. *Flaminian* for Gibraltar, Melilla, Malta and Alexandria (Liverpool, June 21); s.s. *Andalusian* for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, June 22).

Ellerman's "City" Line.—S.s. *City of York* for Calcutta (Birkenhead, June 15); s.s. *City of Harvard* for Bombay and Karachi (Birkenhead, June 22); s.s. *City of Baroda* for Calcutta (Birkenhead, July 1).

Ellerman's "Hall" Line.—S.s. *City of Karachi* for Bombay, Karachi and the Punjab (Liverpool, June 15).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. *Pembrokeshire* for Port Said, Port Swettenham, Singapore, etc. (London, June 15); s.s. *Glenade* for Port Said, Port Swettenham, Singapore, etc. (London, June 20).

Harrison Line.—S.s. *Matador* for Calcutta (Liverpool, June 15); s.s. *Chancellor* for Port Said, Port Sudan, Aden, Mombassa, etc. (Birkenhead, July 13).

Henderson Line.—S.s. *Amarapoora* for Port Said and Rangoon (Birkenhead, June 14); s.s. *Sittang* for Port Said and Rangoon (Birkenhead, June 28).

Holt Line.—S.s. *Mentor* for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 8); s.s. *Titan* for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 15).

Johnston Line.—S.s. *Incemore* for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool July 5).

Moss Line.—S.s. *Karnak* for Gibraltar, Algiers, Malta, Piraeus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, June 26).

Papayanni Line.—S.s. *Grodno* for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, July 5).

P. and O. Line.—S.s. *Nyanza* for Colombo, Madras and Calcutta (London, June 16); s.s. *Kaisar-I-Hind* for Bombay (London, June 10); s.s. *Novara* for Colombo, Madras and Calcutta (London, June 29); s.s. *China* for Bombay (London, July 14).

P. and O. British India Line.—S.s. *Warfield* for Colombo, Madras and Calcutta (London, June 10); s.s. *Nevasa* for Bombay and Karachi (London, June 16); s.s. *Morvada* for Colombo, Madras and Calcutta (London, June 23); s.s. *Mantola* for Bombay and Karachi (London, June 30); s.s. *Hatipara* for Colombo, Madras and Calcutta (London, July 8).

Prince Line.—S.s. *Sailor Prince* for Tunis, Malta and Alexandria (Manchester, June 17); s.s. *Tudor Prince* for Malta and Alexandria (London, June 28).

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 29:—Condition of Crops.—Bengal.—Slight rainfall on May 20 to 22 in jute districts, but on the whole weather continues hot and dry and unfavourable for jute and autumn crops. Markets.—May 25—Bombay cotton market weak. Fine M.G. Omras Rs. 439 July. May 27—Calcutta jute market strong with sellers very reserved and generally asking higher prices. Hessians very strong with prices advanced. Ready 9" and 11" porters at Rs. 22.12 and Rs. 32.8. Heavies very firm with prices advanced in sympathy with Hessians. B. Twills Rs. 47. Shellac.—Calcutta, May 26—T.N. Rs. 183. Market slightly steadier. Rangoon, May 26—Special Straits quality rice, Rs. 495. No change in bank rates.

Jaffa oranges are now being shipped to Amsterdam.

The traffic receipts of the Smyrna-Aidin Railway for the week ended May 20 amounted to £6,079.

The Canadian Pacific announce special cheap fares to Canada, available during the holiday season from June to October. An attractive booklet entitled "Pictorial Tour Through Canada" may be obtained free on application to the Canadian Pacific Railway, 62 Charing Cross London, S.W.1.

Anchor Line (Henderson Brothers), Ltd

16, Gracechurch Street, London, E.C.3.

CONDITIONS IN CYPRUS.

A report received by the Imperial Ottoman Bank dated May 15 states:—

Since the date of our last report, *viz.* April 15, not a drop of rain has fallen in the Island. Consequently the wheat crop and vetches have considerably suffered, and the shortage will be very appreciable. Such conditions affect the purchasing power of the peasants, and the general stagnation in business continues.

Silk cocoons. Climatic conditions have been extremely favourable for this industry and the prospects are good.

Carobs. The sale of small parcels has been effected in France, where, apparently, there is some demand at a price of £6 per ton c.i.f.

MANCHESTER COTTON REVIEW.

The cotton trade review of the Imperial Ottoman Bank for the week ended June 3 states:—

Genera!.—The past week has not maintained the standard of its immediate predecessors as regards business done. This may be partly due to the fact that next week is the Whitsuntide Holiday, which is the principal holiday of the year in Manchester. Merchants' offices and warehouses will be closed during the whole week and consequently they have been more engaged in settling up outstanding matters than in entering into fresh commitments. More probably, however, the chief cause is to be found in the higher range of prices now generally ruling, to which buyers abroad still show a reluctance to conform. So far as India is concerned matters have not got beyond the stage of enquiry, and there is still a disparity between the ideas of Calcutta and Bombay and the ideas of Manchester as to prices. China and other outlets have also been quiet, but the Levant continues to buy small lots of sized shirtings.

Yarn.—In keeping with general conditions the yarn market has been much quieter, and little business of any volume is spoken of. It certainly looks as if a difficulty may be experienced in maintaining prices unless some weight of orders is forthcoming when the Whitsuntide holidays are over. Yet, during the past week spinners have not made any sign of giving way and the tendency of prices has been against buyers.

Cloth.—The principal support in the cloth market during the past week has come from the Home trade, mainly for light summer fabrics. Buyers abroad have not been forthcoming with new orders of any size, though some manufacturers are still booked up with the orders which have been placed on their books during the past few weeks, principally for India.

Raw Cotton.—Prices have been firm and the closing quotations show a rise of 34 points in Fully Middling American. The activity shown in the first days of the week has not been maintained, however, and things have been distinctly quieter in the last two days, both in "spot" and "futures." The first Bureau Agricultural Report regarding the new crop has not provided anything in the nature of a surprise. The figure of 69.70 was generally expected, and the actual figures proved to be 69.6.

LONDON PRODUCE REPORT.

Oranges in good request.

(From Our Own Correspondent.)

London, Tuesday morning.

Sugar.—Home refined has been in moderate demand at unchanged rates. Tate's cubes are 53s. 6d. and mineral water sugar remains at 48s. 9d. London granulated is firm at 48s. 3d., while Lyle's granulated is unchanged at 48s. 6d. Export descriptions have been steady. West Indian crystallized remains firm at 42s. 6d., while white Mauritius has gained 3d. at 43s. 6d. White Java has come to business at 19s. 6d. Cane sugar quotations are:—June, 15s. 6d.; July, 15s. 6d.; August, 15s. 6d.; and September, 15s. 6d. White sugar quotations are:—June, 21s. 6d.; July, 21s. 3d.; August, 21s. 4½d.; September, 21s. 6d.; and October-December, 21s.

Coffee.—Steadiness has prevailed. East Indian is firm at 120s. Costa Rica shows no change at 118s., while Nairobi is unaltered at 108s. The futures market has been steady. Quotations are:—July, 63s.; September, 62s. 6d.; December, 60s. 9d.; and March, 59s. 9d.

Dessicated Coconut.—There have been signs of improvement during the past week, an increase in sales being noticeable. There is now a prospect of an all round re-action in the market.

Rice.—The Whitsun holidays have had a marked effect on this market, and business has been on a small scale.

Green Fruit.—Another good week has been in evidence for oranges, all offerings having been cleared at a short notice. Good fruit still arrives with further shipments, but Spanish shipments will almost cease in two weeks time. The demand for lemons has been well maintained, while prices have still a tendency to fluctuate. The excellent condition of Naples fruit has resulted in an increase in quotations, but taking into consideration the quality of the fruit, the rise is by no means excessive. Australian and Tasmanian apples have been in favour this week, at firm rates. The demand for Egyptian onions is still declining, and prices have shown a downward move in consequence.

Oilseeds.—Lower prices generally. Indian linseed has dropped 4½d. at 20s. 10½d., while La Plata is 3d. down at 19s. 6d. Rape-seed is lower with Toria 1½d. down at 18s. 10½d. Cottonseed has declined in all cases with the exception of Indian which has remained firm at 90s. Egyptian black has lost 7½d. at 12s., and Sakellaridis has shed 6d. at 11s. 4½d.

Oils.—A steady tone has prevailed. Linseed oil is 6d. higher at 44s. 6d. Rape oil is unchanged with crude at 45s. and refined at 48s. Cotton oil has been steady with the exception of technical which has shed 1s. at 43s. Egyptian crude is the same at 43s., refined is unaltered at 49s. and deodorized at 54s.

Oilcakes.—There has been a loss of 10s. in all cases. Linseed cake is now 280s. ton. Cottonmeal cake is now at 260s. ton; cottonseed cake at 160s. ton; and coconut cake at 140s. ton.

ROUMANIAN CROP REPORT.

Messrs. Watson and Youell, Galatz, report as follows under dated June 1:—

We have had an extraordinary amount of rain with quite cool weather, being most favourable to the crops, while we understand that the first hoeing of the maize has already begun. It is generally considered that the prospects are very good indeed, and it is believed that there never was such a large area cultivated, but it must be borne in mind that it is mostly primitive cultivation.

In this connection the Bucharest newspaper *Argus* publishes the following in its issue of the 21st ult.—In nearly the whole of Wallachia the peasants will start the first hoeing of maize at the beginning of next week. This operation is early owing to the extremely favourable temperature which necessitates the maize, which was sown only a few weeks ago, having to be hoed already. With regard to the other crops of barley, oats and beetroot, the sowing may be considered as finished. Wheat in most districts of the country—although the area under cultivation this year is less than last year—looks healthy and is expected to give a production of about 25 hectolitres per hectare. The fruit trees have suffered considerably from cold and caterpillars—unusually numerous this year—and the damage done comprises the whole crop. We shall therefore have little fruit this year.

The production of oil in Roumania rose from about 100,000 tons in February to nearly 115,000 tons in March.

The Imperial Bank of India has reduced its minimum rate of discount from 7 per cent. to 6 per cent.

It is announced that the Zagreb Sample Fair, which was to have taken place from June 3 to 15, has been postponed until June 17.

General Produce.—Bacon: (Continental), 140s. cwt.; (Canadian), 135s. cwt.; (American), 101s. cwt.; butter (Danish), 186s. cwt.; (Australian), 156s. cwt.; (New Zealand), 158s. cwt.; cheese (Canadian) 76s. cwt.; (New Zealand), 69s. cwt.; lard 73s. cwt.; eggs (Danish), 14s. 6d per 120; (Styrian), 10s. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar), 1s. 2½d. lb.; cocoa (Ceylon good to fine), 87s. 6d. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt.; (Central American), 104s. cwt.; (Jamaica), 69s. 9d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 69s. 6d. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore black) 4½d. lb.; (Muntok white), 7½d. lb.; pimento, 2 1-8d. lb.; raisins (Valencia), 55s. cwt.; sultanas (Smyrna), 119s. cwt.; currants (Vestizza), 71s. 6d. cwt.; (Amalias), 59s. cwt.; sugar (Fates cubes), 53s. cwt.; (Lyle's granulated), 48s. 4½d. cwt.; (Mauritius crystals), 44s. 6d. cwt.; (West Indian crystallised), 42s. 3d. cwt.; (centrifugal), 14s. 9d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 7½d. cwt.; (bran Rangoon), £6 8s. 9d. ton; cinnamon (firsts), 11½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; tea (Indian, common to good common), 1s. 1d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Java (common to good common), 10½d. lb.; wheat (English white), 58s. 6d. qr.; wheat (Australian), 59s. 3d. qr.; oats (English), 37s. 6d. qr.; oats (La Plata, ex-ship), 26s. 3d. qr.; maize (La Plata), 37s. 9d. qr.; flour 50s. 9d. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 3d. lb.; tartaric, 1s. 3½d. lb.; ammonia (sulphate) £16 11s. 6d. ton; arsenic, (white powdered), £35 5s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £13 15s. ton; borax crystals, 26s. 6d. cwt.; cream of tartar, 117s. 3d. cwt.; Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9½d. lb.; prussiate yellow, 1s. 1½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 130s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 3d. lb.; alkali (58 per cent.), £9 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £16 ton; prussiate, 9½d. lb.; nitrate, £15 3s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton; lemon oil, 3s. 6½d. lb.; quinine, 2s. 10½d. oz.; red lead, £36 ton; white lead, £39 10s. ton; white ground lead, £49 15s. ton; sulphate of copper, £27 5s. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, £122 10s. ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard) £62 6s. 3d. ton; copper (electro), £69 15s. ton; gold bars, 93s. 5d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 90s. ton; galvanized sheets (25 G), £15 17s. 6d. ton; lead (soft foreign), £23 11s. 3d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 30s. unit; nickel, £162 10s. ton; platinum, 360s. oz.; plumbago, £16 ton; quicksilver, £12 bottle; spelter (G.O.B.), £27 16s. 3d. ton; tin (standard), £150 9s. 3d. ton; wolfram, 11s. 7½d. unit; zinc sheets, £35 5s. ton; tin plates (20 by 14), 19s. 1½d. box; silver bars, 36d. oz.

Miscellaneous.—Cotton (American), 11.83d. lb.; Egyptian (Sakel), 17.75d. lb.; jute (first grade c.i.f.), £34 10s. ton; jute (lightnings), £31 ton; Oilseeds: Linseed (La Plata), £20 2s. 6d. ton; palm kernals, £17 6s. 3d. ton; castor seed (Bombay), £17 19s. ton; sesame seed (China), £24 12s. 6d. ton; soya beans £12 11s. 3d. ton; Oils: Linseed £45 2s. 6d. ton; olive (Spanish) £80 ton; rape (crude), £42 10s. ton; soya £40 12s. 6d. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; fuel oil (ext-tank), 70s. ton; coconut (Ceylon), £38 17s. 6d. ton; cotton (crude), £42 5s. ton; ground nut £44 5s. ton; Rubber: Plantation (No. 1 Crepe), 7½d. lb.; smoked sheet, 7½d. lb.; fine hard Para, 10½d. lb.

During last year coal and coke from Czecho-Slovakia found an extensive market in Poland, Yugoslavia, Hungary, Italy, Bulgaria, Roumania, Switzerland, Denmark and Danzig. The excess of Czecho-Slovak exports over imports amounted to 379,000 tons coal, 4,482,000 tons lignite, 185,000 tons coke, and 154,000 tons briquettes.

COTTON & COTTON GOODS.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Friday.

On the whole the market during the past week has been quiet and featureless. A holiday feeling has prevailed, and buyers generally have been in no mood to commit themselves to any business of importance. It is generally anticipated, however, that a larger business will be done after the Whitsuntide holidays. A great deal of interest has been centred on the Bureau condition report on the American cotton crop, and the figure of 69.6 was generally anticipated by traders. Last year the figure was 66.0. Prior to the figure being issued there was some covering in anticipation of the report being bullish. With regard to cloth not very much business has been done with Egypt, the Levant, and Constantinople. Shippers to the first named outlet report that stocks are gradually being cleared, but the weak seller out there has not been eliminated with the result that low priced stocks keep being thrown on the market. Quotations for Egyptian yarns have been well held, but the turnover has been of restricted dimensions. A small piece goods inquiry has been about for India and China, and scattered transactions have resulted in staple counts. A fair amount of support has been given by South America and the Continent. Home trade buying has been decidedly better on account of the hot weather. American yarn prices have continued firm, but buying has been of a hand to mouth character. The market will be opened only on Tuesday and Wednesday next week.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 31:—

The quieter markets experienced at the end of last week have again been in evidence and sales have shown a considerable falling off in quantity. The demand has been somewhat more general in character, and at times some difficulty was found in meeting it. For examples, several enquiries for good brown cotton appeared, but the selection naturally was a poor one, as this growth is gradually dying out, and although many spurious growths of so-called brown cotton are pressed for sale on the slightest encouragement, buyers will have none of it and it remains a drug in the market. Good fair upper is another growth which is causing some spinners a certain amount of anxiety, as there is practically no decent staple cotton of this variety on offer either here or in Egypt. And what business does take place is of the "odd lot" variety. Strict good fair Sakel is yet another instance of a quality which is growing rapidly scarcer in this market, and the price of which in Alexandria is rapidly stiffening. The raising of the basis of good Sakellaridis here to-day, as compared with full good fair, caused some astonishment, as it is realised that, of the 100,000 odd bales of Egyptian cotton held in Liverpool and Manchester, a very large proportion of it is of this quality.

Manchester reports have made extremely poor reading after the excellent ones to which we have lately become accustomed. Apparently the demand from abroad has almost died away for the time being, though the tone remains firm, and India still takes an odd lot here and there. Almost a holiday feeling has been noticeable during the last few days, for which the long delayed summer, bursting suddenly upon us, is no doubt responsible. Even the demand for Tokar and Sudan cotton which for months now has been quite a feature of our market here failed for once to-day, not a bale being reported in the sales. The Tokar district this year has produced some remarkable fine cotton, totally different from the product of previous years in the same province. It has quickly found favour, and has been eagerly enquired for. Total sales 2,400 bales (includes 700 Sudan). Quotations of brown and upper are advanced 25 points. In Sakellaridis fully good fair and below are advanced 50 points. Good is exceptionally 75 points dearer, whilst fine and extra fine are left unchanged on the week.

[The Manchester Cotton Review will be found on page 781. The Egyptian Market Report has had to be held over this week owing to pressure on our space.]

NOTES OF THE WEEK.

The Balkan Wedding.

All the fairy godmothers were present to bless the Belgrade wedding last week, and the only absentee to show his displeasure at not being invited was the Clerk of the Weather. The rain may have been an inconvenience; but it could not damp the people's spirits. No happier augury for the success of the union and of King Alexander's reign could be found than in the enthusiasm with which His Majesty and his bride were acclaimed by his loyal subjects. Such attention as could be spared by the public from the central figures would seem to have been devoted to the Duke of York in his double role as representative of King George and *Koom* at the marriage ceremony. The golden opinions that he won on an occasion which called for nothing more than that he should be his own natural self are a source of special gratification to Britons, and we hope that His Royal Highness' visit may rekindle in Yugoslavia some of the friendly feeling towards Great Britain which in political circles has tended to grow cold since the Armistice.

The Little Entente.

It was natural that both the Roumanian and the Czecho-Slovakian Government should be fully represented at the Royal Wedding in Belgrade, and it is satisfactory to find that the Prime Ministers have improved the occasion by providing for an extension of the scope of the Little Entente. Dr. Benes has announced that there is to be a new treaty between Czecho-Slovakia and Yugoslavia, of a more general character, guaranteeing mutual support in other directions than the mere maintenance of the Treaty of Trianon. When the treaty with Roumania comes up for discussion next year Dr. Benes hopes that it will also be renewed on the same lines. In some ill-advised circles the attempt is being made to represent Roumania and Yugoslavia as being willing to pull the Allies' chestnuts out of the Anatolian fire. The idea apparently is that the Allies, having brought Greece to financial and political disaster in the pursuit of a will o' the wisp, should now involve two other countries, themselves in financial straits and with a war-worn population that can only be saved by long years of peace. We are confident that there would be short shrift for any Administration in Yugoslavia or Roumania that accepted the role, and regret to find an

English newspaper acting in this matter as the Devil's advocate.

The Position in Bulgaria.

There is a marked desire in most quarters to paint everything in Bulgaria as unfavourably as possible. What precise object is to be gained by so doing is not clear, because most people prefer to see those whom they regard as black sheep become reformed characters rather than to goad them into becoming still worse. But very little vision has ever been displayed in dealing with Balkan affairs, and the practice of pitting the different countries against each other and of using them as pawns in European politics is apparently still in vogue. We do not pretend that all is well in Bulgaria. It would be strange indeed, if it were so. We feel, however, that the Bulgarians have made a praiseworthy effort to play the game with regard to the Allied Powers since the Armistice, and that they have given the fullest justification for what ought to have been the Allies' policy—to do all in their power to help Bulgaria to make good after her disastrous default in the War. But nobody seems to have the courage to stretch out a helping hand. The old hostility survives; there are the same pin-pricks, the same misrepresentation and manufacture of lying statements—the only effect of which, if persisted in, must be to drive the Bulgarians in the direction of making common cause with Communists, Bolsheviks, and Turks, or whoever in Europe's Cave of Adullam proffers sympathy. The more critical the political position in Bulgaria the greater the need of the Allies' representatives, whether in the Diplomatic Service or on the Reparations Commission, to stand by her with help or advice. They can have no desire to meddle in Bulgaria's domestic politics, but it is tragic to see both King and Government, as well as the people, floundering, as it were, out of their depth, when a single throw of a line by the Allies might bring them into safety, to their own benefit and to that of Europe.

A Fiuman Incident.

Another unpleasant incident is reported from Fiume. Some supporters of the late Zanella Government, who had taken refuge on Yugoslav territory, recrossed the frontier and—after visiting a tavern—came into conflict with a patrol of Italian police. What is described by one correspondent as “a small battle” ensued; troops were hurried to the spot; one Italian soldier was killed and another was wounded; and finally the “invaders” were driven back whence they came. Viewed from a distance the whole affair looks insignificant, little more

than a drunken brawl. But with feelings running so high as they are in the Fiuman Free State, even a drunken brawl may very easily lead to serious trouble. The Fascisti are restless again—of course; but fortunately Belgrade and Rome are keeping cool, and have nominated commissions of inquiry. If the commissions act promptly, and somebody gets severely punished for causing the trouble, such "incidents" may be rarer in the future.

Atrocities in Anatolia.

We have received from a correspondent a copy of a "Report on Certain Destroyed Villages in the Turkish War Zone in Anatolia," by two American ladies, Miss Annie Allen and Miss Florence Billings, members of the American Relief in Anatolia, with a request that we will afford it the same publicity as that given to reports of alleged Turkish excesses. Our own belief is that the publication of these reports does very little, if any, good to either side; but since the Turks complain—and not without reason—that they are often denied publicity, which is readily accorded to Greeks and Armenians, it is only fair to comply with the request. The report, emanating as it does from independent witnesses who, as neutrals, were invited by the Turks to make their own investigations, is clearly deserving of respect. The two ladies state that they "were left entirely free to see and talk as we pleased," and that one of them speaks Turkish well; and their methods of making inquiries appear to have been calculated to secure trustworthy results. They went straight to the Turkish peasants for the bulk of their information, and they declare that their informants "gave their statements simply, with no exaggerations." Internal evidence supports the statement.

"Regrettable Incidents."

We do not propose dealing with the ladies' Report at any length, but if justice is to be done to the Turks, it is necessary to give some idea of the charges it brings against the Greeks. The latter are accused of looting on a wholesale scale, of course. That is practically inseparable from warfare in the Near East, if not elsewhere; and the Turkish witnesses themselves frankly recognized as much, "but," as one of them added, "to burn our homes and to violate our women, this is barbarism." And the crimes mentioned figure largely in the Report. Thus to take the first four villages reported on: at Mulk, out of 100 houses 95 were burned; at Oghlakji, 46 out of 50; at Hammamkarahissar, 57 out of 60; and at Kozaghaj, 196 out of 200. Men were shot for attempting to defend the honour of their women, and, to quote from the Report: "many women who refused to give money were wounded and killed; women were violated; wheat, both on the harvest floor or in the houses, was deliberately burned; sheep and cattle driven off and killed; in fact, every means by which the villagers could sustain life was destroyed." The distinction between such methods and those alleged to have been followed by the Turks may appear to some readers a very fine one. Finally, while the Report shows the conduct of the Greek soldiers in so unfavourable a light, it shows that some of the officers at least, even some of high rank, behaved both brutally and treacherously.

Our Prince in Egypt.

When it was first announced that the Prince of Wales would visit Cairo on his way home some little uneasiness was felt in certain circles, and it must be admitted that the feeling was not altogether unnatural. For Egypt

to-day is restless and—no good purpose is to be served by denying the fact—inclined to Anglophobia; and in view of certain recent manifestations, it was not entirely unreasonable to fear that some of the Egyptians might give an exhibition of ill-manners, if nothing worse, during His Royal Highness' visit. Happily all this anxiety is proved to have been unnecessary. Some of the extremest of the Extremists, it is true, proposed the taking of steps to mar the Prince's visit, but the Opposition leaders, understanding better the feeling of the Egyptian public, set their faces against the proposals, and thus nipped the mischief in the bud. And thanks to the wisdom shown, to the warm-heartedness of the Egyptians as a whole, and, above all, to the Prince's wonderful way of winning smiles and cheers even from those who come prepared to frown, and, if it can be done safely, to jeer, the visit has been a great success.

A Crowded Programme.

His Royal Highness, who landed at Suez on Friday evening and left Port Said early on Monday morning, crowded into his short visit a programme which would make most people quite ready for a rest afterwards. He was entertained at luncheon by King Fuad, who conferred upon him the Collar of the Order of Mohammed Ali; he played a strenuous game of polo, and was largely instrumental in securing a win for his side; made an unexpected shopping tour in the Mousky; attended a boxing tournament arranged by the Military Sports Committee; joined the British cavalry officers in their jumping exercises; and used such spare time as these things—to say nothing of the official calls—left him in playing tennis. And if he played and smiled himself into the liking of the Egyptians, who were at first inclined to aloofness, he left behind him in the hearts of the British a feeling of loyalty, pride and affection which nothing is likely to diminish.

Sudan Notables.

In a letter which will be found on another page our Khartoum Correspondent gives us this week some interesting and valuable information about the Sudan leaders, religious and lay, who formed the Delegation which came to England in 1919. These are the men—or some of them—who during Lord Allenby's recent visit to the Sudan expressed a not unnatural anxiety regarding their country's future. They desire nothing better than for Great Britain to continue to occupy the position she has held on the Upper Nile since Kitchener freed the land from the Mahdist terror. Yet a study of the biographical details given by our Khartoum Correspondent would suggest that some of them might be pardoned if they regarded the change made in 1898 with no particular enthusiasm. The fact that they feel as they do, and that they should manifest their feelings as they have, is a fine tribute to British administration, and, especially, to the type of Briton who has been sent to work amongst them and for them. Plainly, they fear that any change made now would be for the worse, and, though it may be unfashionable to say so, it seems to us that their fears are quite justified.

France and the Arabs.

An official contradiction has been issued in Paris of the report that the French Government had concluded a treaty with Ibn Saud "involving territorial, political and military clauses directed against Great Britain and her protégés, Kings Hussein and Faisal." If rumour had been as explicit as the words quoted imply, it was as exaggerated as the final sentence of the *démenti*,

which states that the report is devoid of all foundation. The basis of the report was the exchange of views between the French authorities in Syria and representatives of Ibn Saud, at a time when the latter was allowing his followers to attack Iraq, which is for the time being under Great Britain's charge. There is certainly no need at present to regard the incident too seriously; the French, having a guilty conscience, see the hand of King Faisal in everything that goes wrong in Syria, and jumped at the opportunity of showing favour to Ibn Saud in the hope that they could encourage the Sultan to embarrass Iraq still more. But the Nejd representatives appear to have learned something from their fellow-Arabs in Syria, and the result was a treaty of peace and amity between Sultan Ibn Saud and King Faisal. It would be a more friendly act on the part of the French Government if, instead of allowing General Gouraud to attack King Faisal in every public utterance that he ever makes—and they are of almost daily occurrence—it consulted the British Government, in order to find out whether there was the least justification for the General's charges. If General Gouraud could adduce any satisfactory proof of the accuracy of the statements, it would be the duty of Great Britain to put a stop to the practices of which he complains. On the other hand the French have no right—to leave the question of good manners on one side—to attribute to the intrigues of a sovereign friendly to Great Britain the shortcomings of their Syrian administration.

THE WEEK AT HOME.

London, Monday.

A Slack Week.

For the first time in the memory of post-war man, the past week has not provided a political crisis. Home politics have been dead; not a speech has been made, and the Under-Secretaries have slept at their posts while their superiors have been scattered in the shires. Only Ireland has been with us: it kept Mr. Churchill in town, and brought Mr. Lloyd George back from Criccieth, but even here there seems a temporary improvement.

Early last week British troops in Ulster repulsed the Irish Republican Army, which ran away; apparently it had not expected that British protection for the Northern Government was seriously meant, and the "whiff of grapeshot" which settled that particular irruption has had a wholesome effect. A long and angry *communiqué* of protest was issued by the Republican Army, which was plainly disconcerted to find itself opposed by regular soldiers.

There has been the usual crop of barbarous outrages in Belfast, and murders and arson have been reported elsewhere in Ireland; but the discussions on the constitution of the Free State have proceeded harmoniously in London. Whether a constitution has much chance of working in a State where the very foundations of society are quaking is a problem that need not be discussed here; and the publication of a further agreement between Messrs. Collins and De Valera discountenancing free candidates at the forthcoming elections seemed to deprive the contests of the last touch of reality.

The agreement was generally interpreted as a tacit threat against candidates who would not obey the party coalition of Provisional Government and Republican forces, and threats in Ireland are apt to be followed by arson and murder. Several candidates, however, have been brave enough to come forward in spite of the threats; it will be interesting to see how they get on. On them, and not on the official parties, depends the hope of Irish freedom. The independents are mostly of the agricultural or labour description, and they appear to be sick of the reign of terror. The real question is whether they can persuade those who agree with them to vote for them.

Westminster and Palestine.

In general politics two matters are certain to call for attention when Parliament meets again. The failure of the projected Morgan international loan will bring up once more the whole question of indemnities, and on this problem the House of Commons will look for information to Mr. Grenfell, the new member for the City, who is a partner in the firm of Morgan, Grenfell & Co. And I hear that a great attack is to be made on the Palestine Agreement for water both by the Die-Hards, who do not love the Jews, and by British industrialists, who do not like the idea of machinery orders going to Germany.

The Channel Tunnel.

Another flying accident has led to a correspondence in the papers as to the safety of the Cross-Channel aeroplane services, and the public mind is rather exercised at the moment on the question. Two accidents in a few weeks are naturally disturbing, but the standard of safety is high taken as a whole.

At the same time, one man's misfortune is another man's good. The dangers of the air and the discomforts of the sea have led to a revival of interest in the Channel Tunnel, and preliminary borings are now proceeding, and full plans being worked out. It seems to be confidently anticipated that Parliament will give its consent some time this session.

Insanity and Capital Punishment.

The anomaly of the distinction between legal and medical insanity was strikingly demonstrated last week, and a violent controversy is raging over the True-Jacoby question.

Jacoby was a pantry-boy of 18 who murdered an old lady in a hotel. There was no excuse for the crime, but the jury recommended the lad to mercy, apparently on account of his youth. The Court of Criminal Appeal dismissed the appeal—pointing out, however, that the prerogative of mercy lay, not in its hands, but in those of the Home Secretary. A petition for reprieve was signed, but rejected, and the execution took place.

There would have been no real protest on this account, but the following day Ronald True was reprieved. True had murdered his paramour for money; evidence was given that he was of unstable mentality, but he was convicted by the jury, and no recommendation of mercy was given. The case was dismissed by the Court of Criminal Appeal, like Jacoby's; but on the day before the execution the Home Secretary, acting on the advice of a medical committee, announced the reprieve.

The decision was doubly unfortunate. The baser part of the public remark that Jacoby was a friendless pantry-boy, and was hanged, whereas True was a man of position, the illegitimate son of a lady of title, and with highly-placed friends; he was reprieved. This of course is material for the agitator, and Mr. Shortt is bound to be closely questioned in Parliament on his decision.

On the other hand, the lawyers are more concerned with the intolerable gap between legal insanity and the mental definition of insanity which the case has disclosed, and the heavy guns of the Temple and Harley Street are getting ready for action. It would not be surprising if the long and angry controversy which is evidently in prospect resulted in a change of the legal attitude towards insanity, which appears to be behind the times and inconsistent with itself. Incidentally, I notice that the *Law Journal*, an admirable paper which seldom errs in extremity of statement, remarks that "the public conscience has been weakened by this latest instance, and the injury done is not confined to the particular case; it extends to the whole administration of justice . . . The waning credit of the Home Office has received a fresh shock."

The Shortage of Clergy.

A diocesan conference last week again deplored the increasing shortage of clergy. There are not enough men in the theological colleges to fill the vacancies in the Church; and not only is the shortage bad in itself, as leaving the Church understaffed, but it operates to lower the standard of men in Holy Orders, as it diminishes the Bishop's powers of selection, since he will naturally hesitate long before rejecting a candidate unless he is

obviously unsuitable. The Church appears to be the only profession which is not overcrowded.

It is suggested that the reluctance of men to enter the Church is not entirely due to the poor financial prospects. There is also a general feeling that promotion too often goes by influence and not by merit, and once again the system of patronage and appointment is being impugned. On the other hand, the quite obviously increasing interest in religious matters on the part of the public since the war should in time operate to secure more candidates. If the quality of a sermon could be as much improved as the quality of the average service has been improved, congregations would be larger, the influence of the clergy would revive, and recruits should be more easily obtained.

The Cause of Cancer.

A dreadful discussion has broken out in several newspapers as to the cause of cancer. One distinguished physician wrote to *The Times* to say that it was a disease of civilisation, brought on by too much tea, coffee, or cocoa. Another equally distinguished medico promptly replied that the real cause of cancer was milk, which adults are not fitted to digest, which carries every germ, and is the cause of more ills than even cancer. A third doctor now remarks that cancer is probably to be sought in water. The only insurance, therefore, seems to be whisky and soda, but it is not everybody who likes it at breakfast. But when the faculty disagree so emphatically the mere layman begins to wonder whether they really know much about it.

It is not even certain that it is a disease of civilisation, since fish and reptiles and even guinea-pigs get cancer, and their standard of civilisation is not, to say the least of it, very high. The real reason why primitive man does not suffer so much from cancer as the modern is that cancer seldom attacks people under forty, and a good many primitive men had fallen victims to the axe and spear before they reached that age.

It is a depressing fact that we are spending thousands of pounds a year on cancer research, but we seem no nearer a solution of the mystery than we were twenty years ago. The one consolation is that many imaginary causes of the disease have been proved not to be responsible for it.

Another Shortage of Water.

We are again faced with a shortage of water. The winter rains did not nearly make up last summer's deficiency; April was a cold dry month, during which surface water evaporated; May ended in blazing sunshine, and June has so far given us clouds and the promise of rain, but no rain. Some of the sensational daily papers, like the *Express*, have tried to work up a scare, and the *Daily News* put the whole trouble down to the wickedness of a Unionist Government a quarter of a century ago, when it refused to bring London water from Wales. This is, of course, absurd, as the shortage is not in London at all, but in the country, where the root crops and the cattle are suffering.

There is a certain shortage in some towns but not in others; this, of course, could be got over by one town supplying another. But local Governments are proverbially jealous of each other, and there has been a great deal of bickering about this matter. If the present

summer rivals that of 1921, and the situation becomes really serious, the Government will probably have to set up a National Water Board.

The Week's Books.

"Red Dusk and the Morrow" (Williams and Norgate) by Sir Paul Dukes, is an admirable description and analysis of Soviet Russia. The Soviet rests on "Jewish brains and Chinese bayonets"; but the tolerance of the Red tyranny by the people "in preference to the White tyranny is based upon the conviction, universal throughout Russia, that the Red is a merely passing phenomenon. Human nature decrees this, but there was no such guarantee against the Whites with the support of the Allies behind them."

It is impossible to do justice to "British History in the Nineteenth Century" (Longmans) by George Macaulay Trevelyan. It is the work of a man of the world who is something more than the merely meticulous student of documents; a broad and brilliant survey of a great period. One may quarrel with some of the judgments of a very masculine mind, but even when one disagrees, one respects the author's point of view.

"Soliloquies in England" (Constable) by George Santayana, is a volume of essays by one of the few philosophers of the day who can write intelligibly. The matter of the essays is perhaps a little slight—it reminds one rather of a holiday task—but the manner is charming.

Some Recent Books.

"Four Famous Mysteries" (Nisbet) by Sir John Hall, tells the story of the Popish plot, the murder of Courier in 1825, the disclosure to Canning of the Treaty of Tilsit, and the disappearance of Mr. Bathurst, British Envoy at Vienna. For those who like the byways of history I can imagine no book more fascinating.

"The Secret Places of the Heart" (Cassell) is Mr. H. G. Wells' latest novel. The characters are really lay-figures who talk socialism, free love, and the reformation of the world. "There was to be one peace and law throughout the world, one economic scheme and a universal freedom for men and women to possess and give themselves." Even with the promise of those allurements, I cannot say that the book strikes me as good. Mr. Wells has reached the stage of imitating himself.

"Books and Characters" (Chatto and Windus) by Lytton Strachey, is a series of reprinted essays by the celebrated author of the "Life of Queen Victoria." They are a collection of acute and able analyses of literary men. A typical instance is his characterisation of Gibbon: "With the 'Christian morals' to guide him, Dr. Johnson set about the transformation of the prose of his time. He decorated, he pruned, he balanced; he hung garlands, he draped robes; and he ended by converting the Doric order of Swift into the Corinthian order of Gibbon."

"Russia's Foreign Relations during the Last Half-Century" (Macmillan) by Baron S. A. Korff, is an unprejudiced survey of Russian foreign policy prior to the Revolution of 1917. The author appears to have no political axe to grind, and he relies throughout on facts which are common to all students of international history. The book contains no secret revelations.

"More Sidelights on Relativity" (Methuen) by Albert Einstein, is a reprint of two lectures given before the University of Leyden. The first deals with the Ether, on which Einstein's opinion is well known, but it is convenient to have an authoritative exposition of his views. The second is more interesting, on "Geometry and Experience." The author raises the question: How is it that mathematics, being after all a product of human thought which is independent of experience, is so admirably appropriate to the objects of reality? Is human reason merely by taking thought able to fathom the properties of real things? The answer given is brief and simple, but important for philosophy: "As far as the laws of mathematics refer to reality, they are not certain; and as far as they are certain, they do not refer to reality." In other words, even mathematical truth is relative and phenomenal.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, June 2.

Empire Day.

Empire Day was as usual celebrated in Alexandria by children's sports at the Sporting Club, where Mr. Victor Naggiar, the President of the British Chamber of Commerce, and Mrs. Naggiar were at home to the British community. Before the sports started Mr. Naggiar delivered a short address, explaining to his young audience the significance of Empire Day. The children, of whom over four hundred were present, thoroughly enjoyed the races, and at the conclusion the prizes were presented to them by Mrs. Alban, the wife of the British Consul-General.

The Foreign Office Protest.

It was with much satisfaction that the British community learned of the protest made by the British Government at the continuation of the outrages on British subjects, but on the other hand the reply of the Egyptian Government is generally regarded as far from satisfactory. Particularly is exception taken to the *communiqué* issued to the general public, and it is felt, not only in British but also in other European circles, that the Egyptian Government must take some effective and decisive action in the matter, if it wants to justify its claim to protect foreigners without intervention from outside.

I detect a tendency in Egyptian circles to shuffle out of the responsibility by putting forward the fact that Englishmen are still holding senior posts and are therefore responsible. No more disloyal argument than this could well be imagined, for since the first day on which the Cabinet took office British control has been almost completely withdrawn, and the Ministers have been left absolutely free to do what they liked. The Englishmen in the service have carried out their work under the direction of their Egyptian chiefs, and if this is the way responsibility is henceforward going to be shifted on to the shoulders of English officials who no longer enjoy the executive powers they had under the Protectorate, then those whose services the Egyptian Government wishes to retain in order to help it over the difficult transition period will have little incentive to remain.

An unsatisfactory feature of the attitude of the Egyptian Government towards these outrages is the manner in which it has delayed and disputed payment of compensation due in previous cases. It is futile for it to say, as it has done in its reply to the Foreign Office's protest, that, while prepared to give generous compensation, it does not admit that it has any further responsibility beyond that of maintaining an efficient police force. The Egyptian Government has always been responsible in the past for damage sustained by foreigners as a result of political disorders, and as it admits that these outrages are the outcome of political excitement it cannot evade responsibility. Moreover, in cases of accidents on the State Railways, for example, in which railway employees have been injured, compensation has always been paid to them or their heirs. Consequently, whether the victims of the recent outrages were attacked while not on duty or whether, as in the case of Bimbashi Cave, they were attacked while in uniform, the Government is responsible, and it is not to its credit that it should try to evade responsibility or should hold up payment as it has done in the case of Mr. Aldred Brown, who was murdered in the middle of February last, and whose widow is still waiting for her compensation.

An interesting fact has emerged from the inquiry showing how well-meaning efforts at retrenchment can defeat themselves. Hitherto the Cairo City Police has had at its disposal several cars, and, knowing the danger which his officers ran, the Commandant has been in the habit of having them conveyed to and from their homes by car. Recently the Ministry of Finance, very rightly

exercised over the large number of Government cars in use, ordered an immediate reduction, and in spite of the protest of the Cairo Commandant he was left with only one car. The officers consequently had to take to bicycles, and it was within a few days of the withdrawal of the cars that Bimbashi Cave was shot while cycling home. Thus in order to save a relatively negligible outlay, not only was the mobility of the senior officers of the Cairo City Police materially reduced and consequently the efficiency of control affected, but the life of a valuable officer was sacrificed; while the Government will be compelled to pay in compensation a sum representing many years' upkeep of the cars which were economised.

The Consular Corps Incident.

Further perturbation has been caused among the foreign communities by the action which the Egyptian Government took at the end of last week in the case of the Consular Corps. A circular letter in Arabic was received by the members from the Governorate advising them that henceforward they would not be received at the Palace receptions, as had been the custom in the past, but that those members who wished to attend could do so in their private capacity, and would be received with the foreign notables. The matter was at once taken up by the Diplomatic Corps. In the first place, it was a glaring breach of etiquette for this communication to be made in the form of an Arabic circular. It should have been in French and, although it is true that the Consuls are accredited to the Governor, the communication should have reached them direct from the Ministry of Foreign Affairs through their respective Diplomatic Agencies. Secondly, the refusal to recognise the Consular Corps as a body was regarded as being aimed directly at the root of the Capitulatory régime. It is understood that in taking this decision the Government based itself on the Protocol existing in European countries, but in doing so it overlooked the fact that the Consular Corps in Egypt holds a position very different from and much more important than that in European countries. Here in Egypt the Consuls are the embodiment of the Capitulatory régime. It is they and not the Diplomatic Agents who exercise the extra-territorial jurisdiction conferred on the foreign communities by the Capitulations, and the decision to receive them not as a Corps but only as private individuals was tantamount to refusing to recognise their official capacity and thus materially weakening their position as defenders of the Capitulatory régime.

The Diplomatic Corps, which, it may be pointed out, in Egypt is really a development of the Consular Corps, the members of which in earlier days were the sole representatives of the Powers in the Ottoman Dominions, could not accept what might easily have become a dangerous precedent, and it at once made official representations through its *doyen*. At first the Government refused to give way, but when it became evident that the Diplomatic Corps might absent itself from the Bairam reception a compromise was arrived at, and it was agreed that the Consular Corps should on this occasion be received as such but separately from the Diplomatic Corps.

The whole question, which has assumed importance owing to the stupid way in which it was handled on the

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

Egyptian side, is now under discussion. The foreign communities are determined to have the official position of their Consuls maintained, and no doubt a permanent compromise will be arrived at on the lines temporarily agreed to for Sunday's receptions; but the tactless manner in which the question was raised by the Egyptian Government has, I find, had the unfortunate result of creating an atmosphere of suspicion among the foreign communities which it will take considerable time to live down.

Port Said, May 29.

Empire Day celebrations this year were among the most successful that we have had. The International Sporting Club grounds were kindly lent for the occasion, and admission was by ticket, which to a great extent limited the people there to those who had the right to come—a great improvement on other years, when half the riff-raff in the town appeared to gather and the races for the children were more or less disorganised. The proceedings commenced with a march by the English Girl Guides, who saluted the flag, and they were followed by most of the British children of the town. The pipers' band of the K.O.S.B. from Ismailia were there, and constituted a much appreciated and novel feature of the afternoon's proceedings.

The races for the children were most successful, and the tug-of-war among three competing teams aroused great excitement, as they were so evenly matched. At the end, when the prizes were distributed, the first to be taken was the Challenge Cup, given last year by Mrs. Kennard to the Girl Guide patrol, which had shown most zeal and efficiency during the past year. This year it was awarded to the Robin Patrol, whose leader was Gladys Hird, and second, Eunice Trumper. Owing to the close co-operation of all sections of the community the tea went off without a hitch, as did all other items, and everyone felt it had been a most delightful day.

On Saturday morning there was a Memorial service in the Church to the memory of the late Bimbashi Cave, who during the War had spent some years here. The Church was crowded, and all Government departments and other sections of the community were represented, but the most notable thing was the very large number of the Police, both officers and men, of all sections who voluntarily came to pay respect to the memory of their late officer. Much sympathy is felt for Mrs. Cave, whose help in the hospital here during the war is remembered by many.

One of the many improvements that are taking place in the town is that the strip of beach outside the sea road is being enclosed, and will be laid out with flowers and shrubs. The date palms already planted on each side of the road, seem to be all in a flourishing state, and if things go on as they seem to be going, the Plage at Port Said will be second to none in Egypt. It is to be hoped that the Municipality will take strong measures with regard to advertisements on the bathing huts. They are not exactly things of beauty now, but if the owners, whether they are members of the Municipality or not, are allowed to advertise on their huts, Port Said may sink to the level of Cairo or Alexandria.

SUDAN.

Khartoum, May 24.

Leaders of Public Opinion.

In view of the recent allegations in the Egyptian Press that the various members of the Sudan Delegation of July, 1919, were kidnapped from their homes, rushed off to London, and told what they were to say to His Majesty and also to Lord Curzon, it is only just that the composition of the Delegation should be made known.

Owing to the difficulty anticipated in obtaining adequate accommodation for the actual Delegates and their various followers, it was necessary to limit the numbers as much as possible, and as a result of careful consideration the following notables proceeded on their mission:—

Sir Sayed Ali El Mirghani, K.C.M.G., K.C.V.O.
El Sheikh El Tayeb Ahmed Hashem, C.V.O., M.B.E.

El Sheikh Ali El Gassem Ahmed Hashem, M.V.O.
El Sayad Ismail El Azhari, M.V.O.
El Sherif Yusef El Hindi, C.V.O., M.B.E.
El Sayed Abdel Rahman Mohammed Ahmed El-Mahdi, C.V.O.
El Sheikh Ali El Tom, M.V.O., M.B.E.
El Sheikh Ibrahim El Musa, M.V.O., M.B.E.
El Sheikh Ibrahim El Hag Mohammed Farah, M.V.O.

El Sheikh Awad El Kerim Abdalla Abu Sin.

Sir Sayed Ali El Mirghani is the head of the principal religious sect of the Sudan—the Tarika el Mirghania. He claims direct descent from the Prophet Mohammed and was born at Dongola in 1879. At the outbreak of the Mahdist revolt, Sir Ali Sayed with his father escaped from the Sudan, and succeeded in reaching Cairo, where he studied Mohammedan Law and Doctrine, until his father's death, when he returned to Suakin, and stayed there until the retrocession of Kassala, when he proceeded to the latter place, subsequently making Omdurman and Khartoum his headquarters after the overthrow of the Khalifa. Unofficially, Sir Sayed Ali is considered as the leader of the country; he possesses very great influence, which he has consistently used in assisting the Government. He was presented to King George at Port Sudan on the 17th January, 1912. Created C.M.G. in 1900, K.C.M.G. in 1916, and K.C.V.O. in 1919, and headed the Sudan Delegation in 1919.

El Sheikh El Tayeb Ahmed Hashem is the Grand Mufti of the Sudan, being the most prominent Mohammedan legal official of Sudanese nationality. He is a Jaali Arab by race. Prior to the Mahdia he was employed by the Khedivial Government as a clerk of the Berber Mohammedan Court. During the Dervish rule he was selected as special tutor to the eldest son of the Khalifa. On the re-conquest of the Sudan he was appointed Kadi of the Berber Court, and later was promoted to his present important position.

El Sheikh Abu El Gassem Ahmed Hashem is President of the Board of Ulema, the principal legal and religious Mohammedan body. He is a brother of the Grand Mufti, and before the Dervish Empire, was employed under the old Government as a teacher in the Berber Mosque. After the revolt he became clerk to the Mahdi and, afterwards, to the Khalifa. On the reconquest of the Sudan he was appointed Kadi of the Sennar Province, and was promoted to his present office in 1912.

El Sayed Ismail El Azhari is the nephew of El Sayed El Mekki, head of the Tarika Ismailia, a prominent religious sect of the country. His father was slain by the Dervishes, and he was allowed to live on sufferance in Omdurman, but was looked on with extreme disfavour by the Khalifa.

El Sherif Yusef El Hindi is of Indian origin, his grandfather having migrated to the Sudan from India. He claims descent from Hussein, son of the Khalif Ali, and is a religious leader of much influence. After the re-occupation of the Sudan he rendered valuable service to the late Lord Kitchener, and was of very great service during the Great War in assisting the Government in their purchases of dhurra and camels for the Egyptian Expeditionary Force.

El Sayed Abdel Rahman Mohamed Ahmed El-Mahdi is the eldest surviving son of the "Mahdi." He was only a boy during the Dervish rule, and after the re-occupation of the country lived quietly on the Blue Nile until 1906, when he came to live in Omdurman. As his father's son he was very greatly venerated by large numbers of the more ignorant of the population. His influence is widespread, and was used by him with conspicuous loyalty in putting a stop to a great many of the undesirable rumours that were inevitable during the great war.

Having dealt with the religious side of the delegation, we now come to the great temporal chiefs, of whom El Sheikh Ali El Tom, as "Nazir" or head Sheikh of the Kabbabish is the most prominent. The Kabbabish are the largest and most powerful of the tribes in the Western Sudan, thoroughly loyal, and pre-eminent amongst all the natives of Northern Kordofan, in strength of

character and general intelligence. Sheikh Ali el Tom rendered invaluable service during the War, and during the occupation of Darfur in particular in protecting the western frontier of the Sudan from raids and inroads of hostile Arabs sympathising with the Senussi.

El Sheikh Ibrahim Musa is another great temporal chieftain, being "Nazir" of the Hadendoa, the largest and most powerful of the tribes of the Eastern Sudan, the "Fuzzy-Wuzzy" of Kipling. At the time of the Dervish outbreak, Ibrahim Musa was but fifteen years of age, and remained loyal to the old Khedivial régime until the fall of Kassala in 1885. He subsequently refused to join the Khalifa in Omdurman, and attempted to escape to Lord Kitchener in Suakin, but was captured by the Dervishes. He eventually got away and reached Suakin in 1890, where he saw a considerable amount of fighting with the Dervishes. He has been Nazir of the Hadendoa since 1904.

El Sheikh Ibrahim El Hag Mohammed Farah is a notable of the Jaalin tribe, whose headquarters are at Berber, but who are scattered all over the Sudan. During the Nile Expedition he rendered very valuable service at Jakdul, Halfaya and other actions under Major Wortley. The vicissitudes of his tribe are fully recorded by Slatin Pasha and Father Orhwalder. Having become the special object of the Khalifa's hatred, the tribe suffered severely in the massacre instigated by him, just before the re-conquest of the country.

El Sheikh Awad el Kerim Abdalla Abu Sin, Nazir of the Shukria, inhabiting the Blue Nile and Kassala Provinces, the largest tribe in the Central Sudan, was the tenth member of the Delegation. His father and grandfather have been prominent in the history of the Sudan, and during the Mahdia the tribe was subjected to the greatest hardships and vicissitudes owing to their loyalty to the old Government.

An Embryo Council.

A comparatively recent innovation on the part of the Sudan Government has been the institution of meetings of Arab Sheikhs and Omdahs at such times and places as may be most convenient to enable them to confer with the Government representatives on points of administration and also to express their views regarding any new or proposed ordinances. To all intents and purposes this is an embryo Legislative Council, and the ruling Sheikhs and notables are given advisory powers as regards self-government, which they appear to appreciate thoroughly. It is hardly conceivable, therefore, that they would prefer to be members of the Egyptian Legislative Council, where they would be swamped out by town-bred hybrids with interests totally opposed to those of the representatives of the great nomad tribes of Arabic origin inhabiting the Northern Sudan. It is generally recognised by all residents in this country that the so-called inspired articles appearing in the Egyptian press purporting to emanate from natives in the Sudan are composed entirely by Egyptian Nationals, who when taxed with the forgery naively confess that they are acting under orders from their employers, and that after all it is only political propaganda. Although we residents in the Sudan know that these effusions are the height of absurdity, there are many misguided people outside the country who, ignorant of their origin, give them undeserved attention and credence, and it is in the hope of affording them a little light on the subject that the foregoing details have been written.

IRAQ (Mesopotamia).

Baghdad, May 25.

Almost the sole topic of conversation in Baghdad at the moment is the treaty between Great Britain and Iraq and especially the question whether Iraq is to remain under the Mandate or is to have complete freedom. The belief has become common that King Faisal has received an ultimatum from the British Government through the High Commissioner to the effect that the Mandate is to be accepted and embodied in the treaty, otherwise the British will evacuate the country. Failing any official announcement on the subject, it is not

possible to say whether this report is true or not, but it is implicitly believed in Baghdad, and as a result all other subjects of discussion have given place to it.

Speaking generally it may be said that people here are divided into three parties. First, those who support the maintenance of the Mandate with a measure of British control and assistance. These form a big majority in Basrah and among the tribes, and have a large body of supporters in Baghdad. Secondly, the extreme nationalists who want complete independence entirely free from any British, or rather foreign, interference or control. The third party lies between these two extremes. They do not as a rule favour the inclusion of the word 'intidab' or Mandate in the treaty, though they realise that a measure of foreign control is necessary and desirable for some years. The word 'intidab' does not mean anything in particular to them, any more in fact than the word 'mandate' does to us. It is not definite, and they realise that whatever else it may mean it implies inferiority on the part of the mandated country, and as such it hurts their feelings. On the other hand they realise their inferiority at the moment, and there are many who now oppose the Mandate but who would support it, if it was definitely laid down in the Treaty that the Mandate was for a fixed number of years only and that at the expiry of those years the country would be given 'istiqal' or complete freedom. It may be that there is such a proviso in the Treaty; but such secrecy is being observed regarding it that no one is in a position to argue the point with any certainty as to the facts.

The local vernacular papers are very largely in the hands of the extreme nationalists and devote a good deal of their time to high-sounding fulminations against the Mandate. The extremists are, however, well behind the other two parties in numbers, though, as is the nature of all extremists, they are extremely vociferous.

The Elections.

Reports from the districts indicate that the tribal leaders are taking the elections very seriously and are busy with their preparations for obtaining the election of the tribal candidates. Owing to the prominence which has been given to the discussions regarding the Mandate little has been heard in Baghdad about the elections.

The Iraq-Nejd Treaty.

The treaty arranged between Iraq and Nejd has met with considerable criticism, especially from the anti-mandate party, which prefers to see in the decision to appoint a British officer as president of the boundary commission an instance of uncalled-for interference by the Mandatory Power. It was not without interest to note that some of the local papers deprecated the treaty altogether on the grounds of Arab national unity, declaring it to be unthinkable that two Arab countries should find it necessary to conclude formal treaties in order to settle their mutual affairs. After the outburst against the Akhwan which resulted from the raids only a few weeks ago one may be excused if one detects a certain note of insincerity in these later articles.

Economies!

A Geddes super-axe committee has been appointed to investigate the Budget estimates of the various Ministries and to reduce the expenditure by 30 lakhs of rupees. This will be no easy task, and gossip is already busy regarding the economies which will be proposed. It is taken for granted that considerable reductions will be made in the salaries of officials and a reduction in the number of officials is expected. There is good reason for a reduction in the pay of officials, as the rates of pay now existing were fixed at a time when the cost of living was very high, and now that a big drop in prices has taken place a lowering of the rates of pay is certainly called for. This, however, will not go far towards effecting a reduction of 30 lakhs, and it will be interesting to see what other proposals are made.

New Railway.

Work has begun on the construction of a branch railway line to Hindiyah Barrage. It will leave the Baghdad-Hillah line at Khan Haswah station and reach the Barrage via Museiyib. It is hoped that in the near

future it will be possible to run the line across the Barrage to Kerbela. The money for this new branch has been found from the budget of the Irrigation Department. Extensive repairs have to be made to the Barrage this year and next, which will necessitate the transport of large quantities of heavy stones, and it has been found that the difference in cost between carrying these stones by the existing means of transport and carrying them direct to the Barrage by rail will be sufficient to pay for the cost of building the line.

General News.

Mr. Gordon Harris, of the Egyptian Irrigation Service, has arrived in Baghdad on a short deputation to inquire into the existing organisation and activities of the Irrigation Department, and to give his advice regarding future development.

Mr. E. N. Drower, the Government Counsellor, has been appointed to officiate as Adviser to the Ministry of Commerce in addition to his other duties.

Yassin Pasha al Nashimi arrived in Baghdad a few days ago from Syria. He has had a distinguished career in the Turkish army and has taken a prominent part in affairs in Syria during the past three years. His arrival created considerable interest and much speculation as to what post he would fill. Up till now he has not been appointed to any office, though doubtless he will be in the near future.

PALESTINE.

Jerusalem, May 28.

The "Wailing" Wall.

Every visitor to Jerusalem has been introduced to the "Wailing Wall" (the nine courses of Herodian masonry still above ground, which form a part of the Western Wall of the Haram Area), where pious Jews are to be found the whole day long reciting prayers and psalms and bewailing the destruction of the Second Temple, of which these stones are supposed to be the only visible remnants. This "Wailing Wall" has, within the last few months, been the subject of unseemly and petty disputes which, anywhere else except in Jerusalem, would have seemed too paltry to merit serious attention. For as long as anyone can remember, the Jews have been in the habit of placing one or two wooden benches by the Wall for the benefit of those who may have been standing there for hours performing their devotions. This was but reasonable and merely kind. Those who pray and lament there are always the most aged of Jews and Jewesses, earning, in many cases, their scanty pittance by saying psalms at this place on behalf of co-religionists in Europe and America, who send money for this very purpose.

Within the last few days the Supreme Moslem Council has (according to the Arabs) obtained a ruling from the Administration that these benches may no longer be placed there, inasmuch as they incommode the passage to and fro of a couple of Arab families who live opposite to the Wailing Wall. It is all very paltry, and due solely to a recently developed caprice on the part of the Moslems. It has led to a paean of praise in the Arab Press of Great Britain's fair-mindedness, and the bitterest of invective and vituperation from the side of the Jews. One Hebrew paper points out that it was left to a British Administration to sink to this unpardonable meanness after the privilege of sitting had been permitted to the Jews during four centuries and more of Turkish rule. It is difficult, as a matter of fact, to see how the benches could have been in anybody's way: and who ever heard of anybody in the Old City developing foibles as to the seemliness of approach to his dwelling? Leading articles have been devoted to the subject in the local Press, and no doubt the Jewish Press throughout the world is waxing indignant.

The inner history of the rise of the trouble appears to have been that the adjoining Moslem families sought in an inspired moment to turn an honest penny by reason of their proximity to this historic site. Their bit was certainly a modest one: it was simply a request, in return for a small rental of a few pounds, to house the benches when they were not in use, and so save the Jews the trouble of moving them backwards and forwards. The Jewish authorities, whoever they may have been (and it is not difficult to guess), determined that if they paid over any money for leaving their possessions in the neighbourhood of the Wall, they would be compromising what they considered their historic rights at the Wall. Then the case at once assumed a high political complexion. The Jewish National Council sat on the matter, and stated the case for the Jews and their benches; and the Supreme Moslem Council argued on behalf of the embarrassed neighbours of the Wailing Wall. The upshot was that the benches were solemnly removed by an armed guard. The whole matter sounds ridiculously trifling, but it is yet another illustration of the local vice of importing higher politics into the smallest affair.

An Interesting Venture.

It is worth while calling attention to an interesting new venture in Jerusalem. It is not so very new really: it is already eighteen months old. Last week the "Marbadia" held an exhibition of its work. The "Marbadia" is a Jewish Carpet Factory, employing nearly two hundred hands and producing hand-made mats, rugs and carpets of excellent quality and mostly of artistic appearance. Its interest lies chiefly in the fact that it is aiming at an original art form, peculiarly Jewish. This is more difficult than it sounds. The Jew has usually shone as an artist in borrowed plumes; specifically Jewish art is hard to find. When the problem is applied to carpets the difficulty is manifest: there are very few *motifs* of his very own which the Jew can use. Infinite repetition of the "Seven-branched Candlestick" and contorted Hebrew letters quickly pall on one as carpet designs. Therefore two recent devices, which the artists attached to this Carpet Factory have adopted, are full of interest. They have been most successful in a rug whose design is comprised of *motifs* derived from the ancient Jewish coinage—of the Maccabean and the "First" and "Second" Revolt periods. Again a new source of design was opened to them in the excavations recently carried out at Tiberias, where an early Synagogue was laid bare and various sculptured forms, mosaic designs and domestic articles—all presumably by Jewish craftsmen—were brought to light. These additions to Jewish "art-forms" are being utilised happily by the designers.

The promoters of this industry are hopeful as to their future. They consider that they can employ as many as two thousand workers, mostly home-workers, in the craft, and ultimately produce £E.300,000 worth of the finished article per annum, without overstocking the market.

To Develop Resources.

A healthy sign that interest and confidence in Jewish enterprise and growth in Palestine are not confined solely to Jews and Jewish capital, is the announcement contained in the last number of the *Commercial Bulletin* (published by the Government Department of Commerce and Industry) that "a loan of £E.67,000 has been advanced by the Anglo-Egyptian Bank to the Municipality of Tel-Aviv for the purpose of building a new business quarter consisting of 159 shops and store rooms."

A startling indication of what lies before Palestine—whose future, according to some, should be confined to small-scale agriculture and "tourism" (a vile word concocted by the Department of Industry to indicate, apparently, the art of making the most out of the tourist!)—is also to be found in the information given by the same number of the *Bulletin*, to the effect that "a Geological and Mining Branch of the Department of Commerce and Industry was opened on the 1st of May, 1922. Mr. G. S. Blake has been appointed Geological Adviser to the Department and is in charge of the branch. Mr. Blake will also perform the duties of Controller of Mines under the forthcoming Mining Legislation."

The Making of Guides.

Realising the sufferings inflicted on innocent tourists by self-appointed "guides" in Jerusalem, the Pro-Jerusalem Society long ago had the idea of producing certificated "guides" who should have attended lectures and passed examinations in the history and topography of Jerusalem. But nothing came of the idea. We are glad, however, to see that the Zionist Commission is thinking of taking up the same idea. Gentile tourists to Jerusalem (and the majority of Jewish tourists for that matter) are given a most unfortunate impression of Jews and Jewish work in Palestine. This past season saw the Tourist and Guide business almost exclusively in the hands of non Jewish agencies, and there was even a complaint against what was thought to be a deliberate boycotting of Jewish cab-drivers. The tourists were taken through the usual routine of Holy Places; and outside of Jerusalem they were taken only to places like Nazareth and Bethlehem. If they ever had the curiosity to ask "What of the Jews?" they were simply shown the filthy ghetto in the Old City and warned to hold their noses as they passed Meah Shearim. They were never shown the better Jewish quarters in Jerusalem, and were given no opportunity of seeing any of the Jewish Colonies and the really impressive sight of Tel-Aviv. The "conducted tourist" never had an opportunity of seeing these, and the independent traveller was given little or no encouragement or help in seeing them. The Zionist Commission let pass the most obvious opportunities for impressive propaganda, and only bestirred itself in the case of important individuals to entice them into seeing these places. They now see the error of their ways, and make the following announcement: "The Department of Commerce and Industry of the Zionist Executive will open after Whitsuntide a Course for Palestinian Guides. The Course will last three months and consist mainly of evening lectures. The studies will be: the geography of Palestine, the history of Israel in Palestine, the ethnography of all its inhabitants, archaeology, topography, and addresses on our present economic condition in the country and the possibility of economic development. The classes will be given by experts; in the course of studies excursions will be arranged in the City and neighbourhood, and finally a prolonged motor tour throughout the country. At the end of the course there will be an examination, and the successful candidates will be given diplomas."

ROUMANIA.

Bucharest, June 3.

The Political Situation.

Thanks to the royal wedding, the internal political situation continues to be calm and uneventful. The various questions which have cropped up with the Government party during the Premier's absence abroad will also be settled after his return from Belgrade.

By-elections have lately taken place in Transylvania, resulting in most cases in favour of the Government's candidates. Nevertheless, the undercurrent in favour of the Transylvanian National party made itself sufficiently felt to prove its virility. The Government again attempted to bring about a reconciliation with the Transylvanian National party, but the latter's leaders remained adamant in their refusal. They even announced that they would continue their parliamentary strike during the autumn session. There is no doubt that politically the Government's prestige is considerably enhanced by M. Bratianu's personal success at the Genoa Conference. Economically, however, the people would like to see a little sooner the promised signs of improvement in the rate of exchange and the cost of living.

M. Bratianu's Return.

M. Bratianu, on returning to Bucharest from the Genoa Conference, was the object of a very hearty reception from his political friends, who came in large numbers to the station to manifest their appreciation of the dignified manner in which he had represented Roumania's interests. At the first Ministers' Council over which he presided after his return, he gave a long account of the Roumanian delegation's activity at Genoa, emphasizing the fact that all their demands were acceded to by the Allies, thereby proving that Roumania's relations with the Allied and Neutral States are of a most cordial character. He then declared that the Bessarabian question is now definitely solved by the full acknowledgment of Roumania's rights over this province, and that the question of the State Treasure sent to Moscow during the war was also resolved in Roumania's favour. M. Bratianu further alluded to the helpful mediation of the Roumanian delegation at a critical moment when the Anglo-French divergencies threatened to jeopardize the work of the Conference. The Prime Minister concluded in stating that the influence of the Little Entente, of which he was one of the spokesmen, was fully recognised on this occasion, which fact was proved by their admittance to the Supreme Council.

Communists' Trial.

This huge trial, in which about 300 accused are implicated, and which has been going on for more than three and a half months, will soon come to an unforeseen end by the imminent amnesty, which will be granted by the King on the occasion of his daughter's wedding. As this amnesty is expected to extend to all political offences, the major portion of the accused in this trial—excluding those who have plotted or perpetrated criminal attempts—will benefit by this act of clemency. This turn of events will put an end to the repeated protestations of a section of the press about the ill-treatment endured by the accused in the military prison.

The Royal Wedding.

In connection with the programme for the departure and journey of the Roumanian royal family to Belgrade, it has now been decided that the bride, accompanied by the King and Queen, Prince Carol, Princess Helen, Prince Nicholas, Princess Ileana and Princess Irene of Greece, will leave Bucharest on Sunday by special train for Turnu-Severin, whence they will continue their journey to Belgrade on board the royal yacht 'Stefan-cel-Mare.' The Roumanian Government will be officially represented by M. I. C. Bratianu, the Prime Minister, M. I. Duca, the Minister of Foreign Affairs, M. I. T. Florescu, the Minister of Justice, and M. Corbescu, the Mayor of Bucharest. A farewell reception took place this afternoon at the Cotroceni Palace, given by Princess Marie to the Cabinet Ministers, ex-Ministers, the Diplomatic Corps, other high officials, and several distinguished personages. On this occasion, M. Corbescu, on behalf of the town of Bucharest, presented the bride with a handsome motor-car as a wedding gift.

General News.

On the return of the King and Queen from Athens, Dr. Romalo, the house-doctor of the Roumanian royal family, who accompanied them to attend to Princess Elisabeth, declared that the Duchess of Sparta is now quite out of danger, having entered upon the stage of

convalescence. It is further reported that Princess Elisabeth, as soon as she is fit to travel, will come to Roumania to spend the summer and autumn at Sinaia. During the winter months she will reside on the isle of Corfu.

M. Nucsia, the new Lithuanian Minister to Bucharest, presented last Tuesday, with the usual ceremonial, his Letters of Credence to the King.

Information has recently come through from Rome that M. Také Jonescu is now completely restored, and that the typhoid fever from which he suffered has left no ill effects. M. Jonescu will leave Rome in a few days for Paris, whence, after a short stay, he will return to this country to resume his political activity and especially to re-organize the Democratic Party, of which he is the Leader.

M. N. Jorga, the well-known Roumanian historian, has left for Paris to give during the month of June at the Sorbonne a series of lectures on Roumania's history.

M. Papayanacos, the national poet of Greece, who during the war followed the Greek armies on all the fronts is now on a visit to Bucharest. M. Papayanacos has recently dedicated a hymn to Roumania.

According to semi-official reports, the visit to Bucharest of Marshal Pilsudski, President of the Polish Republic, who will be accompanied by M. Skirmunt, the Polish Foreign Minister, is definitely fixed for the middle of June immediately after the King's return from Belgrade. The visit is expected to have far-reaching effects on the Roumanian-Polish alliance as well as on the Little Entente.

YUGOSLAVIA.

Belgrade, June 1.

Internal Politics.

Questions of internal politics have been much neglected during the Genoa Conference, but now Parliament is turning its attention to them once more. The nation, too, turns to them with a sigh of relief that it has been possible to reach an agreement on the Adriatic Question, which has been the cause of many alarms and some stormy speeches in the past two months.

The Budget Committee has brought forward for discussion the amended Budget Bill, which shows on paper, if not in reality, something approaching a balance; but as the increase has not been properly distributed, it has been rejected, and has to undergo further alterations.

It is interesting to observe that none of the Parties now forming the Government shows any strong inclination to introduce any increase of taxation on land, although the rural population is very lightly taxed in comparison with other classes of taxpayers. Possibly the explanation of this reluctance lies in the approaching elections, at which the peasants will play the principal part, and will, quite naturally, give their votes to their "protectors." Obviously, as long as a peasant can pay his year's taxes with a pair of chickens the prospect of the Budget's balancing must be remote—except on paper. As a palliative, the Government will enforce a fifty per cent. increase in railway freight charges; this will, of course, provide the merchants with an excuse for putting their prices up; the cost of living will also rise; and the Government will very soon have to increase its payment to its employees, and will thus be out of pocket in the long run. A lot of paper will pass through the Government's safes, and probably the printing machines will get busy too.

General News.

General Henriques, who was in command of a French Army Corps at Salonika, has arrived here to be present at the King's wedding, as a personal friend of King Alexander.

Yesterday a memorial service was held for the Allied soldiers buried in Belgrade Cemetery. General Henriques laid a bronze palm on the grave of Field Marshal Mishitch and wreaths of flowers on the Great Fallen Memorial.

A British flotilla consisting of two monitors and a motor launch arrived this morning, and will remain here during the wedding festivities.

BULGARIA.

Sofia, May 30.

Two Congresses.

Sofia is in the throes of congresses, both the Agrarians and the Reserve Officers being at the time of writing engaged in their annual reunions. On Sunday there were two large but orderly processions parading the main streets, and it was interesting to note that the number of Reserve Officers did not fall far short of that of the Agrarians. The latter had assembled about 10,000 peasants from the Provinces, while the Officers numbered close on eight thousand.

The Government have concentrated a considerable force of gendarmerie and soldiers in Sofia these last few days, fearing that the fact of the two Congresses being held at the same time might lead to trouble. So far their fears have been ungrounded, but the precautions have been wise, as the political atmosphere of the capital is at present somewhat electrical.

No disclosure of any importance regarding the Agrarian Congress has yet been made public, and it is assumed that apart from questions of purely local interest no far-reaching decision will be arrived at. The Note of the Inter-Allied Commission has been discussed, but the final settlement of this question will lie with the Sobranie.

The Reserve Officers' Congress had no extraordinary agenda to discuss, but it is understood that the officers have taken severe umbrage at the recent declaration of M. Radouloff, Minister of Commerce, and are endeavouring to make the most of the matter. M. Radouloff accused certain officers of intriguing against the present Government with the object of making a *coup d'état*.

Ridiculous Rumours.

A week ago many European newspapers published messages stating that a revolution had broken out in Bulgaria. No revolution has broken out, and these messages are as false as they are mischievous. Belgrade seems to have been the source of origin of these rumours, and it is thought that the Wrangelists have had a hand in the matter. To those on the spot, it would be humorous if it were not annoying, to read in a London paper that a revolution had broken out in Sofia, while all the time conditions here were in fact quite normal.

M. Stambolisky's Return.

On Thursday, the 25th, MM. Stambolisky, Tourlakoff, and the other members of the Bulgarian Delegation to the Genoa Conference returned to Sofia.

Beyond a brief declaration to the newspaper *Pobeda*, M. Stambolisky has made no statement regarding the Conference. To the *Pobeda* he declared that he was, in so far as Bulgaria was concerned, thoroughly satisfied with the results obtained. He said that Bulgaria's

Telegrams "MENTALLY."
'Phone: MAYFAIR 1558.

Colonial Outfits a Speciality

international position was much improved, and the Agrarian Party considerably strengthened.

Internal Politics.

It is stated in well informed quarters that M. Stambolisky would like to make several changes in the Cabinet. Nothing definite is yet known, but the Ministers of Finance, Agriculture, and Railways may possibly give way to others. The most important of these changes would be that of M. Turlakoff, Minister of Finance. It is known that for some time past relations between him and the Prime Minister have not been of the friendliest; but it remains to be seen whether the Prime Minister is strong enough to force M. Turlakoff to resign. The latter has been Minister of Finance for over two years, and is one of the leading members of the Cabinet. He has had a very difficult task to fulfil, and the general opinion is that it will be a pity if he leaves the Cabinet. Added to this opinion, is the tendency manifested among many Agrarians to avoid internal quarrels at all costs.

The Grecoff Murder.

No clues are as yet to hand regarding the murder of M. Grecoff, editor of the *Slovo*, and the affair promises to add another to the long list of undiscovered murders. The Government have offered a reward of 10,000 levas (£17) for information that will lead to the capture of the assassin, regarding whose identity many wild theories have been advanced.

The funeral took place on the 23rd, and was attended by an enormous crowd, including practically all the notabilities of Sofia, both Bulgarians and foreigners. King Boris was among the first to send a wreath, and on the morning of the funeral he paid a personal visit to the family of the deceased. The Grecoffs are one of the oldest Sofia families, and great sympathy has been expressed with Mme. Grecoff and her daughters, who have been deprived of the only male member of their family.

General News.

The Annual Fete of St. Cyril and St. Methodius took place at Sofia on Wednesday. King Boris, being in the provinces, was not able to attend the review of troops and school-children.

Sofia, June 7.

A Better Situation.

The troubled political atmosphere of the end of May has now given way to comparative calm. The Communists are holding their annual Congress, but so far the proceedings have been perfectly orderly.

The Cabinet appear to have patched up their internal quarrels, the only difference being between M. Manoloff, Minister of Railways, and some of his colleagues. M. Manoloff, who is one of the youngest Ministers, is said to be against the measures taken by the Cabinet for the maintenance of internal law and order. He preaches a counsel of moderation, and although his following is not great it contains some of the best elements of the Agrarian Party. M. Manoloff commands respect from all parties and his reputation is rapidly growing.

Russian Refugees.

As was foreseen, the agitation against Wrangel's Army is quieting down. The senior officers have mostly gone to Serbia, but those still in Bulgaria do not anticipate that further measures will be taken against them. The return of M. Stambolisky from Genoa has brought about the above situation, the Prime Minister having declared that Russian refugees would not be persecuted any more. The Government, he added, had been forced to take steps against Wrangel's Army, but now this had been done matters would resume their ordinary course.

TURKEY.

Constantinople, June 5.

Behind the Scenes.

So far as outward appearances are concerned, the political situation in Turkey would seem to have reached one of those quiescent stages which frequently precede a period of excitement and surprises. News from

Anatolia is sparse and generally uninteresting. There are still no signs of a renewal of hostilities, in spite of the bellicose articles which continue to appear in the Anatolian press, and which assert that a satisfactory peace can be secured for Turkey only by allowing the army to dictate terms at the sword's point. Surprise and considerable irritation are expressed in the Angora newspapers regarding the delay on the part of the Allies in replying to the Kemalist proposal for the assembling of a conference at Ismidt, and the circumstance is attributed, of course, to sinister intrigues on the part of the British Government. The Sublime Porte in the meanwhile is apparently content to maintain that masterly inactivity usually described as "sitting tight," so long as money can be raked in from somewhere and officials can be paid something on account of their salaries.

Behind this apparently innocent curtain, however, there is no doubt that interesting and important activities are in progress. The most important indications of this are the despatch to Moscow of an extraordinary mission from Angora, and the return to Angora of Ali Fuad Pasha, who has been acting as Kemalist Ambassador in Moscow for the last eighteen months. Dr. Riza Nur, one of the signatories of the existing Russo-Kemalist Treaty, is apparently at the head of the special mission to Moscow, and it seems tolerably certain that negotiations are to be commenced for the conclusion of a treaty of alliance of a much more definite and extensive character than the "Treaty of Friendship" signed in March, 1921. The preliminary discussions for the opening of these negotiations are said to have been commenced in Angora between Mustapha Kemal and Araloff, the Soviet Envoy, and continued in Genoa between Chicherin and Jelaeddin Arif. Once again, therefore, it is to be made apparent that until a settlement is reached with Russia, there can be no effective settlement in the Near East.

Turko-Greek Relations.

Rumours have been current during the last week to the effect that the Angora Government has been in communication with Athens with a view to the commencement of direct negotiations for peace. The rumour has been denied, but experience has shown that in Turkey official denials are worth very little except as curiosities of diplomatic records. There is reason to believe that some kind of tentative overtures have been made in a semi-official and roundabout manner, but there is unfortunately little hope of any success attending the effort. The military party and Araloff's influence are too strong in Angora to permit of any hope being entertained at present of concessions being made with a view to meeting the necessity for securing the rights of Christians after the withdrawal of the Greek army.

King George's Birthday.

The King's Birthday was celebrated by the trooping of the Colours at the Taksim parade-ground in the morning, and in the evening a brilliant reception was held at the British Embassy. The Trooping of the Colours commenced with the music of the Guards Slow March, played by the band marching up and down the parade-ground. Then came the March Past and the unfurling of the Union Jack, whilst the band played the Royal Salute. The entire proceedings only lasted half an hour, but for that brief half-hour one somehow felt nearer "home," and no Briton who witnessed the sight could help feeling proud of the immaculate appearance and perfect discipline of the troops—few as they were in number.

The Garden Party given in the evening by His Excellency Sir Horace Rumbold and Lady Rumbold was as great a success as the ceremony of the morning. The beautiful grounds of the British Embassy were crowded with representatives of all the Foreign High Commissions and Ministries, and the brilliant uniforms of naval and military commanders and officers found a suitable setting amongst the more soberly clad civilian element. The Garden Party may indeed be considered the most brilliant function of its kind that has taken place in Constantinople since the Armistice.

An Unprecedented Procession.

On Whit Sunday the first Eucharistic Procession since the conquest of Constantinople took place in Pera, and was witnessed by an enormous crowd of spectators. It is estimated that seven thousand children belonging to various Roman communities in Turkey, and three thousand clergy and Catholic members of Roman Catholic religious institutions took part in the procession, which took two hours to pass Taxim corner. The procession started from the Church of St. Antoine in Pera and proceeded to the great open ground opposite the Cathedral of Notre Dame de Sion, where Mass was celebrated in the open air.

SYRIA.

Beyrout, May 17.

The Recent Trouble.

Most of the accounts published so far of the recent troubles in Syria emanated from Palestinian or Egyptian sources and were, therefore, bound to be somewhat exaggerated or at least tendentious; and an impartial review of events by an observer on the spot is necessary not only in the interest of truth, but also to prevent misconceptions which have adversely affected an economic situation already bad enough. Some of the alarmist reports have actually caused the Egyptian Branch Office of a British Insurance Company to telegraph to its agent in Syria to suspend business, as though the country were in the throes of a revolution.

The writer happened to be in Damascus a few days before the bursting of the passing cloud, and having asked a very well informed person whether the Damascenes were contented under French rule, was told that, although they can never be reconciled to foreign Christian domination, especially after the first taste of a transient independence, they had no reason for discontent, if one excepted a minor grievance concerning the recent imposition of a long set of octroi dues and taxes two-thirds of which are alleged to be absorbed by salaries of municipal officials. It was indeed admitted on all sides that the representative of the Haut Commissariat—a rare military type combining administrative ability with political skill, had succeeded in evolving order out of chaos, and in introducing administrative reforms with as little interference as possible with the existing administrative system, and without ruffling national susceptibilities. It was this wise policy that enabled him to achieve a still greater success with the Druses of the Hauran, where harsh innovations have still more studiously been avoided.

Outside Influences.

The sudden outbreak of disaffection is generally attributed to outside influences, Transjordan, according to the evidence at the recent inquiry, being the fountain head.

The first defiant attempt against French authority was the murderous attack at Der'a upon a delegation of high Damascene officials, ending in the death of the President of the Council of State, a prominent Damascene notable, and another Minister. The second was the audacious attack which seventeen horsemen, from Transjordan, made on June 23 last on General Gouraud when driving in his car with his suite some twenty miles outside Damascus, a French officer being killed by his side. The impunity enjoyed by these bandits encouraged the continuance of anti-French intrigue, which found violent expression on the occasion of Professor Crane's visit to Damascus. Professor Crane is a personal friend of President Wilson, and is apparently an ardent believer in the ex-President's creed. He is a man of strong political convictions, to which his great wealth lends a sort of rigid force. He was once recalled from China for a political indiscretion, but it was not long before he was returned to his post as Minister there. It is said that prior to his arrival at Damascus he had visited Tripolitania, Egypt, and Palestine, and the unrest he witnessed there deepened in him the conviction that European Powers did not know how to rule Eastern

peoples. In 1919 Professor Crane came to Syria at the head of the American Peace Delegation sent by President Wilson to ascertain the Syrians' wishes regarding the Mandate. He became thereafter the idol of Syrian Nationalists. At the time of his visit there was general agitation of the public mind. Times were bad, as a result of the economic world crisis, which was accentuated here by local causes; and an idle people in a peevish mood is an easy prey to political agitation. The publication of the *Arreté* defining the functions of the future Council of Representatives of the Grand Liban—before the sincerity of the intention behind it was publicly declared—had produced a passing wave of discontent even among the loyalists, which was skilfully exploited by those agitators who seem to have been receiving their inspiration and material support from outside. The assassination of the Director of the Interior at Beyrout, a man of lovable character who had no enemies but was simply the victim of a political crime, led to searching enquiries that revealed the existence of a widespread political organisation which abetted anarchical methods to attain its ends.

The "Iron Hand."

At Damascus also the authorities, following the recent demonstrations, have succeeded in discovering the headquarters of a similar organisation called the "Iron Hand." The register of the Minutes and the membership list of this secret society were found to contain the clue to conventional letters and cyphers representing the names of members. Seventeen militant ones have been arrested, all young students of the schools of law and medicine: they are to be tried by the Military Court. They are said to have taken an active part in the recent demonstrations, inciting and intimidating the merchants to close their shops. They are suspected also of having carried on political correspondence of a subversive nature with Transjordan and Mesopotamia. A Lebanese is reported to have just been arrested on his arrival at Damascus from Transjordan, with the photograph of the present Director of Police at Damascus and a bill for 250 gold pounds subscribed by a prominent member of the late Damascus Government now in Transjordan.

An Egyptian Parallel.

A noteworthy feature of the demonstrations at Damascus and Homs is that they are copied practically from the Egyptian pattern. In both the students play a leading part, and in both the closing of shops is a common feature. Again, in both the demonstrations assume ampler proportions after the Friday prayers outside the mosques. The Damascenes, however, have milder natures than the Egyptians, and are less inclined to rowdiness and wanton destruction. Although the demonstrations continued for a few days, and the shops remained closed for over a week, yet there have been hardly any casualties, only one or two having been killed and a few wounded. It is indeed believed by some that if no notice had been taken of the first demonstration the first excitement might have fizzled out without any untoward incident; but the active intriguing across the border was of a nature to render the French authorities over-nervous and vigilant. In Homs the garrison was unfortunately composed of black troops, and demonstrations are said to have been attended with some regrettable incidents, four or five having been reported killed and several wounded. The trouble there started with the students demonstrating as a protest against the arrest of the ringleaders of the Damascus demonstrations. They are said to have marched in a body to the Town Hall exciting the crowd as they passed along, until they met the Governor driving in his carriage, when they insulted him publicly and pelted him. The black troops are said to have tried first to disperse the demonstrators, until one of them was injured fatally, when they went to their quarters to fetch ammunition and returned to fire on the crowd, killing a few and wounding many. Official quarters, however, declare this popular version to be greatly exaggerated. In Damascus the trouble started when a crowd of admirers accompanied Professor Crane from the hotel to the railway.

station. The Professor is said to have declared that independence cannot be gained by mere words. He evidently meant that a nation should work and strive to make itself fit for it. However, remembering the former official character of the Professor, the Nationalist extremists wished to interpret this remark otherwise. On the way, cries of "Long live Independence," coupled with other cries offensive to the prestige and harmful to the authority of the Mandatory Power were of a nature to appeal to the mob and excite it. The Nationalist leaders made such skilful capital of the visit of Professor Crane and created thereby such agitation in the public mind that the American Consul-General here had to cable to his Government asking for authority officially to disclaim any connection between the Professor and Washington. It may be incidentally mentioned here that Professor Crane is a Democrat, and therefore not of the party in power.

The arrest of the ringleaders, at the head of whom is the notorious Dr. Shahbandar, who had played a leading part during the Faisalian régime, and was later included in the list of political criminals who received the general amnesty granted by General Gouraud, led to a bigger demonstration after the Friday prayers, followed by a still larger one. For several days perambulation of the streets after dark had to be prohibited, and strong measures were taken to prevent violent outbursts. Dr. Shahbandar is said to have made a brilliant and fearless defence, which did not save him from a heavy sentence of twenty years' isolated imprisonment: other leaders were condemned to lighter terms. A cheque for a thousand dollars, signed by Professor Crane, was found on Dr. Shahbandar, and this, coupled with the fact that he was thought to have abused the clement measure of amnesty, was calculated to embitter feeling against him. It was explained soon after that the amount of the cheque was meant to defray the travelling expenses of a Syrian woman who had done good work in the Orphanage at Damascus under American patronage, and who is to receive a further course of training in America at the expense of the philanthropic Professor.

The General Position.

In justice to the French it must be admitted that they are not responsible for the major part of the causes that are making here as elsewhere for universal unrest. Since they have come to Syria their whole energies and resources have been absorbed by pacificatory measures of a costly nature. After having disposed of the Arab, and then of the Kemalist danger, not to speak of minor local disturbances, they still found their hands tied by the indefinite postponement of the Peace Treaty with Turkey, which stood in the way of public development works, through which alone the country can be appeased and revived. And while they were thus preoccupied with far graver problems the Nationalist leaders have come forward most inopportunistly to push their claims by what threatened to degenerate quickly into subversive means.

It is in the interest of Great Britain, which is faced by the same problems, to discountenance such movements, and it would be far wiser on the part of the peoples of the mandated territories of the ex-Ottoman Empire to possess their souls in patience until the general peace settlement, when they may advance such claims as they may have for national independence by peaceful and rational means. Their cause would especially gain sympathy and support after their fitness for self-government had been shown by diligent work and the display of a larger public spirit. On the other hand, the Mandatory Power will gain enormously by showing real sympathy and friendly concern for the welfare of the people. If they cannot yet give proof of such sympathy and concern by positive achievements, let them at least give the negative proof by the rigorous selection of the fittest officials, by the avoidance of experimental mistakes, and especially by the prevention of abuses. The Syrians are the most critical of Eastern peoples and their critical faculty has been sharpened by travel and by many opportunities of comparisons, some of which are admittedly odious.

France's moral heritage in Syria is far too rich for her to afford losing it by careless attention to these vital points.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE RUTENBERG CONCESSION.

To the Editor of "The Near East."

Sir,—It seems to me that some members of the British press have approached the Rutenberg hydro-electric scheme in a very petty spirit. What does it matter whether he is an American Jew or not, if his Company can find the million pounds necessary to give Palestine electric light and power? If a British Company can find it, let our press say so instead of cavilling. You remark in your issue of to-day (p. 775) that Palestine cannot expect to have an industrial future because it possesses none "of the necessary minerals." But have not both France and Italy found in the water-power of their rivers the "white coal" necessary to operate their industrial machinery? Here in Scotland we are going to harness our Grampian streams and give power and light to a wide industrial area.

I am, etc.,

RALPH RICHARDSON.

Edinburgh.

June 8, 1922.

Sir,—The criticisms of *The Times* and the *Post* may be mild, but thousands want to know the engineering side of the question. It is proposed to harness the Jordan, the unique "Descender." Pray where? A dam above Genessaret would leave the sacred shores unchanged, but a dam below???

I am, etc.,

EDWIN RANSOM,

24, Ashburnham Road,
Bedford.

June 9, 1922.

THE PANHELLENIC COMMITTEE.

To the Editor of "The Near East."

Sir,—The article of the Cyprus Greek newspaper *Phone tes Kyprou*, from which your esteemed Correspondent at Nicosia quoted in his letter of April 18, is based on erroneous suppositions. Both as a Cyprus representative on the Panhellenic Committee of National Defence in London and in my capacity as Director of the Offices of the Committee, I beg to state that there is absolutely no connection whatever between this Committee and the "National Council" in Cyprus or the Cyprus cause. The object of the Panhellenic Committee is thus defined by the first article of its statutes: "to support, at any sacrifice, the cause against subjugation under the Turkish yoke of the populations only recently liberated by the Greek army," and this aim being brought to a successful conclusion, its *raison d'être* ceases, of course, to exist.

The appointment on the Committee of Representatives of the Greek population of Cyprus, together with representatives of all the leading Greek communities and centres throughout the world, was necessary for giving the Committee its "Panhellenic" character, but it does not involve any connection on the part of the Committee with Cyprus' individual affairs, or with the affairs of any other Hellenic centre represented on it.

I am, etc.,

C. S. HOURMOUZIOS.

49, Prince's Square,
Hyde Park.

NEAR EAST BOOKSHELF.

AN APOSTLE OF THE JAINS.

'VIJAYA DHARMA SURI, HIS LIFE AND WORK,' By A. J. Sunaval, B.A., LL.B. (Cambridge University Press. 5s. net.)

Students of comparative theology are aware that the sixth century B.C. was an era of consolidation. The floating mass of legend and dogma current in India and on the Mediterranean littoral then assumed definite forms. In fact, that epoch-making century witnessed the birth-throes of the world's organized religions. Hinduism had gained a firm hold in India. It implied the subjection of inferior castes to the haughty Brahman, who claimed the sole right of placating his gods by bloody sacrifice. The kingdom of Magadha, which now forms part of the British-Indian province of Bihar and Orissa, was the theatre of a reaction against the iron-bound ceremonial of Hinduism and its insistence on the slaughter of defenceless animals; and two great Teachers were protagonists of the reforming movement. They held ignorance and selfishness responsible for every human woe; in their opinion existence was an unmixt evil, and relief from the necessity of an endless series of re-births into a suffering world must be sought for in the eradication of desire. It is an oft-told tale how the Buddha renounced his princely rank, and went forth as a mendicant preacher, to found a creed which now numbers 138,000,000 adherents. But the Buddha's outlook was essentially subjective. His followers were intent only on working out their own salvation; and in course of time they established hierarchies on a monastic basis, which became as tyrannical as the Brahman régime which they supplanted.

Monasticism formed no part of the teachings of Mahavira, who was probably a contemporary of the Buddha. Starting from the same premisses he developed a system of belief which extends active sympathy to all mankind. He imposed a five-fold vow on devotees. Respect for life in every form, Truthfulness, Honesty, Celibacy and Freedom from Greed—such are the cardinal precepts of Jainism, which owes its origin to Mahavira. It seems strange that a creed so essentially ascetic should attract wealthy bankers and merchants. Yet such has always been the case; and men of substance abound in the Jain community, which numbers one and a quarter millions. Their generosity has endowed India with many magnificent temples, and is evidenced to-day by countless acts of benevolence. It must be admitted that Jains are apt to carry respect for life to extreme lengths. Fifty years ago there flourished at Murshidabad two brothers of the sect, whose names were household words in the banking community. Their principles were well known and often traded on by the younger generation. A Moham-medan schoolboy would display a live cobra to each of the brothers in succession, and extract a rupee from each by promising to release the captive. He would then take it to the Magisterial Court and claim the official reward offered for the heads of poisonous snakes!

Jainism, however, stagnated until the dawn of the present century when it received a mighty stimulus from a reformer worthy to rank with Mahavira, or even the Buddha. Vijaya Dharma Suri, born sixty-four years ago in Kathiawar, was converted to Jainism at the outset

of a career which held small promise of distinction. After taking the five-fold vow, and studying the sect's theology, he set forth as a wandering preacher, visiting all the cities of Upper India. Hinduism is the most tolerant of creeds: its annals are not stained by any Inquisition or any persecution of dissidents. Vijaya Dharma's gentle persuasion soon won its way to the hearts of influential Hindus, with whose aid he established sectarian schools, held conferences, and published a mass of Jain literature. To him is chiefly due the resuscitation of a slowly dying sect.

Mr. Sunavala has done well to issue an account of this noble career, and a lucid exposition of the principles of Jainism. The latter has attracted the attention of many European scholars. One French and six German adepts are named at p. 73; but the only Englishman who has studied its doctrines is Dr. F. W. Thomas, who contributes an introduction to Mr. Sunavala's biography. It is to be hoped that the latter will stimulate research in a very interesting field, and induce the India Office to include the study of Eastern religions in the curriculum imposed on selected candidates for the Indian Civil Service.

NIGERIAN STORIES.

"SHUWA ARABIC STORIES," By C. G. Howard. (Oxford University Press. 1921.)

Except to the comparatively few who know what is meant by Shuwa Arabic, it should be explained that it is a dialect of Sudanese Arabic as spoken in Bornu (Nigeria), and some other regions near Lake Chad, by various tribes and branches inhabiting Kanem, Wadai, Bagirmi, etc. Those who speak it are not in the habit of writing it. Educated natives in their correspondence use a "more or less classical Arabic." There is no recognised authority for it, and the more intelligent will often disagree as to whether a particular word—in its very extensive vocabulary—belongs to the dialect or not. The author, Mr. Howard (formerly of the Department of Education, Nigeria) presents about thirty-eight "stories," including ten regarding the customs of these Arabs in respect of marriage, childbirth, circumcision, divorce, and the annual migration of the Shuwa to Chad or elsewhere in the dry season. The longest story deals with the history of the Kings of Bornu from the time of Damara to the advent of British rule, and occupies sixteen pages. The stories are given in English translation, consistency in spelling not being attempted, so that the same word is often spelt differently in different stories. There is a vocabulary of words occurring in the text only, which might have been amplified with advantage. The number of Shuwa students to whom the book will appeal will, one imagines, be very limited. The author expresses his indebtedness, amongst others, to Mr. G. H. Lethem (Assistant Officer, Bornu Province). The admirable work of Mr. Lethem on colloquial Shuwa Arabic, published for the Government of Nigeria in 1920, is indispensable for those who desire to take up the dialect without first studying Arabic. In this work also the Arabic character is not used except in the opening pages. "An Arabic-English vocabulary would have demanded far more time than the chances of Nigerian service allowed." The term Shuwa (probably meaning "pastoral") is not, we are told, used by the Arabs of themselves, but is applied by the natives of Bornu to the Arab tribes who have settled in the country during the last 300 years. These settlers have preserved in a remarkable degree the language and physical characteristics of the Arabs, and in the nineteenth century they became in many respects the dominant race. Shuwa, like some other dialects of the Sudan, is said "in a number of respects" to preserve more closely the classical Arabic than do those of Egypt or Syria, especially in the country districts as distinguished from the towns. The conquest of Bornu by Rabel

from the Sudan in 1892 introduced many Egyptian words.

Mr. Howard must have devoted much care to the collecting and rendering of these stories. The book is published at Government expense.

THE TALE OF A FORTUNE.

"THE MERCY OF ALLAH." By Hilaire Belloc. (London: Chatto and Windus. 7s. 6d. net.)

Every age has for its self-expression a supreme need, and though letters and the wordless arts may co-exist in a state more or less of equal perfection, it is generally through one medium alone that the particular *Zeitgeist* may be perceived. Now just as in Elizabethan times the national genius of England was shown in dramatists, so to-day the highest need in letters is a satirist, who shall give shape to the manifold hates that seem to increase with every generation. In a peculiar way Mr. Hilaire Belloc, who when he restrains his haste is one of the finest writers of English prose, fulfils our national need, for not only is he perfectly equipped alike in technique and in impulse for the purpose of exposing the ills of our age, but he delights in his task.

Readers of Mr. Belloc need not be reminded how heartily and unreservedly he hates and condemns the creators, breeders, and selfish conservers of wealth, or of how he believes the pursuit and capture of wealth not only debase the concupiscent but incidentally and inevitably warp our political and social system. He has often made fun out of the subservient politician: he has often indignantly attacked the secret and sometimes vile methods of contemporary financiers. But in this, his latest attack, there is something more irresistible than fun, something deeper than indignation. "The Mercy of Allah" is the story of the rise to wealth of one Mahmoud, a Baghdad merchant, in the tenth century. This elderly merchant, whose wealth was so enormous "that his lightest expressions of opinion caused the markets of the Euphrates to fluctuate in the most alarming manner," tells in fourteen chapters the up-and-down history of his life to his seven nephews, the sons of his noble-living and poverty-stricken brother, a doctor. There are in his descriptions of his various successful and occasionally unsuccessful swindles many delightful touches of local colour (it was a charming idea to give an Arabic title to each chapter, and then, for the sake of those who know no more about Eastern things than does Mr. Belloc, its English equivalent), but if the design is one of Islam we know well enough whence the theme is really derived. It would in fact be extremely entertaining to set down what and whom Mr. Belloc is at when he relates Mahmoud's journeyings and encounterings, but perhaps more amusing than profitable. We do not propose to detail any of the hundred ingenious (but not unique) ways in which this Eastern merchant makes and loses money; they are familiar to any student of past or contemporary politics, but it was witty indeed to make this old rascal Mahmoud attribute all his success (except when he was in prison and therefore deprived of leisure) to the mercy of Allah. One is constantly and maliciously engaged with the recital of this man's adventures; interest in his doings at no time flags; and there is a superb climax to the story.

This book is, we think, a great satire; it is written for the most part with beautiful and telling care; and it does not really detract from its value that Mr. G. K. Chesterton has in a design on the cover of the volume conspired to make of an exposure almost an exposition. We hope that Mr. Chesterton's contribution came after Mr. Belloc's (it generally does); but in any case both should be thanked.

MUSICAL NOTES.

GRAMAPHONE RECORDS.

In the June issue of "His Master's Voice" records there is a rather undue proportion of vocal reproductions, but the fewness of the instrumental records is compensated for by their excellence. Generally speaking, instrumental records depend more on intrinsic than on external merit; the pleasure they give is therefore deeper and more lasting.

One of the finest pieces of orchestral reproduction that I know is afforded by Adrian Boult in the "Hexenritt" and "Traum" from Humperdinck's "Hänsel und Gretel." The whole recording is delightfully done, and one does not know whether to admire more the point and *finesse* of the first, or the beautiful instrumental balance of the second. Boult is shown here in unusually piquancy of finish and delicate perception.

Utterly different and not quite so successful is Albert Coates in Wagner's "Rienzi" Overture, though it is through no fault of the conductor that the thickness of the scoring becomes at times a little obscure. On the whole the reading is a refreshing one, for Coates lets escape few of the dynamic possibilities of the Overture; he has, moreover, preserved a splendid clearness of line, while in the building up of climaxes he shows genius.

Of the many who will be entertained by Kreisler's playing of Grieg's "To Spring" I am not one. Kreisler I think the finest violinist in the world, and at Grieg I do not scoff as some to-day do, but of the "Peer Gynt" suite one really is a little tired, and from this, a perverted form of it, not even the freshness and richness of the fiddler's tone nor the superb vitality of his rhythm, can remove the charge of hackneyed poverty.

A record that is much more enjoyable is a double-sided one made by Miss Marjorie Hayward of Smetana's "Bohemian Dance" and Frank Bridge's "Gondoliera." The first has been arranged (with extraordinary difficulty) by Ondricek, and if Miss Hayward is not quite perfect technically, spiritually her performance is a triumph, her *rubato* being irresistible. Bridge's piece is notable not only for the fine playing of the fiddler, but for the beauty of the pianoforte part. This is far more than a mere accompaniment, and is done with exquisite lightness. (The name of the pianist might well have been given.) I do not suggest that the composition is a great one, but it is certainly pleasing, and the essence of it has equally certainly been caught. Miss Hayward's tone is distinguished in a flowing and very lovely *cantilena*, and she has a poise and floating of phrase that are superb.

Very good work in the making of pianoforte records has been done by Moiseiwitch, and the distance between reproduced and actual tone is lessening. Moiseiwitch is heard in Moszkowski's "Die Jongleurin," a showpiece, but faultlessly played, with dazzling technique. And on the reverse of this is the delicious "Passepied" from Delibes' "Le Roi s'amuse." The pianist here reaches perfection in his characterisation; his plucked touch is marvellous; and the whole thing is flavoured with the choicest archaism.

ANDANTE.

IS THERE A JEWISH PERIL?

In the course of a recent address at Coalville, Leicestershire, Father Degan said that the Jewish share in engineering Russian communism, the present ill-will between Arab and Jew in Palestine and the recent Montagu episode were being exploited in certain quarters in favour of an attitude of mistrust, suspicion and ostracism against the Children of Israel living in this country. The following sentences from his address will show its nature:—

"Just at the time when the best men of all races are striving to tone down excessive nationalism and to lessen racial antipathies, it comes as a painful surprise to find publicists raising up the bogey of a Jewish peril. Centuries of fanatical persecution and the withholding of political emancipation have inevitably produced clannishness, 'nerves' and sore heads among the Jewry of Eastern Europe. But in England, where the Jew enjoys equality before the law and is treated as an ordinary citizen he has developed a broad, manly outlook and filled with conspicuous merit posts of the highest national responsibility. All Jews are not Shylocks. Many of them are high-minded, generous and chivalrous. The Shakespearean Jew is as much a caricature as the stage Irishman."

PERSONAL AND GENERAL.**To-Day.**

June 15 (New Style).

June 2 (Old Style).

Shawal 19, 1340 A.H. of the Moslem Calendar.

Sivan 19, 5682 of the Jewish Calendar.

M. Grégoire Michaesco, Commercial Attaché to the Roumanian Legation, left London last week for Paris.

The Patriarchate of Jerusalem has bestowed on the King of the Hellenes the Grand Cross of St. Sepulchre.

Prince Serban Cantacuzene, a Roumanian aeronautical expert, is now visiting London.

Prince Nicholas of Roumania returned to London from Bucharest last Monday.

The Aga Khan has taken his departure from London for Paris.

Sir Hugh Bell, who has been on a visit to Palestine, has now returned to England.

The Bulgarian Minister, M. Stancioff, leaves town to-day (Thursday) for the Hague.

M. Alex Broz, who was specially attached at the Czecho-Slovak Legation, has now sailed for America to take up his post in Washington.

M. Pantchow Doreff, Counsellor at the Bulgarian Legation, and M. Angheloff (Secretary), have left for the Consulate at Cairo.

M. Constantine Fotitch, First Secretary at the Yugo-Slav Legation, will be away in Belgrade on leave for the next five weeks.

General Tudor will leave this country immediately for Palestine to take up his duties as Commander of the Police and Gendarmerie there.

Lieutenant-Colonel the Hon Walter Guinness, D.S.O., M.P., is suffering from a return of the malaria he caught on his recent holiday trip to Egypt.

Mohamed Ali Shah is now in Paris visiting his son, the Shah of Persia, in whose favour he abdicated from the throne.

Mme. Gavrilovitch, wife of the Minister of the Kingdom of Serbs, Croats and Slovenes, held an At Home on June 9 at 195, Queen's Gate.

Major-General the Maharajah of Bikanir and his son, the Maharaj Sri Bijey Singhai Bahadur, have arrived in London from Paris.

An exhibition of water colour drawings by Mr. Ben Browne of scenes in Burma and Kashmir, which began at Walker's Galleries, New Bond Street, W., on June 12 is being continued until June 24.

Miss Gertrude Lowthian Bell, who lately travelled from Baghdad to Amman and back by air, had the good fortune to make the westward journey without any stop. She is the first woman to make the journey by air.

Earl and Countess Granville, who have been staying with the Dowager Countess Granville at Kensington Palace, have left London for the British Legation, Copenhagen.

Colonel Sir Henry Ravenshaw Thuillier, K.C.I.E., late R.E., of Philbeach Gardens, Kensington, late

Surveyor-General of India, who died on March 4, aged 83, has left £875.

The engagement is announced between Mr. Percival Walter Partridge, of Madras, the son of the Rev. Walter H. Partridge, formerly of Caston, Norfolk, and Elsie Coghill, only daughter of the late Mr. and Mrs. J. G. De Morgan.

The engagement is announced between Norman Walker I.C.S., second son of the late John Walker and Mrs. Walker, of Errol, Highgate, and Margaret, only daughter of the Revd. Thomas Bentham and Mrs. Bentham, of St. Mildred's, Addiscombe, Croydon.

The engagement is announced of Godfrey, only son of Dr. Edward A. Harbord of 27, Queen Anne Street, Cavendish Square, and Frinington, near Maidstone, Kent, to Olive, elder daughter of Mr. H. A. Webb, of Hindugalla, Peradeniya, Ceylon.

The King has granted to Mr. E. Milton, of the Municipalities Section, Ministry of the Interior, Egyptian Government, licence to wear the insignia of the Fourth Class of the Order of the Nile, conferred by the Sultan of Egypt (now his Majesty the King of Egypt) in recognition of the valuable services rendered by him.

The anniversary meeting of the Central Asian Society, at the United Service Institution to-day, at a quarter past four o'clock, will be followed at five o'clock by a lecture by Sir Valentine Chirol on "Storm waves in the Mohammedan World."

The marriage took place on June 8 at St. Mark's, North Audley Street, of Captain the Hon. Victor Cochrane-Baillie, only son of Lord and Lady Lamington, and Riette, daughter of the late Mr. and Mrs. D. A. Neilson, of Wentbridge House, Pontefract.

For the information of the Royal Navy and Royal Marine officers who were present at the Black Sea and Eastern Mediterranean operations it is notified that the Salonika and Black Sea dinner will be held at the Victoria Hotel on Saturday, June 17.

The engagement is announced between Captain Frank Austin Latter, I.A., younger son of Mr. and Mrs. S. H. Latter, of 15 Palliser Court, Baron's Court, W., and Marjorie Helen, youngest daughter of Captain and Mrs. T. Griffin, of "The Barn," Ootacamund, Madras, S. India.

The marriage between Captain Wilmot Reginald Blomefield Peel, 33-34 Cavalry, I.A., second son of the late Right Reverend Bishop Peel, of Mombassa, and Eileen Mary, eldest daughter of Mr. and Mrs. W. Douglas, of Malvern Link, will take place at Malvern on July 6.

The Council of the British Academy has awarded this year's Cromer Greek Prize of the value of £40, founded by the late Lord Cromer for an essay on a Greek subject, to Miss Lilian Chandler, Classics mistress at the Girls' Grammar School, Leigh, Lancashire, for an essay on "Frontiers in Ancient Greece, with special reference to Attica."

The marriage, following the civil ceremony at the British Consulate, took place on June 6 at the Memorial Church of St. George, Cannes, of Lieutenant-Colonel Sir Albert Stern, second son of the late Mr. G. James Stern and Mrs. Stern, of 25 Prince's Gate, London, and Helen, daughter of the late Sir Frederick Orr-Lewis, of Whitewebbs, Enfield, and the Villa Valetta, Cannes.

The Czecho-Slovakian Minister and Madame Mastny entertained on June 9 at dinner at the Legation, 8, Grosvenor Place, Countess Lutzow, the Earl and Countess of Harrowby, Sir Harry and Lady Brittain, General

Sir Leopold V. Swaine and Miss Swaine, Colonel E. Mossberg, Military Attaché to the Swedish Legation, Mr. O. B. Harriman, Mr. Alden M. and Madame Hellman, and Madame Rossler.

The engagement is announced between Leonard W. McKay-Forbes, captain and adjutant 1-3rd Q.A.O Gurkha Rifles, youngest son of Mr. and Mrs. C. W. McKay-Forbes, of Honiton, Devon, and Adelaide Louise, only daughter of Lieutenant-Colonel J. G. Edwardes, D.S.O. and Mrs. Edwardes, and granddaughter of the late General Sir Stanley Edwardes K.C.B., and Lady Edwardes, of Spondon, Sandhurst, Kent.

The King of Egypt, who is the owner of the fine triple screw steam yacht Mahroussa, 3,658 tons, and who is prominently associated with the Royal Yacht Club of Egypt, has intimated to Major Sir Gerald Fowler Burton, Commodore of the Royal Plymouth Corinthian Yacht Club, of which the Duke of York is patron, his acceptance of the position of honorary patron of the club, which he hopes to visit on the occasion of his first visit to England.

Sir Herbert Samuel, High Commissioner of Palestine, left London on June 8 after spending five weeks in England. He has been in constant communication with the Colonial Office, and has had several interviews with the Arao Delegation in this country and with the Zionist Organization. Sir Herbert Samuel's health is fully restored, but he is taking a month's holiday in France before returning to Palestine, where he expects to resume his duties in the middle of July.

It is announced from Cambridge University that Mr. H. Rackham, the Senior Tutor of Christ's College, is resigning at the end of the academic year, and Mr. S. W. Grose, Fellow and Librarian, and formerly Scholar of the College, has been appointed to succeed him. Mr. Grose was placed in the First Class in both parts of the Classical Tripos, 1908-9, and was afterwards the University Student at the British School at Athens. For some time he has been engaged in compiling the catalogue of the magnificent collection of Greek coins given to the Fitzwilliam Museum by the late J. R. McClean, and has written a series of articles on numismatic problems raised by new material found in arranging these coins.

His Majesty has given authority to the following to wear the Order of the Nile, conferred upon them by his Highness the Sultan of Egypt, now his Majesty the King of Egypt, in recognition of valuable services rendered by them: Grand Cordon—Mr. Maurice Sheldon Amos, Judicial Adviser to the Egyptian Ministry of Justice. Insignia of Commander—Mr. George H. Hughes, Chief Inspector to the Parquet in the Native Courts, Egyptian Ministry of Justice. Insignia of Officer—Mr. Robert D. Melville, of the Egyptian Ministry of Justice, Professor in the Sultaniya School of Law, and Mr. Sydney Alfred Smith, M.D., Principal Medico-Legal Expert, Egyptian Ministry of Justice. Insignia of the Fourth Class—Mr. Henry Elliot Fitzgibbon, Director, Mechanical and Irrigation Department, Ministry of Wakfs, Egyptian Government.

APPOINTMENTS.

It is stated by the *Madras Mail* that Bishop Waller of Tinnevely will be appointed the Bishop of Madras.

Colonel N. Arion, formerly Roumanian Military Attaché here, has been appointed Director of the Information Bureau at the Foreign Office in Bucharest.

OBITUARY.

A Moscow message reports the death, in Petrograd, of Professor Smirnof, the Russian Orientalist.

His Highness Sir Ghalib-bin Wwadth Al Kaytoi, K.C.I.E., Sultan of Shehr and Makalla, Arabia, has died at Haidarabad, Deccan.

KAISAR-I-HIND MEDAL.

The King has made the following awards of the Kaisar-i-Hind Medal of the First Class for Public Services in India :—

Bertram, the Rev. Father Francois.

Principal and Manager, St. Joseph's College, Trichinopoly, Madras.

Todhunter, Alice Lady, O.B.E.
Madras.

Scott, the Rev. Dr. Hugh Robert.

Missionary, Irish Presbyterian Mission in Gujerat, Bombay.

Thompson, Miss Eleanore,
Lady Superintendent, Medical College Hospital, Calcutta, Bengal.

Hankin, Ernest Hanbury, Esq.
Honorary Fellow, Allahabad University, late Chemical Examiner to Government, United Provinces.

Brown, Miss Edith Mary, M.D.

Principal, Women's Christian Medical College, Ludhiana, Punjab.

Dobson, Mrs. Margaret,
Lyallpur, Punjab.

Chatterton, Mrs. Lily.
Nagpur, Central Provinces.

Campbell, Miss Susan, L.R.C.P., L.R.C.S. (Ed.).

In charge of the Zenana Hospital, Scottish Missions, Rajputana.

BANKING AND INDUSTRY.

The news that the premier industrial bank in India has temporarily abandoned the special line of business from which the designation is derived comes as a serious disappointment, not merely for India itself, but also for the countries which separate India from Europe, and which, like India, are seeking, or at least yearning, for some solution of the problem of national poverty. It may be well then to explain the relation in which such institutions stand towards the typical Asiatic civilisation, and to examine the causes which have resulted in the set-back to a movement that, in India, has commanded the enthusiastic support not merely of industrialists, but of politicians, economists, and philanthropists. The need for industrial banks arises from the distinctive economic and administrative system which throughout the historical period has dominated the life of these countries with such remarkable persistence and uniformity. That system produces poverty-stricken peasants and artisans, wealthy merchants who dare not let their wealth be seen, extravagant Courts, and an esurient administrative hierarchy; but where it prevails, the idea of constructive enterprise can never be realised, because it is practically certain that the pioneer will be deprived of the fruits of his efforts. Two careers only are open to talent and energy, either to enter the ranks of the administration, and join in the scramble for the profits of other people's labour, or to buy and sell, holding few visible stocks of goods, and concealing both capital and profits from the parasites with which the country swarms. Such was the state of India when it came under British rule, and such is still the state of no small portion of Asia. In India British pioneers introduced the novel idea of constructive enterprise. Railways were built, coalmines were opened, jute and cotton mills were set to work, and a long series of object-lessons showed how capital should be employed at a profit to make as well as buy. Indians assimilated the new doctrine by slow degrees: some of them took over, and in time extended, industries which were already an assured success; and at a later stage a few of them began to strike out new lines, and made plans to handle materials which for one reason or other British capitalists had let alone.

When this stage of development was reached, there arose at once the need for new machinery for industrial finance. British pioneers had drawn their capital mainly from the London market, or from the savings of their countrymen in India: these resources were not open to the Indians who wished to follow the same road, and they found nothing in their own country to serve their turn. Indian capitalists and merchants had been drilled through the centuries to certain narrowly-defined activities; under British rule they found these increasingly profitable, and they would not divert funds from old-established business to ventures of which they had no practical knowledge, propounded by enthusiasts whom they had no particular reason to trust. Nor would the British banks in India consent to lock up their funds in such enterprises. They worked on the British system, that product of Scotch caution and Quaker phlegm, which is so familiar to us that we are sometimes tempted to forget its insularity; they handled deposits repayable at short notice, and, while they would lend working capital to factories in being, they would not invest in buildings or plant sums which might shortly have to be realised. A few Indian banks, started professedly on the British model, were for a short time more complacent: in the words of the Industrial Commission, they did long-term business on short-term deposits; in due

time came the inevitable crash, and the half-fledged industries fell with the banks which had attempted to finance them. Then at last men turned their eyes to a different type of institution, the specialised Industrial Bank, at that time so highly developed in Germany, a bank working mainly on its own capital, financing promising ventures after due investigation, steering them through their early difficulties, and, for a price, placing technical knowledge and expert sagacity at the disposal of promoters. Once mooted, this idea rapidly caught the popular imagination, and Indian public opinion felt that a new industrial era had dawned when, only a few years ago, a bank of this type came into existence under the auspices of the foremost financiers of Bombay. Since then a few similar enterprises have been initiated on perhaps less ambitious lines, but Indian aspirations have concentrated on the Tata Industrial Bank as the pioneer which was destined to lead producers towards the promised land.

It is this institution which, after a short experience, has decided to suspend, though not definitely abandon, the attempt to bring new industrial enterprises into being. In the published reports of the meeting held last month in Bombay we read that this decision is due to the difficulties of doing industrial business, and to the very uncertain outlook at the present time; the Directors do not admit that the attempt was premature, but they decline to prosecute it further, and they intend to develop a general banking business of a liquid and realisable nature. It will be noticed that of the two reasons assigned for the change in policy one is permanent and the other temporary; the business is, and must always be, difficult, but at the moment its inherent difficulties are enhanced by exceptional conditions. According to the reports of the Chairman's speech, the immediate obstacle is the extent of State borrowing in India; between regular loans and constant issues of Treasury Bills, the market supplies of capital are being fully absorbed, partly to cover deficits in current expenditure, partly to finance the rehabilitation of the railways and the construction of other productive works; and the rate of interest which must be offered to secure funds for these purposes is higher than new private industries can be expected to pay. We may reasonably accept this statement as indicating the conditions which unfortunately now prevail, but some further examination of the facts is needed before we can agree to regard it as exhaustive. As we read the position, this extensive borrowing by the State is the immediate, but not the ultimate, cause of the present difficulties; it is itself the result of a group of causes with which the whole world is painfully familiar, and if industrial banking has experienced a set-back, the reason is simply that India is suffering from the after-effects of the war. The disturbed frontiers, the internal unrest, the inadequacy of the equipment of the railways, and the other facts which explain, though they may not wholly justify, the frequency and extent of State borrowing, are directly traceable to this source. The numerous recent issues of Indian loans in London prove that India is temporarily unable to finance her own development, and that is the central fact of the situation. We say advisedly that the phenomenon is temporary, because, while it is true that India is short of capital, it is also true that, taking State and private enterprises together, she is even now providing capital on a scale that twenty years ago would have been unthinkable. The supply of capital is inadequate for the needs of the moment, but these needs are altogether exceptional, and they will be overtaken as time goes on. It is already possible to look forward to a restoration of the export trade on which the prosperity of the country so largely depends, and it is reasonable to anticipate that, when that has been accomplished, the supplies of capital will steadily increase, until the present shortage disappears. In time, perhaps before very long, there will be enough to go round, and we may fairly hope that, when that stage has been reached, industrial banking will again become a reasonable financial proposition, and will play an active part in developing the vast resources of the country.

CROSS CURRENTS IN MESOPOTAMIA. Arab, Kurd and Englishman.

BY THE REV. W. A. WIGRAM, D.D.

I.

Medea the enchantress tossed two men into her magic cauldron; one, Pelias, was boiled to death there, because the sorceress, who loved a practical joke, told his daughters only half of the spell that they were to chant as they stirred the brew. The other, Aeson, came out with renewed youth to astonish his household.

One dare not prophesy how things will go with the simmering cauldron in Mesopotamia, into which fate has made England cast two social orders at once; one, the old decayed order of Mesopotamia, based finally on the most ancient civilization in the world; the other, the primitive Arabian society that has always refused to develop, and that remains to-day what it was in the days of Abraham, and which has always provided fresh drafts of desert-bred manhood, to refresh the old when necessary. They are in the cauldron together now, with England's sons to stir it: has fate told us the whole of the spell, or only half of it?

To say how things will go is beyond us. We can only indicate some of the various currents, upward and downward, that are stirring in the cauldron now; tell something of the ways in which the minds of men are working.

Most conspicuous to the European outsider, and far the most important in his own estimation, is what one would once have called the Baghdad "effendi" class, the "intelligentsia" of the country. Whether they are really more than the bubbling froth on the surface, is just one of the questions needing an answer. Members of this class really have ideas and aspirations. They want to revive the old glories, and dream of Harun-er-Rashid and of the days when Baghdad was the focus of the world's civilization. They may be ignorant of their own ignorance, and not realize "*quantae molis erat Romanam condere gentem*," while liberty and freedom of the press combined are a heady drink for youth to take in large draughts. So you get at times such fustian as: "We Arabs are the People. When the Turks forgot themselves, we waved our bright swords, and bade them go; and the Turk fled. Now if the English should forget themselves, are not the same swords still bright?" Still, much is to be forgiven to aspiration, and if the drink has proved heady, it was we who gave them the draught!

Half patriot, and half adventurer, they wish to make their own country, but also to make their own careers. The conscience that generations of public service has fostered in so many English families, which will keep a man carrying out arduous and thankless duties, when there is none to see if he shirks, with no more stimulus than the feeling "this is the thing to do; this is what I am here for" is lacking to the Oriental—and indeed our present governors at home are labouring to eradicate it there. Why should you not put all your friends into office, to draw salaries from the Government? "Surely there can be no objection if I take the Government cars when I want to give my family an airing" said one in high position, and the very guilelessness of the statement is instructive. That there should be anything even questionable in swindling the Government is an idea that has not risen above their mental horizon. One of the class was detected in flagrant malversation, and his books proved the charge beyond all denial; he found that gaol was before him, and made his petition to his British superior. "I hope, Sahib, that this unfortunate little circumstance will not militate against my future career and promotion." The Sahib feared that it undoubtedly would, considerably. "Then surely, Sir, it is your duty, when I shall come out of gaol, to find me as good a post as the one which I now unwillingly vacate." After all, Mr. Bumble made a similar suggestion once, and was similarly shocked to find it unacceptable! As for putting your friends into jobs in your office, look at it from the point of view of the Arab. Whom can you know so well, and who can be better fitted to manage the country, for its own good and for theirs, than the

small minority of educated men whom it contains? That is democracy, and self-determination. You say that the desert Arabs, and the Kurds will not like it? Oh well, if you are going to ask "wakshi" (uneducated) folk like that for their opinion! It is those who are educated, who know what the country needs!

So, like others elsewhere, they want to run—not to say, do gymnastics—before they can walk. Notions of what we should call elementary fairness and equity are beyond them: they will complain bitterly, for instance, that in a certain provincial capital the Christians are getting actually more than Moslems over the education grants. It is no consolation to point out that by their own wish and suggestion, the grants are "capitation grants" paid on a basis of attendance, and that if a Christian population of 7,000 sends more children to school than a Moslem one of 70,000, and the large schools provided for the latter stand empty, the fault does not lie with Government!

They have their aspirations for many excellent things, but cannot realize the hard fact that England cannot and will not pay for them; the Arab is to manage his own land, of course; but England is to stand behind and finance him, taking all the blame if things go wrong, and this is somehow to be reconciled with independence!

"The Christians in this land are no better to work with than I had been led to expect," said one of those who know, "but the Moslems are far worse. Give a Christian a job and cash for it, and he will produce something. It may not be good, but there will be something for the money, and if he gets into a hole he may ask for your help before he has slipped quite to the bottom. Give the same chance to a Moslem, and he will set up a committee of nineteen. In a month, there will be nineteen parties in that committee, nothing will have been done, and all the money will have gone nobody knows where!"

II.

Behind the "intelligentsia" (which after all is a small, if very vocal, minority) stands another force; the old-fashioned Arab of the Towns; a force which was, of course, far more influential than they, in days when noisiness was not thought to be synonymous with importance! Aristocratic Moslem gentlemen, charming and stately as few but the high-class Mussalman can be; the material of a ruling class if ever there was one, but one that is sadly handicapped in days of democratic rowdiness by the limited outlook of conservative Islam. One of the finest of the type tried to govern as associate of the British, with whom he could work perfectly, but found his own Arab colleagues impossible. "But what saith the Prophet?" he was in the habit of saying to every problem of government. It was his native colleagues who replied with the newest democratic catch-words, till a flippant Englishman summed up the case in a "Limerick":

There was an old man who had read
All the Prophet was said to have said;
But, bored by the Prophet,
They bade him "come off it"

And quoted Lord Northcliffe, instead!

But the type feels itself out of place in modern days. The new force of the Press is one with which it cannot wrestle, and its representatives are like the old knight-hood of Araby, of whose blood they are, in the face of an enchanter. One of the class was known as a fighter of old, and blood affected his nerves not at all. "I don't think much of my colleagues," he said. "A Minister of State is like a doctor; he has not learnt his trade till he has killed two hundred patients. Now I have qualified, and none of my colleagues have!" His boast was a perfectly true one, and yet to suppress or suspend a seditious rag in Baghdad was almost more than he could find courage to do. The new force of the Press unnerved him, and he simply did not know how to deal with it. He could have sent ruffians to put an end to the editor, or any other of his enemies, and have buried him thereafter in the special cemetery to that end made and provided—but to suppress a Newspaper!

III.

The Arab of the nomad tribes is a much more primitive type, though there is, really, no hard and fast line to be drawn between him and his settled brother of the river-side or swamp. The desert has always bred men, who drift into the sown lands and settle there; they may be held by their nomad brethren to have lost caste somewhat by the act, but they keep kinship with the tribe nevertheless, even as the domestic geese on the village green will greet their wild brethren, as they go honking overhead, en route for Siberia. As little groups have settled anywhere along the river line where they could find land, the tribal groups are scattered and mixed to a bewildering extent, and must in time lose their identity.

If you ask the Arab of the desert what he really wants, he would most likely tell you that he wants to be let alone, to live his own life without government interference, and that he accepted Faisal as King on that understanding. "We want self-determination," said one of the breed to a British official. "But what do you mean by that, Sheikh?" "The right to do exactly what I like with my own tribe, and to pay taxes to nobody," replied the ruler of twenty tents; and really the definition is a very fair one. Makers of phrases ought to define their limits, before turning such explosive gear loose into the world of to-day!

But though he wants to be let alone by Government, yet a changing world has not spared the Arab. The old desert life ceases to satisfy him now, and he is no longer content to send in camels and a trusted man once a year, to get such dates and coffee as he requires. He hankers after the flesh-pots of civilisation and no wonder, for it is seldom that any but the guest eats bread to the full out in the wilderness; it is true that like many another, he wants to have it both ways, and wishes to have the benefits, without the bonds, of our civilisation. With this has come a longing for education. In the old days in the desert—as once in England too—the Mollah or Parson was the only 'clerk' of the tribe or village. The fighting man did not bother himself with books and pens. Now, like all warrior races who have good brains, he is coming to realise that learning is a means of power, and that the old order is changing; the ruler must have knowledge, and the sheikh is demanding that his sons shall have it. Hence, the provision of such an education as shall train the young chief, and not make of him just another dissatisfied effendi, is one of the great needs of the day.

Alongside of this craving for education there is present a distrust and dislike—eminently natural and justifiable both of them—of the Baghdad Effendi. Members of that class hold, in all good faith, that they are the only people entitled to rule, and capable of ruling, Iraq. They own the Press, and proclaim it, loudly. Now the Arab of the desert is aware that he is at least as good a man as the Baghdadi, and thinks that he knows better what he wants than does that worthy. Hence the recent ruling of the Government, that those who seek to represent a province or district must be real residents in that district, is as popular among the desert dwellers as it is unpopular among the townsmen, who had expected to monopolize the new Parliament. A like ruling for other and older Parliaments might have its advantages too!

Like most wild men all the world over, the Sheikhs have the utmost confidence in the straightness of such Englishmen as they know, and very often a genuine and warm liking for them. Hence it is that they do not at all, in many cases, like being handed over to a native administration, and say so with the utmost plainness. "But two years ago you were making open war, Sheikh," protested a typical British officer to an old acquaintance, with whom he had stayed, and against whom he had fought: "you were then declaring that nothing would satisfy you Arabs but absolute independence!" "Of course we did," said the Sheikh, "but surely you never thought that we meant that you were to give up governing the country!" It is true that they grumble at times, and from their point of view, not unreasonably. "We know that your taxes are low, Sahib, and those

of the Turk were much higher: but then nobody ever paid the Turk anything, and you seem to expect to get cash." Further, they complain that whereas they have to pay the taxes, they seem to be all spent on roads that the Arab does not desire to travel on, and police that curb his natural liberties. Any balance that may remain goes to salary the Baghdadi! Nor can the desert-dweller get that prompt redress for any grievance that the natural man expects from Government in the East. "Here is my petition, Sahib, and I want you to see to it yourself. You say that you will advise the Minister? I don't want any Minister advised, I want this grievance put straight!" This is hard for the Englishman. Our ideal of "enabling these people to govern themselves" is a high one, but for a practically minded man, who sees an abuse or a grave defect before his eyes, it is very much easier to order its correction, and to see that such order is carried out, than elaborately to train the Oriental until—in the teeth of centuries of inherited habit—he does of his own accord and motion what the other knows to be right. To give advice to the Oriental is not enough, and the danger is that an Englishman who is limited to that by his orders, and who sees that his advice is habitually neglected, may either sink into just putting his counsel on record and drawing his salary, or may—more probably—say "This is not good enough," and throw up the task altogether.

The very soundest of advice as to what is good policy and orthodox economics, does not go far with an Oriental when his personal and family interest, to say nothing of his previous training, all draw him the other way. With an Englishman, of course, the case is different, as we see, for instance, in the sweet reasonableness of the Poplar local authorities! It is a very rare thing to get personalities of such force that they can get the Oriental official, not only to do the right, but also to take the endless trouble of enforcing his will on lazy and uninterested local authorities, unless there is a measure of power behind the "adviser." The English sphere may be limited to giving counsel, but while England remains responsible for the country at all, such advice as is given after mature consideration will have to be followed, and in the last resort, those who cannot follow the advice will have to cease to hold their offices. This was the rule which, in a parallel case, it was found needful to enforce in Egypt.

It is to be feared that this line, though it is the right one to follow, will not make England popular in the land. Were we to rule, outright, putting the right men to do the work and supporting them, such men might be almost adored by folk who want strength and justice in their rulers: the Oriental however wants—who can blame him?—either to be master or to have a master. To be advised under penalty to do what he does not want, does not make him feel free, and does make him feel uncomfortable!

(To be concluded.)

NEWS IN BRIEF.

The women's hospital in Baghdad has now been completed, and many women attended the opening ceremony.

In celebration of the jubilee of the Egyptian Geographical Society, King Fuad has invited the Eleventh International Geographical Congress to meet in Cairo in 1925.

Serbs in California have sent two magnificent Mexican saddles as a wedding present to King Alexander and his future Queen in Belgrade.

Our Albanian Correspondent calls our attention to the fact that, for the first time, Albania figures in the "Almanach de Gotha."

A number of rams with gilded horns were driven to Belgrade as a wedding present to King Alexander from his Albanian subjects.

King Hussein has issued orders for an alteration in the position of the colours of the Hejaz flag. It now becomes similar to the Iraq flag.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Future of Egypt.

Under the title of "The Riddle of the Sphinx," Mr A. H. Beaman contributes to the May issue of the *Fortnightly Review* an article, the concluding paragraphs of which are particularly instructive:—

It would be a grave and fatuous error to believe that the Egyptian question has already been permanently solved. The Egyptian question of to-day was asked by Zaghloul Pasha and nine-tenths of the people behind him when they demanded full sovereignty over Egypt and the Sudan, free from all restraint. The reply was a distinct negative. As long as England intends to hold India, and as long as Egypt is her high road of communication, the English must remain keepers of the gate. They cannot permit the custody to pass into that of any other Power or of Egypt, which is obviously incapable of resisting any outside attempt to wrest it from her. When a nation like the Egyptians claims possession of the right to take the place of guardian of the security of the British Empire, it exhibits a lamentable want of proportion in its ideas. Until it changes its perspective and recognises that fundamental commonsense precludes England from totally abandoning the country to the mercy of any reckless adventures, the Egyptian question will necessarily subsist in materially its original form. In spite of the abolition of the Protectorate, England remains, and must remain, the protecting Power. It is not Egyptian diplomacy but England, that undertakes to negotiate the giving up of the Capitulations with foreign Powers, and it is England that has officially warned the nations that she will consider any interference whatever in the affairs of Egypt as an unfriendly act, thus reaffirming the protection she extends to the internally self-governing State.

The situation must appear to all but the die-hard Nationalists so simple that it hardly needs explanation. For the last year or two we have perhaps deluded them into false hopes by protracted negotiations, but we have now declared in unmistakable terms, in our letters to the King, the basis and requirements of our policy. It is an honest, straightforward policy, dictated by a genuine wish to satisfy Egyptian aspirations to the utmost limit of compatibility with our own vital interests. The carrying out of this policy has been entrusted to an honest and straightforward soldier, who, with a real sympathy towards Egypt, was the true author of it. If the Nationalists continue their insensate agitation, it is possibly because they do not believe that the policy declared is in the very nature of things unalterable, and still hope against hope. It is scarcely likely that they will cease fighting until they themselves have had some share officially in carrying out a policy which they now view with mistrust, both because it has imposed a *régime* without consulting them, and because they consider the present Government merely as an English stop-gap, and not a representative national Government. The campaign they are endeavouring to prosecute is, in fact, not a struggle against the Government, so much as a rebellion against the execution of British policy—as is evident in the telegram previously quoted.

No amount of casuistic camouflage can ever persuade the Egyptians that black is white, and that they have yet gained anything but a qualified internal independence, whose completion rests with themselves. Instead of insisting on the independent

sovereignty of Egypt, it would be more practical to explain that England has consented to allow the Egyptians a free trial in self-government—absolutely free as long as they have the sense to avoid threatening the great foreign interests of which they are appointed guardians.

Egypt owes her progress, her riches and prosperity in great part to foreign enterprise, brains and money, and she will at every turn require foreign support in building up her future. Hitherto no Egyptians have managed unaided to create any important successful enterprise, either financial or commercial and they seem to lack economic constructive power. Their best policy, therefore, will be to encourage to the utmost the most cordial relations with the strangers within their gates, and with the keepers thereof. It may be several years before these truths are generally recognised; and until the constitutional machinery has been framed and set in motion the prospect of freedom from agitation is not very favourable. Only when the Nationalists can be brought into the scheme, and can be interested by having a responsible share in Government under the new conditions, will a beginning be made of a real and lasting solution of the Egyptian question, which depends on the whole nation realising that its happiness lies in the exercise of complete internal sovereignty, and self-government under the necessary international aegis of England.

Greek and Turk.

The *New Statesman* recently contained a "neutral" article on "The Uses of Atrocity." After a brief introductory comment on the new tale of Turkish atrocity it addresses a warning to the British Government:—

We have no fault to find with what the Government have so far done in the matter. Lord Curzon has asked France, Italy and the United States to act in concert with us in sending "carefully-selected officers to Trebizond, or whatever Black Sea port may be most suitable for the purpose, with a view to proceeding to such places in the interior as may best enable them to conduct the necessary investigation." That is very well; it is desirable that we should know all the facts, and it is possible that, if the four Great Powers can be got to co-operate in this way, their representatives may exercise a salutary restraint on the ardour of the Turks. We would add, incidentally, that Lord Curzon ought also, as Lord Robert Cecil suggested, to send similar officers to the Smyrna districts, where it is only too likely that reprisals will be made by the Greeks upon the Turks. But, if we can approve what Lord Curzon has done, we feel very serious misgivings about some of the things he has said. Should the Angora Government refuse permission for the Allied officers to go to Trebizond, he declares, then "His Majesty's Government will have to reconsider their entire attitude towards peace proposals." And certain organs of the Press are busily engaged in dotting his i's and crossing his t's. The old hymn of hate against the Turkish butcher is swelling forth, and Greece is again cried up as the saviour of humanity; we are told that, if the ruffians of Angora cannot be brought to book in any other way, they must be blockaded on the coasts and bombarded by the Greek armies equipped with every support that we can give them. What is to be said of all this? It seems to us that the answer is perfectly plain. It is a proposal inspired by passion—a generous passion in some cases, a passion whose generosity is tempered with rancour and prejudice in others, and it is a dangerous and a futile proposal. The Turks are doing an evil thing in using atrocities as a method of government; we shall be doing a mad thing in making their atrocities the basis of our policy in the Near East. A statesman's heart, as Napoleon observed, should be in his head. We have had some experience

in connection with Russia of what may happen when our statesmen's hearts are in their bile. Let us see that the experience is not repeated in the case of Turkey.

The task with which we are confronted, and which we have been bungling for three years, is to make a real peace in the Near East. But how, it is objected, can we look for a real peace when the Turks are committing these outrages? How, we reply, can you look for anything else but outrages while you refuse to make peace? It is, of course, a verbal exaggeration to say that we have refused to make peace with Turkey, but it is in fact the damning truth. The cynical pretence of the negotiations at Paris in 1919, the later proceedings at San Remo, when Mr. Lloyd George founded the Greek Empire for his friend M. Venizelos, the intolerable conditions of the Treaty of Sèvres, the seizure of Smyrna, the letting loose of the Greek armies in Anatolia, the ceaseless bickerings of the Powers—all these things, illuminated from time to time by Lord Curzon's oratory, make a very pretty picture of peace efforts! Foolish or intractable as the Turks may have been, the Allied politicians have been worse, and they bear the larger part of the responsibility for the state of Asia Minor to-day and—we say it deliberately—for the brutalities to which all the wretched minorities are being subjected. The Turks have continued, as of old, to massacre Armenians. The Western Powers could have prevented it. Three years ago Armenia was at Paris, waiting to become by the grace of Europe and America an independent State. It was in the days when mandates under the Covenant of the League of Nations were supposed to mean something beyond oil or nitrates or black troops or strategic bases for the mandatory Powers. The "Armenian mandate" was hawked about, but the European States found their hands full, and America preferred to keep hers empty. The Supreme Council offered the thing to the League, knowing very well the League could not take it, and a band of American bishops soothed their consciences before the world by urging Britain to do her duty. Meantime, the Turks continued their pleasantries, while the Allied Governments, in the words of Mr. Chamberlain, "repeatedly warned them that they were adversely affecting Allied public opinion and Allied policy"! That, in a nutshell, is what we have done for the Armenian minority.

It then refers to atrocities committed by the Greeks (as witnessed by Professor Toynbee in Asia Minor), and concludes:—

We do not refer to these atrocities of the Greeks in order to condone those of the Turks; we feel an equal abhorrence of the conduct of both sides. We refer to them for the purpose of making clear what is the position of the Allied Governments and what our policy ought to be. Our policy was supposed, till the other day, to be the conciliation of Turkey; but now, in the light of the Trebizond massacres, that policy ought to be "revised," say the Turcophobes. "Revision," presumably, means back to 1920-21—a fresh attempt at the coercion of Turkey, and a fresh mandate to Greece to police and exploit the relics of the Ottoman Empire. We repeat that this proposal is futile. In the first place, supposing that there was any hope of its being successful, it would not achieve its ostensible object—the prevention of atrocities. It might, indeed, save some Christians from being maltreated by Moslems. But would it save the Moslems from being maltreated by the Christians? The Greeks may not have succeeded, owing to lack of opportunity or time, in making such a big bag of victims as have the Turks, but they have done their abominable best, and no one, save the most infatuated Philhellene or a sentimentalist who is ignorant of

the races of the Near East, will expect the leopard to change his spots in the middle of the Anatolian jungle. In the second place, however loudly the hotheads in Athens and their friends in London may clamour for it, the policy of coercing Turkey is hopeless. It is astonishing that intelligent men, with the events of the last eighteen months before their eyes, should be harking back again to the old illusions. The Greeks will be beaten again, as they were last year, if they renew their fight with the Kemalist forces, and we do not think they will find themselves very greatly strengthened by any "material support" from the Powers, for the Powers are in no case and in no mood to give them either money or men. Neither France nor Italy wants to coerce Turkey, and Mr. Lloyd George and Lord Curzon, though they may want to do it, have learned by this time that they cannot. The most that they can do is to irritate the Turks afresh, to sacrifice more of their Greek dupes and to provoke more atrocities.

There is, in fact, only one way to deal with Turkey, and that is to make peace with her with the least possible delay. We are under no romantic illusions about the Turks. A settlement which tears up the Treaty of Sèvres, restores Smyrna to them and brings them into the League of Nations, will not suddenly turn them into loving fathers of their Christian subjects. But it will at least go far to remove their desire to spill their Christian subjects' blood, and it will entirely remove any excuse for spilling it. It will also give us what we want—the chance of protecting the minorities by some less disastrous method than threats and cant.

Enrolment will commence of eight platoons of the Madras University Territorial Force when the colleges reassemble after the vacation. Membership of the Corps will not entail liability for active service or to aid the civil power.

Yugoslavia's American Loan.

At one time it appeared possible that Yugoslavia's negotiations with the Blair group would fall through, but it is clear that there was never any very serious hitch, and the contract for the loan has now been signed. The terms on which the loan has been arranged vary somewhat from those already mentioned. The loan is to be of the amount of 100,000,000 dollars (not dinars as stated in a leading contemporary, which would make the loan a mere £300,000 or so), bearing 8 per cent. interest, the issue price being 86½, and Yugoslavia will be able to obtain immediately 25,000,000 dollars. Railway construction is the principal object of the loan, and a firm of the Blair group will shortly commence operations on the projected Adriatic railway.

A Lost Opportunity.

It is little good deploring what is past, but it may be pointed out that Yugoslavia only turned to America for financial assistance because it was impossible to obtain it here on satisfactory terms. Our financiers must have been strangely lacking in enterprise to turn down an opportunity which was considered good enough by an American group. It is to be feared that the result of their apathy will be that British interests in Yugoslavia will be affected. It goes without saying, as I have emphasized time and again in these columns, that the country which affords financial assistance to the States in the Near East will naturally be in a strong position as compared with its competitors. In the present case America reaps immediate profit in the contract to construct the Adriatic railway, the material for which will no doubt come from America instead of from this country where the order would have helped to ease the unemployment problem.

America and the Near East.

The most interesting aspect of the loan is the fact that it constitutes the first definite assistance of the kind given by America in the Near East. A financial stake in a country is the first step to taking a greater interest in it, and it will remain to be seen whether if this departure is followed by similar ventures America will be able to maintain her attitude of frigid aloofness from anything that happens in the Near East. I doubt it very much.

British Interests in Bulgaria.

The statistics given by our Sofia Correspondent this week of the amount of foreign capital invested in limited companies in Bulgaria throw an illuminating light on the extent of British interests in the country. Out of a total of almost three hundred million levas of foreign capital the British share is only 4,300,000, and the only countries below us in the list are Holland and Switzerland. The holdings of our principal rivals show very plainly that they realise the potentialities of Bulgaria, and that they understand to the full the advantageous position that must be the result of an extensive interest. France, Italy, and Belgium, to men-

tion only a few of our competitors, have their own banks in Bulgaria; but there is as yet no British bank, and though there has been a good deal of discussion in regard to the establishment of one, we still seem to be no nearer to having this very obvious accessory to more intimate commercial relations.

The Cotton Crop Position.

The American Bureau report on the cotton crop leaves the position practically unchanged. The condition figure of 69.6 was almost exactly in accordance with expectations, and therefore had little effect on the market. While the prospects at the moment seem somewhat uncertain, the figure would suggest the likelihood of a medium crop. Prices will be affected, however, not so much by the crop, as by the development of the markets generally. The cotton now being produced is not nearly sufficient to supply potential requirements, and once the world is in a position to make its demand for cotton a reality, then the cotton market is likely to experience considerable vicissitudes.

Rubber Trade Crisis.

The position in the rubber plantation industry continues to be very critical, and it is perfectly clear that if present conditions obtain much longer a number of companies will be unable to stand the strain, and will disappear. It is a dismal outlook, but that is the possibility that has to be faced. The whole trouble is due to the fact that production is far ahead of consumption as the direct consequence of so many markets being closed to trade. Various efforts have been made to meet the situation by the voluntary restriction of output, but they have not succeeded, and whether any really effective steps can be taken in this direction depends on whether a general agreement can be arrived at on the question—a difficult matter to arrange, seeing that it is by no means only British companies that are concerned. Failing restriction companies will be thrown on their resources, and those who are able to reduce costs sufficiently to avoid loss will be able to weather the crisis. While the present position is so unsatisfactory there is, it may be added, very little doubt as to the future of the industry. Eventually rubber will come into its own again.

Belgrade, June 1.

The Loan Negotiations.

No settlement has been reached so far, and the negotiations are dragging on. The Minister of Finance has now been compelled to fix a time limit of seven days, and when that has elapsed no fresh alterations will receive any consideration. The time limit expires on the 2nd inst., when the Council will proceed to examine all the offers simultaneously.

So far it appears that the only serious offer is that of the Harrington—Blair group and that the others are only "sounding the ground." The conditions of the group in question are very difficult, and moreover it is a question whether the exchanges could be re-adjusted with such a small quantity of good currency which the Government would have at their disposal. The actual amount on which the Government could draw cheques is about 23 millions and their "pressing liabilities," interest due, and small floating debts are about 7 millions, therefore the net amount would be only about 16 millions.

When one considers the fact that the inflow of dollars is about 15-20 thousands per week and that despite this the exchanges are remaining unfavourable it is very doubtful whether any great improvement could be effected with such a small quantity of dollars as would be obtained from this loan. It really seems that the Government will have to seek fresh offers on another money market, and it is not at all improbable that, even if the Government accepts the present offer, the Parliament will turn down the Bill because of its hard conditions.

ROUMANIA.

Bucharest, June 3.

Consolidation of Treasury Bonds.

The local press throws some fresh light on the negotiations which are now being carried on in Paris and London with the object of consolidating and converting the Roumanian Treasury Bonds. In the first place it proposed to consolidate only the bonds in private hands abroad, amounting in all to about one and a half milliard French francs. As regards the bonds in the Allied Governments' possession, these, having been issued for war needs, will not be included in the present negotiations, but will be dealt with simultaneously with the settlement of war debts among the Allies. The Rentes which will be issued in exchange for the old Treasury Bonds will not bear a uniform rate of interest but a

progressive one, viz., 3 per cent. for the first two years 4 per cent. for the following four years and 5 per cent. for the rest of the period. The interest for the first two to three years will be guaranteed by the export taxes, thereafter it will be included in the ordinary budget. It is further reported that M. V. Bratianu, the Minister of Finance, assisted by M. Titulescu is endeavouring to contract a loan in sterling for the purpose of ensuring the annuities for the first few years and thereby obviating the eventual necessity of buying large amounts in inflated currencies which would obviously further depreciate the leu.

New Export Regulation for Grain.

At the last meeting of the Supreme Economic Council, it was decided to adopt the following principle in regard to trade in the coming grain crop:—All cereals, excepting wheat and rye, may be exported unrestricted by permits, etc., the exporters to pay only the export tax, which, however, will be increased. With regard to wheat and rye, as these grains were not sown in sufficient quantities last autumn and even in the spring, they will continue to be among the prohibited exports. Any surplus production, after home requirements have been ensured will be used by the State to fulfil their old engagements to France and Switzerland. The above scheme will be put before the Ministers' Council for approval immediately after the return of the Minister of Finance from abroad.

BULGARIA.

Sofia, May 30.

The Financial Crisis.

The shortage of money is daily becoming more serious and recently the Sofia Chamber of Commerce summoned a meeting to consider the problem. This meeting was attended by representatives of the Provincial Chambers of Commerce, and also by leading bankers, business men, and economists. The following questions were discussed:—

1. Whether, as the cost of living is thirty times higher than it was before the war, it is not necessary to increase the currency up to six milliard levas.
2. Whether the construction of houses at Sofia is not increasing the financial crisis, owing to the large amount of capital that is involved.
3. Whether the fact that Bulgarians should pay their pre-war debts to Great Britain by May 30 is a cause of the money crisis.
4. Whether the financial difficulties will not counteract the relief which a good harvest would bring.
5. Whether the introduction of the new customs tariff has not made the money crisis more serious.
6. Whether it is not incumbent on the Bulgarian National Bank to aid traders by discounting their bills of exchange.

Many well known men including Dr. Damyanoff, Governor of the Bulgarian National Bank, M. Tchakaloff, former Governor of the Bulgarian National Bank, M. Milosheff, Manager of the Bank of Sofia, Dr. Ivan Zlatareff, Secretary of the Sofia Chamber of Commerce, and M. Liaptcheff, economist and a former Minister, took part in the discussion.

The general opinion was that the only way out of the present crisis lay in issuing new currency which would not unfavourably affect the value of the leva, providing the new money was devoted to the encouragement of production. M. Liaptcheff alone spoke against the issue of new currency, declaring himself an opponent of the inflation policy, which was, he said, a very dangerous one. The meeting appointed a committee to work out the demands of the meeting, and decided to submit them to the Minister of Finance at an early date.

Foreign Capital in Bulgaria.*Sofia, June 7.*

Figures have just been published showing the amount of foreign capital invested in limited companies. At the end of 1921 the total amount was 292,669,000 levas (approximately £500,000). This capital is divided up as follows (the figures representing million levas):—French 51, Franco-Austrian 49.4, Italian 40.8, Franco-Belgian 33.6, Franco-Hungarian 28.4, German 27.2, Belgian 19.5, Czech 15, Hungarian 10.3, Austrian 7.5, British 4.3, Dutch 3.5, Swiss 1.7. The figures show that France easily leads the way in participation in Bulgarian enterprises. Apart from the 51 million levas, she has 111 million levas invested in conjunction with Belgians, Austrians, and Hungarians. Before the war Germany and Austria-Hungary had the largest investments in Bulgaria and were followed by France, Belgium, Italy, and England in the above order. It will be noticed that England has now only a few thousand pounds invested in the country. Italy has invested approximately 14 per cent. of the whole, and she has a first class bank which is very firmly established. There are also French, Belgian, Austrian, and Hungarian banks, but there is no English bank. It would appear as though we took no pains to cultivate relations with Bulgaria.

The Financial Crisis.

In connection with the recent meeting of the Chamber of Commerce, the Committee of that body have asked M. Tourlakoff, Minister of Finance, to consider the following:—1. That the Bulgarian National Bank should grant a credit of 700,000,000 levas to trade and industry. 2. That this credit should be granted immediately. 3. That for this purpose all Treasury Bonds should be used and new ones printed

TURKEY'S TRADE WITH RUSSIA.*(From a Correspondent.)*

There must still be optimists, both in Constantinople and Russia, for the Soviet Government has a trade delegation of the Russian People's Commissariat for Foreign Trade now "firmly established" in the Turkish capital. This is called the "Vneshtorg," of which the operations have recently increased very substantially. Considerable purchases have been made on behalf of the local Foreign Trade Departments of Southern Russia, and are covered by raw materials forwarded to the delegation for disposal. The official statistics issued by the Russians for the turnover for the first three months of the current year are as follows:

	£T.
January	1,207,177
February	2,128,194
March	3,548,308

It is claimed that the local banks in Constantinople consent to give credits in the following form:—21.8 per cent. at conclusion of contract; 38.6 per cent. on receipt of goods; 39.6 per cent. various forms of credit. For a total sum of £T.661,125, credits have been given for £T.183,000 on raw materials, and the balance of £T.329,125 as open credits, some of which have been for a period of four months.

The credits on raw materials have enabled the trade delegation to ship goods to London or elsewhere, instead of disposing of them locally. The merchandise thus bought by the Russian includes sacks, soap, chemical products, boots, clothing, fishing nets, sugar, flour and grain. The tobacco planters of Abkhazia in the Western Caucasus have made purchases to the value of £T.120,000.

The raw material which the Russians have sent to Constantinople amount to 4,432 tons, with a total value of £T.1,075,298, which has been disposed of as follows:—Realised in Constantinople, £T.209,850; realised in London, £T.676,406; stored in depots, £T.189,042. These raw materials include wool, sheepskins, camelhair, horsehair, furs, tobacco, carpets, wine, cement, hemp, bristles and ozokerite, by which perhaps they mean *mazout*.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Egypt.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millèmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Paper, Bristol Board, Mill-board, etc.—The Superintendent of the Government Press, Bulaq, Cairo, invites tenders for the supply of writing paper for certificates; strong writing paper for certificates; strong writing paper for registers and books; strong writing paper for registers and books coloured; bristol boards coloured; bristol boards coloured for covers; paper for file covers; cream wove paper for forms; coloured paper for forms; mill-board; gummed paper, required for the year 1922-3. Representation by a local resident agent is essential. (D.O.T.) June 20.

Various.—The Inspector-General, Prisons Department, No. 43, Sharia El Bostan, Cairo, invites tenders for the supply of various articles required by the Department in 1922-1923 (tools, tool-steel, ironmongery, thread, tassels of tarbushes, food bowls, boilers, saddles, dynamos, etc.). June 12.

Beech.—The Inspector-General, Prisons Department, No. 43, Sharia El Bostan, Cairo, invites tenders for the supply of 375 pieces beech (European) 12 inches by 4 inches by 4 inches. July 1.

Bulgaria.

Creosote and chloride of zinc.—The Directorate of Railways and Ports invites tenders for the supply of 500 tons of creosote and 50 tons of chloride of zinc. The estimated price of this contract is 4,100,000 levas. A deposit of 1 per cent. of the estimated price must be made by the tenderer, which is to be increased to 5 per cent. when the contract is placed. Terms of payment: one half against shipping documents, the contractor undertaking to give a bank guarantee against this sum, which will be freed on arrival of the material in Bulgaria—remainder after arrival and acceptance of material in Bulgaria. Delivery time: four months for the first half of the creosote and the whole of the chloride of zinc, and six months for the second half of the creosote. Delivery c.i.f. Black Sea or Danube port. Import duty to be paid by the Directorate. Local representation is essential. June 26. (D.O.T.)

India.

Steel felt, bicycles, tapes, sodium, nitrate, cable, etc.—The High Commissioner for India invites tenders for the supply of:—1. 514 tons steel, mild, round, various sizes; 2. 1,722 yards felt, brown, for panels, 60 ins. wide; 3. 200 bicycles, similar to G.P.O. pattern, without tyres; 4. measuring tapes, steel and linen, in leather cases, refills for ditto, and rules, boxwood; 5. 100 tons sodium nitrate, commercial; 4,000 yards cable, switchboard, lead sheathed; 34,000 yards cable for wiring buildings; 7. 67,500 yards cable, dry core, lead sheathed, steel tape armoured; 1,750 lead sleeves; 9,800 yards cable, under-water, unarmoured, lead sheathed. June 23.

RECENT ADJUDICATIONS.

Messrs. C. and J. Webb and Co., Ltd., London, and Messrs. the Clothing and Equipment Company of Egypt, S.A., Cairo, were the successful tenderers to the Egyptian State Railways, Telegraphs and Telephones for the supply of winter clothing for the season 1922-23.

Messrs. the Clothing and Equipment Company of Egypt, S.A., Cairo, headed, with the amount of £E.17,175.055, the list of successful tenderers to the Personnel and Equipment Department of the Egyptian Ministry of the Interior for the supply of stores to the Police Stores Department for the year 1922-23.

British Consular Reports.

IV. PERSIA

We give the following extracts from the report of Major Temple, I.A.R.O., Commercial Secretary to H.B.M. Legation, Teheran, on trade and transport conditions in Persia for 1921 :—

While all the world is suffering in different degrees of intensity from the economic damage of the war, it would be strange if Persia alone had escaped ill effects. Dependent on external sources of supply for almost all its necessities of life except food, and even indeed for some necessary foodstuffs also, Persia is now required to pay the greatly enhanced world-prices of world-commodities at a time when its own raw products which constitute its purchasing power have lost their pre-war foreign markets. As a result less has been bought and less sold, and the country is the poorer and the worse provided. Thus, measured even by price, imports have fallen from 647 million kran in 1913-14 to 482 million kran in 1920-21, and measured by quantity the decrease is greater; while measured by price, exports exclusive of petroleum have fallen from 447 million kran in 1913-14 to 138 million kran in 1920-21. (These figures are to be taken at relative, not absolute, value; because they exclude "invisible" imports and exports.) The consequence is an adverse balance of trade, so large as to strain to breaking-point banking resources of foreign remittance.

In this predicament importers, unable to buy foreign currency with which to pay for their foreign purchases, took in some instances to exporting silver kran at bullion value. This misuse of the currency was stopped by law. Relief was next sought in kran-smuggling to silver buyers abroad. This malpractice, too, has been checked, but probably not stopped. Gold and silver of all other kinds, such as foreign coin, ornaments, jewellery and plate, were next mobilised for exportation. This shift, again, was restrained by a Customs interdiction. No other resource remaining, the import trade has been brought almost to a standstill for lack of a medium of remittance; and, although the sterling rate of exchange, which a year ago remained under 30 kran to the £1, now keeps above 50 and at the present time is quoted at 60 kran to the £1, sterling except in very small amounts is not purchasable even at the latter exorbitant rates (exorbitant because divorced from the silver value of the kran which at silver rates would be about 44 kran to the £1).

Abstruse as the situation may appear when all its complication rise to view, it but expresses the operation of the inexorable economic law that in the long run a country's incomings of goods and services must be equalled by its outgoings of the like, and that if the latter continually fall short expedients for adjusting the adverse balance must become increasingly difficult. Yet, as always happens where economic science is not studied, popular opinion in Persia tends to discover illusory causes of the trouble and to demand illusory remedies. Some of the public imaginings in this regard have assumed an anti-foreign shape. This is particularly regrettable because the less her native energy in exploitation the more would she be dependent for economic development on such external aid as can by good will be attracted. Certainly a country which at the best has but few present inducements to offer to large capital-enterprises, and little or no capital of its own to engage, can only hamper itself by allowing anti-

foreign repulsions. The commercial evil of misguided ideas may be seen in a recent proposal to the Parliament to limit imports by law. A country outrunning its purse may, of course, do well to retrench its purchases; but a country which on the one hand imports little else than necessities and on the other hand has a smaller purchasing-power per head of population than any other country in the world may perhaps do better to turn its mind to the increasing of its imports.

Decrease in Commerce.

The total commerce of Persia with foreign countries during the Persian year 1920-21 (March 21 1920 to March 20, 1921) amounted in value to 853,550,412 kran. This figure is exclusive of the commerce of the province of Ghilan which was in rebel occupation. In the preceding year (1920-21) the total commerce of Persia with foreign countries amounted in value to 997,610,009 kran. Thus a decrease of commerce amounting to 144,059,597 kran is shown. The total value of the imports into Persia during the year was 482,351,633 kran. Thus an adverse balance of trade amounting to 111,152,854 kran is shown. In the preceding year the imports amounted in value to 629,792,656 kran, and the exports to 367,817,353 kran, showing an adverse balance of trade amounting to 256,975,303 kran. There thus appear a decrease of imports amounting to 147,441,023 kran, or 23 per cent., and an increase of exports amounting to 3,381,426 kran, or 0.9 per cent. The decrease in imports occurs under the following main heads:—Animals 6,298,684 kran, raw materials 13,788,926 kran, manufactured articles 126,422,797 kran, and precious metals and money 18,214,512 kran; against which an increase has occurred under the head of articles of food and drink amounting to 17,283,896 kran. The increase in exports occurs under the sole main head of raw materials which amount to 51,100,870 kran, against which decreases have occurred under the following heads:—Animals 152,967 kran, articles of food and drink 33,870,556 kran, manufactured articles 11,498,601 kran, precious metals and money 2,197,320 kran.

An Undeveloped Country.

In Persia there are virtually no indigenous industries to be protected or fostered against foreign competition, and the only effect of any measure of prohibition in its immediate operation would deprive Persian consumers of the use or enjoyment of the particular species of commodities brought under interdiction. This, nevertheless, might or might not be a necessary expedient for a poor and undeveloped country which finds increasing difficulty in paying for imports with exports, but at any rate it would in no true sense be a "swadeshi" device, unless indeed it should force into existence industries which as yet are not even nascent.

By sole exception, there has sprung up in Persia, as a consequence of the temporary block of imports during the war, a leather-making industry and a boot-and-shoe-making industry but the methods and processes are those of the cottage not of the factory, and prices are as high as qualities are low. Similarly there has also sprung up a button-making industry, but its products are far from satisfactory, and it makes no headway. If Westernised industries are to thrive in Persia, they must have Western support, and for that the time is not propitious.

Meanwhile there is more to be gained by promoting exports than by prohibiting exports. Inexorable economic laws impose their own prohibitions on nations disposed to purchase beyond their purses. That indeed is beginning to be realised by Persian importers who with coffers full of silver kran cannot move the bank to sell sterling. The Persian currency has lost its purchasing power outside its own country.

COMMERCIAL BANK of GREECE, Ltd.

CAPITAL PAID UP—Drs. 20,000,000.

RESERVE FUNDS Drs. 10123,920.45/00.

Head Office: ATHENS.

Branches:—Piræus, Salonika, Patras, Vola, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Aeglen), Nauplia, Larissa, Triccala, Mitylene, Canes.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:

The Bank undertakes the warehousing and sale of goods consigned

COMPANY NOTICES.

Societe Anonyme du Behera.

Alexandria, May 27th, 1922.

E. MORDO, Secretary.

Engineering Topics.

By Our Engineering Representative.

New Vauxhall Engine.

More than usual interest attaches to the new Vauxhall engine which is the joint work of the celebrated motor firm and Messrs. Ricardo and Co., Ltd., engineers, who have designed so many internal combustion engines for general and special purposes, of extraordinary efficiency. The collaboration with the Vauxhall firm over the new engine appears to be the outcome of certain theories and suggestions made by Mr. Ricardo himself to the chief designer of Vauxhall Motors, Ltd., and these after discussion and minor modification have been adopted.

The new engine is of the four cylinder type, the bore and stroke being respectively 85 and 132 millimetres, so that the exact capacity of the engine is 2,985.7 cubic centimetres. At maximum speed it should develop rather over 110 horsepower, although the Treasury rating will be only 17.9 horsepower, a fact which seems to shew that a little revision regarding the Treasury methods of calculating horsepower would not be out of place. The new engine, all out, is capable of the almost incredible speed of 4,500 revolutions per minute.

The cylinders rather depart from usual practice with engines of this size as they consist of four steel liners in an aluminium block, with detachable heads in pairs. Each cylinder has two inlets and two exhaust valve actuated by two overhead cam shafts in aluminium cases, driven by a train of spur gears at the front of the engine. Two carburettors, each with its own induction pipe, are used, one being for the two end and the other for the two centre cylinders. Ignition, instead of being by magneto in the usual manner, is by coil and battery, and it is interesting to see that this leading firm has adopted this new and somewhat daring method, which is in effect and principle a reversion to the earliest car practice. Of course the battery is of the most improved type, and exponents of modernity in engine design will be elated to hear that the makers are fitting three sparking plugs, presumably running in parallel, to each cylinder. A total of 12 plugs for a four cylinder engine seems carrying refinement to rather extreme lines, and it seems difficult to see how the charge can be fired more quickly in practice by three than by two plugs placed in correct positions.

The crankshaft is mounted entirely on ball bearings, and the big ends are fitted with roller bearings which after all seems the best possible practice, whatever the adherents of split bearings may say. Presumably the big ends are threaded on the crankshaft first and the roller bearings put in place and secured by split plate

afterwards. One of the most interesting departures from customary design is that the flywheel is placed in the centre and not at one end of the crankshaft, so that we have two cylinders on either side of the wheel. This arrangement is in view of the extraordinary speed of the engine, and as the flywheel is completely enclosed in the crank case the latter has an unusually robust appearance.

The engine clutch and gearbox form one unit which is carried on three trunnion bearings, two being on the centre line of the engine and the other at the rear of the gear box. The whole unit is set as low as possible in the chassis so as to ensure a low centre of gravity and consequently to improve the element of safety in cornering at speed.

The clutch is of the multiple plate type with Feroda surface, and the gearbox which has four forward speeds and reverse is very much on the lines of the firm's standard production. The back axle is connected with the gear box by an open propellor shaft with a fabric disc joint at the front and a universal joint at the rear. A channel section torque member takes the torque, that from the rear braking action being taken through the springs.

The rear brakes are fitted with exceptionally large diameter aluminium drums with steel liners, and are actuated by a hand lever. The front wheel brakes, which have drums of smaller diameter, are controlled by a cable from the foot pedal. A further means of actuating the brakes, provided by compressed air, enables all four brakes to be put into action simultaneously and this auxiliary means can be used either with or without the hand and foot control.

A Fine Performance.

Down at Brooklands the other day I had the pleasure of seeing the little A.C. sports model accomplish another remarkable performance, or rather, perhaps, I should say I saw a part of it. Driven by Mr. Kaye Don and Mr. A. Joyce in turn it broke no fewer than 19 records, up to the 12 hours and also the 1,300 kilometres. This puts the car in the amazing position of holding 105 Brooklands' records, which Mr. S. F. Edge tells me is four times more than the combined records held by all other cars in the same class. This, by the way, is the third 12-hour record taken by this make of car, and, as Mr. Edge says, is all the more noteworthy in that no other light car has ever lasted for 12 hours on the Brooklands track.

Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.

It is easy to start and runs unattended for long periods.

Stock and Share Markets.

QUIET AND DULL TONE.

Prices again Lower.

(From Our Own Correspondent.)

London, Tuesday Morning.

A very dull tone has ruled in the markets during the past week. The main factor in bringing this about has been the postponement of the negotiations for a loan to Germany.

Stocks generally have moved downwards, headed by the gilt-edged group, and even Railways, which have been such a buoyant feature in recent weeks, have declined in sympathy with other securities. It is of course, only a passing phase, but nevertheless an unpleasant shock to the investor, who for quite a number of weeks has had, comparatively speaking, a good time. For an improvement in the position we must await a clearer political atmosphere.

Gilt-Edged Loan.

Gilt-edged, as I have pointed out, are down on the week. Consols are $2\frac{1}{2}$ lower at $54\frac{1}{2}$, the Conversion Loan has shed 2.7-16 at $74\frac{3}{4}$, while War Loan Fives at 99.1-16 are $\frac{1}{2}$ lower. Indian stocks have shared in the decline. The Seven per cent. loan is $2\frac{1}{2}$ down at 113, the $3\frac{1}{2}$ per cent. loan is 2 down at $66\frac{1}{4}$, while the 3 per cent. loan is a point lower at $56\frac{1}{4}$.

The foreign market has generally been dull. French loans have been a specially weak spot, with War Loan Fives 4 down at 41, while the 4 per cents. are $32\frac{1}{2}$. German 3 per cents. eased off sharply to 2.5-16 at which they are 5-8 lower. Italian Rentes have shed $1\frac{1}{2}$ at 23. There has been little doing in South Americans. Brazilians have varied somewhat, while Argentines have been dull. Chinese stocks have been weak.

Industrials Dull.

There has been a marked absence of activity in the Industrial group even compared with the restricted business of recent weeks. Investors are evidently firmly determined to hold aloof until the general outlook is more certain. In some stocks a certain amount of realisation has been taking place.

Textiles have been rather weak. Coats are 1-32 lower at 3.1-8, while Courtaulds are 2s. 6d. down at 48s. 3d. Tobaccos have been a dull spot, with Bats 2s. down at 77s. 6d., and Imperial Tobaccos 1s. lower at 60s. 6d. Dunlops are again lower at 8s. $10\frac{1}{2}$ d., a decline of $4\frac{1}{2}$ d. Iron and steel shares have been steady. Vickers are 3d. up at 11s. 9d., Armstrongs are unchanged at 16s. 9d., while Guest Keens remain at 34s. 9d. Indian railways have shown a tendency to firm up somewhat. Bengal and North Western are 3 up at 125. Bengal Nagpur 4 per cent. Debs. have been done at $73\frac{1}{2}$, while Madras

and Southern Mahratta Debs have been in some request up to $75\frac{1}{4}$.

Shipping securities have made a rather stronger showing, with P. and O. Deferred 15 up at 330. Cunards are 3d. down at 20s. 6d., while Furness Withys are unchanged at 30s.

Oils Variable.

Sharp weakness has developed in the Oil group as the result of a variety of factors, among them the political situation, while the dullness prevailing in other markets has not been without its effect. As a result stocks in many cases show a decline.

Burmahs, exceptionally, are 1-16 up at 3.7-16, while Anglo-Persian Ord are $\frac{1}{4}$ up at 4.11-16. Mexican Eagles at 3.9-16 are 1-16 up. Trinidad issues have been variable. Apex are 2.5-32, a gain of 1-32. Centrals at 2.11-32 are 7-32 up, while Leaseholds are 1-32 up at 1.7-32.

Among Egyptians, Anglo-Egyptian B are $1\frac{1}{4}$, a decline of 3-32, while Oilfields of Egypt are $\frac{1}{4}$, at which they are 1s. 6d. lower. In the Roumanian group, Roumanian Consolidated are 3d. down at 17s. 3d., Dacia Romanos are 1.1-16, a decline of 3-16, Steaua Romanas are 11s. $10\frac{1}{2}$ d., at which they are $7\frac{1}{2}$ d. lower, while Phoenix are 1s. down at 27s. 3d.

Banks Fairly Steady.

A fairly firm tone has ruled in banking descriptions. Chartered of India are 17.15-16, National of India are $44\frac{1}{4}$, P. and O. Banks are 14.1-8, and Bank of British West Africa are 5.1-8.

In Egyptian securities Aboukirs are 20s. 6d., Béhéras are 8, Egyptian Markets are 20s. 9d., and Gharbieh Lands are $1\frac{1}{4}$.

Cotton & Cotton Goods.

MANCHESTER COTTON REPORT.

(From Our Own Correspondent.)

Manchester, Saturday.

The past week has been the quietest during the year owing to the Whitsuntide holidays which have extended over the whole of the week. Many of the big shipping firms have been closed down altogether, and the attendance upon the Manchester Royal Exchange was very thin. In the cloth section no serious business has been entered into, but it is expected that favourable developments will take place when the principal buyers return next week. In the yarn section quotations for American and Egyptian counts have remained unchanged, and no transactions worth mentioning have been recorded.

LIVERPOOL REPORT.

Messrs. Reynolds & Gibson report as follows for the week ended June 7:—

In spite of the week being cut into by the holidays and Manchester practically closed, the daily spot sales have been well maintained at the level ruling recently. Sudan and Tokar cotton have again come into prominence, and approximately a third of the turnover has been in these qualities. There is no doubt that Tokar cotton is very cheap compared with any other growth offering in this market. Spinners are beginning to realise this fact, and, whilst a short time ago they would not seriously consider it on account of colour, now overlook this, and the large stocks that have been held for so long are beginning to show signs of diminution. Business in the ordinary Egyptian qualities has been practically confined to Sakellaridis, grading from strict good fair to strict fully good fair. As mentioned before, the selection in the above grades is becoming very thin, a curious state of affairs when consideration is given to the fact of the very large Alexandrian stock which must include a large percentage of the medium qualities. Sakel cotton of tenderable quality cannot be imported to compete with present spot offerings, and it will be interesting to watch the developments in this quarter as the season matures. The estimated sales for the week amount to 2,500 bales (including 950 bales Sudan), against 2,400 bales last week (including 700 bales Sudan). Quotations are reduced all round 25 points. Fully good fair Sakellaridis 19.00d.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report for the week ended May 26 state:—

During the past week the market has been only moderately active, and the tone to-day has been decidedly weak. The recent good buying on the spot markets both here and in Liverpool encouraged many to the belief that the trade revival so long predicted was about to materialise and that we were on the eve of a period of increased activity, and sentiment became bullish. On Tuesday there was a good deal of speculative buying, which pushed up prices to 38.90 for July Sakellaridis and 27.00 for June Ashmouni. A slight falling off on the commercial demand on Wednesday induced the liquidation of many of the previous days purchases and the bullish sentiment quickly evaporated; prices continued to sag and we close to-day at the lowest of the week. The spot demand has certainly eased off during the last couple of days, but actual cotton is well held, and has not followed the decline in futures. Selection gets poorer every day.

Spot. Total bales this week amount to about 10,000 bales; of this total we estimate 7,600 bales Sakellaridis, 1,950 bales Uppers, 300 bales Brown and 150 bales White. The demand, which fell off slightly towards the close of the week, appears to be veering round more to the better grades.

There is nothing of any importance to remark on the new crop. The plant is progressing normally and few complaints are heard. The Government continues to emphasise the fact that the summer water supply will be short, and to impress on the natives the vital importance of getting their pumps and water lifting plant in order.

In their report for the week ended June 2 the Commercial Co. of Egypt state:—

The feeling prevailing during the week has been undecided. Speculators have not operated to any extent, being apparently nervous of the Bureau Report on the American crop due to be issued to-night. Actual cotton is very firmly held and on the basis of the spot demand the futures market should have shown a better tone, and probably would have done so but for the straddle selling of new crop positions against American and Egyptian in Liverpool.

Spot.—Total sales amount this week to 8,500 bales of which we estimate 6,500 bales Sakellaridis, 1,500 Uppers, 200 bales Brown, 200 bales White and 100 bales Pilon. The market was closed on Monday last owing to a native holiday.

There is nothing of importance to say on the growing crop. The plant is progressing normally and satisfactorily. Nights have been rather cool and three days ago rain fell in the Northern Delta but not sufficient to cause damage. Leaf worm has appeared in places, but has quickly been destroyed and no damage is reported.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 5:—

Season. June 1.—Nearly general rainfall in Burma, Central India, Western Central Provinces, North Hyderabad (Deccan), Mysore and Malabar. Local elsewhere in north-west and southern India. June 2.—Monsoon developed with unusual rapidity and gave wide spread rain along Himalayas and heavy rain fell on west coast of Peninsula. June 3.—Monsoon active from east Punjab to Orissa, Deltaic Bengal and central parts of India. June 4.—Monsoon active in Burma and north-east India, but weakened over rest of country. Condition of Crops, Bengal.—Good rain, but in the opinion of the Director of Agriculture too late for jute in East Bengal. In Punjab, sowings of cotton average.

Markets. June 1.—Bombay cotton market steady. Fine M.G. Oomras, Rs. 445 July, Rs. 460 September. Bombay cotton arrivals from September 1, to May 27, were 2,918,000 bales as compared with 2,176,000 bales during the same period of the last year. June 1.—Bombay imported piece-goods market depressed. Fancies and prints still very low. Local goods continue firm. June 2.—Calcutta jute market quieter. Firsts, Rs. 90, Lightnings, Rs. 80, Hessians fluctuating. Ready 9 inch porters being quoted as low as Rs. 21 with 11 inch porters about Rs. 30. Heavies also easier and rates tending downwards. Tea.—May 30.—At first sale of the season 8,616 packages sold at an average price of 11 annas 2 pies per lb. All districts were represented. Qualities were useful and above average for new season tea though not up to last year's standard. Demands confined to good quality tea, broken and fannings. Good demand from Bombay for pekoes. Fair demand from Persia for broken with tips. Dusts strong. June 2.—Rangoon rice market dull. Price tending to rise after recent sharp fall. Big mills, June, Rs. 472; July, Rs. 475. Three months Rs. 480 by boat. Paddy, Rs. 204. Bank rate. Imperial Bank of India rate 6 per cent. This has fallen from 7 per cent. which was ruling from May 1.

The Messageries Maritimes has inaugurated a monthly service from Haifa.

The monsoon has arrived in India, but the first rains have only been weak and of short duration, says a Reuter message.

The Land Bank of Egypt announces an interim dividend of 3s. per share, less tax, payable June 15.

The British Overseas Bank announces an interim dividend on the "A" ordinary shares at the rate of 6 per cent., payable on June 19.

The traffic receipts of the Egyptian Delta Light Railways for the week ended May 10 amounted to £E.7,200; total for the year, £E.32,733. For the corresponding period of last year receipts amounted to £E.10,335; total for year £E.39,652.

Near East Markets.

LONDON PRODUCE REPORT.

Price of Sugar Rising.

(From Our Own Correspondent).

London, Monday evening.

Sugar.—Home refined has been in steady request at advanced prices. Tate's cubes have advanced 2s. 6d. at 56s, while mineral water sugar is 1s. 6d. up at 50s. 3d. London granulated has gained eighteenpence at 49s. 9d., while Lyle's granulated has risen 1s. 3d. at 49s. 9d. Export descriptions have shown signs of rising. West Indian crystallized has jumped 1s. at 43s. 6d. and white Mauritius at 46s. 3d. is 3s. 3d. up. White Java at 20s. 3d. shows a gain of 9d. Cane sugar quotations are:—June, 16s.; July, 16s.; August, 22s. 6d.; September, 22s. 4½d.; and October to December 21s. 7½d.

Coffee.—All quotations are 2s. lower. East Indian is now at 118s.; Costa Rica is at 116s.; while Nairobi is quoted at 104s. The futures market has been firm. Quotations are:—July, 63s.; September, 63s. 6d.; December, 61s. 3d.; and March, 61s. 9d.

Dessicated Coconut.—No large re-action is expected in the market yet, but enquiries are still improving, while quotations are easier.

Rice.—The past two weeks have been dull, but firmness has prevailed throughout. With improved demand prices are expected to be higher.

Green Fruit.—The Whitsun holidays have not passed without some effect on oranges. Heavy sales are reported from all quarters, while prices have advanced considerably. Lemons are still the leading feature of the market, supplies having been cleared as soon as the vessels are discharged. There is little prospect of a decline in prices while the present heat wave is in progress, although when shipments are steadier, we may look for some improvement in this respect. Apples have remained in steady request at unchanged rates. There has been an indifferent demand for Egyptian onions, the market being almost at a standstill.

Oilseeds.—Prices are unsteady. Indian Linseed has dropped 4½d. to 20s. 6d., while La Plata is 9d. lower at 18s. 9d. Rape-seed is lower with Toria 7½d. down at 18s. 3d. Cottonseed has declined with Egyptian black 3d. down at 11s. 9d. and Sakell-arides has shed 1½d. at 11s. 3d. Indian has been steady at 9s. 3d.

Oils.—An unsteady tone has been in evidence. Linseed oil has declined 1s. at 43s. 6d. Rape oil remains unaltered with crude at 45s., and refined at 48s. Cotton oil has been variable. Technical and Egyptian crude have lost 6d. and 1s. respectively at 42s. 6d. and 42s. Refined at 49s. and deodorized at 54s. are firm.

Oilcakes.—There has been a further loss of 10s. in all cases. Linseed oil in now at 270s. ton. Cottonmeal cake is at 250s. ton, cottonseed cake is at 150s. ton, and coconut cake at 130s. ton.

ASIA MINOR FRUIT REPORT.

Sultana Sales Small.

Messrs. C. J. Giraud & Co., Smyrna, report as follows under date May 27:—

The total estimated arrivals of sultanas amount to 173,430 bags as compared with 103,500 bags for 1921. The total estimated sales are 191,430 bags as against 103,500 bags for last year, while the estimated stock unsold amounts to 2,000 bags.

Markets.—Sultanas—Unchanged. Small daily purchases, mainly for the Continent continue to be effected which contribute to lighten the remaining stocks. Interest generally is waning owing to the gradual exhaustion of good sound quality fruit. The bulk of supplies available are low grade stuff. During the past fortnight there has been a good deal of rain all over the country, more than usual at this season of the year, and opinions are somewhat divided as to its ultimate effect on the growing crop. The effects will only become apparent in the course of July.

AGRICULTURAL CONDITIONS IN IRAQ.

Excellent Harvest Prospects.

The following extracts are taken from the Agricultural Bulletin of Iraq for the month ended April 15:—

Well distributed and fairly heavy rains fell during the first week of March. Though no subsequent rains of note have fallen in Lower Iraq, the seasonal distribution has been well suited to the cultivation of all winter crops. Occasional showers continue to fall in Upper Iraq where the unirrigated crops are in splendid condition.

The report of the Director of Irrigation was not received at the time of submission of this bulletin, but it is reported that the water supply is satisfactory on all canals. The absence of late rains has occasioned a heavy demand on the water supply in all canals. The irrigated cereal crops are exceptionally good, and the absence of continuous cloudy weather has had the result of suppressing the "Rust" disease of the wheat crop. On all canals land is being prepared for the summer crops of maize, millet, sesame, cotton and rice. Fertilization and trimming of date palms is practically completed.

Flood inundation canals on the banks of the rivers and also the Hai area have received an abundance of water owing to the high floods.

Condition of Stock.

The Director of Civil Veterinary Services reports outbreaks of Rinderpest in cattle in the Diyala Area and in the Busreh Liwa. Altogether 995 animals were inoculated, of these, 20 were diseased and were treated with success; 218 animals died before veterinary aid could be rendered. Contagious pleuro-pneumonia in sheep was reported from Kirkuk; 308 head of sheep died before veterinary aid could be rendered. Sheep pox was reported from the Mosul Liwa and successfully dealt with. The condition of stock is particularly good.

Grazing continues to be plentiful. In Lower Iraq owing to the absence of late rains, the herbage has already withered in non-irrigated areas. On the steppe lands of Upper Iraq, vegetation continues to be green and rank.

Experimental Farms and Research.

The winter cereal crops on Government Farms at Rustam, Kut and Baquba have made good progress. The absence of late rains necessitated all the cereal crops being irrigated. The flax crop at Kut has been harvested, and is being stored pending the arrival of a hand scutching machine. The spring sown flax crop at Baquba has made good progress, but it is inferior to the autumn sown crop at Kut. The sowing of all cotton seed on experimental farms was completed by the middle of April. About 100 acres of bulk crop cotton have been sown for propagation of seed, and various experiments have been laid down on about 20 acres. Germination is good. About 50 varieties of imported tree seeds have been sown at the Rustam Tree Nursery. Shade trees have been planted all along the main roads on the farm. The bulk crop of poplar and willow cuttings on about 4 acres is making satisfactory growth. The large number of wheat and barley varieties under experiment at Rustam have made vigorous growth.

Owing to the anticipated reduction in the budget allotment of the Department of Agriculture, the closing down of the experimental farms at Kut and Baquba is under consideration.

A further attempt has been made in the current year to combat outbreaks of locusts. The two solutions named Cyllin and Solomia used for this purpose have given satisfactory results in that they destroy the locusts that come into contact with the spray. They have the advantage of being economical of labour, but the disadvantage of being relatively expensive. The locust outbreak in the Upper Iraq is reported to be about normal. Comprehensive measures of control over large areas are essential to the success of an anti-locust campaign.

District Work.

The work of the District staff has been largely confined to the distribution of cotton seed and to giving necessary advice to prospective cultivators. Out of the available supply of 75,813 lb. of cotton seed, 72,353 lb. have been distributed. This compares favourably with 3,021 lb. in 1920 and 28,101 lb. in 1921.

Silk demonstration work with headquarters at Baquba is progressing satisfactorily. During the month this work was honoured by a visit from H.M. the King as well as numerous other interested visitors. It is regretted to have to report that only a small portion of the consignment of imported worm eggs have been distributed. It would appear that a fairly considerable amount of propaganda work will be necessary before re-suscitating this important industry.

An enterprising local firm has placed at the disposal of the Department of Agriculture a consignment of artificial manure for date palms. Experiments are being conducted on private estates to discover the suitability of these manures. A further consignment of artificial manures has been received from another firm to discover their suitability for the cotton and cereal crops on the Government farms.

There is a strong demand for light weight mowing machines in the Mosul-Erbil wheat area. Most of the machinery imported by the Mosul Farms, Ltd., has arrived at their estate and has greatly impressed local landowners. Numerous demands have been received from Busren for the Department of Agriculture to import on behalf of land-owners suitable sugar cane sets from India. Lateness of season and shortage of staff necessitates the postponing of this work. A request for assistance has been received from the commercial community in Busreh in estimating the yield of the date crop, but, as in the case of various other lines of work, which demand attention, it will be impossible to assist in this matter until budget provision can be made to employ the necessary staff.

GOOD YUGOSLAV HARVEST EXPECTED.

(From Our Own Correspondent.)

Belgrade, June 1.

According to the Ministry of Agriculture's report this year's harvest leaves nothing to be desired. Wheat and maize are progressing very favourably. Plenty of spring rain with sunny intervals have provided good soil for spring sowings. In some warmer districts the first hay has been mown. The oats and barley harvest has begun; in some districts (Vardar and Doiran) barley has suffered from the mice. Flax and hemp are much better than last year, and if no accidents happen the harvest will yield 70 per cent. above that of last year. Tobacco plantations have had enough water all round, but it is doubtful whether any tobacco will be available for export because of the great increase in the consumption in the country. The opium poppies have not yet come out and the report gives no indication of the prospects for this crop.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton & Co. of Liverpool report as follows for the period ended June 1:—

Currants.—We have experienced an exceedingly quiet month, and although the tone of the market has kept fairly steady the volume of business has been disappointing for everybody concerned. Buyers generally have displayed no inclination to operate beyond absolute requirements. The pause, however, is

only to be expected after April's activity. The month opened firm, but the depreciation in the Greek drachma allowed merchants to reduce their C.I.F. offers for shipment and this had a weakening effect on spot currants, and with buyers holding aloof a period of extreme quietness and a slackening of interest all round was noticeable. The Cressado's cargo of 200 tons was quickly disposed of, Zante, Gulf and cleaned Patras selling at 62s. to 64s. S.s. Gerano arrived on the 23rd ultimo, with 850 tons, a large proportion of which had been disposed of prior to arrival. Sales were:—Pyrgos 57s.; Amalias, 4-cases, 58s. to 59s.; cleaned Patras 61s. to 63s. Latest prices shew 1s. to 2s. decline. The s.s. Brescia is expected about the 9th inst. Quotations are:—Pyrgos 57s.; Amalias 58s. to 60s.; Patras 60s. to 63s.; Zante 60s. to 64s.; Gulf 62s. to 63.; Panariti 65s.; Vostizza 63s. to 74s.

Valencia Raisins.—Retail sales only possible.— $\frac{1}{2}$ -boxes 40s., $\frac{1}{4}$ -boxes 50s., 70s.

Sultanias.—In the opening days a firm tone was maintained, and a more general feeling of optimism, but the amount of enquiry was not sufficient to stimulate the market into activity, and the closing days witnessed more desire on the part of sellers to make progress. Sales were:—Medium 122s. to 125s.; Fair to good 127s. to 135s.; Fine up to 140s.; Australian 3 crowns 110s. c.i.f. Cape sultanias—sun dried 105s.; bleached 110s. to 130s. Afghans—reds move slowly 90s. to 92s.; yellows 100s. to 115s.

Figs.—Naturals are again lower, Prima selling 56s., Genuine 58s.

OPIUM MARKET REPORT.

Smaller Arrivals.

Messrs. Barker Bros., Smyrna, report as follows under date May 31:—

The sales of opium this month amount to 300 cases of 160 lbs. or about 48,000 lbs. Our market closes firm at Ps. 1100 per oke as to quality and morphia strength first cost, and the sterling price as per our exchange to-day is equal to 13s. to 17s. per lb., c.i.f. port of destination. Our exchange is Ps. 1100 per lb. sterling for cheque on London, and 0.64 dollars for one Turkish paper pound.

The total sales of opium this year amount to 1015 cases of 160 lbs. per case, of which amount 60 per cent. has been shipped to the Near East, and the balance to the United States, England, Germany, France and Italy. The stock in first and second hands is now about 730 cases of 160 lbs., and the arrivals are 1370 cases against 1480 at the same date last year; as we reckon our arrivals from June to June we have to discount from above 1370 cases, 960 arrivals up to last January, therefore we have only 410 cases for this year, and as our sales since January are 1016 cases, we have shipped 606 cases over and above what we received from the growing districts.

Czecho-Slovak wool imports were valued at 2,200 million crowns in 1921, and also 1920, whilst exports of woollen goods dropped in value to 6,300 crowns in 1921 against 6,700 crowns in the previous year.

SUDAN PRODUCE.

Wheat Crop Disappointing.

The following extracts are taken from the C.E.B. report for April:—

Gum.

Kordofan Province.—18,416 kantars were sold in El Obeid market during April as against 12,562 kantars during the same month last year, at an average price of £E.1.040 per kantar of 100 rottles (45 kilos). The arrivals at El Obeid from Nahud were 8,253 kantars as against 3,846 kantars last year. The amount sold at Nahud during the month was 8,612 kantars as against 6,148 kantars, the average price being 831 m-ms. per kantar. 3,381 kantars were sold at Um Ruaba at an average price of £E.1.045 m-ms. the kantar as against 2,829 kantars last year. At Rahad 1,232 kantars were sold at an average price of £E.1.040 m-ms. as against 2,683 kantars during April last year.

Kassala Province.—716 kantars of 100 rottles (45 kilos) of gum were exported from Gedaref and 1,175 kantars from Mefaza.

Nuba Mountains Province.—1,595 kantars of 100 rottles (45 kilos) of gum have been exported from the Province during the 1st quarter via Kaka and 858 kantars via Kordofan.

Wheat and Barley.

Berber Province.—Wheat has nearly all been cut. Rust has spoiled what would have been a splendid crop. The best experimental wheat was Indian 40 which yielded at the rate of 6-2-3 big ardebs (15 keilas) a feddan, closely followed by two lots of Bunyib yielding 5½ and 5-1-3 big ardebs.

Mikeilab.—Wheat was disappointing and only yielded an average of 2½ ardebs. Rust did a good deal of harm in the Gezira but the main cause of failure was insufficient seeding.

Kitiab.—The wheat has now been assessed and works out at 3-47 ardebs (420 rottles 189 kilos) per feddan.

Dongola Province. Muri.—Wheat was a fair crop; a lot of the best of it was spoiled by rust. The yield according to the assessment was 3½ ardebs per feddan.

Chaba.—On the whole the wheat crop was disappointing owing to the rust. The average yield according to the assessment was 3½ ardebs per feddan.

Darfur Province.—Wheat was sold in El Fasher market for £E.1.500 m-ms per ardeb of 300 rottles (135 kilos).

Rainfall and Cultivation.

Nuba Mountains Province.—No rain fell during March. But there was a shower at Talodi on April 1, and a considerable amount of rain fell during the period on different parts of the Tonga-Taledi road, but only sufficient to impede motor traffic very slightly. The weather has been very hot with a good deal less wind at night.

Berber Province.—Wad Hamid Basin.—Arrangements were made for allotment for 1922-1923 crops. It has been decided to keep the Upper Hod closed next season and to flood the Lower Hod only in the hope of killing off the luxuriant growth of grass in the Upper Hod which makes cultivation almost impossible.

With the object of securing better methods of cultivation and at the same time getting more land under cultivation, smaller allotments are to be given than in previous years.

Roads and Communications.

Bahr el Ghazal Province.—The channel at Gerinti has been widened considerably by removal of rocks. A safe and easy passage for steamers is now assured.

Nuba Mountains Province.—The Kaka-Talodi road. The section Eliri-Lubad, a distance of 33 miles, was cleaned and the Khors ramped. One Crossley tender and one Leyland lorry covered the distance in three hours without difficulty. This is the first time motors have ever reached Lubad which is 20 miles short of Werna. A well is being sunk at Takheim on this road, and water was reached at a depth of 70 feet. The Divisional Engineer, has been at work on the Khor Affin bridge most of the month. It is hoped that the bridge will be finished before the rains.

Mongalla Province.—The road from Tindelu to the new Gell River Post has been made fit for the bull transport.

Red Sea Province.—40 merchant ships of a net registered tonnage of 107,037 visited Port Sudan during the month.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 143s cwt.; (Canadian), 135s cwt.; (American), 102s. 6d. cwt.; butter (Danish), 180s. cwt.; (Australian), 156s. cwt.; (New Zealand), 164s. cwt.; cheese (Canadian) 79s. cwt.; (New Zealand), 70s. cwt.; lard 69s. 3d. cwt.; eggs (Danish), 14s. 6d per 120; (Styrian), 10s. per 120; chillies, 102s. 6d. cwt.; cloves (Zanzibar), 1s. 2½ lb.; cocoa (Ceylon good to fine), 87s. 6d. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt.; (Central American), 104s. cwt.; (Jamaica), 99s. 9d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 99s. 6d. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 11½ lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7½ d. lb.; pimento, 2-1-8d. lb.; raisins (Valencias), 55s cwt.; sultanas (Smyrna), 119s. cwt.; currants (Vostizza), 71s 6d. cwt.; (Amélias), 59s cwt.; sugar (Tate's cubes), 53s. 6d cwt.; (Lyle's granulate), 48s 10½ d. cwt.; (Mauritius crystals), 45s. 3d. cwt.; (West Indian crystal-lised), 43s. cwt.; (centrifugal), 14s. 3d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 7½ d. cwt.; (bran Rangoon), 66 8s. 9d. ton; cinnamon (firsts), 11½ d. lb.; mace (fair Singapore), 1s. 6½ d. lb.; tea (Indian, common to good common), 1s. 1d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½ d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½ d. lb.;

Java (common to good common), 10½ d. lb.; wheat (English white), 57s. qr.; wheat (Australian), 60s. qr.; oats (English), 38s. qr.; oats (La Plata, ex-ship), 26s. 3d. qr.; maize (La Plata), 37s. 9d. qr.; flour 45s. 9d. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8½ d. lb.; citric, 2s. 3d. lb.; tartaric, 1s. 3½ d. lb.; ammonia (sulphate) £16 11s. 6d. ton. arsenic (white powdered), £35 5s. ton; benzole (standard), 2s. 5½ d. gallon; bleaching powder (35 per cent.), £13 15s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 115s. 6d. cwt.; Potassium: Bichromate, 6½ d. lb.; chlorate, 4½ d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9½ d. lb.; prussiate yellow, 1s. 1½ d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 120s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 3d. lb.; alkali (58 per cent.), £9 1s. 3d. ton; chlorate, 3½ d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £16 ton; prussiate, 9½ d. lb.; nitrate, £15 3s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton; lemon oil, 3s. 6½ d. lb.; quinine, 2s. 10½ d. oz.; red lead, £36 ton; white lead, £39 10s. ton; white ground lead, £49 15s. ton; sulphate of copper, £26 17s. 6d. ton; sulphate of iron 60s. ton.

Metals.—Aluminium, £122 10s. ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard) £63 9s. 3½ d. ton; copper (electro), £70 10s. ton; gold bars, 92s. 11d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 90s. ton; galvanized sheets (25 G), £15 17s. 6d. ton; lead (soft foreign), £24 6s. 3d. ton; manganese Poti, 1s. 1½ d. unit; molybdenite, 30s. unit; nickel, £162 10s. ton; platinum, 360s oz.; plumbago, £16 ton; quicksilver, £12 bottle; spelter (G.O.B.), £27 18s. 9d. ton; tin (standard), £154 1s. 3d. ton; wolfram, 12s. unit; zinc sheets, £35 5s. ton; tin plates (20 by 14), 19s. 1½ d. box; silver bars, 30½ d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9d. lb.; 80 to 89 lbs., 9d. lb.; 70 to 79 lbs., 8½ d. lb.; 60 to 69 lbs., 8½ d. lb.; 50 lbs. and under, 6½ d. lb.; (second) 90 lbs. and up, 7-5-8d. lb.; 80 to 89 lbs., 7-1-8d. lb.; 70 to 79 lbs., 7½ d. lb.; 60 to 69 lbs., 6½ d. lb.; 50 lbs. and under, 5½ d. lb.; Cows (first) 60 lbs. and up, 7d. lb.; 59 lbs. and under, 6-5-8d. lb.; (second), 60 lbs. and up, 5d. lb.; 59 lbs. and under, 5d. lb.; Bulls (first), 4½ d. lb.; (second), 3d. lb.; Kips (first), 5½ d. lb.; (second), 4½ d. lb.; (third), 3½ d. lb. Calcutta Market. Prices in rupees per 20 lbs. —Arsenic hides (cows): Agrad, 7 to 12-8; Durbhanganas, 6 to 7-8; Patnas, 5 to 6-8. Salted cows: 4-8 to 7. Arsenic hides (buffalo): 3 to 7-8. Skins: Calf, 8 to 10 per 20 lb.; goat, 180 to 220 per 100 pieces.

Miscellaneous.—Cotton (American), 12-15d. lb.; Egyptian (Sakel), 18-10d. lb.; jute (first grade c.i.f.), £36 15s. ton; jute (lightnings), £33 15s. ton; Oilseeds: Linseed (La Plata), £19 9s. 6d. ton; palm kernels, £17 8s. 3d. ton; castor seed (Bombay), £17 19s. ton; sesame seed (China), £26 15s. ton; soya beans £12 11s. 3d. ton; Oils: Linseed £43 7s. 6d. ton; olive (Spanish) £77 ton; rape (crude), £43 5s. ton; soya £40 5s. ton; petroleum, 1s. 4½ d. gallon; petrol, 2s. 1d. gallon; fuel oil (ext-tank), 71s. 3d. ton; coconut (Ceylon), £38 15s. ton; cotton (crude), £42 5s. ton; ground nut £45 15s. ton; Rubber: Plantation (No. 1 Crepe), 7½ d. lb.; smoked sheet, 7½ d. lb.; fine hard Para, 10½ d. lb.

The transfer books of the 5 per cent. debenture stock of the Anglo-Persian Oil Co., Ltd., will be closed from June 19 to June 30 inclusive.

On the occasion of the second Orient Fair at Bratislava, which will be opened on July 9, the Czecho-Slovak Federation of Industries and the Commercial Federation will hold their congresses.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

121. Exporter of Greek Ores in Athens, especially of purest quality Magnesite and Chromite wishes to be connected with interested British Firms.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from oversea buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

SHIPPING INTELLIGENCE.

DEVELOPMENT OF BRATISLAVA AND KOMARNO.

In a statement to the editor of a Viennese Magyar paper, M. Vaclav Jirik, a prominent official in the Czecho-Slovak Ministry of Public Works, gave some interesting particulars, says *Lidové Noviny*, with regard to the development of the Czecho-Slovak Danubian ports of Bratislava and Komarno. The harbour at Bratislava, he stated, was planned to accommodate three million tons, and by the end of July it would have seven cranes at work. By that date also the winter harbour and the jetty would be complete. If the winter harbour proved to be inadequate, work would soon be started on an extensive landing stage for industrial purposes, which would provide ample space for large factories. The monthly trade of the port, he added, now exceeded the whole of the annual trade before the war.

With regard to the harbour at Komarno he said that its importance was increasing daily. The Danube at Komarno was deeper than at Bratislava, and was, therefore, more convenient for steamers and tug-boats. The swiftness of the current and the accumulation of sandy deposits between Bratislava and Komarno resulted in the loss of much time and cargo tonnage. Were adequate railway communications to be installed in the harbour at Komarno it would be possible to unload goods there more quickly than at Bratislava, and there was a general opinion that the trade potentialities were greater at Komarno than at Bratislava.

He added that he thought it was absurd to argue about the competitive merits of Vienna, Bratislava or Budapest as regards the future headquarters of shipping transport on the Danube. The goods themselves would decide as to the best route. The nationality of harbours or vessels would not weigh with business men, the decisive factors for them being security and rapidity of transport.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis :—

Anchor Line.—S.s. Circassia for Bombay (Liverpool June 23).

Anchor Brocklebank Line.—S.s. Maihar for Port Said, Colombo, Madras and Calcutta (London, June 20); s.s. Manaar for Calcutta (Birkenhead June 22); s.s. Malancha for Calcutta (Birkenhead, July 1); s.s. Malakuta for Port Said, Colombo, Madras and Calcutta (London, July 4).

Bibby Line.—S.s. Leicestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, June 21); s.s. Herefordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, July 5).

Clan Line.—S.s. Clan Colquhoun for Colombo, Madras and Calcutta (Birkenhead, June 15).

Cunard Line.—S.s. Syria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, etc. (Glasgow, July 13).

Ellerman Line.—S.s. Gerano for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, June 16); s.s. Malatia for Gibraltar, Varna, Melilla, Malta and Alexandria (Liverpool, June 21); s.s. Andalusian for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Ancona, Venice and Trieste (Liverpool, June 22).

Ellerman's "City" Line.—S.s. City of York for Calcutta (Birkenhead, June 16); s.s. City of Norwich for Bombay and Karachi (Birkenhead, June 22); s.s. City of Baroda for Calcutta (Birkenhead, July 1); s.s. City of Exeter for Calcutta (Birkenhead, July 17).

Ellerman's "Hall" Line.—S.s. City of Karachi for Bombay, Karachi and the Punjab (Liverpool, June 5).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, June 15); s.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, June 29).

Harrison Line.—S.s. Matador for Calcutta (Liverpool, June 9); s.s. Collegian for Calcutta (Liverpool, July 3); s.s. Electrician for Port Said, Port Sudan, Aden, Mombassa, etc. (Birkenhead, July 13).

Henderson Line.—S.s. Sittang for Port Said and Rangoon (Birkenhead, June 28).

Holt Line.—S.s. Mentor for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 8); s.s. Titan for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 15); s.s. Troilus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29); s.s. Hector for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29).

Johnston Line.—S.s. Incemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, July 5).

Moss Line.—S.s. Esneh for Casablanca, Gibraltar, Algiers, Malta, Famagusta, Beyrout, Haifa, Jaffa and Port Said, (Liverpool, June 17); s.s. Karnak for Gibraltar, Algiers, Malta, Piraeus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, June 26); s.s. Sitra for Gibraltar, Algiers, Malta and Alexandria (Liverpool, July 1).

Papayanni Line.—S.s. Grodno for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, July 5).

P. and O. Line.—S.s. Nyanza for Colombo, Madras and Calcutta (London, June 16); s.s. Kaiser-I-Hind for Bombay (London, June 16); s.s. China for Bombay (London, July 14); s.s. Plassy for Bombay (London, July 28).

P. and O. British India Line.—S.s. Nevasa for Bombay and Karachi (London June 16); s.s. Moravia for Colombo, Madras and Calcutta (London, June 23); s.s. Mantola for Bombay and Karachi (London, June 30); s.s. Hatipara for Colombo, Madras and Calcutta (London, July 8); s.s. Merkara for Bombay and Karachi (London, July 14).

Prince Line.—S.s. Sailor Prince for Tunis, Malta and Alexandria (Manchester, June 17); s.s. Tudor Prince for Malta and Alexandria (London, June 28).

INDIAN RETRENCHMENT COMMITTEE.

The following gentlemen have consented to serve on the Indian Retrenchment Committee over which Lord Inchcape is to preside :—Sir Thomas Catto, Bart, C.B.E.; Mr. D. M. Dalal, C.I.E., Member of the Council of India; Sir Alexander Murray, C.B.E.; Sir Rajendra Nath Mukerjee, K.C.I.E., K.C.V.O.; Mr. Purshotamdas Thakurdas, C.I.E., M.B.E. The Committee, including the chairman, will thus consist of six members. Mr. H. F. Howard, C.S.I., C.I.E., Indian Civil Service, Controller of Finance at the India Office, will be Secretary. Mr. R. A. Mant, C.S.I., Indian Civil Service, will supervise the preliminary work, which is now being carried out by the administrative departments of the Government, in advance of the assembling of the Committee.

It is now estimated that there are thirty motor vehicles in Crete.

Persia's imports from the British Empire during 1920-1921 amounted in value to 365,927,422 krans while Persia exported to the British Empire goods to the value of 106,738,646 krans.

ANCHOR LINE
First-Class Passengers only.
LIVERPOOL TO BOMBAY.
KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

CIRCASSIA, JUNE 28.	MASSALIA, SEPT. 8.
OLYMPIA, JULY 18.	ELYSIA, SEPT. 20.
CASTALLA, AUG. 9.	CIRCASSIA, OCT. 20.
SCINDIA, AUG. 22	OLYMPIA, NOV. 7.

Anchor Line (Henderson Brothers), Ltd
 16, Gracechurch Street, London, E.C.3.

TRADE OF CONSTANTINOPLE.

Large Imports from America.

The following extracts are taken from a recent report received by the Imperial Ottoman Bank :—

Constantinople, May 22.

The imports of the past week have attained an importance unusual in the past two months. America this time takes the first place in the imports list. The following arrivals are recorded from that country (the figures representing tons) :—flour 14,040, sugar 1,200, cabots 280, cotton and cotton goods, 100, various oils 450, petrol 1,300, benzine 360, condensed milk 100, clothing 80, salted fish 30. The imports from Great Britain are 14,500 tons of coal and coke, 750 bales of cotton goods, 420 barrels of mineral oils, and 1,900 cases of various liquors and foodstuffs.

Despite the importance of the arrivals of flour there has been no reduction whatever in prices, the explanation of which is to be found in the fact that considerable quantities reaching this market are re-exported to the Russian ports.

PROMISING BUSREH DATE CROP.

A report received by the Imperial Ottoman Bank from Busreh dated April 22 states :—The prospects of the coming date crop are good, and the yield promises to be much in excess of that of last year. The stocks of the two best qualities (Khedrawi and Hellawi) in London are almost depleted, but there remain 150,000 cases of the 3rd. quality (Sayers) still unsold there. As far as can be judged thus early the quality of the Sayers crop this year will be somewhat inferior to that of last year. On the other hand the Khedrawi and Hellawi crops promise to be of exceptional quality and the latter variety of great abundance.

MANCHESTER COTTON REVIEW.

The cotton trade review of the Imperial Ottoman Bank for the week ended June 10 states :—

This market having been virtually closed during the past week there is nothing whatever to report with regard to yarn and cloth.

Raw Cotton.—The Liverpool market was open on Tuesday, Wednesday, and Thursday, but business has naturally been on a small scale in view of the closing of Manchester. Reports from New York regarding the growing crop continue to be pessimistic, and prices there have advanced, Liverpool, of course, having adjusted accordingly. Closing prices are as follows :—American fully middling 12.45 d., Egyptian fully good fair 19.25 d.

The Duchcov-Podmokly (Dux-Bodenbach) Railway held its general meeting on April 29. After an allowance amounting to 2 million crowns for wear and tear, and 4.5 millions for a special construction fund, it was decided to distribute the net profit of 2.5 million crowns in the form of a 10 per cent dividend. It was also decided to transfer the headquarters of the company to Prague.

Oil Notes & News.

ANGLO-PERSIAN OIL REFINERY.

Undertaking of National Importance.

With the formal opening of the Anglo-Persian Oil Company's new refinery at Llandarcy, South Wales, on June 29 by the Rt. Hon. Stanley Baldwin, M.P., President of the Board of Trade, there will be brought to virtual completion a national enterprise of the greatest interest and importance. It is one, moreover, in which the British taxpayer as the holder of two-thirds of the Ordinary shares of the company—the most fortunate investment our Government has ever made, not even excepting the Suez Canal—is closely concerned. It touches him also in another way, because the purpose of the refinery is to supply the British public with the best oil and the best bye-products of oil obtainable anywhere in the world for transport, lighting and industrial purposes.

The erection of the refinery marks an innovation of the highest moment in the oil industry. For the first time crude oil will be refined into its constituents—petrol, aviation spirit, kerosine, lubricating oils, wax, and so on—six thousand miles away from the source of production. Nothing like that has hitherto been attempted, but the success of the experiment is already assured by the excellence of the plant and of the vast organisation behind it. In perfection of lay-out, in efficiency and economy of operation, the refinery is the last word in scientific construction. With its tank farm and other storage installations, including the area at the docks and the company's model village, it covers, roughly, 659 acres. Three years of continuous work and some £3,000,000 have gone to the filling up of this great gap in our national industrial equipment.

Installations.

Viewed from the heights beyond Swansea, the refinery and its adjuncts at the port provide an interesting panorama. This begins with two storage tanks for oil fuel, situated close by the jetty at the harbour entrance, so arranged that ships can bunker without entering the harbour. The main installations commence however, within the harbour. Here one of the three docks, known as the Queen's Dock, has been devoted to the uses of the refinery, and three jetties, of which two are in operation and the third rapidly approaching completion, have been built for the service of the oil-tankers which bring the crude oil from Persia. It will thus be possible for three vessels at a time to berth, and simultaneously discharge or load their respective cargoes.

Pipelines laid from these jetties carry the crude oil or refined products to and from transit tanks, eight in number, each with a capacity of 10,000 tons, which form a tank farm on an area adjoining the docks. This "transit site," as it is called, is designed to provide for rapid unloading or loading of the tankers, the crude oil being pumped by the ships' own pumps into the transit tanks. From these powerful direct coupled centrifugal pumps, driven by electricity, force it to the tank farm adjoining the refinery, distant about four miles. Similarly, quantities of the refined products for shipment around the coast or abroad are stored in the transit site tanks, and from these pumped into the tankers at the docks. The total storage at this subsidiary tank farm amounts to no less than 20,800,000 gallons.

Loading and Unloading.

The operation of unloading a 10,000 ton tanker of crude oil takes approximately only 12 hours with this efficient installation, and loading operations can be carried out with the rate of 500 tons per hour of any product, so that a 10,000 ton vessel can load in 20 hours. It is interesting to know that oil unloaded one day can be at the tank farm on the following day, go through the refinery the next, and in the form of fuel oil be back at the docks ready for shipment on the third day.

The pipelines used in conveying the oil range in size from 8 to 12 ins. in diameter, according to the product they are designed to carry. There are six of them running from the tank farm to the transit site, two being utilised for crude oil and the remainder for other products, such as petrol, kerosine, fuel oil, etc. Altogether there are 34 miles of these large-diameter pipes required for transit to and from the refinery, apart from the miles in the refinery itself. All the pumps are electrically driven, power at the transit site, where the motors are driven by a 3,300 volt current, being supplied from Swansea, while the current use at the refinery is all generated there.

Storage Capacity.

There are no fewer than 33 tanks in use on the main tank farm, 25 of these, each holding 10,000 tons, being for the storage of crude oil and fuel oil. For kerosine (more generally known as paraffin or petroleum oil) there are four tanks, each of 5,000 tons, and the same number of similar size for the storage of petrol. The total storage capacity of the farm is 75,000,000 gallons.

At the refinery the most noticeable detail of the plant is the immense water-storage tank, situated at the highest point of the property. The reservoir which feeds it has a capacity of 13,000,000 gallons, which immense quantity of water is required daily for the steam plant and the stills. Surmounting the water tower is a look-out from which every part of the refinery property can be seen, a search light fitted here permitting observation to be made at night.

In planning the refinery every advantage has been taken of the knowledge gained from practical experience in other refineries throughout the world and from the studies of the company's staff of research chemists, who have for some years past been closely examining the properties of Persian oil with a view to securing the best possible results. The result is a plant embodying all the latest improvements and designed to give products of the best and most uniform quality, produced on the most economical basis possible. The excellence of Persian crude oil, with its high percentage of petrol and other valuable constituents, has simplified the solution of these problems, since it is actually easier to produce from it the higher grades of petrol than the inferior qualities, because the production of the latter would necessitate a further operation.

Fuel Consumption.

The total fuel consumption of the plant is at an extremely low figure. The direct waste of oil which used to be a common defect of refineries, has been eliminated entirely, and fuel costs are kept at the lowest level by an efficient method of heat inter-changers, the hot distillate being run through pipes in such a way as to give up a large percentage of its heat waste to the cold crude prior to this entering the stills. An idea of the care taken to conserve heat may be gained from the fact that in cold weather snow remains unmelted on the pipes which carry steam from the boiler house to the various units surrounding it, thus showing the perfection of the insulation methods employed.

The great boiler house contains six furnaces, with space for two more. In general, oil-firing is the method employed throughout the refinery, this being invariable in the case of the stills where direct heat is utilised. For heating the stills the Kermode steam type of oil burner is used, while the Howden pressure system is that employed in the boiler house, which, in addition to providing steam to drive the turbo-generators of the electricity plant, furnishes steam for use in the stills. There are three generators producing the electric current which is used for driving the oil and water pumps, for lighting the entire plant and the staff houses at Cefn Park, and for the electrolytic processes in the refinery itself. The generators are of 3,300 volts each, producing 10,000 horse-power.

Throughput of Crude Oil.

Though there is a daily throughput of crude oil at the present time of 2,000 tons, which will soon be increased to 3,000 tons (or roughly 1,000,000 tons per year), the visitor to the refinery sees no oil exposed in the whole course of his tour through the plant. The method of continuous distillation is that employed, the oil going through the various stills in which the various products are separated in a continuous flow.

Of the crude oil the lighter portion is taken out in the first process, and later is re-distilled to produce petrol and kerosene. The remainder is fuel oil of excellent quality requiring no further treatment.

The re-distillation of the lighter portion of the oil referred to yields approximately 60 per cent. of benzine and 38 per cent. kerosene. For production of the petrol of commerce the benzine is first washed with caustic soda to deodorise it and remove sulphur, and after again going through the stills gets its final treatment in the hypochlorite plant. Common salt solution subjected to an electrolysis process is the basis of this treatment, the hypochlorite so formed having a chemical affinity for sulphur, which it extracts from the crude petrol without, as in other processes, destroying or weakening the hydrocarbons, which are the most valuable constituent of petrol for power-producing purposes,

and the one which renders benzol so popular with some consumers.

For treatment of the kerosene—the lamp oil of every-day use—it is only necessary to run it through large filters filled with granular bauxite, a material having properties somewhat similar to Fuller's earth. Sulphur and colour are removed by this process.

At present about 30 per cent. of the fuel oil is further refined, and from it are produced gas oil, used by gas companies to improve the illuminating quality of gas, and a heavy oil producing paraffin. This latter is again split up to produce lubricants and wax, leaving a residue of pitch.

Wax production is a complicated process requiring elaborate equipment, which includes an extensive refrigerating plant and filter presses. A large and efficient plant has been provided for this process, and another for production of the wide variety of lubricants demanded by industry, for which Persian oil provides an excellent base.

Oil refining is essentially a chemical process, and the laboratory at Llandarcy is an important item of the plant. Here nearly 1,000 routine tests of oil in every process are made each day to ensure uniformity of product.

The present throughput of the refinery is upwards of 15,000,000 gallons per month, but this will shortly be considerably increased. The daily production of petrol is about 450 tons, and when fully operating this refinery by itself will be able to supply at least one-third of the total consumption of the country.

In addition the company has a refinery in the Persian Gulf, with a capacity of more than double that of the one at Llandarcy, and is also erecting refineries in Scotland, France and Australia.

A Complete Organisation.

With the installation of these refineries the company will have a complete organisation for dealing with petroleum in all stages of its progress from the production of crude at the wells to the delivery of the refined products to the consumers, including transport by pipe-line and tank vessel, refining, and distributing in any quantity by road, rail or water, down to the familiar "B.P." can.

One of the many advantages of refining in the country where the products are to be sold instead of in the country where the crude oil is produced is that it enables the refiner to supply the precise quantity required by each merchant, and also to manufacture at first hand all the various valuable by-products of petroleum, which yield large profits, such as special qualities of lubricants, paint and dye spirits, vaseline, various qualities of waxes, candles, etc. The manufacture of many of these by-products is not practicable at the sources of production owing to climatic difficulties, the cost of packages and transport for the finished goods as compared with transport in bulk to the consuming markets of the crude oil, and various other difficulties. Consequently the manufacture of these articles under previously existing conditions has to a large extent been carried on as secondary operations by middle men.

ALGERIAN OILFIELDS.

Advices have been received from the Societe Algerienne des Patroles de Tliouanet—in which the Algerian Oilfields is so largely interested—that the production for the month of May was 147,000 kilos. It is also reported that drilling is proceeding on well No 23 (Medjillah), which has reached a depth of 85 metres, and on well No. 25 (M'Silah), which at the end of May had reached a depth of 259 metres, drilling is proceeding

ROUMANIAN OIL AREAS.

The Late Mr. Kennedy Jones's Interests.

It is not generally known that the late Mr. Kennedy Jones, M.P., was the owner of a number of carefully selected oil areas in the leading oilfields of Roumania. A lease on the Moreni field was already producing over 30 tons per day when the works were destroyed by the military authorities in 1916. A considerable quantity of new plant had been purchased for the reopening of these wells at the time of Mr. Kennedy Jones's death last year. These properties, with an important additional area, are now being organised for public issue, and this will probably be made about the middle of the current month. The board will include Mr. W. Kennedy Jones (son), who is thoroughly acquainted with the properties. With the exception of £5,000, the whole of the purchase consideration is being invested by the vendors in shares of the company, and they are also underwriting a substantial

portion of the working capital. The Anglo-Scottish Finance Corporation, Ltd., of 16, Eldon Street, E.C.2, are making the issue, and they are prepared to receive applications in connection with sub-underwriting.

COMPANY NOTES AND REPORTS

Mortgage Company of Egypt.

The report of the Mortgage Company of Egypt for the year ended March 31 states that after providing for interest on the 4½ per cent. first charge debentures and on temporary loans, and applying a sum of £1,500 in writing down the value of the freehold premises of the company in Cairo, the accounts show a profit for the year of £96,354 15s. 4d. Deducting the amount of the dividend paid and accrued on the 5 per cent. preferred shares to March 31, viz., £50,000, there remains a balance of £46,354 15s. 4d. Adding the amount brought forward from last year's account, £43,249 4s. 6d., there is available for distribution a total sum of £89,603 19s. 10d., which the directors propose to allocate as follows:—

(1) To payment of a dividend of 12 per cent. being 3s. per share, on the amount paid up on the ordinary shares (less income tax), £30,000; (2) to special reserve, £15,000; total £45,000, leaving a balance to be carried forward to the next account, subject to excess profits duty (if any) of £44,603 19s. 10d.

The restriction imposed by the Egyptian Government on the area to be cultivated in cotton, during the summer of 1921, combined with adverse conditions for cultivation, resulted in the lowest crop that the country produced for many years past. Prices, although more stable during the realisation of the crop than in the previous year, did not compensate for this lower production and the general results have been only moderate. The instalments in arrear, owing to the causes above mentioned, show a substantial increase: but with the reserves proposed or already made, it is considered that any doubtful cases are provided for. Notwithstanding the unfavourable conditions stated above, demands for loans, at one time more active when the heavy fall early in the year 1921 of the price of cotton took place, remained within reasonable proportions, the increase in the total amount outstanding, as compared with the previous year, being £244,176. During the financial year, the company purchased an additional amount of £9,200 nominal of its 4½ per cent. first Mortgage debentures. The total amount of debentures now purchased amounts to £740,900 nominal, of which £648,480 have been cancelled, the balance £92,480 being held in investment account.

Owing to the change of control from the United Kingdom to Egypt, Sir Henry Babington Smith has resigned the chairmanship of the Board, and V. Harari Pasha has been appointed in his place. The directors wish to record the valuable services rendered to the company by Sir Henry Babington Smith as chairman of the board, and are pleased to inform the shareholders that the company will continue to benefit from his co-operation as chairman of the London Committee. According to the Articles of Association, as recently modified, a London Committee has been constituted, consisting of Sir Henry Babington Smith, G.B.E., K.C.B., C.S.I., Brig.-General The Hon. Everard Baring, C.V.O., C.B.E., Sir William E. Garstin, G.C.M.G., G.B.E., and Col. The Hon. Sidney Peel, D.S.O., M.P. The two directors who have elected to retire in order to reduce to four the number of directors resident in the United Kingdom, in conformity with the provisions of the Articles of Association, are Mr. E. W. P. Foster, C.M.G., and the Hon. Algernon H. Mills. The board very much regret the retirement of these gentlemen and desire to offer them their sincere thanks for the services which they have rendered to the company since its formation. A proposal will be submitted to the shareholders for providing suitable compensation for loss of office. Mr. T. A. F. Critchley, Sir William E. Garstin and Col. The Hon. Sidney Peel who retired by rotation, were re-elected at the general meeting held in Cairo on May 17. Sir F. T. Rowlatt, K.B.E., Mr. T. S. Richmond, and Mr. T. F. Stevens, who had been appointed by the board as directors of the company and who retired at the above-mentioned general meeting, were also re-elected.

Meeting, Cannon Street Hotel, E.C.4., June 22, 2.30 p.m.

British Burmah Petroleum.

The directors of the British Burmah Petroleum Company, Limited, have declared an interim dividend at the rate of 9½ p.c. p.a., free of income tax, payable on July 7, to shareholders on the books of the company on June 21, in respect of the profits for the first six months of the current financial year. The foregoing dividend being for six months only will amount to 3 1-8 per cent. (free of income tax) or 3d. per share.

A cablegram has been received from Burma reporting that the production of crude oil by this company and the Rangoon Oil Company, Limited, for the month of May, 1922, amounted to 74,434 barrels.

NOTES OF THE WEEK.

The Return of the Prince.

By the time these lines are in print the British public, we may hope, will have been able to welcome back to England the Prince of its heart. In the warmth of the greeting that awaits him His Royal Highness may be able to find some consolation for the strenuous service that he has performed on the Empire's behalf during the last seven months. The tour has been no mere picnic. Much has been made in the public press of the sport and social recreations with which the more official part of the Prince's programme has been interspersed; but the whole undertaking has meant hard work, and, it is to be feared, not always in the most congenial circumstances. There has been a tendency in some quarters to inveigh against the lack of consideration shown by the Cabinet in subjecting the Heir to the Throne to the ordeal through which he has passed. Theoretically there was much to be said in favour of the Prince's including India in his Empire tour, and it would always be debatable whether at any given moment the disadvantage of affording the malcontents an occasion for airing their disloyalty would outweigh the advantages accruing from the timely support accorded to the loyal Moderates by the Prince's presence. On the balance the tour can hardly fail to have been a success. In the case of Egypt, it is regrettable that anyone should have so misjudged the purpose of the Prince's visit to Cairo, as to imagine that it ought to have been omitted because of Egyptian disaffection towards Great Britain. The Prince responded to the loyal invitation of the British residents, who have surely been sufficiently tried of recent years to have deserved the honour conferred upon them by His Royal Highness.

The Near Eastern Settlement.

The visit of M. Poincaré to London affords the Allied Governments a further opportunity for an agreement on Near Eastern affairs. As a preliminary to the new discussions the British Government is reported to have proposed to France that one of two courses should be adopted; either that the Governments of Athens, Angora and Constantinople should be given a certain period within which to accept the peace proposals formulated last March, or that the Allies should at once throw up the sponge as far as the attempt to settle the Near Eastern question is concerned, and—publish the correspondence. Such a crude suggestion would imply the bankruptcy of Allied diplomacy, and we can only

hope that the report is not accurate. The March proposals laboured under the disadvantage of representing an attempt to save something of the Treaty of Sèvres. It would be ludicrous, if it were not so pathetic owing to the results being prejudicial to British interests, to watch the British Government still trying to find a settlement out of ideas that formed the basis of that unworkable Treaty. All but one or two of those ideas have had to be abandoned; but the Government clings to these last illusions, apparently under the impression that its face will be saved, if only a single clause of the Treaty can be incorporated in the final settlement. The obstacle to a settlement does not lie only in the intransigence of Angora; it lies also in the failure of the British Government to realize that prejudice and passion make poor substitutes for knowledge and reason in dealing with the Near East. Almost the only point now at issue between Angora and the Allies is Adrianople; neither knowledge nor reason has prompted the Allied attitude on this particular question.

The Allies and Angora.

The advantage of a further discussion on Near Eastern affairs would depend on whether either of the parties was nearer an appreciation of the facts of the case than they were some months ago. France has yet to show that she realizes the unwisdom of encouraging the Turks to believe that they will always be able to play off one Great Power against another. Her views of a settlement have all along been closer to actualities than those of the British Government; but she has done her best to prevent them from being accepted by dealing direct with Angora behind Great Britain's back. There can be little doubt that the difficulties of Angora are accumulating with the lapse of time. This circumstance has given rise to the suggestion in some short-sighted circles that the moment has now come for bringing the Kemalists to reason, and it is proposed that, as the Greeks are not able to do this single-handed, the Allies should avail themselves of the services of the Roumanians and Yugoslavs. Such a project merely repeats the fatal arguments that led to the Greek landing and subsequent advance into Anatolia. The Kemalists may be beaten on the field of battle; but the world would be no nearer permanent peace in the Near East, if the settlement perpetuated injustices, which sooner or later must lead to unrest. Thanks to French encouragement Angora has overdone its part; its present difficulties will make it anxious to shed non-essentials, but are not likely to weaken its hold on the principle of nationality.

Italy and Albania.

An unfortunate incident at Durazzo, where an Italian building was raided and roughly handled by an Albanian crowd, is a reminder that the two peoples have not yet buried the hatchet. The Italian Government adopted such a wise attitude towards the Albanians when the latter proved by force of arms that they were resolved to attain real independence, that there seemed to be good ground for supposing that the relations between the two countries had been permanently established on a satisfactory footing. Recent happenings in Albania, however, showed that some Italians at least were not prepared to accept a Hands Off policy in Albania. Doubtless as a reaction against these intrigues comes the Durazzo outrage. The facts are not quite clear. During their military occupation the Italians had set up a post and telegraph office in the town, and apparently, instead of closing it altogether when there was no longer any justification for a foreign postal service, they proposed to hand the office over to the Lloyd Triestino, the State shipping organisation. The Albanian populace had no right to take the law into its own hands, and Italy will feel compelled to exact satisfaction for the offence. But it is to be hoped that the whole matter will be carefully investigated, to see whether it is necessary to wound Albanian susceptibilities by maintaining an Italian post office, however camouflaged, on Albanian territory.

Zionism and Palestine.

To stick to one's guns can be a very fine thing ; but it may in certain circumstances betoken mere obstinacy and crass ineptitude. To the last category, we fear, belongs the foolish reiteration by the *Jewish Chronicle* of the Zionist creed in regard to a National Home. In a recent article the organ of Zionism writes :—

"The Government may limit the implications of the Balfour Declaration. It may cramp and confine Zionist policy in Palestine. But in the long run the decisive voice will be with us Jews. And the Jewish people will determine—at least, for our part, we have no hesitation in believing that it will determine, come what may—that it will once again become restored as a nation in Palestine, that it will make of Palestine a Jewish Commonwealth, as Jewish as England is English. That is the Jewish meaning of a National Home for the Jewish People, and in the ultimate it stands to reason that the interpretation of the phrase by the Jewish people must prevail."

By general admission a healthier atmosphere prevails in Palestine ; because it was beginning to be realized that the Extreme-Zionist attempt to interpret the expression "Jewish National Home" as entailing a purely Jewish State had been repudiated by all sane Jewish opinion. The foolishness of the Zionist organ will only strengthen the hostility of the Arabs and render more difficult a compromise that might satisfy the moderates on each side. A further statement on the subject by the British Government, if it can be expressed in clear, unequivocal language, would seem to be called for, in order that the Arab Delegation may return to Palestine and prepare for co-operation under the Mandate, which is due for ratification within a few weeks.

The Indian Budget Debate.

Last week's debate on the Indian Budget presented no features of outstanding interest. Lord Winterton's opening exposition of the situation did not go far below the surface, but it was adequate to the occasion, and offered few targets for criticism, while the speeches which

followed were to a great extent mutually destructive, and there was no suggestion of an impending division to secure the interest of the House in general. To say so much as this is not, however, to assert that the House is not anxious regarding the future : it would probably be nearer the truth to say that English legislators, unlike their younger brothers in India, understand that talk is not really wanted at the present juncture. A great experiment has been started, some of the worst initial obstacles to its success have been removed or surmounted, and the thing to do now is to watch how it works, and avoid distracting the attention of the men who have it in their charge. We wish there were the slightest prospect that such an excellent example should be followed in India.

The Services and Reform.

An interesting feature of the debate was Sir Thomas Bennett's declaration, based on his personal experience, that the *malaise* affecting the Civil Service in India is felt by Indians as much as Englishmen. Our own information is to the same effect, and there are now sufficient Indians in the Service to make the matter practically important. It is indeed natural that Indians should resent the change in their position resulting from the constitutional reforms. Young Englishmen are not born bureaucrats, though in a favourable environment some of them manage to acquire the habit tolerably well. On the other hand, young Indians of what were once the ruling classes have bureaucracy in the blood ; they joined the Service with the idea that their business was to take part in the autocratic administration with which they were familiar ; and it is in fact harder for them than for Englishmen to learn to take orders from an ignorant electorate. The reality of the difficulty may be gathered from the fact that Indian Ministers are themselves becoming bureaucratised ; some of them already look more like "Permanent Heads" than Ministers, and there is undoubtedly some danger that when the next elections are held, they will find themselves in an altogether false position.

The New Constitution for Burma.

The House of Commons last week formally approved of the draft rules which are to bring Burma into line with the various provinces of India, and unless unexpected difficulties should arise in the Lords, the new Constitution may now be taken as settled. The reformed Burmese Legislature will, however, be very different from those which now exist in India, because the wide franchise, including of course women, will make it a democratic body from the outset, while in India the masses have not yet been enfranchised. Apart from the franchise, the most striking feature of the rules is the transfer to Ministers of the control of the forests, which cover so large a proportion of the country. Successful forest administration requires most of all the gift of balancing the future against the present ; you must look somewhere about a century ahead, and if constitutions could be based wholly on theory, forests would be the very last thing to hand over to a successfully established democracy. Their transfer to an utterly inexperienced democracy on the day it gets the first taste of power is at any rate a striking proof of good faith : it may easily prove to be a huge economic blunder, but we hope the first Ministers to be appointed will be sufficiently enlightened to effect a reasonable compromise between popular demands and the requirements of their scientific staff.

THE WEEK AT HOME.

Monday Evening.

A Dull Parliament.

There was an interesting discussion in the House of Commons last week on the new Cabinet Secretariat, but otherwise Parliament has been excessively dull. The chief interest has really been in the signs of revived activity in the Die-Hard Conservative camp, which is raising a campaign fund through the *Morning Post*. The appeal is being very successful, but I gather that the Die-Hards have yet to create a proper administrative organisation. No doubt this will come in time, as it is essential to any real political success.

The Irish Constitution.

The amended Irish Constitution has been well received. It contains several novelties, including an infusion of the Socialist idea of Functional or Vocational Councils—an attempt to unite the old idea of regional representation with the occupational theory, which will be watched with some interest. It differs radically from the British Constitution, not only in being written, but in providing that constitutional amendments can only become effective after a referendum.

These points are mainly of interest to professed constitutionalists; what the public as a whole has fastened upon is the fact that the Constitution explicitly acknowledges the supremacy of the British Crown, and requires every member of the Irish Parliament to take a definite vote of allegiance. This provision, therefore, disposes of a great deal of the dissatisfaction and uneasiness which have hitherto been felt in this country on the subject of the Irish Treaty; although it is idle to pretend that the Collins-de Valera compact has not weakened the hopeful feelings of six months ago, and the Constitution and the oath have consequently evoked no such feelings of enthusiasm as the original treaty.

But the very fact that the Constitution provides this definite test of allegiance is reported to have decided the Irish Republicans to refuse to accept it. In fact, it is difficult to see how Mr. de Valera can do so on his record, and some of the extremists have openly declared already that they will have nothing to do with it. The gunmen, of course, and the Bolsheviks will not touch it; all they want is anarchy and the invasion and destruction of Ulster.

If Irish opinion can assert itself, the situation can be saved; and the Constitution, which is theoretically good, will be practically workable; if it allows itself to be terrorised again, then the position will remain hopeless. Opinion here tends to be pessimistic as to the power of Ireland to work out its own salvation; the events of the last six months have disillusioned us all.

Home Political Prospects.

There is no longer any talk of a general election this year; admittedly nobody and no party organisation wants it. The present prospects are that Parliament will rise as early as possible in August, and meet again in October for an autumn session. But the course of business depends mainly on events in Ireland; so far as can be seen, foreign affairs are not likely to disturb the Government's peace for the present. After the Grand Concert of Genoa the taste for international music has perceptibly weakened, and The Hague opens as a very poor anti-climax.

The True Case.

The outburst of controversy over the True case shows no signs of dying down, and columns of letters appear in the newspapers every day. But a great many of the public seem less concerned to discuss the merits of the case than to attack Professor Freud, of psycho-analytic fame; and it is astonishing to see what extraordinary ideas some people have as to what constitutes psycho-analysis. The fact that it is a new idea probably accounts for a great deal of its unpopularity; but after all the denial of moral responsibility is really an old idea in a new guise—it is simply predestination stripped of its theological attributes and applied to psychology. There is a strong scientific case for determinism, but I am illogical enough to feel that it ought not to be permitted to excuse the burglar who takes my spoons.

The fact is that whether freewill is an illusion or not we run the world on the assumption that freewill exists; and on this the lawyers will always beat the doctors—if only because there is no difference of opinion among lawyers, whereas every doctor disagrees with every other doctor. It is, by the way, rather curious to reflect that fifty or a hundred years ago every pulpit would have joined in this controversy, on the ground that the Church, and not the law or medicine, was the real guardian of morals. I have not heard of a single sermon being delivered on the subject: the oracles are dumb.

Prayer-Book Changes.

But the Church itself is changing. The new marriage service, which already appears in the Canadian (Anglican) Prayer Book, and will probably be adopted in the English Liturgy, contains many alterations. It significantly omits the declaration that matrimony was "instituted of God in the time of man's innocence"; it deletes or softens the rather gross words as to the purposes of marriage that have caused many a bride to blush at the altar; but I notice with amusement that it still includes that meaningless word "obey, which every woman swears—and promptly forgets."

In the proposed Burial Service, the words "our vile body" are changed; and phraseology is adopted which might be construed into a prayer for the dead, by those who so desire. This is primarily an effect of the War, when such prayers, although officially unauthorized, became very popular. There will probably be some protest against the change by the Evangelical party.

A Dull Ascot.

The Press had announced the most glorious Ascot for many years past, and the picture papers were full of the wonderful frocks that were going to be worn there. Nobody thought of the weather breaking; but on Tuesday morning the meeting opened in a downpour, Burberries covered the triumphs of the dressmakers, and umbrellas protected—or ruined—the magnificent hats. The racing, which is a mere detail at Ascot, is understood to have taken place successfully, but there were heavy hearts among the ladies at this black treachery by our fickle climate. The first three days were wet and cold, and the only real fashion parade was at Waterloo station before the rain started.

Changing Fashions.

I gather from a lady who is an authority on these matters that Ascot definitely marked a new fashion era; in other words, the return of the longer skirt and the large hat. For the last two or three years the less a woman wore the more fashionable was she—I heard an evil rumour that a Bishop's wife had even shown her ankles, to which one could only say *credo quia impossibile*—but now it appears that the worm propriety has turned, and outraged modesty is to have an innings.

Personally I could never see anything very immoral in the short skirt, but its real disadvantage is that so many women cannot afford to show their feet—which, according to some authorities, are a sterner test of good-breeding than faces. A milkmaid, it is said, may be as pretty as a duchess, but her instep gives her away.

THE NEAR AND MIDDLE EAST.

From Our Own Correspondents.

EGYPT.

Cairo, June 9.

The King's Birthday.

The Birthday of King George V. afforded a further opportunity for demonstrating the political change which has taken place. For the first time since the War the occasion was not celebrated by the Egyptian Government as an official holiday, and it was noteworthy that, while all the Diplomatic Agencies hoisted their flags, no such courtesy was observed by any of the Government offices. The traditional garden-party was held at the Residency and in view of the decision of the Egyptian Government no longer to celebrate the day the guests were restricted to residents of British nationality, no Egyptians on this occasion being included in the invitations. The party was a great success. The beautiful gardens were absolutely at their best, and for once in the way there was no trace of the "Khamsin" which in former years generally attended this annual event. On Monday His Majesty King Fuad gave a banquet in honour of the High Commissioner and Lady Allenby, who returned the compliment at the Residency two days later, the Ministers, Adly Pasha, General and Lady Congreve being amongst the guests on each occasion.

The Consular Corps Incident.

There are signs that the Consular Corps incident reported last week will have a speedy and satisfactory conclusion. The Egyptian Government has issued a note explaining how the incident arose and has given assurances that there was no intention of touching the Capitulatory régime. The Diplomatic and Consular Corps appear quite content with the explanation and an arrangement satisfying the dignity of the Consular Corps and meeting the views of the Egyptian Government will shortly be announced. It may be mentioned that the

communiqué referred to above particularly emphasised that, although the incident occurred in connection with the Bairam receptions, the Court had had nothing to do with it.

The Cave Murder.

The inquiry into the murder of Bimbashi Cave is progressing slowly, but, I understand, satisfactorily. The great difficulty with which the authorities are having to contend is the disinclination of eye-witnesses or of any of those who know anything about the case to come forward. This disinclination to give evidence is ingrained in the Egyptians, who with difficulty are brought to appear as witnesses even in the most ordinary cases. When to this natural timidity there is added the "pillorying" and personal violence to which they fear they may be subjected by the student class, if they give evidence in political cases, one can perhaps understand this attitude, though this deplorable lack of public spirit scarcely redounds to the credit of a nation which claims to rank among the civilized countries of the world.

What is undoubtedly adding to the difficulties is the attitude of a large portion of the vernacular press. The latter during the past week has published article after article, which in the circumstances are not only in the worst of taste, but give evidence of a mental outlook which, since it represents the view of the bulk of the educated classes, is hardly calculated to reassure the foreign communities in regard to the protection of their interests. Those who pose as the moulders and representatives of public opinion appear indeed to be far more concerned with making temporary political capital out of each episode as it occurs than with the consideration of the wider issues involved by it.

Great satisfaction has been expressed by the British community at the news that the Egyptian Government has at last agreed to pay the compensation demanded on behalf of the widow of Mr. Aldred Brown, who will receive the sum of L.E. 10,000 in addition to her pension. We now wait to hear that a similar decision has been come to in the case of Bimbashi Cave, the position of whose widow is all the more serious seeing that she has a young son of ten to educate, who is now at a school in Eastbourne.

The following details of Bimbashi Cave's career and extracts from his diary may prove interesting. Born in 1874, he was originally intended for the Church but the spirit of adventure was in him and at the age of eighteen he ran away from home and enlisted as a private. At the end of his seven years' engagement he left the Army, in order to strike out afresh; but on the Boer War breaking out, he immediately volunteered. A fearless and expert horseman, he fought in many of the battles and took part as a sergeant of a Cavalry troop in the relief of Kimberley, which he was one of the first to enter. His diary contains the following note of this event. "The great Cecil Rhodes came out to greet us. He was riding a grey horse and was so overcome with joy that he fell off!"

In 1901 he joined the South African Constabulary as sergeant, but was retrenched in 1907. He regarded the Constabulary as a splendid force. "They not only helped to still the spirit of hate of khaki which the Boer naturally felt, but also, I can truthfully say, fostered a feeling of respect and gratitude. In fact we were their doctors, their veterinary surgeons, legal advisers, postal officials and even on occasions were asked to officiate at baptisms and funerals. We had a splendid spirit in the Force and splendid material to work on, most of the troopers originally being old Public School boys. Nearly all the N.C.O.'s. and men were gentlemen and all were sportsmen."

Promoted to the rank of Troop Sergeant-Major, he was selected to command the body-guard of the High Commissioner, Lord Milner, a post which he held for eighteen months, at the conclusion of which Lord Milner

CAIRO STATION.

presented him with a handsome cigar-case. In this connexion his diary contains the following note. "Every morning Lord Milner went for a ride; he rode fairly fast and went some distances out and I was sometimes afraid that the Boers might waylay him. I remember going down with him to meet Mr. Joseph Chamberlain and we all went on to Pretoria. Once we went to Irene, a lovely Boer farmhouse about twelve miles south of Pretoria. I was rather nervous as the place had been raided by Boers only two days previously. I only had twelve N.C.O's. and men with me and we slept all round the house in skirmishing order—a sentry on each side, with his relief near him. I had given orders that anyone approaching should be made to put up his hands and halted. I myself took post under His Excellency's window. It was a very dark hot night and after dinner Lord Milner came out into the garden for a stroll, as was his custom. One of my sentries not knowing who it was made him halt and hold up his hands and shouted loudly for me. I nearly had a fit, but the High Commissioner was very nice about it and told the story subsequently to the amusement of his listeners."

Subsequently Bimbashi Cave received a commission and was posted to a mobile column; but in 1907 he decided to seek pastures new and came to Egypt where he took service as Head-Constable in the Alexandria mounted police. He threw himself heart and soul into his work and by reason of his conscientiousness and ability fought his way up to the rank of Bimbashi. He did excellent work during the war on the Canal and as A.P.M. at Suez, and because of his efficiency and personality was selected as one of the Assistant Commandants of Police in Cairo in March, 1920.

As can be seen Bimbashi Cave was typical of the class of Englishmen who have made the name of Britain what it is throughout the world, and it is for this reason all the more deplorable that he should have lost his life as a result of such a cowardly attack, though his manner of "going out," on duty and with full military honours, was thoroughly in keeping with his character and was undoubtedly what he would himself have wished for.

The New Oriental Secretary.

Mr. R. G. Gayer-Anderson, who has just been appointed Oriental Secretary at the Residency in Cairo, has seen considerable service in Egypt. He started life as a doctor, entering the R.A.M.C. in 1903 and joining the Egyptian Army in 1907. Interesting himself in tropical medicine, he was appointed to the Sudan Sleeping Sickness Commission and later carried out leprosy and anthropological research in Southern Kordofan and other parts of the Sudan. About ten years ago he abandoned medicine and became Assistant-Adjutant-General for recruiting. During the war Mr. Gayer-Anderson was present at the attack on the Canal and served at Suvla and Anzac, being subsequently attached to the Arab Bureau and acting as Political Officer on the Red Sea littoral. During the 1919 troubles he served as Chief Political Officer for Upper Egypt and carried out the investigation in the Deyrout train murders. In 1920 he retired from the Army to take up the post of Senior Inspector to the Ministry of the Interior, from which he has now been transferred to the Oriental Secretaryship. Mr. Gayer-Anderson received the Sudan medal and the Mejidia for his services with the Tagoy Punitive Expedition in 1910 and he held the third class of the Order of the Nile, as well as the Nahda of the Hejaz.

PALESTINE.

Jerusalem, June 11.

Opponents of the Mandate.

As illustrating the working of the minds of certain Palestinian Arabs at the present moment, the following extracts from their Press are instructive:

Es-Sabah (organ of the Palestinian Arab Delegation) on May 19, commenting on the last session of the League of Nations at Geneva, writes in a leading article: "The telegrams do not, of course, mention the reason which urged England to hasten the confirmation of the Mandate, but we think that it was the outbreak of the re-

bellion in Syria, and fear lest this spirit of revolt should spread to Palestine also. England wished the League of Nations to ratify the Mandate immediately, believing that this would assure us that there was no longer any possibility of emending the terms of the Mandate. There is no doubt that this is what England believes, owing to the slight faith it has in our national spirit. Hence it adopts such tactics."

The writer then goes on to discuss the French activities in Syria, and urges the formation of a Pan-Arab Congress, representative of Mesopotamia, North and South Syria ("South Syria" being the Arab Nationalists' name for Palestine), the Hejaz and the Yemen, to be held in an Arab City free from foreign interference. Jedda is suggested as the place. The Congress should occupy itself with military, political and economic questions, and raise revenue from all the Arab States. "This act would form the first tangible step towards an Arab Empire, and would count as the first shrewd blow from our side against those invading Powers which strive to apportion out and break up our territory—far more powerful than all the blows which our protests have hitherto given them. If such a Congress be formed, there will no longer be any reason to attach importance to anything which the invaders of our countries may resolve."

About the same date another Jerusalem paper, *Bet el-Makdes*, ascribes the attempted hastening through of the ratification to Lord Balfour's alarm at the success of the Arab Delegation in London "which had succeeded in proving to the British public the general harm that would result from the carrying out of the cursed promise in Palestine; and because he was afraid lest his Declaration should come to nothing" if the Delegation remained in England and persisted in its efforts. "This old man," the article continues, "did not go to Geneva of his own will or at the request of his Government: it was Weizmann and his colleagues in London who urged him to this. The Zionists imagine that the confirmation of the Balfour Declaration by the League of Nations will compel our Delegation to return and that its return will kill the patriotic spirit, and that the Arabs will come to an agreement with the Zionists, and that the Zionist flag will wave over Palestine upon its Churches and Mosques, and that the dream of Herzl will become solid fact. But they are mistaken. If they gave the matter a little more thought they would understand that, should the Delegation return—which God forbid!—unsuccessful, there would take place here a terrible catastrophe and a great calamity. If the present movement be changed for another, and if other leaders take charge of the nation, to-morrow's sun will bring on its wings what we would

rather not see in this land, renowned for its peace and quietness in the past.

"It is known that our Delegation is at present negotiating with the British Government, and the Government's agreement to send the old man Balfour to Geneva to seek the ratification of the Palestinian Mandate at the self-same moment when it was negotiating with our Delegation, was an act of cunning and deceit unworthy of such a noble race and famous Government as Great Britain.

"We give notice from this stage that if the League of Nations confirms the Mandate, our Delegation has nothing more to do in England, and must pack up its traps and return to us. It will be received by us with honour and gratitude for all that has been done; it will explain to the people what it has accomplished; and then publicly, in the face of the world, it will proclaim its resignation from the duty imposed upon it by the people. Then the Moslem-Christian Associations, clubs and patriotic societies will break up, the leaders resign, and testify to the European world of what has happened in Palestine, while they will refuse to accept any responsibility for events that befall the country from that day onwards. Then let Balfour come, and Weizmann and his fellow Zionists, and let them quieten the people of Palestine and ensure the peace of the country."

There is much of this kind of thing now being published in the local Arab Press. Where feelings are so inflammable we question the wisdom of the Government in passing such things by in silence. Such sentiments can be interpreted as harmless, but the Jews here see in them open threats of violence, threats disregarded and therefore (such is the Jewish mentality) not discounted by the local Government.

The King's Birthday.

The King's Birthday was officially observed in Palestine last Monday, June 5, instead of June 3. It took the form of Military Parades, official services of Thanksgiving, and Receptions by the various District Governors. In Jerusalem the Moslem element, at least the majority of it, refused to take any part. Life is certainly hard even for the most well-meaning and judiciously poised Government in a country like Palestine. June 3, the actual date of the King's birthday, fell this year on the Jewish Sabbath. The Government, in its consideration for orthodox Jewish scruples, which will not permit the practising Jew to use any vehicle for travelling on the Sabbath, thought fit to postpone the official celebrations till the following Monday. Whereupon the Civil Secretary receives letters of thanks from the Grand Rabbis and strong formal protests from the Moslems, who point out that though last year the date fell on a Friday, their holy day, no thought of shifting the observance of the day ever passed through the head of the Government! Thereupon the Moslems press home the charge that the British Administration is entirely under the thumb of the Zionists.

We understand that even the Book of Common Prayer, in view of local susceptibilities, had to be bowdlerised at the official service held at the Cathedral. The form of service used was that of "The King's Accession"; and the Old Testament Lesson there appointed is the first chapter of Joshua. But its Zionist sentiments were found to be so extreme that a few innocuous verses from the Book of Proverbs had to be substituted.

The Point of View !

But for sheer cranky wrongheadedness it would difficult to surpass the following. The Civil Secretary and Acting High Commissioner, Sir Wyndham Deedes, has always shown an interest in the Jerusalem "Young Men's Christian Association," believing it to be a means of affording wider interests to the Jerusalem youth, of whatever community. Recently, with his encouragement a series of lectures on Islam, Judaism and Christianity was given in the Y.M.C.A. premises by well-known representatives of each faith. About the same time a branch of the Y.M.C.A. was opened by Sir Wyndham at Jaffa. Whereupon the best of the Palestinian Arab papers (*Palastin*, Jaffa) solemnly accuses the British Administration in Palestine of a desire to

provoke disunion between the Moslems and the Christians: "On the one hand," the paper says, "the Government endeavours to found branches of the Association for Christian young men, and on the other hand, it gives permits to establish branches of the National Moslem Association. Furthermore, by lectures on the three religions, it has opened the doors of religious quarrels."

YUGOSLAVIA.

Belgrade, June 13.

The Royal Wedding.

The Royal Wedding is now over. For over a week all activities were concentrated on this great event. The festivities began on Monday, June 5, with the arrival of the Duke of York and the Spanish Infante. The reception given to the first royal visitors, but especially to the Duke of York, was a warm, full-hearted, Slav-like welcome! Long before the arrival of the Royal Train the streets were overcrowded with people, who had come from all parts of the country to see the wedding of their King. For the train carrying the Duke of York, accompanied only by Colonel Waterhouse, the King, Princes Arsene and Paul, and Princess Helena were already at the station awaiting. After the inspection of the Guard of Honour, the cortège drove off to the Palace, the King and the Duke of York being in the first motor-car. Full honours were paid by the troops, which had lined the streets from the station to the Palace. The Duke of York wore the uniform of a Naval Commander, and his happy boyish face incited the crowds to cheer themselves hoarse.

The next day the Royal bride arrived with her Father and Mother. The Roumanian Royal Family came up the Danube in their yacht 'Stephan cel Mare.' The escort was provided by the Yugoslav Danube Flotilla as well as by British, French, Italian, and Roumanian monitors and destroyers. The British monitor 'Glowworm' arrived first and in time to fire a 21 guns salute to the Royalties arriving. All along the Danube squadrons of aeroplanes and hydroplanes flew over the vessels, dropping flowers on the Royal Yacht. On the landing stage, the King, the Duke of York, the Infante Alphonse, Princes Arsene and Paul, Princesses Beatrice, Helena and Cira, greeted the Bride and her Family with a very warm welcome. Bread and salt were offered by the Mayor of Belgrade.

The small place reserved by the Committee of Festivities was wholly occupied by high officials, both civil and military. Gold braid and glittering decorations, reflecting a strong June sunlight, gave a picture of old pre-war days, for this was really the first time that the Master of Ceremonies had prescribed full dress.

On Thursday morning salvoes of 101 guns and the ringing of bells announced the wedding-day. All through the night the streets were full of people, and at five o'clock in the morning not a single place was available in the streets through which the cortège had to pass. Belgrade is over-populated as it is, but with 78,000 visitors one could hardly breathe—yet everybody felt happy and cheerful. At ten o'clock the heralds greeted the King going to the Old Palace to take his Bride. A long stream of the National Cavalry, headed by the Royal Standard Bearer, moved off towards the Cathedral. They were all dressed in the picturesque costumes of their respective provinces. The Standard Bearer, a young stalwart Montenegrin, looked particularly smart in his scarlet gold-embroidered tunic, with gold and jewel-mounted old pistols and *yatagan* in his belt. Bosnian riders reflected the glory and richness of the XVI. Century. The Croats, with their black dress and feathered tam-a-shanter, left nothing to be desired either in their dress or mounts. The Serbs were last to come, with no gold or silver, but simple woollen jackets and tight fitting trousers, of the same pattern as they had in 1914 on the battle-fields. Their fine horses, with the riders sitting upright as though nailed to the saddles, made a modest yet inspiring spectacle.

Gala carriages followed, carrying the King and Queen of Roumania, the Duke of York and Prince Arsene, and other Royalties. In the State coach, beautifully decorated with white roses, the smiling Princess Mary drove with her father, the King of Roumania. The cheering reached its climax as they passed by. At the Cathedral door the King and Princess Mary kissed the Holy Bible and an Ikon, and were led to the Altar by the Archbishops and the Patriarch Dimitri, who performed the Wedding Ceremony. The Register was then signed by the King and Queen, the King and Queen of Roumania, and the Duke of York and Prince Arsene as chief witnesses.

In the afternoon there were a brilliant military review and football matches. The Queen's Cup remained in Belgrade and the King's Gold Cup went to Bucharest. The same evening the happy couple left for Bled in Slovenia, where they are spending their honey-moon.

Now, after eighteen years, Belgrade Court has a Queen, and the domestic happiness of King Alexander will be a guarantee for the welfare and prosperity of the nation.

ROUMANIA.

Bucharest, June 10.

Little Entente Conference at Belgrade.

The Roumanian Ministry for Foreign Affairs has sent the local Press the following *communiqué* in connection with the Little Entente parleys at Belgrade: "On the occasion of the royal wedding at Belgrade the representatives of the three Little Entente States, MM. Benes, Bratianu, Duca, Pashitch, and Ninchitch, took this opportunity to exchange views on the various international questions affecting their countries, and it was once more ascertained that their views were in complete accord. After having examined their combined activity at Genoa, which has given favourable results, they then discussed and decided on the attitude to be adopted by them at the Hague Conference. Judging from the importance and usefulness of these conferences between the authorized representatives of the three States, it has further been decided to continue these meetings at stated intervals. In order that the Little Entente may be able to maintain at The Hague the same solidarity as was the case at Genoa, the Polish Government will also be informed of the decisions taken and at the same time invited to approve them." The decisions in question have not yet been made public, but there are grounds for believing that the Little Entente will support at The Hague France's point of view, namely, that only the experts should work at this conference and limit their discussions to a fixed programme, without touching existing international treaties and conventions.

The Roumanian Government have appointed MM C. Diamandi and O. Chiriacescu as their delegates for the Hague Conference. Both these delegates were also members of the Roumanian delegation at Genoa.

Roumania's Foreign Policy.

The Press Department of the Foreign Office in one of its recent bulletins has communicated the following statement on Roumania's general foreign policy:—"The idea which underlies Roumania's foreign policy is Peace. Roumania is pursuing such a policy in agreement with her allies and in close cooperation with the countries of this part of Europe, with whom she has ties of common interests. With regard to Hungary, Roumania is desirous, on the basis of existing treaties, to develop the most cordial relations with the Hungarian State. She considers that political interests permit and even demand the most friendly relations between the two neighbouring countries. As to Russia, it is unnecessary to contradict Roumania's aggressive intentions against the Soviets, for the slightest acquaintance with the interests of the Roumanian people would suffice to understand that the mere thought of attacking Russia would be an act of folly on the part of the Roumanians. To reiterate, Roumania's sole desire is to live in peace with all her neighbours as well as with all other countries, in order to be able to devote her entire

efforts to the task of internal consolidation. The present Government's point of view with regard to the minorities has been clearly expounded on several occasions, namely, to adopt a most liberal policy towards them by respecting all nationalities and creeds. In exchange, the minorities are expected to comport themselves as loyal citizens of Greater Roumania. On this understanding, the minorities can rest assured of the Government's entire solicitude. Preceding Governments, in the face of agitations committed against the safety of the State, had to have recourse to energetic measures. To-day, however, a better spirit seems to prevail among some of the minorities, so that the present Government sees no reason why it should not, in turn, adopt towards them a liberal and beneficent attitude."

The Amnesty Decree.

The political amnesty accorded by the King on the occasion of his daughter's wedding, embraces the following offences:—

(1) (a) Provocation of or participation in strikes for cases punishable by law. (b) Clandestine and public propaganda against social and political order. (c) Spying during peace time. (d) Special offences committed by the personnel, while on duty, of militarized institutions. (e) Infringements of military orders and those committed by Roumanian subjects in violation of the regulations governing the crossing of frontiers. (f) Mutiny. (g) Electoral and press offences.

(2) The following offences are not pardoned by the present amnesty: (a) High treason, save those mentioned above. (b) The offences under No. 1 (a), (b), and (c) committed by the military. (c) Outrages or provocation to outrages.

As a result of the above amnesty, 200 of the accused involved in the present Communists' trial have been set free. There are now about 48 of them still to be tried, chiefly for perpetrating as well as aiding and abetting criminal outrages.

The Royal Wedding.

The bride, accompanied by the entire Roumanian Royal family, left Bucharest for Belgrade on Sunday amid the farewell cheers of the people, who thronged the beflagged and decorated streets leading from the Royal Palace to the station. Princess Marie was visibly touched by the spontaneous cheers of the people, and when the royal train started to move out of Bucharest station, she was so full of emotion in leaving her native town that her eyes filled with tears. The wedding day was celebrated here by divine services in all the churches. There is no doubt that, apart from the happy union between the two royal families, this wedding has great political importance, not only for Serbia and Roumania, but for the whole of Europe, for the personal relation-

ships between the ruling sovereigns of Roumania, Yugoslavia and Greece are bound to have a great influence on maintaining peace in this part of the Continent.

The King and Queen, the Crown Prince and Crown Princess, Prince Nicholas and Princess Ileana returned to Bucharest from Belgrade to-day. The return journey was made on board the royal yacht 'Stefan-*cel-Mare*' all along the Danube as far as Giurgiu.

General News.

The King has bestowed on M. I. C. Bratianu, the Prime Minister, the Grand Collar of the Order of King Carol, in recognition of services rendered at the Genoa Conference.

Owing to the present governmental crisis in Poland, Marshal Pilsudski has postponed his visit to Bucharest.

On H.M. King George's birthday, Sir Herbert Dering, British Minister at Bucharest, and Lady Dering entertained the British Colony to a garden party at the British Legation.

M. Dului Zamfirescu, President of the Chamber under the former Government, while visiting the monastery "Agapia" in Moldavia, died suddenly, having inadvertently consumed poisonous mushrooms. The deceased was, besides a well-known politician, a member of the Roumanian Academy, an appreciated literary man and lately Roumania's representative on the European Danube Commission.

Capture of a Bolshevik Aeroplane.

It is reported from Bessarabia that a Bolshevik aeroplane while flying over the locality of Tighina was forced to land, owing to engine trouble. On the approach of the authorities the airmen attempted to set fire to the machine, but failed. On searching the aeroplane the authorities found a large number of revolutionary pamphlets printed in the Roumanian language. The airmen who are now under arrest, admitted that they had orders to spread these pamphlets all over Bessarabia.

Japanese Delegation in Bucharest.

A Japanese delegation, headed by M. Nobutaro Kawashima, Secretary and Councillor of the Japanese Foreign Office, arrived a few days ago in Bucharest. Its object is to study Roumania's economic conditions and especially the present import and export régime, in view of developing trade between Japan and Roumania. Before leaving this country, the delegation will visit the important industrial centres and especially the oil-fields.

BULGARIA.

Sofia, June 12.

Frontier Incidents.

After a commendably long silence, Bulgaria's neighbours have once more begun a newspaper campaign against them. The Serbians accuse Bulgaria of aiding and abetting the bands of *Komitajis* that are harassing the south-east of Serbia. These *Komitajis* are composed almost entirely of Macedonians and their practice is to rob, ravage, and occasionally kill. That they exist is not denied, but that the Government countenance their existence, is very emphatically denied. Macedonians are wild people, and years ago when Bulgaria had the right to an armed force, it was with difficulty that she suppressed these brigand bands.

To-day Bulgaria is not in a position to keep order either internally or along her frontiers. Her armed forces do not exceed 10,000, and this small body of men does not possess either the prestige or the discipline of former Bulgarian Armies.

The Government has repeatedly pointed out that if the Allies refuse to allow Bulgaria a proper sized defensive force, the responsibility for the maintenance of law and order is beyond their means. The Allies reply that Bulgaria must recruit a voluntary army. The Allies' representatives at Sofia know that this is impossible, but they have not been able to convince their chiefs at London, Paris and Rome. One day the situation will become such that the Allies will be forced to adopt one of the following alternatives:—

Either to leave Bulgaria to herself and be prepared to tolerate a lawless spot in south-eastern Europe.

Or themselves to provide Bulgaria with adequate means of protection. (A very unlikely contingency.)

Or lastly, to revise the military clauses of the Treaty of Neuilly.

The Serbs, the Roumanians, and the Greeks must know that Bulgaria is an easy prey, even although she has succeeded in concealing a few thousand rifles, and even some millions of rounds of ammunition. They cannot have such a poor opinion of their own fighting powers as to imagine that Bulgaria really constitutes a serious danger for any one of them, let alone the three together. This point being admitted, the question presents itself why Bulgaria is not allowed to maintain a defensive force. A good deal is said about any concession to Bulgaria being pounced upon as a precedent by Germany. Have no concessions been made to Germany, not to mention Turkey and the other ex-enemy Powers? Concessions have been made, but as Bulgaria is not allied with any great European Power it is easy for the Big and the Little Entente to inflict on her any measures that they like.

The Government and the Commission.

At the end of last week the Government addressed a Note to the Inter-Allied Commission concerning the payment of reparations. The Note was long and consisted of a recapitulation of the arguments for non-payment of reparations. It also protested against the Convention proposed by the Commission.

The latter have requested the Government to give a definite reply regarding the Convention by July 20, and it is expected that the matter will shortly come before the Sobranye. It will be remembered that two months ago the Inter-Allied Commission drew up a Convention of which the principal points were control of the Customs and the Pernik coal-mine. No one knows what the Government's real intentions are concerning the acceptance of the Convention, but it is thought that a policy of procrastination and delay will be of little use this time. They will have to accept or refuse the Convention, although it is just possible that the Commission may make some concessions regarding the actual money payments during 1922 and 1923. Ten million gold francs during 1922 and thirty million during 1923 are the sums fixed to be paid, but in view of the actual financial situation, a postponement of all money payments is possible.

The Sobranye.

Thursday, Friday, and Saturday of last week were spent by the Sobranye in discussing the question of Wrangel's Army. The Communists attacked the Government for having allowed the Army to enter Bulgaria, the Bourgeois for having intrigues with the Army, and the Army itself for having existed! M. Daskaloff replied for the Government and his speech made a good impression. He said that Wrangel's Army was allowed to enter Bulgaria on the understanding that they were refugees and possessed no military status. M. Daskaloff read out the Ministerial Decree dealing with the entry of Wrangelists, and said that the Government had been forced to take measures against certain Wrangelist officers because the authorities were convinced that a plot had been formulated, having as its object the overthrow of the present Government.

The Communists seemed fairly satisfied with M. Daskaloff's explanation, but not so the Bourgeois. The latter argued that the Government had allowed Wrangel's Army to retain certain arms, and that now the Government were going back on their agreement. The debate became very heated and as usual a great deal of party feeling was shown. In any case it is now apparent that the Wrangelists who are still in Bulgaria are refugees and have no rights beyond those of refugees.

New Mayor of Sofia.

The election of M. Dignikoff, an ex-café waiter, as mayor of Sofia, has after all not taken place. M. Kroum Popoff, a former Government official, has been appointed and entered on his duties last week.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

CROSS AND CRESCENT.

To the Editor of "The Near East."

Sir,—In the June number of the *Contemporary Review* Mr. Harold Spender contributes an article "The Sacrifice of Greece," which is such an *ex-parte* statement on behalf of the Greeks that it calls for a reply notwithstanding that the writer fully realises the magnitude of the task he is undertaking in accepting combat with an opponent of such literary skill as this eminent publicist. It will simplify the issue if Mr. Harold Spender's arguments are discussed in turn as set forth in his article.

In the first place we are told that the Turks have "a finer sense of the insecurity of human affairs" and "a larger experience of the caprice of European statesmen" than the Germans; consequently, whereas the Treaty of Versailles was ratified, the terms of the peace dictated by the Powers at Sèvres were allowed to lie on the table whilst the Turks "proceeded to pull all the strings of European finance which connect Constantinople with Rome, Paris and London." But what a travesty such a description is of the actual facts, seeing that the Porte accepted the conditions which the Treaty of Sèvres imposed, and it was only the Nationalists led by Kemal Pasha who, bruised and bleeding as they were, determined to fight on to the bitter end rather than accept such humiliating terms. Can anything be less magnanimous than Mr. Harold Spender's refusal to give the Turks any credit for their patriotism and his insinuation that Kemal Pasha's action was the result of intrigue on the part of European financiers? Had such patriotism been displayed by a Christian nation, it would have been acclaimed by all, not excluding the enemy, but when the Turks fight with their backs to the wall we are told that "not in vain has Mammon used religion for its own purposes." Such a lack of generosity makes one despair of the eternal quarrel betwixt the Cross and the Crescent ever being allowed to die out; there is always a Crusader ready to stir up the embers! Mr. Harold Spender then reminds us of the "splendid work" accomplished by the Greeks during the final phase of the war and asks why this has been entirely forgotten since M. Venizelos' dismissal from office. But may we not also recall the Greek Treaty with Serbia after the Balkan War? What about the forts that were surrendered and Divisions of the Greek Army interned without firing a shot? Is there no truth in the statement, made by the Bulgarian Staff, of the arrangement concluded for the desertion of several more divisions on the Salonika front (see a correspondent in *The Times* of December 1, 1920)? M. Venizelos must certainly be credited with all earnest endeavours to further the cause of the Allies. But it takes more than one swallow to make a summer, and how many Greeks were there holding with M. Venizelos and how many sitting on the fence only hesitating to throw in their lot with the Germans from fear of our Fleet?

Moreover, was M. Venizelos actuated entirely by his love of the Allies or was it that he was far-sighted enough to recognise that the victory of the Allies meant an extended Grecian Empire? As regards the mandate in Asia Minor was he not also shrewd enough to see that, if he could once get a footing there as a mandatory of the Powers, there was no saying where the Greek boundaries would eventually reach, seeing, as he thought, a prostrate Turkey at his feet? The fact that England was a Mohammedan Power did not trouble him. If the British statesmen failed to realise that thus supporting the Greeks at the expense of the Turks meant trouble in India, why should he enlighten them?

There is nothing to be said against M. Venizelos' action; as a Greek patriot he only did his duty, but do not let us have it paraded as pure philanthropy on his part. Neither let there be any doubt as to the cause of the failure of the Sèvres Treaty, which was brought about by the universal brotherhood of Islam and not by the power of Mammon, as Mr. Harold Spender would have us believe. How little Mammon has had to do with the matter can be gathered from the inspired cables which appear in the Press. If the Nationalist Turks had the power of the purse behind them, would they be such hopeless propagandists compared with the Greeks and Armenians?

Mr. Harold Spender waxes wroth over the blood which has been shed in vain, if the Greeks are not allowed to remain in Smyrna and its hinterland; but he is silent about the Moslem blood of our Indian contingents which contributed so largely to our success both in Palestine and Asia Minor, neither does he mention the assurances which were made by Mr. Lloyd George to these same Moslems.

When the Greeks were making up their minds as to whether it was to their advantage to throw in their lot with Germany or the Allies, what would have happened had the Moslems in our Indian contingents responded to the Jihad preached by the Sultan? Moreover, it should be noted that these Moslems, unlike the Greeks, had no incentive to remain true to their salt; there was no prospect of an enlarged Mohammedan Empire by their doing so. On the contrary all the assurance they got was that the Turks would not be deprived of their homelands. If we fail to keep our pledge, we may possibly find in Mr. Harold Spender's words that "we may arouse in great helpless populations a hatred that may not remain without fruit in years to come." It may even be added "if not in the immediate future."

Mr. Harold Spender may be forgiven his rash polemics, even though he tells us that it was "only the loan of a Greek division which saved our troops in Constantinople and on the Asiatic shore from annihilation at the hands of the Angora Turks." But with Lord Curzon the case is different, and it seems incredible, at all events to the writer, how so able a man with the knowledge of the subject he has had every opportunity of acquiring should have so misjudged the Turkish question as to have got us into this *impasse*. But, like the late Lord Bryce and other statesmen whose training should have made them hold broader views, many appear to regard the Turks as assassins and murderers without any redeeming qualities. They entirely ignore the cause of these massacres and the fact that for the past half century the so-called Christian minorities have been vying with each other to make any sort of government by the Porte impossible. Further that the Christian Powers have in turn been aiding and abetting these rebellious subjects of the Turkish Empire. What does M. Chedo Miyatovitch, a former Serbian Minister, testify on this subject:—"Political interests make us (the Balkan nations) paint the Turks as cruel Asiatic tyrants incapable of European civilization. An impartial history will prove that the Turks are rather European than Asiatics and that they are not cruel tyrants, but a nation loving justice and fairness and possessing qualities and virtues which deserve to be acknowledged and respected" (*Asiatic Quarterly* of October, 1913). Mind you, this too, from a diplomat who, if anything, should be prejudiced against the Turks.

In 1878 Lord Salisbury gauged the situation correctly when in a despatch to the British Ambassador suggesting the occupation of Cyprus he stated that "emissaries of intrigue will in due time be followed by invading armies," and that it was in the interests of our Indian Empire "to stop this encroachment by force of arms if necessary." But alas, when the master mind of Disraeli ceased to control our policy the Russians were allowed free scope and the Christian minorities worked out their schemes "according to plan." The Porte in despair and more from ignorance than malice resorted to extreme

measures to keep its unruly subjects in order with the consequences we all know.

Few now stop to inquire why, if the Turks were such inhuman monsters, Greeks and Armenians should have elected to live cheek by jowl with them all these generations. What is more, they would do so again in the future freed from the interference of the neighbouring Christian States. The Greek and Armenian traders are as essential to the welfare of the Turkish peasant as the peasants are to the Christians who have made their home in Asia Minor. And if by some miracle or other means these so-called Christians could be regrouped and entirely separated from the Turks, in a very short time Greek traders and artisans would be found establishing themselves once more in the Moslem centres. But to return to Mr. Harold Spender's article and his contention that if the Greeks are not permitted to remain in Smyrna and its hinterland, France has no right to occupy Tunis or Morocco—and should we add England to her overseas possessions!

But does Mr. Harold Spender really argue that because some two years ago when Europe and Asia were both in a state of flux the Greeks had colonies in Asia Minor (the "cradle of the Christian religion" adds this Crusader!) this gives them prior claims over the Turks? If so why draw the line at Asia Minor? Surely the Ptolemy period in Egypt gives them still stronger claims to that country, to say nothing of the conquests of Alexander the Great in Persia and India? If indeed we are to go back to that period for our title-deeds, there would be many claimants for what is now known as the British Isles!

In this connexion it may not be without interest to quote Gibbon: writing of the Crusades and the Emperor Alexius he states that Alexius got himself thoroughly disliked by the Western Powers because "whilst the Crusaders with blind valour advanced into the midland countries of Asia the crafty Greeks improved the favourable occasion . . . to seize Smyrna and enemy islands! Altogether Alexius created a precedent for M. Venizelos to follow in 1920. Thus for the second time in history we find the Greeks, in the words of Gibbon, "playing the part of the jackal who is said to devour the leavings of the lion."

Again, although Mr. Harold Spender finds the Treaty of Sèvres "amazingly just and moderate" Mr. Aubrey Herbert in a recent letter to *The Times* considers that "the first and chief sufferers from the Treaty of Sèvres were the Christian minorities, and it is our continued and solitary support of the Treaty that is the main source of danger to our Allies King Hussein and King Faisal." Whom are we to believe?

In the same letter Mr. Aubrey Herbert further states that two courses are open to us: "We must either achieve these ends *vi et armis* or negotiate the safety of the minorities." Surely there can be no question which is the saner method?

Finally Mr. Harold Spender urges us to remember that it was the Powers who sent the Greeks to Asia Minor, and argues that the position is so complicated by our having done so that we must either support the Greeks or call in the assistance of the League of Nations to administer the country now in Greek occupation. This is the situation foreseen by M. Venizelos when he pressed the services of the Greek army on the Allies: but our Cabinet must certainly be bankrupt of all statesmanship, if it allows itself to be a second time manoeuvred into so false a position. Once more quoting Mr. Harold Spender, we should have proved ourselves "too weak and feeble to carry out the finest tradition of our race."

I am, etc.,

C. E. C.

June 11, 1922.

It is stated from Madras that the Government of India scientific mission to observe the solar eclipse will, owing to the inability of the Ceylon Government to give facilities to the party to stay at the Maldiv Islands, require to go to the west coast of Australia, although the former is a better site for the purpose.

STORM WAVES IN THE MOHAMMEDAN WORLD.

Under the above title an address was given by Sir Valentine Chirol to a large audience of the Central Asian Society at the Royal United Service Institution, Whitehall, on Thursday, June 15. The Right Hon. Lord Carnock, P.C., G.C.B., was in the chair.

Sir Valentine Chirol said that he proposed to give a brief survey of the history of the relations between East and West, with special reference to the part which Turkey has played in the Islamic world and the influence which the possession of India has exerted upon British policy towards Turkey. He characterized Mr. Rudyard Kipling's saying that "East is East and West is West; and never the twain shall meet" as a somewhat narrow generalization which has certainly ceased to be true, and over the long range of history has never been fundamentally true. Our Western civilization as far back as we can trace its origins was hammered out from its very inception in constant contact, often in violent conflict, with the East, *i.e.*, with so much of the Eastern world as the Western world then knew. West and East exchanged not only heavy blows but vital ideas. In peace and in war they acted and re-acted upon each other socially and politically, morally and materially, and if one takes a broad survey of the results, we must admit that on the whole the honours were fairly well divided. The Roman Empire, even more than the Greek colonies of Asia Minor, projected Western influence into the East, but from the East it received Christianity which, though often obscured and perverted to unworthy uses, henceforth provided the ethical basis of Western civilization. The sixth century, however, introduced an entirely new factor into the relations between East and West with the first emergence from the deserts of Arabia of the one great religion of the world which armed itself from its birth with a sword. During the four or five centuries when a new Saracenic civilization under the Khalifs of Damascus and Baghdad, of Cairo and Cordova, shed such imperishable lustre on Islamic history, Turkey was yet unborn. The Ottoman Empire only came into being in the thirteenth century with a new race of Eastern conquerors who picked up the Koran on their way from their heathen homelands in Central Asia. With the growth of Turkish power the leadership of Islam passed from a Semitic race intellectually highly gifted and with an innate capacity for progress, to a Turanian race, virile indeed but dull-witted, narrow and rigid, to whom the Mohammedan creed appealed mainly as an instrument of domination based upon the sword. It was with the coming of the Ottoman Empire, built up on the ruins of earlier Mohammedan States in Asia no less than on those of Christian States in Europe, that the relations between the West and the East assumed a character of irreconcilable antagonism.

Nothing that the Turks ever did in the heyday of their power, Sir Valentine Chirol continued, was to have such momentous consequences for our own race as their conquest of Egypt. For their possession of Egypt and their piratical sea-power all through the Mediterranean closed the last avenue through which Europe had kept up, mainly from Genoa and Venice, a precarious but lucrative trade with the mysterious countries of the distant Orient. The sea-faring nations of Western Europe were driven to seek a way round over the hitherto untravelled ocean. The opening of new routes to India and the Far East not merely out-flanked the Turkish obstruction to intercourse with the East, but it brought the West for the first time into contact with another East, alien indeed also, but entirely different from the East which Greeks and Romans had known or which had confronted Europe in the dark ages when Islam had first opened out of Arabia. In India the West found itself in presence of a Hindu civilization more ancient and far more rigid than its own. The Moghul Empire still held the greater part of India under Mohammedan domination, but it differed in many respects from the type of Mohammedan domination which Europe had come to associate with Ottoman rule. Just when Queen Elizabeth was granting to her London "Merchant-Venturers" the charter out of which the East India Company grew up, the latest Mohammedan dynasty to set up its domination on the ruins of its many predecessors was represented by a ruler of real constructive genius such as the Turks never produced, the Emperor Akbar. When the Hindus raised the standard of revolt against the decaying Moghul Empire the East India Company at home set its face sternly against any sort of interference in Indian quarrels. It was not until India became one of the chief theatres of conflict between Great Britain and France that the British people as well as the Company awoke to the fact that Great Britain would have to take up the inheritance of the moribund Moghul Empire or see it pass into the possession of her great European rival. Whilst British rule was moulding India into a new shape, Great Britain lost her dominant position in America, and the axis of her foreign policy was shifted from West to East. The safety of India became a constant preoccupation of British statesmanship.

In the meantime Turkey had undergone a complete change in the general scheme of international values. It was no longer her strength but her weakness that threatened to disturb the balance of European power. The decline of the Ottoman Empire had been as rapid as its rise. British statesmanship, whose liberal traditions inclined to favour the movement towards autonomy of Turkey's subject races, was held in restraint by the growing dread of Russia. Successive British Governments hesitated between two policies—either to wash their hands of Turkey and come to a definite understanding with Russia, or to protect Turkey from dismemberment as a bulwark against Russian aggression. We drifted into the Crimean war, and after San Stefano, intervened once more, saving Turkey at the imminent risk of another war with Russia.

India and Turkey.

During all those first three quarters of the nineteenth century, when Great Britain had almost continuously befriended Turkey and twice at great cost to herself saved her, what, asked Sir Valentine Chirol, had been the attitude of the Mohammedans of India? One of them, Jaffur Shereef, who wrote in 1832 his well-known work *Kanoon-i-Islam*, makes no single reference to the Turks or to the Khalifates of Constantinople. It was not until 1878, when we were again on the brink of war with Russia in support of the Ottoman Empire, that Turkey was brought within the immediate range of Indian experience. In that year Lord Beaconsfield despatched an Indian force for the first time into European waters in anticipation of an Anglo-Russian conflict. That spectacular demonstration was perhaps primarily meant to magnify the position of India in the Empire, but it was also meant to magnify Turkey in the eyes of India, and to arouse Indian Mohammedans in particular to a sense of brotherhood with the Mohammedan people in whose defence England was prepared to go to war for the second time with Russia. The Indian troops did not fight Russia, but were recalled from Malta to take part in the war with Afghanistan. Long before it was over the pendulum of British policy swung violently with the downfall of Lord Beaconsfield's Administration in 1880 and Mr. Gladstone's return to power. The Disraelian policy as well as Disraeli was dead when Lord Salisbury succeeded Gladstone in 1885 and frankly admitted that in backing Turkey we had backed the wrong horse.

Sir Valentine Chirol then dealt with the Sultan Abdul Hamid II, and traced the steps taken by him to make the Khalifate, previously little more than an empty title, a living reality, until the high-water mark of Hamidian Pan-Islamism was reached with the Emperor William's public recognition of it in 1898 at Damascus, with the reference to the two hundred million Mohammedans who revered the Sultan as their sacred Khalif. It was just then that the influence of Pan-Islamism made itself felt for the first time on our Indian hinterland. The victories of the Turkish armies over the Greeks had reverberated along the whispering galleries of the East to the greater glory of the Ottoman Sultan and Khalif, and the Sultan's name came to be invoked in the Friday service in an increasing number of Upper India mosques. But although Indian Mohammedans began to take a pride in Abdul Hamid as a great potentate in the Mohammedan world, their loyalty to the British *raj* remained unmoved. Even at the time of Lord Morley's Indian reforms in 1909 the All-India Moslem League, founded as a counterblast to the Indian National Congress, pleaded hard and not unsuccessfully for special safeguards for the Mohammedan community against Hindu supremacy in the enlarged Councils as the well-earned reward of its unwavering loyalty to the *raj*. After tracing the gradual change in the attitude of Indian Mohammedans under the leadership of the Ah brothers, Sir Valentine Chirol continued:—

The Indian Mohammedans go further in their demands for the restoration of the Sultan's authority in the former Arab provinces of the Ottoman Empire than the Kemalists at Angora. The latter base their resistance mainly on nationalist grounds, and Pan-Islamism is merely a second string to their bow. The Turkish Nationalists welcome, of course, the support of their Mohammedan co-religionists wherever it is forthcoming. But even when they themselves revert, as the rulers of Constantinople reverted during the war on a grand scale, to the Hamidian policy of massacre in order to exterminate Christian minorities, they are careful to explain that these have got to be eliminated not on religious grounds but because their existence threatens the safety of the ruling Turkish race.

Can the alliance between Turkish Nationalism and the Indian Mohammedans who have sought to identify the cause of Islam with it endure? The Khalifate movement is no doubt largely controlled by the same revolutionary and destructive forces which the extremist wing of Indian Nationalism represents amongst the Hindus. But for the bulk of Indian Mohammedans, conservative and law-abiding, who have been carried away by it, it doubtless stands for a great religious cause. It may be regarded as a form of religious revivalism. It may also be inspired, as some Hindus are beginning to realise, by a distant hope of restoring Mohammedan domination some day in India when it shall have joined hands across Asia with a Pan-Turanian Turkey. But it lacks the essential characteristics of a nationalist movement. It does not derive in any way from the sense of common nationhood which the nationalists in Egypt or in Arabia claim to have imbibed from the West, and which is already beginning to stir more faintly the Arabs of Tunis and Algeria and Morocco. Wherever the people are Mohammedans, religious antagonism stimulates their impatience of alien political domination, but the one peculiar link that seems to connect Turkish Nationalism with Indian Mohammedanism, besides the temporary conjunction of a spirit of revolt against the British *raj* amongst Indian Mohammedan extremists and Kemalist bitterness against England as the only one of the Allies who cannot apparently be bought off with economic concessions, is a certain affinity of temperament due to the common Central Asian origin of the ruling race in Turkey and of the conquerors who brought Islam into India.

No one has, I think, made of them a more careful and exhaustive study than that which a distinguished American writer, Mr. Lothrop Stoddard, has recently published under the title of "The New World of Islam." The conclusion at which he arrives is that, take them all in all, these movements are destined to regenerate Islam and to endow it with a vitality with which the West will have very seriously to reckon when it once more puts forth its united strength as a "new world of Islam." With all

due deference to so competent an authority I venture to think that neither history nor the conflicting character of many of these movements supports such a conclusion. I do not underrate the potency of the underlying sense of religious brotherhood amongst Mohammedans of different races and sects and schools of thought, nor the old militant spirit seldom more than dormant beneath a surface of passive fatalism. But the brotherhood of Islam has never been translated into united action since the followers of the Prophet founded kingdoms and empires altogether transcending the modest limits of the primitive tribal state from which they emerged. Even when Islam still bore the impress of its Arab origin, successive Khalifates rose and fell in strife and confusion. The Ottoman Empire was largely built up on their ruins and surcharged Islam with the Central Asian stamp under which we have chiefly known it for the last six or seven hundred years. The outward observances of Islam have never affected the difference between the Semitic mind with its rich intellectual endowment and its potential capacity for progress, so brilliantly illustrated during the great period of Saracenic civilisation, and the Turanian or Turkish mind with its stolid obduracy to all the cultural influences which make up a vital civilisation and its inveterate tendency to relapse into Central Asian savagery.

One cannot view without some apprehension the muster of retrograde forces under cover of Turkish Nationalism at Angora and of the Khalifate movement in India, but it is essential to discriminate between them and the more progressive force which over a much wider area, extending from Northern Africa to the Asiatic shores of the Pacific, are working, one must hope, towards a synthesis which would bring East and West together in the interests of racial and religious peace despite the profound differences that still divide them.

MUSICAL NOTES.

GRAMAPHONE RECORDS

We turn now to the vocal records in the June issue of "His Master's Voice Company," and find these redeemed from mediocrity by a magnificent Chaliapine reproduction. The Russian bass is heard in "Still is the Forest," one of Moussorgsky's "Songs and Dances of Death." In the whole literature of music I know of no song intenser than this; it is unequalled in the directness and force of its expression. All the strength of Russia, both superficial and latent, is in this song, and to say that it is worthily sung is to give the highest praise possible to Chaliapine. This is a magnificent reproduction, conveying unerringly the spacious, limitless richness of the voice and the cold, mysterious reserve of power in both song and singer.

I do not understand why Chaliapine's voice should "reproduce" more naturally than Caruso's, but the fact remains that it does, and it is further proved in the tenor's singing of Cottrau's "L'Addio a Napoli." Nothing can gainsay the extravagant splendour of Caruso's moulding of phrase, or the superb and sheer wealth of his voice, but this is an imperfect reproduction, giving the impression of forced and consequently unpleasant tone.

In consideration of the recent revival in London of Planquette's "Les cloches de Corneville," the record made by Renato Zanelli of "Dans mes Voyages" is interesting. This baritone is a real singer, with a fine *timbre*, but an undue strictness of *tempo* makes his rendering a little monotonous. The simplest things commonly need the greatest subtlety in performance, and it is just those touches of variety that this record seems mostly to lack.

From two "Samson and Delilah" songs—"Fair Spring," and "O Love, from thy Power,"—Edna Thornton has made a record that I do not like in the least, but I am not so foolish as here to begin preaching to those who believe in their Saint-Saens. I will only say that it seems to me that Madame Thornton is attempting with exaggerated passion to be squeezing an empty sponge.

There is excellent vocal technique in the duet (as sung by the soprano, Lucrezia Bori, and the baritone, Giuseppe de Luca)—"Vado, corro," from Donizetti's "Don Pasquale." It is sung with fine spirit and finish, and the artistry of the baritone is consistently masterly, though the intonation of the soprano is not absolutely impeccable.

ANDANTE.

NEAR EAST BOOKSHELF.

YUGOSLAV STORIES.

"JUGO-SLAV STORIES." Edited with an Introduction by Pavle Popovic. The Interpreters Series. (New York: Duffield & Co.)

This excellent series of translations of the lesser-known literatures of Europe, of which the Czechoslovak and Modern Greek tales have already appeared, is now enriched by an anthology of Yugoslav stories, selected and edited by Professor Pavle Popovitch, the erudite professor of Yugoslav literature in the University of Belgrade.

While the remarkable Serbian folk-tales have attracted considerable attention in Western Europe, the prose literature of the Yugoslavs has been almost totally neglected, and, so far as we can trace, this is the first attempt to introduce this interesting field to Western readers.

Professor Popovitch's selection includes two tales by Lazarevitch, who is always regarded as the best of Serbia's prose writers, two by Veselinovitch, who follows him closely, with undoubted talent, but less skill, and five other tales each by a different author, including Zmaj-Yovan Yovanovitch, which is an interesting instance of a good poet failing to attain his usual high standard when venturing upon prose. We bow to the authority of Professor Popovitch, but yet feel some doubts as to the wisdom of the selection. In the first place, of the tales by Lazarevitch, "By the Well," in spite of its beauty, was hardly suitable for export, for it seems strange reading to English readers, who will have difficulty in following the psychology. "The People will gild it all" is a finer work, and its appeal is universal, for it deals with the tragedy of the war-broken cripple, and "The Village Priest," which though as intensely local as "By the Well," is a charming picture of village life and a sincere but ignorant priest of the old school.

Of the tales by Veselinovitch, "The Kum's Curse" is certainly powerful, giving a striking picture of the violent mentality of the Shumadian Serbs and an almost painfully realistic account of the flogging of white-haired Uncle Srechko. The other tale by the same author, "Eternity," is interesting, as being the Yugoslav version of Rip van Winkle, but the structure is spoilt by the introduction of a motiveless, unexplained and unnecessary murder. "Povareta," by Matavulj, is a charming story of the life of the seafaring population of the numberless isles of the Dalmatian littoral, while in the tale of the old Turk "Hodja Saleek" we find a welcome humorous relief after the gloom of all the other stories, and in Glisitch's well-known "The First Furrow" we get a glimpse of the struggles of the thousands of widows in war-racked Serbia, though the author died six years before that fatal day in 1914.

The book is marred by numerous misprints, pardonable in the Serbian words, such as *Ladruga* for *Zadruga*, *Labach* for *Shabats*, and one or two others. The translations, by various anonymous workers, are on the whole good and faithful, but the somewhat staccato style of Lazarevitch in particular reads disjointedly and abruptly to English ears. "Povareta" and "Hodja Saleek" run more smoothly, and here, the translators have more successfully avoided the Italian's reproach, *traduttore—traditore*.

On page 33, the nickname of the villain Pero is given as Zelenbach: it would have been more effective to have translated this, and called him "the Green Lizard," which Serbs believe to be a most venomous animal. On page 22, it is startling to read of *groschen* as a Serbian coin, which is suggestive of some unknown German influence. The word is of course the common "*grosh*," the Serb variant of the Turkish *guruh*, a piastre, which would have been a better translation. On p. 128, "minx" would have been better than "coquette" for peasants do not use foreign words as a rule. It is such points as these that make a translation smell of the dictionary rather than of life among the natives themselves.

It is interesting to note that all the tales, carefully selected by the editor, are by Dinaric Serbs, and, of these, except the two interesting Dalmatian stories, and one from Herzegovina, are from Serbia itself. It is a pity that there is nothing from the ever-growing literature of Croatia. Djalski's delightful account of the life of the old landed gentry of Zagorje has not been included in the series.

All who are not afraid of a rather heavy dose of local colour should make a point of reading these tales. It is to be hoped that they will stimulate curiosity and interest in the new field, where there is some good, and much extremely interesting, work to repay study.

SENTIMENTALITY AND SUCCESS.

"THE ENCHANTED CANYON." By Honore Willsie. (London: Thornton Butterworth. 7s. 6d. net.)

At the beginning of this book, Enoch Huntingdon is a boy of fourteen, in a New York slum, "heading," as the publisher's note puts it "straight towards crime and prison." A great deal is made of his callousness, hardness of heart, and lack of response to kindness and to appeals to his better feelings, all of which are due to his surroundings and upbringing. But in a very short time after his rescue by the philanthropic Mr. Seaton, his "blue eyes were as eager and as wistful as a little child's," and "he turned with a smile that was as ingenuous as it was wistful," not, we rather resentfully feel, because a trip down the "enchanted" canyon has really had such an extraordinarily speedy beneficial effect, but because Mrs. Willsie feels that the moment has arrived for some rather more sweetly flavoured sentiment. It is therefore not very easy to be convinced by "Nucky" Huntingdon of Minetta Lane and his conversion. At the end of the book he is Secretary of the Interior, bearing a great political burden and having long confidential talks with the President. We are not sure whether this is more convincing than the beginning, but it is certainly remarkably dull. Luckily, however, in the middle of the book Enoch escapes from his various perplexities into the desert and presently—when he has fallen in with two men who are prospecting for gold, a party who are exploring under orders from the Geological Survey, his own negro servant (comic element), the heroine, who is taking photographs of Indians, and her Indian nurse—Mrs. Willsie lets herself go and they all seem to race along through deserts and down canyons in adventure after adventure. These chapters are full of movement and most stimulating. If the rest is rather stereotyped and lifeless, it has at least a plot which always catches man's fancy from the time of the first fairy tale reading, the story of the Poor Boy who was born to become King. If Enoch does not exactly become King he seems very nearly to become President, also his moral difficulties are solved when he discovers that his parentage is other and better than he supposed. There is a pleasing touch of the fairy tale situation too about the way in which as Secretary of the Interior he is able to reward Milton, who has known him in the desert only as "Mr. Just Smith." Finally he scores off the wicked newspaper proprietor and all his other enemies in the most satisfyingly complete manner.

With such a popular theme, such a popular author and the really jolly chapters in the wilds, "The Enchanted Canyon" is sure to be read and enjoyed by a great many people.

BOOKS RECEIVED.

"Getting the World to Work." By Sir Charles W. Macara, Bt. (Manchester: Messrs. Sherratt & Hughes. 5s. net.)

PERSONAL AND GENERAL.**To-day.**

June 22 (New Style).

June 9 (Old Style).

Shawal 26, 1340 A.H. of the Moslem Calendar.

Sivan 26, 5682 of the Jewish Calendar.

The Shah of Persia has left Versailles for Switzerland.

Prince George of Greece has arrived in Paris from Athens.

Mr. Schuller tot Peursum has been appointed Dutch Minister at Belgrade.

The Hon. Mrs. Patrick Macnaghten has returned to 71, Knightsbridge, from India.

Mr. C. T. Allen, C.I.E., has arrived in London from India, travelling by the P. and O. 'China.'

Gholam Ghows Khan has arrived in London from Berlin to act as Secretary at the Afghan Legation.

Mr. Ronald Firbank has returned to London from Florence and for a few weeks will be at 49a Pall Mall.

Mr. A. R. Banarji has been appointed Dewan (Chief Minister) of Mysore in succession to Sir M. Kantaraj Urs, the Maharajah's uncle.

Colonel D. Kalafatovitch, Military Attaché to the Legation of the Kingdom of Serbs, Croats, and Slovenes in Paris, arrived in London last week.

M. Mastus Ilitch, formerly Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has been appointed Chargé d'Affaires in Albania.

The Earl of Ronaldshay has accepted the offer of the freedom of Richmond, Yorkshire, which will be conferred on him when he returns home from India.

Sir Malcolm McIlwraith, K.C.M.G., K.C., and Sir George R. Lowndes, K.C.S.I., K.C., have been elected Benchers of the Honourable Society of Lincoln's Inn.

The Minister of the Kingdom of Serbs, Croats, and Slovenes, with M. S. Yovanovitch, Secretary of the Legation, has left for The Hague to act as principal Serbian delegate.

M. Dimitri Stancioff, Bulgarian Minister in London, who also represents his Government in Holland, has left for The Hague in connection with the present Conference.

The engagement is announced between Rear-Admiral Raymond Nugent, C.M.G., and Violent Graham, widow A. J. Carew, Indian Police, and daughter of T. F. Leadbitter, of Warden, Northumberland.

The King has given Mr. John Archibald Scott authority to wear the insignia of the Third Class of the Order of the Nile, conferred on him by the King of Egypt in recognition of valuable services.

Lord Allenby moved from Cairo to Alexandria on June 16, for the summer. The Court of King Fuad and

the seat of the Egyptian Government is being transferred there this week.

An exhibition and sale began yesterday and is being continued until July 5 of peasant wares from Czecho-Slovakia, at 92, Victoria Street, S.W.1. Czecho-Slovak and other sketches by Miss Mary Swanzy will be shown.

The annual dinner of the Gurkha Brigade was held at the Grand Hotel last week. Field-Marshal Sir A. A. Barrett, G.C.B., G.C.S.I., K.C.V.O., was in the chair, and seventy officers of the Brigade attended.

Princess Andrew of Greece has arrived at Spencer House, St. James's, accompanied by her daughters Princess Marguerite, Princess Theodora, Princess Cécile and Princess Sophie, and her son, Prince Philip of Greece.

On his way through Liubliana on June 10, H.R.H. the Duke of York received a small deputation, consisting of Dr. G. Gregorin, Dr. Skaberné, M. B. Bogdanovitch, and Miss F. Copeland, of the Yugoslav Society for the Study of English.

King Alexander of Yugoslavia, on his wedding-day, announced in a letter to the Premier his resolve to give a million dinars at once and three hundred thousand dinars annually towards the creation of boarding-schools in his kingdom.

The engagement is announced between Captain H. H. Berridge, R.A.S.C., elder son of Mr. H. Berridge, C.I.E., O.B.E., and Mrs. Berridge, Aden, and Betty, younger daughter of Mr. and Mrs. A. E. Rogers, 24, Charleville Road, Kensington.

The engagement is announced of Mr. Vincent Hart, Public Works Department, Madras, younger son of John S. Hart and the late Mrs. Hart, of Westmere, Western Road, Cork, and Mary Evelyne, daughter of Thomas Sheedy and Mrs. Sheedy, of Fairview, Cork.

A marriage has been arranged between William Lindsay Murphy, Ceylon Civil Service, son of the late Canon R. W. Murphy, and Mrs. Murphy, 42, Eaton Square, Dublin, and Betty Mary, daughter of Lieutenant-Colonel T. Ormsby, D.S.O., and Mrs. Ormsby, of Darroch, Luss, N.B.

The marriage arranged between Hester, youngest daughter of the late Sir Trevor Chichele-Plowden, K.C.S.I., and the Hon. Lady Chichele-Plowden, and Kenneth Gordon, son of Mr. and Mrs. Henry Poland, of Downlands, Bramshott, Hants, will take place in London in September.

The engagement is announced of Edgar Ernest Spencer, of Colombo, late Major, Machine Gun Corps, second surviving son of Charles W. Spencer and Mrs. Spencer, of Woolwich, and Dorothy Mabel, youngest daughter of the Rev. Hubert and Mrs. Griffith, of Glasbury-on-Wye, Radnorshire.

The engagement is announced of the Hon. Ewen Edward Samuel Montagu, second son of Lord and Lady Swaythling, of Townhill Park, Southampton, and of 28 Kensington Court, W., and of Iris Rachel, younger daughter of Mr. Solomon J. Solomon, P.R.B.A., R.A., and Mrs. Solomon, of 18, Hyde Park Gate, S.W.

Under the auspices of the Persia Society, Mr. Victor Mallet was to have delivered a lecture yesterday (June 21) on "Isfahan and Shah Abbas" at the Geological Society's Lecture Room, Burlington House. He was prevented, however, from being present, and in his absence Sir Thomas Arnold, C.I.E. read a paper on Persian Painting.

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

A marriage has been arranged, and will take place shortly, between Captain J. R. Ray Brown, 13-16 Cavalry, I.A., only son of the late Mr. W. Ray Brown and Mrs. Ray Brown, of Lansdown, Bath, and Margaret, third daughter of Major T. C. Toler, of Saltersford Hall, Cheshire, and niece of Mr. R. A. Fox, Yate, Gloucestershire.

At the Church of St. Martha, on the Surrey Downs, above Albury, Lieutenant-Colonel Barnard Cecil Freyburg, V.C., C.M.G., D.S.O., was married by special licence on June 14 to the Hon. Mrs. Francis McLaren. The manner in which Colonel Freyburg won his D.S.O. at Gallipoli while in command of the Hood Battalion is now famous.

A marriage has been arranged, and will shortly take place between Captain L. M. Kerr, M.C., West Yorkshire Regiment, son of the late Colonel J. M. Kerr, and Ellen Beatrice ("Bice"), widow of Captain G. W. Hopton, of Homend, near Ledbury, and elder daughter of Sir Charles Oakeley, Bt., and Lady Oakeley, Frittenden House, Frittenden, Kent.

APPOINTMENTS AND PROMOTIONS.

Major C. J. Galpin, D.S.O., B.A. Oxon (son of Canon F. W. Galpin, rector of Faulkbourne), who has held office in the Air Ministry, has been appointed Financial Adviser to the General Officer Commanding in Palestine, and will take up his residence at Lydda, near Jerusalem, during the coming month.

BIRDS IN BAGHDAD.

By E. S. STEVENS.

"The voice of the turtle is heard in the land."

In spring the hoarse cooing of the doves and pigeons is heard in every garden and from every mosque courtyard. The children, droning the Koran in the first spring warmth while their schoolmaster nods, watch the pigeons outside bowing and cooing in the bright sunshine, or clustering for shelter on the shady side of the great blue dome of the mosque. They know that the pigeon is making his prostration towards Mecca and uttering the holy name; for the pigeon is a hajji, like the stork, "Hajji Lak-lak," who returns year after year to his nest on rooftop or turret. As for the doves, who make vehement protest to each other all through the spring, any Baghdad child will tell you that he is saying—

Rough translation:—

<i>Cucu ukhti!</i>	Coo-Coo, Sister.
<i>Wein ukhti?</i>	Where is my sister?
<i>Bil Hillah!</i>	In Hillah.
<i>Wesh takil?</i>	And what does she eat there?
<i>Barjilla.</i>	Beans, my brother.
<i>Wesh tisharab?</i>	And what does she drink there?
<i>Moy Allah.</i>	Allah's waters.
<i>Wein tenam?</i>	And where does she sleep?
<i>Bab Allah.</i>	At the gate of Allah.

The wild pigeons, who love to nestle on the domes and minarets of the mosques, are called *taier etwarni* and there is a pretty legend about them. When Hussein was killed at Kerbella, the pigeons in pity flew down to mourn. Their feet were imbrued in his blood, and ever since then, their feet are blood-red and featherless. It is they who have aided the decay of the oldest minaret in Baghdad in the Souk el Gazl. Tradition says that the Khalif Mutassem, who built the mosque of which the minaret is the only remaining part, was at his devotions one day when he noticed his attendants chasing away a poor dervish, who had come to say his prayers. He ordered his servants to desist, scolded them for over-zeal, and presented the humble holy man with a purse of money. The beggar gave the Khalif a cageful of pet pigeons, his only possession, in gratitude. The Khalif released them, and they flew off to take possession of the minaret, where they and their descendants have lodged ever since.

In the old days, before the coming of the telegraph,

carrier pigeons were employed to announce the setting out of caravans from Baghdad to their destination, or from Damascus to Baghdad.

The Iraqis are very fond of the *bul-bul*, and in coffee-house and mosque the *bul-bul* sits in his wicker cage, piping out his few melodious notes, liquid and clear. They like to give him a little wine, or a few pomegranate seeds, as he sings more garrulously when he is intoxicated. They interpret his song as a perpetual begging of roses:

Shedda warid

Abu el warid.

"A bunch of roses,

Father of Roses (rose-seller)"

is his plea reiterated incessantly. He is a quarrelsome fellow, the *bul-bul*, with his grey body and black-cap, and the sparrows have great respect for him.

THE STATUS OF THE SUDAN.

If ever the adage that a stitch in time saves nine is true, it is applicable with special force in all dealings with the East or with natives, and we would appeal most earnestly to the British Government to lose no time in settling once and for all the status of the Sudan. In Western countries protracted negotiations on any given subject are understood; the time that can be devoted to a single question is limited in view of the host of other things that demand the attention of a Cabinet or the responsible authorities. It is otherwise in the East; the point at issue is all-absorbing; for the moment nothing else matters. This is the position to-day in the Sudan with regard to its future status, while in Egypt the question is in the forefront of the controversy raging round the terms of the treaty to be made with Great Britain. We can only take the native mind as we find it. There may be ample justification according to British ideas, and judged by all the canons of international practice, for the course of action pursued at this juncture by the British Government; but if it is misunderstood by the Sudanese and trouble ensues, as it has in Egypt and Iraq, Great Britain will cut a sorry figure in her own eyes as well as in those of the world at large. As a preliminary to the consideration of the Sudan question, it is necessary that we should disabuse our minds of the idea that the Sudanese are an inarticulate handful of unsophisticated natives, on whose part any attempt to express or even to hold an opinion may be treated with derision. This complacent view of the stay-at-home is out of date. The inhabitants of the Sudan may still be in a primitive state; but the War has familiarised them with most of the shibboleths of the modern State system, and they are as resolved to hold on to them as are Albanians, Egyptians or the Arabs of Iraq. Moreover on several occasions since the Sudan Delegation came to England in 1919 the British Government has asked the Sudan, or permitted it to say, what kind of Government it desired. On this point it has invariably been quite clear in its own mind and emphatic in all its declarations. It has asked for the elimination of the Egyptian element in the Sudan Administration. When, therefore, after three years the Sudanese see that nothing has been done to remove Egyptian officials, that the latter instead of disappearing, are openly or covertly preaching the disappearance of the British, and that Great Britain not only tolerates the most exaggerated claims on the part of Egypt, but also seems to shirk discussion by making the Sudan a reserved subject, is it to be wondered at that their confidence in Great Britain is being shaken? All the time they are being subjected to various kinds of political, social and religious pressure, where they are not actually the victims of intrigue and intimidation. Such a state of affairs must before long demoralize the best and the most loyal of native peoples; and it is for the sake of avoiding trouble in yet another country for which Great Britain is responsible that we would urge the British Government to terminate without further delay the present uncertainty regarding the status of the Sudan.

There can be no illusions as to the difficulties in the way of immediate action. In the first place, there is

the Egyptian complication. Any seemingly high-handed policy in regard to the Sudan, it may be feared, will jeopardise the prospect of an amicable arrangement with Egypt; it may wreck the treaty altogether, or it may render the position of Sarwat Pasha, the present Prime Minister, impossible and so postpone indefinitely the Egyptian settlement. Further negotiations with Egypt over the Sudan, it may be thought, must prove a delicate matter in view of the Anglo-Egyptian Convention of 1899, and of the fact that the country has been supported financially in the past by Egypt. All these points will have to be settled sooner or later, and there is a strong argument for prompt measures, when it can be shown that delay may add to existing complications with Egypt a Sudan that has become a prey to unrest. It is true that the Agreement of 1899 established an Anglo-Egyptian condominium over the Sudan. In the words of Lord Cromer, who was responsible for its terms, the Sudan was to be governed by a partnership of two, but "England was the predominant member." To understand the Convention we have to put ourselves back into the days when it was drafted. Egypt was still under the suzerainty of Turkey, and the Sudan was nominally an annexe of Egypt. But its reconquest by Great Britain with Egyptian help introduced an entirely new factor into the situation, and the British Government determined that an end must be put to any possible fiction of Turkish suzerainty over the Sudan. It simplified matters to have Egypt associated with Great Britain in the new order; but there was no ambiguity as to where actual control would be vested. The Preamble to the Convention stated that "it is desired to give effect to the claims which have accrued to Her Britannic Majesty's Government by right of conquest to share in the present settlement and future working and development of the said system of administration and legislation." According to Article 2 the British and Egyptian flags were to fly together; but by Article 10 it was the previous consent of the British Government alone that was required before consuls, vice-consuls or consular agents could be accredited in respect of, or be allowed to reside in, the Sudan. When circumstances arise which put an end to the condominium, it would be strange indeed if the territory in question reverted to the country which had had the smaller share in its development, particularly when the people concerned have shown unmistakably their determination not to submit to Egyptian jurisdiction. It is true that Egypt has made herself financially responsible for the development of the Sudan; but there is some force in the contention that the payments may be regarded as premiums paid on a policy of insurance of which Egypt had already received the full benefit.

In January, 1899, Great Britain was anxious to disarm criticism on the part of the European Powers. The nominal association of Egypt in the future status of the Sudan helped to accomplish this; but in the opinion of Lord Cromer it was the firm attitude adopted by Great Britain and her clear intention to carry out her programme regardless of what others might say that won general acceptance for her policy in regard to the Sudan. There can be no doubt that in the same way to-day a firm attitude will overcome all difficulties. The main facts of the case are not in dispute. Egypt claims the Sudan; but the Sudanese will have none of her jurisdiction, and any attempt to enforce it on Egypt's part would plunge the country again into the state from which it was rescued in 1898. On the other hand the interests of Egypt in regard to the Nile water have to be safeguarded. So long as the Sudan question remains unsettled, the Egyptians will feel obliged to put forward exaggerated claims. The position of any Ministry will be compromised only if it abandons those claims after negotiation; if it is confronted with Great Britain's decision as an accomplished fact, attention in Egypt will soon be distracted from the Sudan to more pressing affairs at home. An immediate settlement, therefore, will be of genuine assistance to the Moderates of Egypt, among whom the present Ministry must be reckoned; it

will be of lasting benefit to the Sudan, and it will save Great Britain embarrassment and expense. The present status of the Sudan, in Lord Cromer's words, was "the child of opportunism"; and he added: "should it eventually die and make place for some more robust, because more real, political creation, its authors need not bewail its fate." The condominium was never real, because the government of the country by inspiration and in practice was British solely. It must remain so, until it becomes Sudani.

CROSS CURRENTS IN MESOPOTAMIA. Arab, Kurd and Englishman.

BY THE REV. W. A. WIGRAM, D.D.

(Concluded.)

IV.

In the Kurd we have a problem that, for the time being is a simpler one, though in a few years it may well be that the question of the future relations of the kingdom of Iraq to those of Kurdish districts that must go with it, will become a difficult one. Life in the Middle East would be far simpler, if only incompatible types would sort themselves, automatically, into separable areas. However, if the problem is bad in Iraq, at least it is worse in Anatolia!

The Kurd is a hillman, and will not go far from the hills into which, in summer, it is his way to take up his sheep—and sometimes those of his neighbours: he is still semi-nomadic, sometimes wholly so. He will not go under the Arab, on any terms. It was proposed, not so long ago, to send an Arab governor to a certain Kurdish township, not very far from Mosul. "He will not be here long, Sahib," said the local notables to their English shepherd. "Why not?" asked the 'Adviser' concerned. "Because we shall kill him," said the Kurds with a charming simplicity, and went on to explain how much they liked their English controller! The little incident gave the whole situation *in pello*. Given "advisers" of the right type—and Allah has decreed that these shall be plentiful in England—men who can wander with them, eat and shoot with them, chaff with them in their own tongue, and given also a policy that will leave the hillmen alone, barring open disorder and rank oppression, then the power that those advisers can wield will be enormous, and Kurdistan will—as actually happened—sit quiet and pay its dues when all Iraq is in revolt. Genuine liking, as always, grows up between "adviser" and tribesmen in such a case, liking that is sometimes pushed almost to taking up their quarrels!

"If you cannot find out who lifted the cattle of my good friend Abd-el-Selim," wrote one Adviser once to his neighbour, "I shall just let him raid your villages." "Very sorry for your friend's cows," came the answer, "but if he comes raiding my peaceful villages, it will be my painful duty to shoot him." There is a salt of danger in the life of the "Adviser," and it is a rough one, spent mostly on horseback, wandering among those whom he controls. He is dealing with a rough type, whether it be Christian or Moslem, and a bullet from an ambush is always possible, not so much from desire to assassinate him, as from desire to get some third party into trouble!

There are difficulties and problems of course, partly those due to the passing of a feudal society, now gradually dying from natural causes. As one chief put it, "If those of the rank of Beg are not to be allowed to call on villagers for forced labour and *corvée*, how are they to live? You would not have them work." To

answer, with Talleyrand, "where is the necessity for their living?" does not meet the difficulty. Even a trusted local official may look back longingly on joyful old days, and when halting on a journey with the "Hakim" to get some breakfast, may remark reminiscently, "It was just here that we plundered the caravan of Yezidis, and I captured their leader with my own hands." Administrative problems have their humorous side. Where else could you find a local official making up a deficit in the revenue (he being a pious Moslem) by fining everybody who would not say his prayers? It is true there is British precedent, if of doubtful origin.

"Old Daddy long-legs, wouldn't say his prayers, Take him by the left leg and throw him down-stairs."

We fear that the local lack of a stair-case prevents strict application of the precedent, but there are plenty of precipices!

Troubles of internal origin are not the only plague of Kurdistan. Turkish intrigues and attempts to stir up a chronic rebellion, that will justify Turkish claims at the coming peace conference, are also to be feared. There is, of course, no reason to complain of this; the Turk, whether at Angora or at Constantinople, has not made peace with us, and therefore is still at war. Why should he not "annoy the enemy"? It is true that four years ago, at the time of the Armistice, he was willing and anxious to accept any terms that we cared to lay down, with thanks to Allah that they were not more severe. Our European statesmen, however, in their wisdom elected to waste time till the Turk had recovered from the shock, as an empire of primitive organization can do, wherefore we see what we do see now.

In Kurdistan, however, there is little love for the Turk as such, and none for the Ottoman official. Nor are those in the tribal stage of life articulate enough as yet to demand a "national government." They really cannot be said to want anything positive, except to be left alone, each petty *agha* governing his own tribe, and if that is allowed them, would probably acquiesce in the right of the Government to put a stop to open raiding. Turkish intriguers go up and down the land, even Turkish filibusters—the term is not quite a just one, when a state of war exists—make themselves a nuisance now and then. Still, this seed falls on no very receptive soil. At least one prominent chief, who once came near to being hanged by the British for his misdeeds, but was ultimately confirmed in his office, is now so reconciled to British control that he sent down his taxes for the year wrapped up in the formal invitation to attend an "anti-British congress" at Jezireh, that had been sent him by the "Committee of Union and Progress."

Another, when asked by a British officer whether the intrigues he knew were in progress were dangerous, replied with a parable that at least is worth quoting, and that one hopes answers to the facts: "Trouble not at that, Sahib. Behold, the intrigues of the Turks with us Kurds, they are like unto the love affairs of mules. Some noise and excitement, but no result."

Broadly then, there seems to be no reason why Mesopotamia should not go well, if all are content that it should go slow. Attempts have been made, with the very best intentions, to hurl Iraq from the days of Harun-er-Rashid to the twentieth century in a matter of two years or so. Whether the feudalism plus Islam of Arabia is capable of adopting (or would be benefited by adopting) a democracy which is distinctly on its trial in the West, is perhaps not quite certain. At least changes that took ten centuries in the West, had better not be forced on in one generation, even by the Arab.

GREAT BRITAIN AND EGYPT.

Egyptian Press Views.

The Sudan.

The future of the Sudan still occupies the foremost place in the Arabic Press. The *Ahram*, e.g., in a long article by a well-known lawyer, contends that Egypt and the whole of the Nile Sudan regions have always been practically one country. Egypt, the writer says, conquered the Sudan when temporarily disunited, at great cost under Mohammed Ali and Ismail. In 1885, under British pressure, Egypt evacuated part of it, but only, it was understood, temporarily. Sherif Pasha, then Prime Minister, resigned because he would not recognise the evacuation. In 1894 Riaz Pasha in a communication to Sir Evelyn Baring, said that no one could think of the two countries as separate, and the Khedive's Government protested against any aggression in the Sudan. A Blue Book of October, 1898, shows that Boutros Pasha Ghali, in a letter to Lord Salisbury, stated that the Egyptian Government was compelled to evacuate a part of the Sudan, but that it still insisted on recovery of what was an essential part of Egypt. European Powers recognised the sovereign rights of Egypt, and the Anglo-Italian treaty of 1891 shows this. In 1894 Lord Salisbury stated to the French Ambassador that the whole Nile Valley belonged to Egypt. Lord Rosebery at Epsom in 1898 said, "we are working to give back to Egypt what is considered by all European Powers a part of that country." In *The Times* of November 15, 1897, was published part of a treaty with Italy which provided that the part occupied by Italy would be held only temporarily until the Egyptian Government was in a position to take it back. England helped Egypt to recover the Sudan provinces, but in the name of Egypt and as her ally. Instructions given to Lord Kitchener directed that Egyptian control was to be established. He protested against planting the French flag at Fashoda, informing the French officer that he was hoisting the Egyptian flag on what was the territory of the Khedive, as requested. (Lord Cromer's report, 1898.) The numbers of troops employed in the Sudan were 25,000 Egyptians and only 8,000 British. The latter force never exceeded 2,000. The cost of the expedition was two-and-a-half million, of which two-thirds was paid by Egypt. The one-third paid by England was paid not because Egypt refused to pay, but because the Egyptian Debt Commissioners objected to the payment by Egypt of more than two-thirds. Since the province was retaken the total cost of work carried out in the Sudan (including administration, irrigation work, dams, etc.) was five-and-a-half millions, which was paid by Egypt. Since the reconquest of the Sudan the cost of the army of occupation has amounted to thirteen millions. This was borne by the Egyptian Government. Ten thousand Egyptian troops have maintained order and security. Britain has kept only 1,000, at a cost of two millions. All these facts show conclusively that the Sudan is a part of Egypt. Agreements made in 1899 do not affect the question of sovereignty; they only indicate that Britain would control the Sudan, not as a sovereign power, but in an administrative capacity only. The flying of the British flag with that of Egypt was intended to lessen European complications, arising out of the Capitulations, and to help Egypt over her difficulties. England professed not to supersede, but to share Egyptian responsibilities. The writer states that he proposes to offer suggestions for an agreement which would provide for a new mode of cooperation now needed; but these have not yet appeared.

Ahmed Zekki Pasha, who is Secretary of the "Eastern Union," claims that the sources of the Nile were discovered by Arabs (Egyptians). He is about to publish the translation of a book written by Fadbullah el-Amâry (1236 A.D.) in which the author gives a description of the Great Lakes, "the discovery of which has been claimed by British explorers."

All these views of the Sudan question are, of course, widely read.

Kopts and Moslems.

Another topic which arouses considerable interest, and regarding which many letters are being addressed to the Press, relates to a proposal by one Tewfik Dos, a lawyer and member of the Commission, that minorities should be represented in the new Parliament. This refers to the Koptic minority in the Egyptian nation. The proposal is opposed by Abdel-el-Hamid Bey Bédawi, who is Secretary to the Council of Ministers and was a member of the Adly delegation. It is also opposed by the Kopts themselves. They held a large meeting, at which many Zaghloulists, both Moslem and Kopt, were present, and it was decided to oppose the proposal. The Kopts, it should be said, have been all along very favourable to Zaghloul, who always had Kopts with him at meetings, and appears in many photographs attended by members of that community. It is contended by the Nationalists that the Egyptian people are one, and should not be regarded as divided into a majority and a minority, or according to religious differences. Members of the new Parliament should be elected from the nation as one. If there were a recognised minority, i.e., a Koptic, it would only give an opportunity for British interference in matters that might affect or be held to prejudice the Koptic section. It is a strange fact that the Kopts have been holding meetings in Moslem mosques, and Kopts have even preached, or given addresses, in the Azhar, while Moslems have held some in Koptic churches.

[This recalls what happened in Constantinople after the revolution of 1908, when Moslems embraced and kissed Armenians in the streets, and when brotherhood and everlasting unity, irrespective of race and creed were proclaimed. History thus seems in a way to repeat itself at Cairo; but it is to be hoped there will be no resemblance in the sequel.]

General Notes.

A prize was recently offered for the best book in Arabic on Egypt under Ismail Pasha. Out of twelve competitors the Egyptian Academy have awarded the prize to Elias el-Eyoubi. King Fuad has given £100 to the prize winner for the carrying out of a translation of the essay into French. It will be published by the Academy.

Sir William Willcocks, who is at present at Helouan, and whose activity is as great as ever, is engaged amongst other calls on his time in translating into spoken Arabic parts of the Bible. Great interest is taken in the work, and the translation, which will appear side by side with the English version will, it is already clear, be welcomed in wide circles.

BRITISH JEWS AND PALESTINE.

At a meeting of the Joint Foreign Committee of the Jewish Board of Deputies and the Anglo-Jewish Association held in London last week, the following resolution was unanimously adopted on the motion of Mr. O. E. d'Avigdor Goldsmid, President of the Anglo-Jewish Association, seconded by Sir Stuart M. Samuel, President of the Board of Deputies of British Jews:—That the Joint Foreign Committee of the Board of Deputies of British Jews and the Anglo-Jewish Association respectfully urges his Majesty's Government to use their best endeavours to secure the approval of the Mandate for Palestine at the ensuing meeting of the Council of the League of Nations, and also appeals to the Council to ratify the Mandate to Great Britain without further delay.

It was announced last week in the Maltese Legislative Assembly that the Imperial Government had approved a scheme for raising a local force, consisting of a cadre, which could be expanded into a battalion on mobilization.

Mr. Henry Casolani, superintendent of Maltese Emigration, left London last week for Malta.

The Governor of Bengal has appointed a Retrenchment Committee with Sir Asutosh Mookerjee as president and with two British and two Indian members, for the purpose of effecting a reduction in expenditure in local government.

A strike has broken out among Indian seamen at Calcutta as the result of certain men refusing to sign on again until increased wages had been granted. The number of strikers is estimated at ten thousand. All shipping in Calcutta is affected.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

The Policy and Prospects of Bulgaria.

The *Contemporary Review* for May contains an article by Lady Grogan on "Bulgaria and the Treaty of Neuilly." After sketching events in Bulgaria from the outbreak of the European War to the advent in August, 1919, of M. Stamboliisky, the writer outlines the actual and potential state of the country thus :—

As a natural consequence of his desire for peace, Stamboliiski has ruled Macedonia out of his programme and, for the first time since Bulgaria became a State, Macedonia plays no part in the policy of the country. It has been hard for the Macedonian community in Bulgaria to acquiesce in this abandonment of what has seemed the most sacred duty of all Bulgars, and harder still for the Bulgars of Macedonia itself, who, in spite of the desperate struggles of many generations, now see their schools and churches closed, while the use of their own tongue is forbidden to them. The murder of M. Dimitrov, whose duty it was as War Minister to take active measures against the formation of bands, has been attributed to a group of more desperate Macedonians, but the recognised Macedonian organisations in Bulgaria now confine themselves to relief work among the refugees and to efforts at Geneva with reference to the rights of minorities. For the moment, it may well be that, as regards Macedonia, the Gambetta policy *n'en parler jamais, y penser toujours* is the wisest for Bulgaria.

If the main objects of the Peace Treaties were, in the first place, to render it impossible for the late enemy countries to make war again and, secondly, to make them pay, as far as possible, for the war losses, then the first of these objects has, in the case of Bulgaria, been completely attained, but if she is to pay her reparation obligations in full, she must of necessity be granted some delay and something must be done to increase her revenues. The best way to ensure such an increase is, according to Bulgarian economists, to give her free access to the Ægean, that is to say, by the fulfilment of the promise made in the Treaty itself. A further relief to the situation would be the early recall of the various Allied Commissions, or at all events a great reduction of their personnel. These Commissions constitute a heavy financial burden on an almost ruined country, and the presence of many foreigners, who seem to have little to do and a great deal of money to spend, who occupy the best houses and command the use of a host of motor cars, is calculated to embitter the population. In Bulgaria the standard of life has always been of the simplest ; in Sofia before the war there were scarcely half a dozen Bulgarian families which could be said to entertain at all ; at present the professional classes, army officers, ex-Cabinet Ministers, and yet more, pensioners and dependents of former officials are

many of them in absolute want. The fact that a typist in the Allied Commission receives the equivalent of two and a half times the salary of a Cabinet Minister speaks for itself. The history of these Commissions in Central Europe, if ever it comes to be written without reserve, will hardly form one of the proudest chapters in the chronicles of the Allies.

The redistribution of territory provided for by the Treaties, which, though it also served punitive ends, brought independence or racial re-union to many nationalities in Europe, deprived over a million Bulgars in Thrace and Macedonia of all hopes of such independence or re-union. These peasants had no part in causing the war and punishment has fallen heavily on them. It is not easy to see how their lot can be improved, unless the League of Nations is able to provide permanent Inspectors of Minorities, or Special Commissioners—on the lines now proposed by the Entente Foreign Ministers—who must be supported by the entire authority of the League.

As regards home politics, Stamboliiski has, as far as possible, broken with the old *régime*. If he had his way, probably nearly all former Ministers would be in prison at this moment, and even such moderate fortunes as are found in Bulgaria would be confiscated for the good of the State. But though the Agrarians have tried to make a clean break with the past, they have preserved the dynasty. King Boris' position is not an easy one : his father is held up to execration almost daily in the Press and in the public utterances of his Ministers, but the people dissociate him from all connection with the past. He was born among them and has been brought up among them, he belongs to their faith and speaks their language as his own, and the simplicity of his life and his devotion to the service of his people have gained their respect and warm affection.

Some of the legislation planned or adopted by the Agrarians is interesting, if experimental in character : e.g., the measures providing for ten days' compulsory service (road-making, bridge building, planting of trees, etc.) annually for the State from all persons of the community ; expropriation of Crown and Church lands and properties of over 300 *decares* for the benefit of landless men ; and exclusion of professors and lawyers from the Sobranje. The Agrarians, though they may not all be saints or sages, do at all events represent the people, inasmuch as they are of them, as the rulers of the country have never been before, and it is their real desire to re-establish the credit and prosperity of the country. Such a time is still far distant : there are heavy reparations to be paid, costly foreign commissions to maintain, evil traditions in public life to be abandoned, the good opinion and confidence of Europe to be regained before Bulgaria can take the place among small nations for which the intelligence, courage and industry of her people qualify her. In spite of all her difficulties there has been no disorder, no sort of Bolshevism in Bulgaria, the peasant loves his land and the prospect of peace far too well to risk adventures of the kind, and to him work is the breath of life. In books of Balkan travel, there is hardly a mention of the Bulgars after the Turkish conquest until late in last century. The uncouth figures, clad in sheepskins, which

plodded behind ploughs roughly fashioned from limbs of trees, or beside ox wagons of primeval form, seemed to the traveller, as they moved painfully across the Balkan plains, to be as much a part of the landscape as the rocks and trees; but if the western traveller spoke at all of this dumb peasantry, it was to comment on their persistent, continuous, undaunted toil. The hope for Bulgaria lies in the strong character and unremitting toil of her peasants.

Armenia.

Writing in the *Daily Telegraph* of May 27, Mr. W. E. D. Allen discusses the fate of Armenia and problem of its settlement. He shows the present Turkish attitude towards Armenia:—

The Kemalists now maintain that the Armenian question has been definitely settled by this Treaty of Kars, and refuse to consider any of the clauses of the Treaty of Sèvres which provide for the establishment of an independent Armenia out of the Eastern Provinces of Turkey. On the other hand, the Allies are pledged by the Treaty to Armenian independence. Further, the most elementary considerations of justice and humanity require that at least some autonomous homeland should be provided for the Armenians. By the arbitration of President Wilson the larger part of the four eastern provinces of Turkey—Trebizond, Erzeroum, Van and Bitlis—were to be included in Armenia. Of these provinces, the first was inhabited by a majority of Pontine Greeks, but it was considered necessary to the economic life of Armenia, since it comprised all the Black Sea coast. The other three provinces were inhabited by Mussulmans (Turks and Kurds) and Armenians, in varying proportions. In fact, had the Wilson decision been carried out, at least 40 per cent. of the population of Armenia would have been Mussulmans.

After estimating the present Armenian population in Asia Minor at 180,000, he states that their repatriation would be not only just and humane but also useful in reviving the local industries of Eastern Turkey, and concludes:—

The attitude of the Kemalists is that with the conclusion of a general peace they are willing to concede the same rights to the Armenians as those allowed to minorities in Roumania and Czechoslovakia under the Treaty of Trianon. But it is not to be expected that such a concession, with the historic examples of previous ineffectiveness in various parts of Turkey, will inspire the Armenians with sufficient confidence to induce them to return in any considerable numbers. At least the establishment is necessary of some autonomous area, protected by international guarantee from Turkish military interference. The concession to the Armenians of the whole of the territories mentioned under the Wilson decision is both impracticable and undesirable. At the present time the political aspect of the Armenian question has ceased to exist. The Armenians have been so decimated that they are not now a danger to the Turks. But while their existence as a minority in many provinces in Turkey might be a constant source of friction, and might prejudice the relations of Turkey with foreign Powers, their concentration in a small autonomous area would impose only a slight territorial loss on the Ottoman State, and would at the same time tend to localise them. There is no doubt that the bulk of the Armenian peasantry, who have always been a real military danger on Turkey's eastern frontier, would settle in the autonomous area, while the few thousands of traders who might remain in towns in Turkey would have no political significance. On bases, therefore, of both geography and ethnology, it would be well to allot to an autonomous Armenia the Sanjak of Alashgird, in the vilayet of Erzeroum, and the whole of the vilayet of Van. At the same time the Turks might receive a decree of local compensation by the confirmation by the Powers of their possession of Kars and Ardaghan,

ceded to them by the Treaty of Kars. These two districts are inhabited by a majority of Mussulmans.

International assistance in the reconstruction of the autonomous Armenian area would be essential. Such assistance need not, however, involve any great expenditure. It would be necessary to maintain a small force of international gendarmerie, which might be gradually replaced by a native militia. At the same time a small loan would be required to facilitate the purchase of agricultural materials and the reconstruction of villages. In all this work the wide organisation of the Near East Relief would be invaluable. Indeed, that very efficient body might be entrusted to a large degree with the administration of the reconstruction. Such a scheme would be fundamentally humanitarian. But it would only be the satisfaction of the requirements of ordinary justice, and at the same time it would be a practical contribution to the economic revival of the Middle East.

TOPICS IN PARLIAMENT.

The subjoined headings are those given in the official report.

Greece and Turkey.—Poland and Roumania (Troops, Eastern Frontiers).—Egypt.—Iraq.—Government of India Act, 1919 (Draft Rules).—(Monday, 12th June.)

Brigand Attacks, Chanak (British Casualties).—Europe and Asia (Oil Concessions).—(Tuesday, 13th June.)

Samsun (Bombardment).—Sudan (Status).—Near East (Alleged Massacres).—(Wednesday, 14th June.)

Palestine: Imports and Exports.—Mandate and Contracts.—Railways.—Near East (Massacres). Ceylon (Constitution). Anatolian Situation. India: Babu Tarapada Mukerji.—Insulators (Tenders.)

A Constantinople message says that the Genoa Oriental Congress between Eastern Governments has been postponed at the express wish of M. Tchitcherin.

The Government of India have decided not to include "advisers" with the delegation to the International Labour Conference at Geneva in October.

NOTES AND NEWS.

Devonshire Square.
E C. 2.

Ottoman Bank Dividend.

The interesting announcement of the resumption of dividends by the Imperial Ottoman Bank was made last week. The war, of course, put an end to dividends, the last distribution being in 1913. A dividend of 5 per cent. is now proposed, which compares with 7 per cent. for 1912 and 1913, 9 per cent. for the six years to 1911, and 8 per cent. for 1905. We shall not be wrong, I think, in taking this welcome development as an indication of a definite improvement in the outlook in the Near East generally.

Anglo-Egyptian Oilfields.

A very encouraging report is forthcoming from the Anglo-Egyptian Oilfields for 1921. There was a steady development in the output during the period, the yield being 181,200 tons net as against 155,700 tons gross for 1920. The net profit of £374,837 shows a marked expansion on the previous total of £212,097, and the comparison is even more striking if account be taken of the special exploration reserve account of £100,000 which has been created. The balance of £146,002 was brought forward, making the disposable total £520,839 as compared with £332,058. Of this total it is proposed that £280,444 should be applied to the payment of dividends, leaving £239,894 to be carried forward. The distribution on the B shares will this year be 15 per cent., in addition to the fixed dividend, as compared with 10 per cent for 1920.

Exploration Work.

A less favourable account is given with regard to the exploration work. It will be recalled that reference was made in the previous report to three exploratory wells on the outlying parts of the company's original territories. Only one of them, it is stated, has met with success, and one of the licences held under the agreement of 1913 has, in consequence, been surrendered to the Government. During the year an agreement was concluded with the Egyptian Government clearly defining the period of the company's rights over the unproved parts of their territory at Gensah. A new geological survey of this area has been undertaken by the company, the results of which will be awaited with a considerable degree of interest.

The Indian Trade Commissionership.

The news that Mr. D. T. Chadwick will shortly be vacating the Indian Trade Commissionership on his promotion as Secretary to the Department of Commerce of the Government of India will occasion widespread regret in business circles here concerned in the Indian trade. It was in 1917 that Mr. Chadwick was appointed to organize an office in London with a view to the development of India's trade, and there is no question at all as to the success of his endeavours. During a very difficult period he has done much to help commerce by information, and his office in Old Broad Street is now the first resort of City men with inquiries on Indian questions. Mr. Chadwick's successor will be Mr. H. A. F. Lindsay, C.B.E., now acting Secretary to the Depart-

ment of Commerce, who has been for several years Director of Commercial Intelligence, Calcutta. He will not arrive until February, and the position will be temporarily filled until then by Mr. F. Noyce, C.B.E., of the Indian Civil Service.

The New Indian Loan.

Last week saw the issue of the expected Indian Loan the size of which occasioned some surprise as the markets generally of late have been anything but buoyant, and it scarcely looked a propitious moment for the floating of a large loan. The amount was £12,500,000 in 5½ per cent. stock, the issue price being 96 per cent., this giving a yield of £5 14s. 5d., and the loan is to be devoted to railway purposes. It may be pointed out in this connection that an expenditure is provided for on the railways of £100,000 spread over five years. The first effect of the issue of the loan was to depress markets, but the position was relieved considerably by the reduction of the Bank Rate which, of course, gave an increased attraction to the loan. Despite that factor it was generally expected that a large proportion would be left with the underwriters, but the amount that has not been taken up—63 per cent.—is considerably less than anticipated.

Turkish Unified Arrears.

The recent announcement of the Council of Administration of the Ottoman Debt has doubtless come as a very pleasant and unexpected surprise to the Turkish Unified bondholders. A payment was made on account of each coupon from March, 1915, to March, 1920, of 1s. 3d., leaving 6s. 9d. due. Now a further 9d. is to be paid on each coupon. In addition an instalment of 6s. is to be paid on subsequent coupons up to March, 1922, and there is good reason for anticipating that henceforward payments will be continued with a greater degree of regularity, though in the most favourable circumstances it may be some time before the earlier coupons are met in full. The bonds, it may be pointed out, are quoted at a price which would give a most inviting yield when matters are again on a normal basis, and there are far worse securities for those who hope for capital appreciation combined with a substantial rate of interest.

Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

BULGARIA.

Sofia, June 12.

The Currency Question.

A definite agreement has now been arrived at between the Government and the Inter-Allied Commission regarding the question of the currency. A Bill is being drafted, and will shortly be brought before the Sobranje. The first article lays down that the issue of banknotes is not to exceed the sum of 5,400,000,000 levas. The second article provides for the establishment of control by the Inter-Allied Commission over the Bulgarian National Bank. This control will be exercised by an Allied Commissioner whose duties will be to see that the fixed issue is not surpassed, to control the debts of the Treasury towards the National Bank, to keep a general eye on the activity of the Bank, and to see that from the 4 per cent., paid by the Treasury to the Bank for the amortisation of the floating debts, 2 per cent should be returned. At present the paper currency in circulation amounts to 3,700,000,000 levas.

Civil Aviation.

The Air Department of the Post Office has called for tenders from 30 European aeroplane factories for the purchase of aeroplanes. 5,000,000 levas has been allowed in this year's budget for the purchase of these aeroplanes. The scheme is to create an aero-post between Sofia and Varna and Sofia and Bourgas. It is hoped that a start will be made this autumn and it is calculated that Varna to Sofia will take three hours allowing for ten minute stops at Plevna, Gorna-Rakovitsa, and Shoumen.

ROUMANIA.

Bucharest, June 10.

The goods traffic between Roumania and Yugoslavia, interrupted since 1916, will shortly be resumed. Yugoslavia was the only friendly country with which Roumania had not yet resumed a regular goods traffic by rail covered by an economic convention.

In view of Austria's serious food problem, the Roumanian Government has decided to allow consignments of cattle destined for export to Austria to be free from the home quota. Furthermore, this export will be carried on between the two Governments, in order that this concession—actuated by humanitarian considerations—may not give rise to speculation.

Sowings and Crop Outlook.

According to the last reports received by the Ministry of Agriculture, the condition of sowings is considered very good throughout the country, with the exception of certain small regions where the low temperature and too much rain have been responsible for some damage. We learn from the official statistics that up to the 15th of May the spring sowings covered the following areas (the figures representing hectares): Spring wheat: Old Kingdom 52,884, Bessarabia 235,892, Bukovina 2,236, and Transylvania 48,150; spring rye: Old Kingdom 7,047, Bessarabia 6,884, Bukovina 1,442, and Transylvania 1,866; spring barley: Old Kingdom 600,879,

Bessarabia 521,641, Bukovina 20,506, and Transylvania 67,145; oats: Old Kingdom 509,209, Bessarabia 166,211, Bukovina 22,562, and Transylvania 151,945; maize: Old Kingdom 994,089, Bessarabia 516,857, Bukovina 46,043, and Transylvania 491,406.

The above figures show that spring wheat was sown in Bessarabia on a much larger scale than in any of the other provinces. The reduced wheat cultivation, as compared to previous years, is chiefly due to the export restrictions. On the other hand, the sowings of maize, barley and oats show a considerable increase compensating for the wheat deficit.

ALBANIA.

Tirana, June 5.

Utilisation of Forests.

M. Novak is to prepare a mineralogical and geological survey of the country, assisted by two other geologists. Asbestos beds have been discovered at Voskopoli, near Kortcha, rich veins of anthracite in the neighbourhood of Tépéléna, and iron between Tépéléna and Himara.

The Albanian Government have given a concession to an Albanian company for the utilisation of forests between St. Juan de Medua and Durazzo for the cutting of sleepers for the railway. Another company has made a similar request, but it has not yet been approved.

NEW CZECHOSLOVAK IRON COMBINE.

The Czechoslovak Iron Combine held its first meeting on May 23 at Prague. It comprises nearly all the important Czechoslovak Iron Works and its object is to centralise the production of iron and iron goods as well as the sale of goods produced by its members. To this end a Central Bureau will be established to apportion home and especially foreign orders among the associated works, according to a special rate corresponding to the pre-war proportion in the output of the individual firms. The following firms are members of the combine: Prague Iron Company, Mining and Iron Company, Vitkovice Iron Works, Bohumin Cable and Wire Works, Hernad Valley Iron Works, Rotava-Nydek Iron Works, Hradek Iron Works, Rokycany Iron Works, Zbiröv Iron Works, Max Hopfengartner, Schwarz & Bock, Libsice Iron Works, Philip Coburg Iron Works, Trnava, A. Hahn, Bolumin and Frystat Iron Works.

The traffic receipts of the Smyrna-Aidin Railway for the week ended June 3 amounted to £5,953.

The traffic receipts of the Suez Canal from May 27 to June 2 amounted to 2,780,000 francs, against 2,420,000 francs.

The Imperial Bank of India has reduced its minimum rate of discount from 6 to 5 per cent.

The traffic receipts of the Egyptian Delta Light Railways for the week ended May 20 amounted to £E.6,578; total for the year £E.39,311. For the corresponding period of last year receipts amounted to £E.7,802; total for year £E.47,514.

British Consular Reports.

V. BULGARIA

The following extracts are taken from the report of Mr. Francis J. R. Rodd, late Secretary-in-charge, Commercial Affairs, H.M. Legation, Sofia, on the commercial and financial situation in Bulgaria :—

It is hardly possible within a short compass to give an accurate exposition of commercial and financial conditions in Bulgaria, unfortunately situated as these may be. Detail on such specific subjects as internal trade and the industrial situation is omitted to give place to such observations as may interest British traders with Bulgaria, or which bear on the general economic situation of the country. It has only been found possible to provide customs statistics for the first six months of 1921, which have, however, been added to those of the last six months of 1920 to give returns for a period of 12 months; this period, however, does not coincide either with the Bulgarian financial year, or with a year ending on the 9th August, when the tariff provisions of the Treaty of Neuilly came to an end. Financial statistics are also incomplete for the same reason.

It is clear that when the statistics for the whole of 1921 are available they will show an adverse trade balance, as has been the case ever since 1908 with the exception of the abnormal years 1915, 1916 and 1917, when imports were reduced to a minimum owing to war, while the success of the German policy in draining the country of all raw materials, especially cereals, was manifest. Before the war this adverse trade balance was due to a considerable degree to the importation of war material; it was compensated by the negotiation of foreign loans, the service on which however to-day represents a large sum of "invisible" imports not shown in the official returns but tending to aggravate the situation. As it has been impossible since the Armistice for the Bulgarian Government to negotiate a foreign or even an internal loan, this adverse balance has had serious effects on the financial position of the country. The depreciation of the leva, which is mainly due to this cause, has not even had the effect of reducing the indebtedness, as in the case of Germany, owing to the small proportions of the internal as compared with the external debt of Bulgaria. The depreciation of Bulgarian currency on all Western European markets has been constant throughout the year, with the exception of an occasional and temporary fluctuation.

It is therefore clear that the conditions have not been advantageous to the importer of foreign goods, especially from those countries having, like Great Britain, an appreciated currency. A decline in imports from Great Britain which was already manifest during the first half of the year became more serious during the autumn. British houses have experienced the greatest difficulty in securing payment where credit terms were offered besides proving unable to accept further orders which passed to Central European manufacturers.

Imports and Exports.

With the increasingly difficult exchange situation imports have declined, in spite of the apparently large leva values shown on the returns. The volume of Italian business is noteworthy. A case in point was the tender for copper sulphate for the Agricultural Bank, which, in past years, had always been awarded to a British firm, but which, in December was allocated to an Italian house. Czech enterprise has been remarkable. The import of large quantities of cheap Czech and German agricultural machinery took place. A Czech sample train visited Sofia and the principal Bulgarian towns in November with a selection of goods calculated to interest the peasants. Negotiations were in progress between the Czech and Bulgarian Governments to conclude a commercial treaty, but the delay in compiling and passing a new set of customs schedules prevented any definite stage being reached. There is an all too prevalent tendency to await an improvement in the leva, which has not so far materialised. There does not, therefore, appear very much possibility of improving the Bulgarian market for British goods at present, though a certain inevitable volume of trade, especially from Government contracts, will continue.

The exports have been fairly satisfactory, and would have been more so had the restrictions on timber and grain been removed. The Inter-Allied Commission in July insisted on the abolition of the State grain exporting monopoly vested in the Consortium, but only after it was too late to export the 1921 harvest profitably, owing to the fall of wheat prices. A form of Government control was thought to be necessary, and was maintained with the concurrence of the Inter-Allied Commission. In consequence, the

grain exports for 1921 will not reach a figure sufficient to redress the trade balance, more especially as the maize harvest was poor, owing to the lack of rain in the summer, though the earlier wheat and barley crops were fully up to average. A system of grain elevators throughout the country is necessary before the cereal assets of Bulgaria can prove their full value. An offer to construct a complete system has been made by an Anglo-American concern, but the Government has called for tenders for the construction of a main elevator and silo at Varna, with subsidiary provincial installations. The rival schemes are still under consideration. The rose oil crop was good, but that of tobacco 40 per cent. below the 1920 harvest, in spite of which export has been very satisfactory owing to the relatively small crops in Greece and Asia Minor. The principal purchasers of this year's crop of tobacco have been Central European houses. Statistics of the tobacco export during the year are not yet available.

(To be concluded)

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 12 :—

Season.—June 3—Monsoon active on Burma coast, north-east India and southern half of west coast. June 6—Strengthened in south of Peninsula and weakened in north-east India. June 7—Weakened generally. June 8—Strengthened east of Bay and rainfall increased in Burma. June 9—Increase of rainfall in Malabar and north-west India. June 10 and 11—Strengthened on west coast of Peninsula. Monsoon Forecast for 1922.—Monsoon may be delayed but total rainfall in north-west India not likely to differ far from normal in Peninsula, excluding Mysore and south and central Madras. Useful forecast not possible for Upper Burma, north-east India, Mysore and Malabar owing to conflicting indications. Condition of Crops.—June 9—Bengal—Good rain. Prospects improving. Bombay—sowings of Kharfi crops (*i.e.*, crops sown just before or during the south-west monsoon) commenced, but immediate outlook not very promising. In north-east of United Provinces rainfall on June 4 and 5 has profited sugarcane crops. June 12—Assam—Prospects of tea fair and jute and autumn rice poor.

Markets.—June 8—Bombay cotton market strong. Fine M.G. Oomras, Rs. 446 8 July, Rs. 467 September. Bombay cotton arrivals from September 1, 1921, to June 2, 1922, were 2,977,000 bales as compared with 2,234,000 bales during the same period of last year. Piece-goods.—June 8—Bombay imported piece-goods market quiet. Position regarding old stocks improving slightly. Local firms good. June 10—Calcutta jute market firm. Firsts Rs. 84. Lightnings Rs. 75. Hessians, after heavy fall early in week, firmed up later. Quotation on June 10 for 11 porters was Rs. 29. 14. Heavies steady. B. Twills quoted at Rs. 48. Shellac.—June 9—Calcutta—T.N. Rs. 196. June 10—Rangoon rice market steady. Special Straits Quality rice Rs. 512. 8 ready, three months Rs. 515. Little business done.

No change in bank rate.

Oil Notes & News.

ANGLO-EGYPTIAN OILFIELDS.

A Satisfactory Year.

The report of the Anglo-Egyptian Oilfields for the year 1921 states that the total estimated net production of crude oil for the year amounted to 181,231 tons as compared with a gross production of 155,719 tons in 1920. The net profit for the year, after making the usual provision for depreciation on the property of the company, as well as a special provision for exploration expenses, amounts to £374,836 11s. 6d., which, with the balance of £146,002 16s. 2d. brought forward from last year, makes a credit to the profit and loss account of £520,839 7s. 8d.

The directors recommend that the sum of £280,944 8s. 11d. be applied to the payment of dividends on the respective classes of shares as specified in the appropriation account submitted herewith, leaving the sum of £239,894 18s. 9d. to be carried forward to next year, subject to taxation. The proportion of the profits allotted, in accordance with the articles of association, to the "B" shares, allows for the payment of a dividend equal to 15 per cent. upon the "B" share capital, less tax. The dividends will be payable on June 29, and warrants will be posted on June 28.

Work on Fields.

Every effort continues to be made to prove new territory. Exploratory drilling is proceeding on various new licenses acquired under the standard regulations. Of the three exploratory wells on the outlying parts of the company's original territories mentioned in last year's report, only one has met with success, and, in consequence, one of the licenses held under the agreement of 1913 has been surrendered to the Government. The indications afforded by the successful well are being followed up by new drilling tests. An agreement was concluded with the Egyptian Government during the year by which the period of the company's rights over the as yet unproved parts of their territory at Gensah has been clearly defined in a satisfactory manner. In accordance with this agreement the company has undertaken a new detailed geological survey of this region, and this is making good progress. The company's geologists continued their search for new territories, but so far no definite results have been obtained.

Meeting, Winchester House, E.C., June 28, noon.

PREMIER OIL.

Acquisition of Burma Interests.

The Secretary of the Premier Oil Company, Ltd., states in a circular:—

In pursuance of the policy outlined at the annual meeting in December last the company has secured an extensive interest in Burma. An agreement has been entered into with the Indo-Burma Oilfields 1920 whereby that company, subject to the approval of the Government of Burma, grants to this company the right to drill on any of its oil lands in Burma. The salient points of the agreement between the two companies are as follows:—

The Premier Company's geologist has the right to select well sites not being nearer than 300 feet from any existing well drilled or in process of being drilled by the Indo-Burma Company. The Premier Company can elect either to drill for its own account or alternatively can call upon the Indo-Burma Company to do so at a fixed price. All capital sums spent by the Premier Company upon drillings which have been approved by the Indo-Burma Company are to be repaid from the first net proceeds of oil, after which a proportion ranging from one-third to one-half goes to the Premier Company and the remainder to the Indo-Burma Company. The Premier Company's geologist has, after examination recommended the sinking of two wells on the Padaukpin area, from which he states a probable yield of 50 barrels per well per day may be expected.

This company has also purchased, subject to the approval of the Government of Burma, oil rights over selected areas, aggregating upwards of 100 square miles. These areas, upon which numerous oil seepages occur, are believed to be of great

promise. The vendor's rights have been acquired at the approximate cost, plus a moderate royalty on oil actually won.

The board considers that the principle which has been followed in the lengthy negotiations that have preceded the above arrangement—namely, that of securing rights which are capable of enormous ultimate extension and development while at the same time minimising its initial risk—is a sound one. The expenditure to which this company is definitely pledged, including purchase price and all obligatory drilling upon both the Indo-Burma and purchased areas, is under £70,000. Given the results hoped for, the minimum will no doubt be exceeded to an extent that will be governed by results and by the advice of this company's technical advisers, but it was deemed necessary at this stage to limit the company's obligations.

It has been rendered possible by the fact that under the above arrangements this company will enjoy the full advantage of existing organisations; there will be no heavy outlay for equipment, while overhead charges will be reduced to a minimum.

From the published results obtained by the Indo-Burma, it seems reasonable to hope that the Premier should obtain a satisfactory production at an early date.

Since the above circular was in type a cablegram has been received from the company's geologist in Burma, reading as follows: "Padaukpin oil area very good. Drilling area at least one mile long, half broad. Starting No. 8 well 17 in."

PHOENIX OIL AND TRANSPORT.

The progress report of the Phoenix Oil and Transport Co. Ltd., and allied companies for May states that the month's total crude oil production was 3,216 tons. The throughput of the refinery for the month was 2,702 tons, the decrease being due to temporary delay on the part of the pipeline companies in pumping oil to the refinery. No. 5 Well in the Moreni Stavropoleos district, which made several strong flows during the month, will be reopened as soon as the new fountain shields have been erected. At Well No. 1 the extraction of the 6 in. casing was being continued. Well No. 1, Runcu: Arrangements being made to replace the damaged casing before reopening the well.

OIL OUTPUTS.

The output of the Anglo-Egyptian Oilfields for the week ended June 9 amounted to—Gensah, 487 tons (previous week 19 tons). Hurghada, 4,747 tons, against 4,229 tons.

The Algerian Oilfields announce that advice has been received from the Société Algérienne des Pétroles de Thiouanet (in which the Algerian Oilfields is largely interested) that the output for the first week in June was 33,000 kilos (33 tons). It is also reported that well No. 23 (Medjillah) has now reached a depth of 88 metres and well No. 25 (M'silah) 270 metres.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

122. Merchant in Galatz, Roumania, wishes to enter into business relations with British firms willing to ship goods on consignment terms. Guarantees by Leading Banks given. Full details on application. Correspondence in French.

123. Import and Export Merchant in Beyrout (Syria) invites correspondence with British firms. General Merchandise. Will act as agent, commission basis, or own account.

124. Solicitor in Zagreb, Croatia, open to act for British firms requiring legal assistance in Yugoslavia. Correspondence conducted in French, German, Italian and Croatian.

125. A firm of British Merchants and Commission Agents in Liverpool desire to extend their connections in the Near East for General Merchandise.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from overseas buyers.

127. A firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

20. Principal of old established textile manufacturing and Import Firm in Aleppo (Syria) now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

Engineering Topics.

By Our Engineering Representative.

"Posterlite" Fittings.

A particularly interesting introduction has just been made by the British Thomson-Houston Co., in the shape of a fitting for illuminating posters, facias, and painted signs. It consists of a sheet copper trough with silvered glass reflectors bent to correctly designed contour to give a concentrated flat beam of light in any required downwards and inwards direction. So far there is little novelty about this, but the striking feature, and one which adds considerably to its utility and effect, is that the mouth of the trough has, across its length, louvres of glass of a diffusing character, interspaced with metal. The effect of this is that the light thrown is properly diffused, and whilst the major portion is thrown on the centre and bottom of the poster a sufficient quantity is thrown upwards so as to illuminate effectively the upper portion. In this way an even lighting effect is obtained over the entire vertical surface. The lateral distribution of the light is sufficiently wide for all practical purposes, and on a large hoarding or other surface the fittings can be spaced as far as ten feet apart. Each fitting takes two lamps of the 250 watt size, and these can be connected either in parallel or series to suit the voltage of the supply service. Posterlite fittings can be used on all hoardings at a height of from 10 to 20 feet, or, should there be any surfaces adjacent which are lighted from any other source, they can be used with full effect at heights of from 20 to 25 feet. In the most favourable conditions the spacing of the fittings can be extended to 15 feet apart. The backplate is so designed that it can be attached either to the front or the back of the hoarding or fixed in the ordinary way to any other surface. The tube which carries the lantern is secured in position by two taper pins passing through the boss in the backplate; an insulating connector is provided at the head of the bracket and altogether the fitting is designed on sound engineering lines, and should give complete satisfaction wherever it is used.

A New Stereo Press.

One of the most notable of recent introductions in connection with British specialist engineering is the "Photo-tone" stereo press for the purpose of producing a stereo flong by which it will be possible to reproduce the finest screen half-tone and three and four-colour blocks in printing work. The matrix can be produced in a few minutes, and from this as many casts as required can be made. A complete plant has been devised, and the following brief description of how the work is carried out is of great interest. After moistening, the flong is placed on the form, then covered with felt, and a suitable number of sheets of moulding paper are placed in the press. The head of the press is lowered in a horizontal position, and as soon as the desired amount of

pressure is reached it is automatically put out of gear so that matrix and type remain in merely moderate pressure.

Both the upper and lower press plates, either together or separately, can be heated by steam or electrically, and a patented suction system is also provided in order to assist this drying process as much as possible. Together with the press a vacuum pump driven by a small motor is put into operation, and all moisture is extracted and removed by means of a number of hollow suction plugs. When the finished matrix is removed from the form it is ready for immediate use, and does not even have to be chalked. The matrix has the property of retaining its original size even after a large number of casts have been made from it, and consequently one of the chief objections to stereo work for three-colour reproduction is removed.

A Useful Belt.

Details are to hand of a new articulated belt for car fan and dynamo drives which is being placed on the market by a London firm of engineers. It is made in sizes from nine-sixteenths of an inch up to 1.1-8 inch section and a feature is the use of hard fibre links with leather laminations. The fibre takes up the entire strain, and eliminates stretch, and the leather forms the frictional contact with the sides of the pulleys, or in other words the leather grips the pulleys firmly and the fibre takes the pull. This is a rather interesting method of belt construction, and although I have seen and had experience with a very useful and reliable belt in which use was made of raw hide for taking the strain with leather blocks to take the grip I am assured that the new belt has several novel features. The makers claim that it should get the motorist over most, if not all, of his troubles due to belts wearing, stretching, and breaking. The only comment I have to make is that as I understand the prices they are rather on the high side, but probably the makers will be able to reduce these as production increases.

CZECHO-SLOVAK BANKING AMALGAMATION.

An agreement has been reached between the directors of the Bohemian Industrial Bank, the Agricultural Credit Bank of Bohemia, Prague, and the Commercial and Industrial Bank Moravska Ostrava. The three banks have merged and the new bank has absorbed all branches of the Allgemeine Verkehrsbank of Vienna, which were located in Czecho-Slovakia. As a consequence of this amalgamation the Bohemian Industrial Bank will change its name to the Industrial and Agricultural Bank of Bohemia. The capital of the new bank will be Kc.210,000,000, and deposits Kc.2,000,000,000. It will possess fifty-seven offices in Czecho-Slovakia and four foreign offices.

Stock and Share Markets.

THE INDIAN LOAN.

Effect of Bank Rate Reduction.

(From Our Own Correspondent.)

London, Tuesday morning.

The markets opened in anything but a cheerful mood last week, and the appearance of a large Indian loan had the effect, naturally, of heightening the depression. Tuesday saw a veritable slump in Gilt-edged, and with the investment stocks touching lower levels all round, in particular the Indian securities, it became almost a certainty that, failing a radical change in the conditions, the closing of the lists would reveal that the new loan had met with a very indifferent reception. Then came a further change in the Bank rate, and that put an entirely different complexion on affairs. The reduction had been anticipated for some time, but it was not thought that it would be made just yet. It happened just in time to help the loan, which with 63 per cent left with the underwriters must be accounted a moderate success. On Gilt-edged stocks generally the $3\frac{1}{2}$ per cent. rate had a tonic effect, while with one or two exceptions, which nothing could affect at the present time, the other markets were favourably influenced.

It is possible to write with a good deal more confidence of the outlook than was the case a week ago for the adverse influences that were then so greatly in evidence are now much modified, if indeed they cannot be entirely discounted. The Irish position has improved, and the indications are that at long last we are in sight of more settled conditions in the "distressful island." The engineers' trouble has been settled, so that for the moment there is no cloud on the labour horizon to hamper the trade revival.

Gilt-edged Firm.

As I have indicated it has been a week of vicissitudes in Gilt-edged. Yesterday stocks closed on a firmer note. Consols at 56 $\frac{3}{4}$ are $2\frac{1}{4}$ up, the Conversion Loan at 75 shows a gain of $\frac{1}{4}$, while War Loan Fives are 99.7-8, a rise of 13-16. Indian stocks have firmed up somewhat. The Seven per cent. loan is $\frac{1}{2}$ down at 112 $\frac{1}{2}$, the $3\frac{1}{2}$ per cent. loan is $\frac{1}{4}$ lower at 66, while the 3 per cent. loan at 56 is also $\frac{1}{4}$ lower.

A rather variable tendency has prevailed in the foreign market. French loans have been firmer with War Loan Fives a point up at 42, while the 4 per cents. are a similar amount up at 33 $\frac{1}{2}$. German 3 per cents. have recovered 1-8 at 2.7-16. Italian Rentes have been weak, and close 2 down at 21. With a few exceptions South American bonds have been steady. Chinese issues have tended to firm up, while Japanese stocks have been fairly strong.

Industrials Quiet.

A quiet but firm tone prevailed in the Industrial group yesterday, but so far there have been no signs of any broadening of business.

Textiles have been steady, with Courtaulds a strong feature at 508. 9d., a rise of 28. 3d., while Coats are 1-32 lower at 3.3-32.

Tobaccos have been firm, Bats being 76s. 9d. xd., while Imperial Tobaccos are 66s. 9d. Dunlops are steadier, and close 1 $\frac{1}{4}$ d. up at 98. Iron and Steel shares have been firm. Vickers are 6d. up at 128. 3d., Armstrongs are 1s. 3d. up at 18s., while Guest Keens are 3d. lower at 34s. 6d. Indian railways have continued to present a strong front. Bengal and North Western are 4 up at 129, Bengal Nagpur are 97, while Bengal Nagpur 4 per cent. Debs are 71 $\frac{1}{4}$. Madras and Southern Mahrattas are 103 $\frac{1}{4}$.

Shipping securities have been inclined to dullness. P. and O. Deferred are 10 down at 320, Cunards are 3d. lower at 208. 3d., but Furness Withys are 1s. 6d. up at 318. 6d.

Oils Dull.

The Oil market shewed a rather variable tendency yesterday. This is the period at which the prospect of the maintenance of dividends comes in for attention, and adverse rumours, which in the view of those best qualified to know have no foundation, have been responsible for a number of declines in prices.

Anglo-Persian Ord are 4.29-32, a rise of 7-16, while Burmahs are 5.7-32, a decline of 7-16. Mexican Eagles at 3.5-16 are $\frac{1}{2}$ down Trinidad issues have been weak. Centrals are 2.5-16, at which they are 1-32 lower, Apex are 2.1-8, 1-32 down, while Leaseholds at 1.3-16 are also a similar amount lower.

Among Egyptians Anglo-Egyptians B are 1.13-16, a rise of 1-16, while Oilfields of Egypt are 5s. 6d., a gain of 6d. In the Roumanian group Roumanian Consolidated are 16s. 7 $\frac{1}{2}$ d., a drop of 7 $\frac{1}{2}$ d., Dacia Romanos are 1.1-16, Steaua Romanas are 11s. 6d., a decline of 4 $\frac{1}{2}$ d., while Phoenix are unchanged at 27s. 3d.

Banks Firm.

Banking descriptions have been firmer. Chartered of India at 17.15-16 are unchanged, National of India are 45 $\frac{1}{2}$, a rise of $\frac{1}{4}$, P. and O. Bank are 14, a decline of 1-8, while Bank of British West Africas are unchanged at 5.1-8.

Egyptian securities have been hard. Aboukirs are 1s. up at 218. 6d., Béhéras are $\frac{1}{2}$ up at 8 $\frac{1}{4}$, Egyptian Markets are 218. 3d., a gain of 9d., while Gharbieh Lands are unchanged at 1 $\frac{1}{2}$.

Cotton & Cotton Goods.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, June 16.

The general conditions prevailing throughout the market during the past week have continued unaltered. The tone has ruled firm, and with the rise in raw cotton values spinners and manufacturers have put up their prices. Great difficulty, however, has been experienced in obtaining full rates, but the prospects of the market at the moment are rather bright, and there is every reason to believe that a better business will be done in the near future. In the cloth section a good undercurrent of inquiry has been dealt with for the outlets generally, but actual transactions have been rather scattered. Some fair lines in bleaching descriptions have been sold for Egypt. Staple makes, however, have been practically neglected. Miscellaneous sales have been recorded for the Levant and Constantinople. In the yarn section prices for Bolton spinnings have ruled dearer, but the offtake for home use has not been of large extent. Quite a fair business has been done in extra hard American counts for certain outlets of the Near East. There has been plenty of cloth inquiry about for India, and transactions have been recorded in light cloths and shirtings for Madras and Calcutta. Many of the offers, however, have proved entirely impracticable. A fair amount of activity has been displayed by shippers to China, and fancies have been in special request. Some steady buying has been recorded for the Continent, and minor transactions have been mentioned for South America. Home trade buying has been on a fairly large scale. American yarn prices on the week are dearer and have been well held, but only a restricted demand has been met with.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended June 14 :—

Trading in this department has not been very lively during the past week, which has consisted of four business days only. The enquiry has been of a patchy description, as is generally the case during a holiday period, and this is likely to continue for some time yet. "Good" cottons are still out of favour, and the demand has run almost entirely on raw material at 17d. to 18d. per lb., except in the case of Sudan and Tokar cottons. With regard to these last, the trade is buying in two distinct lines. One consists of the exceptionally fine staple cotton, which is rather a feature of the Sudan crop this year. This cotton, which is competing with the ordinary Sakellaridis, is fetching good prices (20½d. was paid in one instance to-day). The other line consists of old crop Tokar cotton, some of which has been carried in stock here for two or even three seasons, but which is now finding many friends owing to its comparative cheapness as compared with other growths of similar staple. Prices for this style of cotton range from about 13½d. to 15½d. per lb. Inferior and re-cleaned cottons were pressed for sale, but met with scant response. Manchester reports speak of firm markets, but trading has fallen off and is somewhat irregular. The war of prices between spinners and manufacturers on the one hand, and the foreign buyers on the other, is being waged more bitterly than ever, and the present period is largely one of readjustment all round. Sellers are determined to reap more benefit from the recent advance, and buyers are resisting with all their strength. With regard to the future, our course of events would seem to depend more and more on the progress (or lack of progress) of the American crop. Stocks of Egyptian cotton, both here and in Alexandria, are more than sufficient to meet requirements at the present rate of consumption. It is realised that a large proportion of these stocks is represented by "good" and "fine" cotton, and the margin between these and the lower qualities is rapidly narrowing. Some cheap bargains ought to be available in the near future for those who decide to take a view rather than to buy on the hand to mouth principle only. Sales 1,600 bales (including 370 Sudan). Quotations are raised 75 points, with the exception of fine Sakel, which is 50 points up, and extra fine Sakellaridis, which is unchanged on the week. Fully Good Fair Sakellaridis to-day 19.75d.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report for the week ended June 9 state :—

Futures.—During the past week the market has been subjected to erratic fluctuations which, although not very severe, show how narrow the market is and how easily it can be influenced. The market remained about unchanged on Saturday after the publication of the Bureau report on the American crop, but opened weak on Tuesday, closing the session with a decline of over a dollar for Sakellaridis and just under a dollar for uppers. Yesterday saw an advance of about a dollar, ostensibly as a result of the advance in American, and the improvement has been maintained to-day. Speculation is small and what there is can be easily stampeded by the professional element of the market. Commercial houses are not using the futures market to any great extent, preferring to cover sales with actual cotton, as with desirable cotton so scarce futures do not constitute a hedge against old crop sales. We do not yet hear much of sales made for new crop shipment. The Government have not effected any purchases for some weeks and apparently maintain their decision to appear only to prevent a break. Arrivals continue on a fair scale and many of the ginning factories in the Interior are still working; the total arrivals to date since September 1 last are about 5,000,000 kantars. Exports for the same period total about 4,000,000 kantars.

Crop.—Reports received from the Interior indicate satisfactory progress; the plants have a healthy appearance and have probably recovered part of the initial delay. Damage by disease and pests is small.

MANCHESTER COTTON REVIEW.

The cotton trade review of the Imperial Ottoman Bank for the week ended June 17 states :—

General.—As usual this market was somewhat slow in settling down to business after the Whitsuntide Holiday. Enquiry from abroad has been on a large scale but buyers there are not yet convinced that the rise in values will endure and are reluctant to pay the higher prices now ruling. The consequence is that most offers are still coming through on the basis of the values of two or three weeks ago and the majority have to be declined. The actual business placed on the books therefore is not at all proportionate to the labour involved in dealing with the enquiries, but the tone of the market remains very steady with the general feeling much better than earlier in the year.

Yarn.—Spinners have raised their prices in accordance with the rise in the raw material during Whitsunweek, when they were closed; actual business, consequently, has only been moderate, buyers not yet being reconciled to the advance. Rather more has been done for the Near East but the principal demand is still on Continental and Indian account. According to the Board of Trade returns shipments last month were 20,767,000 lbs. against 21,327,000 lbs. in April and 8,554,000 lbs. in May last year. These figures demonstrate the very considerable improvement in the export yarn trade as compared with a year ago. If the Home trade were on the same scale spinners would be in a very happy position.

Cloth.—This market appears to have been rather more active than that for yarn, although the remarks with regard to the detrimental effect of the higher prices upon actual business apply here also. Enquiry has been widespread and the business transacted has been in numerous small lots rather than in individual large lines. India remains the principal support with China doing little, but demand has been better for the Near Eastern and South American markets. It is a good sign that stock lots are now changing hands more easily and at much better prices. Shipments last month were 341,424,000 square yards against 302,598,000 square yards in April and 145,603,000 square yards in May last year.

Raw Cotton.—The strength of this market has been well maintained, Liverpool on Monday (after its holiday at the end of last week) following the rise which had taken place in the mean time in New York. Since then the market has been very steady. The weather reports from the United States are very conflicting.

Closing prices are as follows :—American Fully Middling 12.935 last week 12.45; Egyptian Fully Good Fair, 19.75, last week 19.2,

Near East Markets.

LONDON PRODUCE REPORT.

Quieter Demand for Fruit.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in steady request at unchanged prices. Tate's cubes and mineral water sugar are unaltered at 56s. and 50s. 3d. respectively. London granulated is steady at 49s. 9d. while Lyle's granulated is firm at 49s. 9d. Export descriptions have been steady. West Indian crystallized has remained the same at 43s. 6d., while white Mauritius has come to business at 46s. 3d. White Java at 20s. 1½d. has shed 1½d. Cane sugar quotations are:—June, 15s. 9d.; July 15s. 9d.; August, 16s.; and September, 16s. White sugar quotations are:—June, 21s. 6d.; July, 21s. 6d.; August, 21s. 9d.; September, 21s. 7½d.; and October-December, 21s. 1½d.

Coffee.—Prices are unsteady. East Indian shows no change at 118s. Costa Rica has shed 6d. at 115s. 6d., while Nairobi is 6d. down at 102s. The futures market has been barely steady. Quotations are:—July, 63s.; September, 61s. 3d.; December, 60s. 9d., and March, 59s. 6d.

Dessicated Coconut.—A small business took place during the week. Some Colombo mills are expected to close down shortly owing to the high cost of manufacture.

Rice.—The market has been inactive, although prices are keeping a firm level. It is expected that within a few weeks, prices of Japan and American Java rices will advance.

Green Fruit.—The sudden cessation of the heat wave this week has affected the market for oranges. The demand has been particularly weak and prices have declined. A similar experience has been felt in the lemon market, merchants having large quantities on their hands owing to the falling off in the demand. Strawberries are taking the place of apples, resulting in a poor request for the latter. Egyptian onions have improved slightly, although quotations are still low.

Oilseeds.—A slight increase in prices has taken place. Indian linseed has remained steady at 20s. 6d., while La Plata has gained 1½d. at 18s. 4½d. Rapeseed has risen, with Toria 1½d. up at 18s. 4½d. Cottonseed has been steady with the exception of Egyptian black which is 1½d. higher at 11s. 10½d. Sakellaridis and Indian are firm at 11s. 3d. and 9s. 3d. respectively.

Oils.—Unsteadiness prevails. Linseed oil has shed 1s. at 42s. 6d. Rape oil is unchanged with crude at 45s. and refined at 48s. Cotton oil is lower in all cases. Egyptian crude has shed 6d. at 42s., while technical is 1s. lower at 41s. 6d. Refined at 48s. and deodorized at 53s. have both shed 1s.

Oilcakes.—After a lengthy period of a steady decline in prices, an advance has taken place in all cases, especially coconut cake which has made an exceptional rise of 80s. at 220s. ton. Linseed cake has gained 10s. at 280s. ton; and cottonmeal cake at 270s. ton has risen 20s. Cottonseed cake at 180s. ton is 30s. up.

In the House of Lords on June 14 the Sudan Loan (Amendment) Bill, which does not propose to raise any new money, was read a second time.

ROUMANIAN HARVEST OUTLOOK.

(From Our Own Correspondent.)

Bucharest, May 24.

Thanks to the exceptionally favourable weather, the maize plant has developed so rapidly that in the southern part of the country the first hoeing is already in progress. All the other spring sowings, such as oats, barley, beetroot, etc., show likewise a promising appearance. As to wheat, although the sown area is smaller than that of former years, the crop outlook is very good and a yield of 25 hectolitres per hectare is anticipated.

On the other hand, fruit trees have suffered both by cold weather at the beginning of the spring and by the damage done by caterpillars, which are this year exceptionally numerous. The fruit crop is therefore not expected to be an abundant one.

EGYPTIAN CROPS.

The following particulars of the crop conditions in Egypt are given in the Bulletin of the Egyptian Ministry of Agriculture for the month of May:—

Cotton.—The weather, though changeable, was on the whole favourable in Middle and Upper Egypt. In Lower Egypt cold spells intervened and towards the end of the month rain fell in some of the northern districts. Hailstorms were reported from a few places, causing damage in small cotton areas. Water supply was scarce in Lower Egypt, especially at the tails of canals, barely sufficient in Middle Egypt and fair in Upper Egypt. Late sowing was completed in Gharbiya, Beheira and Minufiya. A certain amount of resowing took place during the month under review. Flowering started in certain districts and the general state of the crop is satisfactory.

Local attacks of cut-worm were reported from Lower Egypt and slight attacks of aphids, soreskin and the occurrence of a few cases of cut-worm egg-masses were also reported from Lower and Middle Egypt.

Wheat.—Harvesting was in full swing during May and thrashing and winnowing were progressing. Slight attacks of rust and smut were reported from nearly all the provinces. The bacterial disease *Pseudomonas tritici* was reported from Minufiya, Beni Suef and Daqahliya in small areas. The yield is expected to be slightly below the average.

Barley.—Harvesting was completed. The yield is expected to be slightly above average.

Beans.—Harvesting was completed during May and thrashing and winnowing were in progress. The yield is estimated to be slightly below the average.

Bersim.—The water supply in some provinces was rather difficult. The making of "dries" continued throughout the month. Slight attacks of dodder were reported from some provinces.

Sugar-Cane.—The weather, though changeable, was on the whole favourable, but the water supply was generally hardly sufficient. Sowing was completed and fassing, manuring and watering were in progress. Slight attacks of mealy-bug and stalk-borer were reported from Minya and Girga provinces. The general condition of the crop is satisfactory.

Millet (Sefi).—Sowing was nearly completed during the month under review and hoeing, thinning and watering were being carried out. The weather was on the whole favourable and water supply sufficient.

Onions.—Harvesting is completed in Upper Egypt and is progressing in Middle and Lower Egypt except in places where the crop is late. The yield is expected to be below the average.

Helba.—Harvesting is general in Lower Egypt and is over in Middle and Upper Egypt. The yield is expected to be a normal one.

ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud & Co., Smyrna, report as follows for the week ending June 3:—

The total estimated arrivals to date amount to 174,000 bags. The total estimated sales are 172,200 bags while the estimated stock unsold amounts to 1,800 bags.

Markets.—Sultanas—Prices unchanged. Market is considerably stronger, judged by the value in local currency. On the

other hand, improved exchanges offset any advance in foreign equivalents. Total remaining stocks are estimated at about 500 tons of which probably not more than half is fruit equal to our types 13 to 16. New crop is developing under favourable conditions. Prospects at present point to a yield of 35-40,000 tons. The fig trees are less favourably reported on. The crop is likely to be smaller than last year's.

BULGARIA'S ATTAR OF ROSES INDUSTRY.

The attar of roses industry appears to be on the down grade since the war, says the *Echo de Bulgarie*. The following table is given showing the position since 1913 :-

Year.	Hectares.	Output. (Kg.)	Export. (Kg.)
1913	7,905	3,109	2,948
1914	8,100	3,201	3,257
1915	8,755	3,370	5,422
1916	8,549	2,971	2,954
1917	7,434	2,354	2,929
1918	6,404	1,305	—
1919	6,322	1,128	1,608
1920	5,132	900	3,518

The decline since Bulgaria entered the war is due, it is stated, partly to neglect of the rose gardens as a result of mobilisation, and partly to the decreased demand for the product in consequence of European conditions, but more particularly to profiteering by the middleman, who not only disposes of the essence at exorbitant prices, but also in an adulterated condition, thus affecting its reputation.

CURRENT PRICES.

General Produce.—Bacon: (Continental) 142s. cwt.; (Canadian), 135s. cwt.; (American), 100s. cwt.; butter (Danish), 187s. cwt.; (Australian), 168s. cwt.; (New Zealand), 178s. cwt.; cheese (Canadian) 80s. 6d. cwt.; (New Zealand), 83s. cwt.; lard 68s. cwt.; eggs (Danish), 14s. 6d. per 120; (Styrian), 11s. 3d. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar) 1s. 2½ lb.; cocoa (Ceylon good to fine), 87s. 6d. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt.; (Central American), 104s. cwt.; (Jamaica), 69s. 9d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 69s. 6d. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 90's), 11½ lb.; pepper (Singapore black), 4½ lb.; (Muntok white), 7½ lb.; piment, 2 1-8d. lb.; raisins (Valencias), 55s. cwt.; sultanas (Smyrna) 119s. cwt.; currants (Vostizza), 71s. 6d. cwt.; (Anchias), 59s. cwt.; sugar (Tate's cubes), 55s. 6d. cwt.; (Lyle's granulated), 49s. 10½ d. cwt.; (Mauritius crystals), 46s. 6d. cwt.; (West Indian crystallised), 43s. 9d. cwt.; (centrifugal), 15s. 4½ d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 7½ d. cwt.; (Bian Rangoon), 16 8s. 9d. ton; cinnamon (firsts), 11½ lb.; mace (fair Singapore), 1s. 6½ d. lb.; tea (Indian, common to good common), 1s. 1d. lb.; (medium to good), 1s. 6½ d. lb.; (fine to finest), 2s. 7½ d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½ d. lb.; Java (common to good common), 10½ d. lb.; wheat (English white), 53s. 6d. qr.; wheat (Australian), 57s. 3d. qr.; oats (English), 38s. qr.; oats (La Plata, ex-ship), 26s. 3d. qr.; maize (La Plata), 37s. 9d. qr.; flour 43s. 9d. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8½ d. lb.; citric, 2s. 5½ d. lb.; tartaric, 1s. 5½ d. lb.; ammonia (sulphate) 16 11s. 6d. ton; arsenic, (white powdered), 140 ton; benzole (standard), 2s. 5½ d. gallon; bleaching powder (35 per cent.), 12 10s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 115s. 6d. cwt.; Potassium: Bichromate, 6½ d. lb.; chlorate, 4½ d. lb.; caustic, 133 10s. ton; nitrate, 137 10s. ton; permanganate, 9½ d. lb.; prussiate yellow, 1s. 3½ d. lb.; sulphate (90 per cent.), 15 5s. ton; Sodium: Crystals, 120s. ton; bi-carbonate, 11 5s. ton; bi-chromate, 3d. lb.; alkali (58 per cent.), 19 1s. 3d. ton; chlorate, 3½ d. lb.; caustic (70 per cent.), 23 ton; hyposulphite, 16 ton; prussiate, 9½ d. lb.; nitrate, 15 3s. 3d. ton; glycerine (crude 80 per cent.), 160 ton; glycerine (industrial 100 per cent.), 187 10s. ton; lemon oil, 3s. 4½ d. lb.; quinine, 2s. 4½ d. oz.; red lead, 136 ton; white lead, 139 10s. ton; white ground lead, 149 15s. ton; sulphate of copper, 126 17s. 6d. ton; sulphate of iron, 60s. ton.

Metals.—Aluminium, 1102 10s. ton; antimony (English Regulis), 128 ton; bismuth, 9s. lb.; copper (standard) 162 1s. 3d. ton; copper (electro), 169 15s. ton; gold bars, 91s. 9d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 90s. ton; galvanized sheets (25 G), 16 ton; lead (soft foreign), 124 7s. 6d. ton; manganese Poti, 1½ d. unit; molybdenite, 30s. unit; nickel, 1162 10s. ton; platinum 360s. oz.; plumbago, 16 ton; quicksilver, 12 bottle; spelter (G.O.B.), 127 18s. 9d. ton; tin (standard), 153 2s. 6d. ton; wolfram, 11s. 6d. unit; zinc sheets, 135 10s. ton; tin plates (20 by 14), 19s. 4½ d. box; silver bars, 30½ d. oz.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 9d. lb.; 80 to 89 lbs., 9d. lb.; 70 to 79 lbs., 8½ d. lb.; 60 to 69 lbs., 8½ d. lb.; 59 lbs. and under, 6½ d. lb.; (second) 90 lbs. and up, 7 5-8d. lb.; 80 to 89 lbs., 7 1-8d. lb.; 70 to 79 lbs., 7½ d. lb.; 60 to 69 lbs., 6½ d. lb.; 59 lbs. and under, 5½ d. lb.; Cows (first) 60 lbs. and up, 7d. lb.; 59 lbs. and under, 6 5-8d. lb.; (second) 60 lbs. and up, 5d. lb.; 59 lbs. and under, 5d. lb.; Bulls (first), 4½ d. lb.; (second), 3d. lb.; Kips (first), 5½ d. lb.; (second), 4½ d. lb.; (third), 3d. lb. Calcutta Market. Prices in rupees per 20 lbs.:—Arsenic hides (cows): Agras, 8 to 13.8 (7 to 12.8); Durbhagas, 6 to 7.8 (6 to 7.8); Patnas, 5 to 6.8 (5 to 6.8). Salted cows: 4.8 to 6.8 (4.8 to 7). Arsenic hides (buffalo): 3 to 8 (3 to 7.8). Skins: Calf, 8 to 10 (8 to 10) per 20 lb.; goat, 180 to 220 (110 to 220) per 100 pieces.

Miscellaneous.—Cotton (American), 12.40 l. lb.; Egyptian (Sakel), 18 10d. lb.; jute (first grade c.i.f.), 136 ton; jute (lightnings), 132 10s. ton; Oilseeds: Linseed (La Plata), 119 3s. 9d. ton; palm kernels, 117 13s. 9d. ton; castor seed (Bombay), 118 2s. 6d. ton; sesame seed (China), 126 15s. ton; soya beans 112 11s. 3d. ton; Oils: Linseed 143 15s. ton; olive (Spanish) 177 ton; palm, 132 17s. 6d. ton; rape (crude), 143 5s. ton; soya 139 17s. 6d. ton; petroleum, 1s. 4½ d. gallon; petrol, 2s. 1d. gallon; fuel oil (ex-tank), 7 1s. 3d. ton; coconut (Ceylon), 138 10s. ton; cotton (crude), 142 5s. ton; ground nut 145 15s. ton; Rubber: Plantation (No. 1 Crepe), 7½ d. lb.; smoked sheet, 7½ d. lb.; fine hard Para, 10½ d. lb.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35 Old Queen Street, S.W.)

Egypt.

Cement.—The General Manager, Egyptian State Railways, Telegraphs and Telephones, Cairo Station, invites tenders for the supply of 800 metric tons cement. Copy of the conditions (price 200 millèmes) may be obtained at the Office of the Administration's Inspecting Engineer in London. July 25.

Beech.—The Inspector-General, Prisons Department, No. 43, Sharia El Bostan, Cairo, invites tenders for the supply of 375 pieces beech (European) 12 inches by 4 inches by 4 inches. July 1.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of metals required for the second half of financial year 1922-1923. Offers will remain valid for fifteen days, and delivery effected within two months from date of order. Conditions of tender and specifications are obtainable from the Stores Department, Arsenal. July 6.

Metals.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of metals required for the second half of financial year 1922-1923. Offers will remain valid for fifteen days, and delivery effected within two months from date of order. Conditions of tender and specifications are obtainable from the Stores Department, Arsenal. July 6.

Bulgaria.

Creosote and chloride of zinc.—The Directorate of Railways and Ports invites tenders for the supply of 500 tons of creosote and 50 tons of chloride of zinc. The estimated price of this contract is 4,100,000 levas. A deposit of 1 per cent. of the estimated price must be made by the tenderer, which is to be increased to 5 per cent. when the contract is placed. Terms of payment: one half against shipping documents, the contractor undertaking to give a bank guarantee against this sum, which will be freed on arrival of the material in Bulgaria—remainder after arrival and acceptance of material in Bulgaria. Delivery time: four months for the first half of the creosote and the whole of the chloride of zinc, and six months for the second half of the creosote. Delivery c.i.f. Black Sea or Danube port. Import duty to be paid by the Directorate. Local representation is essential. June 26. (D.O.T.)

India.

Steel felt, bicycles, tapes, sodium, nitrate, cable, etc.—The High Commissioner for India invites tenders for the supply of:—1. 514 tons steel, mild, round, various sizes; 2. 1,722 yards felt, brown, for panels, 60 ins. wide; 3. 200 bicycles, similar to G.P.O. pattern, without tyres; 4. measuring tapes, steel and linen, in leather cases, refills for ditto, and rules, boxwood; 5. 100 tons sodium nitrate, commercial; 4,000 yards cable, switchboard, lead sheathed; 34,000 yards cable for wiring buildings; 7. 67,500 yards cable, dry core, lead sheathed, steel tape armoured; 1,750 lead sleeves; 9,800 yards cable, under-water, unarmoured, lead sheathed. June 23.

Steel, etc.—The Bombay, Baroda and Central India Railway Company invite tenders for the supply of spring and ferrule steel; wrought-iron or steel piping; and ferro-manganese and ferro-silicon. July 5.

Flat-footed rails.—The Bengal Nagpur Railway Company invites tenders for the supply of 8,480 tons of steel flat-footed rails and 365½ tons of steel fishplates. June 28.

THE CONSTANTINOPLE MARKET.

Business very Restricted.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Constantinople, June 10.

All hope of an approaching recovery of business is abandoned for the present. Merchants are reducing their orders abroad, and the business transacted is limited to commodities of the first necessity, such as flour, sugar, oil, and coal. Trade in manufactures has come to a complete standstill, and sales are insignificant.

Produce.

Sugar.—The unfavourable news regarding the forthcoming Cuban crop has caused prices to rise on all the chief markets. Here the effect has been insignificant and we continue to quote below prices in the countries of origin. Quotations :—American £21½-22 per ton, Dutch £23½-24 per ton; in Customs £T.27½ per 100 kilos for American and £T.28-29 for Dutch.

Coffee.—A quiet tone has prevailed in the European markets. Prices are maintained at Rio. Here business is poor, and the prices quoted are below those of the producing markets.

Rice.—There has been a marked fall in prices. Quotations :—Saigon 75-78 francs ; in Customs Ps. 16-17: per oke.

June 12.

Flour.—Owing to small arrivals of good quality flour prices of the best kinds are maintained. On the other hand second quality are lower as the result of important arrivals. The arrivals consist of 200,000 sacks of American and 2,000 sacks of Bulgarian. Quotations per sack of 63½ kilos :—Mostico £T.9, Nelson £T.9½, Durun £T.7; native flour is £T.9 per sack of 72 kilos.

Wheat.—420 tons have arrived from Bulgaria, and have been disposed of at Ps. 13½ per oke.

Maize.—The quotation for maize in transit is 8 piastres per oke.

Reuter's Algiers correspondent in a message dated June 17 states that as the result of very unfavourable reports concerning the cereal crop in Algeria, the Director of Agriculture ordered a careful inquiry to be made. The information gathered shows that the situation is not as grave as was at first thought. It is stated that the harvest has been good in the Department of Oran, fair in the Department of Algiers, and fairly good in the Department of Constantine. In any case, there is no prospect of famine among the natives, as was feared a few weeks ago.

The gross receipts of the Great Indian Peninsula Railway Company for the year ended March 31, 1922, totalled Rs. 3,73,01, 001, a decrease of Rs. 9,42,902. The net revenue was Rs. 16,90,807, a decrease of Rs. 2,01,80,514. From funds in reserve the directors have decided to pay a dividend of 10s. per cent. in addition to £1 10s. per cent. for the half-year guaranteed by the Secretary for State for India. The capital expenditure during the year amounted to Rs. 2,16,50,242.

SHIPPING INTELLIGENCE.

TRADE IN THE BLACK SEA.

Shipping activities have greatly revived in the Black Sea, according to the Constantinople correspondent of *Svensk Export*, especially at Odessa, Sevastopol and Novorossisk. Sugar, coffee, manufactured goods, luxury articles, shoe leather, drugs, etc., are the principal imports, while wool, hides, livestock, tobacco, etc., are the chief exports. To trade in these harbours precise information concerning the quality, quantity and price of the goods in question must be given to the Soviet representative at Constantinople. When the bill of lading has been endorsed by him the goods may be taken to the harbour in question, and must there be sold to the Foreign Trade Commissary who will assign to the seller a profit of from 10 to 30 per cent. payable in foreign or Russian currency. At Sevastopol alone is trade with private individuals recognised, this port lying in the jurisdiction of the Orim Government.

CONDITIONS AT NOVOROSSISK.

A report received by the *Bulletin* of the Federation of British Industries from a correspondent at Novorossisk shows that trade at that port is very much restricted, largely owing to the action of the Soviet Government. No cargo can be landed or loaded without the permission of the "Vneshtorg." Although thus holding the monopoly, the "Vneshtorg" sometimes grant a permit to traders to sell in the open market. Since January a number of large steamers have discharged cargoes at Novorossisk, thus testing the post-war capacity of the port. Five or six brought consignments—amounting in all to about 500—of cistern wagons for oil carrying on the railways, and 500 more wagons are shortly expected from England. American and Norwegian steamers have discharged cargoes of grain for the famine areas. All these vessels have had a comparatively good and quick despatch, but this was undoubtedly due largely to the fact that for the majority bank guarantees had been deposited abroad to cover demurrage and extra expenses involved.

In spite of the depressing nature of the conditions prevailing—which are none the less stated to be a great improvement on the situation six months ago—Novorossisk with its unique position as an ice-free outlet for the whole of the northern Caucasus and the south-west of Russia, must assuredly become one of the most important ports in the Black Sea. Great things, both economic and political, depend (in the opinion of the correspondent) upon the autumn crops. The seed wheat brought from America and Australia has been hurried inland for the spring sowing, and a good harvest will be a material aid to improved conditions generally.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Brocklebank Line.—S.s. Malancha for Calcutta (Birkenhead, July 1); s.s. Malakuta for Port Said, Colombo, Madras

and Calcutta (London, July 4); s.s. Mahronda for Calcutta (Birkenhead, July 15); s.s. Mahratta for Port Said, Colombo, Madras and Calcutta (London, July 18).

Bibby Line.—S.s. Herefordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, July 5); s.s. Gloucestershire for Rangoon (Middlesbrough) July 8.

Clan Line.—S.s. Clan Mackinnon for Bombay and Persian Gulf (Birkenhead, June 26); s.s. Clan Kenneth for Colombo, Madras, and Calcutta (Birkenhead, June 29).

Cunard Line.—S.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, etc. (Glasgow, July 13).

Ellerman's "City" Line.—S.s. City of Norwich for Bombay and Karachi (Birkenhead, June 7); s.s. City of Baroda for Calcutta (Birkenhead, July 1); s.s. City of Exeter for Calcutta (Birkenhead, July 17).

Ellermans' Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, June 29); s.s. Glenaiffe for Port Said, Port Swettenham, Singapore, etc. (London, July 8).

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, July 3) s.s. Electrician for Port Said, Port Sudan, Aden, Mombassa, etc. (Birkenhead, July 13).

Henderson Line.—S.s. Sittang for Port Said and Rangoon; (Birkenhead, June 28); s.s. Chindwin for Port Said and Rangoon (Birkenhead, July 12).

Holt Line.—S.s. Troilus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29); s.s. Hector for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29); s.s. Titan for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 29); s.s. Teiresias for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 6).

Johnston Line.—S.s. Incemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, July 5); s.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Sulina, Galatz and Braila (Liverpool, July 22).

Moss Line.—S.s. Karnak for Gibraltar, Algiers, Malta, Piraeus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, June 26); s.s. Sitra for Gibraltar, Algiers, Malta and Alexandria (Liverpool, July 1).

Papayanni Line.—S.s. Andalusian for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, July 5); s.s. Trentino for Melilla, Malta, and Alexandria (Liverpool, July 12).

P. and O. Line.—S.s. China for Bombay (London, July 14); s.s. Nellore for Colombo, Madras and Calcutta (London, July 14); s.s. Nankin for Colombo, Madras and Calcutta (London, July 28); s.s. Plassy for Bombay (London, July 28).

P. and O. British India Line.—S.s. Morvada for Colombo, Madras and Calcutta (London, June 23); s.s. Mantola for Bombay and Karachi (London, June 30); s.s. Hatipara for Colombo, Madras and Calcutta (London, July 9); s.s. Mulbera for Bombay and Karachi (London, July 14); s.s. Australia for Colombo, Madras and Calcutta (London, July 29).

Prince Line.—S.s. Tudor Prince for Malta and Alexandria (London, June 28).

According to statistics of the Persian import and export trade by countries, published in the report by H.M. Commercial Secretary at Teheran, it appears that if Persia's trade with Egypt and Mesopotamia is added to its trade with the British Empire, the total amounts to 709,000,000 krans out of an aggregate foreign trade of 853,000,000 krans, or more than 80 per cent. of the whole.

An agreement has been signed between the Italian Government and the Eastern Telegraph Company for the re-opening of the telegraphic cable between Trieste and Corfu, says *The Times*. The new arrangements include a clause by which the Company consents to give special facilities for the transmission between Italy and Egypt of State and Press telegrams, as well as between Italy and Eritrea, Abyssinia and Italian Somaliland.

COMPANY MEETING.

Adriatic Bank.

The general meeting of the Adriatic Bank was held on May 27 in the rooms of the Adriatic Bank, Ltd., in Ljubljana. From the detailed report of the delegated member of the board of directors, the general manager M. Ciro Kamenarovic, it appears that the net profit of this bank for the year 1921 amounted to 4,522,986.14 dinars, of which sum 500,000 dinars was allotted to the reserve fund. The general meeting then decided to pay to shareholders a 5 per cent. dividend totalling 1,500,000 dinars and a 7 per cent. super dividend totalling 2,100,000 dinars, 12 per cent. dividend in all, so that as from June 10 coupon No. 16 of the Adriatic Bank shares will be paid with 12 dinars per share.

Furthermore the meeting decided to increase the share capital now 30,000,000 dinars, to 100,000,000 dinars, and the board of directors was authorised to arrange for this increase by degrees at opportune times.

The balance sheet shows deposits 450,079,591,930.79 dinars, including cash turnover of 3,439,555,073.94 dinars; cash and bills at short notice on December 31, 1921, amounted to 252,882,373.44 dinars.

COMPANY NOTES AND REPORTS.

Malta and Mediterranean Gas.

The report for the year to March 31 last shows after appropriating £5,889 to reserve, £1,000 for corporation tax, and £1,000 for deferred repairs, credit balance of £11,453. The directors propose a dividend of 6 per cent., free of tax, on ordinary shares, carrying forward £3,498. No money has yet been received from the Italian Government on account of the claim made against them for losses sustained during the war.

East Indian Railway.

The directors of the East Indian Railway Company recommend a dividend of 10s. per cent. on Deferred Annuity capital and Deferred Annuity capital class "D," in addition to the guaranteed interest of £2 per cent. for the half-year ending July 31, and 5s. per cent. compensation paid by the Secretary of State for India on account of the income tax as per clause 4 of the contract with him of December 17, 1919, giving a total return for the year of £5 15s. per cent.

Bengal-Nagpur Railway.

The directors of the Bengal-Nagpur Railway Company have declared an interim dividend of 15s. per cent. and bonus of 10s. per cent. on capital (Ordinary) stock, payable July 1, which together with guaranteed interest of £1 15s. per cent. then due will make a total distribution of 3 per cent. for the half-year.

Egyptian and Foreign Trust.

For 1921 the year's working resulted in a net loss of £60,527, of which £57,406 arose from realised losses on sales of securities. This has been carried to the debit of profit and loss, which now shows a debit balance (after making sundry adjustments) of £26,092 14s. 11d., which is carried forward. Investments have been taken in at cost. A valuation at current market prices at December 31, 1921, shows a shortage of £112,892 on cost price.

COMPANY NOTICES.

The Alexandria Water Company, Limited.

PAYMENT OF DIVIDEND.

Notice is hereby given that a DIVIDEND of Eight Shillings per £5 Share on Coupon No. 67 of shares numbered 1 to 120,000, and five shillings and three pence per £5 share on the special interest Coupon of the 20,000 shares of the 1921 Issue numbered 120,001 to 140,000 are PAYABLE on and after 15th June, 1922, at Barclays Bank, Limited, 1, Pall Mall East, London, S.W.1., and 54, Lombard Street, London, E.C.4., or at the Anglo-Egyptian Bank, Limited, Alexandria, Egypt, upon the making of a declaration as to ownership in the form required by the above banks, forms of which will be supplied upon application.

By Order of the Board,

K. B. WOODD SMITH, Manager.

2nd June, 1922.

The Mortgage Company of Egypt, Limited.

Notice is hereby given that WARRANTS in PAYMENT of the Dividend on the 5 per CENT. CUMULATIVE PREFERRED SHARES for the Half-Year ending the 30th June, 1922, will be POSTED on that date.

The Books will be Closed from the 17th instant to the 30th instant inclusive.

By Order of the Board,
S. R. DUNCAN, Secretary.

57½, Old Broad Street, London, E.C.2.
14th June, 1922.

SALE OF LAND IN SOUTH AFRICA.

The attention of the High Commissioner for the Union of South Africa has been drawn to the wording of certain advertisements issued by companies relating to the sale of land in South Africa. The High Commissioner is informed that it has been assumed that these advertisements are issued with the sanction and approval of the Government of the Union. Sir Edgar Walton announces that such advertisements are entirely unauthorised so far as his Government is concerned. Intending settlers are again advised to apply to the High Commissioner's Office, Trafalgar Square London, for general advice, before actually purchasing land. In no case, however, will any particular land or company be recommended. Official advice is limited to such essential points as areas suitable for particular crops; approximate costs of working; health and social conditions.

The register of holders of the East Indian Railway Company's Deferred Annuity and the register of holders of Annuity Class "D" will be closed from Saturday, July 1, to Monday, July 31, both days inclusive, for the purpose of making up the account of guaranteed interest to July 31.

In view of the financial position in Bengal, the Governor in Council has appointed a Retrenchment Committee with Sir Asutosh Mookerjee as President and with two British and two Indian members for the purpose of effecting a reduction in expenditure in local government, says Reuter. The Committee will meet in Calcutta in July and it is expected that it will issue its report at the end of the year.

NATIONAL BANK OF EGYPT.

Position at the 30th April, 1922, published in conformity with Article 8 of the Statutes.

Banking Department.

NOTES OF THE WEEK.

Palestine and Parliament.

The tragic death by assassination of Field Marshal Sir Henry Wilson caused the debate that was to have taken place in the House of Commons last week on the Rutenberg concession to be postponed; but while our last issue was going to press there was a striking incident in the House of Lords. On the motion of Lord Islington the Upper House agreed by sixty votes to twenty-nine that "the mandate for Palestine in its present form is unacceptable to this House, because it directly violates the pledges made by His Majesty's Government to the people of Palestine in the declaration of October, 1915, and again in the declaration of November, 1918, and is, as at present framed, opposed to the sentiments and wishes of the great majority of the people of Palestine; that, therefore, its acceptance by the Council of the League of Nations should be postponed until such modifications have therein been effected as will comply with the pledges given by His Majesty's Government." The Earl of Balfour very fittingly was the Minister who replied on behalf of the Government; but his spirited defence failed to convince his audience.

The Point at Issue.

The lesson from the House of Lords' debate would seem to be that the Government, if it wishes to save the Mandate, must adopt a different line of argument with regard to Palestine. No amount of juggling with words can remove the inherent contradiction between what the British declarations of 1915 and 1918 meant to the Arabs, and what the Balfour Declaration has been interpreted to mean by the Zionists to whom it was actually addressed. Lord Balfour, it was noticeable, avoided the question of conflicting pledges, with which the resolution was solely concerned, and addressed himself to points in Lord Islington's speech. Some of his arguments rested on very thin ice, as for instance when he twitted the House for waiting until 1922 to attack a policy enunciated in 1917. The obvious retort, of course, was that the full drift of the 1917 policy had not revealed itself until recently. Again it was wide of the mark to insist that the American Senate and a variety of other authorities had decided that the policy of a Jewish home is for the benefit of the world, or that Great Britain and modern civilization are under a great debt to Jewry. The question at issue is whether Great Britain intends, and, if she does, whether she has the right, to hand over

Arab Palestine to the Jews to be made, in the words of the Zionist Organization, "as Jewish as England is English." The injustice done to the Palestinians does not lie in the acts of the British Administration in Palestine, but in the fact that those words have been spoken and written.

The Only Way Out.

The British Government, we fear, is only riding for a fall in regard to Palestine, if it tries to carry on its back not only its own utterances, but also those of its Zionist prompters. The one sound argument to the point that Lord Balfour, in our opinion, used in his speech was when he asked how "the existing population of Palestine is going to be affected unless and until you get capitalists to invest their money in developing the resources of the country"; and he added: "It can only get a bigger population, if you can draw on the enthusiasm of the Jewish communities throughout the world." This is undoubtedly the British Government's strong point; but it must realize to-day that the Zionist Organization and Jewry are not synonymous terms. The former has spent a lot of money on Palestine; but, unless we are mistaken, the streams of Jewish generosity in the future will tend to pass the Organization by, and will be directed to Jewish non-political associations, which are now becoming actively interested in the exploitation of Palestine, and will develop the country without the help of the Zionist Organisation, if need be. If this should be the case, it would be a mistake—many people considered it a mistake when the Mandate was published—to give in the Mandate a special status to any one Jewish body. The position is undoubtedly involved, but the tangle can be straightened out by straightforward dealing. We do not share the Arabs' fears, but we cannot be surprised at their entertaining those fears. We have no doubt that Great Britain under the Mandate will honourably fulfil the spirit of the Balfour Declaration; but we hold that it would be entirely justified in reconsidering its present relations with the Zionist Organization. As for the Rutenberg concession, it would seem to be sound enough in principle, provided that concessions have not been withheld from other applicants on the ground that they could not be granted until peace with Turkey had been ratified; but we do not understand why a member of the Government who has been "behind" M. Rutenberg all the time has not come out into the open to relieve the concession of the stigma attaching to an alien engineer of M. Rutenberg's sensational past.

Political Strife at Belgrade.

During the royal wedding festivities at Belgrade, party politics receded into the background, and for the time members of the Government and members of the Opposition remembered only that they were loyal subjects of King Alexander. Now, however, the truce is at an end, and the fight has been renewed with extreme bitterness. The Coalition Government is believed to realise that it certainly cannot hope to accomplish more than the passing of the Electoral Law and the Budget, and perhaps the making of arrangements for a loan. That done, it will resign. But at the moment it looks almost as if even this limited programme may prove too ambitious to be carried out. Last week, after a stormy debate on the Electoral Law, practically the whole Opposition left the House, the voting being 159 to 5. That may be a victory for the Government; but a few more victories of the kind would be fatal. M. Marinkovitch, Minister of the Interior, is reported to have resigned; and M. Nintchitch, Minister of Foreign Affairs, seems likely to share the fate of Dr. Trumbitch in incurring his countrymen's hostility when he deserves their gratitude.

Trouble in S. Kurdistan.

It was officially announced last week that two British officers—Captain Makant, M.C., Iraq Levies, and Captain Bond, M.C., Assistant Political Officer, Chemchemal, were murdered in Kurdistan on June 18. The statement issued by the Colonial Office even gave the name of the murderer—Kerim Fattah Beg, of the Hamawand Kurds. The latter are a powerful and troublesome tribe, with a marked disposition to act "agin the Government." They gave the Turks, both Young and Old, a great deal of trouble; and in the rising of 1919 they were extremely active against us. But they have not hitherto been regarded as particularly treacherous, and Kerim Fattah Beg has been well spoken of by several Englishmen who have had dealings with him; although he has always been regarded as something of a firebrand. Both the murdered officers had much experience of the Kurds, and both were well liked by them; and it is difficult at present to account for the outrage. All that is known at the time of writing is that Kerim Fattah Beg had been making trouble for some time; that he sent word to Captain Bond that he was ready to make his submission; that the two officers rode out to meet him, accompanied by two native orderlies; and that after the meeting as they were riding in apparent friendship with the Beg, they were suddenly and treacherously shot down.

Turkish Influence ?

In the course of a very interesting article, in the *Morning Post*, on the subject of these Kurdistan murders, Major E. B. Soane, whose knowledge of the Kurds is wide and well matured (if we may use the expression), suggests that the mischief may be due to the Turks. The Southern Kurds, he says, despise and detest the Arab, whom they have now "learned to regard as the darling of the British in Mesopotamia," and they would prefer the rule of the Turk to that of King Faisal. In view of recent developments, it would not be at all astonishing to learn that the Turks had actually succeeded in stirring the Hamawand up to mischief. At the same time we must remember that—as Major Soane himself acknowledges in his "To Mesopotamia and Kurdistan in Disguise"—the Hamawand, like some other Kurds, actually claim Arab descent for their

leaders. Another point on which Major Soane is not altogether reassuring is the Kurds' manner of dodging aerial attacks. He holds that the only way to run these people to earth is to pursue their fighting gangs with small bodies of horse, and to employ against them their own guerilla tactics. It is to be hoped that events will shew him to have taken in this respect an unnecessarily gloomy view. Otherwise it will look as if we have expected too much of the Air Force.

A New Persian Cabinet.

Persia has another new Cabinet, headed by the Kawam es-Sultaneh, but the Sardar Sipah still remains Minister for War, and the new Premier has already announced that the new Cabinet will continue the policy of its two predecessors. So far nothing has occurred to incline the world to doubt that the statement is one of pure fact; and that being so, it looks as if there is nothing to be done by those nations which lie outside the rule of the Shah-in-Shah save to hope that his new Ministers will serve him and his country well. While the Persians remain so strongly suspicious of all foreign advice, it is obviously not for foreigners to tender advice. But we observe with some satisfaction that the Kawam es-Sultaneh has informed the Mejliss that the new Government will proceed with the appointment of foreign advisers as quickly as possible. It is also intended to press forward in the matter of granting a northern oil concession, which is expected to result in a considerable alleviation of present unemployment. Whether it will prove perfectly easy to solve this question during the lifetime of the present Cabinet—as Cabinets in Teheran live these days—may be doubted by some people. But it is unquestionably gratifying to be told that the new Government intends to take steps to improve economic conditions, where, it must be admitted, there is room for improvement.

A Royal Viceroy ?

It was perhaps inevitable that the return of the Prince of Wales from his Imperial tour should be made the occasion for bringing forward once again the idea that a Royal Viceroy should reside permanently in India, leaving the conduct of the administration to a Governor-General, but representing the Throne as no appointed Viceroy can do. In previous discussions of this topic it has usually been understood that the practical difficulties were regarded officially as insuperable, but the attractions are undoubtedly great, and even a Prince might regard India as a desirable place of residence, if he were provided with a suitable estate, or, as Indians would say, *jageer*, including for instance the Kumaun division, and some of the best sporting country further South. We do not know whether the idea is likely to receive serious consideration at present, but we venture to suggest to any Indians who may desire to press it, that their first business must be to prove that a recurrence of last winter's lapses of manners has been rendered definitely impossible; when they have established that position, they will perhaps be able to talk over the matter with Lord Inchcape.

The Story of Oudh.

It is a long time since we have read a more enlightening official document than Colonel Faunthorpe's report on the agrarian unrest in Oudh. The story is lengthy, but, its essence can be told in a few words. Up to 1856 Oudh was under Indian rule, and the peasants were *taillables et corvéables à merci* in the strictest sense of the classical phrase, liable to be taxed and impressed at the

caprice of the king or his unruly barons. Sixty years of British rule made little difference in practice: laws designed to protect the peasants could not be, or at least, were not enforced; the caprice of the landholder was still the law of his tenants; and though some English officials called for action, no prominent Indian raised his voice in their support. In the last few years the position has changed rapidly. The tenant, we are now told, wants to know where he stands; he has realised the value of combined action; his general intelligence has improved, and he is thinking about votes; in a word he has begun to wake up. Agitators were quick to perceive that in Oudh they had a deep and serious sense of grievance to work upon: hence the riots of last year, and the alarm which recurred a few months ago. The agitators have been dealt with, but, despite recent legislation, substantial grievances remain.

And Its Future.

As to the future, Colonel Faunthorpe at least has no doubts. The tenants have moved with the times, but the landholders have not. "They can have the choice between putting things straight now, or running the risk of incurring grave trouble later on." All the tenants really care for is that they should be "left in peace in the occupation of their holdings, and not ejected, rack-rented, or worried" by the landholder or anyone else; it is not a very revolutionary programme, and it is most unfortunate that, as the cable has recently told us, the landholders are even now inclined to stand stubbornly still. In the past, all suggestions of agrarian reform were put aside on the ground that the support of the great landholders was a political asset, which no Administration could afford to risk; in the changed conditions, it looks as if they will have to appear on the liabilities side of the balance-sheet, for the new self-consciousness of the tenants has come to stay, and it is likely to express itself very definitely at the next elections.

THE WEEK AT HOME.

Monday Evening.

Sir Henry Wilson.

The murder of Sir Henry Wilson at his house in London immediately after he had unveiled a War Memorial at Liverpool Street Station was one of those abominable crimes which pervert the normal course of history, and of which Irish history in particular is too full.

Sir Henry Wilson was an Ulsterman with the feelings of an Ulsterman, and when he resigned as Chief of the Imperial General Staff after the War, he disagreed emphatically with the Government's Irish policy, and entered the House of Commons unopposed as an Ulster member. Apparently he was credited by the Irish Republicans with stiffening the resistance of Ulster, and with advising the disposition of the Imperial troops at the recent Pettigo conflict; and the Republicans, who have long since adopted the old Fenian tactics of murder and arson in their own country, decided to take another leaf out of the Fenian book, and to inaugurate outrage and terror in England. It is known that for some time past Lord Carson's life has been threatened, and he has been specially protected by police; the same precaution seems not to have been taken in the case of Sir Henry Wilson. Perhaps he thought it superfluous.

The Prospects of Irish Peace.

The crime will have a sinister effect on the prospects of Irish peace. It was always said by the old Nationalist school that all Ireland's troubles were due to British tyranny, and that once Home Rule was given, prosperity would return. It was in this hopeful spirit that the pact was made last December. But since then the

condition of Ireland has gone from bad to worse, and with the withdrawal of British troops from the south, something not far short of anarchy has broken loose. The event shows that this vendetta is now carried into England, and that it does not spare the most distinguished citizens.

It must be admitted that all sympathy with the cause of Irish freedom, which has been so cruelly prostituted by her own sons, is now vanishing. Mr. Asquith, a Home Ruler all his life, was openly in tears in the House of Commons when the news of Sir Henry Wilson's assassination by two Sinn Feiners was received; and this catastrophe may mark the end of Liberal policy for the present. The immediate penalty of murder is paid by the murderers, but the graver and more lasting penalties of political murder are paid by the country which produces the assassins.

The Irish elections, which have taken place during the past few days, have been almost forgotten during the outcry over this abominable deed. They have produced a considerable majority in favour of the Treaty, but there is said to be trouble impending over the adoption of the Constitution recently agreed to between the Free State representatives and Mr. Churchill.

The Return of the Prince.

The Prince of Wales returned from his tour in India and Japan last Wednesday, and was given an astonishing reception by London. Absence in this case has made the heart grow fonder. Cockneys—who think the Royal Family their own particular possession—have followed his doings abroad with affectionate interest and every young woman in an omnibus has views as to his future bride. But the Prince has well earned a short holiday before he sets about marrying, and nobody will begrudge him a rest from public functions.

His arrival would have given a fillip to the most brilliant London season for years, but on the following day the murder of Sir Henry Wilson gave the social world a shock from which it will not quickly recover. Social entertainments and parties were put off at once; and although a certain number of functions will take place, the life has gone out of things for the present.

Our Aerial Position.

There has been a great deal of discussion lately as to our position in the air. We started the late war, as is well known, rather behind France and Germany, but we soon caught up and passed them both. Since then, largely owing to motives of economy, the Air Force has been cut down, and civilian flying has languished. One or two aircraft manufacturing concerns have gone out of business, and others, such as the Rolls-Royce, may have to shut down if more orders are not forthcoming.

We do not want to think of the next war, for we are in a very peaceful mood, but the rest of the world is not quite so peacefully inclined. Any future war will be fought largely in the air, and the public is not likely to remain entirely satisfied with our present position. At the same time, the facts alleged by the various schools of opinion are so contradictory that it appears to me peculiarly difficult for the ordinary man to come to an instructed opinion.

Dyes and Sugar.

The two war industries which the Government was instrumental in setting up—the manufacture of dye-stuffs and sugar-beet—have been coming in for a good deal of criticism lately, particularly from the extreme Free Trade school. The industries themselves have been passing through the same difficult time as all other trades, but much of the criticism has been by no means fair.

Home-grown sugar, which was floated two years ago by private capital and a Government grant, has made a heavy loss on its first two years. The sugar refiners, who have always been opposed to the industry, are now suggesting that the prospects of success are hopeless, and that it should be shut down. To this the answer is made that many enterprises which are eventually successful often make an initial loss, and that to shut down now would be the height of folly. A large amount of sugar-beet has been grown, and farmers are beginning

to understand the advantages of this additional crop in their rotation ; it has increased employment in the country during the winter, at the very time when employment is required ; and it has put sugar of high quality on the market. All that remains is for the industry to make a profit, which could not be reasonably be expected in any event in the first two years, especially when these happened to synchronise with a heavy fall in the price of sugar. I think Home-Grown Sugar has made out its case.

The position of British Dyes, a larger corporation, is more complex. The company was hampered at the start by a political chairman. During the war and for some time afterwards the demand for munitions and dyes was so great that it specialised on quantity at the expense of quality ; but the fine chemical trade ultimately depends on quality. Three years ago the company was reconstructed and over-capitalised ; there followed the fall of prices, large stores had to be written down heavily, and the last two dividends have been passed.

These troubles can be overcome. The fine chemical trade is essential to manufacturers in peace, as the North of England has determined never again to be dependent on Germany for dyes ; and it is essential to the Government in war now that war has become so largely a chemical conflict. In these circumstances the only thing to be done is to reconstruct the company on sound commercial lines and try again. At the annual meeting at Manchester last week it was decided to do this.

Church-going and Cricket.

Dean Inge, the *enfant terrible* of St. Paul's, has been speaking his mind again. He says that the decline of church-going is not necessarily a sign of national degeneration ; he thinks it a good thing to go to church on Sunday, but he admits that sermons are dull and that cricket and golf are very interesting ; and he says straight out that those who work hard all the week have earned the right to fresh air and exercise on the one day of the week in which they can get it.

It seems *à propos* to add that the Church Militant was very much in evidence last week, for twenty-two parsons from two dioceses fought each other, not in convocation or a Chapter House, but at Lords. I am told that the cricket, unlike the sermons, was exciting, and the whole game was first-class ; the victory was only gained by one run. The form was so good that really we ought to introduce a new form of test match, and when the Australians have hopelessly beaten England on the next tour, perhaps the Church of England may save the national reputation. In the event of victory the captain of the team should certainly be made a bishop.

Three Books on Philosophy.

It is quite clear that serious reading is on the increase, for no fewer than three books on philosophy have been published in a week. Of these "The Philosophy of Humanism" (Murray) by Lord Haldane, will hardly repeat the success of its predecessor "The Reign of Relativity." It is interesting, but rather hasty ; and in places it is superficial. "The New Idealism" (Macmillan) by May Sinclair, better known as a novelist,

resolves itself into a criticism of the work of Professors Alexander, Whitehead, and the new realists, who have knocked a good many holes in the mantle of the old idealism.

The third book, "A Theory of Monads," (Macmillan) by Professor Weldon Carr, is a far more noteworthy work, and deserves prolonged study as well as the ordinary skimming which is more than enough for most metaphysical writers. It would be absurd to attempt to review a book of this quality in a few lines ; suffice it to say that Professor Carr combines Bergson and Einstein. He postulates that "Monadism means that reality is activity and not a stuff of which activity may be an attribute, quality, or endowment." Another and more difficult point he makes is this : "We may seem to be obeying an instinct of our nature when we put our trust in God. But the God in whom we trust is an idol of our imagination. We construct it and then lean on it for support. But even could we endow it with real existence or discern in it independent activity, it would be as far away as ever from the satisfaction which philosophy needs."

The Week's Books.

"The Pomp of Power" (Hutchinson) is another anonymous book of personalia of the popular type. The following characterisation of Lord Balfour shows its quality : "I have heard him at a critical period of the war, and while he was Secretary of State for Foreign Affairs, discuss after dinner the prospects, the chances of our ultimately winning, with the interest of a person observing a great phenomenon which in no way affected him personally : the interest one might have expected to be displayed by a week-end visitor from Mars."

Of Krassin, whom the author calls "a man of affairs rather than a dreamer or fanatic," it is said "he did not hide from me that the result of England and France both absolutely refusing to have any dealings with Russia would mean a war with Poland. He admitted that such a war would be lengthy, and said that Russia was making preparations accordingly."

"Between Two Continents" (Eveleigh Nash) by Prince William of Sweden, is a lively and informative account of travels in Yucatan, Guatemala, and San Salvador. It contains an interesting description of the splendid ruins of Tuloom, and wonderful chapter about a revolution in Guatemala, during which a Jew rushed into the Prince's hotel with the following invitation : "I haf eleven fine new corpses in my house. Come and see, come and see ! I charge you nothing at all, not one little commision, for eleven fine new corpses !"

"Harmonism and Conscious Evolution" (Murray) by Sir Charles Walston, is a study in aesthetics. The author's theory is that "aesthetic perceptions, emotions and principles are so primary and so elemental in the evolution and activity of the human mind that ultimately truth, utility, and goodness must be referred back to them." The author produces a great deal of evidence in support of his proposition, but it is a large assumption that he requires us to make, and I am afraid he leaves me unconvinced.

WAR CASUALTIES IN THE EAST.

In the House of Commons, on June 19, Sir L. Worthington-Evans, replying to a question, stated that the approximate total number of officers and men employed in Egypt and Palestine during the War was 1,192,511 ; the number employed in Mesopotamia was approximately 889,702. The numbers killed, including died of wounds or disease, were 16,366 in Egypt and Palestine, and 31,758 in Mesopotamia. The numbers of wounded were 38,090 and 51,156 respectively.

The Palestine Government has again made arrangements with the Egyptian Government whereby a limited number of pilgrims from Palestine can accompany the Egyptian Pilgrims to Mecca, via Suez and Jeddah. The Emir el Haj had been approached in order that the well-being and comfort of the Pilgrims from Palestine should be ensured. The cost for the double journey to third-class passengers would be about £E.20, and first-class £E.36.

EGYPT.

Cairo, June 16.

The Prince of Wales' Visit.

The Prince of Wales has come and gone. Brief though his visit was, he managed to set his personal mark on Egypt. His Royal Highness arrived on the afternoon of the 9th at Suez, where he was greeted by Said Pasha Zulfikar on behalf of King Fuad, and by Captain Hindley and Mr. Vereker on behalf of the High Commissioner. Already on landing he had evidence of the foreign communities' pleasurable expectation in the warm welcome which was extended to him by a group of English and French residents on the quay. At Cairo, also, where he was met by the High Commissioner, a crowd of British, who had established themselves within the station in spite of regulations, cheered him most warmly as he passed on the platform, and the cheering was taken up by the European crowd outside the station.

The Prince of Wales had a busy but to all accounts most enjoyable two days in Cairo, and the British community had every opportunity of seeing him. On the morning after his arrival he drove to Abdin Palace to call on the King, and was received with cheers by the British residents who had congregated along the route. Later King Fuad returned the visit at the Residency, where the Prince stayed as the guest of the High Commissioner and Lady Allenby; and in the afternoon His Royal Highness played polo at Gezira.

Were this the winter season, I should have characterised the polo match as the "clou" of the season. As it is, however, this is very much the hot portion of the year, a fact which made the scene at Gezira all the more remarkable. It is, indeed, no exaggeration to say that it is a very long time, dating back possibly before the War, since such a representative social gathering of cosmopolitan Cairo has assembled here, and it is certainly many years since we have witnessed such fast play as was exhibited in the match in which the Prince took part.

The two sides were pretty evenly matched. The Prince's team consisted of Seifullah Yusri Pasha and Captain Pigot Moodie and Captain Scot Robson of the Scots Greys; and their opponents were Lieut.-Col. Cavendish, the Hon. D. Erskine, Mr. Harris and Major Reynolds representing the 9th Lancers. The match ended in a victory for the former by six goals to two, of which the Prince, whose play according to experts was quite first-class, shot two. The cup which was offered by King Fuad was presented to the Prince by Prince Djemil Tussoun, and His Royal Highness received a most extraordinary ovation as he drove off the ground.

The same evening he attended a boxing competition organized at Kasr El Nil Barracks in his honour, and at the conclusion he distributed the prizes, making a happily-phrased little speech, which was received with enthusiasm by the troops. Next day he was the guest of honour at a luncheon party offered by King Fuad in Abdin Palace, at which the other guests included the High Commissioner and Lady Allenby and the Ministers. After the luncheon King Fuad invested the Prince with the Collar of the Order of Mohamed Aly, the highest distinction in the gift of the Throne, and hitherto reserved to members of the reigning house. The same evening the Prince of Wales left for Port Said, where he went on board the 'Renown.'

So much has appeared about the charming personality of our future King that I feel that nothing I write could add to the picture of the wonderful impression he has made on all who have come into contact with him. Nevertheless, there is one feature to which I feel I ought to draw attention, and that is the extraordinary magnetic influence he exercises over all who see him, let alone those who actually come near to, or converse with, him. One of the most amazing features of his

visit has indeed been the almost rapturous terms with which people of all nationalities who have merely seen him at a distance refer to him, and there is no doubt that as in other parts of the East his visit has been fraught with far-reaching beneficial results.

The Foreign Officials Question.

The latest topic is the question of compensation to dismissed or retiring British officials which, owing to the curious, though in the circumstances not altogether unexpected, action of the Cabinet, may create a serious situation. I will endeavour briefly to recapitulate the facts.

In the Milner proposals, one of the important points put forward was that any change in the political status of Egypt, connoting as it would the substitution of Egyptian for British control, must be accompanied by a scheme of compensation to be paid to officials who might be dismissed by the Egyptian Government, or who felt compelled to retire in consequence of the changed conditions.

It may here be convenient to explain that members of the Egyptian Civil Service have a very special position as compared with the various Civil Services in the Empire, in that they cannot be retired until the age of sixty except for ill-health, misconduct or in certain special circumstances which do not cover the change now introduced, and that in consequence of this special position it was recognised that they must receive a special form of compensation.

The British officials put forward in due course a scheme which met with the approval of their foreign colleagues and was approved of by the High Commissioner and the Foreign Office. This scheme was handed last summer to the Official Delegation, who put in counter-proposals; and the two schemes were submitted to the Government Actuary, who reported that that of the Delegation was inequitable and made certain technical criticisms of the British Officials' tables. The officials duly amended their tables in the light of those criticisms, and after Egypt had been given her independence and Egyptians began to displace Englishmen in the higher posts they put forward their proposals to the High Commissioner.

Lord Allenby went thoroughly into the question and decided that the time had come to take up the matter with the Egyptian Government. He, however, decided that there should be no bargaining; and in order to avoid this he made certain amendments in the tables, which produced a reduction of over 20 per cent. in the amounts that might be payable to retiring or dismissed officials as compared with what would have been payable under the officials' own scheme. In addition since the Egyptians seemed to fear that there might be a general exodus, a provision was inserted whereunder, while the Egyptian Government acquired an unrestricted right to dismiss, the High Commissioner would exercise a veto over retirements, although in principle the reciprocal right of the officials to retire was to be recognised.

These amended proposals were in due course handed to the Cabinet, which after considerable discussion replied that it could not entertain them, as this was a matter which concerned Parliament and it had no power to enter into any agreement binding several budgets. At the same time the Cabinet offered to treat generously any cases which in the meantime might come up for consideration, and declared that it had no intention of dismissing any European officials.

The views held by the foreign officials appear to be the following. They say that while the question of dismissal is important, what exercises them in an equally important degree is their present and future position. This has been radically affected by the removal of British control and the adoption of the policy of appointing Egyptians to high posts hitherto held by Englishmen; and they are unanimous in the view that only a general

scheme laying down the terms applicable to everyone will safeguard the interests of both those who wish to go and those who are retained.

Indeed, they object very strongly to the undignified position of having to bargain with the Government in which the absence of any definite scheme places those officials who as a direct result of the changed conditions may find it difficult to continue in the service.

Port Said, June 17.

The chief event of the last few days has been the passage of the 'Renown' with the Prince of Wales, returning from his tour in the East. The Prince left the ship at Suez, and paid a state visit to Cairo, returning to Port Said by special train in the early hours of Monday morning. H.M.S. 'Renown' came through the Canal in twelve hours and thirty-five minutes' actual steaming time, which is considerably less than the average time of transit. In view of her immense size (she is roughly one hundred feet longer than anything that has been through before) this passage reflects the greatest credit on the pilots, Captain Pertwee and Lieut.-Commander Lyddon, as well as on the general arrangements made by the officials of the Canal Company. The 'Renown' left on Monday morning escorted by the Cruiser 'Comus' and, in the harbour limits, by the Canal Company's tugs. Overhead there were several aeroplanes, hovering and performing evolutions.

IRAQ (Mesopotamia).

Baghdad, June 9.

Extremist Indiscretion.

The political situation continues to improve, thanks largely to the efforts of the extremists, the excess of whose energies in opposition to the Mandate is beginning to react against them. On the first day of the Ramadan Id the extremists attempted to organize a big meeting in the Haidarkhanah mosque to protest against the Mandate and to demand complete independence. Government got wind of the intention, and, fearing that disturbances might ensue, issued instructions that the

meeting was not to be held. Frustrated in this way, a small number proceeded to the King's Palace and made some show of a demonstration, but it was noticeable that they received very little support from the Baghdadis as a whole; and their efforts on that day may be regarded as showing what little support the extremists have even in the capital. There are doubtless a number of persons opposed to the Mandate who deem it inadvisable to appear on such occasions, but it was shown that the number of people who are prepared to come out into the open and definitely side against the Mandate is comparatively insignificant.

Clerical Interference.

The sequel to the attempts made on the Id came a day or two ago, when an announcement appeared in all the local vernacular papers signed by Sh. Mehdi al Khalisi, S. Muhammad as Sadr, Sh. Ahmad Daoud, Sh. Mehdi al Buseir and Hamdi Beg Pachachi, declaring that they had been commissioned by the people of Iraq to make known to all and sundry the determination of the Iraqis to accept no Mandate and to stand out for complete independence, and that a telegram in that strain had been sent by them to the League of Nations, the parliaments of Great Britain, America, France and Italy, President Harding and the principal newspapers of America and Europe. This action of the five 'commissioners' has given the extremist cause a greater setback than anything else could have done. It has become increasingly noticeable to what extent the politicians of this country in particular and the people in general resent the interference of the religious leaders in politics, and this instance has proved to be no exception. It will be noted that three of the 'commissioners' are Shiah *ulama*, one Sheikh Ahmad Daoud, a Sunni *alim* and only one, Hamdi Bey Pachachi, a layman. Their action has served only to infuriate those whom they had regarded as their supporters, and has driven many of the more luke-warm extremists into the moderates' camp. Thus the excess of zeal of the extremists is proving their undoing, and is strengthening the hands of the more orderly elements. Meanwhile all sorts of rumours are being circulated as to what is going to happen if the Mandate is refused. The rumour which gains most credence is that the British will evacuate the country, and leave the Arabs to carry on as best they can. Such an action would, they realize, lead to awful anarchy and complete disorder. Other rumours are that in the event of the rejection of the Mandate the country will be made a British colony or will be given back to the Turks. The story that the country is to go back to the Turks is making people seriously consider the Mandate question, as, though the Turks are not without supporters in Iraq, most people would infinitely prefer British rule to Turkish.

The Draft Treaty.

The Council of Ministers is understood to have finished the discussion of the draft treaty and to have sent to the Home Government some suggestions regarding modifications to certain clauses, and the Home Government's reply is being awaited before any further discussions are held here.

The Iraq railways in their attempt to pay their way this year have produced a new tariff, which came into operation on June 1. In it an attempt has been made to compete with the rivers by reducing rates on the Basrah-Baghdad section to approximately the level of the existing river freight charges, while the rates have in general been increased on the other sections where there is no river competition. Opinion here is very sceptical regarding the possibility of making the railways pay their way this year even with the new tariff. A revival of trade might help them to do so, but there seems little likelihood of their doing so while the present trade depression lasts.

General News.

Nuri Pasha Said has relinquished his post as Director General of Police and has reverted to his previous appointment of Chief of the General Staff of the Iraq Army. He is succeeded as head of the police by Ismail Beg as Saffar.

Mr. H. A. Smallwood, C.M.G., late Financial Secretary to the Palestine Government, has arrived in Baghdad and taken over the duties of Financial Adviser to the High Commissioner.

The weather at the beginning of June has been abnormally hot, and the *shimal* (north wind), which should have set in by now, has not yet arrived.

PALESTINE.

Jerusalem, June 18.

The Arabs and the Mandate.

A tone of tearful despair is prevailing in Arab circles at the near approach of July 15, and at their helplessness in face of the probable ratification of the Mandate on that date. The *Miraat esh-Shark*, after warning the Arabs no longer to put their trust in the few English lords and the outcries of a few odd English papers, advises its readers to face the fact that "the great majority of members of both Houses of Parliament are against us and not for us, that the Ministry of Lloyd George still stands fast, that the Entente States together with America and the Vatican have consented to the English Mandate—not to mention the world-wide political influence of the Jews." In face of this solid phalanx of opposition all that the *Miraat esh-Shark* can suggest is that "the various Arab associations and the Executive Council of the Palestinian-Arab Delegation should immediately summon a congress in Jerusalem to deal with the matter and decide on some plan of campaign before it is too late." Something, the paper urges, must be done lest "it be written down in history that the Palestinian nation slept away its last moments, committing its affairs to blind chance."

The *Lisan el-Arab* in a leader entitled "Betwixt Hope and Despair" is slightly more hopeful. Arising out of the disputes over the Holy Places it ventures a hope that salvation may yet spring up for the Arabs. And it also expresses the opinion that, after all, the Arabs place too much importance on the decision of the League of Nations and too little on their own actions in this emergency. It is distinctly refreshing to see the Arab cross-questioning himself: "What have we ever done so far to put our own house in order? Has a voice yet been heard among us urging the reform of our schools and the developing of them to the requisite standard? Have any of our men of wealth moved a finger towards founding institutions of economic or material value, the lack of which is daily felt so sorely? Where are the agricultural banks? Where are the societies for the fostering of commerce? Where are there useful associations of any kind whatsoever?..... Let the more noisy spirits hold their peace and turn their attention to something useful; and then are we sure that our freedom will be secured!"

Propaganda in Mecca.

The executive of the Arab Delegation has decided to send a special delegation to Mecca during the coming weeks to seize the opportunity of the Hajj. It is to be composed of three men who shall conduct propaganda and raise funds for the Arab Nationalist movement in Palestine. The Jaffa Arab paper *Falastin* urges that some of the delegation should know English in order to get into touch with pilgrims from India. The same paper also proposes that the day of the delegation's departure for the Hejaz should be officially proclaimed as a general day of prayer in all the towns of Palestine, and instructs the Executive Council to draw up the form of prayer.

This week the same paper, while animadverting on the parlous state to which the Zionist policy of the British Administration has reduced the country, reverts to its favourite topic that under the pretence of administrative economy "any District Governor or any official or anybody else who attempts to combat the Zionist disease and preserve the fair fame of the British Mandate or refuses to work in accordance with the spirit of those Jewish refugees who are crushing out the Arabs—is forthwith dismissed from his post." The paper then goes on to dilate on the material damage accruing to the

country, and the ill-return which the Jews have made to Great Britain in exchange for Great Britain's kindness to them: how they have destroyed her commerce and her good name, how they have withstood the spread of the English language for the sake of their own affairs and the spread of their two languages, Hebrew and Yiddish; and it winds up with an appeal to figures, as proving the financially ruinous results of the present policy. After laying down the premiss that conditions now show scarcely any improvement on conditions during the Turkish régime, it contrasts the British annual Palestinian budget of two and a half millions with the £325,000 which was all that it rose to in the days of the Turk. The *Falastin* then gives the following interesting details of the two Administrations:—

	British	Turkish
Treasury	32,000	7,500
Controller of Stores	10,000	nil.
Industry and Commerce	5,000	nil.
Ports and Lights	11,000	1,300
Public Health	43,000	5,000
Public Security	216,000	30,000
Education	91,000	nil.
Posts and Telegraphs	119,000	22,000
Railways	754,000	42,000

But from these figures most people would draw somewhat different conclusions from those of the *Falastin*.

Changes in the Administration.

The resignation of Sir William Deedes from the post of Civil Secretary is being gradually accepted as an inevitable but none the less lamentable fact. A rumour as to his resignation became current early in the year, but everybody hoped that it had no real foundation. Jewish, Arab and English circles are unanimous—an almost unheard-of state of things in Palestine—in their genuine regret at the impending loss to the Administration. Sir Wyndham, during his two years' work, has built for himself an unchallenged reputation for single-minded straightforwardness: no one has been heard to hint at any bias in him towards either Arab or Jewish faction. When the Civil Administration began in 1920 there was scarcely an official without his popular label—pro-this or pro-that. The Governor of Jerusalem preserved his reputation for versatility by winning the distinction of being pro-both. But in spite of the bitter complaints of certain Arab circles—as exemplified in the above extract from the Arab press—to the contrary, the tendency to affix pro- or anti- labels to the various officials becomes less and less, and we find ourselves ever more and more, with each new appointment, in the hands of men who are pure and simple "administrators" with a single eye to their work and no excessive interest in the ramifications of local politics. This is as it should be; and there can be no question that it is the character of the Civil Secretary and the nicely poised diplomacy of the High Commissioner which have brought about this marked modification in the personnel of the Administration.

There are still a few hopes expressed that Sir Wyndham will be persuaded to remain. Should the Mandate be ratified in its present shape at the next session of the League of Nations, it is even more important in the interests of the Arabs' peace of mind that there should be in a responsible position such an administrator as Sir Wyndham—one who can apply the terms of the Mandate in such a way as to avoid suspicion of neglecting in the slightest degree the legitimate interests of Arab Palestinians.

The Death of Dr. Nies.

Archaeology in Jerusalem and the cause of Assyriology have just suffered a heavy loss in the death of the American Assyriologist, Dr. James B. Nies, which happened suddenly in Jerusalem to-day. Dr. Nies was the very unusual combination of scholar, man of wealth and patron of learning. He came out to Jerusalem some weeks ago to supervise the building of the new premises of the American School of Archaeological research, for which he had himself provided generous endowment. He then proposed to go on to Baghdad,

and there, in conjunction with Professor Clay, to found an American Institute of Assyriology. Dr. Nies's collection of cuneiform tablets is scarcely less important than that of Pierpoint Morgan.

ALBANIA.

Tirana, June 5.

The Internal Situation.

The present state of the country gives grounds for optimism, for the power of the Government is becoming more and more established; disarmament continues, and every undertaking has been crowned with success. At the moment of writing forces of Albanian gendarmerie are operating to the extreme east of Scutari, towards Hassi; Bairam Tsurri and his companions have fled, for on May 16 these rebels came into contact with the Albanian gendarmerie and were routed, one man being killed. It is hoped that shortly the whole of the "mountaineer" party of the eastern region will be weeded out, and that no source of anxiety will thereafter remain.

The League of Nations.

Lord Balfour, the delegate of Great Britain, spoke sympathetically of Albanian affairs at the Council of the League of Nations on May 12 and 13 last. The League decided to send once more M. Sederholm (the delegate of Finland) to supervise the evacuation by Greece of the southern zone, thus to avoid difficulties and friction between the two countries.

Another Commission will likewise be sent by the League to study the economic and financial situation of Albania and to advise means of helping the country in its development.

Relations with Neighbours.

Since May 20 the telegraph wires of Albania have been linked up with the Serbian wires, and messages leave and arrive in Albania by this route. It should be remembered that hitherto the same route had been used for the telegraph as for the Italian cable Otranto-Valona—which placed Albania in a condition of dependence, messages very often being refused or intercepted by the Italian post-offices. It is hoped soon to arrange a postal service also over the Serbian route. It only remains for Greece to conclude a postal and telegraphic agreement with Albania in order that the country may enjoy complete liberty in its communications abroad. The Tirana Government is endeavouring to secure the closing of the Italian post-offices which still exist at Valona, Durazzo and Scutari, and also the two small radio stations at Durazzo and Scutari.

The Marriage of King Alexander.

The arrival at Tirana of the Yugoslav Chargé d'Affaires M. Ilitch, has given the Albanian Government the opportunity of delegating General Ali Riza Kologna and Captain Selaheddin Bloshmi, to represent Albania at Belgrade at the wedding of King Alexander.

A Reform.

Those who have visited the East know the uncere- monious attitude of the living towards the dead, who are buried almost anywhere, so that little cemeteries are scattered about in all quarters, often occupying the best places in the town. A sad, though picturesque spectacle! Since the events of March an order has been issued to all the municipalities to transform the little cemeteries of the towns into small squares or building grounds, and the latter will be sold to the benefit of the municipality. Thus, the tombs which could be seen round the mosques

of Tirana have made way for modest gardens, and for new *boulevards*, while buyers and builders are awaited.

TURKEY.

Constantinople, June 11.

The Bombardment of Samsoun.

According to all accounts, the bombardment of Samsoun by Greek warships, on June 7, involved little loss of life, although the Sublime Porte's official protest speaks of "numerous" lives being lost and "considerable damage." The most important damage appears to have been the destruction of the oil depots. According to a trustworthy Turkish account, twenty Moslem and fifteen Christian houses were destroyed, whilst only four persons were killed and three wounded. A Turkish paper, the *Yeni Shark*, published on the 10th inst., a report of the Commander of the American destroyer which was on the spot; and according to this report, the guns of the Greek ships failed to reach the munitions depots outside the town. It seems quite clear, therefore, that the Greeks were quite justified in their action, if any additional evidence were required. As a matter of fact, it is common knowledge that Samsoun, like Ineboli and Trebizond, is a port which has been regularly utilised for the discharge of war materials from Russia and elsewhere for the last eighteen months at least.

The official protest of the Kemalists and the comments of the Kemalist press are worthy of note in certain respects. In Yusuf Kemal's protest it is suggested that the Greek Government's motive was to "provoke a rebellion of native Greeks against the Turkish State," and to create effervescence amongst the Moslems of Anatolia. These statements would be laughable, were it not for the sinister hints of what lies behind them afforded by the leading articles of the Kemalist press. For instance the *Tevhid Efkiar* published on June 10 a leading article in which the following remarks appeared.

"A repetition of such attacks would only cause the Turks to despair of the triumph of right and justice. (*Sic.*) We see quite clearly that the enemy means to resort to all kinds of atrocities against us, and this conviction is likely to force us to excesses. We shall have to resort to extreme measures to meet the criminal actions of the enemy."

The italics are the writer's.

A strange argument surely! The bombardment of the Greek island of Syra during the Balkan War by the Turkish warship Hamidié was an act of heroism, but if the Greeks bombard Turkish ports with depots of war material, where war supplies are discharged, the circumstance may justify "extreme measures" involving "excesses."

Angora and Dr. Nihad Rechad Bey.

Those who read Dr. Nihad Rechad Bey's statements concerning Turkish claims will be interested to hear that the Angora Government has openly repudiated its late Paris representative. On June 8, Yusuf Kemal Bey, in reply to a question by Faik Bey, Deputy for Adrianople (!), stated that Dr. Nihad Rechad Bey had been given no authority, nor was he a representative or envoy of the Angora Government.

An Outbreak of Rabies.

A certain amount of alarm has been caused by an outbreak of rabies amongst the dogs of Constantinople, which have not yet been completely exterminated. The outbreak began in the Anatolian suburbs of Kadiköy

and the neighbourhood. Several people were bitten, including an unfortunate Turkish policeman, who was not treated in time and died in the horrible manner which is inevitable in such circumstances. The authorities promptly intensified the measures for the destruction of stray dogs, but although some 1,700 have been destroyed, it is estimated that at least 3,000 remain. The "pi-dog" is sometimes regarded with sentimental affection by people who seem to see romance in anything unusual, but close acquaintance with the Turkish "pi-dog" is a sure cure for such ideas. Not only are they a fruitful source of disease and danger, but their sustained barking at night is often maddening for those who sleep lightly and with open windows. The animals seem to possess a subtle sense of danger, however, for it is reported that numbers have left the city since the measures for their extermination have been commenced, and roam the country in small packs.

The Visit of Claude Farrère.

M. Claude Farrère, the author of "*L'Homme Qui assassina*," arrived in Constantinople on June 5, and was given an extraordinary reception by a large Turkish crowd which assembled to support the officials who had been sent to welcome the Turkophil novelist. An official of the Ministry of Foreign Affairs was appointed as major domo, and a handsome apartment in Stamboul was placed at the disposal of the illustrious guest, who was loudly cheered as his motor car bore him to his residence. The enthusiasm appears to have awakened a sympathetic echo in the breast of the romanticist, for at one point along the road he shouted at the top of his voice, "Long live my Padishah." At least, that is what the Turkish phrase he cried signifies—"Padishahim chok yasha." M. Farrère was to have paid a visit to Angora, but he has unfortunately been recalled to Paris on urgent business. It would have been interesting to learn what effect his cry of "Long live my Padishah!" would have had in Angora, where Mustapha Kemal and his friends are doing their best to undermine the dynasty. On June 11, however, M. Farrère will pay a visit to the Dardanelles and inspect the graves of the "Turkish and French" soldiers who fell in the course of the war. It is just possible that he may see other graves as well, but the sight might arouse uncomfortable thoughts, and he will, therefore, concentrate his attention upon those of his Turkish friends.

ASIA MINOR.

Smyrna, June 9.

Three Greek soldiers, by insisting on obtaining refreshments, created a disturbance at the Aidin factory belonging to the McAndrews & Forbes Co., liquorice merchants. The manager of the factory was compelled to draw his revolver, whereupon two of the soldiers fired off their rifles without effect, and were then hurried away by their companion. Tried by court-martial, the two soldiers who fired were sentenced to eight years' imprisonment.

SYRIA.

Beyrout, June 7.

A Contradiction.

In the Notes of the Week of your issue of May 11, it is stated that "at a dinner given at the French High Commission in Constantinople in honour of General Gouraud the latter, in an after-dinner speech, said that the Turks would do well to reject the recent proposals of the Allies, as they would secure much better terms by holding out." After making inquiries in the proper quarter, I am in a position to affirm that General Gouraud did not make a speech at a dinner or banquet in Constantinople, and that if he had done so, and had had occasion to refer to the Turks, he would have told them that it is in their highest interest not to reject the proposals made to them by the Allies. Indeed, General Gouraud, I am informed by the same authority, has always advocated close Franco-British co-operation as

the only sound policy for the successful handling of Middle Eastern problems. In an interview accorded to your correspondent in November last at Paris, he laid special stress on this fact, and very recently, in the course of a conversation with the Beyrout Correspondent of *The Times*, it was stated with equal emphasis that, as the recent demonstrations in Syria bore a curious resemblance to those of Egypt and pointed to a common source of trouble, Franco-British co-operation was an imperious necessity to grapple with a common danger.

First Parliament of the Lebanon.

At the opening of the first session of the Council of Representatives on May 25, an important speech was delivered by General Gouraud. The *Arrêté* defining the powers of this Council was promulgated in March, and its wording had given rise to some misapprehensions on the part of the public. General Gouraud's address was intended to allay anxiety on the subject. In the course of his speech he said:—

"In your prerogatives in financial as well as in legislative matters you have extensive rights, and, as some errors of misinterpretation have arisen on this point, I wish to seize this opportunity to dispel them. The matter can be put in a nutshell. No question interesting the State is to be solved without your having been called upon to discuss it. No legislative measure is to come into force in the Grand Liban before it has been submitted to the examination of its elected Council. No fiscal charges can be created or increased without a favourable vote of this Council. Every budget of the Grand Liban is to be discussed by you in all its parts."

After referring to the question of loans required by the State, in regard to which the intervention of the Haut Commissariat becomes necessary, only after the Council has failed in its efforts to deal with the matter, he said: "You are going to hold in your hands the whole development of the country."

General Gouraud pointed out that the Council would have the right of discussing the choice of delegates of the Lebanese Government to confer with delegates of the neighbouring States on matters of common interest, such as customs, posts, and telegraphs. He added: "I believe that the measures taken to ensure the future relations between the Grand Lebanon and the Syrian States entirely respect its independence. I wish here to be categorical. The independence proclaimed on September 1, 1920, before all the world and in the name of France, shall be fully maintained. It answers both the wish of the people and the will of France. Not only shall I not allow any open attempt against it, but shall in no way encourage any legislative measure calculated to undermine it or surreptitiously lead to its diminution."

The concluding part of the address defined the meaning of the Mandate: "The Mandatory Power adheres strictly to the role of a guide, which is the very essence of the mandatory régime. What is a guide? It is an experienced man to whom the traveller entrusts himself along a new road. So long as the road is straight, and not beset with difficulties, the guide has nothing to say and yet his presence is useful by the confidence he inspires. This first legislature is of capital importance. It may decide, for ever, perhaps, the direction wherein the future of your country lies. I trust that your counsels will always be so justified that they cannot but be followed, and that they cannot but compel acceptance by their intrinsic value. I further trust that your initiative will not have to be superseded by that of your Governor."

The composition of the Council is less unsatisfactory than had been expected, in view of the fact that the electoral campaign was not free from pressure and interference, as may happen in countries much more advanced constitutionally.

If you find this week's issue of THE NEAR EAST of interest, please help to make the Paper still more widely known by securing subscribers among your friends.

OBITUARY.

M. TAKE JONESCU.

News of the death of M. Take Jonescu in Rome was received with sincere regret in many quarters in Great Britain, where he had made and kept a wide circle of friends. M. Take Jonescu had been taken ill a few weeks previously in Naples, and was removed to Rome, where he died of angina pectoris on June 21 in a nursing home.

M. Take Jonescu was born at Ploeshti, Roumania, on October 25, 1858. The generosity of a wealthy Frenchman, who was interested in his family, enabled young Jonescu at the age of seventeen, after graduating at Bucharest, to proceed to France, where he studied law. He returned to Roumania in May, 1881, and became a member of the Bar. The same year saw him in London, where his marriage with Miss Bessie Richards took place in November. The tragic circumstances of her death in May, 1918, as a result of a fall from her horse in Hyde Park, are still fresh in the memory. As a lawyer M. Take Jonescu, who was a man of brilliant parts, of wide learning and a telling speaker, achieved great eminence in Roumania, and his name is associated with many of the famous cases of his time; but it was in the political world that he sought to realize his ambitions. From the earliest days his speciality was foreign affairs, and the reputation that he gained for himself in Europe went far to compensate him for a certain lack of appreciation among his own fellow-countrymen. M. Clémenceau gave him the name of "a great European," and M. Take Jonescu deserved it. His standing in Roumania brought him in touch with the political leaders of Europe, and his charm of manner and good comradeship made him an excellent ambassador for his country. Perhaps his most notable achievement in international affairs was his successful role as mediator between Turkey and Greece in 1913. When the great test came in 1914, Take Jonescu played his part unflinchingly. He rallied the opposition to King Carol's policy of committing Roumania to the side of the Central Powers on the strength of the King's military treaty with them, with the result that Roumania remained at the first neutral. Her subsequent history is common knowledge; but to the credit of Take Jonescu, who was a personal sufferer from the war, and of the vast bulk of his fellow-countrymen, it must be said that the wisdom of the decision to throw in Roumania's lot with the Allies was never challenged, not even in the darkest days.

At the Paris Conference Take Jonescu was an unofficial observer, but when in June, 1920, he became Roumanian Minister for Foreign Affairs, he based his policy on "the Treaties, the whole Treaties, and nothing but the Treaties." With this end in view he cordially supported the Little Entente, the scheme of Dr. Benes, Foreign Minister and afterwards Prime Minister of Czecho-Slovakia, and was anxious to see it extended to an understanding embracing Poland and Greece.

Towards the close of 1921 his association with M. Averescu, as the strong man of the latter's Cabinet, came to an end, and Take Jonescu, for the first time in his career, was called upon to form a Ministry. It proved, however, short-lived, as it was unable to survive its first meeting with Parliament. At no time had he a numerous following in the country; and his opponents took care that he should never be allowed to forget the measure of the personal hostility against him. But Take Jonescu was a keen fighter, and few worsted him

in debate. Britons will recall him as a real friend of their country and a profound admirer of their institutions.

SIR ALEXANDER McROBERT.

An Appreciation.

We regret to announce the death of Sir Alexander McRobert, who died suddenly on June 22. The following appreciation is from the pen of an old friend:—

Sir Alexander McRobert's death has removed from India a very remarkable man. Widely known as an energetic, eminently successful man of business, he was at heart a student to whom the acquisition of knowledge was an abiding passion.

The son of an Aberdeenshire farmer, he received the sound education Aberdeen gives to her sons, and at an early age began to earn his living in the office of an Aberdeen manufacturer. To McRobert, however, the end of his schooldays was the beginning of real study, and for years he devoted his nights to evening classes and his holidays to passing examinations at South Kensington and elsewhere. Botany, History, Chemistry, Zoology, the Theory of Music, were all one to this prodigious worker. Once, so he told me, he had seventeen subjects in hand at one time, and passed in them all. Thoughts of matrimony made him seek to increase his income, and as the successful candidate in reply to an advertisement he went to India about the year 1884, as the general manager of the Cawnpore Woollen Mills. Hardly had he settled to his work when the Pendjeh incident raised the fear of imminent war with Russia, and the Indian Government, short of supplies, turned to the Woollen Mills, as they did again in 1914. The Company rose to the occasion. The Mills worked night and day. McRobert put in about eighteen hours' work out of the twenty-four. In the midst of the struggle the foreman dyer struck for more money, but to his astonishment was promptly fired out of the place. McRobert was a sound chemist and the few months in the mill had shown him all he required to know on the practical side. From that period the Woollen Mills have never looked back, and under McRobert's wise and far-seeing management are to-day one of the largest concerns of their kind in the world.

Authorities outside the commercial world came to appreciate McRobert's wide range of knowledge and great ability. He was of the governing bodies of Allahabad University and the Roorkee College; Aberdeen University honoured him; Lieutenant-Governors and even Viceroy were glad to take counsel with him. The late Ameer of Afghanistan was not satisfied until McRobert, whom he had met in India, became his honoured guest at Kabul.

It is, however, to "old Mac" that the thoughts of his friends are turning to-day. The irascible old despot who blew a man skyhigh if a bit of wool was out of place and then tortured himself with the thought he might have been unjust; the stern disciplinarian demanding a high standard of efficiency which he did not spare himself and others to attain—but, oh! so thoughtful of women and children and the sick; the pioneer in India of model dwellings; the cunning deviser of provident and other funds and schemes designed to make his men save and better their condition. No man worth his salt was ever the worse for service under McRobert. Faults were corrected, his weaknesses purged, the best in him encouraged. His men might at times swear at him among themselves, but outsiders had scant sympathy if they ventured to condemn the one and only "boss."

It is literally true to say that his word was better than his bond. Shylock and he had I am afraid something in common as regards legal instruments, but his word was a sacred thing, full measure and running over. He could make plans years ahead and keep a secret against any man, but the petty deceptions by which weaker men sometimes achieve their ends he did not understand. "You call it diplomacy. I call it deception," was a characteristic comment upon the innocent

SCHOOL OF ORIENTAL STUDIES.

London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars apply to Sir E. DENISON ROSS, Director.

recital of a friend who by a slight economy of the truth and rearrangement of his facts had settled a matter to his liking.

The work of his bearer was almost a sinecure, his personal expenditure trifling, but his private charities and little acts of kindly help were innumerable; and the Kalimpong Homes, the Cawnpore Hospital, and his native city can testify to his public benefactions.

To his friends he was the most generous and thoughtful of men, but he hated waste in any shape or form, whether of brain or body or pocket, and practised what he held to be right without regard to what the world might think.

He was a "bonny fighter," and did not suffer fools gladly. People handled roughly might misjudge him, but those privileged to understand the true McRobert, the old friends to whom he was so true and loyal, knew that underlying that strong character and powerful intellect there was a modest loving, reverent spirit. He loved the ancient Faith, and I call to mind to-day how the last time I saw him a chance question in conversation as to where to find the "Sermon on the Mount" brought from him without a moment's hesitation the Gospel and the number of the chapter.

D.

PRESS ON THE NEAR EAST.

In consequence of inquiries, the Editor thinks it advisable to state that the quotation from any article does not necessarily imply that the views expressed are shared by "The Near East." On the contrary, an attempt is made to include as far as is possible in the available space all sides of the various questions discussed.

Palestine.

A propos of the condemnation in the House of Lords last week of the Government's policy in Palestine, *The Times* of June 23 has an article upon "The Palestine Mandate" in which it reasserts its sympathy with idealist Zionism and its objection to political Zionism. It proceeds to state how, in its opinion, the British public, "upon whom the responsibility for the mandate rests," has been deceived in this matter:—

The British people believed that they were asked to foster a movement based on religious and race traditions. The experience of the last three years has shown that British generosity has provided an opportunity for a mainly political movement, largely of an alien character, to intrude itself, and to impose itself, upon the administration of our trust in Palestine. British arms conquered the country, a British Administration has been set up at the taxpayers' expense. At the same time a Zionist organization has been allowed to acquire extraordinary powers and to influence in innumerable ways the direction of British policy. Palestine is not an empty land. It has a large Arab-speaking population which the very terms of the Balfour pledge oblige the British Administration fully to protect. It may be admitted that in some respects British rule has improved the lot of the Arabs. It has failed, however, fundamentally. It has failed to inspire confidence, and, on the contrary, has aroused suspicion and unrest. The reason for this, our present deplorable position, in a key-country in the heart of awakening Islam and on the strategic highway to the East, is that British policy in Palestine has been dangerously and incalculably influenced by political Zionism. This movement is aggressive and intolerant. It takes little account of the desires and tradition of the indigenous population. It regards Palestine as a country to be exploited mainly in the interests of Jewish immigrants and the British administration as a body whose chief function should be to make Palestine once again a Jewish country. The question that has now to be faced is whether the attribution of

the mandate to Great Britain means that this country, at great cost to itself, is to undertake to make a Jewish minority dominant in Palestine. Is this country to be called upon to defend the Jews against the growing discontent of the great Arab majority, while by a variety of political and economic methods the Zionists consolidate a political supremacy? Is this the issue involved in the pledge to give a national home to the Jews? If so, is it to be understood that the British promise is to be kept in defiance of broad British interests in the Near East and of British good faith in other directions? What of our impartiality? Is it possible to speak of the impartiality of the British administration in Palestine now in face of the economic monopoly accorded to Zionists in the Rutenberg concessions? How can the Government explain the assertion that, whereas applications for similar concessions were refused to British and Arab promoters, on the ground that the mandate had not yet been confirmed, a monopoly for the exploitation of the water-power of the Jordan was granted to a Jew? Why is it, again we ask, that spiritual Zionism has so soon been degraded by allowing itself to become the instrument of materialist aims and of a sordid type of international finance? Why, above all, should the British Government imperil its reputation for impartiality in the East, why should it plunge the British people into the risk and expense of unending conflict for the sake of an international movement which has declared its intention to use this country merely as an instrument for its own obscure purposes?

60th LONDON DIVISION.

Mr. Edward Fraser, author of "The Soldiers Whom Wellington Led," "The War Drama of the Eagles" and other works, has consented to write a history of the 60th (London) Division. He will be assisted by Lieutenant-Colonel A. C. Temperley, who was G.S.O. 1 of the Division. The history will be published at £1 1s., and particulars can be obtained from Captain G. Cooper Willis, 38, Draycott Place, S.W. The work of the 60th (London) Division was a striking feature of Viscount Allenby's campaign in Palestine. They took part in the capture of Beersheba, and came into prominence when their dashing frontal attack contributed to the fall of Jerusalem. Two Sergeants of the 19th London Regiment of this Division met the Mayor of Jerusalem, and were invited by him to accept the keys of the Holy City. After this the 60th took part in all the fighting in Palestine up to the end of the campaign.

General Hajianestis, the recently-appointed Greek Commander in Chief in Anatolia, left Smyrna for Athens on June 25.

The Indian High Courts Bill, which makes further provision in respect of the qualifications of Judges at the High Courts in British India, was passed by a Standing Committee of the House of Commons last week.

THE ARABS OF THE SUDAN.

"A HISTORY OF THE ARABS IN THE SUDAN." By H. A. MacMichael. (Cambridge University Press: 2 Vols. [4 10s.]

This book carries on a very honourable tradition in the public service. In many, perhaps in most, parts of India and Africa the foundations of Western historical knowledge have been laid by Government officials, both in French dependencies and in our own. The scientific mission is no doubt better qualified to pursue researches into the remote past or collect material which is only significant when it can be compared with material collected from other parts of the globe, but there is one field in which the Government servant starts with special advantages, the period which is covered by the written or oral traditions of the present inhabitants. The intimate and manifold relations which subsist between a political officer and the prominent natives in his district give the former unrivalled opportunities of gleaning stories and traditions and family documents, which throw light upon the history of the period just preceding the introduction of Western control. This period is usually, it must be admitted, an age of relative decadence, but our knowledge of human history is so fragmentary that we can ill afford to lose anything that can still be retrieved. It is fortunate, therefore, that in Mr. MacMichael the Sudan Government possesses a political officer with the enthusiasm and the power to make full use of his opportunities. He is already well known as the author of two books on Kordofan and various scientific papers, but the work under review is much wider in scope and contains the harvest of many years.

The geographical area concerned stretches from the southern frontier of Egypt to the 12th parallel of latitude, where the negro belt begins, and from Darfur in the west to the non-Arabic speaking tribes on the East. The people under discussion include practically all who speak Arabic in this area, though, as the author freely admits, many of these have little or no Arab blood. Now the writing of a history of these people in this area is a matter of peculiar difficulty, because it never formed a united whole in the Arab period, until it was conquered a hundred years ago by Mohammed Ali. From time to time the black Sultans of Sennar may have established a loose kind of suzerainty over a great part of the country, but they never succeeded in fusing it into a single unit, and it was normally divided between a number of petty kings upon the river and nomad sheikhs of tribes in the interior; the history of the Arabs in this area would be the history of a number of little states, whose frontiers were continually changing and the bulk of whose population was hardly Arab. This fact has determined the arrangement of these volumes. They are divided into four parts: the first two parts are concerned respectively, the first, with the earlier racial history of the Sudan, the second, with the progress through Egypt in the Middle Ages of the Arab tribes now represented in the Sudan and their invasions of Dongola. The arrangement in these parts is chronological and brings the history of the country down to about 1500 A.D., but from this point onwards Mr. MacMichael abandons the chronological method and devotes the third and largest part of the first volume to disentangling the complicated ramifications of the present-day Arab tribes. The ultimate

authorities for this section are to be found in some thirty native manuscripts which, as Part 4, are printed in translation with critical notes and introductions in the second volume. The notes and introductions to these documents and the general discussion in the first volume could have been written only by one who has had the author's wide experience of the tribes in question: they are models of what such things should be. Regarded as a whole, the work is somewhat wanting in unity, but the author was concerned less with the production of a finished historical essay than with the salvage of a mass of historical material that was otherwise likely to perish. We have no question that he was right in the choice which he made.

Mr. MacMichael suggests that his haul of documents might have been larger, if so many had not been destroyed by the order of the Mahdi and the Khalifa. There is no doubt that in their time numbers of old manuscripts were burnt or thrown into the river, and an old sheikh once told the reviewer that he had rescued certain papers only by assuring the Khalifa that, as the name of God occurred on every page, the river would certainly throw up the writings again and fire would not consume them! In addition to wilful destruction, accidental village fires and the ravages of white ants are responsible for the disappearance of old papers, and we cannot be too grateful to Mr. MacMichael for having permanently rescued so many survivors. We can hardly hope that there is much still to come and, though additions *may* be made in the future, it is probable that these volumes contain most of the information we are likely to recover concerning the Sudan during the 16th, 17th and 18th centuries.

The great majority of these manuscripts are mere pedigrees, but there are a few scraps of historical interest embedded in the genealogies, and there are one or two texts which are not genealogical at all, the most important of these being a history of the Fung kingdom and the Turkish period down to 1871 A.D. and a series of biographies of holy men known as the *Tabakat wad Dayfulla*. The latter work was written about the year 1805 A.D., and contains short lives of over 250 Mohammedan saints and learned men who flourished in the three preceding centuries. The author is scrupulous to mention the teacher and in most cases also the mother of his subject, but apart from the fact that they all 'lit the fire' of learning and assembled students round them, they differed as much in type as learned men elsewhere. Some few despised the world, dressed in rags and refused riches; others wore the finest raiment, moved in court circles or even treated kings with contempt. Some judged the folk more or less righteously, others led busy secular lives, trading or developing their land; a few wrote learned works; far more proved their sanctity by prophesying and working wonders, raising the dead, slaying their enemies by miraculous means, removing sandbanks in the river, turning water into butter, and so forth. According to the author of this book it was not until the middle of the 16th century that orthodox Islam was taught in the Sudan; the multiplication of religious teachers after this date is very remarkable, and it was undoubtedly to the efforts of these holy men that the sedentary people on the river owed their knowledge of the faith. Mr. MacMichael has only printed extracts from this work, and it throws so many sidelights upon native society that it is to be hoped that he or someone else will publish a complete edition with more notes upon the places, customs and manners mentioned.

After the native texts and the discussion of tribal pedigrees based upon them, the most original part of the work is a long chapter on the non-Arab races of Darfur, which is rather awkwardly sandwiched into Part 1. Mr. MacMichael was attached as political officer to the Darfur Expedition in 1916, and remained there for some time after its successful completion, to assist in the establishment of a regular administration. He had, therefore, exceptional opportunities in a region of ex-

ITALIAN SELF-TAUGHT, GRAMMAR WITH KEY

By G. DALLA VECCHIA and A. C. PANAGULLI.

For learning the language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road, and Sea, Cycling, Motoring, &c. Commercial, Naval and Military Terms, &c., Conversation, so arranged that they may be learned AT A GLANCE, with ENGLISH PHONETIC PRONUNCIATION, Tables of Money with illustrations of Coinage, Weights and Measures.

A course of simple and practical lessons in the Grammar and construction of the Italian language, progressively arranged and fully illustrated with model sentences; useful exercises throughout, and an Alphabetical Vocabulary.

ceptional interest. Darfur had been for many years previously closed to Europeans; few had been there in earlier days, and the Egyptian and Dervish rules had destroyed much less of the native African framework of society. Here as elsewhere Mr. MacMichael's approach is from the ethnic side, but he has more proportionately to say about the culture of the score of non-Arab elements which he distinguishes, and the pages devoted to such folk as the Midobis, the Tungur, the Birked, and the Fur are, perhaps the most interesting in the whole work. We read of serpent spirits who haunt sacred trees and stones, and still receive worship and sacrifice from the Muslims round about, and of little house-elves who will curdle your milk and break your pots if you do not conciliate them. At Jebel Midob there is a festival before the harvest at which the young men cut their long locks: Mr. MacMichael compares it to our May-day feasts, but it is also a rite of adolescence. Very primitive in character was the organisation of the Kingdom of Darfur; the chief dignitaries of state being named after parts of the Sultan's body, the neck for example, the loins, the trunk, and the stomach whose duty it was to collect the corn taxes: the Sultan himself, like various rulers on the Nile and elsewhere, had to sow with his own hand ceremonially at the beginning of the rainy season. Mr. MacMichael argues convincingly on other grounds for the Nubian origin of several of the Darfur tribes, and there is no doubt that the culture described still underlies the more Arabicised culture of other Sudan provinces.

In connection with the Darfur survivals, there is a non-committal note on the different views expressed by Sir Harry Johnston and Professor Seligman respectively as to whether this culture should be called Egyptian or Hamitic: the archaeological evidence accumulated by Dr. Reisner's researches appears to prove decisively that the material culture of this area came directly from Egypt, and it was through, or from, Egypt that, in turn, Islam and Christianity and the worship of Ammon came to the Sudan. Whatever may have been the case farther west, the Anglo-Egyptian Sudan has naturally enough counted in history only when Egypt and the Mediterranean world have been flourishing: when Egypt and the Mediterranean States have been sunk in stagnation, the Sudan has been withdrawn from the main currents of civilisation, impoverished and chaotic. This was the condition of affairs in the Arab period. Mr. MacMichael's book is an outcome of what we hope will be the final ending of this isolation, and he is warmly to be congratulated on the completion of a work which throws light on the old pre-Arab culture of the Sudan as well as on the Arab tribes which, like the Turks in Asia Minor, have tolerantly preserved beneath a light veneer of Mohammedanism so much of the earlier civilization.

MUSICAL NOTES.

GRAMAPHONE RECORDS

There remain unmentioned from the June issue of "His Master's Voice" records some of the more "popular" records, to judge upon which I constantly plead my incompetence, but for which there is, I understand, an equally constant demand in certain regions of the East.

To my mind the most enjoyable of these records under remark are the duets made by that extraordinarily clever young pair of music-hall artists, Norah Blaney and Gwen Farrar. They both have excellent diction, the first requisite in the kind of stuff they perform, they are both extremely versatile, and here Miss Blaney shows that she can play the pianoforte as well as you may like. They have an apparently inexhaustible fund

of "stunts" in their ragging of "ragtime," but their burlesque is never so exaggerated as to be ludicrous. High spirits and a sort of creative imitation mark especially "If you're going back to Dixie," and "Weep no more."

The dances in this issue are perhaps not quite so intriguing as usual, but quite good fun is provided by Paul Whiteman and his orchestra in "They call it dancing," in "Marie," and in "On the 'Gin 'Gin 'Ginny Shore." This conductor contrives in some way to invest the cheapest commonplaces with a certain individuality, and though his dances vary very much in quality, he is never dull—a reproach that must often be made upon jazz bands. Possibly the most agreeable of the foxtrots is the Club Royal Orchestra in "Wimmin," in which is introduced with great effect a song called "Glow little lantern of love."

Of "The Lady of the Rose" waltz I do not think very highly, even as played by De Groot and the Piccadilly Orchestra; but "Ah! Kusoon" is a much better thing, and it is done with very artful reticence by De Groot.

For the sake of those who never miss a *revue* in London (and there are hundreds of such people) it should be mentioned that a fairly representative selection has been made by Philip Braham and the Mayfair Orchestra of "A to Z."

There is one record, on which Ernest Butcher sings two songs—"Old Uncle Ben" and "Grinder John," which is a model of clarity. These two songs are little more than ballads, for Mr. Butcher does not commonly attempt art-songs, but it is a pleasure to hear words so clearly pronounced, and one could wish that such care were expended by vocalists of more renown and greater ambition. Very similar praise may be given to Walter Glynne, whose diction, in a poor setting of Poe's "Annabelle Lee" by Henry Leslie, is not perfect, but whose pronunciation is at least perfectly clear. It is in the matter of enunciation indeed, more than in any other sphere, that singers can still give points to artists.

One may add a brief, pathetic note on one or two typically English productions. First is Miss Rosina Buckman in C. A. Lidgely's "Roundelay," and Ivor Novello's "Fairy Laughter." Lidgely I always think quite the most innocuous of the ballad-mongers; one can call his stuff "pretty" with no reproach implied. But I. Novello (and Miss Buckman for singing him) one cannot acquit so easily. Such records as this do no good to anyone, least of all to the "artist" making them. Then there is the jolly Peter Dawson in Sanderson's "Harlequin" and in Phillip's "Cherrily, yeo ho." The first is as teeming with *clichés* as is "Fairy Laughter"; it shouts for categorization within the stuff that is daily turned out in yards by Messrs. Chappell, Boosey, and so on. But the second, though just as true to type, is not so bad a lilt for land-lubbers. It suggests that the singer is simply dying to spend his days on the ocean, a mode of living which inevitably includes the careless breaking of female hearts and a moralising sunset to his days. In short, those who like this sort of thing will love it.

ANDANTE.

TOPICS IN PARLIAMENT.

The subject headings are those given in the Official Report.

Egypt (Zaghoul Pasha).—Greece and Turkey.—India: Surplus Army Officers (Gratuity); Railway Material (Continental Contracts); Insulators (Tenders); Army Officers (Marriage Allowance).—War Casualties, Palestine and Mesopotamia.—(Monday, 19th June.)

India: Imprisoned Agitators (Burma); Administration (Cost); Civil Service (Pensions); Army Pay and Pensions.—Anglo-Persian Oil Company (Payment of Calls) Bill.—Egypt.—(Tuesday, 20th June.)

Sudan.—Near East: Bosphorus; Samsun (Bombardment); Settlement Proposals.—Palestine (Concessions).—Egypt.—(Wednesday, 21st June.)

Egypt: Martial Law; Deportees.—Near East.—India: Army Officers (Retirement Gratuity).—(Thursday, 22nd June.)

PERSONAL AND GENERAL.**To-day.**

June 29 (New Style).

June 16 (Old Style).

Julkada 4, 1340 A.H. of the Moslem Calendar.

Tamuz 3, 5682 of the Jewish Calendar.

The Aga Khan left London on Friday for Switzerland.

Sir Reginald Wingate celebrated his sixty-first birthday on Sunday.

Sir Alexander and Lady Roger have returned to London from Constantinople.

Victor Harari Pasha, C.B.E., and Mrs. Harari arrived in London last week, and are staying at Claridges Hotel.

Vossough-ed-Dowleh, formerly Premier of Persia, has concluded his stay here, and has gone to France.

M. Jan Masaryk, Counsellor at the Czecho-Slovak Legation, has returned from Prague.

The Maharaja of Kapurthala left London last Friday for France.

Lady Inchcape is suffering from a nervous breakdown and has gone to Glenapp for a few weeks' rest.

The Earl of Cork, who arrived in Khartoum recently from the South, left for Cairo on June 6.

M. Venizelos, who last week received the freedom of the cities of Edinburgh and Glasgow, has left for Paris.

Lady Macready has returned from Egypt, and will reside at 6, Charles Street, Knightsbridge, until the end of August.

Mr. C. A. Willis, Director of Intelligence, Sudan, left Khartoum on June 8 on leave, and is expected in London this week.

Colonel D. Kalafatovitch, Military Attaché at the Yugoslav Legation, Paris, has concluded his stay here and has returned to his duties.

The Yugoslav Legation states that the rumours in regard to the illness of Prince George of Serbia are without any foundation.

Colonel de l'Etat-Major Georges Ostoitch, Military Attaché at the Yugoslav Legation, has concluded his visit to Belgrade, and is back in London.

The engagement is announced of Major L. D. Powell, I.A., attached R.E., elder son of Mr. and Mrs. Powell, of Smethwick, Staffs, to Muriel, elder daughter of Mr. J. W. W. Hopkins, M.P., and Mrs. Hopkins, L.C.C., 80, Regent's Park Road, N.W.1, and New Place, Lingfield.

The engagement is announced of John Dupré Denning, of the Imperial Bank of India, Calcutta, youngest son of Mr. A. D. Denning and Mrs. Denning, of Stafford, and Olive, younger daughter of Sir Evan Jones, Bt., M.P., of Pentower, Fishguard, Pembrokeshire.

Mr. Ronald Storrs, C.M.G., Governor of Jerusalem, is opening to-day (June 29), at twelve noon, an exhibition of pictures of Jerusalem by Major Benton Fletcher, at the Duke of Somerset's residence, 35, Grosvenor Square. It is in aid of the Ophthalmic Hospital at Jerusalem, maintained by the Order of St. John.

Under the auspices of the Anglo-Palestinian Club, Mr. Leonard J. Stein, Political Secretary of the Zionist Organization, delivered a lecture on "The Administra-

tion of Palestine: its Work and Character," at Jews' College, Guildford Street, W.C.1., on June 25, with Mr. Leon Simon in the chair.

The engagement is announced between Kenneth H. Ledward, F.R.G.S., Reserve of Officers, R.G.A., of the Public Record Office, younger son of Mr. Edward K. Ledward and Mrs. Ledward; and Dorothy Mary, only daughter of Mr. William Page, F.S.A., and Mrs. Page, of Froggnal Cottage, Hampstead.

A marriage has been arranged, and will take place on July 5, between Joan, eldest daughter of Captain Berkeley Holme-Sumner, C.B.E., R.N., and Mrs. Berkeley Holme-Sumner, of 11, Ladbroke Square, W.11, and Mr. J. W. Gray, Royal Air Force, late the Gloucestershire Regiment, only son of Major Gray, Indian Army.

The engagement is announced of Captain M. P. O'Leary, M.C., 122nd Rajputana Infantry, eldest son of Mr. and Mrs. C. O'Leary, late Indian State Railways, with Olive Mary, eldest daughter of B. B. Osmaston, C.I.E., Chief Conservator of Forests, Central Provinces, India, and granddaughter of the late General C. H. Hutchinson, R.A.

A Constantinople correspondent of the *Morning Post* states that the most brilliant event of the summer season there was the marriage on June 24 of Miss Beatrice Johnson of New York, to Captain Russell Brazier, of London. The wedding took place in the British Embassy Chapel, and was followed by a reception at the American Embassy, at which the guests included practically all the Allied Diplomatic Representatives and the Naval and Military and business colonies.

APPOINTMENTS.

President Harding has nominated Mr. J. Morton Howell as the first United States Minister to Egypt.

Dr. Georgiadis has been appointed the Egyptian Institute representative, at the International Congress of Chemistry and Industry, to be held in July in Lyons and Marseilles.

The Secretary of State for India has appointed Sir Edward Albert Gait, K.C.S.I., C.I.E., late I.C.S., to be a member of the Council of India in the place vacated by Sir C. Arnold White, whose tenure of office has expired.

OBITUARY.

The death has occurred of Admiral Sir Lewis Anthony Beaumont. He first became prominent in the National Arctic Expedition of 1875-6. When Lord Northbrook went to Egypt in 1884 he accompanied him, and later filled many important posts.

We have received from correspondent the following personal details concerning Captain S. S. Bond, M.C., who was murdered on June 18 by Kurdish tribesmen while on service as Assistant Political Officer in the Mesul district, South Kurdistan. Captain Bond, who was at his death 27 years of age, was before the war with the Standard Oil Company at Constantinople. In October 1914, he joined the Army, and was wounded at Loos in the following year. In February, 1916, he proceeded to Salonika, and was subsequently attached to various units in Macedonia. Thence he went, in 1918, to Mesopotamia, where he joined the Dunster Force. He took part in the expedition that was sent to release the Armenians from Baku, his particular section being detailed to Lake Urmia, from the neighbourhood of which 80,000 Armenians were assembled and marched to Baghdad. On his return to Baghdad he went to the

Mosul district as Assistant Political Officer. He was taken prisoner at Suliemanieh in May 1919, but was released the following June; and it was at this time that he won his Military Cross. Afterwards he went on to Chemchemal as Political Officer of the district, and it was in this capacity that he was treacherously killed. Captain Bond, who knew French, German, Greek and Turkish, had learned to converse with the Kurdish tribes in their own language, and was extremely popular with the friendly Kurds. He was due back in England in September to be married.

INDIAN HONOURS.

The following honours, conferred on the occasion of the visit of the Prince of Wales to India, were announced last week:—

STAR OF INDIA.

G.S.I.

Sir Godfrey John Vignoles Thomas, Bt., C.V.O.
Captain Dudley Burton Napier North, C.M.G., C.V.O., R.N.
Colonel Rivers Burney Worgan, C.V.O., D.S.O., Indian Army.

ORDER OF THE INDIAN EMPIRE.

C.G.I.E.

The Earl of Cromer, K.C.I.E., C.V.O.

K.C.I.E.

Vice-Admiral Sir Lionel Halsey, G.C.V.O., K.C.M.G., C.B.

C.I.E.

Captain the Hon. Piers Walter Legh, M.V.O., O.B.E., Grenadier Guards.

ROYAL VICTORIAN ORDER.

M.V.O. (Fourth Class).

Major Reginald Lindsay Benson, D.S.O., M.C., Military Secretary to the Governor of Bombay.
Major Henry George Vaux, C.I.E., Military Secretary to the Governor of Bombay.
Commander Charles Ross Campbell, D.S.O., commanding R.I.M.S. Dufferin.
Major Kenneth Oswald Goldie, C.I.E., O.B.E., Military Secretary to the Governor of Madras.
Major Wingate Wemyss Muir, O.B.E., Comptroller, Viceregal Household.
Major William Holcroft Blood, D.A.Q.M.G., Royal Visit Section, Army Headquarters.
Major George Cumine Strahan Black, O.B.E., Private Secretary to the Governor of the Punjab.
Mr. Herbert Aubrey Francis Metcalfe, Indian Civil Service (Political Department).
Major Jack Rose Compton Gannon, Assistant Military Secretary to the Commander-in-Chief, India.
Lieutenant Archibald Douglas George Staunton Batty, A.D.C. to the Governor of the United Provinces.

K.C.V.O.

Vice-Admiral Sir Hugh Henry Darby Tothill, K.C.M.G., C.B., Commander-in-Chief, East Indies Station.
Sir John Barry Wood, K.C.I.E., C.S.I., Political Secretary Government of India.
Lieutenant his Highness the Nawab of Bulhawalpur.
Captain his Highness the Maharaja of Jodhpur.
Lieutenant-Colonel his Highness the Maharaj Rana of Dholpur, K.C.S.I.

His Highness the Maharaja of Dhar, K.C.S.I., K.B.E.
Colonel his Highness the Maharaja of Ratlam, K.C.S.I.
Captain his Highness the Nawab of Palanpur, K.C.I.E.
Mr. Geoffrey Fitzhervey de Montmorency, C.I.E., C.B.E., Chief Secretary to Punjab Government.

C.V.O.

Mr. Claud Alexander Barron, C.S.I., C.I.E., Chief Commissioner, Delhi.
Lieut.-Colonel Charles Kennedy-Craufurd-Stuart, C.B.E., D.S.O., Military Secretary to the Viceroy of India.
Major Cecil Hamilton Gabriel, Deputy Secretary, Foreign and Political Department, India.
Captain the Maharaja Kumar of Bikaner.
Nawabzada Haji Muhammad Hamidullah Khan of Bhopal, C.I.E., Minister in charge of Finance and Department of Law and Justice, Bhopal.
Rear-Admiral Henry Lancelot Mawbey, C.B., Director, Royal Indian Marine.
Mr. David Petrie, C.I.E., C.B.E., M.V.O., Deputy Inspector-General of Police, Intelligence Department, Government of India.
Lieut.-Colonel Frederick O'Kinealy, C.I.E., I.M.S., Chief Medical Officer to the Prince of Wales during his Royal Highness's Indian tour.
Mr. Frederick Austin Hadow, Agent of the North-Western Railway, India.
Rear-Admiral Lewis Clinton-Baker, C.B., C.B.E., Commander-in-Chief, East Indies Station.
Mr. Robert Erskine Holland, C.S.I., C.I.E., Agent to the Governor General in Rajputana.
Lieut.-Colonel William Frederick Travers O'Connor, C.I.E., British Envoy to the Court of Nepal.
Colonel Thomas George Peacocke, C.I.E., Director-General of Remounts Department in India.

G.C.V.O.

Major-General his Highness the Maharaja of Patiala, G.C.S.I., G.C.I.E., G.B.E.

M.V.O. (Fifth Class).

Rai Sahib Bahgwan Das, Deputy Superintendent of Police, Intelligence Department, Simla.

BRITISH EMPIRE ORDER.

C.B.E. (Civil Division).

Mr. Charles Stead, O.B.E., M.V.O.

O.B.E. (Civil Division).

Captain Frederick Sinclair Poynder, M.V.O., M.C., 9th Gurkha Rifles.

Mr. Hector Ratanji Kothavala, M.V.O., M.B.E.

M.B.E. (Civil Division).

Mt. John William Bertrand Gardiner.

Mr. Vas Dev.

Subadar Hira Singh, Rai Bahadur Ind. Med. Department.
Khan Bahadur Syed Asthar Abbas.

SECRETARIAT OR FOREIGN OFFICE?

Before the War Great Britain was able to pride herself that a change of government did not entail any change in her foreign policy, which by tacit agreement between the two chief parties had been lifted out of the sphere of purely party politics and was guided solely by a consideration of British Imperial interests, not by the pursuit of electoral advantages at home. To-day it would be a matter for congratulation if British foreign policy could claim such a sheet anchor as the stereotyped lines of party politics, instead of being subordinated, as it actually is, to the kaleidoscopic vagaries of international politics as interpreted, seemingly, by someone who has made no real study of foreign affairs. It would be interesting to have it authoritatively demonstrated in what way a single decision taken since the Armistice in regard to the Near East—a subject second in importance only to the German problem—has furthered the interests of the British Empire. With the loss of her dominant position in America in the eighteenth century, as we have recently been reminded, the axis of Great Britain's foreign policy was shifted from West to East, and has had to remain in the East. But when the British Government decided that the potential support of half-a-dozen Greek warships of minor tonnage was to be valued more highly than the goodwill of the Mohammedan world, the attempt was made to shift that axis back, if not all the way to the American hemisphere, at least as far as Western Europe, and that without the least thought given to the inevitable trend of the new orientation. The experiment, which has cost this country millions of pounds and a heavy expenditure of life, was merely an episode in the policy of living from hand to mouth that has been the order of the day in regard to foreign affairs. Great Britain at the instance of her Prime Minister has given pledges to the Arabs and promises in contradiction of them to the Zionists; she nailed publicly to the mast certain principles as her war aims and subsequent peace policy, and deliberately did violence to them as soon as the War was over. A definite undertaking was given by the Prime Minister to the Turks while they were fighting, in order to encourage them to make peace, and it was ignored as soon as the time came for fixing the terms of the peace settlement. Great Britain signified her agreement to a most barefaced partition of Albania, and only backed out of it when the United States publicly denounced the criminal violation of War-time pledges.

The list is capable of almost indefinite extension, but neither the recital nor the perusal of it can give pleasure to any patriotic citizen of the British Empire. Those who have been most conscious of the harm done to the British name have kept silent hitherto from a desire to say nothing that, by calling attention to the weakness and vacillation of our foreign policy, might have the effect of lowering still further British prestige abroad. But that prestige is already nearing the zero point, and only a radical change in methods of government at home can rehabilitate Great Britain in the eyes of those who have been accustomed to look up to her as a model in the past. The visit of the Italian Foreign Minister serves to remind the country how far it is still from the necessary change of method. Three years ago the fatal step of sending the Greek army to Smyrna was inspired by the British Government for the sole purpose of putting a spoke in Italy's wheel, at a time when that Government lacked the strength of mind to stand up

to Italian claims and actions in Asia Minor. To-day the same Government presents the appearance of being more or less in Italy's pocket, in order to have a make-weight against France on the Supreme Council. It is difficult to explain in any other way the sequence of incidents, small enough, perhaps, in themselves, but symptomatic in their cumulative effect, that is being reported from Albania, the Dodekanese and elsewhere. We yield to none in our desire to see the Entente between Great Britain, France and Italy a permanent force in world politics; but it can become this only on the two-fold basis of a complete understanding between the three Governments in regard to essentials and of mutual sympathy between the three peoples. Now no nation is going to follow its Government in any subtle balancing of *quid pro quo's* for some unrevealed object. When, therefore, the British public sees unfair discrimination being made against British interests in Near Eastern territories in which Italy enjoys special privileges, it will feel convinced that this is the work not of a true ally, but of a covert enemy. The fact that the British Government may have acquiesced in this unfair discrimination for reasons of its own, which will not stand publication, will not alter the case. A wedge will have been driven into the Entente that may prove its undoing when its solidarity is being put to the test. So too, with France. The sound instinct that lies behind the co-operation of the two countries may well rise superior to a conflict of views between the two Governments of the day over an ephemeral question, but it might be seriously undermined, as far as Great Britain is concerned, if it were discovered that the unfriendly acts of individual French officials abroad were part of France's policy or in any way endorsed by her Government.

The remedy for a thoroughly unsatisfactory state of affairs would seem to lie in the restoration to the British Foreign Office of its legitimate control of foreign affairs and in restricting the activities of the Supreme Council. In all that concerns the Near East the Supreme Council of the Allies for the three or four post-Armistice years will have made itself a by-word in history. If responsibility for the disastrous fiasco attaches to Mr. Lloyd George, who is the only Prime Minister who has been a member throughout this period, then the sooner the settlement of the Near East is confided to other hands on behalf of Great Britain the better. His failure in regard to the Near Eastern question does not detract from the merit of his achievements in other directions, but on this one point, unless a complete change of method is introduced, Great Britain is clearly heading for disaster, in which other nations will be involved. The British public may not have more knowledge of the subject than the Prime Minister, but it wants to get back to principles. It does not see why Greece should have been made to her own undoing the catspaw of the Allies' intrigues against one another, or why the Mohammedan world should have been set by the ears to the grave embarrassment of the British Empire; it believes that in politics, as in business, honesty is the best policy, whereas the few glimpses it has been able to obtain into the tangled skein of British foreign policy during the last few years reveal mainly dishonesty and intrigue. For all that the public knows the Foreign Office may have endorsed everything that has been done over its head by the Prime Minister; but there is a shrewd idea that if the Foreign Office had remained master in its own house, the more violent fluctuations of foreign policy would have been avoided. The sense of continuity and consistency is more strongly developed in a State Department than in a single individual who is distracted by a multiplicity of preoccupations. To the onlooker the handling in recent years of the Near Eastern problem presents the appearance of an uncongenial matter taken up grudgingly and fitfully, and laid aside at the first possible excuse. In the hands of the Foreign Office the problem might have fared better; it could certainly not have fared worse. It is high time that its vital consequences to the British Empire were appreciated, and that it received the attention that its importance merits.

TRANSJORDANIA.**Lord Milner's Visit to Petra.**

On the occasion of their stay this spring in Palestine, Lord and Lady Milner availed themselves of an invitation from the Emir Abdullah of Transjordan to visit the famous rock-hewn city of Petra. The great gorge in which the temples and other buildings are situated lies fifty-eight miles north-north-east of Akaba and some twenty-five miles from Ma'an, the southernmost station on the Hejaz Railway to which trains are at present

**AMMAN : The Theatre.**

running. The line was badly damaged during the War ; station buildings—nearly all substantial stone erections—and water tanks were blown up, and bridges destroyed. Since the Armistice it has not been possible to open the railway to traffic farther south than Ma'an, with a weekly train in each direction ; but it is hoped that within two years the whole line as far as Medina will once more be in working order, with sufficient rolling-stock available for a more frequent service.

**PETRA : The Approach by the Sik (Wadi Musa).**

The Emir's party entrained at Amman, the Rabbah or Rabbath-Ammon of the Old Testament (where Og, King of Bashan, had his capital and his "bedstead") and a Roman garrison town. Amman was restored during the reign of Ptolemy Philadelphus (B.C. 285-247) and renamed Philadelphia. Most of the ruins in and about the town, including a theatre, which must have been capable of seating 3,000 spectators, date from this period, an exception being the fine building on the uppermost terrace of the citadel, which is a well-preserved specimen of early Arab architecture. From Ma'an the journey to Petra was accomplished by caravan, for which a goodly number of horses, mules and donkeys, as well as a motor car, had been pressed into service.

Petra lies in a valley, some three-quarters of a mile long, north to south, which is enclosed on every side by perpendicular rocks of considerable height. The rocks are made up of a variety of different coloured strata of sandstone, containing much saltpetre, and the whole

**PETRA : The Temple of Isis.**

has a most beautiful effect. Petra was the Selah of the Old Testament, captured by King Amaziah. This name lasted down to Arab times, but was applied to the fortress only. Originally an Edomite town, Petra passed into the hands of the Nabataeans, an Arabian tribe, towards 300 B.C. In 310 B.C. it was attacked by the Greeks under Athenaeus, one of Antigonos's generals. At the end of the second century B.C. the district had become part of a Roman province under Trajan. The inhabitants became early converts to Christianity, and bishops of Petra are mentioned as attending the councils of the Church. By the fourth century A.D., however, its commercial importance had passed ; a century or so later the whole region was conquered by the Arabs, and Petra disappeared from history.

The approach from the east is by a narrow chasm flanked by rocks ranging from 80 to 200 feet high. In the ravine grow oleanders ; wild figs and tamarisks cling to the clefts of the rock. At the end of the

narrowing gully the visitor suddenly finds himself confronted with the Temple of Isis or Treasury of Pharaoh, the facade of which is some 85 feet in height, admirably sculptured and in a good state of preservation. Its beauty is enhanced by the rich red colour of the stone. The second story rests upon columns, but has broken pediments. Between these is a round tower ending in

PETRA : One of the Rock-Hewn Buildings.

a dome, the whole surmounted by a huge stone urn, which was supposed by the Bedouin to contain the treasure of Pharaoh. A few hundred yards farther along the Wadi Musa (tradition places here the scene of Moses striking the rock, Petra) is a magnificent amphitheatre entirely hewn in the rock, with thirty-three tiers of seats rising one above another. Facing it is a group of rock tombs, and as the Wadi, after bearing north, turns

COLONEL F. G. PEAKE, Inspector General of the Transjordanian Gendarmerie, and some Arab Sheikhs.

again westward, the traveller reaches the central portion of Petra, with ruins of temples and tombs on either hand. Many of the tombs, of which the entrances are visible high above the ground, are now inaccessible. The

picture as a whole is one of grandeur and desolation which loses nothing from its impressive setting in the midst of the desert.

We are indebted to Lord Milner for the photographs reproduced on this and the preceding page, and regret that considerations of space prevent the reproduction of a larger number in this issue.

THE I.C.S. EXAMINATION IN INDIA.

The results of the first examination ever held in India for the Indian Civil Service have, says *The Times*, been announced. Until after the war the only authorised personation was that held in London at the end of each July and open to all subjects of the Crown, irrespective of race or creed. The holding of competitive examinations in India is designed to promote the "Indianization" of the Service, which is ultimately to reach 48 per cent. of its membership. The examination was held at Allahabad last March. There was eligible a prescribed quota of candidates from the various provinces up to an aggregate of two hundred, but the number actually sitting for the examination was much smaller, as there were few vacancies in the service. The lists show that there were nine successful candidates, of whom three came from Madras and two from Bengal, while the United Provinces, the Central provinces, Bihar and Orissa, and Bombay each provided one.

A REMARKABLE PROPHECY.

Apropos of the Genoa Conference, a German writer, speaking of Giuseppe Mazzini, one of Genoa's most worthy sons, calls attention to a remarkable prophecy of his, which seems to have been generally overlooked. As long ago as 1836, Mazzini wrote as follows :—"The Austrian and Turkish empires will fall to pieces. The fatal blow will be struck by the Slavs. The Slavonic population of Bohemia is a very great danger for Austria in the event of war. The Czechs will combine with the Slavs of Moravia and probably with the Slovaks of Hungary. The development of these things may be postponed, but cannot longer be prevented. I believe that the conflict which will hasten a final decision will arise out of the Serbian question." Notable foresight, especially as in those days, the principality of Serbia was a baby in Europe, and was not to extend even as far as Nish till more than a generation later.

THE EUPHRATES & TIGRIS STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

NOTES AND NEWS.

Devonshire Square.
E.C. 2.

Sir Alexander McRobert.

The sudden death of Sir Alexander McRobert leaves a gap not easily to be filled in the industrial community of northern India. Sir Alexander stood for the combination of scientific knowledge with practical business ability. He was a lecturer in chemistry in this country before he went to Cawnpore; there his first work was to place the woollen industry on a firm and remunerative basis, while more recently he was actively associated with the formation of the British India Corporation, a combination of textile, leather, and engineering factories, which probably marks a new epoch in the industrial history of the country. But he was much more than a successful manufacturer. His handling of the housing question in overcrowded Cawnpore, together with his munificent gifts to the community, marked him out as an enlightened and far-seeing social benefactor; his wide experience and practical sagacity made him a counsellor of the utmost value, both to the Government and to everyone concerned in the economic development of the country; while the memory of his friendship will always remain to those who mourn his loss.

Egyptian Hotels.

In view of the conditions that have been prevailing in Egypt the report of the Egyptian Hotels for the year ended April last cannot be considered as other than very satisfactory. The earnings have been well maintained, the gross profits being £52,900 as compared with £56,700. The net profits offer a rather less favourable comparison with those of the previous year owing to the increased incidence of taxation, and the available total is £52,000 as against £61,000. It is proposed to maintain the dividend at the rate of 25 per cent., to place £5,000 to the special reserve as compared with £15,000, and to carry forward £10,000 as against £9,000. It remains to add that the balance sheet shows the company to be in a remarkably strong position.

Sudan Plantations.

The interim dividend declared by the Sudan Plantations Syndicate points very plainly to the favourable progress of the company's operations in the Sudan. The dividend is 15 per cent., while for the whole of last year the dividend was 15 per cent. Naturally the commencement of interim dividends has resulted in a sharp rise in the company's shares in anticipation that the return this year will be appreciably larger than before. The success of this company is the more welcome since it will help to convince the British investor of the great potentialities of a country to which he has hitherto paid very little attention—probably because he has heard so little of it.

Openings in Persia.

It is frequently the complaint of the British manufacturer that there are no adequate openings for machinery in the Near East. The fact is that little or no trouble has been taken to find them. There are plenty throughout the region in question; though in

some cases, as illustrated in the article on Persia in "Engineering Topics" this week, adverse conditions render the market inaccessible at the moment. Persia, it is pointed out, is in need of all kinds of machinery, "but poverty and political instability" make it impossible to obtain it. Ultimately the country will unquestionably provide a great market for machinery, and in my opinion it would well repay our traders to follow the advice given in the article in question, and to take steps now to cover the field. If they need an incentive it may be supplied by the list of the machinery required which shows the extremely wide range of Persia's needs.

The G.I.P.

The results obtained by the Great Indian Peninsula Railway during the past year make a poor showing compared with those of the previous period as a result of the great increase in expenditure that had to be borne. The gross receipts amounted to Rs. 13,73,61,991 while the expenditure totalled Rs. 12,56,71,184, the net revenue being Rs. 1,16,90,807 as compared with Rs. 3,18,80,321. Sir Charles Armstrong, at the general meeting of the company, said that the result of the year's working had been a disappointment, and added that the company had been "overburdened with expenses, a high level of salaries, a greatly increased cost of coal, heavy charges for maintenance of permanent ways, bridges, etc., and for the repair of wagons."

Outlook for the Company.

Since April 1 the company has been charging high rates and fares, but Sir Charles stated that this would not be sufficient, so far as could be seen, to produce a favourable balance, and economies under all heads were therefore necessary. The capital expenditure of the line, as in the case of all Indian railways, has been above the average, and it was pointed out that there are still many capital works in progress for which further expenditure is required, while additional rolling stock will have to be provided to deal with increased traffic. Sir Charles referred to the question of electrification, and expressed the hope that something would be decided shortly, pointing out that the electrification of the company's suburban system was an absolute necessity if the development scheme of the Bombay Government was to be a success.

Commentator.

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

COMMERCE AND INDUSTRY.

Reports from our own Correspondents.

CYPRUS.

Nicosia, undated.

Unsatisfactory Trade Position.

During the quarter ended March 31 last inland imports amounted in value to £371,882, as against £345,003 for the same quarter in 1921. Exports were valued at £194,161 as against £160,296. The balance still represents an unsatisfactory state of trade conditions, which is deplored in press comments.

Progress at Limassol.

Limassol continues to take the lead in town improvements, and municipal work in general. A large hotel and restaurant have been opened by M. G. Ioannides in a central spot on the sea front. This by far the most enterprising venture of its kind in Cyprus. The hotel is well furnished throughout. Amongst other attractions there is an organ worked by electricity. At an opening ceremony and entertainment given by the proprietor, there was a large attendance of guests, and numerous congratulatory telegrams were received. Limassol justly prides itself on the cleanness of its streets and surroundings, and travellers landing at the port are surprised by the contrast which the town offers to most others in the Levant. The large new market, due to the energy of the ex-Mayor, M. S. Araouso, is a great success. The present Mayor is placing an inscription over the main entrance recording the good work of M. Aranso. A large book-shop has been opened, and is the only one in Cyprus.

ALBANIA.

Tirana, June 19.

The Economic Crisis.

Albania is seriously affected by the economic crisis. There are enormous stocks of skins, wool, olive oil, wheat, and maize, which fail to find purchasers. The horses of Muzéké, which form an important article of export, are subject to a tax of 200 francs on their entry into Italy, which renders their sale almost impossible across the Adriatic.

The economic crisis is intensified by the fact that for the moment the trade of the country is restricted to relations with Italy and Greece, for it is only the vessels of these two countries that serve the Albanian ports. It is obvious that trade would be greatly developed in the ships of other countries would begin to call at the ports.

TOBACCO *versus* COTTON.

Egyptian Press Views.

(From a Correspondent.)

A proposal that tobacco should be grown in Egypt is being much discussed in the native press, *e.g.*, in the *Mokattam*, the *Akhbar* and the *Ahram*. A number of correspondents suggest that it would be more profitable to cultivate tobacco than cotton, the market for which is in an unsatisfactory condition, and calls loudly for the attention which the new "Cotton Association" is giving to it. Cotton, they say, is grown for the benefit of England. British manufacturers deal with it, and the manufactured articles are then sold in Egypt at high prices. Some advocate the establishment of factories in Egypt. Egyptians are quite capable of learning how to manufacture cotton goods which would soon render the country independent of European fabrics. Indeed factories should not be confined to the cotton industry. Carpet making and various other branches should be encouraged and established in the Delta. "We have,"

they say, "won our political independence; and it is now up to us to acquire our economic independence." As regards tobacco, little seems to be said on the essential question as to whether the climate and soil are suited to its cultivation. It will astonish old Anglo-Egyptians to read what is being said, as hitherto it has been generally understood that conditions were unfavourable for it both in the Delta and Upper Egypt; and that "Egyptian" cigarettes, which have obtained such a reputation, must always depend on the imported leaf. Should experience show that tobacco can be successfully grown, the important act of curing would have to be learnt and introduced. It will be interesting to see what comes of the proposal.

A good deal is being also said regarding the sugar factories, which are mostly under French companies. Complaints are being made that the *fellahin* are being unfairly exploited. Lands under sugar cultivation are worked under agreements with the factory owners, and the conditions laid down are said in many cases to press unfairly on the cultivators. There is a lack of any Government control, and the *fellahin* are calling upon the Government for some system of protection of their interests.

The interest taken in Egypt's mineral resources since Ismail Pasha Sidky lectured before the Geographical Society in Cairo, after his tour of inspection, has been increasing. The Government is being sharply criticised for allowing concessions and monopolies to be acquired by Europeans without sufficient regard to Egypt's interests. Henceforth the Government should see to it that the country has its fair share in all undertakings in which for the present foreign skill is required.

In every direction the Press is reflecting a strong desire that the country should shake itself free of all European control, and "live its own life" without any alien influence whatsoever. Needless to say, the papers are far from representing the feelings of the more thoughtful and far-seeing Egyptians.

COMMERCIAL BREVITIES.

A Bill is to be introduced for the creation of a rose oil monopoly in Bulgaria.

Official statistics show that the cement industry is one of the best developed industries in Yugoslavia, says the *Sudshawischen Lloyd*.

Sir Malcolm Hogg is to join the board of the London County Westminster and Parr's Bank.

A marked improvement is reported in the cable service between the United States and Constantinople during the last few months.

The American Film Co., Ltd., Prague, has declared a dividend of 10 per cent. for the past year. The net profits amounted to 1,363,500 crowns.

The chief of the Mines Department of the United States has arrived in Prague, in order to study the mineral situation in Czecho-Slovakia.

It is announced that the Roumanian Council of Ministers has decided to authorize the free export of all cereals except wheat and rye and their by-products.

The Eastern Extension Australasia and China Telegraph Company has declared a dividend for the three months ended March 31, 1922, of 5s. per share, payable, free of tax, July 15.

The Sudan Plantations Syndicate announce an interim dividend of 15 per cent. on account of the year to June 30, payable July 13, to holders registered June 30. Transfer books will be closed from July 1 to 7 inclusive.

Holders in the United Kingdom of the Greek Government 4 per Cent. Railway Loan of 1902 are advised that they may lodge at Hambros Bank, Ltd., 45, Bishopsgate, the talons from such bonds, in order to obtain new coupon sheets as soon as same are received from the Greek Government.

Coupon No. 40 of the Egyptian Salt and Soda Co. Five per Cent. first mortgage debenture, due June 30, will be paid on and after that date by the National Bank of Egypt, 6 and 7, King William Street, E.C. Talons attached to the above bonds will be exchanged for a further issue of coupons, numbered 41 to 60 inclusive, on presentation to the bank on and after June 30.

British Consular Reports.

V. BULGARIA.

(Concluded).

Industrial Development.

No important industrial developments have taken place; the mineral resources of the country remain entirely undeveloped as before the war, the only mineral production of any magnitude being from the State coal mines. The production for the first six months of 1921 shows a marked improvement on the previous year, while the total for twelve months will probably be the largest yet achieved.

In 1920 Bulgaria exported 37,977 tons of coal, which included 4,022 tons provided for the use of the French Military Authorities, and 29,920 tons delivered to the Serbian Government under the Peace Treaty: in the first five months of 1921 28,547 tons were exported, including 26,277 tons delivered to Serbia under the Peace Treaty. During these two periods only 807 tons and 154 tons respectively were imported into Bulgaria.

The industry which is most susceptible of immediate development at the present time is flour milling and to a lesser extent timber dressing. An extensive market could be found for Bulgarian flour in South Russia and Georgia, where the surviving mills are powerless to cope with local demands. Constantinople used also to be supplied by this country, but this trade was lost for the time being owing principally to the Consortium grain monopoly. A large flour mill at Bourgas has recently been completed by a Bulgarian on behalf of French interests and transferred to a Franco-Bulgarian company. This mill, which is about to start working, will have an output of 220 tons of flour per day. The timber trade is suffering owing to the timber export prohibition which is still in force. For the present timber dressing is confined to supplying local needs.

Railways.

Communications may briefly be summed up by stating that the Bulgarian railways have improved during the past year, both in regard to services and punctuality of running. Improvements would continue more rapidly if the finances of the Government permitted the purchase of much material which is required for replacement. In addition to certain developments in construction, which are also planned, the repair of locomotives and rolling stock is urgently needed. It is, however, doubtful whether much can be done, in spite of the large credits allocated, unless a loan from abroad is forthcoming. The Railway Department is probably the best administration in Bulgaria, but considerable improvement in the matter of contracts and adjudications is still necessary. It must always be remembered that the Bulgarian State Railways did not suffer as the Serbian system suffered during the war, and are better run than any other in the Balkans.

Shipping.

Danube navigation is only reviving very slowly. Bulgaria requires more shipping and better ports on the river before river navigation can become a valuable transport asset. The ports of Varna and Bourgas have, for their size, been quite active.

A word of warning to British shipping interests is necessary. The volume of trade to and from Bulgaria carried in British and Italian bottoms respectively shows a marked increase in the latter, at the expense of the former. Italian steamship companies, including the Lloyd-Triestino, by patient work and some loss in the past, during the post-armistice period, have secured the bulk of the Mediterranean-Black Sea and much of the North Europe-Black Sea trade. Italian ships have established regular sailings and cheaper freights, and have not hesitated to call for export cargoes from Bulgaria, even when little was forthcoming.

VI. ROUMANIA.

The following extracts are taken from the report of Mr. Alexander Adams, Commercial Secretary, H.B.M. Legation, Bucharest, on economic conditions in Roumania in 1921:—

As stated in last year's report the division of rural lands into small holdings will in the future form cause for less attention being devoted to the growing of wheat. On the technical side wheat growing is more difficult than maize. The ploughing depth for wheat sowing is greater than for maize, and the peasant will not

have the advantage for many years to come of being able to cultivate his small holding by means of steam ploughs and tractors. Ploughing for wheat done with animals means coupling more oxen to the ploughs than the peasant possesses. One, or at the most two, yoke of oxen comprise the stock of the peasant, and farmers state that it is not possible to plough efficiently for wheat sowing with this number. The wheat lands are usually heavy and need six or eight oxen to pull the plough where mechanical methods are not used. Before the war over 330 steam ploughs of one make alone were operated by the owners of large estates in this country. Most of these ploughs have fallen into disuse in consequence of the difficulty and cost of obtaining necessary spare parts. It has been stated also that wheat flourishes best when sown over a large area of land, and not only is the peasant's holding small but it is difficult to persuade him to grow wheat instead of his usual crops, principally maize. Wheat is not a crop which in case of need he could feed to his cattle, and the intellectual status of the peasant at the present time is such that he will probably continue to grow grain for his own use and that of his cattle, disposing of any surplus. Amongst the more enlightened it is possible that some part of this surplus may be provided for directly by sowing wheat on a certain portion of the holding, but this is a development which can only be made general by educational measures undertaken by the Administration.

The hopes entertained at the beginning of 1921 that grain exports would more than double those of the preceding year have not been fulfilled. The reasons why exports did not reach the figures expected are many. They include the drought under which Roumania lay during the summer of 1921. Thus harvest expectations were by no means fulfilled. Another cause which limited exports lies in the varying Government measures taken throughout the year, under which certain grains were first immobilised in the hands of the producers, then set free for internal trade, and again later in the year declared immobilised once more.

The Petroleum Industry.

The following short table gives the production of crude petroleum in Roumania each year since 1913:—

	Tons.
1913	1,885,225
1914	1,783,947
1915	1,673,145
1916	1,244,093
1917	517,491
1918	1,214,219
1919	920,437
1920	1,034,048
1921	1,163,780

The year 1913 was the high point of production in this country. The decrease since then is the measure of the destruction and disorganisation wrought by the war.

The petroleum industry has not only had to make good war damage but also to do its best against the economic handicap of a depreciating rate of exchange since the Armistice. The physical conditions of working might be overcome, as they were before the war but it would need an extraordinarily prosperous state of affairs and very high prices abroad to enable the industry to cope with the demands for internal consumption. At the present moment practically 70 per cent. of the total production of crude oil is necessary to fulfil the quota demanded for internal consumption, and it must be remembered that this quota is paid for in Roumania at very low prices. This great handicap in the future development of the petroleum industry has not yet been adequately considered. The ability to attract foreign capital depends largely upon the policy of the Roumanian Government, and failing continual capital alimentation from abroad the Roumanian petroleum industry cannot prosper and progress as it should.

In existing circumstances, it is not possible to expect energetic and sustained effort on the part of the oil companies to increase their production. The remaining 30 per cent. of production which is theoretically available for export encounters great difficulties before reaching any port of shipment. If it is to be sold overseas it must travel either by the single pipe-line now existing which, varying as it does in size along its Baicoi-Constantza stretch, and subjected as it has been in the past to

frequent interruptions at Cernavoda, is hardly an ideal method of transport, whilst a much greater percentage of loss has to be borne by petroleum using the pipe-line than was the case before the war.

After having reached the port of shipment the 30 per cent. of production is subjected to heavy export taxes before being loaded on board steamer. The export taxes are based upon a general theory that the amount payable should be in the region of 20 per cent. of the value of the product shipped. In addition a commission tax of 10 per cent. of the export tax itself is imposed.

As there is only one pipe-line, shipments of benzine must be made by tank car. The lack of transport need not again be mentioned here. The principal shipping port for petroleum products is Constantza, and only recently, in November last, was the rebuilding of the Borcea-Cernavoda bridge over the Danube sufficiently completed to allow of trains running over it. From the month of August, when exports of grain lessened and the need for railway transport for grain therefore diminished, exports of petroleum increased in October to nearly double those of any preceding month save March. In November and December even higher export was attained. This change for the better in the petroleum situation is accounted for by the change for the worse in the grain shipments and illustrates the inadequacy of railway transport to deal with those exports which are at present available.

The pipe-line to Giurgiu, from which petroleum is loaded into tank barges for distribution up the Danube, has worked as well as could be expected, but it is not able to afford any great amelioration of the situation.

The production for 1921 is slightly in excess of that for 1920, and this seems to show that relatively steady progress is being made, but it must be remembered that a good deal of the 1921 production was due to flowing wells and not to any large increase in the number of wells. The preponderance in production of the three largest companies, the Steaua-Romana, the Astra-Romana and the Romano-Americana, is still sustained.

Amongst other causes which hindered production, was the failure of the Society "Electrica" of Campina to provide electric current sufficient to enable the working of the wells, as well as boring operations, to be continued without interruption. Some of the oil companies have installed gas and steam engines for these operations and are thus independent of the electric supply. Another cause militating against development in the industry is the delay on the part of the railroad administration in paying for the petroleum products supplied to it. This was mentioned in the last report on Roumania, and is still in existence.

The total exports of petroleum products during the year amounted to 362,000 tons as against 246,000 tons in 1920.

The above résumé shows briefly the reasons why the exports of petroleum must not be expected to attain pre-war figures for many years to come.

Coal Production.

During the year under review the production of coal has not been very great in consequence of discontent with existing conditions on the part of the workers and employers. Shortage of railroad transport has led to congestion at the loading platforms, whilst coal prices have not permitted employers to pay what the men considered an adequate wage. The price of coal for use on the State railways is fixed by the Government and up to the present about 80 per cent. of the production has been handed over for this and other Government purposes. Delays in payment occur as in the case of petroleum.

Before the war about 350,000 tons of coal and foundry coke, including gas coal, were imported from abroad, principally from the United Kingdom, and during the past year one or two cargoes of coal have found their way to Roumania, but difficulties have been experienced in disposing of the coal at the prices in lei necessarily demanded. One of the consequences of this practical cessation of the import of coal and coke for industrial purposes has been an extension in the demand for petroleum fuel, and the Government in its fixing of the prices of petroleum for internal consumption now finds itself supported by all those industrialists who, during the stress of the last few years, have adopted petroleum fuel for their factories. So long as the prices fixed for petroleum products in Roumania remain on anything like their present low levels no factory owner will turn to imported coal or coke as a substitute.

As regards shipments of gas coal to Roumania the companies which supplied gas to the town populations have not been able to secure such an increase in their tariffs as would enable them to import gas coal freely from abroad. At one time in Bucharest

the gas was made from petroleum and produced noise rather than light. As conditions gradually improve and currency inflation ceases the general level of prices in Roumania will acquire a certain stability and it may be expected that coal imports will be resumed.

(To be continued.)

RUPEE INDUSTRIAL SHARES.

Quotation on London Exchange.

It will be good news to those interested in rupee shares that arrangements are now being made with a view to their being quoted on the London Stock Exchange. One can only wonder why this very obvious step should not have been undertaken long ago, for the existing system places holders of shares at a very serious disadvantage in regard to dealings, while very naturally imposing a severe restriction on the market shares for the British public as a whole knows nothing of rupee shares, and would certainly not be interested in a market transactions in which have to be carried out in India.

For members of the Indian official and business community the change will be very important. Few of them pass their careers in India without becoming interested to a greater or lesser degree in the many opportunities that the country offers for sound investment. They may desire to retain their holdings on leaving the country for good, or the markets may be unfavourable for realisation, or, and this is by no means an improbable contingency, they may postpone the transaction until it is too late to complete it on the other side of the Black Water. And so it has to be done here, away from facilities for following the course of the markets. The case of the man who wishes to invest on this side is equally difficult. By the time the buying order has reached India there may have been a very vital change in the quotation, and what might have been a profitable transaction may be converted into the opposite.

Quotations on the London Exchange will remove these difficulties, and will in addition have the effect of broadening the field of investors interested in Indian shares. That is, of course, if the British public is induced to enter the market, and that can only be done by proper attention to publicity by the companies concerned. It is a habit with many companies to spend the minimum possible on advertising their meetings from the grossly erroneous view that money spent in this direction is thrown away. Of course it is nothing of the kind, but on the other hand most necessary expenditure in the interests of the shareholders, who in the absence of it would soon notice the effect on the quotations of the shares.

How soon the change will take place is uncertain; but it is not likely to be long delayed. The one point remaining to be settled is the rate of rupee exchange at which values will be converted into sterling. This is not likely to be difficult to arrange, and it will probably be found that 1s. 4d. will be the rate adopted. The quotation of rupee shares here, it may be pointed out, will involve the opening of transfer registers in London, and this, it is understood, the principal companies have expressed readiness to do.

The United States Mail Steamship Co., New York, who had applied for and obtained permission from the Ministry of the Interior to establish offices in Czecho-Slovakia, have withdrawn their application.

On the initiative of the Italian Commercial Museum lately established at Belgrade, a series of lectures will be given in Italy in order to illustrate the possibilities of trade between the two countries.

At a conference of the Palestine Development Council held here yesterday, says Reuter's New York correspondent in a message dated June 22, it was decided to raise 1,500,000 dollars towards the Rutenberg Jordan River scheme. A sum of 321,000 dollars was subscribed at the meeting, and promises for an additional 480,000 dollars were received from the representatives of various cities.

Engineering Topics.

PERSIAN MARKET FOR ENGINEERING PRODUCTS.

The Commercial Secretary to H.M. Legation at Teheran gives the following interesting particulars regarding the market for engineering products in Persia :—

No civilised country in the world is more devoid of machinery and more pressing in need of it than Persia ; yet no country in the world has so little present hope of procuring it. The very backwardness and poverty and political instability which require for their amelioration an active policy of industrialism based upon an extensive use of modern machinery, are the factors which impede industrialism and preclude machinery. Thus the backwardness is such that agriculture works with implements of the Biblical age and is too depressed and uninstructed to demand better. (There are, however, some exceptions.) Similarly the arts and crafts are carried on with mediæval tools by manual powers and processes, and these also are too hide-bound by hereditary self-complacencies to seek betterment. (There are, however, again some exceptions.) The poverty is such that all agricultural and industrial activities subsist from hand to mouth : mostly borrowing the seeds or the raw materials with which to make each new start, and repaying the loan from harvested crops or from manufactured goods. The political instability is such that the central Government cannot effectively control the outlying provinces, nor assure security to trade routes, nor attempt to repress the rising tide of anti-foreign unreason.

But something like this has always been the vicious circle of economic unprogressiveness in Persia, and in spite of it foreign commercial enterprise has made headway. It will still be so. The thing is not to be over-discouraged by difficulties nor over-elated by illusory prospects. The economic potentialities of Persia are such that some day when the awakening is more general this country will surely become a hungry market for machinery, and those foreign manufacturers who have quietly studied the ground and prepared their plans and pressed their opportunities in the difficult times will have the best chance.

Applying the foregoing general observations to the particular purposes of the British engineering manufacturer, the following further facts are to be noted :—Of engineering products the most obviously and urgently necessary are : agricultural machinery and implements ; boot-making machinery ; electrical plant, machinery and accessories ; grain-milling machinery, hardware and metal smallware ; internal combustion engines ; iron and steel works, plant and equipment ; mining, quarrying and metallurgical plant and machinery ; motor vehicles and road transport ; oil well plant and machinery ; paper making plant and machinery ; pumps ; railway and tramway plant and material ; refrigerating and ice making machinery and plant ; small arms and ammunition ; textile machinery ; hand tools ; wood working machinery ; wire. But the first and greatest of these needs, and indeed a pre-requisite to them all, is railway and tramway plant. This spacious country, as big as France and Germany combined, is landlocked by its own unrailed distances and cannot move in any progressive direction until it be given the means of mobility.

It will be understood that the introduction of engineering products in an ancient country which has only a dim and distant knowledge of the marvels of modern mechanics must be cautious at first, and deal gently with the ignorance and feebleness of the people. Machinery must be on the smallest scale, on the simplest plan, and of the cheapest standard ; so that by modest and immediately successful beginnings the idea may become implanted in the Persian mind that a machine

is not a consumer of money but a producer of money.

My Persian mercantile friends impress upon me the following details :—What would sell soonest would be small power-generating machines (to do the work of men who turn handles all day) ; small printing-presses (flat, not rotary) ; small illuminating plant ; cigarette-making machines (I am told that more than three million cigarettes are smoked in Persia daily) ; small cotton-spinning and wool-spinning machines ; small cotton-weaving and wool-weaving machines ; and small pumps for irrigation.

Power-generating machines must be portable and capable of developing from 1 to 4 h.p. on kerosene oil ; construction must be simple and the parts must be strong and durable. Small electric plants for generating current for lighting purposes, charging accumulators should be capable of being run on kerosene oil, and of maintaining from 50 to 250 lamps of 20 watts. The adjustment of the power to the load should be automatic. Printing presses may be actuated by hand, foot or motor, and should be able to take any size of paper from visiting card to foolscap size. Cigarette making machines must cut the roll of paper, cut the tobacco, roll the cigarette and fasten it. Thread-making or spinning machines must be hand or foot driven for the family factory as well as motor driven for the public factory. Weaving machines are in great demand, especially for cloths 36 to 42 inches wide. These also should preferably be hand or foot driven at first. Power-drive will come later. Agricultural machinery should be suitable for animal draught. Other immediate requirements are : circular saws, lathes (hand driven), emery grinders, hand drills.

The Commercial Secretary adds that he will be particularly glad to supplement the above details in any desired direction on receipt of an enquiry from any British engineering firm that may be interested in the Persian market.

Marine Diesels.

A good deal has been said in these columns from time to time regarding Diesel Engines, and THE NEAR EAST has advocated from the first their use for marine purposes. A few days ago a paper was read on the subject and in referring to the main points of difference in the design of marine Diesels as compared with the land type, the speaker pointed out that as the hull of the vessel was subject to more or less violent movement it did not form anything like as good a foundation as is provided for engines in factories and workshops.

This fact has long been known to engineers, and at one time it was feared that it would prove a very serious difficulty. We did what we could in the early days by means of bracing to obtain the required rigidity, but it was found necessary to provide for this in the engine frame or in the seating in order to avert troubles due to the main bearings getting out of alignment.

The speaker pointed out that crankshafts considerably stronger than those used in land practice must also be provided. To render it possible to start the engine from any position of the crank it is also necessary to use engines having a certain minimum of cylinders, that minimum being six for engines of the four stroke, and four for engines of the two-stroke type.

There is one point in connection with Diesel design which is that with the marine type unlimited cooling water is available. As the temperature can thus be kept within reasonable limits without trouble, there is practically no carbon deposit, a feature which is a great advantage in reducing the risk of seized engines, cracked cylinders covers and cracked pistons. All marine Diesels are now fitted with crossheads and guides, a departure from an earlier practice which has also reduced greatly the risk of piston seizure.

SHIPPING INTELLIGENCE.

RAILWAYS AND SHIPPING AT GALATZ IN 1921.

Mr. C. S. Clifton, H.M. Vice-Consul at Galatz, in his report on the commercial conditions at the Port of Galatz for the year 1921, states:—

721 vessels of all nationalities entered this port during the year under review. The figure for the preceding year was 448, and the tonnage for the two years was 973,240 tons and 527,140 tons respectively. The number of vessels cleared during 1921 and 1920 was 698 for the former and 443 for the latter, and the tonnage 938,002 tons and 517,984 tons respectively. These figures speak for themselves as showing the great increase in shipping activity during 1921 as compared with the previous year. The unusual sight of a large number of merchant vessels ice-bound has been the result of the sudden hard frost during December, when the river Danube became closed to navigation practically within 36 hours.

The congested state of the dock here, which was so noticeable during 1919 and 1920, had practically been remedied by the end of 1921. There is still a decided shortage of covered storage capacity, and although it was not found to be possible to carry out the scheme of extension which was projected for 1921, it is stated that building operations will start early in April of 1922, and should the programme be strictly adhered to the end of the year in question should see very considerable and necessary additions to the covered storage capacity fully carried out.

There was undoubted improvement in railway conditions during 1921 both in passenger and goods traffic. The former gives promise of shortly attaining the normal, and perhaps it may be said that too much preference is given to that service to the detriment of the latter. That a very appreciable amelioration is apparent in the goods traffic is quite certain, and such has had the effect of practically reducing the hastily organised road motor transport services to non-paying concerns. Many such undertakings are now seeking to dispose of their rolling stock at exceedingly low prices, and are still unable to find buyers. It has been the experience of motor-lorry owners that only the absolute non-existence of railway facilities, such as that which prevailed during 1919 and 1920, warrants the use of motor transport over roads in such bad condition which link up the various centres of trade in this country, not to speak of the difficulty of obtaining reliable and capable drivers for the vehicles in question.

So far as the activities of the railway repair shops at Galatz are concerned, it is stated on good authority that the output of work has increased 70 per cent. since the inception of the new rates of remuneration to the technical staffs, which are now based upon results. A shortage of the necessary materials, principally brass and copper, is still keenly felt.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, July 15).

Anchor Brocklebank Line.—S.s. Malancha for Calcutta (Birkenhead, July 1); s.s. Malakuta for Port Said, Colombo, Madras

and Calcutta (London, July 4); s.s. Mahronda for Calcutta (Birkenhead, July 15); s.s. Mahratta for Port Said, Colombo, Madras and Calcutta (London, July 18); s.s. Matheran for Calcutta (Birkenhead, July 29); s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (London, August 1); s.s. Mahanada for Port Said, Colombo, Madras and Calcutta (London, August 15).

Byron Steamship Line.—A steamer will leave Liverpool about June 30 for Patras, Piraeus, Constantinople, Constantza, Sulina Galatz, Braila, Volo, Salonika Smyrna, Bourgas and Varna.

Bibby Line.—S.s. Herefordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, July 5); s.s. Gloucestershire for Rangoon (Middlesbrough, July 8).

Clan Line.—S.s. Clan Mackinnon for Bombay and Persian Gulf (Birkenhead, June 30).

Cunard Line.—S.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, etc. (Glasgow, July 10, and Swansea, July 14); s.s. Malia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, July 11).

Ellerman Line.—S.s. Fabian for Gibraltar, Malta and Alexandria (Liverpool, July 20); s.s. Cressado for Gibraltar, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, July 29).

Ellerman's "City" Line.—S.s. City of Baroda for Calcutta (Birkenhead, July 3); s.s. City of Durban for Calcutta (Birkenhead, July 17); a steamer will sail from Birkenhead on July 31 for Calcutta.

Ellerman's "Hall" Line.—S.s. Borderer for Bombay, Karachi and the Punjab (Liverpool, July 11).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Malta, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

Glen Line.—S.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, June 29); s.s. Glenamoy for Port Said, Port Swettenham, Singapore, etc. (London, July 13); s.s. Glenariffe for Port Said, Port Swettenham, Singapore, etc. (London, July 8).

Harrison Line.—S.s. Inventor for Calcutta (Liverpool, July 8); s.s. Electrician for Port Said, Port Sudan, Aden, Mombassa, etc. (Birkenhead, July 13).

Henderson Line.—S.s. Chindwin for Port Said and Rangoon (Birkenhead, July 12).

Holt Line.—S.s. Troilus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29); s.s. Hector for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 29); s.s. Titan for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 29); s.s. Teiresias for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 6); s.s. Laomedon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, July 13).

Johnston Line.—S.s. Incemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, July 5); s.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Sulina, Galatz and Braila (Liverpool, July 22).

Moss Line.—S.s. Sitra for Gibraltar, Algiers, Malta and Alexandria (Liverpool, July 1);

Papayanni Line.—S.s. Gulf of Suez for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, July 5); s.s. Trentino for Melilla, Malta and Alexandria (Liverpool, July 12).

P. and O. Line.—S.s. China for Bombay (London, July 14); s.s. Nellore for Colombo, Madras and Calcutta (London, July 14); s.s. Nankin for Colombo, Madras and Calcutta (London, July 28); s.s. Plassy for Bombay (London, July 28); s.s. Malwa for Bombay (London, August 11).

P. and O. British India Line.—S.s. Mantola for Bombay and Karachi (London, June 30); s.s. Hatipara for Colombo, Madras and Calcutta (London, July 9); s.s. Mulbera for Bombay and Karachi (London, July 14); s.s. Merkara for Bombay and Karachi (London, July 28); s.s. Ethiopia for Colombo, Madras and Calcutta (London, July 29).

More activity is reported to have taken place in the mohair market of Constantinople during the last few months.

Notwithstanding the long period of dry weather, the Czechoslovak fruit crop is expected to be good, while the apple crop is anticipated to be about 30 per cent. better than last year's.

ANCHOR LINE

First-Class Passengers only.

LIVERPOOL TO BOMBAY:

KARACHI via Bombay calling at Gibraltar & Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.

RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

Cotton & Cotton Goods.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Saturday.

We have experienced a strong market during the past week, and the general tone has been healthy. Actual business, however, has been very irregular. It has been extremely difficult for producers to get buyers up in price, and most of the contracts arranged have been at figures a little below top rates. No particular change can be recorded in the outlook for the Egyptian cotton crop. Prices keep very firm, the tendency of values being against buyers. Egyptian yarns have hardened in quotation, and the turnover has shown some improvement. There has not been any general activity in piece goods in Egypt. Some difficulties appear to be experienced in financing trade in most of the Near Eastern outlets. Bids in shirtings in India have been too low and not much has been done, but some fairly substantial contracts have been put through in dhooties for Calcutta. Rather increased activity has been mentioned for China in standard makes and fancies. Steady buying has occurred for the Continent. American yarns have been dearer to buy, and the turnover has been of fair extent. There has not been much activity in export numbers for the Near East.

LIVERPOOL REPORT.

Messrs. Reynolds & Gibson report as follows for the week ended June 21 :—

A good business has taken place in this department. The enquiry has been of a more general character than has lately been the case, practically all Egyptian cottons being asked for on one day or another. The tendency is still to buy below Fully Good Fair rather than above it, but it has been quite refreshing to find some enquiries (which resulted in business) for "Good Sakellaridis," once again. There has been a slight recrudescence in the enquiry for Sparto, and very low cottons, but so far not much actual business has taken place. We understand that America has been purchasing this cotton fairly steadily in Alexandria, and that supplies there are not what they were. There is a possibility, therefore, that Liverpool may come in for a share of this buying, if it continues. Sudan and Tokar have sold very well indeed. Some good lines of Tokar Sakellaridis have been put through, and the lower cottons from last year's crop have also received attention again.

The fillip which trade has received this week has been caused by the spectacular rise in American Futures, due to adverse crop reports. Spot prices have ruled very steady with a hardening tendency, and it is remarkable that with our future market rising all week (and as we write, registering an advance of over $\frac{1}{4}$ d. per lb.), our official spot values here have only been raised $\frac{1}{4}$ d. per lb., and that to-day. This steadiness in quoted values has no doubt induced many spinners to buy, and it is our opinion that to-day's official quotations more nearly represent actual business than has been the case for some little time past. Extra Fine Sakellaridis (?) has been left alone, but even at to-day's quotation of 29.50d. it is still a "fancy price."

C.i.f. business, which last week showed rather more activity, has quietened down again.

Manchester reports speak of a firm and healthy tone, but business is still somewhat restricted, owing to the unwillingness of oversea purchasers to advance their bids in conformity with the rise here. Of the two, spinners appear to have met with more success than the manufacturer in obtaining better prices. During the last day or two, however, a more encouraging turnover in all quarters has taken place, and it is hoped that the anticipated result of a favourable monsoon in India will supply the necessary stimulus in that country. As we pointed out last week, the course of events at the present time is being governed almost entirely by the American crop reports, and while frequent reactions are almost a certainty, it looks as if current prices would not only be held, but would even be advanced above those ruling to-day. Total sales 5,500 bales (includes 2,200 bales Sudan). Quotations, with the exception of Extra Fine Sakellaridis, are advanced 25 points.

THE EGYPTIAN MARKET.

The Commercial Co. of Egypt in their report for the week ended June 16 state :—

The market during the past week has been good and fluctuations have been within narrow limits. The market has been governed mainly by the fluctuations of American cotton although there has been a firm undertone due to a somewhat better trade enquiry for the local product. We cannot say that the demand on the spot either here or in Liverpool has reflected the improved enquiry but this is probably due to the desired grades of cotton not being in good supply. The June contract of Ashmouni has been in request as a result of a local short interest; we do not think that this short interest is of any importance and is probably now reduced to very small proportions.

Spot.—Total sales this week amount to about 7,700 bales of which we estimate 6,000 bales Sakellaridis, 1,500 bales uppers, 150 bales brown and 50 bales white.

Sakellaridis.—There continues to be a fairly good demand for Fully Good Fair and below; staple cotton in these grades, however, is now extremely difficult to find. The basis for Fully Fair to Good Fair has considerably stiffened as this cotton is becoming scarce. The Good qualities are more or less neglected. A small business has been done during the week in Extra at high prices.

Uppers.—Business has been done in all grades at about the same prices as last week. There is a somewhat improved demand for the better qualities, which can still be procured on a fairly cheap basis.

Brown and White.—A small business has been done with no change in the basis.

Crop.—There is nothing of importance to remark on the growing crop: the plant is looking well.

MANCHESTER COTTON REVIEW.

The cotton trade review of the Imperial Ottoman Bank for the week ended June 24 states :—

General.—There is not much change to report from the conditions ruling last week. On balance the price of the raw material is again substantially higher, although there have been more fluctuations than recently. Spinners and manufacturers have, of course, adjusted their own quotations accordingly, but for the present, merchants here and buyers abroad do not seem disposed to accept the view that the higher values will be permanent, and they are apparently inclined to go slowly for the time being, and await developments. Enquiry is still on a very healthy basis, so far as quantity is concerned, but the prices offered are too much below present quotations for the majority of the business to be definitely arranged.

Yarn.—This section has had a fairly quiet week, the upward movement has been too rapid to be accepted immediately by consumers, and a short period of quiescence appears probable during which it is to be hoped the prices will stabilise. Demand has been principally on Continental account. Spinners prices are raised from $\frac{1}{4}$ d. to 1d. per pound over those ruling last week.

Cloth.—The considerations mentioned above with regard to yarn apply equally to the cloth market. Actual business has probably been less than in recent weeks, though enquiry has been large and plenty of business is available at the prices ruling only a short time ago. Unfortunately, of course, it is impracticable for manufacturers to accept those prices now. Demand for China has improved whilst trade with the Continent has been good. The Near East continues very quiet.

Raw Cotton.—As stated above prices are considerably higher on balance. Early in the week the tone was very strong, but reports regarding the new American crop have been more favourable towards the close and there was a slight reaction. There has been a considerable amount of buying on behalf of the trade.

Closing prices are as follows :—American Fulling Middling 13.74, last week 12.93; Egyptian Fully Good Fair, 20.00, last week 19.75.

BRITISH COTTON GROWING ASSOCIATION.

The report of the British Cotton Growing Association for the year ended December 31 states that the shipping facilities for cotton during the year have been very satisfactory, and the cotton is now coming forward from the various Colonies with less delays than for some years past. As a result of representations which were made to the steamship companies further very substantial reductions have been made in freight charges. It is satisfactory to report that African cotton is now in better favour with Lancashire spinners, and now that the different qualities have become more widely known there is a greater demand for the cotton. From February to August, 1921, values of cotton ruled very low, and although the number of bales marketed by the Association during the year easily constitutes a record, the value of the cotton is slightly lower than in 1920, when prices were abnormal during the greater part of the year.

The accounts show a surplus for the year's working of £16,702 14s. 6d., which increases the excess of income over expenditure to £26,513 17s. 10d. Full provision has been made for depreciation, also for income tax and in respect of corporation profits tax. This is an extremely satisfactory result, as on July 6, 1920, the Association guaranteed to pay the native cultivator in Nigeria over a period extending to June 30, 1921, a price of 3½d. per lb. of seed cotton for the indigenous variety, and 4½d. per lb. of seed cotton for the exotic variety. This guarantee at one time involved the Association in a total gross loss of over £300,000, and for the greater part of the year there was every reason to believe that this loss would be even more serious, as through the slump in trade there was no demand for this particular class of cotton, and prices of American "futures" were extremely low. Fortunately towards the autumn values of American cotton improved considerably, which also brought about a demand for outside growths. This circumstance, together with careful management of hedges, enabled the Association to offset this loss and show a profit. The council are convinced that their action in giving the guarantee, and maintaining the price in spite of adverse market conditions, at a time when other produce was almost unsaleable, will go a long way towards the development of cotton growing in Nigeria.

There has been a considerable increase during the year in the production of cotton in the various parts of the Empire. The estimated amount of cotton grown in new fields in the British Empire during the last six years is as follows:—(in bales of 400 lbs. each) 1916 78,800, 1917 72,600, 1918 54,900, 1919 79,600, 1920 105,800, 1921 165,100.

Sir Aubrey Brocklebank, who has been appointed a director of the Suez Canal Company in succession to the late Sir Thomas Sutherland, is the third holder of the baronetcy, created in 1885 and succeeded his father eleven years ago. Sir Aubrey, in addition to being a director of the Cunard Company, is the head of Messrs. Thos. & John Brocklebank, Ltd., whose shipping connections with India are well known and whose vessels make much use of the Canal.

COMPANY NOTES AND REPORTS.

Egyptian Hotels.

The report of the Egyptian Hotels for the year ended April 30 states that after charging all expenses in connection with the working of the hotels, the profits of the hotels were £52,852 12s., as compared with £56,675 4s. 4d. for 1921. After providing for the charges payable in London and Cairo, including taxation under the Finance Acts, the accounts show a profit of £46,234 0d. The balance of undivided profit brought forward from last account is £9,081 13s. 8d. From this has to be deducted depreciation of plant, fixtures and fittings at hotels £3,352 3d., leaving an available balance of £51,963 14s. 2d. The directors recommend (1) The payment of a dividend of 5 per cent. per annum on the preference shares for the year to April 30, absorbing £5,750; (2) the payment of a dividend on the ordinary shares of 25 per cent. for the year, which will absorb £31,250; (3) to place to special reserve £5,000; £42,000; leaving a balance to be carried forward of £9,963 14s. 2d.

Meeting offices of the company 11, Ironmonger Lane, June 30, 11.30 a.m.

Bombay Baroda and Central India Railway.

The gross earnings of the Bombay Baroda and Central India Railway Company for the year ended March 31, totalled Rs. 10,32,38,837, being an increase of Rs. 35,11,274; the net earnings were Rs. 2,37,71,790, a decrease of Rs. 80,48,571. The figures for the current year will, it is expected, show a considerable improvement owing to the introduction of revised rates and fares and the fall in prices of material. Out of Rs. 3,17,325 due to the company in respect of 1921-22, Rs. 1,70,061 was remitted to England in December last, producing £11,116, and the balance is in course of remittance. An interim dividend of 1½ per cent. was paid in January last in addition to a guaranteed interest of 1½ per cent. then due, and the directors recommend a final dividend of 1½ per cent., making a total payment in July of 3 per cent. and a return for the year of 6 per cent. The payment of 6 per cent. for the year involves taking about £30,000 from the profits held in reserve in stockholders' revenue account, established for the purpose of equalising dividends.

Stock and Share Markets.

BUSINESS RESTRICTED.

Gilt-edged Steady.

(From Our Own Correspondent.)

London, Tuesday morning.

A very quiet tone has again prevailed in the markets, and business with the exception of a few sections has been on a most restricted scale. So far there have been no signs at all of the expected activity that led to the alteration to 4 p.m. closing. It will come in due course, but at present conditions inspire hesitancy in the ordinary investor. There is no telling now what will happen in Ireland, and until the course of events there is more certain that island is going to be distinctly a bear point for all markets. Elsewhere too the situation has altered for the worse since last week, and it would seem possible that events in Germany may delay the settling down which is so ardently to be desired in the interests of the world.

Practically the only bright spot during the week has been provided by Gilt-edged which after drooping somewhat have tended to reflect the further reduction in the Bank Rate. The result of the Indian loan was felt in some directions, there being a tendency to realise, while the foreign group was upset by the unfavourable tendencies of the exchanges.

Gilt-edged Firm.

Turning to prices Gilt-edged are generally better on the week. Consols have gained 1-8 at 56.7-8, the Conversion Loan at 75.9-16 shows a rise of 9-16, while War Loan Fives are 99.15-16, a gain of 1-16. Indian stocks have been variable. The Seven per cent. loan is $\frac{1}{2}$ up at 113, the $3\frac{1}{2}$ per cent. loan is $\frac{1}{4}$ down at 65, while the 3 per cent. loan is unchanged at 56.

The foreign market has generally been dull, as the result of a good deal of Continental selling. French loans are lower, War Loan Fives being $\frac{3}{4}$ down at 41 $\frac{1}{2}$, while the 4 per cents. at 32 $\frac{3}{4}$ have shed a similar amount. German 3 per cents. have dropped $\frac{1}{4}$ to 2.3-16. Italian Rentes are unchanged at 21. Czecho-Slovak 8 per cents. have been a dull spot, closing at 92 $\frac{3}{4}$, while the Greater Prague Loan is $3\frac{1}{2}$ discount. Turkish Unified have been exceptionally active, and are 33 $\frac{1}{4}$. The disturbing influences have not affected the South American group, and stocks generally have been firm. Brazilians have risen in some cases, while Chilean are harder. Chinese issues have been steady.

Industrials Idle.

Extremely quiet conditions have obtained in the Industrial group. There have been some bright spots, but generally price changes are few and far between.

Textiles have been weak. Courtaulds are 49s. 7 $\frac{1}{2}$ d., at which they show a decline of 1s. 1 $\frac{1}{2}$ d., while Coats at 62s. have shed 1s. 9d. There has not been much doing in Tobaccos. Bats are unchanged at 76s. 9d., while Imperial Tobaccos are 5s. 3d. down at 61s. 6d. Dunlops are a shade lower at 8s. 7 $\frac{1}{2}$ d. Iron and Steel shares are about the same. Armstrongs are unchanged at 18s., Vickers are 6d. lower at 11s. 9d., while Guest Keens are 6d. up at 35s. Indian railways have been fairly firm. Bengal and North Western are unchanged at 129, Bengal-Nagpur have gained $\frac{1}{4}$ at 97 $\frac{1}{4}$, G.I.P. Guaranteed are 90 $\frac{3}{4}$, while Madras and Southern Mahratta are 102 $\frac{1}{4}$ at which they are a point lower.

Oils Depressed.

The Oil market has continued dull during the week, and yesterday was depressed owing to French selling following the issue of the Shell and Mexican Eagle reports. With a few exceptions shares are lower all along the line.

Anglo-Persian Ord at 4.31-32 are 1-16 up, while Burmahs at 5.5-16 are 3-32 higher. Mexican Eagles are 3.5-8, a gain of 5-16. Trinidad issues are about the

same. Apex are 2.1-16, at which they are 1-16 lower. Centrals at 2.9-32 are 1-32 lower, while Leaseholds are unchanged at 1.3-16.

Among Egyptians, Anglo-Egyptian B are 1-16 down at 1, while Oilfields of Egypt have shed 6d. at 5s. In the Roumanian group Roumanian Consolidated are 4 $\frac{1}{2}$ d. up at 17s., Dacia Romanos are 1-16 lower at 1, Steaua Romanas are 1s. down at 10s. 6d., while Phoenix are 3d. lower at 27s.

Banks Firm.

Banks have been a firm spot. Chartered of India at 18 $\frac{1}{4}$ are 5-16 up, National of India are 45 $\frac{3}{4}$, a gain of $\frac{1}{4}$, while P. and O. Banks are unchanged at 14.

Egyptian securities have been variable. Aboukirs are 3d. down at 21s. 3d., Beheras are $\frac{1}{4}$ down at 8, Egyptian Markets are 3d. up at 21s. 6d., while Gharbieh Lands at 1.3-16 are 5-16 lower.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 19:—

Season.—June 12 and 13—Monsoon strengthened on west coast of Peninsula. June 14 to 16—Strengthened in Peninsula with local extension to central India. June 17—Weakened on west coast of Peninsula, but generally active in Burma, north-east India, central India, west and interior Peninsula. Condition of Crops.—June 16—Bengal—Second sown jute progressing and monsoon conditions established. Bombay—Fair outlook in Bombay, Karnatak, Decan and Konkan, where sowing fairly general. No rain yet in Gujarat or Khandesh. Good outlook in Sind. Markets. Cotton.—June 15—Bombay cotton market steady. Fine M.G. Oomras Rs. 448 July—September. Bombay cotton arrivals from September 1, 1921, to June 10, 1922, were 3,050,000 bales as compared with 2,308,000 bales during the same period of last year. Piece-goods.—June 15—Bombay imported piece-goods market unchanged. Local goods sold well. Jute.—June 17—Calcutta jute and gunny markets quiet, 9 porters Rs. 18 and 11 porters Rs. 27. Tea.—At tea sales on June 13, selections from all districts were small, but good strong enquiries and keen competition for all tea, particularly Assam and Dooars. Market generally half anna dearer, except for medium and lower class Darjeelings, which were weaker. 19 988 packages sold to date at an average price of 11 annas 5 pies per lb. Crop returns to the end of May show an increase of 6 $\frac{1}{4}$ million pounds over last year. Rice.—June 16—Rangoon rice market firm. Special Straits Quality Rice, Rs. 505. Shellac.—June 13—T.N. closing price Rs. 190 sellers. Bank Rate.—Imperial Bank of India rate 5 per cent. from June 15. New Government of India Loans.—Five-year 6 per cent. bonds payable in 1927 and 10-year 6 per cent. bonds payable in 1932 notified. Both free of income tax. Bonds will be issued at par and repayable at par. Subscriptions will be received from July 3 to August 14. 5 $\frac{1}{2}$ per cent. War Bonds, 1922, will be accepted at par as equal to cash in subscriptions up to September 26. Bonds obtainable in London from Imperial Bank of India.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

126. Confectionery. British firm of manufacturers extending their export trade in best quality confectionery suitable for sub-tropical climates will supply details to enquiries from oversea buyers.

127. A Firm exporting all kinds of Metals and other merchandise to Egypt and India would like to get in touch with Importers in the Near East of similar goods.

128. General Commission Agent and Merchant in Cairo, Egypt, open to represent British manufacturers and merchants on commission. Can also export all kinds of Egyptian products.

129. Principal of old established textile manufacturing and Import Firm in Aleppo (Syria) now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

Near East Markets.

LONDON PRODUCE REPORT.

Oilcakes Lower.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in fair request at official rates. Tate's cubes and mineral water sugar at 56s. 6d. and 50s. 6d. are 6d. and 3d. up respectively. London granulated is 6d. up at 50s. 3d., and Lyle's granulated has gained 9d. at 50s. 6d. Foreign descriptions have been steady. West Indian crystallised has been firm at 43s. 6d., while white Mauritius is 9d. up at 47s. White Java has advanced 9d. at 20s. 10½d. Cane sugar quotations are :—June, 15s. 9d.; July, 15s. 9d.; August, 16s.; and September, 16s. White sugar quotations are :—June, 21s. 6d.; July, 21s. 6d.; August, 21s. 9d.; September, 21s. 7½d.; and October-December, 21s. 1½d.

Coffee.—Unsteadiness prevails. East Indian is unaltered at 118s., while Costa Rica has shed 3s. 6d. at 112s. Nairobi at 104s. is 2s. up. Quotations are :—July, 63s.; September, 61s. 3d.; December, 60s. 9d.; and March, 59s. 6d.

Dessicated Coconut.—Supplies are accumulating rapidly owing to the dull market.

Rice.—Firmness still prevails, but little business has been transacted.

Green Fruit.—A shipment of South African oranges has reached England this week, and the condition of the fruit shows a great improvement on previous arrivals. A small quantity of Spanish oranges are afloat. With their arrival the Spanish season closes. Large quantities of lemons have just arrived, and there are now ample supplies to cope with requirements. Apples are going out of favour owing to the competition of seasonable fruits. The demand for Egyptian onions is still improving, while quotations are still weak.

Oilseeds.—A further increase in prices has taken place. Indian linseed has increased 6d. to 21s., while La Plata is 1s. 4½d. up at 19s. 9d. Rapeseed is higher with Toria 4½d. up at 18s. 9d. No change is to be noticed this week in cottonseed. Egyptian black remains at 11s. 10½d. Sakellaridis is unaltered at 11s. 3d. as also Indian at 9s. 3d.

Oils.—A steady tone has been in evidence. Linseed oil is firm at 43s. 6d. Rape oil is steady. Crude is 45s., and refined has come to business at 48s. Cotton oil is steady all along the line with the exception of deodorized which is 5s. lower at 48s. Egyptian crude is 42s., technical is 41s. 6d., and refined is 48s.

Oilcakes.—The market has reversed again this week with quotations lower in all cases. Cottonseed cake and coconut cake have both shed 10s. at 170s. and 220s. ton respectively. Cottonmeal cake and linseed cake have also shed a like amount at 260s. and 270s. ton respectively.

The Bohemia Bank, which is connected with the New York Bank of Europe and other foreign concerns, has declared a dividend of 6 per cent. for the last year.

ROUMANIAN CROP REPORT.

Bumper Maize Yield Expected.

Messrs. Watson & Youell Shipping Agency, Ltd., of Galatz, report as follows under date June 10 :—

During the week sporadic rains have fallen and the weather is inclined to occasional thunderstorms. Observations during a trip by motor car from Bucharest to Braila confirm previous reports about the area of land under cultivation between these points and the excellent condition of the crops. Maize promises to be a very large crop.

The *Argus* of June 9 and 10 states that the rainfall has been somewhat irregular, a few districts having only had very little, and the early rains in the spring caused some damage to wheat. In general, however, the prospects are very satisfactory and abundant crops are anticipated, although the cultivated area is less than in previous years. According to recent information received at the Ministry of Agriculture, general rains had fallen, and the autumn and spring sowings including maize and beetroot, also orchards, vineyards and market gardens are doing well in the mountainous districts, some of which are reported as excellent, but in a few of those in the Old Kingdom such as Muscel, they are medium. In Maramuresh, Ardeal and Bucovina, oats, forage, maize, potatoes and beetroot are good, as are also vineyards and orchards. In Bessarabia and the Old Kingdom the crops on the plains and rising grounds with few exceptions are likewise good. In general, notwithstanding that the cultivated area is only about equal to that of the year 1921, which represents about 55 per cent. of the cultivated area in 1915-1916, the yield is expected to be very good as regards quality and quantity. Given further rain in June and July the maize crop will be extraordinary.

No official decision has yet been promulgated, but it is evident that the export of wheat, rye and their derivatives, with the exception of Government commitments, will continue to be prohibited, and it is stated that the decree of August 15, 1921, will remain in force, in respect to maize, until the yield has been ascertained. All other grain will be free for export, subject to export duty, which has still to be established and which is expected to be high and levied in gold or in foreign currency of the importing countries. It will probably be based upon the prices of grain in Roumania as compared with the ruling prices on foreign consuming markets and consideration will be given to compensate the Roumanian grower for the difference in price as fixed by the Government for the sale of wheat and rye in comparison with the prices of other grain in order to encourage the cultivation of wheat on as large a scale as possible. This will be in the nature of a bonus or premium to the farmer on wheat production in the country.

Transport.

The Roumanian State Railways possess a sufficiency of locomotives, but the number of trucks in commission is inadequate and they are now considering the means of tightening up their system so as to utilise their rolling stock to best advantage, especially during the rush months of August to the closing of navigation on the Danube in December. There is also a scarcity of grain stores at Braila and Galatz, a good many not having yet been repaired since the dilapidations caused by the war.

The Direction of the State Railways are in touch with grain exporters in order to arrive at the best solution of speeding up the reception of grain from railway trucks, storage and loading on board steamers, and meetings are being held at Braila. It is expected that the port of Braila will be able to handle 800 loaded trucks (10,000 kilograms each) *per diem*. The Dock Administration are also being urged to improve their rate of reception. The Direction has also decided to put in hand, with the least possible delay, improvements at the Galatz Dock Railway Station to enable it to receive 500 loaded trucks *per diem*. The immediate requirements are two lines of sidings of 400 metres each, two lines of sidings at the new basin improvement of the platforms for timber storage and storage at the docks for two months grain arrivals. The approximate cost of the foregoing is estimated at lei 2,500,000.

The paper currency of Egypt has dropped from £E.51,750,000 to £E.30,500,000 during the past two years.

PERSIAN GUM TRAGACANTH.

H.M. Consul-General at Bushire states that no duty has as yet been charged on the export of gum tragacanth. A tax is made, however, on the cultivation of gum tragacanth of 30 per cent. of its estimated value. This is paid by the cultivator after it is collected and before it is sold. It is, therefore, virtually a tax on the export of the gum.

Proposals have been in the Persian Parliament to impose a Customs duty of 30 per cent. instead of the tax, but so far this has not been sanctioned.

CURRENT PRICES.

General Produce.—Bacon: (Continental), 110s. cwt.; (Canadian), 130s. cwt.; (American), 101s. 6d. cwt.; butter (Danish), 203s. cwt.; (Australian), 190s. cwt.; (New Zealand), 190s. cwt.; cheese (Canadian), 85s. cwt.; (New Zealand), 88s. cwt.; lard 68s. cwt.; eggs (Danish), 14s. 6d. per 120; (Stryian), 9s. 9d. per 120; chillies, 160s. cwt.; cloves (Zanzibar), 1s. 2½ lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 125s. cwt.; (East Indian), 125s. cwt.; (Central American), 102s. 6d. cwt.; (Jamaica), 72s. 6d. cwt.; (Mocha Longberry), 105s. cwt.; (Santos superior), 70s. 6d. cwt.; ginger (washed Cochín), 52s. 6d. cwt.; nutmegs (110's to 90's), 11½d. lb.; pepper (Singapore black), 4d. lb.; (Muntok white), 7½d. lb.; pimento, 2 1-8d. lb.; raisins (Valencias), 55s. cwt.; sultanas (Smyrna) 119s. cwt.; currants (Vostizza), 71s. 6d. cwt.; (Amalias), 59s. cwt.; sugar (Tate's cubes), 55s. 6d. cwt.; (Lyle's granulated), 49s. 10½d. cwt.; (Mauritius crystals), 46s. 6d. cwt.; (West Indian crystallised), 43s. 9d. cwt.; (centrifugal), 15s. 6½d. cwt.; tapioca (fair Singapore), 2d. lb.; rice (Rangoon No. 2), 14s. 3d. cwt.; (bran Rangoon), £6 10s. ton; cinnamon (firsts), 11½d. lb.; mace (fair Singapore), 1s. 6½d. lb.; tea (Indian, common to good common), 1s. 1d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 1s. 2d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest) 2s. 7½d. lb.; Java (common to good common), 10½d. lb.; wheat (English white), 53s. 9d. qr.; wheat (Australian), 56s. 3d. qr.; oats (English), 37s. 6d. qr.; oats (La Plata, ex-ship), 25s. 9d. qr.; maize (La Plata), 30s. qr.; flour, 43s. 3d. sack.

Chemicals.—Acids: Boric 61s. cwt.; oxalic, 8½d. lb.; citric, 2s. 7d. lb.; tartaric, 1s. 5½d. lb.; ammonia (sulphate) £16 11s. 6d. ton; arsenic, (white powdered), £40 ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £12 10s. ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 115s. 6d. cwt.; Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £33 10s. ton; nitrate, £37 10s. ton; permanganate, 9½d. lb.; prussiate yellow, 1s. 3½d. lb.; sulphate (90 per cent.), £15 5s. ton; Sodium: Crystals, 120s. ton; bi-carbonate, £11 5s. ton; bi-chromate, 3d. lb.; alkali (58 per cent.), £9 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £23 ton; hyposulphite, £16 ton; prussiate, 9½d. lb.; nitrate, £15 3s. 3d. ton; glycerine (crude 80 per cent.), £60 ton; glycerine (industrial 1260 per cent.), £87 10s. ton; lemon oil, 3s. 4½d. lb.; quinine, 2s. 3½d. oz.; red lead, £37 ton; white lead, £41 ton; white ground lead, £49 15s. ton; sulphate of copper, £26 17s. 6d. ton; sulphate of iron 60s. ton.

Metals.—Aluminium, £102 10s. ton; antimony (English Regulus), £28 ton; bismuth, 9s. lb.; copper (standard) £61 18s. 9d. ton; copper (electro), £69 10s. ton; gold bars, 92s. 3d. oz.; iron (No. 3 Cleveland), 90s. ton; hematite (mixed number), 96s. ton; galvanized sheets (25 G), £16. ton; lead (soft foreign), £24 ton; manganese Poti, 1s. 1½d. unit; molybdenite, 30s. unit; nickel, £162 10s. ton; platinum, 360s. oz.; plumbago, £16 ton; quicksilver, £11 10s. bottle.

DECLARATION OF DIVIDENDS.

COUNCIL OF ADMINISTRATION OF THE OTTOMAN PUBLIC DEBT.

NOTICE to HOLDERS of the OTTOMAN 4 per CENT. UNIFIED CONVERTED DEBT. COUPONS Nos. 23-33 Inclusive.

The Council of Administration of the Ottoman Public Debt inform holders of the Unified Debt that, in accordance with Article No. 1 of the Décret-Annexe and without prejudice to their rights under that article, they have decided to authorize the PAYMENT of a further sum of 9d. on account of each half-yearly coupon of 8s. in respect of overdue coupons due March, 1915, to March, 1920, inclusive.

The provision for the payment of this amount is in the hands of the Imperial Ottoman Bank, London Agency.

Holders are invited to present the receipts which they hold in respect of the first payment on account (i.e., 1s. 3d. per coupon) at the Imperial Ottoman Bank, London, either direct or through the intermediary of any of the under-mentioned Establishments.

Banque Impériale Ottomane	Constantinople.
" de Paris and des Pays-Bas	Paris.
Comptoir National d'Escompte	"
Crédit Lyonnais	"
Société Générale	"
Crédit Industriel and Commercial	"
" Mobilier Français	"

Banca d'Italia	Rome.
" Commerciale Italiano	Milan.
Amsterdamsche Bank	Amsterdam.
Banque de Bruxelles	Brussels.
" de Paris et des Pays-Bas	"
" Centrale Anversoise	Antwerp.

The payment of this amount will be stamped upon the receipts, which will be returned to the holders at the same time as the amount is paid to them, all charges and expenses being borne by the depositors.

Holders who have not received the first payment on account (i.e., 1s. 3d. per coupon in respect of coupons Nos. 23-33 inclusive) can obtain payment at the same time of the two amounts, whether they possess the whole of these coupons or whether they hold only a part. For this purpose they will have to remit their coupons to the Imperial Ottoman Bank, London, direct, or through the intermediary of the establishments above-mentioned. In exchange for their coupons, accompanied by the necessary declaration of nationality, they will receive at the same time as the cash payment receipts representing their rights.

The payment of the amounts above-mentioned will take place from the 17th July, 1922, to the 1st March, 1923.

Constantinople, 24th May, 1922.

COUNCIL OF ADMINISTRATION OF THE OTTOMAN PUBLIC DEBT.

NOTICE to HOLDERS of the OTTOMAN 4 per CENT. UNIFIED CONVERTED DEBT. COUPONS Nos. 34-37 inclusive.

The Council of Administration of the Ottoman Public Debt inform holders of the Unified Debt that in accordance with Article No. 1 of the Décret-Annexe, and without prejudice to their rights under that Article, they have decided to authorize the PAYMENT in London of the sum of 6s. on each half-yearly coupon of 8s. to allied and neutral holders who are in possession of overdue coupons due September, 1920, to March, 1922, inclusive.

Provision for the payment of this amount is in the hands of the Imperial Ottoman Bank, London Agency.

Holders are invited to present the above-mentioned coupons at the Imperial Ottoman Bank, London, either direct or through the intermediary of any of the under-mentioned Establishments.

Banque Impériale, Ottomane	Constantinople.

CONDITIONS IN PERSIA.

Crop Outlook Better.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Kermanshah, May 20.

The state of the crops appears to improve. Abundant rains have already reduced the expectations of holders regarding the prices of cereals to the extent of about 15 per cent.

Mosul, May 20.

Business is at a standstill. Exchange is very scarce. A slight improvement in the prices of wool is to be recorded as the result of some consignments despatched to London. The other products of the country remain neglected.

Baghdad, May 27.

The market is very dull.

Baghdad, June 3.

The situation of the market is unchanged.

THE JAFFA MARKET.

The following report has been received by the Imperial Ottoman Bank from Jaffa, covering the month of May :—

Cereals.—The market is relatively quiet and without business, consumption regulating prices. The harvest of wheat and barley has already commenced. The total crop of these products is estimated at from 50 to 60 per cent. of that of the previous year; from that fact it is believed that prices will be higher than those now quoted. In view of this state of things merchants will interest themselves this year in the purchase and storage of cereals for winter, foreseeing an almost certain rise especially if the American and Australian markets for flour show some improvement.

Beans.—The yield of this product is estimated at only a quarter of that of the past year.

Broad Beans.—The crop of broad beans this year is short.

Water Melons.—The yield is expected to be very satisfactory. The first consignments for Constantinople and Syria will take place towards the end of June.

PHOENIX MORENI WELL.

The *Petroleum Times* states that it has received a cable from its Roumanian correspondent stating that the Phoenix Oil Company has now to its credit the largest oil well in the Roumanian fields. This is its No. 5 Moreni-Stavropoleos well. The well gave several hard flows during the last month, but has now settled down to continuous spouting, its daily output being approximately 50 wagons (500 tons). It has been flowing at this rate for several days, and is thus the largest oil fountain in the fields. The local management is enthusiastic of this early success, but anticipate several other good wells, for at least five which are now in drilling are near the oil sands. The company's Runcu No. 1 well, which gave a large production when it was brought in on March 26, has now had its damaged casing replaced, and will be shortly re-opened.

The seamen's strike at Calcutta is ended, and the men have agreed to resume work unconditionally.

Company Meetings

MORTGAGE COMPANY OF EGYPT.

Transference of Control to Egypt.

The fourteenth ordinary general meeting of the Mortgage Company of Egypt, Ltd., was held on June 22, at Cannon Street Hotel, E.C.

Sir Henry Babington Smith, G.B.E., K.C.B., C.S.I. (chairman of the London committee) presided.

The Secretary (Mr. S. R. Duncan), having read the notice convening the meeting and the report of the auditors, the Chairman moved the adoption of the report, and after referring to the transfer of the control of the company from the United Kingdom to Cairo, and consequent changes in the organization of the company—changes which, he stated, would be in no way injurious to the company and would, in some respects, strengthen the position of the holders of debentures and preference shares—said:—The economic position in Egypt, though in some respects difficult, may be regarded as extremely favourable when it is compared with that of many other countries. The Egyptian currency has been steadily maintained on a parity with sterling and the contraction of the paper currency from the very high level necessitated by war requirements and war prices has been effected without disturbance. I mentioned last year that the note issue of the National Bank of Egypt had fallen from £E.68,200,000 in 1919 to £E.34,500,000 in 1921. At the end of March last it had fallen further to £E.31,112,000. The main reason for this flexibility and steadiness is that the currency was not increased for the purpose of meeting budgetary requirements, but for actual economic needs, and that it was backed by investments in short-dated British securities immediately convertible into cash.

The 1921 Cotton Crop.

The cotton crop of 1921 was a poor one. It is estimated at 3,300,000 kantars, as against more than 6,000,000 kantars in 1920. This was due partly to the restriction of the area to be planted with cotton, and partly to the poor yield. There was a large carry over from 1920, and much cotton was held up in the provinces. The arrivals in Alexandria up to the end of May are close upon 5,000,000 kantars, of which about one-third must have come out of stock in the provinces. The price has kept up fairly well, although, of course, at a much lower level than that reached in 1920. The average price in Egypt has been just under 35 talaris or about double the pre-war price. The Liverpool price has varied between 28½d. and 16d., and it now stands at 19½d. The prospects for the current year are fairly good. The crop will be a small one as the area is still restricted; but although the Nile is a very low one, there will probably be enough water for the amount of cotton grown. Old stocks have been greatly diminished, and as there are some signs of revival in the cotton industries, it seems that Egypt need not fear a heavy fall in price. At the same time, the cost of production has fallen, so that if the present price is maintained, the cultivator's profit will be increased.

You will see in the board's report a table giving the amount invested in First Mortgages at the end of each year since the company's business began. The figure for March 31 of this year was £3,122,024, an increase of £244,000 over the preceding year. It would have been easy to make loans to a much larger amount, but it was thought well to continue the policy of very careful selection and to accept no business that was not of a thoroughly sound character. The amounts granted in each case have been on a conservative basis in relation to the valuation of the properties mortgaged, and the rate of interest has been maintained at a satisfactory level.

Instalments in Arrear.

I called your attention last year to the increase in the instalments in arrear. There has been a further addition to this item during the last twelve months, and it now stands at £352,000 as compared with £240,000 in March, 1921. This increase is the result primarily of the unsatisfactory cotton crop, and of the less favourable results obtained by agriculture generally. An increase in arrears is never a feature in the business that can be regarded with satisfaction. The board believe, however, that, in the great majority of cases, the security is ample, and wherever there is any doubt sufficient provision has been made by the reserves set aside.

The funds required for the increase in loans and outstandings have been provided by further advances from the Agricultural Bank of Egypt, their loan now standing at £708,000 as compared with £474,000.

The Reserves.

Our reserves have been strengthened by the £10,000 added to the general reserve last year. They now stand at over £277,000, to which should be added £24,000, the difference between the cost price and the face value of the Debentures which have been purchased but not cancelled. We also hold in suspense the sum of £80,814 in respect of sales of properties. As I explained last year, this sum is receivable from purchasers in instalments and cannot be definitely treated as profit until it is actually received.

The balance of the profit and loss account amounts to £96,354 as against £80,310 last year. This enables the board to recommend you to maintain the dividend on the Ordinary Shares at the rate of 12 per cent., and to add £15,000 to the special reserve, leaving a balance of £44,603 to be carried forward to the next account.

Brigadier-General the Hon. Everard Baring, C.V.O., C.B.E., seconded the resolution, which was unanimously adopted.

GREAT INDIAN PENINSULA RAILWAY.

Heavy Expenditure.

The 145th half-yearly general meeting of the Great Indian Peninsula Railway Company was held on June 23 at the company's offices, 48, Copthall Avenue, London Wall.

Sir Charles H. Armstrong (chairman of the company) presided.

The Secretary (Mr. R. H. Walpole) having read the notice convening the meeting, the chairman, in moving the adoption of the report and accounts, said that the result of the year's working had been a disappointment and there was no surplus profit. They had been overburdened with expenses, a high level of salaries, a greatly increased cost of coal, heavy charges for maintenance of permanent way, bridges, etc., and for the repair of wagons, these two latter items being due in some measure to the difficulties and delays caused by the war. The percentage of working expenses for the year to gross receipts was 91.49, a very excessive figure, which must and would be reduced in the current year.

Their gross earnings for the year on the amalgamated system, including State lines, were 13.74 crores, a decrease of 9½ lacs or .08 per cent. on the previous year. Their expenditure was 12.57 crores, against 10.64 crores, an increase of 192½ lacs, or 18.08 per cent. The net earnings on the amalgamated system, excluding State lines, were 101 lacs, or 7.94 per cent. of the gross receipts, but this figure was subject to adjustment for interest and other charges. Interest on debentures etc. and on overdrafts from the Secretary of State now amounted to 141 lacs, and to this must be added their annual contribution under the contract to the Secretary of State of two crores of rupees. When these adjustments had been made, the credit item of 101 lacs was turned into a deficit of 240 lacs, and this was the result of the year's working. The net earning of 101 lacs barely equalled 1½ per cent. on the total capital expenditure of the undertaking, and as a large amount of the capital outlay had been provided by loans from the Secretary of State, on which interest at rates varying from 3½ to 6½ per cent. had to be paid, the percentage return on the expenditure prior to amalgamation was this year a minus quantity.

During the year they had collected over 87 lacs of surtax for Government, and if they could have included this amount in their accounts (for the surtax was nothing more than an increase in the rates for the carriage of goods) the deficiency would have been reduced to 153 lacs, as against the 240 lacs. This surtax had now ceased, and from April 1 they had been charging higher rates and fares, which would improve their position materially but would not be sufficient, so far as he could see at present, to

produce a favourable balance during the current year. Economies under all heads were, therefore, imperatively necessary, and all capital and renewal expenditure which could be avoided must be avoided until equilibrium had been reached. For the last few months they had been investigating their methods of working in India with a view of the strictest economy, and they hoped, as a result of this inquiry, which was still continuing, to reduce their permanent expenses by a considerable sum.

Their capital expenditure the last two years had been heavy and above the average, but this was due in a great measure to difficulties and delays caused by the war. There were still many capital works in progress on which further expenditure was necessary to bring them to completion. Additional engines and rolling-stock had also to be provided to enable them to deal expeditiously with the increased traffic they were being offered in nearly all districts. Unless they were in a position to do this, trade was apt to go elsewhere, and in the interests of the port of

Bombay they were most anxious to avoid a disability of this character.

As regards the current year, traffics so far were disappointing, although gross receipts were showing some increase, but this addition was due, he thought, mainly, if not entirely, to the higher rates and fares they were now charging. The trade position in India was improving, slowly, perhaps, but nevertheless steadily. The balance of trade had shown a tendency lately to swing round in India's favour, and if there was a good monsoon this year there ought to be better trade next season.

The last two years had been a serious blow to Indian trade from which it would take some time to recover. The monsoon on which so much depended had set in quietly, and rather early, and its future might, therefore, be followed with some anxiety, but the forecast for Western India was at any rate favourable. If last season's good monsoon should be repeated the country would be prosperous.

The report and accounts were adopted unanimously.
